Motivation

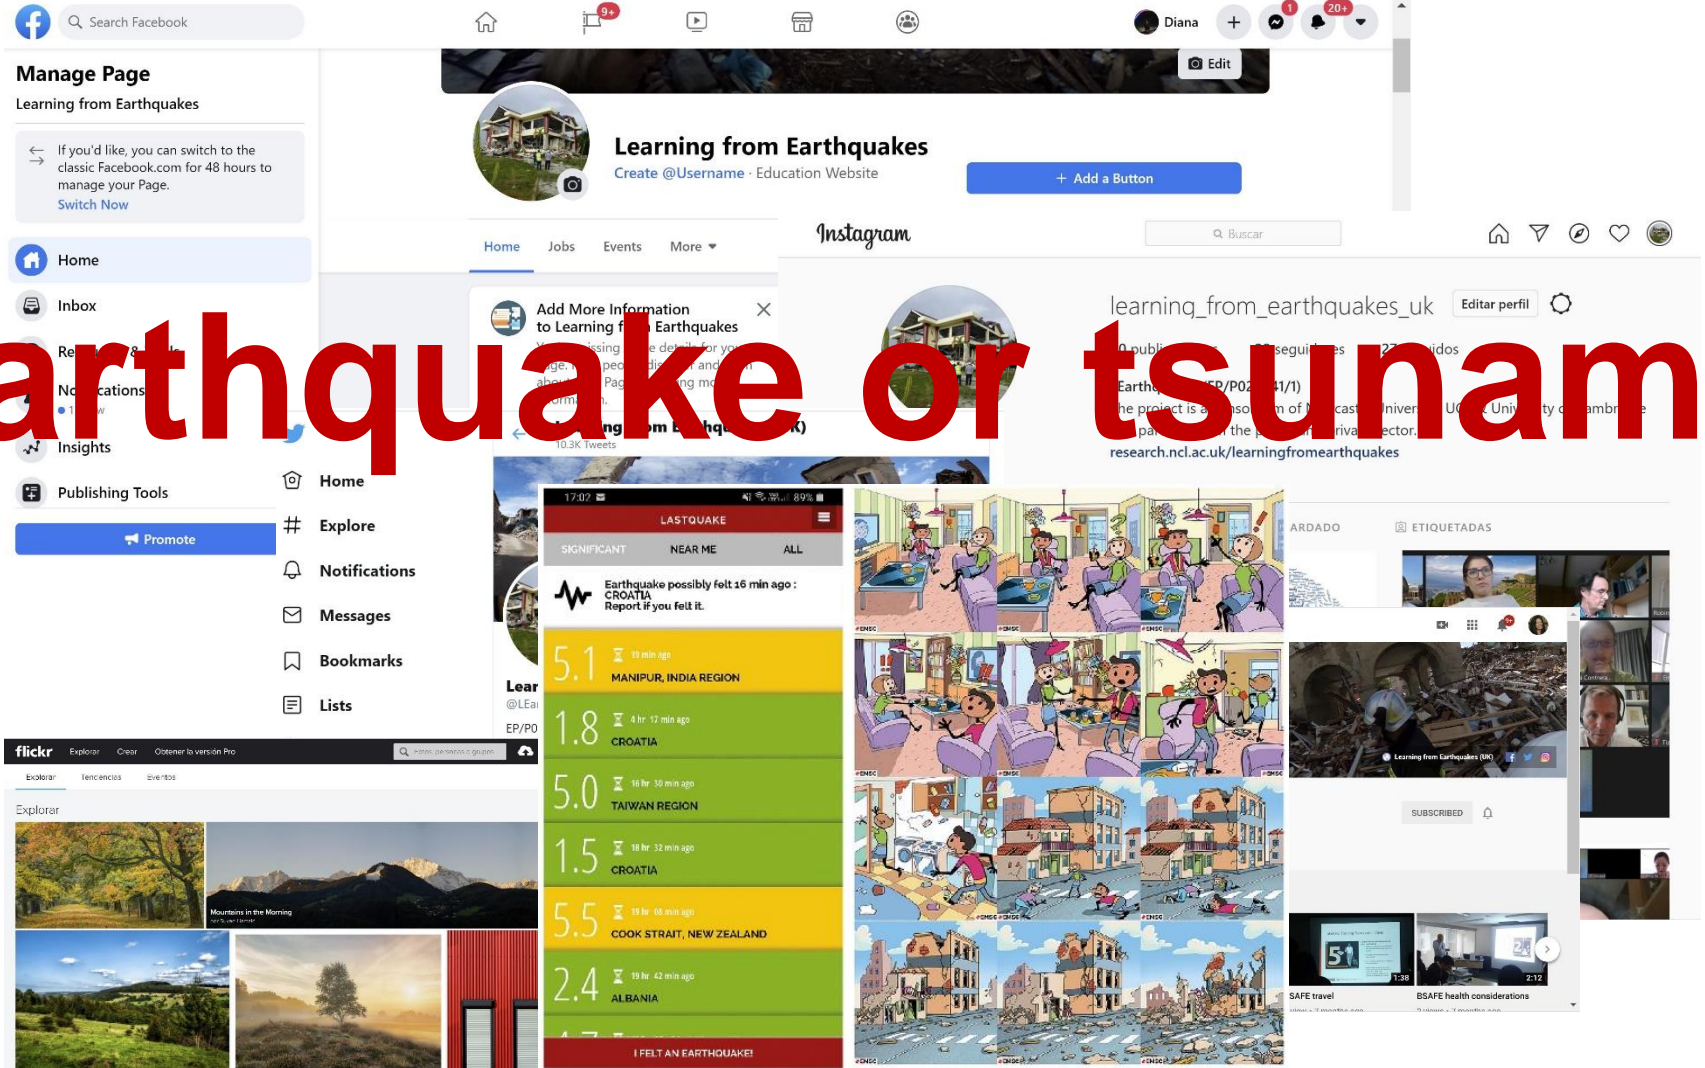

The collage illustrates the digital presence of 'Learning from Earthquakes' across various platforms:

- Facebook:** Shows the 'Manage Page' interface for 'Learning from Earthquakes', a notification to 'Add More Information', and a post from the Twitter account 'learning_from_earthquakes_uk'.
- Instagram:** Displays a post titled 'The Zagreb Earthquake of 22 March 1880' with a 'UK' logo.
- Twitter:** Features a tweet from 'Learning From Earthquakes (UK)' with 10.3K tweets, including a video thumbnail of a destroyed building.
- YouTube:** Shows a video player for 'learning from earthquakes uk' with a large image of a destroyed building.
- Other Platforms:** Includes a Snapchat logo, a TikTok logo, and a screenshot of a website with an 'OnlyFans' watermark.

Motivation

Video Player: SAFE travel | BSAFE health considerations

Motivation

This collage features several social media posts:

- Top Left:** A tweet from a user with a redacted name, dated Mar 22, mentioning "earthquakes during pandemic" and "#ZagrebEarthquake".
- Top Center:** A tweet from a user with a redacted name, dated Apr 3, stating: "A preliminary estimate of damaged buildings and exposure of the M5.4 #Zagrebearthquake (NW #Croatia) based on t' and #GHSL2015 data, processed with #EarthEngine".
- Top Right:** A tweet from a user with a redacted name, dated Mar 25, mentioning a national football team and relief efforts: "#ZagrebEarthquake #StayAtHome @HNS_CFF".
- Middle Left:** A tweet from a user with a redacted name, dated Mar 22, saying: "I just found out that Croatia got hit by a 5.4 Zagreb. My family is okay but it's just so upsetting to go through this especially with the virus happening".
- Middle Center:** A tweet from a user with a redacted name, dated Apr 15, thanking Slovakia for a donation: "Thank you #Slovakia for your generous donation, #solidarity and #help". It includes the hashtag "#ZagrebEarthquake".
- Middle Right:** A tweet from a user with a redacted name, dated Mar 22, praising the city: "Such a lovely city, #zagrebearthquake at such a difficult time #zagrebpotres".
- Bottom Left:** A tweet from @aquafromthehook, dated Mar 22, with the text "There was an earthquake here in Croatia a few months ago but still here". It includes a photo of a damaged silver car and a large pile of rubble.
- Bottom Center:** A tweet from Slovakia MFA (@SlovakiaMF), dated Mar 22, stating: "After a devastating earthquake hit #Zagreb, we responded to #Croatia's request for sleeping bags to assist those that need it." It includes a photo of a warehouse filled with stacks of sleeping bags and a forklift operator.
- Bottom Right:** A tweet from Goodable (@Goodable), dated Mar 22, stating: "After a 5.5 magnitude earthquake in Croatia, supporters of Dinamo Zagreb, the football club, volunteered to evacuate newborn babies from a damaged hospital. Then, they helped firefighters clear the streets." It includes a photo of people in winter clothing and masks pushing a gurney with a baby in a hospital setting.

The house really moved. Feel this one was the strongest since the big one. I felt very light. It was pretty violent, but it was short. It woke me up from my sleep. I was afraid it would continue. I tried to create the triangle of life next to the sofa. Nothing moved but I heard cracking. I thought it was because of the earthquake. Everything rattled for a few seconds. The cracks in our walls are getting bigger... Yep felt that one too. Short but strong 10:34 am Kuşadası - kadınlar Sea Mah. Happened 2 times. It woke me up. It took about 7 seconds..

Zagreb, the capital of Croatia, has seen a devastating earthquake for the first time after 140 years. Some parts of the city took on the scenery of World War II. Strangely enough, most Austro-Hungarian buildings are in good condition. Our wish is that nothing happens to sister Bosnia and Herzegovina. Zagreb

Results: 2020 Zagreb earthquake

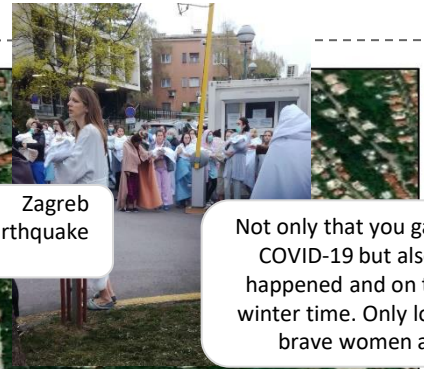

This morning, Croatia was hit with several earthquakes in the midst of the COVID-19 pandemic. We hope all of you are okay! Thankfully, our staff and their families are. Please stay safe everyone! Croatia Zagreb COVID-19

In the wake of the Zagreb earthquake, our thoughts are with the Croatian Meteorological and Hydrological Service. Their headquarters were damaged but thankfully the staff are all safe. National meteorological and hydrological services worldwide provide vital information for all and rise to the challenges they face.

Good morning Zagreb Hrvatska Croatia Earthquake Zagreb Earthquake

Not only that you gave birth during COVID-19 but also earthquake happened and on top of it all it is winter time. Only love for all these brave women and Zagreb!

In full quarantine due to COVID-19, a Magnitude 5.3 earthquake in Zagreb, Croatia, left severe material damage and several people injured, authorities reported. The earthquake occurred after 6 in the morning. bravo

earthquake in Zagreb this morning. coronavirus, mums with their newborns on the streets. It just started to snow. What is happening with the world ? Pray for Croatia

The doctors in Zagreb Croatia are true heroes even when the hospitals are destroyed from the earthquake they are still working hard and looking after the new-born

Results: 2020 Zagreb earthquake

The shock wave hit me directly into the house. The structure seems to have held up, but the house suffered damage

Loud, scary thunder and shaking, things falling from shelves, cabinets opening

University Hospital Centre Zagreb Rebro

Horrible experience, my flat is cracked. Traumatized, still sleeping at relatives. Do not know when will be able to relax and spend night at home.

It was like someone was trying to forcibly wake me up. At first I did not understand, but the second one was bad too. My city centre is destroyed

Terrible and creepy feeling

Some of damage on my building.... All floors have cracks like this...

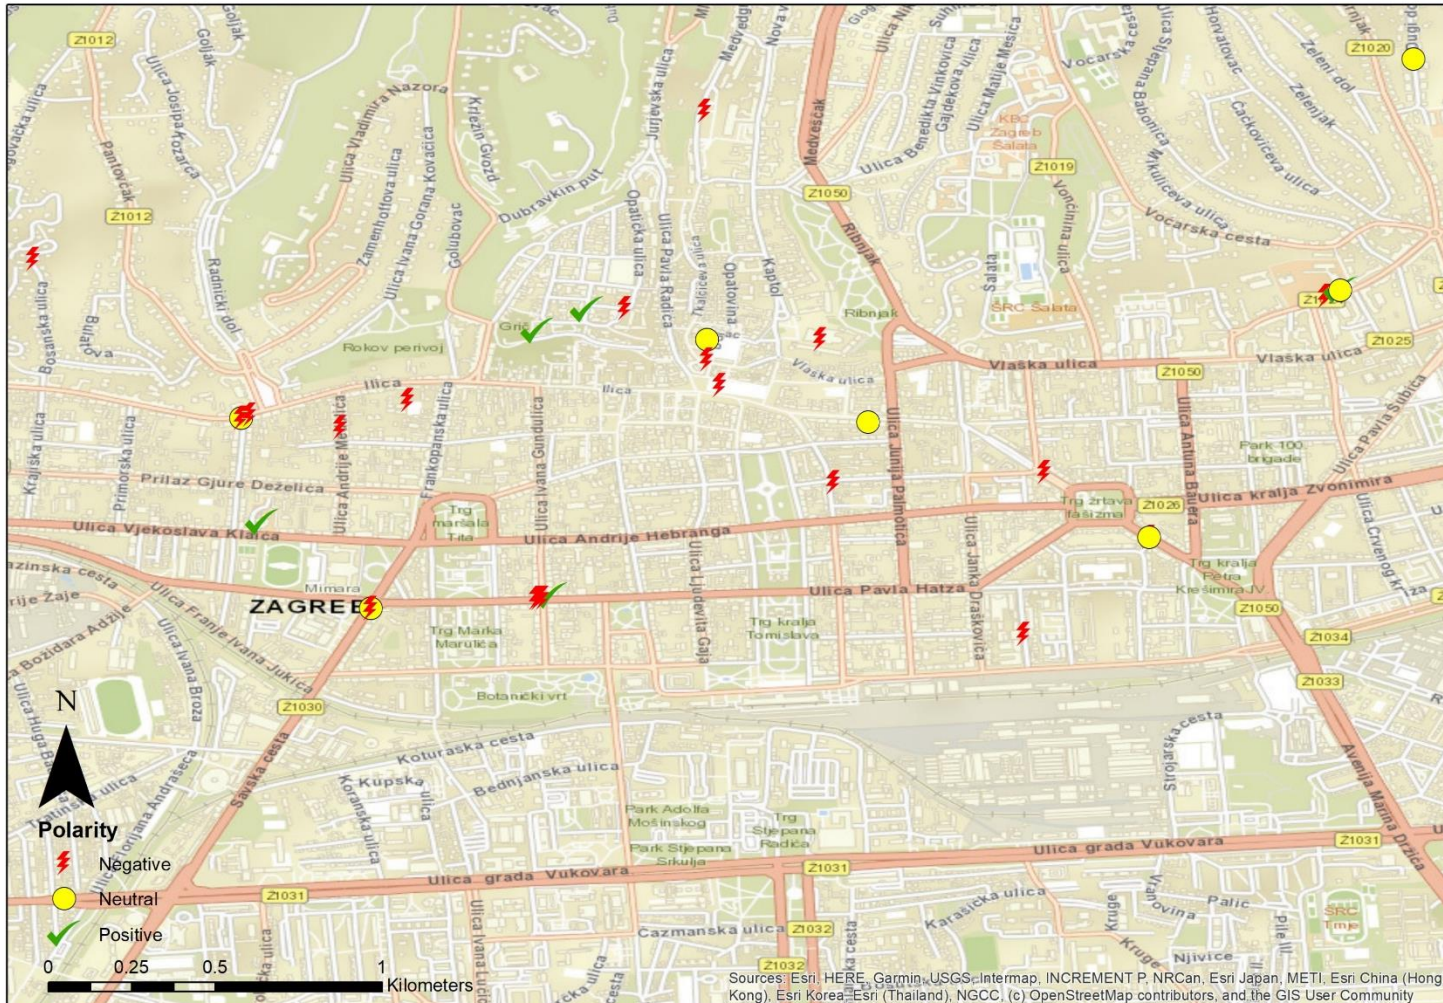

The feeling was awful, everyone was so scary. It was really loud and everything was shaking. There are many damaged buildings in Zagreb.

Rules

Polarity	Rules
Positive	<ul style="list-style-type: none">▪ Reports of light intensity▪ Reports of short seismic movements▪ Reports of slight shakes▪ Supporting and solidarity messages▪ Emergency response messages▪ Preparedness measures
Negative	<ul style="list-style-type: none">▪ Reports of long seismic movements▪ Reports of strong shakes▪ Reports of strong intensity▪ Reports of aftershocks▪ Report of damages in buildings and/or lifelines▪ Reports of injuries and/or casualties▪ Reports of fear and anxiety
Neutral	<ul style="list-style-type: none">▪ Seismic information

Rule-set for polarity classification of text data produced by LastQuake app users.

Results: 2020 Aegean earthquake

Positive

- 'Low damage'
- 'We felt it, but it was short'
- 'Everybody should respect and act according to scientific rules and regulations. Otherwise, everybody will lose'

Negative

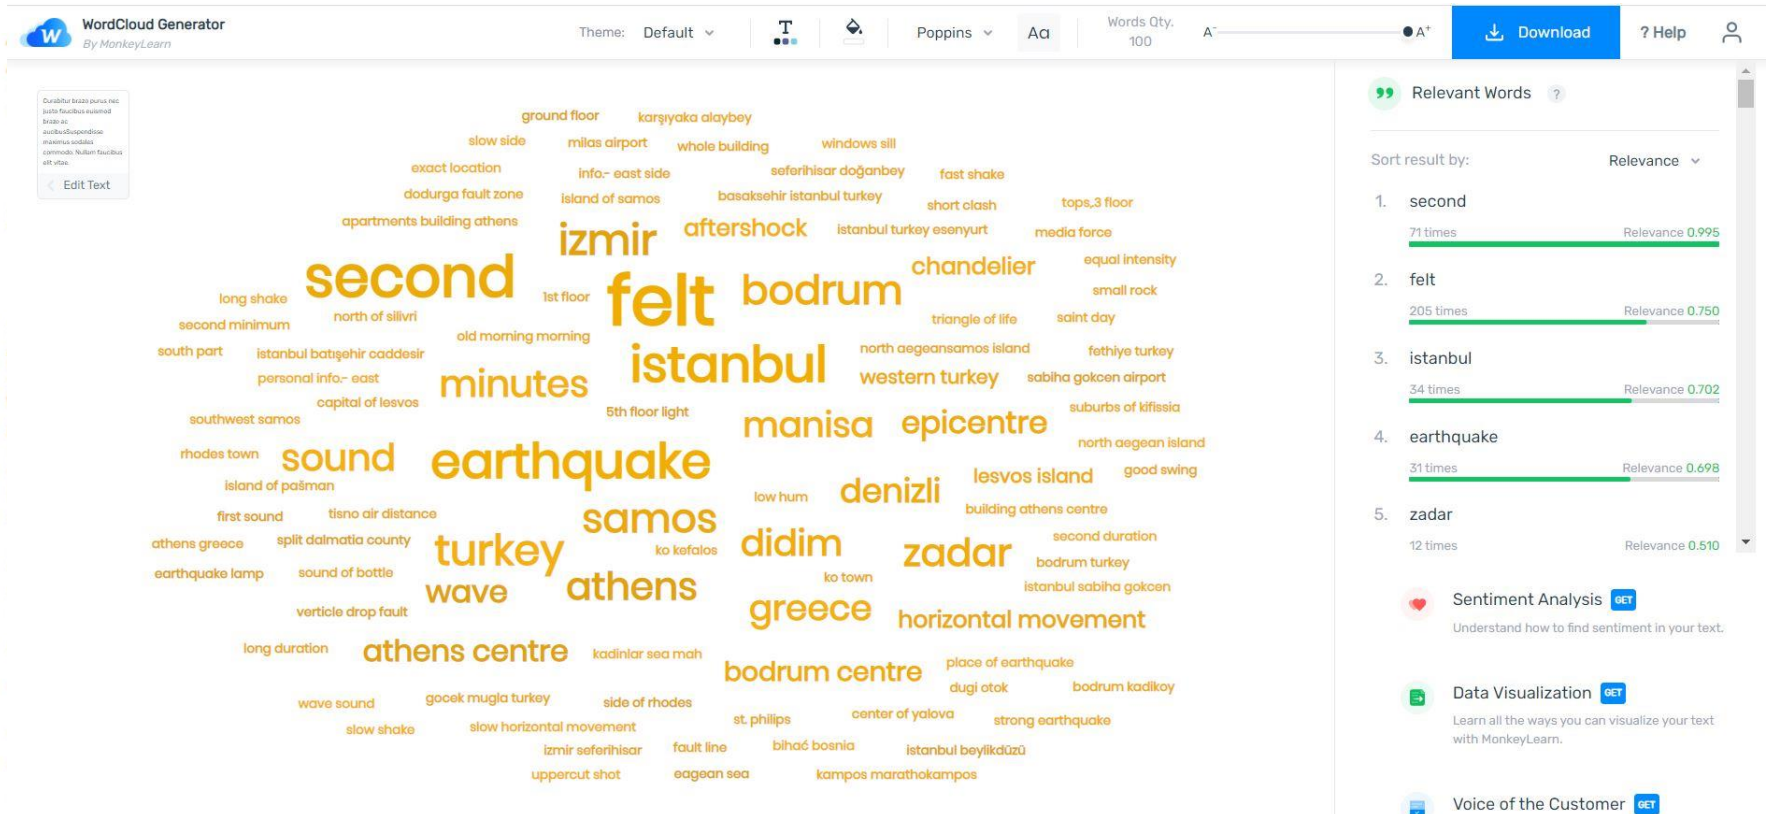

- 'Everything rattled for a few seconds. The cracks in our walls are getting bigger'
- 'Chios, Vrontados. Very strong shake, ground floor, cracks in walls objects fell.'
- 'I felt that earthquake when I was in school in Athens. The floor was moving and the walls too. It was very scary because it happened so suddenly!'

Neutral

- 'The epicentre is in Samos, Greece, not in Western Turkey'
- 'Moment intensity VI'
- 'It is not Dodecanese islands. It is North Aegean Samos island'

Results: 2020 Aegean earthquake

Results: 2020 Aegean earthquake

Buildings damaged

- ‘There are buildings destroyed in different districts of Izmir. We shook so violently. The items in the house were overturned. Earthquakes still continue. May God help us. Get past us all’
- We were caught in Atasehir in my 12-floor house. I said everything is over. We waited for the building to come out. All flats in the building have cracks and collapse in the plaster’

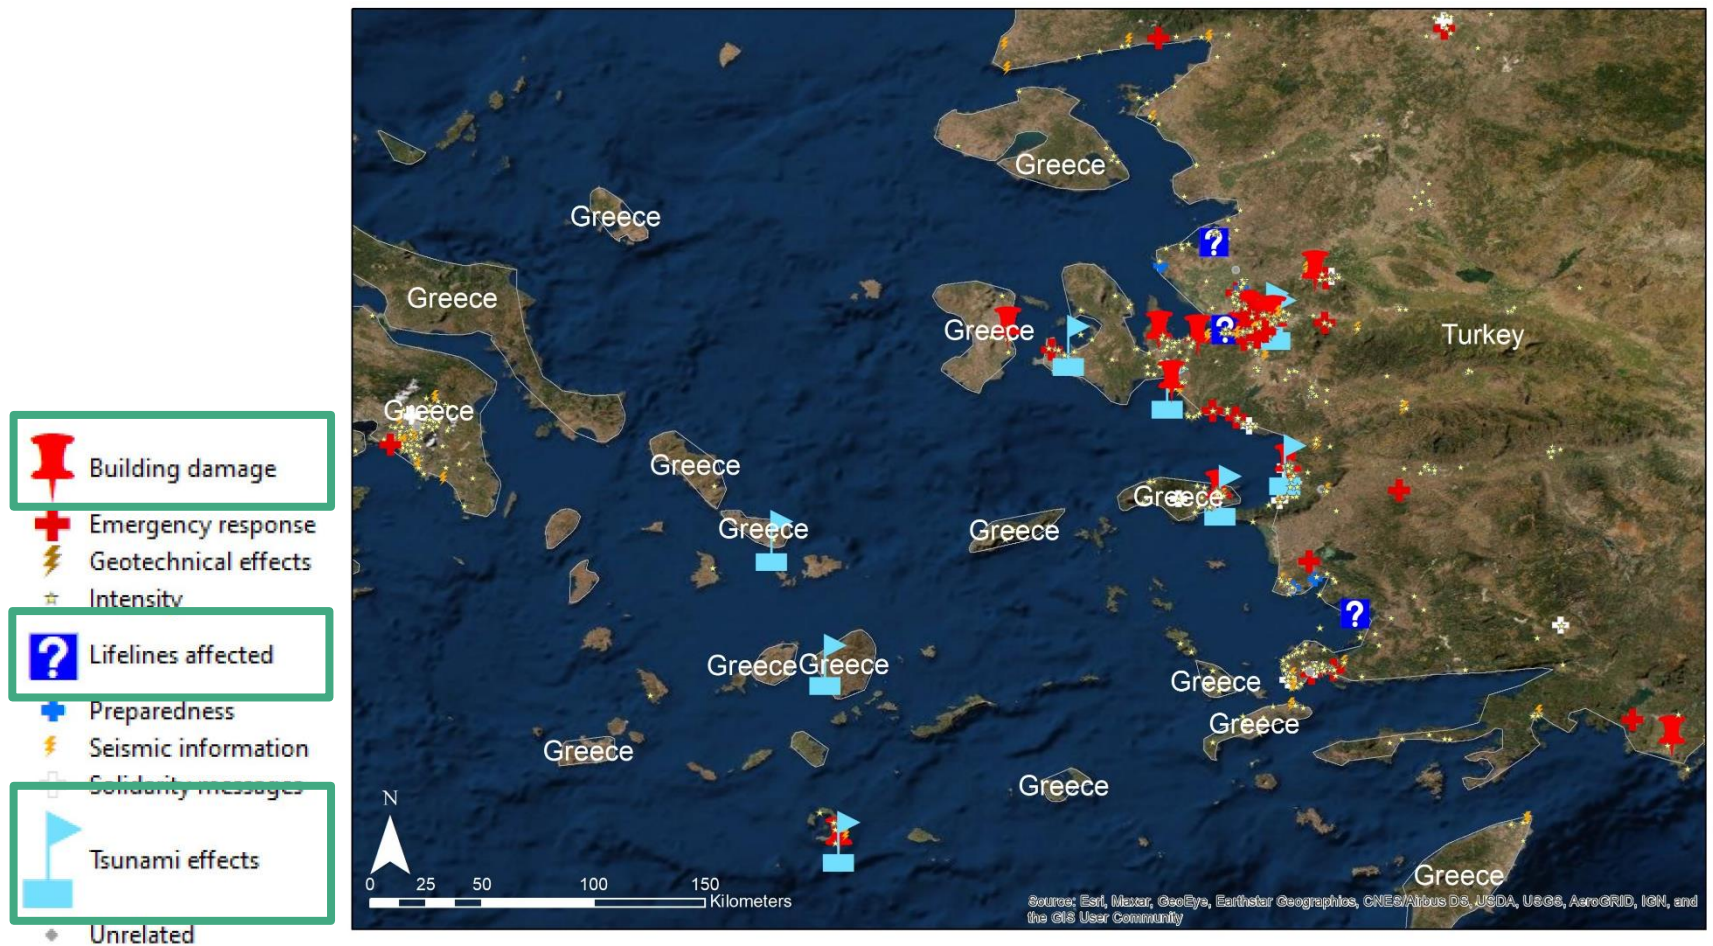

Lifelines affected

- ‘It was the first time I saw the .300-ton transformers shaking like a cradle, which was shifted in Aliagada. God bless us all’.
- ‘Very powerful and long lasting. All neighbours are on the street. No visible damage although telephone poles sway and a line broke. Many smaller quakes within the last 45 minutes or so’.

Tsunami

- ‘The sea rises here and falls again so you can say it rises if I can estimate that by 50 cm and 2 minutes later it goes down again’
- ‘I was in the tsunami, 1 meter the sea could go to the stairs of the bank. Car with water but started, got the hell out of there...pfff’

- Database: <https://doi.org/10.25405/data.ncl.14579196.v1>

Limitations

- Lack of georeferenced data on Twitter and Instagram
- Lack of trained social media users
- Cleaning and processing data
- Classification rules and topics
- Algorithm accuracy

Future development

- Georeferenced data - EMSC
- Training social media users
- Reduce time for cleaning and processing data
- Validate classification rules and topics
- Increase algorithm accuracy for unsupervised classification of data
