Summary ix

Chapter 1 Introduction 1
1.1. Motivation 1
1.2. Research Objectives 2
1.2.1. Research Questions 3
1.3. Research Methodology 5
1.3.1. Computational Cognitive Modelling 6
1.4. Overview of the Dissertation 8
1.4.1. Introduction 8
1.4.2. Emotion and Desire Regulation 9
1.4.3. Adaptive Emotion and Desire Regulation 9
1.4.4. Using Models for Emotions and Desires as a Base for Behaviour Change 10
1.4.5. Discussion and Future Work 11

Part-I: Emotion and Desire Regulation 13

Chapter 2 Take it or leave it: A Computational Model for Flexibility in Decision-Making in Downregulating Negative Emotions 15
2.1. Introduction 16
2.2. Background 16
2.3. The Computational Model 17
2.4. Scenarios and Simulation Results 21
2.5. Conclusion 25

Chapter 3 How Motivated Are You? A Mental Network Model for Dynamic Goal Driven Emotion Regulation 27
3.1. Introduction 28
3.2. Background 28
3.3. The Mental Network Model 30
3.4. Settings and Simulation Results for an Example Scenario 32
3.5. Example Scenario Used for Simulation 33
3.6. Conclusion 35

Part-II: Adaptive Emotion and Desire Regulation 37

Chapter 4 The Choice Between Bad and Worse: A Cognitive Agent Model for Desire Regulation under Stress 39
4.1. Introduction 40
4.2. Background 40
4.3. The Cognitive Agent Model 41
4.4. Scenarios and Simulations Results 43
4.5. Conclusion 46

Chapter 5 Know Yourself: An Adaptive Causal Network Model for Therapeutic Intervention for Regaining Cognitive Control 47
5.1. Introduction 48
5.2. Background Literature 48
5.3. Multilevel Adaptive Cognitive Modelling 50
5.4. Simulation Results 54
5.5. Conclusion 57

Chapter 6 A Second-Order Adaptive Temporal-Causal Network Model for Age and Gender Differences in Evolving Choice of Emotion Regulation Strategies 59
6.1. Introduction 60
6.2. Background 60
6.3. Conceptual Representation of the Model 61
6.4. Higher Order Adaptation 64
6.5. Scenarios and Simulation Results 68
6.6. Conclusion 73

Chapter 7 The Older the Better: A Fourth-Order Adaptive Network Model for Reward-Driven Choices of Emotion Regulation Strategies Over Time 75
7.1 Introduction 76
7.2. Background 76
7.3. The Multi-Level Adaptive Network Model 79
7.4. Simulation Results 84
7.5. Conclusion 87

Part-III: Using Models for Emotions and Desires as Basis for Behaviour Change 89

Chapter 8 Food Desires, Negative Emotions, and Behaviour Change Techniques: A Computational Analysis 91
8.1. Introduction 92
8.2. The Interplay and Regulation of Emotions and Desires 93
8.3. Behaviour Change Interventions 93
8.4. Networking-Oriented Modelling Technique 94
8.5. Computational Model 95
8.6. Simulation Results 97
8.7. Discussion 104
Appendix–A 105
Appendix–B 106

Chapter 9 Making it Happen: Translating a Computational Model into a Behaviour Change System 107
9.1. Introduction 108
9.2. Explanation of the framework through example models 109
9.2.1. Understanding 109

9.2.2. Model's story line (Simulated scenario) ... 110
9.2.3. Identifying Constructs of BC Theories ... 111
9.2.4. Transformation ... 112
9.2.5. Flowchart ... 113
9.2.6. Model Driven System(s) ... 115
9.3. Validating the Approach through Small User Study ... 119
9.4. Data Analysis ... 122
9.4.1. Hypothesis Testing ... 122
9.4.1.1. Hypothesis 1: Negative Emotions Influence Food Desires ... 122
9.4.1.2. Hypothesis II: BCIs Can Reduce Negative Emotions' Influence on Food Intake ... 123
9.4.1.3. Hypothesis III: BCIs Can Help Reduce Emotional Eating Behaviour ... 124
9.5. Discussion & Conclusion ... 125
9.5.1. Conclusions of user study ... 126
9.5.2. Limitations ... 126
9.5.3. Future Work ... 127

Part-IV: Discussion and Future Work ... 129

Chapter 10 Discussion and Future Work ... 131
10.1. Discussion ... 131
10.2. Revisiting the Research Questions ... 131
10.2.1. How the main question was addressed ... 132
10.2.2. How the sub-questions were addressed ... 132
10.2.2.1. How to computationally model situation-sensitive adaptivity of strategies in emotion regulation? ... 133
10.2.2.2. How can adaptivity in behaviour in terms of emotions and (food) desires be computationally modelled? ... 134
10.2.2.3. How to use computational models of emotion and desire regulation as a basis of a behaviour change support system? ... 137
10.3. Limitations ... 138
10.3.1. Validation of cognitive computational models ... 139
10.4. Role of Computational Modelling ... 140
10.5. Contribution of this Thesis ... 141
10.6. Future Work ... 143

Bibliography ... 145

SIKS-Dissertation Series ... 163
