## Theses

### M. Sc. / Diploma

Kempfer, U.; Entwicklung und Anwendung eines differentiellen Absorptions-LIDAR-Systems zur Messung der troposphärischen Ozonkonzentration, Ludwig Maximilian University of Munich, 1992.

Krause, M.; Erzeugung frequenzverschobener Strahlung für ein Temperatur- und Feuchte-Lidar mit einem KrF-Laser unter Ausnutzung stimulierter Ramanstreuung, University of Hamburg, 1990.

Lehmann, St.; Empfangssystem für Lidarsignale mit erweitertem Meßbereich, University of Hamburg, 1994.

Matthias, V.; Messung der atmosphärischen Ramanstreuung mit Hilfe eines UV-LIDAR-Systems, University of Hamburg, 1993.

Voelger, P.; Optische Eigenschaften von Aerosolpartikeln und deren Auswirkungen auf Ozonmessungen mit einem LIDAR, University of Hamburg, 1993.

### Ph. D.

Grabbe, G.C.; Untersuchungen troposphärischen Ozons mit DIAL, University of Hamburg, 1995.

Goers, U.B.; Laserfernmesung von Schwefeldioxid und Ozon in der unteren Troposphäre mit Hilfe der differentiellen Absorption und Streuung unter den Bedingungen des mobilen Einsatzes und der besonderen Berücksichtigung des Einflusses von Grenzschicht-Aerosolen, University of Hamburg, 1994; GKSS-94/E/52.

Schaberl, T.; Messung des Ozonflusses in der unteren Troposphäre mit einem neuen Ozon-DIAL-System und einem Radar-RASS, University of Hamburg, 1995.

Wallinder, E.; Application of lidar techniques in environmental studies, *Lund Reports on Atomic Physics* LRAP-154, Lund Institute of Technology, 1994.

## Appendix

### Sets of Lidar Data used for the Intercomparison of Retrieval Algorithms

In the following the numerical values of the data sets which have been used for the intercomparison of retrieval algorithms are presented.

Table A1: Signals collected by the CNRS lidar system. Averaging over 52000 laser shots.

<i>R</i> / m	on	off	<i>R</i> / m	on	off
