Fall 2023 INSIGHTS cover design

Abstract

With the use of collage and photo manipulation as primary design techniques, this cover features the intersection of color, movement, and light. The layering of various photographic elements, the vibrancy and saturation of colors, and the abstract form and moving parts, symbolize the complexity of the human mind. This design specifically explores the concept of the lightbulb idea, the desire to access a source of creativity, or the next big thing that could change the course of humanity. However, this cover also implies great ideas and creativity truly reside nowhere else but within ourselves and the world around us. It is when we open our minds that we are able to form connections that reach the potential of our creative insights and unlock the possibilities of the human imagination.
