Critical Reviews and Information on Timely Issues and Events

Volume 4, #10.

Portland Maine

October - 1993..

General Editorial.....

-----

-----Life is a learning experience but the present environment with the war in the mid east over and the large law suits from Arab Kuwait - people are busy I guess. People want structural constraints for the people who run the schools and colleges in America, they would be happy for the students to throw away all of their prior education and then have them rally behind the flag. Classrooms and students want justice.

Environmental location has everything going. Students from all over the United States are trying to advance themselves. Classrooms are over crowded all over the country, there is a problem with course material. Either de-empathize computer science in high schools or stay out of the electrical warefare structuring for peace of mind.

People and the youth age population are just sick and tired of meally mouthed facts, figures, and quotes which are spued out to be stored in their precious memory banks.

I believe in prayer in schools, we are always given the wrong answer for we are all kind souls in search of freedom, so why not salute and pledge alliegence to the flag. Why then impose U.S. law on foreign countries and then try to regulate their school system, forms of kinship, and family life. The American dream is not to coherse heirarchies by police of militia.

Education can be a rewarding and personal experience when you have mastered the fundamentals then work to educate..

A Note to Young Varments.....

-----

-----For any of you very young school students reading this article, and I particularly mean children and adults-----

-----Pace fast and slow always take the time to listen carefully and although it is bad mannered to ask a parent to repeat himself or herself, if you have questions print it down on paper to avoid being misunderstood.

-----Do you guys hang out in caves in the city or what?

-----Do you get three square meals a day or whatever?

-----If you do have pets do you take care of those animals and reptiles.

-----Are you devoting enouth time to your schoolwork?

-----Are your reading skills 100%, if not you should consider "Cliff - Notes"?

-----Do you take enough time when you walk to the local store to check for safety and traffic?

-----

-----A Comment on trash and land..

-----Along with the change in season in April comes a change in foltige. The State of Maine is and has become a regular boom town with a complete lack of concern for lakes and beaches.

-----The name of the game is clarification and clean up of state beaches, parks and national forests. At the best our state cleanup is not sufficient to keep up with trash until labor day when environment became an issue.

-----People are apathetic and lazy, so lazy that they refuse to carry trash to the nearest litter basket or trash can.

-----Please be careful with your trash and garbage.....

-----Airport Mishaps + Accidents..

-----A member of the National Transportation Safety Board said up until now they are relying on better ways to handle take-offs and landings on all major air-ports on the east and west coast. Stating that they are relying on air-ports heavily on perfect preformance and good luck.

-----Officials hope the traffic lights will prevent deadly air- port collisions when installed at all the major airports in the United States.

-----Air-port accidents in December in Detroit Michigan where eight people were killed after a D.C. - 9 jet plane took two wrong turns in heavy fog and taxied in front of a Boeing 707 during take off.

-----Even more advanced ground safety systems are used in Europe officials say despite of the system at Kennedy Air-Port they expect it to work as well as a traffic light on a busy city street and the pilots agreed.

-----But it seemed on first inspec- tion the safety system would not prevent last months crash between a U.S. Air Jet and a Sky West Commuter Plane in Los Angeles.

The accident or plane crash killed 34 people. The F.A.A. -- the federal aviation authority -- released audio tapes showing and vocally explaining the two planes were both given permission to use the same runway at Los Angeles air-port.

-----The FAA says investigators have not yet determined why the controller made the error.

-----With this advanced technol- ogy in jet monitoring hardware and the improvements in run- ways with lights and black-topping things are a lot safer than before.

-----Conflicts in California..

-----A Los Angeles County Grand Jury today and over the last two years has again resumed the investigation of the Rodney King police beating -- the probe of alleged police brutality, the FBI also began interrogation of the Los Angeles sheriffs' depart- ment and the alleged video tape of the unarmed man. The officers are being questioned in their own homes and the fact of the matter is that it involved only one man and his constitutional rights.

-----Greg Lemont comments. -- A Herald Sunday supporting L.A. Police Chief Dayrld Gates was not evidenced or stopped, leaving no way to quell the Chiefs' anger. Even now the FBI plans to handle its investigation into the charges of excessive violence and force. The Los Angeles police atrocity brings up many questions of descriminization and ethnic origin and a race hatred of blacks especially black males.

-----The federal probe is revealing to the people of the Hill Police division that the accusals forthwhich is when four officers were accused of the alleged beating of Rodney King.

-----The FBI plans to interview all two hundred officers from that distric and in their own homes. When the R. King violation went back in to court in Los Angeles the FBI dropped the investigation. Officials call it a bad decision. The officers themselves say they have no problem in understanding the cause and nature of the charges levied against their brutality and the LAPD.

-----I respect peoples rights and this situation is like a hammer..
