**AS OF JANUARY 2014**

10892-344

This compilation contains certain standards and releases that have been adopted by the PCAOB. This compilation also contains standards and other materials that have been adopted by the AICPA. Pursuant to PCAOB rules, some of these AICPA materials, to the extent they have not been superseded or amended by the PCAOB, serve as the PCAOB's interim standards. If a provision of a PCAOB standard addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standard should be considered superseded or effectively amended. The organization and form of this publication is the work of the AICPA and has not been approved by, and does not represent the action of, the PCAOB.

## Foreword

This compilation has been developed by the AICPA and contains the currently effective PCAOB's professional standards (which consist of auditing, attestation, quality control, ethics, and independence standards) and related rules applicable to the preparation and issuance of audit reports for issuers, as defined by the Sarbanes-Oxley Act (act). In developing this compilation, the AICPA has updated the PCAOB's Interim Professional Auditing Standards (as described in PCAOB Release No. 2003-006 and contained in the "Interim Standards" section) to incorporate conforming amendments issued by the PCAOB and approved by the SEC through the date of this compilation. Unless specifically stated in the standards of the PCAOB, the AICPA has not made conforming changes to the PCAOB's Interim Professional Auditing Standards to reflect the requirements and intent of standards issued by the PCAOB and approved by the SEC. Therefore, there may be conflicts between a PCAOB standard and the PCAOB's Interim Professional Auditing Standards; in which case the PCAOB standard should be followed.

Subject to SEC oversight, Section 103 of the act authorizes the PCAOB to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports as required by the act or the rules of the SEC. Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of the financial statements of issuers, as defined by the act, and other entities when prescribed by the rules of the SEC.

Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards in connection with an audit of the financial statements of an issuer may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105 of the act. In addition, the act provides that any violation of the PCAOB's rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the PCAOB's rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations."

Rule 201, *General Standards*, and Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, ET sec. 201 par. .01 and ET sec. 202 par. .01), of the AICPA Code of Professional Conduct, require a member who performs auditing and other professional services to comply with standards promulgated by bodies designated by AICPA Council. AICPA Council has designated the PCAOB as a body with the authority to promulgate auditing and related attestation standards, quality control, ethics, independence and other standards relating to the preparation and issuance of audit reports for issuers. The AICPA's Professional Ethics Division is able to hold an AICPA member who performs audits of the financial statements of issuers accountable under Rules 201 and 202 of the AICPA Code of Professional Conduct for complying with the PCAOB's auditing and related professional practice standards when performing such audits.

## AUDITING STANDARDS RECENTLY ISSUED

<u>Standard</u>	<u>Title</u>
Auditing Standard No. 17	<i>Auditing Supplemental Information Accompanying Audited Financial Statements</i>

## ATTESTATION STANDARDS RECENTLY ISSUED

<u>Standard</u>	<u>Title</u>
Attestation Standard No. 1	<i>Examination Engagements Regarding Compliance Reports of Brokers and Dealers</i>
Attestation Standard No. 2	<i>Review Engagements Regarding Exemption Reports of Brokers and Dealers</i>

In addition to the preceding standards, other changes to this edition of *PCAOB Standards and Related Rules* include the following:

<u>Section</u>	<u>Change</u>
Applicability of Public Company Accounting Oversight Board Standards and AICPA Professional Standards	Revision of part I, "Applicability of Public Company Accounting Oversight Board Standards and AICPA Professional Standards"
Applicability of Public Company Accounting Oversight Board Standards and AICPA Professional Standards	Revision of part II, "List of Selected Final PCAOB Auditing Standards and Rules"
Auditing Standards	Revisions to Auditing Standard No. 3, <i>Audit Documentation</i> , as identified in appendix 3 of PCAOB Release No. 2013-007, <i>Standards for Attestation Engagements Related to Broker and Dealer Compliance or Exemption Reports Required by the U.S. Securities and Exchange Commission and Related Amendments to PCAOB Standards</i>
Auditing Standards	Revisions to Auditing Standard No. 7, <i>Engagement Quality Review</i> , as identified in appendix 3 of PCAOB Release No. 2013-007
Auditing Standards	Revisions to Auditing Standard No. 16, <i>Communications with Audit Committees</i> , as identified in appendix 3 of PCAOB Release No. 2013-007

*(continued)*

<u>Section</u>	<u>Change</u>

## Part I

# ***Applicability of Public Company Accounting Oversight Board Standards and AICPA Professional Standards***

## **Background**

As a result of the passage of the Sarbanes-Oxley Act of 2002 (the act), auditing and related professional practice standards to be used in the performance of and reporting on audits of the financial statements of public companies are now established by the PCAOB. Note that the term *public companies* is a general reference to the entities subject to the securities laws. The act more specifically defines these entities as *issuers*, the definition of which is provided in the section that follows.

Among other significant provisions, the act requires a public accounting firm that prepares or issues, or participates in the preparation or issuance of, any audit report with respect to any issuer to register with the PCAOB. Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of issuers. Moreover, the act authorizes the PCAOB to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports for issuers.

## **Who Is an Issuer?**

As provided in Section 2 of the act, the term *issuer* means an issuer (as defined in Section 3 of the Securities Exchange Act of 1934 [15 U.S.C. 78c]), the securities of which are registered under Section 12 of that act (15 U.S.C. 78l) or that is required to file reports pursuant to Section 15(d) [15 U.S.C. 78o(d)], or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (15 U.S.C. 77a et seq.), and that it has not withdrawn.

Accordingly, nonissuers are those entities not subject to the act or the rules of the SEC. For audits of nonissuers, the preparation and issuance of audit reports must be conducted in accordance with the AICPA Code of Professional Conduct (AICPA Code) and the standards promulgated by the AICPA Auditing Standards Board (ASB). Audits of nonissuers remain governed by generally accepted auditing standards (GAAS) and the Statements on Quality Control Standards (SQCS) as issued by the ASB.

## **Standards Applicable to the Audits of *Issuers***

Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, issued by the PCAOB (see PCAOB Release No. 2003-009, dated June 30, 2003) generally requires all registered public accounting firms to adhere to the PCAOB's standards in connection with the preparation or issuance of any audit report on the financial statements of an issuer. Rule 3100 requires registered public accounting firms and their associated persons to comply with all applicable standards. Accordingly, if the PCAOB's standards do not apply to

an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards*, issued by the PCAOB (see PCAOB Release No. 2004-007, dated June 9, 2004) defines the degree of responsibility imposed on the auditor by the use of certain terms in the PCAOB's auditing and related professional practice standards, including the interim standards adopted in Rule 3200T, *Interim Auditing Standards*; Rule 3300T, *Interim Attestation Standards*; Rule 3400T, *Interim Quality Control Standards*; and Rule 3500T, *Interim Ethics and Independence Standards*. Effectively, Rule 3101 creates three categories of professional responsibilities:

1. *Unconditional responsibility.* The words *must*, *shall*, and *is required* indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.
2. *Presumptively mandatory responsibility.* The word *should* indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the PCAOB's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. Failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.
3. *Responsibility to consider.* The words *may*, *might*, *could*, and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

## Compliance With Standards Applicable to the Audits of Issuers

Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable PCAOB standards in connection with an audit of the financial statements of an issuer may be the subject of a PCAOB disciplinary proceeding in accordance with Section 105 of the act. In addition, the act provides that any violation of the PCAOB's rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the PCAOB's rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations."

Rule 201, *General Standards*, and Rule 202, *Compliance With Standards* (AICPA, *Professional Standards*, ET sec. 201 par. .01 and ET sec. 202 par. .01), of the AICPA Code require a member who performs auditing and other professional services to comply with standards promulgated by bodies designated by the AICPA Council. The AICPA Council has designated the PCAOB as the body

authorized to promulgate auditing and related attestation standards, quality control, ethics, independence and other standards relating to the preparation and issuance of audit reports for issuers.

The AICPA's Professional Ethics Division is able to hold an AICPA member who performs audits of the financial statements of issuers accountable under Rules 201 and 202 of the AICPA Code for complying with PCAOB's auditing and related professional practice standards when performing such audits.

## Standards Applicable to the Audits of Nonissuers

With the formation of the PCAOB, the ASB was reconstituted and its jurisdiction amended to recognize the ASB as the body authorized to promulgate auditing, attestation and quality control standards relating to the preparation and issuance of audit reports for nonissuers.

Failure to follow ASB standards in the audit of a nonissuer would be considered a violation of Rule 201 or Rule 202 of the AICPA Code, or both.

As a caution to readers, pursuant to AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), interpretative publications are recommendations on the application of GAAS in specific circumstances, including engagements for entities in specialized industries. Interpretative publications, which include auditing interpretations, auditing guidance in AICPA Audit and Accounting Guides, and auditing guidance found in Statements of Position (SOPs), are issued under the authority of the ASB. The auditor should consider applicable interpretative publications in planning and performing the audit.

The ASB continues to issue SASs and interpretative publications that relate to audits of nonissuers and auditors should be alert to those issuances.

## PCAOB's Adoption of Interim Standards

The PCAOB is subject to SEC oversight. As such, rules and standards issued by the PCAOB must be approved by the SEC before they become effective.

Pursuant to PCAOB Release No. 2003-006, dated April 18, 2003, the PCAOB adopted, on an initial, transitional basis, five temporary rules that refer to professional standards of auditing, attestation, quality control, ethics, and independence in existence on that date (known collectively as the Interim Professional Auditing Standards). The SEC granted approval to these rules (see SEC Release No. 33-8222, dated April 25, 2003).

Essentially, the interim standards that the PCAOB adopted were the auditing standards, attestation standards, quality control standards issued by the ASB, certain former AICPA SEC Practice Section (SECPS) membership requirements, certain AICPA ethics and independence rules, and Independence Standards Board (ISB) rules as they existed on April 16, 2003. These interim standards will remain in effect while the PCAOB conducts a review of standards applicable to registered public accounting firms. Based on this review, the PCAOB may modify, repeal, replace, or adopt, in part or in whole, the interim standards. As reiterated in a succeeding paragraph, the PCAOB's interim independence standards are not to be interpreted to supersede the SEC's independence requirements. The PCAOB has also made certain conforming amendments to the interim standards to reflect the adoption of PCAOB standards.

If a provision of a PCAOB standard addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standard should be considered superseded or effectively amended.

The five rules that comprise the PCAOB's interim standards consist of Rules 3200T, 3300T, 3400T, and 3500T, and are described in the paragraphs that follow.

### **Rule 3200T—*Interim Auditing Standards, as Amended by PCAOB Release No. 2003-026***

Rule 3200T provides that, in connection with the preparation or issuance of any audit report on the financial statements of an issuer, a registered public accounting firm shall comply with GAAS as described in AU section 150,<sup>1</sup> as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

### **Rule 3300T—*Interim Attestation Standards, as Amended by PCAOB Release No. 2003-026***

Rule 3300T governs the conduct of engagements that (1) are described in the ASB's Statement on Standards for Attestation Engagements (SSAE) No. 10, *Attest Engagements* (AT sec. 101), and (2) relate to the preparation or issuance of audit reports for issuers. Registered public accounting firms involved in such engagements are required to comply with the ASB's SSAEs, and related interpretations and AICPA SOPs, as in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

### **Rule 3400T—*Interim Quality Control Standards, as Amended by PCAOB Release No. 2003-026***

Rule 3400T sets forth minimum quality control standards with which registered public accounting firms must comply, in order to ensure that registered public accounting firms, and their personnel, comply with applicable accounting and auditing (and other professional) standards. Pursuant to Rule 3400T, the PCAOB has provisionally designated the SQCSs (QC sections 20–40) proposed and issued by the ASB and certain former AICPA SECPS<sup>2</sup> membership requirements, as they existed, and as they applied to SECPS members, on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Quality Control Standards.

Because the PCAOB intends the Interim Quality Control Standards (QC sections 20–40) to preserve existing standards as they applied on April 16, 2003 consistent with Section 103(a)(3) of the act, those Interim Quality Control Standards (QC sec. 20–40) adapted from the former AICPA SECPS requirements

---

<sup>1</sup> Rule 3200T, *Interim Auditing Standards*, has not been amended to reflect references to the clarified standards. The guidance contained in extant AU section 150, is now addressed in AU-C section 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance With Generally Accepted Auditing Standards* (AICPA, *Professional Standards*).

<sup>2</sup> The Center for Audit Quality (CAQ) restructured and expanded the AICPA's Center for Public Company Audit Firms, which was the successor to the SEC Practice Section (SECPS). The CAQ, which began operating in January 2007, is an autonomous, nonpartisan, public policy organization affiliated with the AICPA and dedicated to enhancing investor confidence and public trust in the global capital markets by fostering high quality performance by auditors of public entities.

apply only to those firms that were members of the AICPA's SECPS on April 16, 2003.

### **Rule 3500T—*Interim Ethics and Independence Standards, as Amended by PCAOB Release No. 2003-026 and Release No. 2013-010***

Rule 3500T sets forth ethical and independence standards for registered public accounting firms and their personnel. Pursuant to Rule 3500T, the PCAOB has provisionally designated Rule 102, *Integrity and Objectivity*, and its interpretations and rulings thereunder (ET sec. 102 and 191) of the AICPA Code, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Ethics Standards. The PCAOB has also provisionally designated Rule 101, *Independence*, and its interpretations ET sec. 101 and ET sec. 191) of the AICPA Code, and interpretations and rulings thereunder, as they existed on April 16, 2003, to the extent not superseded or amended by the PCAOB, and Standard Nos. 2, and 3, and Interpretation No. 99-1 of the ISB, to the extent not superseded or amended by the PCAOB, as the PCAOB's Interim Independence Standards (AICPA, *PCAOB Standards and Related Rules*, Interim Standards). In addition, the PCAOB requires compliance with the SEC's independence rules. The PCAOB's Interim Independence Standards are not to be interpreted to supersede the SEC's independence requirements. Therefore, to the extent that a provision of the SEC's rule or policy is more restrictive—or less restrictive—than the PCAOB's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive requirement.

### **References to GAAS**

Auditing Standard No. 1 changed the requirement in the PCAOB's interim standards that the auditors include in their reports a reference to auditing standards promulgated by the ASB, examples of which include GAAS, U.S. GAAS, auditing standards generally accepted in the United States of America, and standards established by the AICPA. Instead, it requires that auditor's reports on the financial statements of issuers that are issued or reissued after the effective date of Auditing Standard No. 1 include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

Conforming amendments resulting from Auditing Standard No. 1 have not yet been reflected in the PCAOB's interim standards. Such conforming changes will be made after the PCAOB issues, and the SEC approves, such conforming amendments.

### **Standards Applicable If a Nonissuer's Financial Statements Are Audited in Accordance With Both GAAS and PCAOB Auditing Standards**

Paragraph .31 of AU-C section 700, *Forming an Opinion and Reporting on Financial Statements* (AICPA, *Professional Standards*), requires that the auditor's report state that the audit was conducted in accordance with GAAS and identify the United States of America as the country of origin of those standards. However, as stated in paragraphs .42-.43 of AU-C section 700, an auditor may indicate that the audit was conducted in accordance with GAAS

and another set of auditing standards (for example, International Standards on Auditing, PCAOB, or *Government Auditing Standards*). The auditor should not refer to having conducted an audit in accordance with another set of auditing standards in addition to GAAS, unless the audit was conducted in accordance with both sets of standards in their entirety. When the auditor's report refers to both GAAS and another set of auditing standards, the auditor's report should identify the other set of auditing standards, as well as their origin. Illustration 3 of AU-C section 700 provides example report language.

## Standards Applicable to an Integrated Audit of a Nonissuer's Financial Statements

In October 2008, the ASB issued SSAE No. 15, *An Examination of an Entity's Internal Control Over Financial Reporting That Is Integrated With an Audit of Its Financial Statements* (AICPA, *Professional Standards*, AT sec. 501), which establishes standards and provides guidance to practitioners performing an examination of a nonissuer's internal control over financial reporting in the context of an integrated audit (an audit of an entity's financial statements and an examination of its internal control). SSAE No. 15 supersedes extant AT section 501, *Reporting on an Entity's Internal Control Over Financial Reporting*, and converges the standards practitioners use for reporting on a nonissuer's internal control with PCAOB Auditing Standard No. 5.

## AICPA Standards and the Audits of Issuers

If a registered public accounting firm performs an audit of *an issuer* in accordance with PCAOB standards, the auditor does not need to follow standards promulgated by the ASB. However, AICPA members are required to comply with the AICPA Code in addition to the ethics and independence rules and standards required by the SEC and PCAOB.

**Part II**

**List of Selected Final PCAOB Auditing and Attestation Standards and Rules**

This table presents those standards and rules of the PCAOB that have been issued as final and are relevant to the standards contained in this publication. PCAOB standards and rules must be approved by the SEC to be effective.

## Auditing Standard No. 1

# **References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board**

[Effective pursuant to SEC Release No. 34-49707; File No. PCAOB-2003-10, May 14, 2004; effective for audit reports issued or reissued on or after May 24, 2004.]

1. The Sarbanes-Oxley Act of 2002 authorized the Public Company Accounting Oversight Board ("PCAOB") to establish auditing and related professional practice standards to be used by registered public accounting firms. PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, requires the auditor to comply with all applicable auditing and related professional practice standards of the PCAOB.

2. The Board has adopted as interim standards, on an initial, transitional basis, the generally accepted auditing standards, described in the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, in existence on April 16, 2003.<sup>1</sup>

3. Accordingly, in connection with any engagement performed in accordance with the auditing and related professional practice standards of the PCAOB, whenever the auditor is required by the interim standards to make reference in a report to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, or standards established by the AICPA, the auditor must instead refer to "the standards of the Public Company Accounting Oversight Board (United States)." An auditor must also include the city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued.

4. This auditing standard is effective for auditors' reports issued or reissued on or after the 10th day following approval of this auditing standard by the Securities and Exchange Commission.

5. Audit reports issued prior to the effective date of this standard were required to state that the audits that supported those reports were performed in accordance with generally accepted auditing standards. The PCAOB adopted those generally accepted auditing standards, including their respective effective dates, as they existed on April 16, 2003, as interim standards. Therefore, reference to "the standards of the Public Company Accounting Oversight Board (United States)" with respect to audits of financial statements performed prior to the effective date of this standard is equivalent to the previously-required reference to generally accepted auditing standards. Accordingly, upon adoption of this standard, a reference to generally accepted auditing standards in auditors' reports is no longer appropriate or necessary.

Note: The term "auditor" in this standard is intended to include both registered public accounting firms and associated persons thereof.

---

<sup>1</sup> The Board's rules on interim standards were adopted by the Board on April 16, 2003, and approved by the Commission on April 25, 2003. See SEC Rel. No. 33-8222 (April 25, 2003).

## Appendix

### Illustrative Reports

1. The following is an illustrative report on an audit of financial statements:

#### Report of Independent Registered Public Accounting Firm

We have audited the accompanying balance sheets of X Company as of December 31, 20X3 and 20X2, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X3. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of [at] December 31, 20X3 and 20X2, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X3, in conformity with U.S. generally accepted accounting principles.

[City and State or Country]

[Date]

2. The following is an illustrative report on a review of interim financial information:

#### Report of Independent Registered Public Accounting Firm

We have reviewed the accompanying [describe the interim financial information or statements reviewed] of X Company as of September 30, 20X3 and 20X2, and for the three-month and nine-month periods then ended. This (these) interim financial information (statements) is (are) the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial (statements) for it (them) to be in conformity with U.S. generally accepted accounting principles.

### PCAOB Release No. 2003-025

December 17, 2003

PCAOB Rulemaking  
Docket Matter No. 010

**Approved by the Securities and Exchange Commission on May 14, 2004, and is effective for audit reports issued or reissued on or after May 24, 2004.**

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*. This standard requires registered public accounting firms to include in their reports on engagements performed pursuant to the Board's auditing and related professional practice standards, including audits and reviews of financial statements, a reference to the standards of the Public Company Accounting Oversight Board (United States). The Board will submit this standard to the Securities and Exchange Commission ("Commission" or "SEC") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

### Board Contacts

Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org), Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org).

\* \* \* \* \*

Section 103 of the Act authorizes the PCAOB to establish auditing and related professional practice standards to be used by registered public accounting firms in connection with the preparation and issuance of audit reports as required by the Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors. Consistent with Section 103 of the Act, PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, requires auditors to comply with all applicable auditing and related professional practice standards established by the PCAOB.

Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* directs auditors<sup>1</sup> to state that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)" whenever the auditor has performed the engagement in accordance with the Board's standards.

---

<sup>1</sup> Reference in the Board's standards to an "auditor" means a registered public accounting firm, or an associated person of such a firm, as defined in the Act and the Board's rules, unless specifically stated otherwise. Nothing in the Board's rules would preclude an accounting firm from conducting an audit of a company that is not an issuer in accordance with the Board's standards and so stating in its audit report. This is true regardless of whether or not the accounting firm performing the audit is registered with the Board.

Section A of this release describes Auditing Standard No. 1. Section B of this release discusses and addresses the comments received on the Board's proposed auditing standard, which the Board released for public comment. The text of Auditing Standard No. 1 is attached to this release as Appendix 1.

## A. Description of Auditing Standard No. 1

At the time of this release, the Board's auditing and related professional practice standards consist of the standards described in Rules 3200T through 3600T, which the Board has adopted, on an initial, transitional basis, as interim standards. The standards (with which PCAOB Rule 3100 requires registered public accounting firms, and persons associated with such firms, to comply) include these interim standards and any permanent standards that the Board adopts.

Each of the standards described in Rules 3200T through 3600T was originally adopted by the American Institute of Certified Public Accountants ("AICPA"), a committee thereof, including the Auditing Standards Board ("ASB"), or the Independence Standards Board. Thus the Board's rule on interim auditing standards, Rule 3200T, incorporates "generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, in existence on April 16, 2003" (the "interim standards").<sup>2</sup> These auditing standards were adopted, and from time to time amended, by the ASB, until the Board incorporated them into the Board's interim standards. The interim standards require auditors to include in their reports a reference to the standards that were followed in performing the engagement. These references include "generally accepted auditing standards," "U.S. generally accepted auditing standards," "auditing standards generally accepted in the United States of America," and "standards established by the AICPA."

PCAOB Auditing Standard No. 1 supersedes these references by requiring that auditors' reports on the financial statements of issuers that are issued or reissued, after Auditing Standard No. 1 becomes effective, include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."<sup>3</sup> This auditing standard is effective for auditors' reports issued or reissued on or after the 10th day following approval of this auditing standard by the Commission. An appendix<sup>4</sup> to this standard provides illustrative reports on an audit of financial statements and a review<sup>5</sup> of interim financial information of a public company.

Once Auditing Standard No. 1 becomes effective, it will require auditors to state that the engagement was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)," irrespective of whether the engagement was conducted before or after Auditing Standard No. 1 becomes effective. Accordingly, auditors who reissue reports that were originally issued before the date that Auditing Standard No. 1 becomes effective, or who issue reports that include comparative financial information that

---

<sup>2</sup> The Board's rules on interim standards were adopted by the Board on April 16, 2003, and approved by the Commission on April 25, 2003. See SEC Rel. No. 33-8222 (April 25, 2003).

<sup>3</sup> See Auditing Standard No. 1 ¶ 3.

<sup>4</sup> Appendices to the Board's standards are an integral part of the standard and carry the same authoritative weight as the body of the standard.

<sup>5</sup> Reviews of the interim financial information are integrally related to audits of financial statements. See generally Statement on Auditing Standards No. 100, *Interim Financial Information* ("SAS No. 100"). For example, SAS No. 100 makes clear that the general standards on auditing discussed in SAS No. 95 "are applicable to a review of interim financial information."

was the subject of an audit or review report that was issued before that date, must nevertheless state that the audit or review was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)," if those reports are reissued after Auditing Standard No. 1 becomes effective. The Board believes that a uniform reference to the standards of the PCAOB—even with respect to audits and reviews completed before the PCAOB adopted its interim standards—is appropriate because the interim standards that the Board adopted are the "generally accepted auditing standards" with which auditors were required to comply before the PCAOB adopted its interim standards.

Referring to PCAOB standards in connection with a period that preceded the date of the PCAOB's own adoption of those standards may seem somewhat counterintuitive. The requirement is intended, however, to reflect the fact that the standards in place before the PCAOB adopted its interim standards, without change, became the PCAOB's standards. Indeed, the Board considered whether to require auditors to refer to "generally accepted auditing standards" when reissuing reports that were originally issued before Auditing Standard No. 1 becomes effective, and to refer to "standards of the PCAOB" with respect to reports issued on or after Auditing Standard No. 1 becomes effective.

The Board believes, however, that it is appropriate to describe the "generally accepted auditing standards" that the Board adopted as "standards of the PCAOB." This terminology will reflect the fact that the standards that auditors were required to use before April 25, 2003—i.e., generally accepted auditing standards as they existed on April 16, 2003—became the applicable standards on April 25 and continue to apply to audits of public companies, as the Board amends them. Auditing standards have continuously been amended over time, and auditors have consistently been required to state whether their audits complied with the then-prevailing standards. The substance of the applicable standards for audits and reviews of public company financial statements did not change on April 25, 2003. Rather, April 25, 2003, is significant only because the PCAOB gained authority over such standards on that date. The Board believes it would be inappropriate to create an impression in auditors' reports that engagements performed before Auditing Standard No. 1 becomes effective, or even before April 25, were performed in accordance with a wholly different body of standards, rather than the same body of standards at different points in its evolution.

The Board expects to amend its standards from time to time, just as the ASB amended generally accepted auditing standards from time to time. The Board believes that using a consistent description of standards prevailing at the time an audit or review report is issued—and holding auditors to compliance with those then-prevailing standards—better contributes to the creation of informative audit reports.

Upon adoption of this auditing standard, all references in the interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA, mean the corresponding standards of the Public Company Accounting Oversight Board. The Act and the Board's rules already require the auditor to comply with the Board's standards. The purpose of this standard is to conform the references in the interim standards to the standards that the Act and Rule 3100 require auditors to use in connection with preparing and issuing audit and related reports on the financial statements of issuers.

Under the Act, Auditing Standard No. 1 will not be effective unless it is approved by the SEC. By its terms, Auditing Standard No. 1 will be effective for auditors'

reports issued or reissued on or after the 10th day following SEC approval of this standard. Until the effective date of this standard, the reporting requirements as described in the AICPA's Codification of Statements on Auditing Standards, are still in effect as interim standards.

## B. Public Comment Process and Board Responses

The Board released a proposed auditing standard, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*, for public comment, on November 12, 2003. The Board received eight written comment letters.<sup>6</sup> In response to these comments, the Board's final rules both clarify and modify certain aspects of the proposal, as explained below.

### 1. Transitional Issues

The Board received several comments related to transitional issues, including, how the proposed standard would affect—

- reissuance of a report originally issued before the proposed standard became effective;
- issuance of a report on comparative financial statements when the audits of the financial statements for periods presented for comparative purposes were conducted before the proposed standard became effective and/or before the Board adopted its interim standards; and
- issuance of a dual-dated report that include dates that straddle the effective date of this standard.

In the proposed standard, the Board had recommended the standard be effective for auditors' reports dated on or after the later of January 1, 2004 or the 10th day after SEC approval of the standard as adopted by the Board. In evaluating the comments with regard to transition, the Board decided to modify the effective date of this standard. Rather than linking the effective date of this standard to the date of the report, this auditing standard will be effective for reports issued or reissued on or after the 10th day following SEC approval of this auditing standard. After this standard becomes effective, any auditor's report issued or reissued with respect to the financial statements of a public company must state that the engagement was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

One commenter also expressed concern that the proposed standard's requirement that a report state that an audit performed prior to the PCAOB's adoption of interim standards was performed in accordance with PCAOB standards would, in essence, require the auditor to re-audit the prior period's financial statements in order to bring that audit or review into conformity with current PCAOB standards. The Board does not intend to require auditors to bring audits that were performed in accordance with then-prevailing standards into conformity with later-prevailing standards in order to reissue a previously-issued report. When the Board adopted as interim standards the generally accepted auditing standards established by the ASB, the Board also adopted the effective dates of those standards. Therefore, reference in auditors' reports to the standards of the PCAOB with respect to financial statements audited or reviewed prior to the effective date of Auditing Standard No. 1 is equivalent

---

<sup>6</sup> The comment letters are available on the Board's Web site—[www.pcaobus.org](http://www.pcaobus.org)—and will be attached to the Board's Form 19b-4, to be filed with the Commission.

to the previously-required reference to generally accepted auditing standards. The reference relates to those standards that were in effect when the audit or review was completed and should not be interpreted to imply a representation that the audit or review complied with standards that became effective after the audit or review was completed. Thus, once Auditing Standard No. 1 becomes effective, a reference to generally accepted auditing standards in reports issued in connection with financial statements of public companies is no longer appropriate or necessary.

## 2. Applicable Standards of the PCAOB

Several commenters recommended that the Board only require auditors' reports to refer to the *auditing* standards of the PCAOB for audits of financial statements and not to the standards of the PCAOB generally. The Board intends for report references to "the standards of the Public Company Accounting Oversight Board (United States)" to mean those auditing and related professional practice standards that are applicable to the particular engagement. For example, if an issuer does not use any outside service organization that would affect its internal control over financial reporting, then the interim auditing standard on service organizations—described in the Codification of Statements on Auditing Standards at AU § 324 (*Service Organizations*), would not be applicable. On the other hand, the Board's independence standards apply to registered public accounting firms, and associated persons thereof, in connection with the preparation and issuance of audit reports for issuers.

As another example, quality control standards generally apply to a firm's system of quality control over its accounting and auditing practice and not to individual audit engagements. Thus, a breakdown in the system of quality control does not necessarily mean that a particular audit was not conducted in accordance with the standards of the PCAOB. However, such a breakdown might result in a deficient audit if it caused or contributed to an audit deficiency. The determination as to whether a particular auditing or related professional practice standard is applicable in the context of a particular audit is dependent on the nature of the standard in question and on the nature of the engagement at issue.

Thus a reference to "auditing standards" of the PCAOB would be too narrow and preclusive to other standards applicable to the audit. The Board believes that reference to "the standards of the Public Company Accounting Oversight Board (United States)" is a more descriptive reference to the standards applied in the audit.

## 3. Reference to GAAS

The Board received a number of comments recommending that auditors' reports, with respect to financial statement audits, describe PCAOB standards as generally accepted auditing standards. The notion of general acceptance developed at a time when auditing and accounting standards were not established with the force of law by governmental or other authoritative bodies, but rather were established by consensus among the members of the accounting profession.

As far as auditing and related professional practice standards are concerned, the Board gained authority to establish such standards by the enactment of the Act. Professional consensus is no longer sufficient to establish auditing standards, and therefore the Board believes that it is no longer appropriate to refer to the standards with which an auditor of the financial statements of a public company must comply as "generally accepted." While those standards

may be generally accepted in a variety of contexts, what gives them the force of law in the context of public company audits is adoption by the PCAOB and approval by the SEC.

Therefore, for purposes of any engagement performed in accordance with the applicable auditing and related professional practice standards of the PCAOB, references in the interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA, mean the standards of the PCAOB.

#### 4. References to Country of Origin and Issuing Office

The Board also received comments recommending that the Board continue to require auditors to state in their reports that the standards according to which they performed their engagements were those standards applicable in the United States. Adopting this recommendation will make it easier for readers of audit reports that are used in cross-border offerings and listings of securities to quickly identify the jurisdiction in which the standards were promulgated. As such, the Board has required in Auditing Standard No. 1 that auditors' reports describe the PCAOB's standards as "the standards of the Public Company Accounting Oversight Board (United States)."

Another commenter recommended that auditors identify in their reports the city and state (or country) of the registered firms issuing the reports. The SEC's rules require disclosure in the auditor's report of the city and state of the accounting firm's office issuing the report.<sup>7</sup> The Board also concurs with this recommendation and, accordingly, has modified the auditing standard and the illustrative reports in the appendix to Auditing Standard No. 1.

#### 5. Other Auditors

The Board was asked to clarify the applicability of this standard, and the Board's standards generally, to circumstances where more than one auditing firm contributes to an audit of a consolidated entity. For example, a firm other than the firm engaged to report on the company's consolidated financial statements may be hired to audit the financial statements of a subsidiary company. In such circumstances, the auditor that conducts the majority of the audit is referred to as the principal auditor and the auditor of the subsidiary company is referred to as the other auditor.<sup>8</sup> Depending on the significance of the portion of the financial statements audited by the other auditor, the principal auditor may divide responsibility with the other auditor by making reference to the audit of the other auditor in his or her report, or the principal auditor may take responsibility for the work of the other auditor by not making any reference to the other auditor.

In either event, the entire audit must be performed in accordance with the Board's standards. Section 103 of the Act, and the Board's Rule 3100, require registered public accounting firms, and associated persons thereof, to comply with all applicable auditing and related professional practice standards in connection with the preparation and issuance of audit reports on the financial statements of issuers. Whether the other auditor is a registered public accounting firm or an associated person of a registered public accounting firm, the other auditor must comply with the standards of the PCAOB.

---

<sup>7</sup> 17 C.F.R. § 210.2-02 (2003).

<sup>8</sup> See Codification of Auditing Standards, AU § 543 (AICPA 2002).

## 6. Applicability to Non-U.S. Firms Not Yet Registered With the Board

Another commenter asked the Board to clarify whether non-U.S. public accounting firms—who are not required to register with the PCAOB until 2004—will be permitted, until registered with the PCAOB, to continue to reference "auditing standards generally accepted in the United States of America" when reporting on an issuer's financial statements. Like the Board's interim standards, with which a public accounting firm is required to comply even before the firm's mandatory registration date, during the period preceding the mandatory registration date, standards of the PCAOB apply to firms engaged in work that requires their registration. Therefore, non-U.S. public accounting firms that have not yet registered, that engage in work that would require them to be registered as of the mandatory registration date, are nevertheless required to reference "the standards of the Public Company Accounting Oversight Board (United States)."

## 7. Application of Auditing Standard No. 1 to Audit Reports in Connection With Initial Public Offerings

Another commenter recommended that the Board expand the proposed standard to specifically address the various scenarios that auditors will encounter with respect to reporting in conjunction with initial public offerings. The SEC's Rule 3-01 of Regulation S-X requires that, like other SEC filings that must comply with Regulation S-X, a registration statement filed in connection with an initial public offering must include or otherwise incorporate "for the registrant and its subsidiaries consolidated, audited balance sheets as of the end of each of the two most recent fiscal years."<sup>9</sup> In addition, Rule 3-02 of Regulation S-X requires that there "be filed, for the registrant and its subsidiaries consolidated and for its predecessors, audited statements of income and cash flows for each of the three fiscal years preceding the date of the most recent audited balance sheet."<sup>10</sup> The Board understands these provisions to mean that an issuer desiring to register a transaction involving the sale of securities must include balance sheets for the two years preceding the transaction, and income statements and statements of cash flows for the three years preceding the transaction, each audited in accordance with standards as required by the securities laws.

In Section 103 of the Act, Congress has provided the Board authority to establish auditing and related professional practice standards "to be used by registered public accounting firms in the preparation and issuance of audit reports." In addition, the PCAOB has adopted, and the SEC has approved, PCAOB Rule 3100, which requires registered public accounting firms to comply with all applicable auditing and related professional practice standards of the PCAOB in connection with the preparation and issuance of audit reports on the financial statements of issuers. Accordingly, audit reports on the financial statements of issuers must now comply with—and under Auditing Standard No. 1 auditors must state that they performed the audit in accordance with—the standards of the PCAOB. So long as audits that were performed prior to April 25, 2003, were performed in accordance with then-prevailing generally accepted auditing standards as required by Rule 2-02 of Regulation S-X, an auditor need not reaudit any financial statements that relate to periods preceding April 25, 2003. Further, as discussed above, because the Board adopted the "generally accepted auditing standards" in effect as of April 16, 2003, the Board believes

---

<sup>9</sup> 17 C.F.R. § 210.3-01 (2003).

<sup>10</sup> 17 C.F.R. § 210.3-02 (2003).

it is appropriate to require auditors who issue or reissue reports on periods prior to the date Auditing Standard No. 1 becomes effective to state that their audits were performed in accordance with PCAOB standards, so long as they were performed in accordance with the "generally accepted auditing standards" prevailing at the time the audits were performed.

## Auditing Standard No. 3

### ***Audit Documentation***

[Supersedes SAS No. 96, *Audit Documentation*]

Source: Auditing Standard Nos. 8–15.

[Effective pursuant to SEC Release No. 34-50253; File No. PCAOB-2004-05, August 25, 2004; effective for audits of financial statements with respect to fiscal years ending on or after November 15, 2004. For other engagements conducted pursuant to the standards of the PCAOB, including reviews of interim financial information, this standard takes effect beginning with the first quarter ending after the first financial statement audit covered by this standard.]

### Introduction

1. This standard establishes general requirements for documentation the auditor should prepare and retain in connection with engagements conducted pursuant to the standards of the Public Company Accounting Oversight Board ("PCAOB"). Such engagements include an audit of financial statements, an audit of internal control over financial reporting, and a review of interim financial information. This standard does not replace specific documentation requirements of other standards of the PCAOB.

### Objectives of Audit Documentation

2. *Audit documentation* is the written record of the basis for the auditor's conclusions that provides the support for the auditor's representations, whether those representations are contained in the auditor's report or otherwise. Audit documentation also facilitates the planning, performance, and supervision of the engagement, and is the basis for the review of the quality of the work because it provides the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. Among other things, audit documentation includes records of the planning and performance of the work, the procedures performed, evidence obtained, and conclusions reached by the auditor. Audit documentation also may be referred to as *work papers* or *working papers*.

Note: An auditor's representations to a company's board of directors or audit committee, stockholders, investors, or other interested parties are usually included in the auditor's report accompanying the financial statements of the company. The auditor also might make oral representations to the company or others, either on a voluntary basis or if necessary to comply with professional standards, including in connection with an engagement for which an auditor's report is not issued. For example, although an auditor might not issue a report in connection with an engagement to review interim financial information, he or she ordinarily would make oral representations about the results of the review.

3. [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

Audit documentation is reviewed by members of the engagement team performing the work and might be reviewed by others. Reviewers might include, for example:

- a. Auditors who are new to an engagement and review the prior year's documentation to understand the work performed as an aid in planning and performing the current engagement.
- b. Supervisory personnel who review documentation prepared by other members of the engagement team.
- c. Engagement supervisors and engagement quality reviewers who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions.
- d. A successor auditor who reviews a predecessor auditor's audit documentation.
- e. Internal and external inspection teams that review documentation to assess audit quality and compliance with auditing and related professional practice standards; applicable laws, rules, and regulations; and the auditor's own quality control policies.
- f. Others, including advisors engaged by the audit committee or representatives of a party to an acquisition.

### Audit Documentation Requirement

4. The auditor must prepare audit documentation in connection with each engagement conducted pursuant to the standards of the PCAOB. Audit documentation should be prepared in sufficient detail to provide a clear understanding of its purpose, source, and the conclusions reached. Also, the documentation should be appropriately organized to provide a clear link to the significant findings or issues.<sup>1</sup> Examples of audit documentation include memoranda, confirmations, correspondence, schedules, audit programs, and letters of representation. Audit documentation may be in the form of paper, electronic files, or other media.

5. Because audit documentation is the written record that provides the support for the representations in the auditor's report, it should:

- a. Demonstrate that the engagement complied with the standards of the PCAOB,
- b. Support the basis for the auditor's conclusions concerning every relevant financial statement assertion, and
- c. Demonstrate that the underlying accounting records agreed or reconciled with the financial statements.

6. The auditor must document the procedures performed, evidence obtained, and conclusions reached with respect to relevant financial statement assertions.<sup>2</sup> Audit documentation must clearly demonstrate that the work was in fact performed. This documentation requirement applies to the work of all

---

<sup>1</sup> See paragraph 12 of this standard for a description of significant findings or issues.

<sup>2</sup> [The following footnote is effective November 15, 2007. See PCAOB Release 2007-005.] Relevant financial statement assertions are described in paragraphs 28–33 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. In an engagement conducted pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, the relevant assertions are the assertions expressed by management or the responsible party regarding the subject matter of the attestation engagement. The documentation requirements in this standard regarding assertions apply to the aspects of the subject matter to which the assertions relate.

those who participate in the engagement as well as to the work of specialists the auditor uses as evidential matter in evaluating relevant financial statement assertions. Audit documentation must contain sufficient information to enable an experienced auditor, having no previous connection with the engagement:

- a. To understand the nature, timing, extent, and results of the procedures performed, evidence obtained, and conclusions reached, and
- b. To determine who performed the work and the date such work was completed as well as the person who reviewed the work and the date of such review.

*Note:* An *experienced auditor* has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

7. In determining the nature and extent of the documentation for a financial statement assertion, the auditor should consider the following factors:

- Nature of the auditing procedure;
- Risk of material misstatement associated with the assertion;
- Extent of judgment required in performing the work and evaluating the results, for example, accounting estimates require greater judgment and commensurately more extensive documentation;
- Significance of the evidence obtained to the assertion being tested; and
- Responsibility to document a conclusion not readily determinable from the documentation of the procedures performed or evidence obtained.

Application of these factors determines whether the nature and extent of audit documentation is adequate.

8. In addition to the documentation necessary to support the auditor's final conclusions, audit documentation must include information the auditor has identified relating to significant findings or issues that is inconsistent with or contradicts the auditor's final conclusions. The relevant records to be retained include, but are not limited to, procedures performed in response to the information, and records documenting consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

9. If, after the documentation completion date (defined in paragraph 15), the auditor becomes aware, as a result of a lack of documentation or otherwise, that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate, that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. To accomplish this, the auditor must have persuasive other evidence. Oral explanation alone does not constitute persuasive other evidence, but it may be used to clarify other written evidence.

- If the auditor determines and demonstrates that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached, but that documentation thereof is not adequate, then the auditor should consider what additional documentation is needed. In preparing additional documentation, the auditor should refer to paragraph 16.

- If the auditor cannot determine or demonstrate that sufficient procedures were performed, sufficient evidence was obtained, or appropriate conclusions were reached, the auditor should comply with the provisions of AU sec. 390, *Consideration of Omitted Procedures After the Report Date*.

**9A.** [The following paragraph is added and effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

Documentation of risk assessment procedures and responses to risks of misstatement should include (1) a summary of the identified risks of misstatement and the auditor's assessment of risks of material misstatement at the financial statement and assertion levels and (2) the auditor's responses to the risks of material misstatement, including linkage of the responses to those risks.

## Documentation of Specific Matters

**10.** Documentation of auditing procedures that involve the inspection of documents or confirmation, including tests of details, tests of operating effectiveness of controls, and walkthroughs, should include identification of the items inspected. Documentation of auditing procedures related to the inspection of significant contracts or agreements should include abstracts or copies of the documents.

Note: The identification of the items inspected may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- If an audit sample is selected from a population of documents, the documentation should include identifying characteristics (for example, the specific check numbers of the items included in the sample).
- If all items over a specific dollar amount are selected from a population of documents, the documentation need describe only the scope and the identification of the population (for example, all checks over \$10,000 from the October disbursements journal).
- If a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of sales invoices was selected from the sales journal for the period from October 1 to December 31, starting with invoice number 452 and selecting every 40th invoice).

**11.** Certain matters, such as auditor independence, staff training and proficiency and client acceptance and retention, may be documented in a central repository for the public accounting firm ("firm") or in the particular office participating in the engagement. If such matters are documented in a central repository, the audit documentation of the engagement should include a reference to the central repository. Documentation of matters specific to a particular engagement should be included in the audit documentation of the pertinent engagement.

**12.** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

The auditor must document significant findings or issues, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached in connection with each engagement. *Significant findings or issues* are substantive matters that are important to the procedures performed, evidence obtained, or conclusions reached, and include, but are not limited to, the following:

- a. Significant matters involving the selection, application, and consistency of accounting principles, including related disclosures.<sup>2A</sup>
- b. Results of auditing procedures that indicate a need for significant modification of planned auditing procedures, the existence of material misstatements (including omissions in the financial statements), and the existence of significant deficiencies or material weaknesses in internal control over financial reporting.
- c. Accumulated misstatements and evaluation of uncorrected misstatements, including the quantitative and qualitative factors the auditor considered to be relevant to the evaluation.<sup>2B</sup>
- d. Disagreements among members of the engagement team or with others consulted on the engagement about final conclusions reached on significant accounting or auditing matters, including the basis for the final resolution of those disagreements. If an engagement team member disagrees with the final conclusions reached, he or she should document that disagreement.
- e. Circumstances that cause significant difficulty in applying auditing procedures.
- f. Significant changes in the auditor's risk assessments, including risks that were not identified previously, and the modifications to audit procedures or additional audit procedures performed in response to those changes.<sup>2C</sup>
- f-1. Risks of material misstatement that are determined to be significant risks and the results of the auditing procedures performed in response to those risks.
- g. Any matters that could result in modification of the auditor's report.

Note: In an engagement conducted pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, significant findings or issues include, when applicable: (a) the assessment of, and the responses to, risks requiring special consideration by the auditor; (b) significant matters involving systems, processes, and controls to ensure the appropriateness of the subject matter and management's related assertions; and (c) the evaluation of identified instances of nonconformity with the evaluation criteria (e.g., errors, instances of non-compliance, or control deficiencies).

**13.** The auditor must identify all significant findings or issues in an *engagement completion document*. This document may include either all information necessary to understand the significant findings, issues or cross-references, as appropriate, to other available supporting audit documentation. This document, along with any documents cross-referenced, should collectively

---

[Footnote added, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>2B</sup> See paragraphs 10–23 of Auditing Standard No. 14, *Evaluating Audit Results*. [Footnote added, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>2C</sup> See paragraph 74 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, and paragraph 36 of Auditing Standard No. 14, *Evaluating Audit Results*. [Footnote added, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

be as specific as necessary in the circumstances for a reviewer to gain a thorough understanding of the significant findings or issues.

Note: The engagement completion document prepared in connection with the annual audit should include documentation of significant findings or issues identified during the review of interim financial information.

Note: When conducting an attestation engagement pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, the auditor may include the documentation of significant findings or issues related to the attestation engagement in the engagement completion document prepared in connection with the audit of the financial statements.

## Retention of and Subsequent Changes to Audit Documentation

**14.** The auditor must retain audit documentation for seven years from the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements (*report release date*), unless a longer period of time is required by law. If a report is not issued in connection with an engagement, then the audit documentation must be retained for seven years from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the audit documentation must be retained for seven years from the date the engagement ceased.

**15.** Prior to the report release date, the auditor must have completed all necessary auditing procedures and obtained sufficient evidence to support the representations in the auditor's report. A complete and final set of audit documentation should be assembled for retention as of a date not more than 45 days after the report release date (*documentation completion date*). If a report is not issued in connection with an engagement, then the documentation completion date should not be more than 45 days from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the documentation completion date should not be more than 45 days from the date the engagement ceased.

**16.** Circumstances may require additions to audit documentation after the report release date. Audit documentation must not be deleted or discarded after the documentation completion date, however, information may be added. Any documentation added must indicate the date the information was added, the name of the person who prepared the additional documentation, and the reason for adding it.

**17.** Other standards require the auditor to perform procedures subsequent to the report release date in certain circumstances. For example, in accordance with AU sec. 711, *Filings Under Federal Securities Statutes*, auditors are required to perform certain procedures up to the effective date of a registration statement.<sup>3</sup> The auditor must identify and document any additions to audit documentation as a result of these procedures consistent with the previous paragraph.

**18.** The office of the firm issuing the auditor's report is responsible for ensuring that all audit documentation sufficient to meet the requirements of paragraphs 4–13 of this standard is prepared and retained. Audit documentation supporting the work performed by other auditors (including auditors associated

---

<sup>3</sup> Section 11 of the Securities Act of 1933 makes specific mention of the auditor's responsibility as an expert when the auditor's report is included in a registration statement under the 1933 Act.

with other offices of the firm, affiliated firms, or non-affiliated firms), must be retained by or be accessible to the office issuing the auditor's report.<sup>4</sup>

**19.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In addition, the office issuing the auditor's report must obtain, and review and retain, prior to the report release date, the following documentation related to the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms):

- a. An engagement completion document consistent with paragraphs 12 and 13.  
Note: This engagement completion document should include all cross-referenced, supporting audit documentation.
- b. A list of significant risks, the auditor's responses, and the results of the auditor's related procedures.
- c. Sufficient information relating to any significant findings or issues that are inconsistent with or contradict the final conclusions, as described in paragraph 8.
- d. Any findings affecting the consolidating or combining of accounts in the consolidated financial statements.
- e. Sufficient information to enable the office issuing the auditor's report to agree or to reconcile the financial statement amounts audited by the other auditor to the information underlying the consolidated financial statements.
- f. A schedule of accumulated misstatements, including a description of the nature and cause of each accumulated misstatement, and an evaluation of uncorrected misstatements, including the quantitative and qualitative factors the auditor considered to be relevant to the evaluation.
- g. All significant deficiencies and material weaknesses in internal control over financial reporting, including a clear distinction between those two categories.
- h. Letters of representations from management.
- i. All matters to be communicated to the audit committee.

If the auditor decides to make reference in his or her report to the audit of the other auditor, however, the auditor issuing the report need not perform the procedures in this paragraph and, instead, should refer to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

**20.** The auditor also might be required to maintain documentation in addition to that required by this standard.<sup>5</sup>

**[21.]** *[Paragraph 21. and preceding heading, "Effective Date," deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

---

<sup>4</sup> Section 106(b) of the Sarbanes-Oxley Act of 2002 imposes certain requirements concerning production of the work papers of a foreign public accounting firm on whose opinion or services the auditor relies. Compliance with this standard does not substitute for compliance with Section 106(b) or any other applicable law.

<sup>5</sup> For example, the SEC requires auditors to retain, in addition to documentation required by this standard, memoranda, correspondence, communications (for example, electronic mail), other documents, and records (in the form of paper, electronic, or other media) that are created, sent, or received in connection with an engagement conducted in accordance with auditing and related professional practice standards and that contain conclusions, opinions, analyses, or data related to the engagement. (*Retention of Audit and Review Records*, 17 CFR §210.2-06, effective for audits or reviews completed on or after October 31, 2003.)

## Appendix A

### Background and Basis for Conclusions

#### Introduction

A1. This appendix summarizes considerations that the Public Company Accounting Oversight Board ("PCAOB" or "Board") deemed significant in developing this standard. This Appendix includes reasons for accepting certain views and rejecting others.

A2. Section 103(a)(2)(A)(i) of the Sarbanes-Oxley Act of 2002 (the "Act") directs the Board to establish auditing standards that require registered public accounting firms to prepare and maintain, for at least seven years, audit documentation "in sufficient detail to support the conclusions reached" in the auditor's report. Accordingly, the Board has made audit documentation a priority.

#### Background

A3. Auditors support the conclusions in their reports with a work product called *audit documentation*, also referred to as *working papers* or *work papers*. Audit documentation supports the basis for the conclusions in the auditor's report. Audit documentation also facilitates the planning, performance, and supervision of the engagement and provides the basis for the review of the quality of the work by providing the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. Examples of audit documentation include memoranda, confirmations, correspondence, schedules, audit programs, and letters of representation. Audit documentation may be in the form of paper, electronic files, or other media.

A4. The Board's standard on audit documentation is one of the fundamental building blocks on which both the integrity of audits and the Board's oversight will rest. The Board believes that the quality and integrity of an audit depends, in large part, on the existence of a complete and understandable record of the work the auditor performed, the conclusions the auditor reached, and the evidence the auditor obtained that supports those conclusions. Meaningful reviews, whether by the Board in the context of its inspections or through other reviews, such as internal quality control reviews, would be difficult or impossible without adequate documentation. Clear and comprehensive audit documentation is essential to enhance the quality of the audit and, at the same time, to allow the Board to fulfill its mandate to inspect registered public accounting firms to assess the degree of compliance of those firms with applicable standards and laws.

A5. The Board began a standards-development project on audit documentation by convening a public roundtable discussion on September 29, 2003, to discuss issues and hear views on the subject. Participants at the roundtable included representatives from public companies, public accounting firms, investor groups, and regulatory organizations.

A6. Prior to this roundtable discussion, the Board prepared and released a briefing paper on audit documentation that posed several questions to help identify the objectives—and the appropriate scope and form—of audit documentation. In addition, the Board asked participants to address specific issues in practice relating to, among other things, changes in audit documentation after release of the audit report, essential elements and the appropriate amount of detail of

audit documentation, the effect on audit documentation of a principal auditor's decision to use the work of other auditors, and retention of audit documentation. Based on comments made at the roundtable, advice from the Board's staff, and other input the Board received, the Board determined that the pre-existing standard on audit documentation, Statement on Auditing Standards ("SAS") No. 96, *Audit Documentation*, was insufficient for the Board to discharge appropriately its standard-setting obligations under Section 103(a) of the Act. In response, the Board developed and issued for comment, on November 17, 2003, a proposed auditing standard titled, *Audit Documentation*.

A7. The Board received 38 comment letters from a variety of interested parties, including auditors, regulators, professional associations, government agencies, and others. Those comments led to some changes in the requirements of the standard. Also, other changes made the requirements easier to understand. The following sections summarize significant views expressed in those comment letters and the Board's responses to those comments.

## Objective of This Standard

A8. The objective of this standard is to improve audit quality and enhance public confidence in the quality of auditing. Good audit documentation improves the quality of the work performed in many ways, including, for example:

- Providing a record of actual work performed, which provides assurance that the auditor accomplishes the planned objectives.
- Facilitating the reviews performed by supervisors, managers, engagement partners, engagement quality reviewers,<sup>1</sup> and PCAOB inspectors.
- Improving effectiveness and efficiency by reducing time-consuming, and sometimes inaccurate, oral explanations of what was done (or not done).

A9. The documentation requirements in this standard should result in more effective and efficient oversight of registered public accounting firms and associated persons, thereby improving audit quality and enhancing investor confidence.

A10. Inadequate audit documentation diminishes audit quality on many levels. First, if audit documentation does not exist for a particular procedure or conclusion related to a significant matter, it casts doubt as to whether the necessary work was done. If the work was not documented, then it becomes difficult for the engagement team, and others, to know what was done, what conclusions were reached, and how those conclusions were reached. In addition, good audit documentation is very important in an environment in which engagement staff changes or rotates. Due to engagement staff turnover, knowledgeable staff on an engagement may not be available for the next engagement.

## Audit Programs

A11. Several commenters suggested that audit documentation should include audit programs. Audit programs were specifically mentioned in SAS No. 96 as a form of audit documentation.

---

<sup>1</sup> The engagement quality reviewer is referred to as the concurring partner reviewer in the membership requirements of the AICPA SEC Practice Section. The Board adopted certain of these membership requirements as they existed on April 16, 2003. Some firms also may refer to this designated reviewer as the second partner reviewer.

A12. The Board accepted this recommendation, and paragraph 4 in the final standard includes audit programs as an example of documentation. Audit programs may provide evidence of audit planning as well as limited evidence of the execution of audit procedures, but the Board believes that signed-off audit programs should generally not be used as the sole documentation that a procedure was performed, evidence was obtained, or a conclusion was reached. An audit program aids in the conduct and supervision of an engagement, but completed and initialed audit program steps should be supported with proper documentation in the working papers.

## Reviewability Standard

A13. The proposed standard would have adapted a standard of reviewability from the U.S. General Accounting Office's ("GAO") documentation standard for government and other audits conducted in accordance with generally accepted government auditing standards ("GAGAS"). The GAO standard provides that "Audit documentation related to planning, conducting, and reporting on the audit should contain sufficient information to enable an experienced auditor who has had no previous connection with the audit to ascertain from the audit documentation the evidence that supports the auditors' significant judgments and conclusions."<sup>2</sup> This requirement has been important in the field of government auditing because government audits have long been reviewed by GAO auditors who, although experienced in auditing, do not participate in the actual audits. Moreover, the Panel on Audit Effectiveness recommended that sufficient, specific requirements for audit documentation be established to enable public accounting firms' internal inspection teams as well as others, including reviewers outside of the firms, to assess the quality of engagement performance.<sup>3</sup> Audits and reviews of issuers' financial statements will now, under the Act, be subject to review by PCAOB inspectors. Therefore, a documentation standard that enables an inspector to understand the work that was performed in an audit or review is appropriate.

A14. Accordingly, the Board's proposed standard would have required that audit documentation contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the work that was performed, the name of the person(s) who performed it, the date it was completed, and the conclusions reached. This experienced auditor also should have been able to determine who reviewed the work and the date of such review.

A15. Some commenters suggested that the final standard more specifically describe the qualifications of an experienced auditor. These commenters took the position that only an engagement partner with significant years of experience would have the experience necessary to be able to understand all the work that was performed and the conclusions that were reached. One commenter suggested that an auditor who is reviewing audit documentation should have experience and knowledge consistent with the experience and knowledge that the auditor performing the audit would be required to possess, including knowledge of the current accounting, auditing, and financial reporting issues of the company's industry. Another said that the characteristics defining an experienced auditor should be consistent with those expected of the auditor with final responsibility for the engagement.

---

<sup>2</sup> U.S. General Accounting Office, *Government Auditing Standards*, "Field Work Standards for Financial Audits" (2003 Revision), paragraph 4.22.

<sup>3</sup> Panel on Audit Effectiveness, *Report and Recommendations* (Stamford, Ct: Public Oversight Board, August 31, 2000).

A16. After considering these comments, the Board has provided additional specificity about the meaning of the term, *experienced auditor*. The standard now describes an experienced auditor as one who has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

A17. Some commenters also suggested that the standard, as proposed, did not allow for the use of professional judgment. These commenters pointed to the omission of a statement about professional judgment found in paragraph 4.23 of GAGAS that states, "The quantity, type, and content of audit documentation are a matter of the auditors' professional judgment." A nearly identical statement was found in the interim auditing standard, SAS No. 96, *Audit Documentation*.

A18. Auditors exercise professional judgment in nearly every aspect of planning, performing, and reporting on an audit. Auditors also exercise professional judgment in the documentation of an audit and other engagements. An objective of this standard is to ensure that auditors give proper consideration to the need to document procedures performed, evidence obtained, and conclusions reached in light of time and cost considerations in completing an engagement.

A19. Nothing in the standard precludes auditors from exercising their professional judgment. Moreover, because professional judgment might relate to any aspect of an audit, the Board does not believe that an explicit reference to professional judgment is necessary every time the use of professional judgment may be appropriate.

## **Audit Documentation Must Demonstrate That the Work Was Done**

A20. A guiding principle of the proposed standard was that auditors must document procedures performed, evidence obtained, and conclusions reached. This principle is not new and was found in the interim standard, SAS No. 96, *Audit Documentation*, which this standard supersedes. Audit documentation also should demonstrate compliance with the standards of the PCAOB and include justification for any departures.

A21. The proposed standard would have adapted a provision in the California Business and Professions Code which provides that if documentation does not exist, then there is a rebuttable presumption that the work had not been done.

A22. The objections to this proposal fell into two general categories: the effect of the rebuttable presumption on legal proceedings and the perceived impracticality of documenting every conversation or conclusion that affected the engagement. Discussion of these issues follows.

### **Rebuttable Presumption**

A23. Commenters expressed concern about the effects of the proposed language on regulatory or legal proceedings outside the context of the PCAOB's oversight. They argued that the rebuttable presumption might be understood to establish evidentiary rules for use in judicial and administrative proceedings in other jurisdictions.

A24. Some commenters also had concerns that oral explanation alone would not constitute persuasive other evidence that work was done, absent any documentation. Those commenters argued that not allowing oral explanations when there was no documentation would essentially make the presumption "irrebuttable." Moreover, those commenters argued that it was inappropriate for a professional standard to predetermine for a court the relative value of evidence.

A25. The Board believes that complete audit documentation is necessary for a quality audit or other engagement. The Board intends the standard to require auditors to document procedures performed, evidence obtained, and conclusions reached to improve the quality of audits. The Board also intends that a deficiency in documentation is a departure from the Board's standards. Thus, although the Board removed the phrase *rebuttable presumption*, the Board continues to stress, in paragraph 9 of the standard, that the auditor must have persuasive other evidence that the procedures were performed, evidence was obtained, and appropriate conclusions were reached with respect to relevant financial statement assertions.

A26. The term *should* (presumptively mandatory responsibility) was changed to *must* (unconditional responsibility) in paragraph 6 to establish a higher threshold for the auditor. Auditors have an unconditional requirement to document their work. Failure to discharge an unconditional responsibility is a violation of the standard and Rule 3100, which requires all registered public accounting firms to adhere to the Board's auditing and related professional practice standards in connection with an audit or review of an issuer's financial statements.

A27. The Board also added two new paragraphs to the final standard to explain the importance and associated responsibility of performing the work and adequately documenting all work that was performed. Paragraph 7 provides a list of factors the auditor should consider in determining the nature and extent of documentation. These factors should be considered by both the auditor in preparing the documentation and the reviewer in evaluating the documentation.

A28. In paragraph 9 of this standard, if, after the documentation completion date, as a result of a lack of documentation or otherwise, it appears that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate, that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. In those circumstances, for example, during an inspection by the Board or during the firm's internal quality control review, the auditor is required to demonstrate with persuasive other evidence that the procedures were performed, the evidence was obtained, and appropriate conclusions were reached. In this and similar contexts, oral explanation alone does not constitute persuasive other evidence. However, oral evidence may be used to clarify other written evidence.

A29. In addition, more reliable, objective evidence may be required depending on the nature of the test and the objective the auditor is trying to achieve. For example, if there is a high risk of a material misstatement with respect to a particular assertion, then the auditor should obtain and document sufficient procedures for the auditor to conclude on the fairness of the assertion.

## Impracticality

A30. Some commenters expressed concern that the proposed standard could be construed or interpreted to require the auditor to document every conversation held with company management or among the engagement team members. Some commenters also argued that they should not be required to document every conclusion, including preliminary conclusions that were part of a thought process that may have led them to a different conclusion, on the ground that this would result in needless and costly work performed by the auditor. Commenters also expressed concern that an unqualified requirement to document

procedures performed, evidence obtained, and conclusions reached without allowing the use of auditor judgment would increase the volume of documentation but not the quality. They stated that it would be unnecessary, time-consuming, and potentially counterproductive to require the auditor to make a written record of everything he or she did.

A31. The Board's standard distinguishes between (1) an audit procedure that must be documented and (2) a conversation with company management or among the members of the engagement team. Inquiries with management should be documented when an inquiry is important to a particular procedure. The inquiry could take place during planning, performance, or reporting. The auditor need not document each conversation that occurred.

A32. A final conclusion is an integral part of a working paper, unless the working paper is only for informational purposes, such as documentation of a discussion or a process. This standard does not require that the auditor document each interim conclusion reached in arriving at the risk assessments or final conclusions. Conclusions reached early on during an audit may be based on incomplete information or an incorrect understanding. Nevertheless, auditors should document a final conclusion for every audit procedure performed, if that conclusion is not readily apparent based on documented results of the procedures.

A33. The Board also believes the reference to *specialists* is an important element of paragraph 6. Specialists play a vital role in audit engagements. For example, appraisers, actuaries, and environmental consultants provide valuable data concerning asset values, calculation assumptions, and loss reserves. When using the work of a specialist, the auditor must ensure that the specialist's work, as it relates to the audit objectives, also is adequately documented. For example, if the auditor relies on the work of an appraiser in obtaining the fair value of commercial property available for sale, then the auditor must ensure the appraisal report is adequately documented. Moreover, the term *specialist* in this standard is intended to include any specialist the auditor relies on in conducting the work, including those employed or retained by the auditor or by the company.

## Audit Adjustments

A34. Several commenters recommended that the definition of *audit adjustments* in this proposed standard should be consistent with the definition contained in AU sec. 380, *Communication With Audit Committees*.

A35. Although the Board recognizes potential benefits of having a uniform definition of the term *audit adjustments*, the Board does not believe that the definition in AU sec. 380 is appropriate for this documentation standard because that definition was intended for communication with audit committees. The Board believes that the definition should be broader so that the engagement partner, engagement quality reviewer, and others can be aware of all proposed corrections of misstatements, whether or not recorded by the entity, of which the auditor is aware, that were or should have been proposed based on the audit evidence.

A36. Adjustments that should have been proposed based on known audit evidence are material misstatements that the auditor identified but did not propose to management. Examples include situations in which (1) the auditor identifies a material error but does not propose an adjustment and (2) the auditor

proposes an adjustment in the working papers, but fails to note the adjustment in the summary or schedule of proposed adjustments.

### **Information That Is Inconsistent With or Contradicts the Auditor's Final Conclusions**

A37. Paragraph .25 of AU sec. 326, *Evidential Matter*, states: "In developing his or her opinion, the auditor should consider relevant evidential matter regardless of whether it appears to corroborate or to contradict the assertions in the financial statements." Thus, during the conduct of an audit, the auditor should consider all relevant evidential matter even though it might contradict or be inconsistent with other conclusions. Audit documentation must contain information or data relating to significant findings or issues that are inconsistent with the auditor's final conclusions on the relevant matter.

A38. Also, information that initially appears to be inconsistent or contradictory, but is found to be incorrect or based on incomplete information, need not be included in the final audit documentation, provided that the apparent inconsistencies or contradictions were satisfactorily resolved by obtaining complete and correct information. In addition, with respect to differences in professional judgment, auditors need not include in audit documentation preliminary views based on incomplete information or data.

### **Retention of Audit Documentation**

A39. The proposed standard would have required an auditor to retain audit documentation for seven years after completion of the engagement, which is the minimum period permitted under Section 103(a)(2)(A)(i) of the Act. In addition, the proposed standard would have added a new requirement that the audit documentation must be assembled for retention within a reasonable period of time after the auditor's report is released. Such reasonable period of time should not exceed 45 days.

A40. In general, those commenting on this documentation retention requirement did not have concerns with the time period of 45 days to assemble the working papers. However, some commenters suggested the Board tie this 45-day requirement to the filing date of the company's financial statements with the SEC. One commenter recommended that the standard refer to the same trigger date for initiating both the time period during which the auditor should complete work paper assembly and the beginning of the seven-year retention period.

A41. For consistency and practical implications, the Board agreed that the standard should have the same date for the auditor to start assembling the audit documentation and initiating the seven-year retention period. The Board decided that the seven-year retention period begins on the *report release date*, which is defined as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. In addition, auditors will have 45 days to assemble the complete and final set of audit documentation, beginning on the report release date. The Board believes that using the report release date is preferable to using the filing date of the company's financial statements, since the auditor has ultimate control over granting permission to use his or her report. If an auditor's report is not issued, then the audit documentation is to be retained for seven years from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the seven-year period begins when the work on the engagement ceased.

## Section 802 of Sarbanes-Oxley and the SEC's Implementing Rule

A42. Many commenters had concerns about the similarity in language between the proposed standard and the SEC final rule (issued in January 2003) on record retention, *Retention of Records Relevant to Audits and Reviews*.<sup>4</sup> Some commenters recommended that the PCAOB undertake a project to identify and resolve all differences between the proposed standard and the SEC's final rule. These commenters also suggested that the Board include similar language from the SEC final rule, Rule 2-06 of Regulation S-X, which limits the requirement to retain some items.

### Differences Between Section 802 and This Standard

A43. The objective of the Board's standard is different from the objective of the SEC's rule on record retention. The objective of the Board's standard is to require auditors to create certain documentation to enhance the quality of audit documentation, thereby improving the quality of audits and other related engagements. The records retention section of this standard, mandated by Section 103 of the Act, requires registered public accounting firms to "prepare and maintain for a period of not less than 7 years, *audit work papers, and other information related to any audit report*, in sufficient detail to support the conclusions reached in such report." (emphasis added)

A44. In contrast, the focus of the SEC rule is to require auditors to *retain* documents that the auditor does create, in order that those documents will be available in the event of a regulatory investigation or other proceeding. As stated in the release accompanying the SEC's final rule (SEC Release No. 33-8180):

Section 802 of the Sarbanes-Oxley Act is intended to address the destruction or fabrication of evidence and the preservation of "financial and audit records." We are directed under that section to promulgate rules related to the retention of records relevant to the audits and reviews of financial statements that companies file with the Commission.

A45. The SEC release further states, "New rule 2-06 . . . addresses the retention of documents relevant to enforcement of the securities laws, Commission rules, and criminal laws."

A46. Despite their different objectives, the proposed standard and SEC Rule 2-06 use similar language in describing documentation generated during an audit or review. Paragraph 4 of the proposed standard stated that, "Audit documentation ordinarily consists of *memoranda, correspondence, schedules, and other documents created or obtained in connection with the engagement* and may be in the form of paper, electronic files, or other media." Paragraph (a) of SEC Rule 2-06 describes "records relevant to the audit or review" that must be retained as, (1) "workpapers and other documents that form the basis of the audit or review and (2) *memoranda, correspondence, communications, other documents, and records (including electronic records), which: [a]re created, sent or received in connection with the audit or review and [c]ontain conclusions, opinions, analyses, or financial data related to the audit or review. . . .*" (numbering and emphasis added).

A47. The SEC makes a distinction between the objectives of categories (1) and (2). Category (1) includes audit documentation. Documentation to be retained

---

<sup>4</sup> SEC Regulation S-X, 17 C.F.R. § 210.2-06 (SEC Release No. 33-8180, January 2003). (The final rule was effective in March 2003.)

according to the Board's standard clearly falls within category (1). Items in category (2) include "desk files" which are more than "what traditionally has been thought of as auditor's 'workpapers'." The SEC's rule requiring auditors to retain items in category (2) have the principal purpose of facilitating enforcement of securities laws, SEC rules, and criminal laws. This is not an objective of the Board's standard. According to SEC Rule 2-06, items in category (2) are limited to those which: (a) are created, sent or received in connection with the audit or review, and (b) contain conclusions, opinions, analyses, or financial data related to the audit or review. The limitations, (a) and (b), do not apply to category (1).

A48. Paragraph 4 of the final standard deletes the reference in the proposed standard to "other documents created or obtained in connection with the engagement." The Board decided to keep "correspondence" in the standard because correspondence can be valid audit evidence. Paragraph 20 of the standard reminds the auditor that he or she may be required to maintain documentation in addition to that required by this standard.

### Significant Matters and Significant Findings or Issues

A49. Some commenters asked how the term *significant matters*, in Rule 2-06, relates to the term *significant findings or issues* in the Board's standard. The SEC's release accompanying its final Rule 2-06 states that ". . . *significant matters* is intended to refer to the documentation of substantive matters that are important to the audit or review process or to the financial statements of the issuer. . . ." This is very similar to the term *significant findings or issues* contained in paragraph 12 of the Board's standard which requires auditors to document *significant findings or issues*, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached. Examples of significant findings or issues are provided in the standard.

A50. Based on the explanation in the SEC's final rule and accompanying release, the Board believes that *significant matters* are included in the meaning of *significant findings or issues* in the Board's standard. The Board is of the view that *significant findings or issues* is more comprehensive and provides more clarity than *significant matters* and, therefore, has not changed the wording in the final standard.

### Changes to Audit Documentation

A51. The proposed standard would have required that any changes to the working papers after completion of the engagement be documented without deleting or discarding the original documents. Such documentation must indicate the date the information was added, by whom it was added, and the reason for adding it.

A52. One commenter recommended that the Board provide examples of auditing procedures that should be performed before the report release date and procedures that may be performed after the report release date. Some commenters also requested clarification about the treatment of changes to documentation that occurred after the completion of the engagement but before the report release date. Many commenters recommended that the Board more specifically describe post-issuance procedures. The Board generally agreed with these comments.

A53. The final standard includes two important dates for the preparation of audit documentation: (1) the report release date and (2) the documentation completion date.

- Prior to the report release date, the auditor must have completed all necessary auditing procedures, including clearing review notes and providing support for all final conclusions. In addition, the auditor must have obtained sufficient evidence to support the representations in the auditor's reports before the report release date.
- After the report release date and prior to the documentation completion date, the auditor has 45 calendar days in which to assemble the documentation.

A54. During the audit, audit documentation may be superseded for various reasons. Often, during the review process, reviewers annotate the documentation with clarifications, questions, and edits. The completion process often involves revising the documentation electronically and generating a new copy. The SEC's final rule on record retention, *Retention of Records Relevant to Audits and Reviews*,<sup>5</sup> explains that the SEC rule does not require that the following documents generally need to be retained: superseded drafts of memoranda, financial statements or regulatory filings; notes on superseded drafts of memoranda, financial statements or regulatory filings that reflect incomplete or preliminary thinking; previous copies of workpapers that have been corrected for typographical errors or errors due to training of new employees; and duplicates of documents. This standard also does not require auditors to retain such documents as a general matter.

A55. Any documents, however, that reflect information that is either inconsistent with or contradictory to the conclusions contained in the final working papers may not be discarded. Any documents added must indicate the date they were added, the name of the person who prepared them, and the reason for adding them.

A56. If the auditor obtains and documents evidence after the report release date, the auditor should refer to the Interim Auditing Standards, AU sec. 390, *Consideration of Omitted Procedures After the Report Date* and AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*. Auditors should not discard any previously existing documentation in connection with obtaining and documenting evidence after the report release date.

A57. The auditor may perform certain procedures subsequent to the report release date. For example, pursuant to AU sec. 711, *Filings Under Federal Securities Statutes*, auditors are required to perform certain procedures up to the effective date of a registration statement. The auditor should identify and document any additions to audit documentation as a result of these procedures. No audit documentation should be discarded after the documentation completion date, even if it is superseded in connection with any procedures performed, including those performed pursuant to AU sec. 711.

A58. Additions to the working papers may take the form of memoranda that explain the work performed, evidence obtained, and conclusions reached. Documentation added to the working papers must indicate the date the information was added, the name of the person adding it, and the reason for adding it. All previous working papers must remain intact and not be discarded.

A59. Documentation added to the working papers well after completion of the audit or other engagement is likely to be of a lesser quality than that produced contemporaneously when the procedures were performed. It is very difficult to reconstruct activities months, and perhaps years, after the work was actually performed. The turnover of both firm and company staff can cause difficulty in reconstructing conversations, meetings, data, or other evidence. Also, with

---

<sup>5</sup> See footnote 4.

the passage of time memories fade. Oral explanation can help confirm that procedures were performed during an audit, but oral explanation alone does not constitute persuasive other evidence. The primary source of evidence should be documented at the time the procedures are performed, and oral explanation should not be the primary source of evidence. Furthermore, any oral explanation should not contradict the documented evidence, and appropriate consideration should be given to the credibility of the individual providing the oral explanation.

## **Multi-Location Audits and Using the Work of Other Auditors**

A60. The proposed standard would have required the principal auditor to maintain specific audit documentation when he or she decided not to make reference to the work of another auditor.

A61. The Board also proposed an amendment to AU sec. 543 concurrently with the proposed audit documentation standard. The proposed amendment would have required the principal auditor to review the documentation of the other auditor to the same extent and in the same manner that the audit work of all those who participated in the engagement is reviewed.

A62. Commenters expressed concerns that these proposals could present conflicts with certain non-U.S. laws. Those commenters also expressed concern about the costs associated with the requirement for the other auditor to ship their audit documentation to the principal auditor. In addition, the commenters also objected to the requirement that principal auditors review the work of other auditors as if they were the principal auditor's staff.

### ***Audit Documentation Must Be Accessible to the Office Issuing the Auditor's Report***

A63. After considering these comments, the Board decided that it could achieve one of the objectives of the proposed standard (that is, to require that the issuing office have access to those working papers on which it placed reliance) without requiring that the working papers be shipped to the issuing office. Further, given the potential difficulties of shipping audit documentation from various non-U.S. locations, the Board decided to modify the proposed standard to require that audit documentation either be retained by or be accessible to the issuing office.

A64. In addition, instead of requiring that all of the working papers be shipped to the issuing office, the Board decided to require that the issuing office obtain, review, and retain certain summary documentation. Thus, the public accounting firm issuing an audit report on consolidated financial statements of a multinational company may not release that report without the documentation described in paragraph 19 of the standard.

A65. The auditor must obtain and review and retain, prior to the report release date, documentation described in paragraph 19 of the standard, in connection with work performed by other offices of the public accounting firm or other auditors, including affiliated or non-affiliated firms, that participated in the audit. For example, an auditor that uses the work of another of its offices or other affiliated or non-affiliated public accounting firms to audit a subsidiary that is material to a company's consolidated financial statements must obtain the documentation described in paragraph 19 of the standard, prior to the report release date. On the other hand, an auditor that uses the work of another of its offices or other affiliated or non-affiliated firms, to perform selected procedures, such as observing the physical inventories of a company, may not be required to obtain the documentation specified in paragraph 19 of the standard. However,

this does not reduce the need for the auditor to obtain equivalent documentation prepared by the other auditor when those instances described in paragraph 19 of the standard are applicable.

### **Amendment to AU Sec. 543, *Part of Audit Performed by Other Independent Auditors***

A66. Some commenters also objected to the proposed requirement in the amendment to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, that the principal auditor review another auditor's audit documentation. They objected because they were of the opinion such a review would impose an unnecessary cost and burden given that the other auditor will have already reviewed the documentation in accordance with the standards established by the principal auditor. The commenters also indicated that any review by the principal auditor would add excessive time to the SEC reporting process, causing even more difficulties as the SEC Form 10-K reporting deadlines have become shorter recently and will continue to shorten next year.

A67. The Board accepted the recommendation to modify the proposed amendment to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*. Thus, in the final amendment, the Board imposes the same unconditional responsibility on the principal auditor to obtain certain audit documentation from the other auditor prior to the report release date. The final amendment also provides that the principal auditor should consider performing one or more of the following procedures:

- Visit the other auditors and discuss the audit procedures followed and results thereof.
- Review the audit programs of the other auditors. In some cases, it may be appropriate to issue instructions to the other auditors as to the scope of the audit work.
- Review additional audit documentation of the other auditors relating to significant findings or issues in the engagement completion document.

### **Effective Date**

A68. The Board proposed that the standard and related amendment would be effective for engagements completed on or after June 15, 2004. Many commenters were concerned that the effective date was too early. They pointed out that some audits, already begun as of the proposed effective date, would be affected and that it could be difficult to retroactively apply the standard. Some commenters also recommended delaying the effective date to give auditors adequate time to develop and implement processes and provide training with respect to several aspects of the standard.

A69. After considering the comments, the Board has delayed the effective date. However, the Board also believes that a delay beyond 2004 is not in the public interest.

A70. The Board concluded that the implementation date of this standard should coincide with that of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, because of the documentation issues prevalent in PCAOB Auditing Standard No. 2. Therefore, the Board has decided that the standard will be effective for audits of financial statements with respect to fiscal years ending on or after November 15, 2004. The effective date for reviews of interim

financial information and other engagements, conducted pursuant to the standards of the PCAOB, would occur beginning with the first quarter ending after the first financial statement audit covered by this standard.

### **Reference to Audit Documentation As the Property of the Auditor**

A71. Several commenters noted that SAS No. 96, *Audit Documentation*, the interim auditing standard on audit documentation, referred to audit documentation as the property of the auditor. This was not included in the proposed standard because the Board did not believe ascribing property rights would have furthered this standard's purpose to enhance the quality of audit documentation.

### **Confidential Client Information**

A72. SAS No. 96, *Audit Documentation*, also stated that, "the auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information," and referenced Rule 301, *Confidential Client Information*, of the AICPA's Code of Professional Conduct. Again, the Board's proposed standard on audit documentation did not include this provision. In adopting certain interim standards and rules as of April 16, 2003, the Board did not adopt Rule 301 of the AICPA's Code of Professional Conduct. In this standard on audit documentation, the Board seeks neither to establish confidentiality standards nor to modify or detract from any existing applicable confidentiality requirements.

## Attachment

### PCAOB Release No. 2004-006

June 9, 2003

PCAOB Rulemaking  
Docket Matter No. 012

## Summary

After public comment, the Public Company Accounting Oversight Board (the "PCAOB" or "Board") has adopted Auditing Standard No. 3, *Audit Documentation*, and an amendment to AU sec. 543 of the Interim Auditing Standards. The Board will submit this standard and amendment to the Securities and Exchange Commission ("SEC" or "Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

## Board Contacts

Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org), and Greg Fletcher, Assistant Chief Auditor (202/207-2203; fletcher@pcaobus.org).

\* \* \* \* \*

Section 103(a)(2)(A)(i) of the Act expressly directs the Board to establish auditing standards that require registered public accounting firms to prepare and maintain, for at least seven years, audit documentation "in sufficient detail to support the conclusions reached" in the auditor's report. Audit documentation is one of only a few topics that the Act expressly requires the Board to adopt standards. Accordingly, the Board made audit documentation a priority in its standards setting responsibilities.

The Board commenced a standards-development project on audit documentation by convening a public roundtable discussion on September 29, 2003, to discuss issues and hear views on audit documentation. Before that roundtable discussion, the Board prepared and released a briefing paper on audit documentation, which posed several questions to help identify the objectives—and the appropriate scope and form—of audit documentation.<sup>1</sup> In addition, the Board asked participants to address specific practice issues relating to, among other things, changes in audit documentation after an audit report has been released; the essential elements and the appropriate amount of detail of audit documentation; the effect on audit documentation of a principal auditor's decision to use the work of other auditors; and retention of audit documentation.

Taking into consideration comments from participants in this roundtable discussion, advice from the Board's staff, and other input, the Board determined that the existing interim auditing standard on audit documentation was not sufficient in providing direction to ensure that auditors appropriately document both the work they perform and the conclusions they reach in connection with audits and other engagements. On November 21, 2003, the Board issued a proposed auditing standard entitled *Audit Documentation*, as well as a related

<sup>1</sup> See Briefing Paper for the Roundtable on Audit Documentation, dated September 10, 2003. The transcript of the September 29, 2003 roundtable discussion and copies of the briefing paper are available on the Board's Web site ([www.pcaobus.org](http://www.pcaobus.org)).

amendment to an interim auditing standard (paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*).

The Board received 38 comment letters from a variety of interested parties, including auditors, regulators, professional associations, and government agencies. Those comments led to some changes in the requirements of the standard.

The Board's standard on audit documentation will be one of the fundamental building blocks on which both the integrity of audits and the Board's oversight will rest. The integrity of an audit depends, in large part, on the existence of a complete and understandable record of the work that the auditor performed, the evidence gathered, and the conclusions reached. Meaningful review by managers and partners, or by the Board in the context of its inspections, would be difficult, if not impossible, without adequate documentation. Clear and comprehensive audit documentation is essential for auditors to enhance the quality of the audit and for the Board to fulfill its mandate to inspect registered public accounting firms "to assess the degree of compliance" of those firms with applicable standards and laws.

Appendices 1 and 2 to this release contain, respectively, the text of Auditing Standard No. 3, *Audit Documentation*, and the amendment to AU sec. 543. Appendix A to Auditing Standard No. 3 includes the Board's analysis of the comments received and the Board's responses.

## A. Introduction

Auditors document the evidence supporting the conclusions reached in their reports with a work product commonly referred to as *audit documentation* or *working papers*. Sufficient audit documentation is an integral part of a quality audit. That is, the auditor documents not only the nature, timing, and extent of the work performed, but also the professional judgments made by members of the engagement team and others.

In addition to providing the basis for the conclusions in the auditor's report, audit documentation facilitates the planning, performance, and supervision of the engagement and provides the basis for the review of the quality of the work by providing the reviewer with written documentation of the evidence supporting the auditor's significant conclusions.

First and foremost, the objectives of this audit documentation standard are to improve audit quality and to enhance public confidence in the quality of auditing and other engagements. Complete and thorough audit documentation improves the quality of the work performed in many ways. One important example is that quality audit documentation is a record of the actual work performed, which provides assurance that the auditor accomplished the planned objectives. Further, the need to document the procedures performed, the evidence obtained, and the conclusions reached demands a disciplined approach to planning and performing the engagement. Also, audit documentation facilitates the reviews performed by supervisors, managers, partners, and PCAOB inspectors.

Inadequate audit documentation diminishes audit quality on many levels. First, if audit documentation does not exist for a particular procedure or conclusion related to a significant matter, its absence casts doubt as to whether the necessary work was done. If the work was not documented, then it becomes difficult for members of the engagement team, and others, to know what was done, what conclusions were reached, and how those conclusions were reached.

The more significant differences between existing requirements under the interim auditing standards and this new standard on audit documentation, along with the related amendment, are described in the following sections.

## B. Auditors Must Document Their Work

As previously mentioned, the principal objective of this standard is to improve the quality of audits and other engagements. In so doing, this standard affirmatively requires that auditors document procedures performed, evidence obtained, and conclusions reached. Likewise, a deficiency in documentation is a departure from the Board's standard. The Board emphasizes that, in the event of a deficiency in documentation, the auditor must be prepared to present persuasive other evidence that the procedures were performed, evidence was obtained, and appropriate conclusions were reached.

If it is questionable whether audit procedures were performed or evidence was obtained, the auditor must determine, and if so demonstrate, that the necessary procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. There may be circumstances (for example, a Board inspection) in which the auditor may be required to demonstrate with persuasive other evidence that the procedures were actually performed, the evidence was actually obtained, and appropriate conclusions were actually reached. In this and similar contexts, oral explanation alone does not constitute persuasive other evidence. However, oral evidence may be used to clarify other written evidence.

The failure to prepare adequate documentation is serious. The severity of that failure depends on the factors that determine the nature and extent of the documentation for a particular audit area or auditing procedure. For example, when the risk of material misstatement associated with an assertion is high, the failure to document the procedures, evidence, and conclusions related to that assertion is a very serious violation of PCAOB Standards. Failure to provide adequate documentation could limit an auditor's ability to demonstrate that the work was actually performed.

## C. An Experienced Auditor Must Understand the Work

Audits and reviews of issuers' financial statements are now, under the Act, subject to review by PCAOB inspectors. Therefore, the Board determined that a documentation standard that enables a PCAOB inspector to understand the work that was performed is essential. Similar to the U.S. General Accounting Office's documentation standard for government and other audits conducted in accordance with generally accepted government auditing standards,<sup>2</sup> this standard requires audit documentation to contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the work that was performed, the name of the person(s) who performed it, the date it was completed, and the conclusions reached.

This standard also defines an *experienced auditor* as one who has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

---

<sup>2</sup> U.S. General Accounting Office, *Government Auditing Standards*, "Field Work Standards for Financial Audits" (2003 Revision), paragraph 4.22.

## D. Two Significant Dates Defined in This Standard

To ensure quality and consistency in the preparation and retention of audit documentation, the standard defines two important dates: (1) the report release date and (2) the documentation completion date. The *report release date* is the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. After the report release date, auditors will have 45 days to assemble a complete and final set of audit documentation. The end of this 45-day period is the *documentation completion date*.

Prior to the report release date, the auditor must have—

- Completed all necessary auditing procedures, including clearing review notes and providing support for all final conclusions, and
- Obtained sufficient evidence to support the representations in the auditor's report.

If the auditor obtains and documents evidence after the report release date, the auditor should refer to the interim auditing standards, AU sec. 390, *Consideration of Omitted Procedures After the Report Date* and AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* for related guidance. Auditors should not discard any previously existing documentation in connection with obtaining and documenting evidence after the report release date.

If procedures are performed subsequent to the report release date, auditors must identify and document any additions to audit documentation as a result of those procedures. This documentation must include the nature of the change, the date of the change, the name of the person who prepared the change, and the reason for the change. Furthermore, audit documentation must not be deleted or discarded after the documentation completion date.

## E. Subsequent Changes to Audit Documentation

This standard requires that changes to audit documentation after the documentation completion date be documented without deleting or discarding the original documents. Such documentation must indicate the date the information was added, who added it, and the reason for adding it. The SEC has articulated its position on working papers, as well as the importance of documenting any subsequent changes to the working papers.

Working papers prepared or collected by auditors in the course of an audit provide the single most important support for their representation regarding compliance with generally accepted auditing standards. They serve as the repository for the competent evidential matter necessary to afford the auditors with a reasonable basis for opining on an issuer's financial position. Transactions or events occurring long after the balance sheet date often require reference to prior working papers, and such working papers may have significant usefulness in future audits. It is therefore imperative that auditors preserve their working papers in a complete and unaltered form.

Auditors should be encouraged to devise orderly procedures for the proper control over the contents of working papers. Moreover, the Commission recognizes that the necessity for evidential matter to be included in the auditor's working papers varies substantially depending on individual audits. When any alterations or additions are made to the working papers subsequent to the issuance

of the auditor's report, however, such alterations or additions should themselves be properly documented and indicate the time and circumstances under which they are made.<sup>3</sup>

## F. Documentation Deficiencies

Documentation added to the working papers well after completion of the audit or other engagement is likely to be of a lesser quality than that produced contemporaneously when the procedures were performed. It is very difficult to reconstruct and recall specific activities related to gathering audit evidence months, and perhaps years, after the work was actually performed. The turnover of both firm and company staff can cause difficulty in reconstructing conversations, meetings, data, or other evidence. Also, with the passage of time memories fade. "Research has shown that minutes, hours or days after an experience, memory preserves a relatively detailed record, allowing us to reproduce the past with reasonable if not perfect accuracy. But with the passing of time, the particulars fade and opportunities multiply for interference—generated by later, similar experiences—to blur our recollections."<sup>4</sup>

The Board believes that audit evidence should be documented at the time the procedures are performed and that oral explanation should not be the primary source of evidence. Furthermore, any oral explanation should not contradict the documented evidence, and appropriate consideration should be given to the credibility of the individual providing the oral explanation.

## G. Multi-Location Audits

In this standard, the Board reminds auditors that the office of the accounting firm issuing the auditor's report is responsible for ensuring that all audit documentation sufficient to meet the requirements of this standard is prepared and retained. Audit documentation supporting the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms), must be retained by or be accessible to the office issuing the auditor's report. The Board believes this requirement will improve audit quality by enhancing the probability that *all* audit documentation will be prepared consistently with the same standards of audit quality.

In addition, the office issuing the auditor's report must obtain and review, prior to the report release date, certain documentation—outlined in this standard—related to the work performed by other auditors. Thus, the firm issuing an audit report on consolidated financial statements of a multinational company may not release that report without the specific documentation described in this standard.

## H. Part of Audit Performed by Others

In reporting on a company's consolidated financial statements, an auditor may use the work of other auditors who have audited one or more affiliates or divisions of the company. When more than one auditor is involved in an audit

---

<sup>3</sup> In the Matter of S.D. Leidesdorf & Co., Kenneth Larsen, Joseph Grendi (*Accounting Series Release No. 209, February 1977*).

<sup>4</sup> Dr. Daniel Schacter, "The Seven Sins of Memory: How the Mind Forgets and Remembers," *Psychology Today* (May 2001).

engagement, one of the firms typically serves as the principal auditor. The principal auditor then must decide whether to make reference in the auditor's report to the audit performed by the other auditor.

If the principal auditor decides to assume responsibility for the work of other auditors, then the principal auditor will not make reference to the work of other auditors in the audit report. However, if the principal auditor decides not to assume that responsibility, then the principal auditor should indicate clearly the division of responsibility between the principal auditor and other auditors in expressing an opinion on the consolidated financial statements. Existing guidance in AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, applies when using the work of other auditors. However, this existing guidance does not establish any specific documentation requirements.

In connection with PCAOB Auditing Standard No. 3, *Audit Documentation*, the Board adopted an amendment to paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, addressing appropriate audit documentation when a principal auditor decides not to make reference to the work of other auditors. In this amendment, the Board imposes the same unconditional responsibility on the principal auditor, as with multi-location audits, to obtain certain audit documentation from the other auditor prior to the report release date. In addition, the amendment provides that the principal auditor should consider performing one or more of the procedures described in the amendment, such as discussing the audit procedures and related results with the other auditors and reviewing the audit programs of the other auditors.

The Board believes this amendment will enable the principal auditor to gain considerably more assurance about the quality of the other auditor's work without creating an unreasonable burden.

## I. Retention of Audit Documentation

This standard requires that an auditor retain audit documentation for seven years after the report release date, which is the minimum period permitted under Section 103(a) of the Act.

As previously discussed, auditors will have 45 days after the report release date to assemble the complete and final set of audit documentation. If an auditor's report is not issued on a completed engagement, as is common in a review of interim financial information of a public company, then the audit documentation is to be retained for seven years from the date that fieldwork was substantially completed.

## J. Effective Date

On March 9, 2004, the Board issued PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. Since documentation issues are prevalent in PCAOB Auditing Standard No. 2 and the key objective of this standard is to improve the quality of audits and other engagements, the Board determined that the implementation date of this standard should coincide with that of PCAOB Auditing Standard No. 2. Therefore, this standard will be effective for audits of financial statements with respect to fiscal years ending on or after the later of November 15, 2004, or 30 days after the date of approval of this standard by the SEC.

The effective date for quarterly reviews and other engagements, conducted pursuant to the standards of the PCAOB, would occur beginning with the first

quarter ending after the first financial statement audit covered by this standard.

\* \* \* \* \*

On the 9th day of June, in the year 2004, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Auditing Standard No. 4

# Reporting on Whether a Previously Reported Material Weakness Continues to Exist

Source: Auditing Standard Nos. 8–15.

[Effective pursuant to SEC Release No. 34-53227; File No. PCAOB-2005-01, February 6, 2006; effective as of February 6, 2006.]

### Applicability of Standard

1. This standard establishes requirements and provides direction that apply when an auditor is engaged to report on whether a previously reported material weakness in internal control over financial reporting (hereinafter referred to as a material weakness) continues to exist as of a date specified by management.

*[The following note is effective November 15, 2007. See PCAOB Release 2007-005.]*

Note 1: In this context, previously reported material weakness means a material weakness that was described previously in an auditor's report issued pursuant to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

Note 2: The date specified by management as the date that the previously reported material weakness no longer exists must be a date after the date of management's most recent annual assessment.

2. *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

An auditor may conduct an engagement to report on whether a previously reported material weakness continues to exist if (1) the auditor has audited the company's financial statements and internal control over financial reporting in accordance with Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, as of the date of the company's most recent annual assessment of internal control over financial reporting, or (2) the auditor has been engaged to perform an audit of the financial statements and internal control over financial reporting in accordance with Auditing Standard No. 5 in the current year and has a sufficient basis for performing this engagement. (See paragraph 26 of this standard for additional requirements that apply specifically to a successor auditor's application of this standard.)

*[The following note is effective November 15, 2007. See PCAOB Release 2007-005.]*

Note: References in this standard to the company's most recent annual assessment of internal control over financial reporting apply to the company's most recent assessment of internal control over financial reporting overall, either as of the company's year-end or as of a more recent interim date, as audited by the auditor in accordance with Auditing Standard No. 5.

3. The auditor may report on more than one previously reported material weakness as part of a single engagement.

4. *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The engagement described by this standard is voluntary. The standards of the PCAOB do not require an auditor to undertake an engagement to report on whether a previously reported material weakness continues to exist. The auditor may audit the company's internal control over financial reporting in accordance with Auditing Standard No. 5 without ever performing an engagement in accordance with this standard.

## **Auditor's Objective in an Engagement to Report on Whether a Previously Reported Material Weakness Continues to Exist**

5. The auditor's objective in an engagement to report on whether a previously reported material weakness continues to exist is to obtain reasonable assurance about whether the previously reported material weakness exists as of a date specified by management and to express an opinion thereon. The auditor's opinion relates to the existence of a specifically identified material weakness as of a specified date and does not relate to the effectiveness of the company's internal control over financial reporting overall.

6. To obtain reasonable assurance, the auditor should obtain and evaluate evidence about whether specified controls were designed and operated effectively as of the date specified by management and whether those controls satisfy the company's stated control objective.

Note: Obtaining and evaluating evidence about whether the specified controls are designed effectively without also obtaining evidence about whether those controls operated effectively would not result in the auditor obtaining reasonable assurance for the purpose of expressing an opinion on whether a material weakness continues to exist.

## **Conditions for Engagement Performance**

7. The auditor may report on whether a previously reported material weakness continues to exist at a company only if all of the following conditions are met:

- a. Management accepts responsibility for the effectiveness of internal control over financial reporting;
- b. Management evaluates the effectiveness of the specific control(s) that it believes addresses the material weakness using the same control criteria that management used for its most recent annual assessment of internal control over financial reporting and management's stated control objective(s);
- c. Management asserts that the specific control(s) identified is effective in achieving the stated control objective;
- d. Management supports its assertion with sufficient evidence, including documentation; and
- e. Management presents a written report that will accompany the auditor's report that contains all the elements described in paragraph 48 of this standard.

8. If all the conditions in paragraph 7 of this standard are not met, the auditor is not permitted to complete the engagement to report on whether a previously reported material weakness continues to exist.

## Framework and Definitions for Evaluation

9. *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The terms *internal control over financial reporting*, *deficiency*, *significant deficiency*, and *material weakness* have the same meanings as the definitions of those terms in Appendix A, *Definitions*, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

10. *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

Paragraph 5 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states "[t]he auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting." For purposes of an engagement to report on whether a previously reported material weakness continues to exist, both management and the auditor must use both (1) the same control criteria used for the company's most recent annual assessment of internal control over financial reporting, and (2) the company's stated control objective(s) to evaluate whether a material weakness continues to exist.

*[The following note is effective November 15, 2007. See PCAOB Release 2007-005.]*

Note: The performance and reporting requirements in Auditing Standard No. 5 and in this standard are based on the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission's publication, *Internal Control—Integrated Framework*. Known as the COSO report, it provides a suitable and available framework for purposes of management's annual assessment of internal control over financial reporting. (More information about the COSO framework is included within the COSO report.)

11. *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The terms *relevant assertion* and *control objective* have the same meaning as the definitions of those terms in Appendix A, *Definitions*, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.<sup>[1]</sup>

12. Management establishes control objectives that are tailored to the individual company. The process of tailoring control objectives to the individual company allows the control criteria used for management's annual assessment to be applied to the facts and circumstances in a reasonable and appropriate manner. Although control objectives are used most frequently to evaluate the effectiveness of control activities, the other components of internal control over financial reporting (i.e., control environment, risk assessment, information and communication, and monitoring) also can be expressed in terms of control objectives.

---

<sup>[1]</sup> [This footnote is effective November 15, 2007. See PCAOB Release 2007-005.]

**13.** [The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]

In an audit of internal control over financial reporting, the auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements.<sup>2</sup>

**14.** Table 1 includes examples of control objectives and their related assertions:

**Table 1—Examples of Control Objectives and Related Assertions**

Control Objectives	Assertions
Recorded sales of product X initiated on the company's Web site are real	Existence or occurrence
Product X warranty losses that are probable and can be reasonably estimated are recorded as of the company's quarterly financial statement period-ends	Completeness
Interest rate swaps are recorded at fair value	Valuation or allocation
The company has legal title to recorded product X inventory in the company's Dallas, TX warehouse	Rights and obligations
Pending litigation that is reasonably possible to result in a material loss is disclosed in the quarterly and annual financial statements	Presentation and disclosure

**15.** If a material weakness has previously been reported, a necessary control objective (or objectives) has not been achieved.

**16.** A *stated control objective* in the context of an engagement to report on whether a material weakness continues to exist is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing.

**17.** Because the stated control objective, for purposes of this engagement, provides management and the auditor with a specific target against which to evaluate whether the material weakness continues to exist, management and the auditor must be satisfied that, if the stated control objective were achieved, the material weakness would no longer exist.

[The following note is effective November 15, 2007. See PCAOB Release 2007-005.]

Note: When a material weakness has a pervasive effect on the company's internal control over financial reporting, identifying the related control objectives that are not being achieved may be difficult because of the large number of

<sup>2</sup> [The following footnote is effective November 15, 2007. See PCAOB Release 2007-005.] See paragraph 42 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

control objectives affected. A material weakness related to an ineffective control environment would be an example of this circumstance. If management and the auditor have difficulty identifying *all* of the stated control objectives affected by a material weakness, the material weakness probably is not suitable for this engagement and should be addressed, instead, through the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 5.

## Performing an Engagement to Report on Whether a Previously Reported Material Weakness Continues to Exist

**18.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In an engagement to report on whether a previously reported material weakness continues to exist, the auditor must obtain sufficient appropriate evidence about the design and operating effectiveness of specified controls that provide reasonable assurance that the company's stated control objective is achieved in the context of the control criteria (e.g., COSO).

Note 1: An individual material weakness may be associated with a single stated control objective or with more than one stated control objective, depending on the nature of the material weakness and the manner in which the company tailors its stated control objectives to its business.

*[The following note is effective November 15, 2007. See PCAOB Release 2007-005.]*

Note 2: Depending on the nature of the company's business, its organization, its internal control over financial reporting, and the specific material weakness that is the subject of this engagement, the auditor may determine that he or she is not able to obtain a sufficient basis for reporting on whether a previously reported material weakness continues to exist without performing a complete audit of internal control over financial reporting in accordance with Auditing Standard No. 5.

## Applying the Standards of the PCAOB

**19.** The auditor must adhere to the standards of the PCAOB in performing an engagement to report on whether a previously reported material weakness continues to exist. Adherence to the standards involves:

- a. Planning the engagement,
- b. Obtaining an understanding of internal control over financial reporting,
- c. Testing and evaluating whether a material weakness continues to exist, including using the work of others, and
- d. Forming an opinion on whether a previously reported material weakness continues to exist.

**20.** Even though some requirements of this standard are set forth in a manner that suggests a sequential process, auditing whether a previously reported material weakness continues to exist involves a process of gathering, updating, and analyzing information. Accordingly, the auditor may perform some of the procedures and evaluations described in this section of the standard concurrently.

**21.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The engagement to report on whether a previously reported material weakness continues to exist must be performed by a person or persons having adequate technical training and proficiency as an auditor. In all matters related to the assignment, an independence in mental attitude must be maintained. Due professional care must be exercised in the performance of the engagement and the preparation of the report.

**22.** This standard establishes the fieldwork and reporting standards applicable to an engagement to report on whether a previously reported material weakness continues to exist.

**23.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The concept of materiality, as discussed in paragraph 20 of Auditing Standard No. 5, underlies the application of the general and fieldwork standards in an engagement to report on whether a previously reported material weakness continues to exist. The auditor should assess materiality as of the date that management asserts that the previously reported material weakness no longer exists.

## Planning the Engagement

**24.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The auditor should properly plan the engagement to report on whether a previously reported material weakness continues to exist and should properly supervise any assistants. When planning the engagement, the auditor should evaluate how the matters described in paragraph 9 of Auditing Standard No. 5 will affect the auditor's procedures.

## Obtaining an Understanding of Internal Control over Financial Reporting

**25.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

To perform this engagement, the auditor must have a sufficient knowledge of the company and its internal control over financial reporting. An auditor who has audited the company's internal control over financial reporting in accordance with Auditing Standard No. 5 as of the date of the company's most recent annual assessment of internal control over financial reporting would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform this engagement.

*[The following note is effective November 15, 2007. See PCAOB Release 2007-005.]*

Note: The second sentence of the paragraph above contemplates that the auditor's previous engagement under Auditing Standard No. 5 resulted in rendering an opinion. If an auditor previously engaged to perform an audit of internal control over financial reporting in accordance with Auditing Standard No. 5 has not yet rendered an opinion on the effectiveness of the company's internal control over financial reporting as of the company's most recent year-end or more recently, then that auditor should follow the requirements for a successor

auditor in paragraphs 26a-b and 27. Additionally, if an auditor has previously performed an audit of internal control over financial reporting at the company and is now a successor auditor (because another auditor has subsequently performed an audit of internal control over financial reporting at the company in intervening years), the auditor should follow the requirements in paragraphs 26 and 27 for a successor auditor.

**26.** When a successor auditor<sup>3</sup> performs an engagement to report on whether a previously reported material weakness continues to exist and he or she has not yet completed an audit of internal control over financial reporting at the company, he or she must perform procedures to obtain sufficient knowledge of the company's business and its internal control over financial reporting to achieve the objective of the engagement, as described in paragraph 5 of this standard. A successor auditor who has not yet completed an audit of internal control over financial reporting at the company must perform the following procedures as part of obtaining sufficient knowledge of the company's business and its internal control over financial reporting:

*[The following subparagraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

- a. Comply with paragraphs 22–27 of Auditing Standard No. 5 regarding obtaining an understanding of internal control over financial reporting. The extent of understanding of internal control over financial reporting needed to satisfy these requirements in the context of an engagement to report on whether a previously reported material weakness continues to exist depends on the nature of the material weakness on which the auditor is reporting. The more pervasive the effects of the material weakness, the more extensive the understanding of internal control over financial reporting should be under these requirements. For example, if the material weakness affects company-level controls, a more extensive understanding of internal control over financial reporting will be necessary than if the effects of the material weakness are isolated at the transaction level.

*[The following subparagraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

- b. Perform the procedures described in paragraphs 34–38 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for those transactions that are directly affected by controls specifically identified by management as addressing the material weakness.
- c. In addition to the communication requirements described in AU sec. 315, *Communications Between Predecessor and Successor Auditors*, the successor auditor should make specific inquiries of the predecessor auditor. These inquiries should address the basis for the predecessor auditor's determination that a material weakness existed in the company's internal control over financial reporting and the predecessor auditor's awareness of any information bearing on the company's ability to successfully address that material weakness.

---

<sup>3</sup> The term *successor auditor* has the same meaning as the definition of that term in paragraph .02 of AU sec. 315, *Communications Between Predecessor and Successor Auditors*.

**27.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

A successor auditor may determine that he or she needs to perform procedures in addition to those specified in paragraph 26 of this standard to obtain a sufficient knowledge of the company's business and its internal control over financial reporting. Depending on the nature of the company's business, its organization, its internal control over financial reporting, and the specific material weakness that is the subject of this engagement, a successor auditor may determine that he or she is not able to obtain a sufficient basis for reporting on whether a previously reported material weakness continues to exist without performing a complete audit of internal control over financial reporting in accordance with Auditing Standard No. 5.

### **Testing and Evaluating Whether a Material Weakness Continues to Exist**

**28.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The auditor must obtain an understanding of and evaluate management's evidence supporting its assertion that the specified controls related to the material weakness are designed and operated effectively, that these controls achieve the company's stated control objective(s) consistent with the control criteria, and that the identified material weakness no longer exists. If the auditor determines that management has not supported its assertion with sufficient evidence, the auditor cannot complete the engagement to report on whether a previously reported material weakness continues to exist, because one of the conditions for engagement completion described in paragraph 7 of this standard would not be met.

**29.** As a part of evaluating management's evidence supporting its assertion, the auditor should determine whether management has selected an appropriate date for its assertion. In making this determination, the auditor should take into consideration the following:

- a. Management's assertion that a previously reported material weakness no longer exists may be made as of any specified date that permits management to obtain sufficient evidence supporting its assertion.

Note: The auditor also should determine whether the specified date of management's assertion permits the auditor to obtain sufficient evidence supporting his or her opinion.

- b. Depending on the nature of the material weakness, the stated control objective, and the specified controls, the specified date of management's assertion may need to be after the completion of one or more period-end financial reporting processes.
- c. Controls that operate daily and on a continuous, or nearly continuous, basis generally permit the auditor to obtain sufficient evidence as to their operating effectiveness as of almost any date management might choose to specify in its report.
- d. Controls that operate over the company's period-end financial reporting process typically can be tested only in connection with a period-end.

**30.** The auditor should obtain evidence about the effectiveness of all controls specifically identified in management's assertion. The nature, timing, and extent of the testing that enables the auditor to obtain sufficient evidence supporting his or her opinion on whether a previously reported material weakness continues to exist will depend on both the nature of the controls specifically identified by management as meeting the company's stated control objectives and the date of management's assertion.

**31.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

All controls that are necessary to achieve the stated control objective(s) should, therefore, be specifically identified and evaluated. The specified controls will necessarily include controls that have been modified or newly implemented and also may include existing controls that previously were deemed effective during management's most recent annual assessment of internal control over financial reporting. As part of testing and evaluating the design effectiveness of the specified controls, the auditor should determine whether the specified controls would meet the stated control objective(s) if they operated as designed. In making this evaluation, the auditor should apply paragraphs 42–43 of Auditing Standard No. 5.

**32.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

Consistent with the direction in paragraphs 44–45 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the auditor should test the operating effectiveness of a specified control by determining whether the specified control operated as designed and whether the person performing the control possesses the necessary authority and qualifications to perform the control effectively. In determining the nature, timing, and extent of tests of controls, the auditor should apply paragraphs 50–54 of Auditing Standard No. 5.

**33.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The auditor should perform tests of the specified controls over a period of time that is adequate to determine whether, as of the date specified in management's assertion, the controls necessary for achieving the stated control objective are operating effectively. The timing of the auditor's tests should vary with the risk associated with the control being tested. For example, a transaction-based, daily reconciliation generally would permit the auditor to obtain sufficient evidence as to its operating effectiveness in a shorter period of time than a pervasive, entity-level control, such as any of those described in paragraphs 22–24 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. Additionally, the auditor typically will be able to obtain sufficient evidence as to the operating effectiveness of controls over the company's period-end financial reporting process only by testing those controls in connection with a period-end.

**34.** The auditor should determine whether, based on the nature of the material weakness, performing substantive procedures to support recorded financial statement amounts or disclosures affected by the specifically identified controls is necessary to obtain sufficient evidence regarding the operating effectiveness of those controls. For example, a material weakness in the company's controls over the calculation of its bad debt reserve ordinarily would require that the auditor also perform substantive procedures to obtain sufficient evidence supporting an opinion about whether the material weakness continues to exist as of a specified date. In this circumstance, in addition to testing the design

and operating effectiveness of the controls specifically identified as achieving the company's stated control objective that its bad debt reserve is reasonably estimated and recorded, the auditor ordinarily would need to perform substantive procedures to determine that, as of that same specified date, the company's bad debt reserve was fairly stated in relation to the company's financial statements taken as a whole.

**35.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

When the specified controls, stated control objectives, and material weakness affect multiple locations or business units of the company, the auditor may apply the relevant concepts in paragraphs B10–B16 of Appendix B of Auditing Standard No. 5 to determine the locations or business units at which to perform procedures.

## Using the Work of Others

**36.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The auditor should evaluate whether to use the work performed by others in an engagement to report on whether a previously reported material weakness continues to exist. To determine the extent to which the auditor may use the work of others to alter the nature, timing, or extent of the work the auditor otherwise would have performed, the auditor should apply paragraphs 16–19 of Auditing Standard No. 5.

**37.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The auditor's opinion relates to whether a material weakness no longer exists at the company because the stated control objective(s) is met. Therefore, if the auditor has been engaged to report on more than one material weakness or on more than one stated control objective, the auditor must evaluate whether he or she has obtained sufficient evidence that the control objectives related to each of the material weaknesses identified in management's assertion are achieved. The auditor may, however, use the work of others to alter the nature, timing, or extent of the work he or she otherwise would have performed. For these purposes, the work of others includes relevant work performed by internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee that provide information about the effectiveness of internal control over financial reporting.

**38.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

Paragraphs 18–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, should be applied in the context of the engagement to report on whether a previously reported material weakness continues to exist. There may, therefore, be some circumstances in which the scope of the audit procedures to be performed in this engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. Additionally, the auditor should perform any walkthroughs himself or herself because of the degree of judgment required in performing this work.

**39.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

The following example illustrates how to apply this section on using the work of others to this engagement.

In this example, the company's previously reported material weakness relates to the company's failure to perform bank reconciliations at its 50 subsidiaries. The specified controls identified by the company are the timely preparation of complete and accurate reconciliations between the company's recorded cash balances and the company's cash balances as reported by its financial institution.

Although certain controls over bank reconciliations are centralized, the performance of the bank reconciliations themselves is not centralized because they occur at each individual operating unit. Further, each operating unit has, on average, three separate cash accounts. The cash accounts affected are not material individually but are material in the aggregate. Most of the controls over the preparation of bank reconciliations involve a low degree of judgment in evaluating their operating effectiveness, can be subjected to objective testing, and have a low potential for management override.

If these conditions describe the specified controls over the preparation of bank reconciliations, the auditor could determine that, based on the nature of the controls as described above, he or she could use the work of others to a moderate extent, provided that the degree of competence and objectivity of the individuals performing the tests is high. The auditor might perform tests of controls that are centralized at the holding company level himself or herself; perform testing at a limited number of locations himself or herself; test the work of others performed at a limited number of other locations; review the results of the work of others at all other locations tested; and determine that, qualitatively and quantitatively, principal evidence had been obtained.

On the other hand, if the company's previously reported material weakness related to the company's failure to perform a reconciliation of its only cash account, few controls and few operations of those controls would underlie management's assertion that the material weakness no longer exists. In this circumstance, it is unlikely that the auditor would be able to use a significant amount of the work of others because of the limited scope of the total amount of work needed to test management's assertion and due to the requirement that the auditor obtain the principal evidence himself or herself.

## Opinions, Based in Part, on the Work of Another Auditor

40. The auditor may apply the relevant concepts in AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, in an engagement to report on whether a previously reported material weakness continues to exist, with the following exception. If the auditor decides to serve as the principal auditor and to use the work and reports of another auditor as a basis, in part, for his or her opinion, the principal auditor must not divide responsibility for the engagement with the other auditor. Therefore, the principal auditor must not make reference to the other auditor in his or her report.

## Forming an Opinion on Whether a Previously Reported Material Weakness Continues to Exist

41. When forming an opinion on whether a previously reported material weakness continues to exist, the auditor should evaluate all evidence obtained from all sources. This process should include an evaluation of the sufficiency of the evidence obtained by management and the results of the auditor's evaluation of the design and operating effectiveness of the specified controls.

**42.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

Management may conclude that a previously reported material weakness no longer exists because its severity has been sufficiently reduced such that it is no longer a material weakness.

**43.** The auditor may issue an opinion on whether a previously reported material weakness continues to exist only when there have been no restrictions on the scope of the auditor's work. Because of the scope of an engagement to report on whether a previously reported material weakness continues to exist, any limitations on the scope of the auditor's work require the auditor either to disclaim an opinion or to withdraw from the engagement. A qualified opinion is not permitted.

Note: As described in paragraph 51 of this standard, the auditor's opinion on whether a previously reported material weakness continues to exist may be expressed as "the material weakness exists" or "the material weakness no longer exists." Therefore, the provisions of this standard do not distinguish between an unqualified opinion and an adverse opinion and, instead, refer simply to "an opinion" or "the auditor's opinion."

## Requirement for Written Representations

**44.** In an engagement to report on whether a previously reported material weakness continues to exist, the auditor should obtain written representations from management:

- a. Acknowledging management's responsibility for establishing and maintaining effective internal control over financial reporting;
- b. Stating that management has evaluated the effectiveness of the specified controls using the specified control criteria and management's stated control objective(s);
- c. Stating management's assertion that the specified controls are effective in achieving the stated control objective(s) as of a specified date;
- d. Stating management's assertion that the identified material weakness no longer exists as of the same specified date;
- e. Stating that management believes that its assertions are supported by sufficient evidence;

*[The following subparagraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

- f. Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a misstatement in the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting and that has occurred or come to management's attention since the date of management's most recent annual assessment of internal control over financial reporting; and
- g. Stating whether there were, subsequent to the date being reported on, any changes in internal control over financial reporting

or other factors that might significantly affect the stated control objective(s) or indicate that the identified controls were not operating effectively as of, or subsequent to, the date specified in management's assertion.

45. The written representations should be signed by those members of management with overall responsibility for the company's internal control over financial reporting whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management ordinarily include the chief executive officer and chief financial officer or others with equivalent positions in the company.

46. The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the engagement. As discussed further in paragraph 43 of this standard, if there is a limitation on the scope of an engagement to report on whether a previously reported material weakness continues to exist, the auditor must either disclaim an opinion or withdraw from the engagement. Further, the auditor should evaluate the effects of management's refusal on his or her ability to rely on other representations of management, including, if applicable, representations obtained in an audit of the company's financial statements.

## Documentation Requirements

47. The documentation requirements in Auditing Standard No. 3, *Audit Documentation*, are modified in the following respect as they apply to this engagement. Paragraph 14 of Auditing Standard No. 3 defines the *report release date* as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. As described in paragraph 29 of this standard, management's assertion that a material weakness no longer exists may be made as of a date other than a period-end financial reporting date. Therefore, the auditor's release of a report on whether a previously reported material weakness continues to exist may not necessarily be associated with the issuance of financial statements of the company. Accordingly, in an engagement to report on whether a previously reported material weakness continues to exist, the report release date for purposes of applying Auditing Standard No. 3 is the date the auditor grants permission to use the auditor's report on whether a previously reported material weakness continues to exist.

## Reporting on Whether a Previously Reported Material Weakness Continues to Exist

### Management's Report

48. As a condition for the auditor's performance of this voluntary engagement, management is required to present a written report that will accompany the auditor's report, as described in paragraph 7e of this standard. To satisfy this condition for the auditor's performance of this engagement, management's report should include:

- a. A statement of management's responsibility for establishing and maintaining effective internal control over financial reporting for the company;

- b. A statement identifying the control criteria used by management to conduct the required annual assessment of the effectiveness of the company's internal control over financial reporting;
- c. An identification of the material weakness that was identified as part of management's annual assessment;  
 Note: This report element should be modified in the case in which management's annual assessment did not identify the material weakness, but, rather, only the auditor's report on management's annual assessment identified the material weakness.
- d. An identification of the control objective(s) addressed by the specified controls and a statement that the specified controls achieve the stated control objective(s) as of a specified date; and
- e. A statement that the identified material weakness no longer exists as of the same specified date because the specified controls address the material weakness.

### Auditor's Evaluation of Management's Report

49. With respect to management's report, the auditor should evaluate the following matters:

- a. Whether management has properly stated its responsibility for establishing and maintaining effective internal control over financial reporting;
- b. Whether the control criteria used by management to conduct the evaluation is suitable;
- c. Whether the material weakness, stated control objectives, and specified controls have been properly described; and
- d. Whether management's assertions, as of the date specified in management's report, are free of material misstatement.

50. If, based on the results of this evaluation, the auditor determines that management's report does not include the elements described in paragraph 48 of this standard, the conditions for engagement performance have not been met.

### Auditor's Report

51. The auditor's report on whether a previously reported material weakness continues to exist must include the following elements:

- a. A title that includes the word *independent*;

*[The following subparagraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

- b. A statement that the auditor has previously audited and reported on management's annual assessment of internal control over financial reporting as of a specified date based on the control criteria, as well as a statement that the auditor's report identified a material weakness;

Note: This report element should be modified in cases in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 5. In this circumstance, the auditor's report should refer to the predecessor auditor's report on management's annual assessment and the predecessor auditor's identification of the material weakness.

- c. A description of the material weakness;
- d. An identification of management's assertion that the identified material weakness in internal control over financial reporting no longer exists;
- e. An identification of the management report that includes management's assertion, such as identifying the title of the report (if the report is titled);
- f. A statement that management is responsible for its assertion;
- g. An identification of the specific controls that management asserts address the material weakness;  
Note: As discussed further in paragraph 31, all controls that are necessary to achieve the stated control objective should be identified.
- h. An identification of the company's stated control objective that is achieved by these controls;
- i. A statement that the auditor's responsibility is to express an opinion on whether the material weakness continues to exist as of the date of management's assertion based on his or her auditing procedures;
- j. A statement that the engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);
- k. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company;

*[The following subparagraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

- l. A statement that the engagement includes examining evidence supporting management's assertion and performing such other procedures the auditor considered necessary in the circumstances and that the auditor obtained an understanding of internal control over financial reporting as part of his or her previous audit of management's annual assessment of internal control over financial reporting and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness;  
Note: This report element should be modified in cases in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 5. In this circumstance, the auditor's report should include a statement that the engagement includes obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as the auditor considered necessary in the circumstances.
- m. A statement that the auditor believes the auditing procedures provide a reasonable basis for his or her opinion;

- n. The auditor's opinion on whether the identified material weakness exists (or no longer exists) as of the date of management's assertion;

*[The following subparagraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

- o. A paragraph that includes the following statements:
- That the auditor was not engaged to and did not conduct an audit of internal control over financial reporting as of the date of management's assertion, the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting, and that the auditor does not express such an opinion, and
  - That the auditor has not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after the date of management's annual assessment of the company's internal control over financial reporting, other than the controls specifically identified in the auditor's report, and that the auditor does not express an opinion that any other controls operated effectively after the date of management's annual assessment of the company's internal control over financial reporting.

Note: This report element statement should be modified in the case in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 5 to read as follows: That the auditor has not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company other than the controls specifically identified in the auditor's report and that the auditor does not express an opinion that any other controls operated effectively.

- p. A paragraph stating that, because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;
- q. The manual or printed signature of the auditor's firm;
- r. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and
- s. The date of the auditor's report.

**52.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

Example A-1 in Appendix A is an illustrative auditor's report for an opinion that a material weakness no longer exists, expressed by an auditor who has previously reported on the company's internal control over financial reporting in accordance with Auditing Standard No. 5 as of the company's most recent year-end (herein after referred to as a continuing auditor). Example A-2 in

Appendix A is an illustrative auditor's report for an opinion that a material weakness no longer exists expressed by a successor auditor.

**53.** As stated in paragraph 3 of this standard, the auditor may report on more than one previously reported material weakness as part of the same engagement. In this circumstance, the auditor should modify the report elements described in paragraph 51 of this standard accordingly.

**54. Report modifications.** The auditor should modify the standard report if any of the following conditions exist.

- a. Other material weaknesses that were reported previously by the company as part of the company's annual assessment of internal control are not addressed by the auditor's opinion. (See paragraph 56 of this standard.)
- b. A significant subsequent event has occurred since the date being reported on. (See paragraphs 57 and 58 of this standard.)
- c. Management's report on whether a material weakness continues to exist includes additional information. (See paragraphs 59 through 60 of this standard.)

**55.** As described further in paragraph 43 of this standard, the form of the auditor's report resulting from an engagement to report on whether a previously reported material weakness continues to exist may be an opinion on whether a material weakness continues to exist, or it may be in the form of a disclaimer of opinion. A qualified opinion is not permitted. Any limitations on the scope of the auditor's work preclude the expression of an opinion. In addition to these reporting alternatives, an auditor may elect not to report on whether a material weakness continues to exist and, instead, withdraw from the engagement.

**56. Other material weaknesses reported previously by the company as part of the company's annual assessment of internal control are not addressed by the auditor's opinion.** In the circumstance in which the company previously has reported more than one material weakness, the auditor may be engaged to report on whether any or all of the material weaknesses continue to exist. If the auditor reports on fewer than all of the previously reported material weaknesses, the auditor should include the following or similar language in the paragraph that states that the auditor was not engaged to perform an audit of internal control over financial reporting. When referring to his or her previously issued report on management's annual assessment, the auditor should either attach that report or include information about where it can be publicly obtained.

Our report on management's annual assessment of XYZ Company's internal control over financial reporting, dated [date of report], [attached or identify location of where the report is publicly available] identified additional material weaknesses other than the one identified in this report. We are not reporting on those other material weaknesses and, accordingly, express no opinion regarding whether those material weaknesses continue to exist after [date of management's annual assessment, e.g., December 31, 200X]. [Revise this wording and references or attachments appropriately for use in a successor auditor's report.]

Example A-3 in Appendix A is an illustrative report issued by a continuing auditor reporting on only one material weakness when additional material weaknesses previously were reported.

**57. Subsequent events.** A change in internal control over financial reporting or other factors that might significantly affect the effectiveness of the identified controls or the achievement of the company's stated control objective might occur subsequent to the date of management's assertion but before the date of the

auditor's report. Therefore, the auditor should inquire of management whether there was any such change or factors. As described in paragraph 44 of this standard, the auditor should obtain written representations from management regarding such matters. Additionally, to obtain information about whether such a change has occurred that might affect the effectiveness of the identified controls or the achievement of the company's stated control objective and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following:

- Internal audit reports (or similar functions, such as loan review in a financial institution) relevant to the stated control objective or identified controls issued during the subsequent period;
- Independent auditor reports (if other than the auditor's) of significant deficiencies or material weaknesses relevant to the stated control objective or identified controls;
- Regulatory agency reports on the company's internal control over financial reporting relevant to the stated control objective or identified controls; and
- Information about the effectiveness of the company's internal control over financial reporting relevant to the stated control objective or identified controls obtained as a result of other engagements.

**58.** If the auditor obtains knowledge about subsequent events that he or she believes adversely affect the effectiveness of the identified controls or the achievement of the stated control objective as of the date specified in management's assertion, the auditor should follow the requirements in paragraph 61 regarding special considerations when a material weakness continues to exist. If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the identified controls or the achievement of the stated control objective, the auditor should disclaim an opinion.

**59.** *Management's report includes additional information.* If management's report includes information in addition to the matters described in paragraph 48 of this standard, the auditor should disclaim an opinion on the additional information. For example, the auditor should use the following or similar language as the last paragraph of the report to disclaim an opinion on management's plans to implement new controls:

We do not express an opinion or any other form of assurance on management's statement referring to its plans to implement new controls by the end of the year.

**60.** If the auditor believes that management's additional information contains a material misstatement of fact, he or she should discuss the matter with management. If, after discussing the matter with management, the auditor concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee, in writing, of the auditor's views concerning the information.

*Note:* If management makes the types of disclosures described in paragraph 59 outside its report on whether a previously reported material weakness continues to exist and includes them elsewhere within a document that contains management's and the auditor's reports on whether a previously reported material weakness continues to exist, the auditor would not need to disclaim an opinion, as described in paragraph 59. However, in that situation, the auditor's responsibilities are the same as those described in this paragraph if the auditor believes that the additional information contains a material misstatement of fact.

## Special Considerations When a Previously Reported Material Weakness Continues to Exist

**61.** If the auditor determines that the previously reported material weakness continues to exist and the auditor reports on the results of the engagement, he or she must express an opinion that the material weakness exists as of the date specified by management.

**62.** As described in paragraph 55, the auditor is not required to issue a report as a result of this engagement. If the auditor does not issue a report in this circumstance, he or she must communicate, in writing, his or her conclusion that the material weakness continues to exist to the audit committee. Similarly, if the auditor identifies a material weakness during this engagement that has not been previously communicated to the audit committee in writing, the auditor must communicate that material weakness, in writing, to the audit committee.

**63.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

Additionally, whenever the auditor concludes that a previously reported material weakness continues to exist, the auditor must consider that conclusion as part of his or her evaluation of management's quarterly disclosures about internal control over financial reporting, as required by paragraphs .07 and .29–.32 of AU section 722, *Interim Financial Information*.

**64.** *[The following paragraph is effective November 15, 2007. See PCAOB Release 2007-005.]*

For example, if the auditor were engaged to report on whether two separate material weaknesses continue to exist and concluded that one no longer exists and one continues to exist, the auditor's report could comprise either of the following: (1) a report that contained two opinions, one on the material weakness that the auditor concluded no longer exists and one opinion on the material weakness that the auditor concluded continues to exist, or (2) a report that contained only a single opinion on the material weakness that the auditor concluded no longer exists if the company modifies its assertion to address only the material weakness that the auditor concluded no longer exists. In the second circumstance, the auditor must communicate, in writing, his or her conclusion that a material weakness continues to exist to the audit committee and also should apply paragraph 56 of this standard regarding other material weaknesses reported previously that are not addressed by the auditor's opinion. Additionally, the auditor must consider that conclusion as part of his or her evaluation of management's quarterly disclosures about internal control over financial reporting, as required by paragraphs .07 and .29–.32 of AU section 722, *Interim Financial Information*.

### Effective Date

**65.** This standard is effective February 6, 2006.

## Appendix A

### Illustrative Reports on Whether a Previously Reported Material Weakness Continues to Exist

Paragraphs 51 through 60 of this standard provide direction on the auditor's report on whether a previously reported material weakness continues to exist. The following examples illustrate the application of those paragraphs.

**Example A-1—*Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion that a Previously Reported Material Weakness No Longer Exists***

**Example A-2—*Illustrative Auditor's Report for a Successor Auditor Expressing an Opinion that a Previously Reported Material Weakness No Longer Exists***

**Example A-3—*Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion on Only One Previously Reported Material Weakness When Additional Material Weaknesses Previously Were Reported***

**Example A-1****Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists**Report of Independent Registered Public Accounting Firm

We have previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. Our report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [*title of management's report*], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included examining evidence supporting management's assertion and performing such other procedures as we considered necessary in the circumstances. We obtained an understanding of the company's internal control over financial reporting as part of our previous audit of management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness described above. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after

December 31, 200X, other than the control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively after December 31, 200X.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

*[Signature]*

*[City and State or Country]*

*[Date]*

**Example A-2****Illustrative Auditor's Report for a Successor Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists**Report of Independent Registered Public Accounting Firm

We were engaged to report on whether a previously reported material weakness continues to exist at XYZ Company as of [date of management's assertion] and to audit management's next annual assessment of XYZ Company's internal control over financial reporting. Another auditor previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."]. The other auditor's report, dated [date of report], identified the following material weakness in the Company's internal control over financial reporting:

[Describe material weakness]

We have audited management's assertion, included in the accompanying [title of management's report], that the material weakness in internal control over financial reporting identified above no longer exists as of [date of management's assertion] because the following control(s) addresses the material weakness:

[Describe control(s)]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [identify control criteria used for management's annual assessment of internal control over financial reporting]: [state control objective addressed]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [date of management's assertion]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [date of management's assertion] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as we considered necessary in the circumstances. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [date of management's assertion].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [date of management's assertion], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company other than the

control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

**Example A-3*****Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion on Only One Previously Reported Material Weakness When Additional Material Weaknesses Previously Were Reported***Report of Independent Registered Public Accounting Firm

We have previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. Our report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [*title of management's report*], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included examining evidence supporting management's assertion and performing such other procedures as we considered necessary in the circumstances. We obtained an understanding of the company's internal control over financial reporting as part of our previous audit of management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness described above. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date

after December 31, 200X, other than the control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively after December 31, 200X. Our report on management's annual assessment of XYZ Company's internal control over financial reporting, dated [date of report], [attached or identify location of where the report is publicly available] identified additional material weaknesses other than the one identified in this report. We are not reporting on those other material weaknesses and, accordingly, express no opinion regarding whether those material weaknesses continue to exist after [date of management's annual assessment, e.g., December 31, 200X].

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

## Appendix B

### Background and Basis for Conclusions

#### *Introduction*

B1. This appendix summarizes factors that the Public Company Accounting Oversight Board (the "Board") deemed significant in reaching the conclusions in the standard. This appendix includes reasons for accepting certain views and not accepting others.

#### *Background*

B2. Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") requires the management of public companies each year to file an assessment of the effectiveness of their companies' internal control over financial reporting. The company's independent auditor must attest to, and report on, management's assessment. Under the Securities and Exchange Commission's (the "SEC" or "Commission") implementing rules, company management may not conclude that internal control over financial reporting is effective if one or more material weaknesses exists.

B3. When a company reports a material weakness, investors may be left uncertain about the reliability of the company's financial reporting. Both companies and report users have recognized the importance of a mechanism for alerting investors that a previously disclosed material weakness no longer exists.<sup>1</sup> The federal securities laws provide part of that mechanism. Those laws require the company to disclose to investors any changes in internal control over financial reporting that occurred during the company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.<sup>2</sup> Therefore, investors will learn of material improvements, such as the remediation of a material weakness, on a timely basis through quarterly disclosures.<sup>3</sup>

B4. When a company determines that a material weakness has been remediated, it may determine that disclosure is sufficient. Some investors and companies, however, have called for the ability to bolster confidence in management's assertions about those internal control improvements with the added assurance of the company's independent auditor.<sup>4</sup>

B5. The Board reviewed its existing auditing and attestation standards to determine whether adequate standards governing such an engagement already existed. The Board's interim attestation standards provide requirements for general attest engagements; however, the Board determined that these standards

---

<sup>1</sup> The Board's Standing Advisory Group ("SAG") discussed possible auditor involvement with the elimination of a material weakness at its November 18, 2004, public meeting. The webcast of the November 18, 2004 SAG discussion and the related briefing paper on this topic, "Reporting on the Correction of a Material Weakness," are available on the Board's Web site at [www.pcaobus.org](http://www.pcaobus.org).

<sup>2</sup> See Item 308(c) of Regulation S-K, 17 C.F.R. §229.308(c).

<sup>3</sup> In addition, even if internal control over financial reporting is effective as of the end of a company's fiscal year, investors also could potentially learn if it deteriorates materially during the year through these quarterly disclosures.

<sup>4</sup> The Standing Advisory Group's November 18, 2004 discussion included this type of encouragement.

lack sufficient specificity for this purpose.<sup>5</sup> The Board, therefore, proposed an auditing standard that would be tailored narrowly to an engagement to report on whether a previously reported material weakness continues to exist.

B6. The Board received 30 comment letters on its proposal, primarily from auditor and investor groups as well as from two issuers. Those comments led to changes in the standard, intended to make the requirements of the standard clearer and more operational. This appendix summarizes significant views expressed in those comment letters and the Board's responses.

### ***Voluntary Nature of Engagement***

B7. The proposed standard explicitly stated that the engagement described by this standard is voluntary and that the standards of the PCAOB did not require an auditor to undertake this engagement when a material weakness was previously reported. In addition, the Board stressed the voluntary nature of this engagement at the public meeting proposing this standard.

B8. The value and importance of the Board's standards providing the option of this type of auditor reporting on a material weakness was confirmed unanimously in the comment letters from investors and investor-related parties. Auditors were also supportive of the standard overall and its voluntary nature. Both of the issuers who commented indicated that they would be concerned if issuers become compelled to obtain such opinions. One of these commenters stressed that the disclosure requirements of management, coupled with enhanced criminal penalties, should provide investors with information regarding the continued existence or correction of a material weakness.

B9. The Board continues to believe that providing for this type of auditor reporting in its standards will serve the public interest. At the same time, the Board reaffirms that reporting on whether a material weakness continues to exist is a voluntary engagement and is not required by the standards of the PCAOB.

### ***Form of the Auditor's Opinion***

B10. The proposed standard called for the auditor to express a single opinion directly on the subject matter (*i.e.*, the material weakness itself), rather than on management's assertion, as follows:

In our opinion, XYZ Company has eliminated the material weakness described above as of [*date of management's assertion*] because the stated control objective is met as of [*date of management's assertion*].

B11. Primarily auditors commented on the form of the opinion in the proposed standard and their comments reflected a wide spectrum of ideas. Some commenters expressed support for the auditor's report, including the form of the

---

<sup>5</sup> See AT sec. 101, "Attest Engagement" of the Board's interim standards. Effective April 16, 2003, the PCAOB adopted, on an initial, transitional basis, five temporary interim standards rules (PCAOB Rules 3200T, 3300T, 3400T, 3500T, and 3600T) that refer to pre-existing professional standards of auditing, attestation, quality control, ethics, and independence (the "interim standards"). These rules were approved by the SEC on April 25, 2003. See SEC Release No. 33-8222. On December 17, 2003, the Board approved technical amendments to the interim standards rules indicating that, "when the Board adopts a new auditing and related professional practice standard that addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standards will be superseded or effectively amended. Accordingly, the Board approved adding the phrase 'to the extent not superseded or amended by the Board' to each of the interim standards rules." *Technical Amendments to Interim Standards Rules*, PCAOB Release No. 2003-26 (Dec. 17, 2003); Exchange Act Release No. 49624 (Apr. 28, 2004) (SEC Approval). The interim standards are available on the Board's Web site at [www.pcaobus.org](http://www.pcaobus.org).

opinion as proposed. Other comments included a suggestion for two opinions, consistent with Auditing Standard No. 2—one on the subject matter (the elimination of the material weakness) and one on management's assertion. Other commenters suggested that just one opinion was sufficient, though these commenters were split regarding whether the one opinion should be on management's assertion or on the subject matter. Other commenters suggested that an opinion stating that the material weakness had been eliminated, without the phrase "because the stated control objective is met" would be a better alternative, while others asked the Board to consider an opinion stating that the identified controls were effective because the stated control objective was met, without stating that the material weakness had been eliminated.

B12. A number of commenters expressed concern with the phrasing "the material weakness has been eliminated," including the use of that phrase in the auditor's opinion and in the title of the proposed standard. These commenters believed that terminology such as "elimination" or "eliminated" might be too definite a term that might mislead report users into believing that there were no remaining deficiencies in the internal control over financial reporting in the area related to the specified material weakness, even though control deficiencies of a lesser severity than a material weakness might persist.

B13. After considering these suggestions, the Board decided to retain a single opinion on the subject matter and to revise the opinion wording. The Board continues to believe that a single opinion expressed directly on the subject matter is the simplest and clearest form of communication related to this engagement. Further, the Board believes that an auditor's opinion directly on the subject matter (*i.e.*, the material weakness itself) will best achieve the overarching objective of this engagement—to clearly communicate as of an interim date auditor assurance about whether a previously reported material weakness continues to exist.

B14. The Board agreed with commenters that use of the term "elimination" might increase the risk that a report user would misunderstand the assurance provided by an auditor's opinion on a previously reported material weakness. As a result, the Board changed the form of the opinion to "In our opinion, the material weakness described above no longer exists as of [date of management's assertion]" and the title of the standard to "Reporting on Whether a Previously Reported Material Weakness Continues to Exist." The text of the standard was modified throughout to delete references to "eliminated" or "elimination" and to reflect wording consistent with the revised opinion and title.

### ***As-of Date of Report***

B15. The proposed standard provided for significant flexibility by allowing the engagement to be undertaken at any time during the year, limited only by implications associated with the nature of the material weakness. In other words, the proposed standard did not require the engagement to be performed in conjunction with an audit or review of financial statements. Instead, the proposed standard required the auditor to determine whether management had selected an appropriate date for its assertion and specified several matters for the auditor to consider in making this determination.

B16. A number of auditors suggested that the engagement described by the proposed standard should be performed only as of quarterly financial reporting dates instead of as of any date during the year. These commenters believed that such a requirement would allow the auditor to integrate this work with the auditor's interim review procedures under AU sec. 722, *Interim Financial Information*, and provide a link between the auditor's report on the material

weakness and management's quarterly disclosures of material changes in internal control. Commenters noted that many of the material weaknesses that have been disclosed to date are related to the period-end financial reporting process and that the auditor would therefore need to test controls in connection with a period-end to determine whether the material weakness continues to exist. Several commenters linked their suggestion that this engagement be performed only as of a quarterly financial reporting date to the view that the standard's direction on performing substantive procedures as part of this engagement should be bolstered (see separate discussion on performance of substantive procedures beginning at paragraph B51). One commenter pointed out, however, that if this engagement could be conducted only in connection with a quarterly financial reporting date, special guidance for applying the standard to foreign filers would be necessary because foreign filers are not required to report quarterly in the same manner as domestic filers.

B17. The Board believes that the flexibility provided in the proposed standard regarding the timing of the engagement is an important and appropriate feature of the standard. Although the Board agrees with commenters' observations that many of the material weaknesses disclosed during the past year were related to the period-end financial reporting process, the Board determined that the existing provisions of the proposed standard address this circumstance. In determining whether management has selected an appropriate date for its assessment, the standard requires the auditor to consider that controls that operate over the company's period-end financial reporting process typically can be tested only in connection with a period-end.

B18. Moreover, some material weaknesses—such as those that involve transaction-based controls that operate daily—are well suited for a management assertion and an auditor opinion that the material weakness no longer exists as of almost any date. Restricting an auditor's reporting on whether a material weakness continues to exist to only quarterly financial reporting dates could impose unnecessary delay on a company seeking auditor assurance that this type of material weakness no longer exists. For example, assume that a calendar year-end company had previously disclosed a material weakness that was the type that would lend itself well to reporting that it no longer existed as of any date. Further, management could not yet assert that the material weakness no longer existed as of March 31, but believed that it could make the assertion as of a date in April. If the standard restricted auditor reporting to a quarterly financial reporting date, the auditor would have to wait until June 30 to be able to attest to whether the material weakness continued to exist (and, presumably, would not be able to issue his or her report until July, at the earliest). While management could, in this example, provide timely disclosure to investors that the material weakness no longer existed, the Board concluded that structuring the provisions of the standard to potentially result in this kind of delay in auditor assurance would not serve the public interest.

B19. In light of these considerations, the Board decided to retain the provisions of the proposed standard that would permit the auditor to report on whether a previously reported material weakness continues to exist as of any date.

B20. At least one auditor asked for clarification about whether a report issued pursuant to Auditing Standard No. 2 that identified a material weakness could be issued at the same time as a report pursuant to this standard indicating that the material weakness no longer exists as of a later date. The degree of flexibility regarding the timing of this engagement would permit the company (depending on the company's ability to assert that a material weakness no longer exists and the auditor's ability to timely audit that assertion) to simultaneously distribute its annual reports and the management assertion and auditor report

described in this standard. Consistent with this flexible approach, nothing in this standard or Auditing Standard No. 2 would preclude the auditor from issuing a single, combined report on the results of an audit of internal control over financial reporting pursuant to Auditing Standard No. 2 and the results of an engagement performed pursuant to this standard.

### ***Applicability of the Standard to Material Weaknesses Not Previously Reported***

B21. The proposed standard was structured to allow an auditor to report only on a previously reported material weakness. The proposed standard defined a previously reported material weakness as a material weakness that was previously described by an auditor's report issued pursuant to Auditing Standard No. 2. A material weakness initially identified *after* the company's annual assessment date could not, therefore, be the subject of an auditor's report under the proposed standard.

B22. Virtually all of the investors who submitted comment letters suggested that the standard should allow for auditor reporting on material weaknesses identified subsequent to the company's most recent annual assessment of internal control over financial reporting. Although some of these commenters expressed concern about the level of work that might be required of the auditor to thoroughly understand a material weakness not previously reported upon by an auditor, they did not believe that the standard should prohibit such reporting. One commenter stated that if a successor auditor could gain an understanding of a company's internal control sufficient to report on a material weakness that was identified and reported on by a predecessor auditor, an auditor should be able to gain the understanding necessary to report on a material weakness identified by management as of an interim date.

B23. The majority of the auditors who commented indicated strong opposition to allowing auditors to report in this engagement on material weaknesses not previously reported. These commenters suggested that the initial identification of a material weakness requires a level of understanding of the company's controls and the specific facts and circumstances surrounding the material weakness that can result only from a complete evaluation of the effectiveness of internal control over financial reporting. Additionally, at least one commenter expressed concern that the identification of a material weakness subsequent to the annual assessment is a strong indicator of a material change within the company's internal control over financial reporting. This commenter believed that in such a circumstance the auditor would not have sufficient knowledge of the current state of internal control over financial reporting to be able to consider the interaction and potential implications of the change on other controls. This commenter also believed that this situation would prevent the auditor, in most cases, from being able to determine whether the newly identified material weakness no longer exists.

B24. The Board decided to retain the approach described by the proposed standard. The Board believes that the issue of a newly identified material weakness being an indicator of a material change within a company's internal control over financial reporting is a valid concern. Although the change in internal control over financial reporting giving rise to any new material weakness may be confined specifically to the area in which the material weakness originally was identified, the change also could be more far-reaching. In such circumstances, the auditor may not be able to determine the effect of the change without performing a full audit of internal control over financial reporting.

B25. The Board also notes that there is an important distinction between material weaknesses previously identified in an auditor's report issued pursuant to Auditing Standard No. 2 and other newly identified material weaknesses. The primary purpose of the narrow engagement described by this standard is to establish a timely and reasonable mechanism that a company can use to remove any perceived "stain" upon its financial reporting due to an outstanding adverse audit opinion on internal control over financial reporting that identified a material weakness. In the case of a new material weakness that is identified and addressed by management as of an interim date, an adverse auditor opinion previously attesting to the material weakness would not exist and, therefore, the new material weakness would not be the subject of the same type of market focus.

B26. There is also a fundamental difference between the auditor reporting on a material weakness not previously reported and a successor auditor reporting on a material weakness that *was* reported in a predecessor auditor's opinion on internal control over financial reporting. The fundamental difference is the concept of material change described above. The successor auditor must obtain a sufficient understanding of the company's internal control over financial reporting to report on the existence of a material weakness that was previously reported. This successor auditor, however, has the benefit of knowing that the material weakness was identified in the context of an audit of the internal control over financial reporting as a whole and that the predecessor auditor should have adequately described the nature of the material weakness (particularly its pervasiveness and the extent of its effect on the company's financial reporting). In contrast, in situations in which a material change has taken place and a new material weakness has arisen after the previous annual assessment of internal control over financial reporting, neither the predecessor nor the successor auditor has obtained this level of understanding as it relates to the newly identified material weakness.

B27. These considerations, taken together, resulted in the Board's decision to retain the provisions of the proposed standard that limit this engagement only to material weaknesses that have been previously described in an auditor's report issued pursuant to Auditing Standard No. 2. The Board also made changes to the standard, as suggested by one commenter, to make these provisions clearer. These changes included changing the title of the standard to "Reporting on Whether a Previously Reported Material Weakness Continues to Exist" as well as conforming changes to the text of the standard to refer explicitly to a *previously reported* material weakness as the subject matter of this engagement.

### ***Focus on Control Objectives***

B28. The proposed standard focused on stated control objectives to determine whether a material weakness continues to exist and posited that if a material weakness has been disclosed previously, a necessary control objective at the company has not been achieved. Because the term "stated control objective" was not precisely defined elsewhere in the Board's auditing standards, the proposed standard provided a definition as well as examples of stated control objectives.

B29. A *stated control objective* in the context of this engagement is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing. The stated control objective would provide management and the auditor with a specific target against which to evaluate whether the material weakness continues to exist. For this reason, the proposed standard required that management and the auditor be satisfied

that if the stated control objective were achieved the material weakness would no longer exist.

B30. Comments on the proposed standard's focus on control objectives came primarily from auditors. Many auditors, either explicitly or implicitly, supported the focus on control objectives. One auditor suggested that, given the importance of control objectives, the proposed standard should explicitly state that documentation of control objectives is required.

B31. Several auditors, however, expressed concerns about the proposed standard's focus on control objectives. A couple of these commenters suggested that the proposed standard's emphasis on control objectives might inappropriately establish a framework for evaluating the effectiveness of internal control over financial reporting that differs from, or otherwise adversely affects the proper application of, the Committee of Sponsoring Organizations of the Treadway Commission's publication *Internal Control—Integrated Framework* ("COSO").

B32. Most concerned commenters expressed apprehension that report users might be misled by an auditor's opinion that a material weakness had been eliminated because the control objectives had been met. They believed that this type of opinion might lead report users to mistakenly believe that if the control objectives were met, there were no remaining deficiencies in the internal control over financial reporting in the area related to the material weakness—when, in fact, a significant deficiency or deficiency could continue to exist.

B33. Another commenter noted that the examples in the proposed standard illustrated only control objectives for the control activities component of internal control over financial reporting—not for the other components (control environment, risk assessment, monitoring, information and communication). This commenter suggested that examples of control objectives in the other components would be helpful. Another commenter suggested that, given the importance of the control objective concept, if the Board's standards were to specifically address the concept, such a definition and discussion should reside in Auditing Standard No. 2. One concerned auditor concluded that, given the importance of control objectives, more guidance was needed, including clarification that if more than one control is necessary to achieve a stated control objective, all such controls must be identified and tested as part of this engagement.

B34. In response to comments, the Board decided to retain the definition of, and focus on, control objectives and provide additional guidance. The Board views the auditor's use of the concept of control objectives as analogous to the use of the concept of relevant assertions. The concept of relevant assertions was already familiar to experienced auditors and was specifically defined for the first time in Auditing Standard No. 2 because of that standard's focus on testing controls over all relevant assertions related to all significant accounts. Similarly, the concept of control objectives is familiar to most experienced auditors and is already used to describe the auditor's responsibilities under Auditing Standard No. 2).<sup>6</sup> A definition of control objectives (and stated control objectives) is

---

<sup>6</sup> For example, paragraph 12 of Auditing Standard No. 2 states, "Therefore, effective internal control over financial reporting often includes a combination of preventive and detective controls to achieve a specific control objective." Paragraph 85 of Auditing Standard No. 2 elaborates on this idea, including the example that, when performing tests of preventive and detective controls, the auditor might conclude that a deficient preventive control could be compensated for by an effective detective control and, therefore, not result in a significant deficiency or material weakness. That paragraph concludes with the statement, "When determining whether the detective control is effective, the auditor should evaluate whether the detective control is sufficient to achieve the control objective to which the [deficient] preventive control relates." Perhaps most notably, paragraph 88 of Auditing Standard No. 2 requires the auditor to identify the company's control objectives in each area and identify the controls that satisfy each control objective to evaluate whether the company's internal control over financial reporting is designed effectively.

provided in this standard because of the standard's focus on control objectives as a specific measure for determining whether a material weakness continues to exist. This is consistent with the Board's objective for its standards to be clear as well as the focus on control objectives in the engagement described by this standard.

B35. The Board believes that the standard's focus on control objectives is sound and helpful and is an appropriate complement to the control criteria, such as COSO, for the purposes of this engagement. The process of tailoring control objectives to the individual company allows the control criteria (i.e., the evaluation framework) used for management's annual assessment to be applied to the facts and circumstances in a reasonable and appropriate manner. Accordingly, the emphasis in this standard on control objectives is consistent with, and supports a correct application of, COSO.

B36. The focus on whether the stated control objectives have been met as the target for determining whether a material weakness continues to exist does accommodate the circumstance in which a deficiency or significant deficiency continues to exist in that area of the company's internal control over financial reporting. Although several commenters linked this result with the focus on control objectives, this potential result would exist in any case within the overall construct of this standard, completely apart from the focus on control objectives. The potential for less severe deficiencies to persist in an area in which a previously reported material weakness no longer exists parallels the reporting results of an engagement performed under Auditing Standard No. 2. According to that standard, only material weaknesses (not less severe weaknesses) are disclosed in an auditor's report and only the existence of a material weakness and not less severe weaknesses affects the auditor's opinion on the effectiveness of the company's internal control over financial reporting. As an illustration, assume that a company that had previously reported a material weakness in internal control over financial reporting elected to wait until the auditor's next annual report issued pursuant to Auditing Standard No. 2 to obtain auditor assurance related to the existence of the material weakness. If the control weakness that had previously risen to the level of material weakness were reduced to a significant deficiency or deficiency as of the company's next year-end, the auditor's next report issued under Auditing Standard No. 2 would present an unqualified opinion indicating that the company's internal control over financial reporting was effective. The Board concluded that the users of an auditor's report on whether a previously reported material weakness continues to exist need only receive auditor assurance that the material weakness no longer exists and not more detailed information about whether less severe control deficiencies continue to persist.

B37. The Board notes, however, that paragraph 140 of Auditing Standard No. 2 states (in part) that strong indicators of a material weakness include circumstances in which significant deficiencies that have been communicated to management and the audit committee remain uncorrected after some reasonable period of time. If management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness in internal control over financial reporting. An auditor is not required to provide an opinion under this voluntary engagement, and could reasonably decline to provide an opinion under such circumstances.

B38. In response to comments that report users will mistakenly believe that an auditor's report issued pursuant to the standard's provisions is communicating auditor assurance that no control deficiencies exist in the area related to the former material weakness, the Board decided that the change in the title of the

standard and the form of the auditor's opinion (discussed further in paragraph B14), coupled with this discussion, would sufficiently mitigate any potential for report users to misunderstand the assurance being provided by an engagement conducted under this standard. Removing the concept of control objectives from the standard would not address the potential for misunderstanding because this potential exists independently of the focus on control objectives.

B39. With regard to the recommendation that the standard provide additional examples of stated control objectives, including stated control objectives related to components of internal control over financial reporting other than control activities, the Board determined that the provisions of the standard should remain largely at the conceptual level and state that the other components of internal control over financial reporting can be expressed in terms of control objectives. The Board also determined to emphasize, in the note to paragraph 17 of the standard, that when a material weakness has a pervasive effect on the company's internal control over financial reporting, it may be difficult to identify all of the relevant control objectives and the material weakness probably is not suitable for this type of narrow, interim reporting.

B40. For the purposes of this engagement, a stated control objective need not be more precise than to describe an objective that relates to whether there is a more than remote risk that the company's financial statements are materially misstated in a given area. For instance, paragraph 14 of the standard includes the example control objective, "The company has legal title to recorded product X inventory in the company's Dallas, TX warehouse." This example assumes that the product X inventory account related to the company's Dallas, TX warehouse represents a more than remote risk of material misstatement to the company's financial statements taken as a whole and has been identified as a separate significant account. This example does not suggest that a company should establish separate control objectives for all of its various types of inventory, by inventory location, regardless of materiality.

B41. Although the Board believes that the proposed standard made clear that in performing this engagement, the auditor should identify and test all controls necessary to achieve the stated control objective, based on the importance of this concept and in response to commenters, the Board concluded that an explicit clarification should be added. Not only must newly implemented or modified controls be identified and tested in this engagement, but *all* controls necessary to achieve the stated control objective must be identified and tested. For example, in a circumstance in which four controls must operate effectively for a given control objective to be achieved, the failure of one of those controls could result in a material weakness. In the context of this engagement, all four controls necessary to achieve the stated control objective would need to be specifically identified and tested. This must be the case because of the inherent limitations in internal control over financial reporting. If three of the four controls were found to be effective as of year-end, they cannot be assumed to be effective as of a later date. To render an opinion as of a current date about whether the material weakness exists, the auditor must have current evidence about whether all controls (in this example, all four controls) necessary to achieve the control objective are designed and operating effectively.

B42. Regarding the suggestion to include a requirement that control objectives be documented, the Board notes that neither COSO nor Auditing Standard No. 2 currently contain such a requirement. As with many aspects of assessing the effectiveness of internal control over financial reporting, the better the documentation, the easier and more efficient the evaluation, especially from the auditor's perspective. In the context of this engagement, by virtue of creating a stated control objective, the company and the auditor would document the

stated control objective, even if that documentation appeared only in their respective reports. Therefore, documentation is effectively required for the stated control objectives encompassed by an engagement conducted under this standard. The Board does not believe, however, that establishing a broad requirement for documenting *all* control objectives related to a company's internal control over financial reporting is needed at this time or would be appropriately placed within this standard.

### **Concept of Materiality**

B43. To provide direction on the concept of materiality, the proposed standard largely referred to Auditing Standard No. 2. The proposed standard stated that the concept of materiality, as discussed in paragraphs 22 and 23 of Auditing Standard No. 2, underlies the application of the general and fieldwork standards in an engagement to report on whether a previously reported material weakness continues to exist. Therefore, the auditor uses materiality at the financial-statement level, rather than at the individual account-balance level, in evaluating whether a material weakness exists.

B44. Several auditors commented that the proposed standard should provide additional direction on how the auditor considers materiality in performing this engagement. Commenters believed that clarification was necessary regarding the appropriate time context for management's and the auditor's materiality judgments. These commenters asked whether materiality should be assessed as of the date management asserts to be the date at which the material weakness no longer exists, or as of the end of the prior year when the material weakness was originally reported.

B45. Most commenters on this issue suggested that the date for assessing materiality should be the date management asserts to be the date at which the material weakness no longer exists. Commenters noted, however, that this position would allow a material weakness to no longer exist merely as a result of a business acquisition or disposition, for example, because either of those actions would change materiality as of that point in time (and, in the case of a disposition, send the material weakness along with the disposed business).

B46. Several auditors suggested that the auditor's opinion should explicitly recognize the concept of materiality. Commenters suggested the following as alternatives that would recognize materiality: "Management's assertion that XYZ Company has eliminated the material weakness described above as of [*date of management's assertion*] is fairly stated, in all material respects . . ." and "XYZ Company has eliminated the material weakness with respect to the Company's internal control over financial reporting as described above as of [*date specified in management's assertion*], in all material respects." These commenters were concerned that the opinion described by the proposed standard misrepresented the precision of the auditor's assessment and neglected the notion of reasonable assurance.

B47. The Board decided that the provisions in the standard regarding materiality should be clarified to specify that materiality should be assessed as of the date management asserts that the material weakness no longer exists. The as-of date of management's assertion and the auditor's opinion is fundamental to the auditor's decisions about whether he or she has obtained sufficient evidence to support an opinion and to the auditor's evaluation of that evidence to form an opinion on whether the material weakness exists as of that point in time. The Board believes that the logical and internally consistent position regarding the time context for assessing materiality is to assess materiality as of the date that management asserts the material weakness no longer exists. The Board also believes that materiality can be assessed as of a date other than a financial

reporting period-end. This is consistent with the Board's decision, discussed further beginning at paragraph B15, that the standard permit the auditor to report on whether a previously reported material weakness continues to exist as of any date.

B48. The Board also believes that auditors should exercise caution in circumstances in which the only aspect of a previously reported material weakness that has changed is materiality (in other words, the size of the financial statement accounts has changed due to an acquisition or other activity rather than any changes in the design or operation of controls). In many such cases, the company will have undergone significant changes, with an associated change in internal control over financial reporting overall. In this circumstance, the auditor would need to perform procedures beyond the scope of work ordinarily contemplated under this standard to have a sufficient basis for his or her new assessment of materiality and an adequate understanding of the company's internal control over financial reporting overall. The Board believes that, in many cases in which the company has undergone a change of this magnitude, the auditor would need to perform a full audit of internal control over financial reporting in accordance with Auditing Standard No. 2 to have a sufficient basis for assessing materiality, understanding the company's internal control over financial reporting overall, and rendering an opinion about whether a material weakness continues to exist. Also, as discussed in paragraph B37, a previously reported material weakness may no longer exist because it has been reduced to a significant deficiency. In this circumstance, if management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness.

B49. Regarding the form of the auditor's opinion and concerns that the opinion suggested by the proposed standard implied an inappropriate degree of precision and neglected the concept of reasonable assurance, the Board concluded that the provisions of the proposed standard were sufficiently clear that the auditor's objective in this engagement was to plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist as of the date specified by management. Furthermore, the auditor's report described by the proposed standard included disclosure of this objective. The Board does not, therefore, believe that report users would mistakenly believe that the auditor's opinion, as proposed, would convey absolute assurance.

B50. In addition, the Board believes that including another reference to materiality in the auditor's opinion would not add anything of substance to the auditor's conclusion and could instead impair its readability. The determination of whether a material weakness exists is inherently linked to materiality. Stating that the material weakness no longer exists in all material respects would be redundant—the equivalent of saying that the financial statements are not materially misstated in all material respects. Accordingly, the Board has not added another reference to materiality in the auditor's opinion.

### ***Performance of Substantive Procedures***

B51. The proposed standard, consistent with its reliance on the existing provisions of Auditing Standard No. 2, focused largely on the tests of controls that the auditor must perform to obtain reasonable assurance that a material weakness no longer exists. The proposed standard additionally recognized that, in some cases, the auditor also would need to perform substantive procedures on account balances to obtain sufficient evidence as to whether a material weakness no longer exists.

B52. Several auditors believed that the proposed standard was too mild in its wording that the auditor "may determine" that performing substantive procedures was necessary. Those commenters believed that, to be consistent with the integrated audit concept of Auditing Standard No. 2 and to reflect the fact that identification of many material weaknesses during the past year occurred during the performance of substantive audit procedures, such wording did not adequately convey the importance of performing substantive procedures in an engagement to report on whether a previously reported material weakness continues to exist. Some commenters recommended that the standard set forth a presumptively mandatory requirement for the auditor to perform substantive audit procedures in all cases, while others suggested that strengthening the language or providing additional guidance about when substantive procedures are necessary would be sufficient.

B53. The Board continues to believe that in some circumstances, substantive procedures will not be necessary for the auditor to obtain sufficient evidence about whether a material weakness continues to exist. Like many aspects of this standard, the auditor's judgment in this area will depend on the nature of the material weakness. An auditor can obtain sufficient evidence to support an opinion on whether some material weaknesses continue to exist without the need for substantive procedures. Other material weaknesses necessitate substantive procedures for the auditor to obtain sufficient evidence. Therefore, the Board determined that it would be inappropriate to establish a presumptively mandatory requirement that substantive procedures be performed in all cases.

B54. The Board agreed, however, that the proposed standard did not sufficiently stress the potential importance of performing substantive procedures, depending on the nature of the material weakness. Paragraph 34 of the standard has, therefore, been modified in a manner that the Board believes better articulates the potential need to perform substantive procedures. An example also has been added to this paragraph of the standard to illustrate a circumstance in which substantive procedures ordinarily would need to be performed.

### ***Using the Work of Others***

B55. Similar to PCAOB Auditing Standard No. 2, the proposed standard permitted the auditor to use the work of others to alter the nature, timing, and extent of the auditor's performance of this work. Specifically, the proposed standard applied the framework for using the work of others described in PCAOB Auditing Standard No. 2. That framework requires the auditor to obtain the principal evidence supporting his or her opinion and to evaluate the nature of the controls being tested, together with the competence and objectivity of the persons performing the work.

B56. Under both PCAOB Auditing Standard No. 2 and the proposed standard, the framework measures principal evidence in relation to the overall assurance provided by the auditor. In PCAOB Auditing Standard No. 2, the principal evidence supporting the auditor's opinion should be evaluated in relation to the auditor's opinion on internal control over financial reporting overall. In contrast, the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion as to whether a material weakness no longer exists would need to be applied at the control objective level.

B57. There were few comments on the provisions for using the work of others in this proposed standard. Most commenters who commented on these provisions expressed confusion about a passage in the example of proposed paragraph 36, which stated that "the auditor *might* perform a walkthrough of the reconciliation process himself or herself [emphasis added]." Commenters believed that

walkthroughs were required in the proposed standard in all cases and that walkthroughs must be conducted by the auditor himself or herself.

B58. One auditor suggested clarifying within the proposed standard that the auditor will be able to use the work of others only in limited circumstances. This same commenter also believed that the bank reconciliation example presented in the proposed standard to illustrate how the auditor could use the work of others in this type of engagement was too simplistic and requested additional, more realistic examples.

B59. The Board continues to believe that the framework for using the work of others that was established in Auditing Standard No. 2 is appropriate for use in this context and, therefore, the provisions for using the work of others in the standard have been retained as proposed. At the same time, the Board determined that it would be helpful to clarify, through the following discussion, that the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion on whether a material weakness continues to exist would need to be applied at the control objective level. A complete understanding of this feature of the standard is important because this provision allows for additional flexibility in the auditor's work.

B60. The auditor's opinion in this engagement is expressed only on whether the material weakness continues to exist—not on whether the individually identified controls are effective. As a result, the evaluation as to whether the auditor has obtained the principal evidence supporting his or her opinion should be made at the control objective level—not at the lower level of the controls individually identified in management's assertion and the auditor's report.

B61. If, for example, management's and the auditor's reports identify three separate previously reported material weaknesses that no longer exist, the auditor would, in effect, be rendering three separate opinions. Those opinions would indicate that each of the three individual material weaknesses continues to exist or no longer exists as of the date of management's assertion. The standard, therefore, would require the auditor to obtain the principal evidence that the *control objectives* related to each of the three identified material weaknesses were now achieved. However, the standard would not require that the auditor obtain the principal evidence that each *control specifically identified* in management's assertion as achieving the control objectives is effective.

B62. Auditing Standard No. 4 follows the same framework for using the work of others as Auditing Standard No. 2. There may, however, be some circumstances in which the scope of the audit procedures to be performed in this engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. The Board believes that no additional specific restriction on the use of the work of others is appropriate or necessary in the context of this engagement. Such a restriction would diminish the flexibility that the framework otherwise provides and perhaps inhibit the auditor's exercise of the judgment necessary to implement the framework appropriately. Furthermore, the Board does not believe that auditors need such direction within the standard to make appropriate decisions about using the work of others in this context.

B63. Similarly, the Board determined that no further examples of using the work of others were needed. The Board believes that additional examples demonstrating the application of the provisions in the standard for using the work of others to reflect more realistic (*i.e.*, complex, fact-driven) situations is better handled outside of the standard itself and by auditors—in their audit methodology, training courses, and other venues.

B64. In response to confusion about the requirement for walkthroughs, the Board clarified the standard by adding a note to paragraph 38 and deleted the reference to a walkthrough from the example on using the work of others. Walkthroughs are required only of a successor auditor when the successor auditor performs this engagement before performing an audit of internal control over financial reporting in accordance with Auditing Standard No. 2. A continuing auditor that has opined already on the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent annual assessment and is engaged to conduct this narrow engagement is not required to perform any walkthroughs as part of this engagement.

### ***Dividing Responsibility***

B65. Due to the narrow scope of an engagement to report on whether a material weakness continues to exist, the provisions of the proposed standard allowed the principal auditor to use the work and reports of another auditor as a basis, in part, for his or her opinion. The proposed standard also prohibited the principal auditor from dividing responsibility for the engagement with another auditor.

B66. Very few comments were received on this provision of the proposed standard. One auditor suggested that, although dividing responsibility may not be appropriate in certain circumstances, the standard should not prohibit it. Another auditor expressed confusion about whether the principal auditor could refer to the report of the other auditor but not divide responsibility with the other auditor.

B67. The Board continues to believe that, based on the nature of the engagement described by the standard, the principal auditor should be prohibited from dividing responsibility for the engagement with another auditor. The Board's consideration of the nature of this engagement included recognition of the narrow scope of the work (*i.e.*, whether a previously reported material weakness continues to exist), that the engagement would be voluntary, and that the assignment would be non-recurring (unlike the recurring nature of the audit of the financial statements or the audit of internal control over financial reporting). The Board notes that three appropriate alternatives exist in the circumstance in which another auditor is involved and the company wants to obtain auditor assurance that a previously reported material weakness no longer exists:

- The principal auditor could report on whether a previously reported material weakness continues to exist according to this standard by performing all of the testing required for this engagement himself or herself.
- The principal auditor could report on whether a previously reported material weakness continues to exist according to this standard by using the work and reports of another auditor as a basis, in part, for his or her opinion, and by taking responsibility for the work performed by the other auditor. In this case, the auditor may not make reference to the other auditor in his or her report on whether a previously reported material weakness continues to exist.
- The company could wait until year-end when the principal auditor would report on the effectiveness of internal control over financial reporting overall under the provisions of Auditing Standard No. 2.

B68. The Board concluded that the standard was sufficiently clear that the principal auditor could not divide responsibility with another auditor and, therefore, that the auditor also could not refer to the other auditor in his or her report. Accordingly, no change has been made to the standard in this regard.

### ***New Material Weaknesses Identified***

B69. The proposed standard was silent regarding the auditor's responsibilities if, during the performance of this engagement, he or she became aware of a new material weakness not previously reported on by an auditor.

B70. Several commenters requested that the standard address the auditor's responsibilities for new material weaknesses identified during this engagement and suggested what these responsibilities should be. One investor suggested that the standard should require the auditor to include disclosure of any new material weaknesses of which the auditor was aware in his or her report. This commenter stated that, otherwise, the auditor's report would become a way of telling investors the good news while concealing the bad news. Another commenter suggested that management should be required to include the new material weakness in management's assertion that would accompany the auditor's report and the auditor should then disclaim an opinion on the new material weakness.

B71. Both the identification of material weaknesses and the remediation of such weaknesses will be captured by management's voluntary and required reporting under the SEC's rules. Accordingly, the provisions of this standard do not facilitate management's ability to conceal from investors the emergence of a new material weakness at the company. Nevertheless, the Board agreed that when an auditor identifies a new material weakness during the performance of this engagement, the auditor should not simply remain silent. Accordingly, the Board modified the standard to require the auditor to communicate, in writing, to the audit committee any material weaknesses identified during this engagement that the auditor had not previously communicated, in writing, to the audit committee.

B72. The existing provisions of Auditing Standard No. 2 contain responsibilities for the auditor if (1) information comes to the auditor's attention during this engagement that leads him or her to believe, while performing quarterly procedures required by Auditing Standard No. 2, that management's quarterly disclosures are materially misleading, or (2) the auditor becomes aware of conditions that existed at the date of his or her last report issued under Auditing Standard No. 2.

B73. Paragraphs 202-206 of Auditing Standard No. 2 establish certain requirements for the auditor related to management's quarterly and annual certifications with respect to the company's internal control over financial reporting. If matters come to the auditor's attention during this engagement that lead him or her to believe, while fulfilling these quarterly requirements, that modification to the disclosures about changes in internal control over financial reporting is necessary for the certifications to be accurate and to comply with the requirements of Section 302 of the Act and the SEC's rules, these provisions of Auditing Standard No. 2 require the auditor to take action. Such actions escalate from auditor communications with management and then to the audit committee, culminating in the auditor considering his or her additional responsibilities under AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.

B74. In addition, a continuing or predecessor auditor would have responsibilities under paragraph 197 of Auditing Standard No. 2 if the existence of a new material weakness came to the auditor's attention. This paragraph effectively extends the responsibilities in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, to reports on the effectiveness of internal control over financial reporting issued pursuant to Auditing Standard No. 2. The identification of a new material weakness in the current year would cause

the auditor, in fulfilling these responsibilities, to determine whether the facts relating to the material weakness existed at the date of the auditor's report pursuant to Auditing Standard No. 2 and, if so, (1) whether those facts would have changed the auditor's report issued under Auditing Standard No. 2 if he or she had been aware of them and (2) whether there are persons currently relying on or likely to rely on the auditor's report. If the auditor determined that the new material weakness identified in the current year actually existed as of the date of his or her previous report under Auditing Standard No. 2 and that it was not adequately identified and disclosed in that report, the auditor would need to take steps such as recalling and reissuing the previous report to ensure that investors did not continue to rely on the previously issued (erroneous) report.

B75. Including newly identified material weaknesses in the auditor's report could potentially mislead investors into believing that the assurance provided by this type of engagement is broader than it actually is. If report users were provided with disclosure (covered by the auditor's opinion) of new material weaknesses of which the auditor was aware, report users might incorrectly believe that the auditor's report captured *all* new material weaknesses that had arisen at the company. Similarly, a requirement for the auditor to disclose any new material weaknesses could lead report users to conclude, incorrectly, that no such disclosure means that there is current auditor assurance over the whole of internal control over financial reporting at the company. The objective of this engagement is to provide auditor assurance about whether a previously reported material weakness continues to exist—nothing broader. The only way for investors to obtain a more complete report from the auditor would be for the auditor to audit internal control over financial reporting in accordance with Auditing Standard No. 2.

### ***Specific Identification of All Previously Reported Material Weaknesses***

B76. The proposed standard required the auditor to modify his or her report if the auditor provides assurance on less than all of the material weaknesses previously reported. The proposed standard did not, however, require the auditor to specifically identify all of the previously reported material weaknesses not covered.

B77. All investors who commented on this issue suggested that all material weaknesses previously reported either should be referred to or specifically included in the auditor's report. They indicated that failure to identify the additional material weaknesses might lead some users to erroneously conclude that they no longer exist. Auditors, on the other hand, agreed that complete specific identification of the previously reported material weaknesses not covered by the auditor's opinion should not be included, primarily because they believe that it may increase the risk of confusion about the scope of the engagement and what is being covered in the auditor's opinion. Several commenters who agreed that specific identification was not necessary suggested that in addition to the report modification included in the proposed standard, the auditor's report on this engagement should specifically direct the reader to the previous auditor's report (issued under Auditing Standard No. 2), by either attaching a copy of the audit report or by providing direction as to where the report could be obtained.

B78. The Board believes that including a complete specific identification of the previously reported material weaknesses not covered by this engagement would prove problematic. As noted by many commenters, it is possible that including this detail would confuse report readers regarding the scope of this narrow engagement and could imply that, unless told otherwise, a report user should

assume that those other material weaknesses *do* continue to exist. In some of the material weakness descriptions included in management's and the auditor's reports on the effectiveness of the company's internal control over financial reporting as of year-end, the description of multiple material weaknesses covered several pages. That level of detail in an auditor's report specifically targeted at whether just one material weakness continues to exist could easily overwhelm the rest of the audit report, making the report prone to various kinds of misinterpretations.

B79. The Board concluded that report readers would be better served by requiring the auditor to provide information regarding where to obtain the previously issued audit report—either by attaching it or referring to where it could be publicly obtained.

### ***Other Reporting Matters***

B80. *No Requirement to Issue a Report.* The proposed standard required that the auditor, if he or she concluded that the material weakness continues to exist, communicate that conclusion in writing to the audit committee. The proposed standard, however, did not require the issuance of a report. Rather, the proposed standard recognized that the auditor must consider this knowledge in connection with the auditor's responsibilities under Auditing Standard No. 2 to determine whether management's quarterly disclosures about internal control over financial reporting are not materially misleading.

B81. Several auditors who commented recommended that the proposed standard should require the auditor to issue an adverse report in the event that the auditor concludes that the material weakness continues to exist. One suggested that issuance of an adverse report would be necessary only if the auditor believed that the company had previously publicly disclosed that the material weakness had been addressed.

B82. The Board continues to believe that requiring the issuance of an adverse report to the company would serve no useful purpose in this circumstance because the company might not make such a report public. The Board believes, therefore, that requiring the auditor to communicate, in writing, with the audit committee his or her conclusion that a material weakness that was the subject of this engagement continues to exist would serve the same purpose as requiring the issuance of an adverse report. At the same time, such a requirement would provide the auditor with additional flexibility as to the form of communication that would be most meaningful to the audit committee. Regarding the potential for management to lead investors to incorrectly believe that the material weakness no longer exists in its public disclosures, the Board believes that the federal securities laws, as well as auditor's existing responsibilities related to management's quarterly disclosures, are adequate safeguards to protect investors from misleading information.

B83. *No Distinction in Standard Between Unqualified and Adverse Opinion.* As discussed in the note to paragraph 43 of the standard, the standard no longer distinguishes between an unqualified and an adverse opinion. The auditor's opinion was revised to state that the material weakness exists or no longer exists. This revision is discussed further in the section "Form of Auditor's Opinion" and is now referred to in the standard as the auditor's opinion.

B84. *Inherent Limitations.* The inherent limitations paragraph of the auditor's report provided in the proposed standard discussed the inherent limitations of internal control over financial reporting overall, rather than the inherent limitations of the controls related to the material weakness being reported on.

B85. One commenter suggested that the inherent limitations paragraph was too broad for this engagement and needed to be modified to more accurately reflect the narrow focus of this type of engagement.

B86. The Board agreed that the inherent limitations paragraph, in this context, should be targeted to the specific controls identified in this auditor report. In addition, the Board continues to believe that the broader concept of inherent limitations in internal control over financial reporting overall is equally applicable. The inherent limitations paragraph in the auditor's report has been modified to reflect both of these conclusions.

B87. *Obtaining an Understanding of Internal Control Over Financial Reporting.* The proposed standard included a required report element stating that "the engagement includes obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as the auditor considered necessary in the circumstances." This language also was included in the example report included in the proposed standard.

B88. Several auditors expressed concern that the phrase, "the engagement includes obtaining an understanding of internal control over financial reporting," implies that, as a part of the current engagement, the auditor spent a significant amount of time understanding internal control over financial reporting overall rather than carrying forward his or her understanding from the prior annual audit. These commenters believed this implication conflicted with the direction in the body of the proposed standard that an auditor who has audited the company's internal control over financial reporting within the past year in accordance with Auditing Standard No. 2 would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform this engagement. One commenter acknowledged that the proposed wording may be appropriate in cases in which a successor auditor is performing this engagement without previously gaining that understanding.

B89. The Board continues to believe that an auditor who has audited the company's internal control over financial reporting as of the company's most recent annual assessment in accordance with Auditing Standard No. 2 would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform an engagement to report on whether a previously reported material weakness continues to exist. To require a continuing auditor to update and document his or her understanding of internal control over financial reporting overall (to the full measure required by Auditing Standard No. 2) would be unnecessarily burdensome and costly. The Board modified the report element for a continuing auditor to clarify that the auditor previously obtained an understanding of internal control over financial reporting overall at the company and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the specified material weakness.

B90. The Board continues to believe, however, that a successor auditor that has not yet audited the company's internal control over financial reporting in accordance with Auditing Standard No. 2 would need to obtain a current understanding of internal control over financial reporting in connection with this engagement. Therefore, the report element described in the proposed standard is appropriate and has been retained for a successor auditor's reporting.

B91. *Example Reports.* The proposed standard included only one example report, which illustrated reporting on one material weakness by a continuing auditor when no additional material weaknesses were reported previously. Several commenters requested modification of the standard to address circumstances that the Board believed were already addressed by the proposed

standard but were not illustrated in the single example report. Some commenters also made specific requests for additional example reports.

B92. The Board determined, after considering the nature of the comments, that additional example reports, while not covering all possible situations, would provide additional clarity to the various reporting situations. The Board selected three reports to illustrate most facets of the reporting provisions of the standard. Appendix A includes those reports.

### ***Conforming Amendments to AT sec. 101***

B93. The proposed standard contained a proposed conforming amendment to AT sec. 101, *Attest Engagements*. The proposed conforming amendment would have required the proposed standard to be used, rather than AT sec. 101, for any engagements in which the subject matter is whether a material weakness continues to exist. This conforming amendment would have precluded the auditor from performing an agreed-upon procedures or review engagement (using AT sec. 101) when the subject matter of the engagement was whether a material weakness continues to exist.

B94. The Board received few comments related to the proposed conforming amendment. One auditor agreed that a conforming amendment to preclude a review-level attestation was appropriate when the subject matter was whether a material weakness continues to exist. This commenter went on to suggest, however, that there could be appropriate uses for an agreed-upon procedures engagement and that the Board should not preclude agreed-upon procedures from being performed under the Board's standards. Such reports, the commenter noted, would be restricted to the use of the specified parties who take responsibility for the sufficiency of the agreed-upon procedures for their purposes and, therefore, these reports would not generally be available to investors. Thus, these reports would not be a substitute for the engagements addressed in the proposed standard. Another commenter separately suggested broadly retaining the ability for the auditor to perform a review engagement when the subject matter is a previously reported material weakness.

B95. The Board continues to believe that investors and other report users in the public domain will be best served by the Board's standards permitting only positive assurance (i.e., an examination-level attestation) from the auditor when the subject matter is whether a material weakness continues to exist. The Board agrees, however, that private parties (such as audit committees) who wish to engage the auditor to perform specified procedures when the subject matter is whether a material weakness continues to exist should be allowed to negotiate such a private arrangement, as long as the results are not intended for public use. The Board, therefore, decided to modify the conforming amendment to AT sec. 101 of the Board's interim standards. As adopted, an auditor may not use AT sec. 101 to report on whether a material weakness in internal control over financial reporting continues to exist for any purpose other than the company's internal use.

## Attachment

### PCAOB Release No. 2005-015

July 26, 2005

PCAOB Rulemaking  
Docket Matter No. 018

**Approved by the Securities and Exchange Commission on February 6, 2006, and is effective as of February 6, 2006.**

### Summary:

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*. The Board will submit this standard to the Securities and Exchange Commission ("Commission" or "SEC") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

### Board Contacts:

Laura Phillips, Associate Chief Auditor (202/207-9111; phillipsl@pcaobus.org),  
Sharon Virag, Assistant Chief Auditor (202/207-9164; virags@pcaobus.org)

\* \* \*

## I. Background

Congress enacted Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") to provide investors with increased transparency about public companies' internal control over financial reporting. Since then, approximately 12.7 percent of public companies that are accelerated filers<sup>1</sup> have reported that their internal control over financial reporting is not effective because one or more material weaknesses in internal control over financial reporting existed as of the company's fiscal year-end.<sup>2</sup> When a company reports a material weakness, investors may be left uncertain about the reliability of the company's financial reporting. They may also want information about the company's plans for remediating the material weakness and its timeframe for doing so, and to be notified when the material weakness has been eliminated. Thus, a disclosure that internal control over financial reporting is not effective is often only the beginning of a company's communications with investors concerning the material weakness (or weaknesses) that caused the problem.<sup>3</sup>

---

<sup>1</sup> An "accelerated filer," as defined in Rule 12b-2 under the Securities Exchange Act of 1934, 17 C.F.R. § 240.12b-2, is generally a U.S. company that, among other things, has equity market capitalization over \$75 million and has filed at least one annual report with the Commission.

<sup>2</sup> See Paul J. Martinek, *Adjustments, Restatements Are Predictors Of Weaknesses*, Compliance Week (June 14, 2005).

<sup>3</sup> Some companies with material weaknesses have already begun this process by including detailed descriptions of their remediation plans in their annual filings or by providing additional disclosures in subsequent filings on the steps they are continuing to take to remediate the weaknesses. See *June 2005 Internal Control Report: All About Remediation*, Compliance Week (July 6, 2005).

Both companies and report users have recognized the importance of a mechanism for companies to effectively communicate with the markets when a previously reported material weakness in internal control over financial reporting no longer exists.<sup>4</sup> In many cases, companies will find the mechanisms for company disclosures already provided by the federal securities laws sufficient. For example, a public company is required to disclose quarterly any changes in internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.<sup>5</sup> Investors will, therefore, learn of material improvements, such as the correction of a material weakness, on at least a quarterly basis through these required disclosures.<sup>6</sup> Under the Board's Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Connection with an Audit of Financial Statements*, the company's auditor is responsible for evaluating these quarterly disclosures.<sup>7</sup> Finally, investors will also learn about the status of previously reported material weaknesses (as well as internal control over financial reporting overall), accompanied by auditor assurance, when the company files its next annual report. Investors and issuers, however, have called for the ability to obtain auditor assurance as of an interim date that a previously reported material weakness no longer exists. At the November 18, 2004, SAG Meeting, several members of the group with experience as investors and issuers encouraged the Board to develop a standard that would describe this type of engagement for the auditor. In particular, several issuer members of the SAG emphasized that companies that have reported a material weakness will want to have options available to assure the markets that the material weakness has been remediated.<sup>8</sup>

## II. Public Comment on the Board's Proposal

On March 31, 2005, the Board issued for public comment a proposed auditing standard titled "Reporting on the Elimination of a Material Weakness." In response, the Board received 30 comment letters from a variety of interested parties, including auditors, investors, issuers, and others. The comment letters included detailed discussion of a wide range of topics. Many commenters expressed strong support for the standard.<sup>9</sup>

---

<sup>4</sup> The Board's Standing Advisory Group ("SAG") discussed possible auditor involvement with the elimination of a material weakness at its November 18, 2004 public meeting ("SAG Meeting"). An archived webcast of the SAG Meeting and a related briefing paper on this topic, "Reporting on the Correction of a Material Weakness," are available on the PCAOB's Web site at [www.pcaobus.org](http://www.pcaobus.org).

<sup>5</sup> See Item 308(c) of Regulation S-K, 17 C.F.R. §229.308(c).

<sup>6</sup> Of course, through this same mechanism, investors also could learn if internal control over financial reporting deteriorates materially during the year.

<sup>7</sup> See Paragraphs 202–206 of Auditing Standard No. 2, as well as PCAOB Staff Question and Answer No. 55 regarding the extent of these responsibilities. The Staff Questions and Answers are available on the Board's Web site under Standards at [www.pcaobus.org](http://www.pcaobus.org).

<sup>8</sup> See Nick S. Cyprus, Vice President, Controller and Chief Accounting Officer, The Interpublic Group of Companies, Remarks at SAG Meeting (Nov. 18, 2004) ("I guarantee there will be demand [for such a standard]"); Sam Cotterell, Vice President and Controller, Boise Cascade LLC, Remarks at SAG Meeting (Nov. 18, 2004) ("if I have a material weakness disclosed, I want a mechanism to let the market know that that has been fixed. I want to do that as quickly as possible").

<sup>9</sup> See Letter from Laurie Fiori Hacking, Executive Director, Ohio Public Employees Retirement System, to J. Gordon Seymour, Acting Secretary, PCAOB (Apr. 15, 2005) ("The elimination of a material weakness, accompanied by an independent auditor's interim report attesting to management's assessment of its internal controls, will increase investor confidence in the reliability of a company's financial statements."); Letter from Gregory J. Jonas, Managing Director, Moody's Investors Service, to Office of the Secretary, PCAOB (May 5, 2005) ("the proposed standard strikes a useful balance by giving companies the option to provide users with information they value and with the assurance they find useful while not requiring a complete re-assessment").

Other comments included:

- suggestions regarding the wording of the auditor's opinion and the title of the proposed standard;
- discussion of several technical issues, such as the standard's focus on control objectives, consideration of materiality, and the potential need for the auditor to perform substantive procedures;
- suggestions regarding the auditor's responsibility when new material weaknesses are identified during this engagement, and when all previously reported material weaknesses are not being reported upon by the auditor;
- concerns that, although an engagement under the standard would be completely voluntary, it could become compulsory, as a practical matter, if investors begin to insist on auditor attestation in all cases in which a material weakness is identified;
- a suggestion that the conforming amendment be modified to allow auditors to use AT 101 strictly for a company's internal use.

The Board carefully considered all of the comment letters that it received. A detailed analysis of comments and the Board's responses are contained in the Background and Basis for Conclusions, in Appendix B of the standard.

### III. Summary of Changes to the Proposed Standard

The Board adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, after making several changes to the proposed standard in response to comments. The more significant changes include—

- revising the form of the auditor's opinion to clarify that the purpose of the engagement is to determine whether the material weakness "exists" or "no longer exists" and making related changes to the title of the standard;
- conforming text in the conditions for engagement performance to the text of a parallel provision in PCAOB Auditing Standard No. 2, due to the close relationship between the two standards. Specifically, the Board clarified that under Auditing Standard No. 4, management's evidence includes documentation;
- adding guidance on the subjects of materiality, control objectives and substantive procedures;
- adding a responsibility for the auditor to inform the audit committee if the auditor identifies a new material weakness during an engagement performed under this standard;
- modifying the required elements of the auditor's report to clarify that a continuing auditor previously obtained an understanding of internal control over financial reporting and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the specified material weakness;
- including additional illustrative auditor's reports; and
- modifying the conforming amendment to the Board's interim attestation standards to allow auditors to continue to use AT 101

for engagements to report on whether a material weakness continues to exist if such a report is intended strictly for a company's internal use.

These changes have been reflected in the adopted standard, and are discussed further in the Background and Basis for Conclusions, included in Appendix B of the standard.

## IV. Overview of the Engagement

This standard establishes a stand-alone engagement that is entirely voluntary, performed only at the company's request. This type of reporting is not required by the Act or the standards or rules of the PCAOB, and should not be viewed as compulsory. The Board anticipates that in deciding whether to engage their auditors to report on whether a particular material weakness continues to exist, companies will weigh the costs and benefits and do so only when it is cost-effective. Based on the investor and issuer comments at the SAG Meeting, the Board believes that, in some situations, companies will find that auditor assurance that a material weakness no longer exists leads to a higher level of investor confidence in a company's financial reporting, and that the costs of the engagement are therefore worth incurring. If a company believes, however, that these benefits would be outweighed in a particular case by the costs of obtaining them, the company may (and presumably would) determine not to engage its auditor to perform this work.

Although the Board designed this standard to be a cost-effective means of providing investors assurance that a material weakness no longer exists, the Board expects that this engagement will be best suited and most cost-effective for reporting on material weaknesses that are discrete problems with a limited effect on the company's internal control over financial reporting. Reporting on material weaknesses that have a pervasive effect on the company's internal control over financial reporting could require such a broad and extensive base of work that the Board anticipates that a company in this situation would choose to wait for the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2 to obtain auditor assurance that a pervasive material weakness no longer exists.

The objective of an auditor's engagement under this standard is to express an opinion on whether a previously reported material weakness continues to exist. The standard, therefore, draws from many concepts applicable to the auditor's report on the effectiveness of internal control over financial reporting, as described in Auditing Standard No. 2, although in a more narrowly focused and limited manner. For this reason, most of the requirements in the standard will be familiar to auditors. In designing this standard, the Board provided flexibility wherever possible, to allow auditors to conduct the engagement in a manner suited to the material weakness in internal control over financial reporting at issue.

Similar to any other attestation service, an auditor's report under this standard is based on an evaluation of management's assertion that the material weakness no longer exists. This standard establishes several conditions that must be met for the auditor to perform this engagement. These conditions were patterned after management's responsibilities under the SEC's rules implementing Section 404 of the Act<sup>10</sup> and the corresponding conditions in Auditing Standard No. 2.<sup>11</sup> These conditions include management accepting

---

<sup>10</sup> See Item 308(a) of Regulation S-K, 17 C.F.R. §229.308(a).

<sup>11</sup> See Paragraph 20 of Auditing Standard No. 2.

responsibility for internal control over financial reporting, evaluating the effectiveness of the specified controls that address the material weakness, asserting that the specified controls are effective in addressing the material weakness, and supporting its assertion with sufficient evidence, including documentation.

The auditor's assurance resulting from this engagement is that the previously reported material weakness, in the auditor's opinion, no longer exists as of a specified date. Although the auditor's evaluation of the design and operating effectiveness of the identified controls generally follows the requirements of PCAOB Auditing Standard No. 2, this engagement is designed to be significantly narrower in scope because the auditor's testing is limited to the controls specifically identified by management as addressing the material weakness. Both management and the auditor use the company's stated control objective as the target for determining whether the specified controls sufficiently address the material weakness. (See Section VI for further discussion of the determination that a material weakness no longer exists.)

## V. Auditor's Report

To communicate clearly the narrow focus of this engagement, the standard requires the auditor's report to describe the material weakness, identify all of the specified controls that management asserts address the material weakness, and identify the stated control objective achieved by these controls. The report also is required to include language to emphasize to readers that the auditor has not performed procedures sufficient to reach conclusions about the effectiveness of any other controls or provided an opinion regarding the effectiveness of internal control over financial reporting overall.<sup>12</sup> Report users should thus understand the limited scope of the auditor's opinion.

To render an opinion that a material weakness no longer exists, the auditor must have obtained evidence about the design and operation of the relevant controls, determined that the material weakness no longer exists, and determined that no scope limitations were placed on the auditor's work. Because of the narrow focus of this engagement, qualified opinions are not permitted. Limitations on the scope of the auditor's work preclude the auditor from rendering an opinion. The auditor's opinion as to whether a previously reported material weakness continues to exist may be expressed as "the material weakness exists" or "the material weakness no longer exists." Accordingly, the standard does not distinguish between an unqualified opinion and an adverse opinion but simply refers to the auditor's opinion.

Unlike an auditor's report on internal control over financial reporting, in which the assessment is required to be as of the date of the annual financial statements, an auditor's report on whether a material weakness continues to exist may be as of any date set by management. The "as of" date of management's assertion represents the day the company believes the material weakness no longer exists and that the company has adequately assessed the effectiveness of the specified controls that address the material weakness. In the event that the auditor begins testing and concludes that additional remediation is required to

---

<sup>12</sup> The SAG Meeting included a discussion about the importance of such a report clearly communicating to report users the scope of the engagement. Several SAG members emphasized the potential for report users to believe, mistakenly, that the auditor, as a result of this limited engagement, had rendered a current opinion regarding the effectiveness of internal control over financial reporting overall. Comments received on the proposed standard generally expressed overall support for the clarity of the proposed auditor's report in this regard.

address the material weakness, the company has the opportunity to re-address its remediation efforts, reset the assertion date, and ask the auditor again to opine on whether the material weakness continues to exist.

If the auditor determines that a material weakness continues to exist and does not issue a report, the standard requires the auditor to communicate to the company's audit committee, in writing, his or her conclusion that the material weakness continues to exist. Similarly, the auditor also has a responsibility to communicate to the audit committee, in writing, any new material weaknesses that the auditor identifies during this engagement that the auditor has not already communicated in writing to the audit committee. The standard also addresses the circumstance in which the auditor reports on fewer than all of the previously reported material weaknesses. In this circumstance, the standard requires the auditor to include language in his or her report stating that his or her previously issued report on management's annual assessment of the company's internal control over financial reporting identified additional material weaknesses, that the auditor is not reporting on those other material weaknesses, and that the auditor, accordingly, is expressing no opinion on whether those material weaknesses exist after the company's year-end.<sup>13</sup>

## VI. Determining that a Material Weakness No Longer Exists

The standard requires the auditor to obtain evidence sufficient to determine whether the design and operation of the controls identified by management achieve the *stated control objectives* and that the material weakness no longer exists. A control objective for internal control over financial reporting generally relates to a relevant financial statement assertion, such as whether certain recorded transactions are genuine, and provides a basis for evaluating the effect of a company's controls on that assertion.<sup>14</sup> A stated control objective in the context of this engagement is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing. For this reason, management and the auditor must be satisfied that, if the stated control objective were achieved, the material weakness would no longer exist.

When a material weakness has a pervasive effect on the company's internal control over financial reporting, identifying the control objectives that are not being met may be difficult because of the large number of control objectives affected. A material weakness related to an ineffective control environment is an example of this situation. If management and the auditor have difficulty in identifying *all* of the stated control objectives affected by a material weakness, the material weakness is probably not suitable for this type of narrow, interim reporting and should be tested, instead, during the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2.

---

<sup>13</sup> Several investors, among others, suggested that, in the circumstance in which additional material weaknesses were previously reported but are not the subject of the auditor's report on whether a material weakness continues to exist, the auditor's report should draw attention to these other material weaknesses. In response to these comments, the standard states that when referring to his or her previously issued report, the auditor is required either to attach that report to his or her report on whether the material weakness continues to exist or to include information about where the previously issued report can be publicly obtained.

<sup>14</sup> See Paragraphs 68 through 70 of Auditing Standard No. 2 for additional information on relevant assertions.

## VII. Using the Work of Others

Auditing Standard No. 4 applies the same framework for using the work of others as the one described in Auditing Standard No. 2. Similar to Auditing Standard No. 2, the standard permits the auditor to use the work of others to alter the nature, timing, and extent of the auditor's performance of work related to this engagement. This framework requires the auditor to obtain the principal evidence supporting his or her opinion and to evaluate the nature of the controls being tested, together with the competence and objectivity of the persons performing the work.

Under both Auditing Standard No. 2 and this standard, the framework measures principal evidence in relation to the overall assurance provided by the auditor. Under Auditing Standard No. 2, the principal evidence supporting the auditor's opinion should be evaluated in relation to the auditor's opinion on internal control over financial reporting overall. Under this standard, the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion needs to be applied at the control objective level. It should be noted, however, that this does not require the auditor to obtain the principal evidence that each control specifically identified in management's assertion as related to the identified control objectives is effective.

There may be some circumstances in which the scope of the audit procedures to be performed in this type of engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. The flexibility that the framework otherwise provides, however, is meant to encourage auditors to evaluate whether opportunities exist to use the work of others in this context.

## VIII. Effective Date of the Standard

The standard will be effective as of the date of SEC approval.

\* \* \*

On the 26th day of July, in the year 2005, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Auditing Standard No. 5

# ***An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements***

Source: Auditing Standard Nos. 8–15; Auditing Standard No. 16.

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007.]

### Introduction

1. This standard establishes requirements and provides direction that applies when an auditor is engaged to perform an audit of **management's assessment**<sup>1</sup> of the effectiveness of **internal control over financial reporting** ("the audit of internal control over financial reporting") that is integrated with an audit of the financial statements.<sup>2</sup>

2. Effective internal control over financial reporting provides reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes.<sup>3</sup> If one or more **material weaknesses** exist, the company's internal control over financial reporting cannot be considered effective.<sup>4</sup>

3. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor's objective in an audit of internal control over financial reporting is to express an opinion on the effectiveness of the company's internal control over financial reporting. Because a company's internal control cannot be considered effective if one or more material weaknesses exist, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain appropriate evidence that is sufficient to obtain reasonable assurance<sup>5</sup> about whether material weaknesses exist as of the date specified in management's assessment. A material weakness in internal control over financial reporting may exist even when financial statements are not materially misstated.

4. The general standards<sup>6</sup> are applicable to an audit of internal control over financial reporting. Those standards require technical training and proficiency as an auditor, independence, and the exercise of due professional care, including

---

<sup>1</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

<sup>2</sup> This auditing standard supersedes Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements*, and is the standard on attestation engagements referred to in Section 404(b) of the Act. It also is the standard referred to in Section 103(a)(2)(A)(iii) of the Act.

<sup>3</sup> See Securities Exchange Act Rules 13a-15(f) and 15d-15(f), 17 C.F.R. §§ 240.13a-15(f) and 240.15d-15(f); Paragraph A5.

<sup>4</sup> See Item 308 of Regulation S-K, 17 C.F.R. § 229.308.

<sup>5</sup> See AU section 230, *Due Professional Care in the Performance of Work*, for further discussion of the concept of reasonable assurance in an audit.

<sup>6</sup> See AU section 150, *Generally Accepted Auditing Standards*.

professional skepticism. This standard establishes the fieldwork and reporting standards applicable to an audit of internal control over financial reporting.

5. The auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting.<sup>7</sup>

## Integrating the Audits

6. The audit of internal control over financial reporting should be integrated with the audit of the financial statements. The objectives of the audits are not identical, however, and the auditor must plan and perform the work to achieve the objectives of both audits.

7. In an integrated audit of internal control over financial reporting and the financial statements, the auditor should design his or her testing of controls to accomplish the objectives of both audits simultaneously—

- To obtain sufficient evidence to support the auditor's opinion on internal control over financial reporting as of year-end, and
- To obtain sufficient evidence to support the auditor's control risk assessments for purposes of the audit of financial statements.

8. Obtaining sufficient evidence to support control risk assessments of low for purposes of the financial statement audit ordinarily allows the auditor to reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements. (See Appendix B for additional direction on integration.)

Note: In some circumstances, particularly in some audits of smaller and less complex companies, the auditor might choose not to assess control risk as low for purposes of the audit of the financial statements. In such circumstances, the auditor's tests of the operating effectiveness of controls would be performed principally for the purpose of supporting his or her opinion on whether the company's internal control over financial reporting is effective as of year-end. The results of the auditor's financial statement auditing procedures also should inform his or her risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

## Planning the Audit

9. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should properly plan the audit of internal control over financial reporting and properly supervise the engagement team members. When planning an integrated audit, the auditor should evaluate whether the following matters are important to the company's financial statements and internal control over financial reporting and, if so, how they will affect the auditor's procedures—

---

<sup>7</sup> See Securities Exchange Act Rules 13a-15(c) and 15d-15(c), 17 C.F.R. §§ 240.13a-15(c) and 240.15d-15(c). SEC rules require management to base its evaluation of the effectiveness of the company's internal control over financial reporting on a suitable, recognized control framework (also known as control criteria) established by a body or group that followed due-process procedures, including the broad distribution of the framework for public comment. For example, the report of the Committee of Sponsoring Organizations of the Treadway Commission (known as the COSO report) provides such a framework, as does the report published by the Financial Reporting Council, Internal Control Revised Guidance for Directors on the Combined Code, October 2005 (known as the Turnbull Report).

- Knowledge of the company's internal control over financial reporting obtained during other engagements performed by the auditor;
- Matters affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes;
- Matters relating to the company's business, including its organization, operating characteristics, and capital structure;
- The extent of recent changes, if any, in the company, its operations, or its internal control over financial reporting;
- The auditor's preliminary judgments about materiality, risk, and other factors relating to the determination of material weaknesses;
- Control deficiencies previously communicated to the audit committee<sup>8</sup> or management;
- Legal or regulatory matters of which the company is aware;
- The type and extent of available evidence related to the effectiveness of the company's internal control over financial reporting;
- Preliminary judgments about the effectiveness of internal control over financial reporting;
- Public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and the effectiveness of the company's internal control over financial reporting;
- Knowledge about risks related to the company evaluated as part of the auditor's client acceptance and retention evaluation; and
- The relative complexity of the company's operations.

Note: Many smaller companies have less complex operations. Additionally, some larger, complex companies may have less complex units or processes. Factors that might indicate less complex operations include: fewer business lines; less complex business processes and financial reporting systems; more centralized accounting functions; extensive involvement by senior management in the day-to-day activities of the business; and fewer levels of management, each with a wide span of control.

## Role of Risk Assessment

10. Risk assessment underlies the entire audit process described by this standard, including the determination of **significant accounts and disclosures** and **relevant assertions**, the selection of controls to test, and the determination of the evidence necessary for a given control.

11. A direct relationship exists between the degree of risk that a material weakness could exist in a particular area of the company's internal control over financial reporting and the amount of audit attention that should be devoted to that area. In addition, the risk that a company's internal control over financial reporting will fail to prevent or detect misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error. The auditor should focus more of his or her attention on the areas of highest risk. On the other hand,

---

<sup>8</sup> If no audit committee exists, all references to the audit committee in this standard apply to the entire board of directors of the company. See 15 U.S.C. §§ 78c(a)58 and 7201(a)(3).

it is not necessary to test controls that, even if deficient, would not present a reasonable possibility of material misstatement to the financial statements.

12. The complexity of the organization, business unit, or process, will play an important role in the auditor's risk assessment and the determination of the necessary procedures.

## Scaling the Audit

13. The size and complexity of the company, its business processes, and business units, may affect the way in which the company achieves many of its **control objectives**. The size and complexity of the company also might affect the risks of misstatement and the controls necessary to address those risks. Scaling is most effective as a natural extension of the risk-based approach and applicable to the audits of all companies. Accordingly, a smaller, less complex company, or even a larger, less complex company might achieve its control objectives differently than a more complex company.<sup>9</sup>

## Addressing the Risk of Fraud

14. When planning and performing the audit of internal control over financial reporting, the auditor should take into account the results of his or her fraud risk assessment.<sup>10</sup> As part of identifying and testing entity-level controls, as discussed beginning at paragraph 22, and selecting other controls to test, as discussed beginning at paragraph 39, the auditor should evaluate whether the company's controls sufficiently address identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls. Controls that might address these risks include—

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.

15. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If the auditor identifies deficiencies in controls designed to prevent or detect fraud during the audit of internal control over financial reporting, the auditor should take into account those deficiencies when developing his or her response to risks of material misstatement during the financial statement audit, as provided in paragraphs 65–69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

---

<sup>9</sup> The SEC Advisory Committee on Smaller Public Companies considered a company's size with respect to compliance with the internal control reporting provisions of the Act. See Advisory Committee on Smaller Public Companies to the United States Securities and Exchange Commission, Final Report, at p. 5 (April 23, 2006).

<sup>10</sup> See Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, regarding identifying risks that may result in material misstatement due to fraud. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

## Using the Work of Others

**16.** The auditor should evaluate the extent to which he or she will use the work of others to reduce the work the auditor might otherwise perform himself or herself. AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, applies in an integrated audit of the financial statements and internal control over financial reporting.

**17.** For purposes of the audit of internal control, however, the auditor may use the work performed by, or receive direct assistance from, internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee that provides evidence about the effectiveness of internal control over financial reporting. In an integrated audit of internal control over financial reporting and the financial statements, the auditor also may use this work to obtain evidence supporting the auditor's assessment of control risk for purposes of the audit of the financial statements.

**18.** The auditor should assess the competence and objectivity of the persons whose work the auditor plans to use to determine the extent to which the auditor may use their work. The higher the degree of competence and objectivity, the greater use the auditor may make of the work. The auditor should apply paragraphs .09–.11 of AU section 322 to assess the competence and objectivity of internal auditors. The auditor should apply the principles underlying those paragraphs to assess the competence and objectivity of persons other than internal auditors whose work the auditor plans to use.

Note: For purposes of using the work of others, competence means the attainment and maintenance of a level of understanding and knowledge that enables that person to perform ably the tasks assigned to them, and objectivity means the ability to perform those tasks impartially and with intellectual honesty. To assess competence, the auditor should evaluate factors about the person's qualifications and ability to perform the work the auditor plans to use. To assess objectivity, the auditor should evaluate whether factors are present that either inhibit or promote a person's ability to perform with the necessary degree of objectivity the work the auditor plans to use.

Note: The auditor should not use the work of persons who have a low degree of objectivity, regardless of their level of competence. Likewise, the auditor should not use the work of persons who have a low level of competence regardless of their degree of objectivity. Personnel whose core function is to serve as a testing or compliance authority at the company, such as internal auditors, normally are expected to have greater competence and objectivity in performing the type of work that will be useful to the auditor.

**19.** The extent to which the auditor may use the work of others in an audit of internal control also depends on the risk associated with the control being tested. As the risk associated with a control increases, the need for the auditor to perform his or her own work on the control increases.

## Materiality

**20.** In planning the audit of internal control over financial reporting, the auditor should use the same materiality considerations he or she would use in planning the audit of the company's annual financial statements.<sup>11</sup>

---

<sup>11</sup> See Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, which provides additional explanation of materiality. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

## Using a Top-Down Approach

21. The auditor should use a top-down approach to the audit of internal control over financial reporting to select the controls to test. A top-down approach begins at the financial statement level and with the auditor's understanding of the overall risks to internal control over financial reporting. The auditor then focuses on entity-level controls and works down to significant accounts and disclosures and their relevant assertions. This approach directs the auditor's attention to accounts, disclosures, and assertions that present a reasonable possibility of material misstatement to the **financial statements and related disclosures**. The auditor then verifies his or her understanding of the risks in the company's processes and selects for testing those controls that sufficiently address the assessed risk of misstatement to each relevant assertion.

Note: The top-down approach describes the auditor's sequential thought process in identifying risks and the controls to test, not necessarily the order in which the auditor will perform the auditing procedures.

## Identifying Entity-Level Controls

22. The auditor must test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal control over financial reporting. The auditor's evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise would have performed on other controls.

23. Entity-level controls vary in nature and precision—

- Some entity-level controls, such as certain control environment controls, have an important, but indirect, effect on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.
- Some entity-level controls monitor the effectiveness of other controls. Such controls might be designed to identify possible breakdowns in lower-level controls, but not at a level of precision that would, by themselves, sufficiently address the assessed risk that misstatements to a relevant assertion will be prevented or detected on a timely basis. These controls, when operating effectively, might allow the auditor to reduce the testing of other controls.
- Some entity-level controls might be designed to operate at a level of precision that would adequately prevent or detect on a timely basis misstatements to one or more relevant assertions. If an entity-level control sufficiently addresses the assessed risk of misstatement, the auditor need not test additional controls relating to that risk.

24. Entity-level controls include—

- Controls related to the control environment;
- Controls over management override;

Note: Controls over management override are important to effective internal control over financial reporting for all companies, and may be particularly important at smaller companies because

of the increased involvement of senior management in performing controls and in the period-end financial reporting process. For smaller companies, the controls that address the risk of management override might be different from those at a larger company. For example, a smaller company might rely on more detailed oversight by the audit committee that focuses on the risk of management override.

- The company's risk assessment process;
- Centralized processing and controls, including shared service environments;
- Controls to monitor results of operations;
- Controls to monitor other controls, including activities of the internal audit function, the audit committee, and self-assessment programs;
- Controls over the period-end financial reporting process; and
- Policies that address significant business control and risk management practices.

**25. *Control Environment.*** Because of its importance to effective internal control over financial reporting, the auditor must evaluate the control environment at the company. As part of evaluating the control environment, the auditor should assess—

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and
- Whether the Board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

**26. *Period-end Financial Reporting Process.*** Because of its importance to financial reporting and to the auditor's opinions on internal control over financial reporting and the financial statements, the auditor must evaluate the period-end financial reporting process. The period-end financial reporting process includes the following—

- Procedures used to enter transaction totals into the general ledger;
- Procedures related to the selection and application of accounting policies;
- Procedures used to initiate, authorize, record, and process journal entries in the general ledger;
- Procedures used to record recurring and nonrecurring adjustments to the annual and quarterly financial statements; and
- Procedures for preparing annual and quarterly financial statements and related disclosures.

Note: Because the annual period-end financial reporting process normally occurs after the "as-of" date of management's assessment, those controls usually cannot be tested until after the as-of date.

**27.** As part of evaluating the period-end financial reporting process, the auditor should assess—

- Inputs, procedures performed, and outputs of the processes the company uses to produce its annual and quarterly financial statements;
- The extent of information technology ("IT") involvement in the period-end financial reporting process;
- Who participates from management;
- The locations involved in the period-end financial reporting process;
- The types of adjusting and consolidating entries; and
- The nature and extent of the oversight of the process by management, the board of directors, and the audit committee.

Note: The auditor should obtain sufficient evidence of the effectiveness of those quarterly controls that are important to determining whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion as of the date of management's assessment. However, the auditor is not required to obtain sufficient evidence for each quarter individually.

## Identifying Significant Accounts and Disclosures and Their Relevant Assertions

**28.** The auditor should identify significant accounts and disclosures and their relevant assertions. Relevant assertions are those financial statement assertions that have a reasonable possibility of containing a misstatement that would cause the financial statements to be materially misstated. The financial statement assertions include<sup>12</sup>—

- Existence or occurrence
- Completeness
- Valuation or allocation
- Rights and obligations
- Presentation and disclosure

Note: The auditor may base his or her work on assertions that differ from those in this standard if the auditor has selected and tested controls over the pertinent risks in each significant account and disclosure that have a reasonable possibility of containing misstatements that would cause the financial statements to be materially misstated.

**29.** To identify significant accounts and disclosures and their relevant assertions, the auditor should evaluate the qualitative and quantitative risk factors related to the financial statement line items and disclosures. Risk factors relevant to the identification of significant accounts and disclosures and their relevant assertions include—

- Size and composition of the account;
- Susceptibility to misstatement due to errors or fraud;
- Volume of activity, complexity, and homogeneity of the individual transactions processed through the account or reflected in the disclosure;

---

<sup>12</sup> See Auditing Standard No. 15, *Audit Evidence*, which provides additional information on financial statement assertions. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

- Nature of the account or disclosure;
- Accounting and reporting complexities associated with the account or disclosure;
- Exposure to losses in the account;
- Possibility of significant contingent liabilities arising from the activities reflected in the account or disclosure;
- Existence of related party transactions in the account; and
- Changes from the prior period in account or disclosure characteristics.

**30.** As part of identifying significant accounts and disclosures and their relevant assertions, the auditor also should determine the likely sources of potential misstatements that would cause the financial statements to be materially misstated. The auditor might determine the likely sources of potential misstatements by asking himself or herself "what could go wrong?" within a given significant account or disclosure.

**31.** The risk factors that the auditor should evaluate in the identification of significant accounts and disclosures and their relevant assertions are the same in the audit of internal control over financial reporting as in the audit of the financial statements; accordingly, significant accounts and disclosures and their relevant assertions are the same for both audits.

Note: In the financial statement audit, the auditor might perform substantive auditing procedures on financial statement accounts, disclosures and assertions that are not determined to be significant accounts and disclosures and relevant assertions.<sup>13</sup>

**32.** The components of a potential significant account or disclosure might be subject to significantly differing risks. If so, different controls might be necessary to adequately address those risks.

**33.** When a company has multiple locations or business units, the auditor should identify significant accounts and disclosures and their relevant assertions based on the consolidated financial statements. Having made those determinations, the auditor should then apply the direction in Appendix B for multiple locations scoping decisions.

## Understanding Likely Sources of Misstatement

**34.** To further understand the likely sources of potential misstatements, and as a part of selecting the controls to test, the auditor should achieve the following objectives—

- Understand the flow of transactions related to the relevant assertions, including how these transactions are initiated, authorized, processed, and recorded;

---

<sup>13</sup> This is because his or her assessment of the risk that undetected misstatement would cause the financial statements to be materially misstated is unacceptably high (see paragraph 14 of Auditing Standard No. 14, *Evaluating Auditing Results*, for further discussion about undetected misstatement) or as a means of introducing unpredictability in the procedures performed (see paragraph 61 and paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, for further discussion about predictability of auditing procedures). [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

- Verify that the auditor has identified the points within the company's processes at which a misstatement—including a misstatement due to fraud—could arise that, individually or in combination with other misstatements, would be material;
- Identify the controls that management has implemented to address these potential misstatements; and
- Identify the controls that management has implemented over the prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could result in a material misstatement of the financial statements.

**35.** Because of the degree of judgment required, the auditor should either perform the procedures that achieve the objectives in paragraph 34 himself or herself or supervise the work of others who provide direct assistance to the auditor, as described in AU section 322.

**36.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor also should understand how IT affects the company's flow of transactions. The auditor should apply paragraph 29 and Appendix B of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, which discuss the effect of information technology on internal control over financial reporting and the risks to assess.

Note: The identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the top-down approach used to identify significant accounts and disclosures and their relevant assertions, and the controls to test, as well as to assess risk and allocate audit effort as described by this standard.

**37. Performing Walkthroughs.** Performing walkthroughs will frequently be the most effective way of achieving the objectives in paragraph 34. In performing a walkthrough, the auditor follows a transaction from origination through the company's processes, including information systems, until it is reflected in the company's financial records, using the same documents and information technology that company personnel use. Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and re-performance of controls.

**38.** In performing a walkthrough, at the points at which important processing procedures occur, the auditor questions the company's personnel about their understanding of what is required by the company's prescribed procedures and controls. These probing questions, combined with the other walkthrough procedures, allow the auditor to gain a sufficient understanding of the process and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, probing questions that go beyond a narrow focus on the single transaction used as the basis for the walkthrough allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

## Selecting Controls to Test

**39.** The auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion.

40. There might be more than one control that addresses the assessed risk of misstatement to a particular relevant assertion; conversely, one control might address the assessed risk of misstatement to more than one relevant assertion. It is neither necessary to test all controls related to a relevant assertion nor necessary to test redundant controls, unless redundancy is itself a control objective.

41. The decision as to whether a control should be selected for testing depends on which controls, individually or in combination, sufficiently address the assessed risk of misstatement to a given relevant assertion rather than on how the control is labeled (e.g., entity-level control, transaction-level control, control activity, monitoring control, **preventive control**, **detective control**).

## Testing Controls

### Testing Design Effectiveness

42. The auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements.

Note: A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organization. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.

43. Procedures the auditor performs to test design effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.

### Testing Operating Effectiveness

44. The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

Note: In some situations, particularly in smaller companies, a company might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for a company's financial reporting and associated controls, the auditor may take into account the combined competence of company personnel and other parties that assist with functions related to financial reporting.

45. Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

## Relationship of Risk to the Evidence to be Obtained

**46.** For each control selected for testing, the evidence necessary to persuade the auditor that the control is effective depends upon the risk associated with the control. The risk associated with a control consists of the risk that the control might not be effective and, if not effective, the risk that a material weakness would result. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.

Note: Although the auditor must obtain evidence about the effectiveness of controls for each relevant assertion, the auditor is not responsible for obtaining sufficient evidence to support an opinion about the effectiveness of each individual control. Rather, the auditor's objective is to express an opinion on the company's internal control over financial reporting overall. This allows the auditor to vary the evidence obtained regarding the effectiveness of individual controls selected for testing based on the risk associated with the individual control.

**47.** Factors that affect the risk associated with a control include—

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) and assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls, especially controls that monitor other controls;
- The nature of the control and the frequency with which it operates;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective); and

Note: A less complex company or business unit with simple business processes and centralized accounting operations might have relatively simple information systems that make greater use of off-the-shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the IT general controls that are important to the effective operation of those application controls.

- The complexity of the control and the significance of the judgments that must be made in connection with its operation.

Note: Generally, a conclusion that a control is not operating effectively can be supported by less evidence than is necessary to support a conclusion that a control is operating effectively.

**48.** When the auditor identifies deviations from the company's controls, he or she should determine the effect of the deviations on his or her assessment of the risk associated with the control being tested and the evidence to be obtained, as well as on the operating effectiveness of the control.

Note: Because effective internal control over financial reporting cannot, and does not, provide absolute assurance of achieving the company's control objectives, an individual control does not necessarily have to operate without any deviation to be considered effective.

**49.** The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing may provide sufficient evidence in relation to the risk associated with the control.

Note: Walkthroughs usually consist of a combination of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control and might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthrough and the results of those procedures.

**50. *Nature of Tests of Controls.*** Some types of tests, by their nature, produce greater evidence of the effectiveness of controls than other tests. The following tests that the auditor might perform are presented in order of the evidence that they ordinarily would produce, from least to most: inquiry, observation, inspection of relevant documentation, and re-performance of a control.

Note: Inquiry alone does not provide sufficient evidence to support a conclusion about the effectiveness of a control.

**51.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The nature of the tests of effectiveness that will provide appropriate evidence depends, to a large degree, on the nature of the control to be tested, including whether the operation of the control results in documentary evidence of its operation. Documentary evidence of the operation of some controls, such as management's philosophy and operating style, might not exist.

Note: A smaller, less complex company or unit might have less formal documentation regarding the operation of its controls. In those situations, testing controls through inquiry combined with other procedures, such as observation of activities, inspection of less formal documentation, or re-performance of certain controls, might provide sufficient evidence about whether the control is effective.

**52. *Timing of Tests of Controls.*** Testing controls over a greater period of time provides more evidence of the effectiveness of controls than testing over a shorter period of time. Further, testing performed closer to the date of management's assessment provides more evidence than testing performed earlier in the year. The auditor should balance performing the tests of controls closer to the as-of date with the need to test controls over a sufficient period of time to obtain sufficient evidence of operating effectiveness.

**53.** Prior to the date specified in management's assessment, management might implement changes to the company's controls to make them more effective or efficient or to address control deficiencies. If the auditor determines that the new controls achieve the related objectives of the control criteria and have been in effect for a sufficient period to permit the auditor to assess their design and operating effectiveness by performing tests of controls, he or she will not need to test the design and operating effectiveness of the superseded controls for purposes of expressing an opinion on internal control over financial reporting. If the operating effectiveness of the superseded controls is important to the auditor's control risk assessment, the auditor should test the design and operating effectiveness of those superseded controls, as appropriate. (See additional direction on integration beginning at paragraph B1.)

**54. *Extent of Tests of Controls.*** The more extensively a control is tested, the greater the evidence obtained from that test.

**55. *Roll-Forward Procedures.*** When the auditor reports on the effectiveness of controls as of a specific date and obtains evidence about the operating effectiveness of controls at an interim date, he or she should determine what additional evidence concerning the operation of the controls for the remaining period is necessary.

**56.** The additional evidence that is necessary to update the results of testing from an interim date to the company's year-end depends on the following factors—

- The specific control tested prior to the as-of date, including the risks associated with the control and the nature of the control, and the results of those tests;
- The sufficiency of the evidence of effectiveness obtained at an interim date;
- The length of the remaining period; and
- The possibility that there have been any significant changes in internal control over financial reporting subsequent to the interim date.

Note: In some circumstances, such as when evaluation of the foregoing factors indicates a low risk that the controls are no longer effective during the roll-forward period, inquiry alone might be sufficient as a roll-forward procedure.

## Special Considerations for Subsequent Years' Audits

**57.** In subsequent years' audits, the auditor should incorporate knowledge obtained during past audits he or she performed of the company's internal control over financial reporting into the decision-making process for determining the nature, timing, and extent of testing necessary. This decision-making process is described in paragraphs 46–56.

**58.** Factors that affect the risk associated with a control in subsequent years' audits include those in paragraph 47 and the following—

- The nature, timing, and extent of procedures performed in previous audits,
- The results of the previous years' testing of the control, and
- Whether there have been changes in the control or the process in which it operates since the previous audit.

**59.** After taking into account the risk factors identified in paragraphs 47 and 58, the additional information available in subsequent years' audits might permit the auditor to assess the risk as lower than in the initial year. This, in turn, might permit the auditor to reduce testing in subsequent years.

**60.** The auditor may also use a benchmarking strategy for automated application controls in subsequent years' audits. Benchmarking is described further beginning at paragraph B28.

**61.** In addition, the auditor should vary the nature, timing, and extent of testing of controls from year to year to introduce unpredictability into the testing and respond to changes in circumstances. For this reason, each year the auditor might test controls at a different interim period, increase or reduce the number and types of tests performed, or change the combination of procedures used.

## Evaluating Identified Deficiencies

**62.** The auditor must evaluate the severity of each control **deficiency** that comes to his or her attention to determine whether the deficiencies, individually or in combination, are material weaknesses as of the date of management's assessment. In planning and performing the audit, however, the auditor is not required to search for deficiencies that, individually or in combination, are less severe than a material weakness.

**63.** The severity of a deficiency depends on—

- Whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement of an account balance or disclosure; and
- The magnitude of the potential misstatement resulting from the deficiency or deficiencies.

**64.** The severity of a deficiency does not depend on whether a misstatement actually has occurred but rather on whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement.

**65.** Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following—

- The nature of the financial statement accounts, disclosures, and assertions involved;
- The susceptibility of the related asset or liability to loss or fraud;
- The subjectivity, complexity, or extent of judgment required to determine the amount involved;
- The interaction or relationship of the control with other controls, including whether they are interdependent or redundant;
- The interaction of the deficiencies; and
- The possible future consequences of the deficiency.

Note: The evaluation of whether a control deficiency presents a reasonable possibility of misstatement can be made without quantifying the probability of occurrence as a specific percentage or range.

Note: Multiple control deficiencies that affect the same financial statement account balance or disclosure increase the likelihood

of misstatement and may, in combination, constitute a material weakness, even though such deficiencies may individually be less severe. Therefore, the auditor should determine whether individual control deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control collectively result in a material weakness.

**66.** Factors that affect the magnitude of the misstatement that might result from a deficiency or deficiencies in controls include, but are not limited to, the following—

- The financial statement amounts or total of transactions exposed to the deficiency; and
- The volume of activity in the account balance or class of transactions exposed to the deficiency that has occurred in the current period or that is expected in future periods.

**67.** In evaluating the magnitude of the potential misstatement, the maximum amount that an account balance or total of transactions can be overstated is generally the recorded amount, while understatements could be larger. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

**68.** The auditor should evaluate the effect of compensating controls when determining whether a control deficiency or combination of deficiencies is a material weakness. To have a mitigating effect, the compensating control should operate at a level of precision that would prevent or detect a misstatement that could be material.

## Indicators of Material Weaknesses

**69.** Indicators of material weaknesses in internal control over financial reporting include—

- Identification of fraud, whether or not material, on the part of senior management;<sup>14</sup>
- Restatement of previously issued financial statements to reflect the correction of a material misstatement;<sup>15</sup>
- Identification by the auditor of a material misstatement of financial statements in the current period in circumstances that indicate that the misstatement would not have been detected by the company's internal control over financial reporting; and
- Ineffective oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee.

**70.** When evaluating the severity of a deficiency, or combination of deficiencies, the auditor also should determine the level of detail and degree of assurance that would satisfy prudent officials in the conduct of their own affairs that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with

---

<sup>14</sup> For the purpose of this indicator, the term "senior management" includes the principal executive and financial officers signing the company's certifications as required under Section 302 of the Act as well as any other members of senior management who play a significant role in the company's financial reporting process.

<sup>15</sup> See Financial Accounting Standards Board Statement No. 154, *Accounting Changes and Error Corrections*, regarding the correction of a misstatement.

generally accepted accounting principles. If the auditor determines that a deficiency, or combination of deficiencies, might prevent prudent officials in the conduct of their own affairs from concluding that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles, then the auditor should treat the deficiency, or combination of deficiencies, as an indicator of a material weakness.

## Wrapping-Up

### Forming an Opinion

**71.** The auditor should form an opinion on the effectiveness of internal control over financial reporting by evaluating evidence obtained from all sources, including the auditor's testing of controls, misstatements detected during the financial statement audit, and any identified control deficiencies.

Note: As part of this evaluation, the auditor should review reports issued during the year by internal audit (or similar functions) that address controls related to internal control over financial reporting and evaluate control deficiencies identified in those reports.

**72.** After forming an opinion on the effectiveness of the company's internal control over financial reporting, the auditor should evaluate the presentation of the elements that management is required, under the SEC's rules, to present in its annual report on internal control over financial reporting.<sup>16</sup>

**73.** If the auditor determines that any required elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should follow the direction in paragraph C2.

**74.** The auditor may form an opinion on the effectiveness of internal control over financial reporting only when there have been no restrictions on the scope of the auditor's work. A scope limitation requires the auditor to disclaim an opinion or withdraw from the engagement (see paragraphs C3–C7).

### Obtaining Written Representations

**75.** In an audit of internal control over financial reporting, the auditor should obtain written representations from management—

- a.* Acknowledging management's responsibility for establishing and maintaining effective internal control over financial reporting;
- b.* Stating that management has performed an evaluation and made an assessment of the effectiveness of the company's internal control over financial reporting and specifying the control criteria;
- c.* Stating that management did not use the auditor's procedures performed during the audits of internal control over financial reporting or the financial statements as part of the basis for management's assessment of the effectiveness of internal control over financial reporting;

---

<sup>16</sup> See Item 308(a) of Regulations S-B and S-K, 17 C.F.R. §§ 228.308(a) and 229.308(a).

- d. Stating management's conclusion, as set forth in its assessment, about the effectiveness of the company's internal control over financial reporting based on the control criteria as of a specified date;
- e. Stating that management has disclosed to the auditor all deficiencies in the design or operation of internal control over financial reporting identified as part of management's evaluation, including separately disclosing to the auditor all such deficiencies that it believes to be significant deficiencies or material weaknesses in internal control over financial reporting;
- f. Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a material misstatement to the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting;
- g. Stating whether control deficiencies identified and communicated to the audit committee during previous engagements pursuant to paragraphs 78 and 80 have been resolved, and specifically identifying any that have not; and
- h. Stating whether there were, subsequent to the date being reported on, any changes in internal control over financial reporting or other factors that might significantly affect internal control over financial reporting, including any corrective actions taken by management with regard to significant deficiencies and material weaknesses.

**76.** The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the audit. As discussed further in paragraph C3, when the scope of the audit is limited, the auditor should either withdraw from the engagement or disclaim an opinion. Further, the auditor should evaluate the effects of management's refusal on his or her ability to rely on other representations, including those obtained in the audit of the company's financial statements.

**77.** AU section 333, *Management Representations*, explains matters such as who should sign the letter, the period to be covered by the letter, and when to obtain an updated letter.

## Communicating Certain Matters

**78.** The auditor must communicate, in writing, to management and the audit committee all material weaknesses identified during the audit. The written communication should be made prior to the issuance of the auditor's report on internal control over financial reporting.

**79.** If the auditor concludes that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that conclusion in writing to the board of directors.

**80.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

The auditor also should consider whether there are any deficiencies, or combinations of deficiencies, that have been identified during the audit that are **significant deficiencies** and must communicate such deficiencies, in writing,

to the audit committee. This communication should be made in a timely manner and prior to the issuance of the auditor's report on internal control over financial reporting.

**81.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

The auditor also should communicate to management, in writing, all deficiencies in internal control over financial reporting (i.e., those deficiencies in internal control over financial reporting that are of a lesser magnitude than material weaknesses) identified during the audit and inform the audit committee when such a communication has been made. The auditor should communicate this information to the audit committee in a timely manner and prior to the issuance of the auditor's report on internal control over financial reporting. When making this communication, it is not necessary for the auditor to repeat information about such deficiencies that has been included in previously issued written communications, whether those communications were made by the auditor, internal auditors, or others within the organization.

**82.** The auditor is not required to perform procedures that are sufficient to identify all control deficiencies; rather, the auditor communicates deficiencies in internal control over financial reporting of which he or she is aware.

**83.** Because the audit of internal control over financial reporting does not provide the auditor with assurance that he or she has identified all deficiencies less severe than a material weakness, the auditor should not issue a report stating that no such deficiencies were noted during the audit.

**84.** When auditing internal control over financial reporting, the auditor may become aware of fraud or possible illegal acts. In such circumstances, the auditor must determine his or her responsibilities under AU section 316, *Consideration of Fraud in a Financial Statement Audit*, AU section 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.<sup>17</sup>

## Reporting on Internal Control

**85.** The auditor's report on the audit of internal control over financial reporting must include the following elements<sup>18</sup>—

- a. A title that includes the word *independent*;
- b. A statement that management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting;
- c. An identification of management's report on internal control;
- d. A statement that the auditor's responsibility is to express an opinion on the company's internal control over financial reporting based on his or her audit;
- e. A definition of internal control over financial reporting as stated in paragraph A5;
- f. A statement that the audit was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);

---

<sup>17</sup> See 15 U.S.C. § 78j-1.

<sup>18</sup> See Appendix C, which provides direction on modifications to the auditor's report that are required in certain circumstances.

- g. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects;
- h. A statement that an audit includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances;
- i. A statement that the auditor believes the audit provides a reasonable basis for his or her opinion;
- j. A paragraph stating that, because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;
- k. The auditor's opinion on whether the company maintained, in all material respects, effective internal control over financial reporting as of the specified date, based on the control criteria;
- l. The manual or printed signature of the auditor's firm;
- m. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and
- n. The date of the audit report.

## Separate or Combined Reports

**86.** The auditor may choose to issue a combined report (i.e., one report containing both an opinion on the financial statements and an opinion on internal control over financial reporting) or separate reports on the company's financial statements and on internal control over financial reporting.

**87.** The following example combined report expressing an unqualified opinion on financial statements and an unqualified opinion on internal control over financial reporting illustrates the report elements described in this section.

### Report of Independent Registered Public Accounting Firm

#### *[Introductory paragraph]*

We have audited the accompanying balance sheets of W Company as of December 31, 20X8 and 20X7, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 20X8. We also have audited W Company's internal control over financial reporting as of December 31, 20X8, based on *[Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."]*. W Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *[title of management's report]*. Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

*[Scope paragraph]*

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

*[Definition paragraph]*

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

*[Inherent limitations paragraph]*

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

*[Opinion paragraph]*

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of W Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on *[Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."]*.

*[Signature]*

*[City and State or Country]*

*[Date]*

**88.** If the auditor chooses to issue a separate report on internal control over financial reporting, he or she should add the following paragraph to the auditor's report on the financial statements—

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), W Company's internal control over financial reporting as of December 31, 20X8, based on *[identify control criteria]* and our report dated *[date of report, which should be the same as the date of the report on the financial statements]* expressed *[include nature of opinion]*.

The auditor also should add the following paragraph to the report on internal control over financial reporting—

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the *[identify financial statements]* of W Company and our report dated *[date of report, which should be the same as the date of the report on the effectiveness of internal control over financial reporting]* expressed *[include nature of opinion]*.

## Report Date

**89.** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient appropriate evidence to support the auditor's opinion. Because the auditor cannot audit internal control over financial reporting without also auditing the financial statements, the reports should be dated the same.

## Material Weaknesses

**90.** Paragraphs 62–70 describe the evaluation of deficiencies. If there are deficiencies that, individually or in combination, result in one or more material weaknesses, the auditor must express an adverse opinion on the company's internal control over financial reporting, unless there is a restriction on the scope of the engagement.<sup>19</sup>

**91.** When expressing an adverse opinion on internal control over financial reporting because of a material weakness, the auditor's report must include—

- The definition of a material weakness, as provided in paragraph A7.
- A statement that a material weakness has been identified and an identification of the material weakness described in management's assessment.

Note: If the material weakness has not been included in management's assessment, the report should be modified to state that a material weakness has been identified but not included in management's assessment. Additionally, the auditor's report should include a description of the material weakness, which should provide the users of the audit report with specific information about the nature of the material weakness and its actual and potential effect on the presentation of the company's financial statements

---

<sup>19</sup> See paragraph C3 for direction when the scope of the engagement has been limited.

issued during the existence of the weakness. In this case, the auditor also should communicate in writing to the audit committee that the material weakness was not disclosed or identified as a material weakness in management's assessment. If the material weakness has been included in management's assessment but the auditor concludes that the disclosure of the material weakness is not fairly presented in all material respects, the auditor's report should describe this conclusion as well as the information necessary to fairly describe the material weakness.

**92.** The auditor should determine the effect his or her adverse opinion on internal control has on his or her opinion on the financial statements. Additionally, the auditor should disclose whether his or her opinion on the financial statements was affected by the adverse opinion on internal control over financial reporting.

Note: If the auditor issues a separate report on internal control over financial reporting in this circumstance, the disclosure required by this paragraph may be combined with the report language described in paragraphs 88 and 91. The auditor may present the combined language either as a separate paragraph or as part of the paragraph that identifies the material weakness.

## Subsequent Events

**93.** Changes in internal control over financial reporting or other factors that might significantly affect internal control over financial reporting might occur subsequent to the date as of which internal control over financial reporting is being audited but before the date of the auditor's report. The auditor should inquire of management whether there were any such changes or factors and obtain written representations from management relating to such matters, as described in paragraph 75*h*.

**94.** To obtain additional information about whether changes have occurred that might affect the effectiveness of the company's internal control over financial reporting and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following—

- Relevant internal audit (or similar functions, such as loan review in a financial institution) reports issued during the subsequent period,
- Independent auditor reports (if other than the auditor's) of deficiencies in internal control,
- Regulatory agency reports on the company's internal control over financial reporting, and
- Information about the effectiveness of the company's internal control over financial reporting obtained through other engagements.

**95.** The auditor might inquire about and examine other documents for the subsequent period. Paragraphs .01–.09 of AU section 560, *Subsequent Events*, provide direction on subsequent events for a financial statement audit that also may be helpful to the auditor performing an audit of internal control over financial reporting.

**96.** If the auditor obtains knowledge about subsequent events that materially and adversely affect the effectiveness of the company's internal control over financial reporting as of the date specified in the assessment, the auditor should issue an adverse opinion on internal control over financial reporting (and follow the direction in paragraph C2 if management's assessment states that internal

control over financial reporting is effective). If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the company's internal control over financial reporting, the auditor should disclaim an opinion. As described in paragraph C13, the auditor should disclaim an opinion on management's disclosures about corrective actions taken by the company after the date of management's assessment, if any.

**97.** The auditor may obtain knowledge about subsequent events with respect to conditions that did not exist at the date specified in the assessment but arose subsequent to that date and before issuance of the auditor's report. If a subsequent event of this type has a material effect on the company's internal control over financial reporting, the auditor should include in his or her report an explanatory paragraph describing the event and its effects or directing the reader's attention to the event and its effects as disclosed in management's report.

**98.** After the issuance of the report on internal control over financial reporting, the auditor may become aware of conditions that existed at the report date that might have affected the auditor's opinion had he or she been aware of them. The auditor's evaluation of such subsequent information is similar to the auditor's evaluation of information discovered subsequent to the date of the report on an audit of financial statements, as described in AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

## Appendix A

### Definitions

A1. For purposes of this standard, the terms listed below are defined as follows—

A2. A **control objective** provides a specific target against which to evaluate the effectiveness of controls. A control objective for internal control over financial reporting generally relates to a relevant assertion and states a criterion for evaluating whether the company's control procedures in a specific area provide reasonable assurance that a misstatement or omission in that relevant assertion is prevented or detected by controls on a timely basis.

A3. A **deficiency** in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

- A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.
- A deficiency in *operation* exists when a properly designed control does not operate as designed, or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

A4. **Financial statements and related disclosures** refers to a company's financial statements and notes to the financial statements as presented in accordance with generally accepted accounting principles ("GAAP"). References to financial statements and related disclosures do not extend to the preparation of management's discussion and analysis or other similar financial information presented outside a company's GAAP-basis financial statements and notes.

A5. **Internal control over financial reporting** is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP and includes those policies and procedures that—

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.<sup>1</sup>

---

<sup>1</sup> See Securities Exchange Act Rules 13a-15(f) and 15d-15(f), 17 C.F.R. §§ 240.13a-15(f) and 240.15d-15(f).

Note: The auditor's procedures as part of either the audit of internal control over financial reporting or the audit of the financial statements are not part of a company's internal control over financial reporting.

Note: Internal control over financial reporting has inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements will not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

A6. **Management's assessment** is the assessment described in Item 308(a)(3) of Regulations S-B and S-K that is included in management's annual report on internal control over financial reporting.<sup>2</sup>

A7. A **material weakness** is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a **reasonable possibility** that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Note: There is a **reasonable possibility** of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in Financial Accounting Standards Board Statement No. 5, Accounting for Contingencies ("FAS 5").<sup>3</sup>

A8. Controls over financial reporting may be **preventive controls** or **detective controls**. Effective internal control over financial reporting often includes a combination of preventive and detective controls.

- Preventive controls have the objective of preventing errors or fraud that could result in a misstatement of the financial statements from occurring.
- Detective controls have the objective of detecting errors or fraud that has already occurred that could result in a misstatement of the financial statements.

A9. A **relevant assertion** is a financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.

A10. An account or disclosure is a **significant account or disclosure** if there is a reasonable possibility that the account or disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements, considering the risks of both overstatement and understatement. The determination of whether an account or disclosure is significant is based on inherent risk, without regard to the effect of controls.

A11. A **significant deficiency** is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

---

<sup>2</sup> See 17 C.F.R. §§ 228.308(a)(3) and 229.308(a)(3).

<sup>3</sup> See FAS 5, paragraph 3.

## Appendix B

### Special Topics

#### Integration of Audits

B1. *Tests of Controls in an Audit of Internal Control.* The objective of the tests of controls in an audit of internal control over financial reporting is to obtain evidence about the effectiveness of controls to support the auditor's opinion on the company's internal control over financial reporting. The auditor's opinion relates to the effectiveness of the company's internal control over financial reporting as of a *point in time* and *taken as a whole*.

B2. To express an opinion on internal control over financial reporting as of a point in time, the auditor should obtain evidence that internal control over financial reporting has operated effectively for a sufficient period of time, which may be less than the entire period (ordinarily one year) covered by the company's financial statements. To express an opinion on internal control over financial reporting taken as a whole, the auditor must obtain evidence about the effectiveness of selected controls over all relevant assertions. This requires that the auditor test the design and operating effectiveness of controls he or she ordinarily would not test if expressing an opinion only on the financial statements.

B3. When concluding on the effectiveness of internal control over financial reporting for purposes of expressing an opinion on internal control over financial reporting, the auditor should incorporate the results of any additional tests of controls performed to achieve the objective related to expressing an opinion on the financial statements, as discussed in the following section.

B4. *Tests of Controls in an Audit of Financial Statements.* To express an opinion on the financial statements, the auditor ordinarily performs tests of controls and substantive procedures. The objective of the tests of controls the auditor performs for this purpose is to assess control risk. To assess control risk for specific financial statement assertions at less than the maximum, the auditor is required to obtain evidence that the relevant controls operated effectively during the *entire period* upon which the auditor plans to place reliance on those controls. However, the auditor is not required to assess control risk at less than the maximum for *all* relevant assertions and, for a variety of reasons, the auditor may choose not to do so.

B5. When concluding on the effectiveness of controls for the purpose of assessing control risk, the auditor also should evaluate the results of any additional tests of controls performed to achieve the objective related to expressing an opinion on the company's internal control over financial reporting, as discussed in paragraph B2. Consideration of these results may require the auditor to alter the nature, timing, and extent of substantive procedures and to plan and perform further tests of controls, particularly in response to identified control deficiencies.

B6. *Effect of Tests of Controls on Substantive Procedures.* If, during the audit of internal control over financial reporting, the auditor identifies a deficiency, he or she should determine the effect of the deficiency, if any, on the nature, timing, and extent of substantive procedures to be performed to reduce audit risk in the audit of the financial statements to an appropriately low level.

B7. Regardless of the assessed level of control risk or the assessed risk of material misstatement in connection with the audit of the financial statements,

the auditor should perform substantive procedures for all relevant assertions. Performing procedures to express an opinion on internal control over financial reporting does not diminish this requirement.

**B8. *Effect of Substantive Procedures on the Auditor's Conclusions About the Operating Effectiveness of Controls.*** In an audit of internal control over financial reporting, the auditor should evaluate the effect of the findings of the substantive auditing procedures performed in the audit of financial statements on the effectiveness of internal control over financial reporting. This evaluation should include, at a minimum—

- The auditor's risk assessments in connection with the selection and application of substantive procedures, especially those related to fraud.
- Findings with respect to illegal acts and related party transactions.
- Indications of management bias in making accounting estimates and in selecting accounting principles.
- Misstatements detected by substantive procedures. The extent of such misstatements might alter the auditor's judgment about the effectiveness of controls.

**B9.** To obtain evidence about whether a selected control is effective, the control must be tested directly; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures. The absence of misstatements detected by substantive procedures, however, should inform the auditor's risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

## Multiple Locations Scoping Decisions

**B10.** In determining the locations or business units at which to perform tests of controls, the auditor should assess the risk of material misstatement to the financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk.

*Note:* The auditor may eliminate from further consideration locations or business units that, individually or when aggregated with others, do not present a reasonable possibility of material misstatement to the company's consolidated financial statements.

**B11.** In assessing and responding to risk, the auditor should test controls over specific risks that present a reasonable possibility of material misstatement to the company's consolidated financial statements. In lower-risk locations or business units, the auditor first might evaluate whether testing entity-level controls, including controls in place to provide assurance that appropriate controls exist throughout the organization, provides the auditor with sufficient evidence.

**B12.** In determining the locations or business units at which to perform tests of controls, the auditor may take into account work performed by others on behalf of management. For example, if the internal auditors' planned procedures include relevant audit work at various locations, the auditor may coordinate work with the internal auditors and reduce the number of locations or business units at which the auditor would otherwise need to perform auditing procedures.

**B13.** The direction in paragraph 61 regarding special considerations for subsequent years' audits means that the auditor should vary the nature, timing, and extent of testing of controls at locations or business units from year to year.

B14. *Special Situations*. The scope of the audit should include entities that are acquired on or before the date of management's assessment and operations that are accounted for as discontinued operations on the date of management's assessment. The direction in this multiple-locations discussion describes how to determine whether it is necessary to test controls at these entities or operations.

B15. For equity method investments, the scope of the audit should include controls over the reporting in accordance with generally accepted accounting principles, in the company's financial statements, of the company's portion of the investees' income or loss, the investment balance, adjustments to the income or loss and investment balance, and related disclosures. The audit ordinarily would not extend to controls at the equity method investee.

B16. In situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner. In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the scope paragraph in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting. Additionally, the auditor should evaluate the reasonableness of management's conclusion that the situation meets the criteria of the SEC's allowed exclusion and the appropriateness of any required disclosure related to such a limitation. If the auditor believes that management's disclosure about the limitation requires modification, the auditor should follow the same communication responsibilities that are described in paragraphs .29–.32 of AU section 722, *Interim Financial Information*. If management and the audit committee do not respond appropriately, in addition to fulfilling those responsibilities, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons why the auditor believes management's disclosure requires modification.

## Use of Service Organizations

B17. AU section 324, *Service Organizations*, applies to the audit of financial statements of a company that obtains services from another organization that are part of the company's information system. The auditor may apply the relevant concepts described in AU section 324 to the audit of internal control over financial reporting.

B18. AU section 324.03 describes the situation in which a service organization's services are part of a company's information system. If the service organization's services are part of a company's information system, as described therein, then they are part of the information and communication component of the company's internal control over financial reporting. When the service organization's services are part of the company's internal control over financial reporting, the auditor should include the activities of the service organization when determining the evidence required to support his or her opinion.

B19. AU section 324.07–.16 describe the procedures that the auditor should perform with respect to the activities performed by the service organization. The procedures include—

- a. Obtaining an understanding of the controls at the service organization that are relevant to the entity's internal control and the controls at the user organization over the activities of the service organization, and

- b. Obtaining evidence that the controls that are relevant to the auditor's opinion are operating effectively.

B20. Evidence that the controls that are relevant to the auditor's opinion are operating effectively may be obtained by following the procedures described in AU section 324.12. These procedures include—

- a. Obtaining a service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed-upon procedures that describes relevant tests of controls.

Note: The service auditor's report referred to above means a report with the service auditor's opinion on the service organization's description of the design of its controls, the tests of controls, and results of those tests performed by the service auditor, and the service auditor's opinion on whether the controls tested were operating effectively during the specified period (in other words, "reports on controls placed in operation and tests of operating effectiveness" described in AU section 324.24b). A service auditor's report that does not include tests of controls, results of the tests, and the service auditor's opinion on operating effectiveness (in other words, "reports on controls placed in operation" described in AU section 324.24a) does not provide evidence of operating effectiveness. Furthermore, if the evidence regarding operating effectiveness of controls comes from an agreed-upon procedures report rather than a service auditor's report issued pursuant to AU section 324, the auditor should evaluate whether the agreed-upon procedures report provides sufficient evidence in the same manner described in the following paragraph.

- b. Performing tests of the user organization's controls over the activities of the service organization (e.g., testing the user organization's independent re-performance of selected items processed by the service organization or testing the user organization's reconciliation of output reports with source documents).
- c. Performing tests of controls at the service organization.

B21. If a service auditor's report on controls placed in operation and tests of operating effectiveness is available, the auditor may evaluate whether this report provides sufficient evidence to support his or her opinion. In evaluating whether such a service auditor's report provides sufficient evidence, the auditor should assess the following factors—

- The time period covered by the tests of controls and its relation to the as-of date of management's assessment,
- The scope of the examination and applications covered, the controls tested, and the way in which tested controls relate to the company's controls, and
- The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls.

Note: These factors are similar to factors the auditor would consider in determining whether the report provides sufficient evidence to support the auditor's assessed level of control risk in an audit of the financial statements, as described in AU section 324.16.

B22. If the service auditor's report on controls placed in operation and tests of operating effectiveness contains a qualification that the stated control objectives might be achieved only if the company applies controls contemplated in

the design of the system by the service organization, the auditor should evaluate whether the company is applying the necessary procedures.

B23. In determining whether the service auditor's report provides sufficient evidence to support the auditor's opinion, the auditor should make inquiries concerning the service auditor's reputation, competence, and independence. Appropriate sources of information concerning the professional reputation of the service auditor are discussed in paragraph .10a of AU section 543, *Part of Audit Performed by Other Independent Auditors*.

B24. When a significant period of time has elapsed between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment, additional procedures should be performed. The auditor should inquire of management to determine whether management has identified any changes in the service organization's controls subsequent to the period covered by the service auditor's report (such as changes communicated to management from the service organization, changes in personnel at the service organization with whom management interacts, changes in reports or other data received from the service organization, changes in contracts or service level agreements with the service organization, or errors identified in the service organization's processing). If management has identified such changes, the auditor should evaluate the effect of such changes on the effectiveness of the company's internal control over financial reporting. The auditor also should evaluate whether the results of other procedures he or she performed indicate that there have been changes in the controls at the service organization.

B25. The auditor should determine whether to obtain additional evidence about the operating effectiveness of controls at the service organization based on the procedures performed by management or the auditor and the results of those procedures and on an evaluation of the following risk factors. As risk increases, the need for the auditor to obtain additional evidence increases.

- The elapsed time between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment,
- The significance of the activities of the service organization,
- Whether there are errors that have been identified in the service organization's processing, and
- The nature and significance of any changes in the service organization's controls identified by management or the auditor.

B26. If the auditor concludes that additional evidence about the operating effectiveness of controls at the service organization is required, the auditor's additional procedures might include—

- Evaluating procedures performed by management and the results of those procedures.
- Contacting the service organization, through the user organization, to obtain specific information.
- Requesting that a service auditor be engaged to perform procedures that will supply the necessary information.
- Visiting the service organization and performing such procedures.

B27. The auditor should not refer to the service auditor's report when expressing an opinion on internal control over financial reporting.

## Benchmarking of Automated Controls

B28. Entirely automated application controls are generally not subject to breakdowns due to human failure. This feature allows the auditor to use a "benchmarking" strategy.

B29. If general controls over program changes, access to programs, and computer operations are effective and continue to be tested, and if the auditor verifies that the automated application control has not changed since the auditor established a baseline (i.e., last tested the application control), the auditor may conclude that the automated application control continues to be effective without repeating the prior year's specific tests of the operation of the automated application control. The nature and extent of the evidence that the auditor should obtain to verify that the control has not changed may vary depending on the circumstances, including depending on the strength of the company's program change controls.

B30. The consistent and effective functioning of the automated application controls may be dependent upon the related files, tables, data, and parameters. For example, an automated application for calculating interest income might be dependent on the continued integrity of a rate table used by the automated calculation.

B31. To determine whether to use a benchmarking strategy, the auditor should assess the following risk factors. As these factors indicate lower risk, the control being evaluated might be well-suited for benchmarking. As these factors indicate increased risk, the control being evaluated is less suited for benchmarking. These factors are—

- The extent to which the application control can be matched to a defined program within an application.
- The extent to which the application is stable (i.e., there are few changes from period to period).
- The availability and reliability of a report of the compilation dates of the programs placed in production. (This information may be used as evidence that controls within the program have not changed.)

B32. Benchmarking automated application controls can be especially effective for companies using purchased software when the possibility of program changes is remote—e.g., when the vendor does not allow access or modification to the source code.

B33. After a period of time, the length of which depends upon the circumstances, the baseline of the operation of an automated application control should be reestablished. To determine when to reestablish a baseline, the auditor should evaluate the following factors—

- The effectiveness of the IT control environment, including controls over application and system software acquisition and maintenance, access controls and computer operations.
- The auditor's understanding of the nature of changes, if any, on the specific programs that contain the controls.
- The nature and timing of other related tests.
- The consequences of errors associated with the application control that was benchmarked.

- Whether the control is sensitive to other business factors that may have changed. For example, an automated control may have been designed with the assumption that only positive amounts will exist in a file. Such a control would no longer be effective if negative amounts (credits) begin to be posted to the account.

## Appendix C

### Special Reporting Situations

#### Report Modifications

C1. The auditor should modify his or her report if any of the following conditions exist.

- a. Elements of management's annual report on internal control are incomplete or improperly presented,
- b. There is a restriction on the scope of the engagement,
- c. The auditor decides to refer to the report of other auditors as the basis, in part, for the auditor's own report,
- d. There is other information contained in management's annual report on internal control over financial reporting, or
- e. Management's annual certification pursuant to Section 302 of the Sarbanes-Oxley Act is misstated.

C2. *Elements of Management's Annual Report on Internal Control Over Financial Reporting Are Incomplete or Improperly Presented.* If the auditor determines that elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should modify his or her report to include an explanatory paragraph describing the reasons for this determination. If the auditor determines that the required disclosure about a material weakness is not fairly presented in all material respects, the auditor should follow the direction in paragraph 91.

C3. *Scope Limitations.* The auditor can express an opinion on the company's internal control over financial reporting only if the auditor has been able to apply the procedures necessary in the circumstances. If there are restrictions on the scope of the engagement, the auditor should withdraw from the engagement or disclaim an opinion. A disclaimer of opinion states that the auditor does not express an opinion on the effectiveness of internal control over financial reporting.

C4. When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the audit was not sufficient to warrant the expression of an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an audit of internal control over financial reporting (paragraph 85 *g*, *h*, and *i*); to do so might overshadow the disclaimer.

C5. When the auditor plans to disclaim an opinion and the limited procedures performed by the auditor caused the auditor to conclude that a material weakness exists, the auditor's report also should include—

- The definition of a material weakness, as provided in paragraph A7.
- A description of any material weaknesses identified in the company's internal control over financial reporting. This description should provide the users of the audit report with specific information about the nature of any material weakness and its actual and potential effect on the presentation of the company's financial statements issued during the existence of the weakness. This description also should address the requirements in paragraph 91.

C6. The auditor may issue a report disclaiming an opinion on internal control over financial reporting as soon as the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion. The auditor is not required to perform any additional work prior to issuing a disclaimer when the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion.

*[The following note is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Note: In this case, in following the direction in paragraph 89 regarding dating the auditor's report, the report date is the date that the auditor has obtained sufficient appropriate evidence to support the representations in the auditor's report.

C7. If the auditor concludes that he or she cannot express an opinion because there has been a limitation on the scope of the audit, the auditor should communicate, in writing, to management and the audit committee that the audit of internal control over financial reporting cannot be satisfactorily completed.

C8. *Opinions Based, in Part, on the Report of Another Auditor.* When another auditor has audited the financial statements and internal control over financial reporting of one or more subsidiaries, divisions, branches, or components of the company, the auditor should determine whether he or she may serve as the principal auditor and use the work and reports of another auditor as a basis, in part, for his or her opinion. AU section 543, *Part of Audit Performed by Other Independent Auditors*, provides direction on the auditor's decision of whether to serve as the principal auditor of the financial statements. If the auditor decides it is appropriate to serve as the principal auditor of the financial statements, then that auditor also should be the principal auditor of the company's internal control over financial reporting. This relationship results from the requirement that an audit of the financial statements must be performed to audit internal control over financial reporting; only the principal auditor of the financial statements can be the principal auditor of internal control over financial reporting. In this circumstance, the principal auditor of the financial statements must participate sufficiently in the audit of internal control over financial reporting to provide a basis for serving as the principal auditor of internal control over financial reporting.

C9. When serving as the principal auditor of internal control over financial reporting, the auditor should decide whether to make reference in the report on internal control over financial reporting to the audit of internal control over financial reporting performed by the other auditor. In these circumstances, the auditor's decision is based on factors analogous to those of the auditor who uses the work and reports of other independent auditors when reporting on a company's financial statements as described in AU section 543.

C10. The decision about whether to make reference to another auditor in the report on the audit of internal control over financial reporting might differ from the corresponding decision as it relates to the audit of the financial statements. For example, the audit report on the financial statements may make reference to the audit of a significant equity investment performed by another independent auditor, but the report on internal control over financial reporting might not make a similar reference because management's assessment of internal control over financial reporting ordinarily would not extend to controls at the equity method investee.<sup>1</sup>

---

<sup>1</sup> See paragraph B15, for further discussion of the evaluation of the controls over financial reporting for an equity method investment.

C11. When the auditor decides to make reference to the report of the other auditor as a basis, in part, for his or her opinion on the company's internal control over financial reporting, the auditor should refer to the report of the other auditor when describing the scope of the audit and when expressing the opinion.

C12. *Management's Annual Report on Internal Control Over Financial Reporting Containing Additional Information.* Management's annual report on internal control over financial reporting may contain information in addition to the elements described in paragraph 72 that are subject to the auditor's evaluation.

C13. If management's annual report on internal control over financial reporting could reasonably be viewed by users of the report as including such additional information, the auditor should disclaim an opinion on the information.

C14. If the auditor believes that management's additional information contains a material misstatement of fact, he or she should discuss the matter with management. If, after discussing the matter with management, the auditor concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee, in writing, of the auditor's views concerning the information. AU section 317, *Illegal Acts by Clients* and Section 10A of the Securities Exchange Act of 1934 may also require the auditor to take additional action.<sup>2</sup>

Note: If management makes the types of disclosures described in paragraph C12 outside its annual report on internal control over financial reporting and includes them elsewhere within its annual report on the company's financial statements, the auditor would not need to disclaim an opinion. However, in that situation, the auditor's responsibilities are the same as those described in this paragraph if the auditor believes that the additional information contains a material misstatement of fact.

C15. *Management's Annual Certification Pursuant to Section 302 of the Sarbanes-Oxley Act is Misstated.* If matters come to the auditor's attention as a result of the audit of internal control over financial reporting that lead him or her to believe that modifications to the disclosures about changes in internal control over financial reporting (addressing changes in internal control over financial reporting occurring during the fourth quarter) are necessary for the annual certifications to be accurate and to comply with the requirements of Section 302 of the Act and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), whichever applies,<sup>3</sup> the auditor should follow the communication responsibilities as described in AU section 722, *Interim Financial Information*, for any interim period. However, if management and the audit committee do not respond appropriately, in addition to the responsibilities described in AU section 722, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons the auditor believes management's disclosures should be modified.

## Filings Under Federal Securities Statutes

C16. AU section 711, *Filings Under Federal Securities Statutes*, describes the auditor's responsibilities when an auditor's report is included in registration statements, proxy statements, or periodic reports filed under the federal securities statutes. The auditor should apply AU section 711 with respect to the

---

<sup>2</sup> See 15 U.S.C. § 78j-1.

<sup>3</sup> See 17 C.F.R. §§ 240.13a-14(a) and 240.15d-14(a).

auditor's report on internal control over financial reporting included in such filings. In addition, the auditor should extend the direction in AU section 711.10 to inquire of and obtain written representations from officers and other executives responsible for financial and accounting matters about whether any events have occurred that have a material effect on the audited financial statements to matters that could have a material effect on internal control over financial reporting.

C17. When the auditor has fulfilled these responsibilities and intends to consent to the inclusion of his or her report on internal control over financial reporting in the securities filing, the auditor's consent should clearly indicate that both the audit report on financial statements and the audit report on internal control over financial reporting (or both opinions if a combined report is issued) are included in his or her consent.

### PCAOB Release No. 2007-005A

June 12, 2007

PCAOB Rulemaking  
Docket Matter No. 021

## Summary

After public comment, the Public Company Accounting Oversight Board is adopting Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, as well as an independence rule and conforming amendments to the Board's auditing standards.

## Board Contact

Sharon Virag, Associate Chief Auditor (202/207-9164)

\*\*\*\*\*

## 1. Introduction

In 2002, Congress passed the Sarbanes-Oxley Act (the "Act"), which, among other things, established new provisions related to internal control over financial reporting. Section 404 of the Act requires company management to assess and report on the effectiveness of the company's internal control. It also requires a company's independent auditor, registered with the Public Company Accounting Oversight Board ("PCAOB" or "Board"), to attest to management's disclosures regarding the effectiveness of its internal control. As directed by Sections 103 and 404 of the Act, the Board established a standard to govern the newly required audit by adopting Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2").<sup>1</sup> The Securities and Exchange Commission ("Commission" or "SEC") approved Auditing Standard No. 2 on June 17, 2004.<sup>2</sup>

Since Auditing Standard No. 2 became effective, the Board has closely monitored the progress registered firms have made in implementing its requirements. The PCAOB's monitoring has included gathering information during inspections of registered public accounting firms; participating, along with the SEC, in two roundtable discussions with representatives of issuers, auditors, investor groups, and others; meeting with its Standing Advisory Group; receiving feedback from participants in the Board's Forums on Auditing in the Small Business Environment; and reviewing academic, government, and other reports and studies.

As a result of this monitoring, two basic propositions emerged.<sup>3</sup> First, the audit of internal control over financial reporting has produced significant benefits,

---

<sup>1</sup> See PCAOB Release No. 2004-001 (March 9, 2004).

<sup>2</sup> See Securities Exchange Act Release No. 49884 (June 17, 2004).

<sup>3</sup> See Proposed Auditing Standard: *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements and Related Other Proposals*, PCAOB Release No. 2006-007 (Dec. 19, 2006).

including an enhanced focus on corporate governance and controls and higher quality financial reporting. Second, these benefits have come at a significant cost. Costs have been greater than expected and, at times, the related effort has appeared greater than necessary to conduct an effective audit of internal control over financial reporting.

As part of a four-point plan to improve implementation of the internal control requirements, the Board determined to amend Auditing Standard No. 2.<sup>4</sup> On December 19, 2006, the Board proposed for comment a new standard on auditing internal control, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that would replace Auditing Standard No. 2. The Board also proposed a related auditing standard, *Considering and Using the Work of Others in an Audit*, an independence rule relating to the auditor's provision of internal control-related non-audit services, and conforming amendments to its auditing standards.<sup>5</sup>

The Board issued these proposals with the primary objectives of focusing auditors on the most important matters in the audit of internal control over financial reporting and eliminating procedures that the Board believes are unnecessary to an effective audit of internal control. The proposals were designed to both increase the likelihood that material weaknesses in companies' internal control will be found before they cause material misstatement of the financial statements and steer the auditor away from procedures that are not necessary to achieve the intended benefits. The Board also sought to make the internal control audit more clearly scalable for smaller and less complex public companies and to make the text of the standard easier to understand. In formulating these proposals, the Board re-evaluated every significant aspect of Auditing Standard No. 2.

The Board received 175 comment letters on its proposals. The Board also discussed the proposals with its Standing Advisory Group on February 22, 2007.<sup>6</sup> A large majority of commenters were generally supportive of the Board's proposals, particularly the top-down, risk-based approach and focus on the most important matters. Based on the comments received, the Board believes that the proposal achieves, in large part, the objectives the Board set out when deciding to amend Auditing Standard No. 2. Many commenters also offered suggestions to improve the final standard, which the Board has carefully analyzed.

In considering the comments received and formulating a final standard, the Board closely coordinated its work with the SEC, which proposed guidance for management on evaluating internal control at the same time that the Board issued its proposals.<sup>7</sup> In addition to its role in implementing Section 404(a) of the Act, the SEC must approve new PCAOB auditing standards before they can become effective.<sup>8</sup> On April 4, 2007, the Commission held a public meeting to discuss the Board's proposals and the coordination of those proposals with the

---

<sup>4</sup> See PCAOB Press Release, "Board Announces Four-Point Plan to Improve Implementation of Internal Control Reporting Requirements" (May 17, 2006). The other aspects of the plan are: (1) reinforcing auditor efficiency through PCAOB inspections; (2) developing or facilitating development of implementation guidance for auditors of smaller public companies; and (3) continuing PCAOB Forums on Auditing in the Small Business Environment.

<sup>5</sup> Proposed Auditing Standard: *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements and Related Other Proposals*, PCAOB Release No. 2006-007 (Dec. 19, 2006).

<sup>6</sup> A transcript of the portion of the meeting that related to the proposals and an archived web cast of the entire meeting are available on the Board's Web site at [http://pcaobus.org/News/Events/Documents/02222007\\_SAGMeeting/SAG\\_Transcript.pdf](http://pcaobus.org/News/Events/Documents/02222007_SAGMeeting/SAG_Transcript.pdf).

<sup>7</sup> See Securities Exchange Act Release No. 54976 (Dec. 20, 2006).

<sup>8</sup> See Section 107 of the Act.

Commission's proposed management guidance. At the meeting, the SEC staff provided the Commission its analysis of the public comments on the PCAOB's proposal and the proposed management guidance. The Commission endorsed the recommendations of its staff and directed its staff to focus its remaining work in four areas:

- "Aligning the PCAOB's new auditing standard ... with the SEC's proposed new management guidance under Section 404, particularly with regard to prescriptive requirements, definitions, and terms";
- "Scaling the 404 audit to account for the particular facts and circumstances of companies, particularly smaller companies";
- "Encouraging auditors to use professional judgment in the 404 process, particularly in using risk-assessment"; and
- "Following a principles-based approach to determining when and to what extent the auditor can use the work of others."<sup>9</sup>

After careful consideration of the comments it received and the input from the SEC, the Board has refined its proposals to provide additional clarity and further help auditors to focus on the most important matters. The Board has decided to adopt the revised standard on auditing internal control as Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* ("Auditing Standard No. 5"), to supersede Auditing Standard No. 2. The Board has also decided to adopt the independence rule and conforming amendments to the auditing standards.<sup>10</sup>

## 2. Notable Areas of Change in the Final Standard

As stated above, the Board believes that the changes made to the proposal reflect refinements, rather than significant shifts in approach. This section describes the areas of change to the proposals that are most notable. Appendix 4 contains additional discussion of comments received on the proposals and the Board's response.

### A. Alignment with management guidance

On December 20, 2006, the SEC issued proposed guidance to help management evaluate internal control for purposes of its annual assessment. In formulating a new standard on auditing internal control, the Board sought to describe an audit process that would be coordinated with management's evaluation process. Many commenters suggested, however, that the SEC's management guidance and the Board's standard should be more closely aligned.

After considering the comments in this area, the Board has decided to make changes that will improve the coordination between the SEC's management guidance and the Board's standard. In doing so, the Board has been mindful of the inherent differences in the roles of management and the auditor. Management's daily involvement with its internal control system provides it with knowledge and information that may influence its judgments about how best to evaluate internal control and the sufficiency of the evidence it needs for its

---

<sup>9</sup> See SEC Press Release, "SEC Commissioners Endorse Improved Sarbanes-Oxley Implementation To Ease Smaller Company Burdens, Focusing Effort On 'What Truly Matters'" (Apr. 4, 2007).

<sup>10</sup> As discussed below, the Board has determined not to adopt the proposed auditing standard on considering and using the work of others.

annual assessment. Management also should be able to rely on self-assessment and, more generally, the monitoring component of internal control, provided the monitoring component is properly designed and operates effectively.

The auditor is required to provide an independent opinion on the effectiveness of the company's internal control over financial reporting. The auditor does not have the familiarity with the company's controls that management has and does not interact with or observe these controls with the same frequency as management. Therefore, the auditor cannot obtain sufficient evidence to support an opinion on the effectiveness of internal control based solely on observation of or interaction with the company's controls. Rather, the auditor needs to perform procedures such as inquiry, observation, and inspection of documents, or walk-throughs, which consist of a combination of those procedures, in order to fully understand and identify the likely sources of potential misstatements, while management might be aware of those risk areas on an on-going basis.

The Board believes, however, that the general concepts necessary to an understanding of internal control should be described in the same way in the Board's standard and in the SEC's guidance. Accordingly, the Board has decided to use the same definition of material weakness in its standard that the SEC uses in its final management guidance and related rules. In addition, the Board is adopting the definition of significant deficiencies that the SEC has proposed. The final standard and final management guidance also describe the same indicators of a material weakness. In addition, as described more fully below, the final standard on auditing internal control uses the term "entity-level controls" instead of "company-level controls," which was used in the proposed standard, in order to use the same term as the SEC uses in its final management guidance.<sup>11</sup> Auditing Standard No. 5's discussion of the effect of these controls is also consistent with the discussion of the same topic in the SEC's final guidance.

### ***B. The top-down approach***

The proposed standard on auditing internal control was structured around the top-down approach to identifying the most important controls to test. This approach follows the same principles that apply to the financial statement audit—the auditor determines the areas of focus through the identification of significant accounts and disclosures and relevant assertions. Under the proposed standard, the auditor would specifically identify major classes of transactions and significant processes before identifying the controls to test.

In response to comments about the level of detail in the requirements of the proposed standard, the Board has reconsidered whether the final standard should include the identification of major classes of transactions and significant processes as a specifically required step in the top-down approach. As a practical matter, the auditor will generally need to understand the company's processes to appropriately identify the correct controls to test. The Board believes, however, that specific requirements directing the auditor how to obtain that understanding are unnecessary and could contribute to a "checklist approach" to compliance, particularly for auditors who have a long-standing familiarity with the company. Accordingly, the Board has removed the requirements to identify major classes of transactions and significant processes from the final standard. While this should allow auditors to apply more professional judgment as they work through the top-down approach, the end point is the same as in

---

<sup>11</sup> These terms were used interchangeably in the proposed standard and SEC's proposed management guidance and, for these purposes, they mean the same thing. See Securities Exchange Act Release No. 54976 (Dec. 20, 2006), at 12 fn. 29.

the proposed standard—the requirement to test those controls that address the assessed risk of misstatement to each relevant assertion.<sup>12</sup>

### ***C. Emphasis on fraud controls***

The proposed standard on auditing internal control discussed fraud controls and the auditor's procedures related to these controls among the testing concepts included near the end of the standard. Commenters suggested that the placement of the discussion, or the lack of specificity regarding the controls that should be deemed fraud controls, failed to properly emphasize these controls or provide auditors with sufficient direction on how to test fraud controls. In response, the Board has made several changes in the final standard.

First, the discussion of fraud risk and anti-fraud controls has been moved closer to the beginning of the standard to emphasize to auditors the relative importance of these matters in assessing risk throughout the top-down approach.<sup>13</sup> Incorporating the auditor's fraud risk assessment—required in the financial statement audit—into the auditor's planning process for the audit of internal control should promote audit quality as well as better integration. While internal control cannot provide absolute assurance that fraud will be prevented or detected, these controls should help to reduce instances of fraud, and, therefore, a concerted focus on fraud controls in the internal control audit should enhance investor protection. Second, management fraud has also been identified in the final standard as an area of higher risk; accordingly, the auditor should focus more of his or her attention on this area.<sup>14</sup> Finally, the standard, as adopted, provides additional guidance on the types of controls that might address fraud risk.<sup>15</sup>

### ***D. Entity-level controls***

The proposed standard on auditing internal control emphasized entity-level controls because of their importance both to the auditor's ability to appropriately tailor the audit through a top-down approach—specifically by identifying and testing the most important controls—and to effective internal control. Additionally, the proposed standard emphasized that these controls might, depending on the circumstances, allow the auditor to reduce the testing of controls at the process level. Commenters suggested that the proposed standard did not provide enough direction on how entity-level controls can significantly reduce testing, and some suggested that controls that operate at the level of precision necessary to do so are uncommon. Many commenters suggested incorporating in the final standard the discussion of direct versus indirect entity-level controls that was included in the SEC's proposed management guidance.

The Board continues to believe that entity-level controls, depending on how they are designed and operate, can reduce the testing of other controls related to a relevant assertion. This is either because the entity-level control sufficiently addresses the risk related to the relevant assertion, or because the entity-level controls provide some assurance so that the testing of other controls related to that assertion can be reduced. In response to comments and in order to clarify these concepts, the Board included in the final standard a discussion of three broad categories of entity-level controls, which vary in nature and precision,

---

<sup>12</sup> See paragraph 21.

<sup>13</sup> See paragraphs 14 and 15.

<sup>14</sup> See paragraph 11.

<sup>15</sup> See paragraph 14.

along with an explanation of how each category might have a different effect on the performance of tests of other controls.<sup>16</sup>

The final standard explains that some controls, such as certain control environment controls, have an important, but indirect effect, on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.

The final standard explains that other entity-level controls may not operate at the level of precision necessary to eliminate the need for testing of other controls, but can reduce the required level of testing of other controls, sometimes substantially. This is because the auditor obtains some of the supporting evidence related to a control from an entity-level control and the remaining necessary evidence from the testing of the control at the process level. Controls that monitor the operation of other controls are the best example of these types of controls. These monitoring controls help provide assurance that the controls that address a particular risk are effective and, therefore, they can provide some evidence about the effectiveness of those lower-level controls, reducing the testing of those controls that otherwise would be necessary.

Lastly, the final standard explains that some entity-level controls might operate at a level of precision that, without the need for other controls, sufficiently addresses the risk of misstatement to a relevant assertion. If a control sufficiently addresses the risk in this manner, the auditor does not need to test other controls related to that risk.

### ***E. Walkthroughs***

The proposed standard on auditing internal control would have required auditors to perform a walkthrough of each significant process each year. This proposed requirement represented a change from Auditing Standard No. 2, which required a walkthrough of each major class of transactions within a significant process. Commenters were split on the question of whether the re-calibration from major class of transactions to significant process in the proposed standard would result in a reduction of effort. Some issuers and auditors suggested that walkthroughs are already being performed on significant processes, while other issuers and auditors commented that this proposed requirement would make a difference. A few commenters suggested that a walkthrough of each significant process was insufficient and would negatively affect audit quality, but many others stated that walkthroughs should not be required at all.

In evaluating these comments, the Board focused principally on the objectives it believes are achieved through a properly performed walkthrough. The Board firmly believes that those objectives should be met for the auditor to verify that he or she has a sufficient understanding of the points within the processes where misstatements could occur and to properly identify the controls to test.<sup>17</sup> Procedures that fulfill those objectives also play an important role in the evaluation of the effectiveness of the design of the controls. The Board believes that, in some instances, the requirement to perform a walkthrough may have overshadowed the objectives it was meant to achieve. This may have resulted in some walkthroughs being performed to meet the requirement but failing to achieve the intended purpose. The final standard, therefore, focuses specifically

---

<sup>16</sup> See paragraph 23. The Board believes that expertise of auditors and companies in the area of entity-level controls will continue to evolve. For example, the Committee of Sponsoring Organizations of the Treadway Commission has begun a project on the monitoring component of internal control that may provide some guidance in this area.

<sup>17</sup> See paragraph 34, which describes these objectives.

on achieving certain important objectives, and the performance requirement is based on fulfilling those objectives as they relate to the understanding of likely sources of misstatement and the selection of controls to test.<sup>18</sup> While a walkthrough will frequently be the best way of attaining these goals, the auditor's focus should be on the objectives, not on the mechanics of the walkthrough. In some cases, other procedures may be equally or more effective means of achieving them.

### ***F. Evaluation and communication of deficiencies***

The proposed standard on auditing internal control required the auditor to evaluate the severity of identified control deficiencies to determine whether they are significant deficiencies or material weaknesses. It then required the auditor to communicate, in writing, to management and the audit committee all significant deficiencies and material weaknesses identified during the audit. The proposed standard defined "significant deficiency" as "a control deficiency, or combination of control deficiencies, such that there is a reasonable possibility that a significant misstatement of the company's annual or interim financial statements will not be prevented or detected." The term "significant misstatement" was defined, in turn, to mean "a misstatement that is less than material yet important enough to merit attention by those responsible for oversight of the company's financial reporting."

Commenters generally supported the proposed definition of the term "significant misstatement," though some were concerned that it was too subjective. Other commenters questioned whether the standard should include a definition of significant deficiency and a requirement to communicate significant deficiencies to the audit committee. At least one commenter suggested that the term be removed from the standard.

After considering these comments, the Board has determined to make changes to the definition of significant deficiency and related requirements.<sup>19</sup> The Board continues to believe that the standard should require auditors to provide relevant information about important control deficiencies—even those less severe than a material weakness—to management and to the audit committee. The final standard, therefore, requires the auditor to consider and communicate any identified significant deficiencies to the audit committee. In order to emphasize that the auditor need not scope the audit to identify all significant deficiencies, however, the Board placed these provisions in the section of the final standard that describes communications requirements.<sup>20</sup>

The relatively minor changes that the Board made to the definition of significant deficiency are also intended to focus the auditor on the communication requirement and away from scoping issues. The final definition is based on the proposed definition of "significant misstatement," which commenters generally

---

<sup>18</sup> See paragraph 34.

<sup>19</sup> The Board also made minor changes to the definition of material weakness in order to use the same definition in the SEC's management guidance and related rule. In the final standard, material weakness is defined as "a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis."

<sup>20</sup> See paragraph 80. The final standard also includes the proposed requirement for the auditor to communicate, in writing, to management, all deficiencies in internal control identified during the audit and inform the audit committee when such a communication has been made, and the proposed requirement to inform, when applicable, the board of directors of the auditor's conclusion that the audit committee's oversight is ineffective. See paragraphs 79 and 81. Some commenters believed that the requirement to communicate all identified deficiencies to management would result in an unnecessary administrative exercise. The Board continues to believe, however, that auditors should provide information about identified control deficiencies to management.

supported, and is aligned with the SEC's proposed definition of the same term. Under the final standard, a significant deficiency is "a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting."

### **G. Scaling the audit**

The proposed standard on auditing internal control indicated that a company's size and complexity are important considerations and that the procedures an auditor should perform depend upon where along the size and complexity continuum a company falls. The proposed standard included a section on scaling the audit for smaller, less complex companies and would have required auditors to evaluate and document the effect of the company's size and complexity on the audit. This documentation requirement applied to audits of companies of all sizes. The proposed standard also included a list of the attributes of smaller, less complex companies and a description of how the auditor might tailor his or her procedures when these attributes are present. In general, commenters were supportive of the proposed standard's general approach to scalability, but had several recommendations for change.

Some commenters suggested that scalability should not be covered as a standalone discussion applicable only to smaller companies and that other companies, regardless of size, might have areas that are less complex. The Board agrees that the direction on scaling will be most effective if it is a natural extension of the risk-based approach and applicable to all companies. Consequently, the Board shortened the separate section on "scaling the audit," and incorporated a discussion of scaling concepts, similar to what was proposed, throughout the final standard. Specifically, notes to relevant paragraphs describe how to tailor the audit to the particular circumstances of a smaller, less complex company or unit. The Board also retained the list of attributes of smaller, less complex companies and acknowledged that, even within larger companies, some business units or processes may be less complex than others. Discussion of these attributes has been incorporated in the section on the auditor's planning procedures in the final standard.<sup>21</sup> As described in the proposing release, the provisions on scalability in the final standard will form the basis for guidance on auditing internal control in smaller companies to be issued this year.

Several commenters, mostly auditors, suggested that the performance requirements that applied to all companies, including large, complex companies, would lead to unnecessary and costly documentation requirements. These commenters were particularly concerned about the requirement to document the effects of size and complexity on all aspects of the audit, even if a particular engagement could not be tailored as a result of these factors. After considering these comments, the Board agreed that this documentation requirement is not necessary to promote audit quality and, therefore, has not included it in the final standard.

### **H. Use of the work of others in an integrated audit**

At the time the Board proposed Auditing Standard No. 5 for public comment, the Board also proposed an auditing standard entitled Considering and Using the Work of Others in an Audit that would have superseded the Board's interim standard AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* ("AU sec. 322"), and replaced the direction on using the work of others in an audit of internal control in Auditing

---

<sup>21</sup> See paragraph 9.

Standard No. 2. As discussed in the proposing release, the Board had several objectives in proposing this standard. The first was to better integrate the financial statement audit and the audit of internal control by having only one framework for using the work of others in both audits. Additionally, the Board wanted to encourage auditors to use the work of others to a greater extent when the work is performed by sufficiently competent and objective persons. Among other things, under the proposed standard, auditors would have been able to use the work of sufficiently competent and objective company personnel—not just internal auditors—and third parties working under the direction of management or the audit committee for purposes of the financial statement audit as well as the audit of internal control.

The Board received numerous comments on the proposed standard on using the work of others. Commenters generally indicated support for a single framework regarding the auditor's use of the work of others in an integrated audit. Some, however, suggested retaining existing AU sec. 322 as the basis for that single framework. They expressed the view that the objective of removing barriers to integration and using the work of others to the fullest extent appropriate could be achieved by retaining AU sec. 322 and going forward with the proposed removal of the "principal evidence" provision. At the same time, some other commenters suggested that the proposed standard did not go far enough in encouraging auditors to use the work of others.

After considering these comments, the Board continues to believe that a single framework for the auditor's use of the work of others is preferable to separate frameworks for the audit of internal control and the audit of financial statements. The factors used to determine whether and to what extent it is appropriate to use the work of others should be the same for both audits. At the same time, the Board agreed with those commenters who suggested that better integration of the audits could be achieved without replacing the existing auditing standard. The Board therefore has decided to retain AU sec. 322 for both audits and incorporate language into Auditing Standard No. 5 that establishes these integration concepts rather than adopt the proposed standard on considering and using the work of others.

Consistent with the proposal, however, Auditing Standard No. 5 allows the auditor to use the work of others to obtain evidence about the design and operating effectiveness of controls and eliminates the principal evidence provision. Recognizing that issuers might employ personnel other than internal auditors to perform activities relevant to management's assessment of internal control over financial reporting, the final standard allows the auditor to use the work of company personnel other than internal auditors, as well as third parties working under the direction of management or the audit committee.<sup>22</sup>

In line with the overall risk-based approach to the audit of internal control over financial reporting, the extent to which the auditor may use the work of others depends, in part, on the risk associated with the control being tested. As the risk decreases, so does the need for the auditor to perform the work him or herself. The impact of the work of others on the auditor's work also depends on the relationship between the risk and the competence and objectivity of those who performed the work. As the risk decreases, the necessary level of competence and objectivity decreases as well.<sup>23</sup> Likewise, in higher risk areas (for example, controls that address specific fraud risks), use of the work of others would be limited, if it could be used at all.

---

<sup>22</sup> See paragraph 17.

<sup>23</sup> See paragraph 18.

Finally, the Board understands that some of the work performed by others for the purposes of management's assessment of internal controls can be relevant to the audit of financial statements. Therefore, in an integrated audit, the final standard allows the auditor to use the work of these sufficiently competent and objective others—not just internal auditors—to obtain evidence supporting the auditor's assessment of control risk for purposes of the audit of financial statements.<sup>24</sup> The Board believes that this provision will promote better integration of the audit of internal control with the audit of financial statements.

### **3. Rule 3525—Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting**

The Board also proposed a new rule related to the auditor's responsibilities when seeking audit committee pre-approval of internal control related non-audit services. As proposed, the rule required a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee to perform internal control-related non-audit services that are not otherwise prohibited by the Act or the rules of the SEC or the Board to: describe, in writing, to the audit committee the scope of the proposed service; discuss with the audit committee the potential effects of the proposed service on the firm's independence; and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee pre-approval to perform tax services for an audit client under PCAOB Rule 3524. Most commenters were supportive of the rule as proposed, though some offered suggestions about what should be included in the required communication. After considering the comments on the proposed rule, the Board has adopted it without change.

### **4. Conforming Amendments**

As part of the proposal issued for public comment, the Board proposed amendments to certain of the Board's other auditing standards. Only one comment letter specifically addressed the proposed amendments. That letter expressed support for the amendments and suggested a few additional amendments that might be necessary. The Board has considered this comment and added these additional amendments, as well as others, as necessary based on the final standard.

### **5. Effective Date**

The proposing release solicited commenters' feedback on how the Board could structure the effective date of the final requirements so as to best minimize disruption to ongoing audits, but make greater flexibility available to auditors as early as possible. Most commenters on this topic suggested making the final standard on auditing internal control effective as soon as possible in order to be available for 2007 audits.

The Board agrees that the improvements in Auditing Standard No. 5 should be available as soon as possible. Accordingly, the Board has determined that

---

<sup>24</sup> See paragraph 17.

Auditing Standard No. 5, Rule 3525, and the conforming amendments will be effective, subject to approval by the SEC, for audits of fiscal years ending on or after November 15, 2007. Earlier adoption is permitted, however, at any point after SEC approval. Auditors who elect to comply with Auditing Standard No. 5 after SEC approval but before its effective date must also comply, at the same time, with Rule 3525 and other PCAOB standards as amended by this release.

Auditing Standard No. 2 will be superseded when Auditing Standard No. 5 becomes effective. Auditors who do not elect to comply with Auditing Standard No. 5 before that date (but after SEC approval) must continue to comply with Auditing Standard No. 2 until it is superseded. Such auditors should, however, apply the definition of "material weakness" contained in Auditing Standard No. 5, rather than the one contained in Auditing Standard No. 2. The SEC has adopted a rule to define the term "material weakness," and the definition in Auditing Standard No. 5 parallels the new SEC definition.

\* \* \*

On the 24th day of May, in the year 2007, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Appendix 2

### Rule 3525. Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting

In connection with seeking audit committee pre-approval to perform for an audit client any permissible non-audit service related to internal control over financial reporting, a registered public accounting firm shall—

- (a) describe, in writing, to the audit committee of the issuer the scope of the service;
- (b) discuss with the audit committee of the issuer the potential effects of the service on the independence of the firm; and

Note: Independence requirements provide that an auditor is not independent of his or her audit client if the auditor is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the auditor is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. Several principles guide the application of this general standard, including whether the auditor assumes a management role or audits his or her own work. Therefore, an auditor would not be independent if, for example, management had delegated its responsibility for internal control over financial reporting to the auditor or if the auditor had designed or implemented the audit client's internal control over financial reporting.

- (c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

### Additional Discussion of Comments and the Board's Response

As discussed in the first part of the Board's release, on December 19, 2006, the Board proposed for comment a new standard on auditing internal control, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that would replace Auditing Standard No. 2, a related auditing standard, *Considering and Using the Work of Others in an Audit*, an independence rule relating to the auditor's provision of internal control-related non-audit services, and certain amendments to its auditing standards. The Board received 175 comment letters on its proposals and feedback from the Board's Standing Advisory Group.

Notable changes that the Board made in finalizing its proposals in response to comments are described in the first part of the Board's release. This appendix contains a further discussion of comments received on the proposals and the Board's response.

#### 1. Alignment of Board's Internal Control Auditing Standard and the SEC's Guidance to Management

Many commenters suggested that the SEC's guidance to management and the Board's auditing standard should be more closely aligned. The commenters appeared to hold different opinions, however, about what alignment should mean in this context. Some commenters suggested that the most important issue was the need to use the same definitions of important terms in both documents. Some focused on perceived differences in scope, testing, and documentation requirements, while others suggested that the tone of the two documents was different and that the Board's proposals were more prescriptive. A few commenters suggested that the standard on auditing internal control should merely refer to the SEC management guidance without providing additional direction to the auditor.

As discussed more fully in the first part of this release, in formulating a new standard on auditing internal control, the Board intended to describe an audit process that would be coordinated with management's evaluation process. After considering the comments in this area, the Board made several changes, described in the first part of this release, that improve coordination while recognizing the inherent differences in the roles of management and the independent auditor under Section 404. The Board also adopted, as proposed, the final standard without a requirement for the auditor to perform an evaluation of management's assessment process. Commenters generally supported this aspect of the proposal, which was intended to respond to concerns that the requirements of Auditing Standard No. 2 had become de facto guidance for management's process. The absence of this requirement in the final standard should also allow for improved coordination between management and the auditor.

#### 2. Level of Prescriptive Detail

Some commenters suggested that there remained too many instances of the use of the terms "should" and "must" in the proposed standard and that this might drive excessive documentation and possibly unnecessary work. The Board's Rule 3101 describes the level of responsibility that these imperatives impose on auditors when used in PCAOB standards, and the Board uses these terms in

its standards to clearly convey its expectations. In response to these comments, the Board analyzed each requirement in the proposed standard to determine whether more reliance could be placed on general principles rather than detailed requirements. Where appropriate, the Board made modifications to make the final standard more principles-based. As discussed more fully in the first part of this release, areas in which changes were made include the focus on fulfilling the objectives of a walkthrough and in the description of the top-down approach. Some of these changes also contributed to better coordination with the SEC's guidance for management.

In addition, several commenters expressed concern over the creation of presumptively mandatory responsibilities related to efficiency concepts. The example cited most often was the note to paragraph 3 of the proposed standard on auditing internal control, which stated—

Note: The auditor should select for testing only those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to a given relevant assertion that could result in a material misstatement to the company's financial statements.

Commenters suggested that because of this requirement for the auditor to select "only those controls that are important" for testing, an auditor would have violated the Board's standards if he or she tested even one control that was later shown to be not important. Commenters believed that this would undermine audit effectiveness and recommended removal of such statements.

One of the objectives of the revised standard is to encourage auditors to focus on those areas that present the greatest risk of allowing a material misstatement in the financial statements. However, the Board agrees that its standards should not define a ceiling or maximum amount of work which the auditor may not exceed. While this statement (and others like it) in the proposed standard was not intended to imply that the Board would, with hindsight, suggest that an auditor violated the standard through testing of a control that was later determined to be not important to the audit, the Board has removed the note to paragraph 3 in response to these comments. Similar statements throughout the standard have also either been removed or modified.

### 3. Walkthroughs

The proposed standard required that the auditor perform a walkthrough of each significant process each year and allowed the auditor to use others, such as management personnel and internal auditors, to directly assist the auditor in this work. The proposed standard also indicated that the walkthrough provides audit evidence but did not prescribe further requirements regarding the circumstances in which a walkthrough might provide the auditor with sufficient evidence of operating effectiveness for a particular control. The proposing release, however, noted that a walkthrough could be sufficient for some low-risk controls in subsequent years.

As discussed in the first part of this release, the Board received a significant number of comments on this topic. While several commenters expressed support for the importance of the walkthrough to audit quality, many commenters suggested that the proposed provisions in this area were more prescriptive than necessary, and suggested risk concepts as a way to add flexibility. While these commenters acknowledged the value of a walkthrough and its importance to the evaluation of design effectiveness, many stated that the requirement to perform a walkthrough in an area that is either low-risk, not complex, or

unchanged appears inconsistent with the other areas in the proposed standard that rely upon auditor judgment to a much greater extent.

### ***Use of others in achieving the objectives of a walkthrough***

Commenters supported allowing the auditor to use others to provide the auditor with direct assistance, particularly in low-risk areas, with only a few commenters believing that this change could jeopardize the quality of the audit. In addition, many commenters believed that the standard should allow full use of the work of others in performing walkthroughs, although some commenters strongly disagreed with this point.

As discussed in the first part of this release, the final standard focuses the auditor on achieving four objectives related to the identification of where within the company's processes misstatements could arise, rather than specifically on performing walkthroughs. Due to the importance of achieving these objectives to the auditor's conclusion about internal control, the Board believes that allowing the use of the work of others to a greater extent than what was proposed would not provide the auditor with an adequate understanding of the relevant risks and the related controls. Therefore, similar to the proposed standard, Auditing Standard No. 5 allows the auditor to use the work of others in achieving the objectives of a walkthrough, but only as direct assistance. That is, the auditor will be required to supervise, review, evaluate, and test the work performed by others.<sup>1</sup>

### ***Using walkthroughs to test operating effectiveness***

On the subject of using walkthroughs to test operating effectiveness, commenters suggested that walkthroughs can provide sufficient evidence of operating effectiveness, but held different views about situations in which this would be the case. Some commenters supported the use of walkthroughs in low-risk areas, while others focused on whether the control itself should be low-risk. Several commenters suggested that a walkthrough could provide sufficient evidence of operating effectiveness for lower-risk controls but only when entity-level controls are strong. Almost all commenters agreed that the proposed standard focused on the appropriate conditions for using such an approach—specifically, when risk is low, when past audits indicate effective design and operation of the control, and when no changes have been made to the control or process in which the control resides.

After considering these comments, the Board has decided that the risk-based approach that is described in the final standard is the appropriate framework for determining the evidence necessary to support the auditor's opinion. Therefore, Auditing Standard No. 5 articulates the principle that performance of a walkthrough might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthroughs and the results of the procedures performed.<sup>2</sup> The Board believes that establishing more detailed requirements in this area is not necessary, because application of the general principle in the standard will depend on the particular facts and circumstances presented.

## **4. Assessing Risk**

The Board's May 16, 2005 guidance emphasized the importance of risk assessment in the audit of internal control, and that element of the guidance was

---

<sup>1</sup> See paragraph 27 of AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

<sup>2</sup> See paragraph 49.

incorporated and enhanced in the proposed standard. The proposed standard required risk assessment at each of the decision points in a top-down approach, including the auditor's identification of significant accounts and disclosures and their relevant assertions. The proposed standard also required an assessment of risk at the individual control level, and required that the auditor determine the evidence necessary for a given control based on this risk assessment.

The Board received many comments on the risk assessment provisions in the proposed standard. Comments on the proposed risk assessment approach were generally supportive, with some commenters suggesting ways for improving the risk assessment emphasis in the standard. Many commenters discussed the requirement in the proposed standard for the auditor to assess the risk that the control might not be effective and, if not effective, the risk that a material weakness would result for each control the auditor selected for testing. Commenters suggested that this requirement conflicted with both current practice and the requirements within the interim standards for the financial statement audit, which involve risk assessment at the financial statement assertion level. These commenters believed that this requirement would result in risk assessments at both the assertion level and the individual control level and suggested that assessing (and documenting) risk at the relevant assertion level is sufficiently precise to drive appropriate audits. Furthermore, they believed that a specific requirement to assess risk at the individual control level and its associated documentation requirement would be unnecessary.

After considering these comments, the Board continues to believe that the auditor may vary the nature, timing, and extent of testing based on the assessed risk related to a control. Making this assessment a presumptively mandatory requirement, as it was in the proposed standard, however, does not appear necessary to achieve the intended benefits of varied testing based on the risk associated with a control. Auditing Standard No. 5, therefore, requires the auditor to assess the risk related to the relevant assertion, but not the risk at the individual control level. The standard permits the auditor to consider the risk at the control level, however, and alter the nature, timing, and extent of testing accordingly.

Several commenters expressed concern about the advisability of taking a risk-based approach and the adequacy of the Board's interim standards regarding risk assessment. These commenters suggested that auditors have frequently been unsuccessful at applying a risk-based approach to the financial statement audit in the past.

The Board has found the arguments for a more principles-based approach to internal control auditing convincing, and the principle that the auditor should vary the testing to respond to the risk is one of the most important in the standard. Early implementation of Auditing Standard No. 2 demonstrated that, when internal control is audited without adequate consideration of risk, the areas that pose the greatest danger of material misstatement may be obscured or lost. The emphasis on risk, therefore, drives an audit that is more effective and focused. While the Board believes that auditors can appropriately assess risk based on the interim auditing standards, it has committed to examining the existing standards in this area to see where improvements can be made. This is currently one of the Board's standard setting priorities.

## 5. Evaluation of Deficiencies

The Board received a substantial number of comments on the topic of evaluating deficiencies, including comments on the proposed definitions of material weakness and significant deficiency, the "strong indicators" of a material weakness, and the requirement to evaluate all identified deficiencies. While a

number of commenters stated that auditors do identify material weaknesses in the absence of an actual material misstatement, some noted that, in many cases, material weaknesses are identified only when material misstatements are discovered. Several commenters suggested that the proposed standard, with its focus on using a top-down approach and scoping to identify material weaknesses, would allow auditors to do a more thorough review of the most important controls with less effort expended on reviewing lower risk controls. These commenters often stated that this approach should increase the likelihood of the auditor detecting material weaknesses before a material misstatement occurs.

### ***Definition of a material weakness***

The proposed standard retained the basic framework in Auditing Standard No. 2 that described material weaknesses by reference to the likelihood and magnitude of a potential misstatement. While the Board believed that framework to be sound, it made an effort to clarify the definition in the proposed standard by replacing the reference to "more than remote likelihood" with "reasonable possibility." Financial Accounting Standards Board ("FASB") Statement No. 5 describes the likelihood of a future event occurring as "probable," "reasonably possible," or "remote." The definition in Auditing Standard No. 2 referred to a "more than remote" likelihood of a misstatement occurring. In accordance with FASB Statement No. 5, the likelihood of an event is "more than remote" when it is either "reasonably possible" or "probable."

As the Board noted in the proposing release, however, some auditors and issuers have misunderstood the term "more than remote" to mean something significantly less likely than a reasonable possibility. This, in turn, could have caused these issuers and auditors to evaluate the likelihood of a misstatement at a much lower threshold than the Board intended. Because the term "more than remote" could have resulted in auditors and issuers evaluating likelihood at a more stringent level than originally intended, the Board proposed changing the definition to refer to a "reasonable possibility."

Commenters on this change were split between those that felt the change would reduce unnecessary effort spent on identifying and analyzing deficiencies, and those who believed it would not. Several commenters noted that the replacement of the term "more than remote likelihood" with the term "reasonable possibility" does not raise the auditor's threshold for classifying deficiencies. According to those commenters, the change simply attempts to align the description of the threshold for identifying deficiencies with previous guidance issued by the PCAOB. The Board continues to believe that the proposed definition—as well as Auditing Standard No. 2—established an appropriate threshold for the likelihood part of the definition of material weakness. While the Board agrees that, as a definitional matter, "reasonable possibility" and "more than remote" describe the same threshold, it believes that "reasonable possibility" describes that threshold more appropriately and clearly, and will therefore avoid the misunderstanding of the threshold created by the way it was described in Auditing Standard No. 2. As a result, it retained that term in the final definition in the standard.

In addition, some commenters noted that the definitions of material weakness and significant deficiency in the proposed standard, like the definitions in Auditing Standard No. 2, referred to the likelihood of a material misstatement in both the interim and annual financial statements. Most of these commenters suggested that the Board remove the term "interim" from the definitions of material weakness and significant deficiency because, according to the commenters, it causes confusion when scoping the audit of internal control and unnecessarily complicates the evaluation of deficiencies, particularly in the

absence of guidance from the SEC and FASB regarding interim materiality. Some commenters, however, said that the Board should not remove the term "interim" from the definitions because the evaluation of deficiencies should be performed to consider the effectiveness of internal control for both the interim and annual financial statements. After carefully considering these comments, and in order to use the same definition that the SEC uses in its guidance to management, the Board determined to retain the reference to interim financial statements in the final definition of material weakness.<sup>3</sup>

### ***Indicators of a material weakness***

The proposed standard described circumstances that should be regarded as strong indicators of a material weakness in internal control. The proposing release noted that the identification of one of these strong indicators should bias the auditor toward a conclusion that a material weakness exists but does not require the auditor to reach that conclusion. Under the proposal, the auditor could determine that these circumstances do not rise to the level of a material weakness, and in some cases, are not deficiencies at all.

Many commenters supported the proposed changes from Auditing Standard No. 2 relating to strong indicators, agreeing that, by allowing greater use of professional judgment in this area, practice will improve. A few commenters stated that these changes may lead to some inconsistency in practice, but consistent with other commenters, they still supported the use of greater professional judgment in the evaluation of deficiencies. At least one commenter suggested that several of the strong indicators were not indicators of a material weakness but should be, under all circumstances, a material weakness. A few commenters also suggested that the list of strong indicators in Auditing Standard No. 2 actually stifles the auditor's judgment to the point that auditors fail to identify material weaknesses that exist because the deficiency is not on the list of strong indicators. These commenters suggested that removing the list of strong indicators entirely would be best.

The Board believes that auditor judgment is imperative in determining whether a deficiency is a material weakness and that the standard should encourage auditors to use that judgment. At the same time, the Board continues to believe that highlighting certain circumstances that are indicative of a material weakness provides practical information about the application of the standard. As a result, the Board has included this information in the final standard but has taken a more principles-based approach. Additionally, the Board has coordinated with the SEC so that the indicators in the auditing standard parallel those in the SEC's management guidance.

Rather than referring to "strong indicators," the final standard refers simply to "indicators" of material weakness.<sup>4</sup> The standard also makes clear that the list of indicators is not exhaustive and should not be used as a checklist. Specifically,

---

<sup>3</sup> The provisions in the final standard relating to significant deficiencies are discussed in the first part of this release. As discussed in the first part of this release, the Board also made minor wording changes to the definition of material weakness in order to use the same definition as the SEC in its guidance to management and related rules.

<sup>4</sup> The Board included as an indicator the proposed standard's requirement to determine the level of assurance that would satisfy prudent officials in the conduct of their own affairs that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles. In the proposal, if the auditor determined that a deficiency would prevent prudent officials from concluding that they have such reasonable assurance, the auditor was required to deem the deficiency to be at least a significant deficiency. Under the final standard, if the auditor determines that a deficiency might prevent prudent officials from concluding that they have such reasonable assurance, this circumstance is an indicator of material weakness.

under the final standard, the presence of one of the indicators does not mandate a conclusion that a material weakness exists. At the same time, a deficiency that is not a listed indicator may be a material weakness.

The Board did not adopt as indicators in the final standard certain proposed strong indicators. The Board believes, as at least one commenter suggested, that some of these proposed strong indicators are better characterized as material weaknesses rather than as indicators of a material weakness.<sup>5</sup> Including them in the list of indicators, as adopted, would therefore be inconsistent with the degree of judgment required to evaluate whether an indicator of a material weakness is, under particular facts and circumstances, a material weakness.

### ***Requirement to evaluate all identified deficiencies***

The proposed standard required the auditor to evaluate the severity of each control deficiency that comes to his or her attention. The same provision in the proposed standard made clear, however, that the auditor need not scope the audit to find control deficiencies that are less severe than material weaknesses. A few commenters believed that this requirement is not necessary and suggested that an acceptable alternative would be for the auditor to verify that management has evaluated all deficiencies.

The Board continues to believe that the auditor needs to evaluate all deficiencies that come to his or her attention. Without such an evaluation, there would not be a sufficient basis for the auditor's opinion.

## **6. Additional Scoping and Materiality Issues**

The proposed standard clarified that the auditor should plan and perform the audit of internal control using the same materiality measures used to plan and perform the audit of the annual financial statements. This direction was intended to address concerns that auditors have interpreted Auditing Standard No. 2 as directing them to search for potential defects in internal control at a lower materiality level than that used in the audit of the annual financial statements.

The Board received many comments on materiality and scoping, and a large portion of the commenters expressed support for the proposed standard's approach. Some commenters, however, recommended providing clear quantitative guidelines for calculating materiality. Other commenters expressed concern about such an approach, fearing that material areas would be inappropriately excluded from the audit scope. Finally, some commenters suggested that the Board should provide additional guidance on scoping and extent of control testing decisions, such as guidance on sample sizes related to testing of high-risk controls versus low-risk controls or more specific guidance on the scope of the internal control audit for entities with multiple locations.<sup>6</sup>

After considering these comments, the Board has determined to adopt its discussion of materiality in the internal control audit as proposed. The Board

---

<sup>5</sup> One such proposed strong indicator was an ineffective control environment. Under the proposal, indicators of an ineffective control environment included identification of fraud on the part of senior management and significant deficiencies that have been communicated to management and the audit committee and remain uncorrected after some reasonable period of time. The final standard includes the identification of fraud on the part of senior management as an indicator of a material weakness. In order to simplify the list and make it more principles-based, as well as to align it with the SEC management guidance, however, the Board did not include significant deficiencies that remain uncorrected as an indicator in the final standard.

<sup>6</sup> The proposed standard focused on the auditor's assessment of risk of material misstatement and how the auditor could carry that assessment process into the scoping of a multi-location audit. Commenters were very supportive of the Board's approach in this area and, consequently, the Board has determined to adopt these provisions as proposed.

believes that the auditing standard on internal control is an inappropriate place to redefine or refine the meaning of materiality, which is a long-established concept in the federal securities laws. With respect to requests for more specific guidance on scoping or extent of testing issues, the Board has, as discussed in the first part of this release, endeavored to adopt a standard that relies more on general principles than detailed requirements. Accordingly, the Board believes that auditors should make specific determinations of how to comply with the general scoping and testing requirements in the standard using professional judgment in the particular circumstances presented.

## 7. Scaling the Audit for Smaller Companies

As discussed in the first part of this release, the Board received many comments on the proposed section on scaling the audit from commenters with a variety of perspectives. The comments covered a wide range of issues. In addition to the matters discussed in the first part of this release, commenters suggested:

- That the proposed section on scalability should be focused more closely on how complexity relates to a risk-based audit;
- That the proposed standard did not provide sufficient flexibility for smaller companies and that the standard should provide for more "credit" for control testing based on work done as part of the financial statement audit;
- That the resulting costs of these proposed changes would need to be studied for several years to determine if they are appropriate;
- That the attributes of smaller, less complex companies that were included in the proposed standard were appropriate and that the tailoring directions for auditors were adequate;
- That some of the attributes of smaller, less complex companies that might allow the auditor to tailor the audit might be, instead, risk factors that require more testing;
- That the emphasis on entity-level controls might not be appropriate; and
- That the Board's project to develop guidance on auditing internal control in smaller public companies is necessary.

As discussed in the first part of this release, the Board made several changes in response to comments in the final standard. The new standard provides direction on how to tailor internal control audits to fit the size and complexity of the company being audited. It does so by including notes throughout the standard on how to apply the principles in the standard to smaller, less complex companies, and by including a discussion of the relevant attributes of smaller, less complex companies as well as less complex units of larger companies. The Board believes that the final standard appropriately considers the circumstances of smaller and less complex public companies (and other companies with less complex business units) while requiring a high-quality audit regardless of company size or complexity. The planned guidance on this topic will provide additional practical information for auditors of smaller companies.

## 8. Information Technology Principles

In gaining an understanding of the effect of information technology ("IT") on internal control over financial reporting and the risks the auditor should assess, the proposed standard directed the auditor to apply guidance in AU sec. 319,

*Consideration of Internal Control in a Financial Statement Audit.* Additionally, the proposed standard included a discussion of IT operations at smaller and less complex companies. A number of commenters discussed the importance of IT risks to determining the scope of the audit and recommended that the final standard include additional guidance on how the risk assessment related to IT is incorporated in the audit of internal control.

In response to these comments, the Board included in Auditing Standard No. 5 a note to paragraph 36 that clarifies that the identification of risks and controls within IT should not be a separate evaluation but, rather, an integral part of the auditor's top-down risk assessment, including identification of significant accounts and disclosures and their relevant assertions, as well as the controls to test.

## 9. Roll-forward Procedures

The proposed standard discussed the procedures the auditor should perform to obtain additional evidence concerning the operation of the control when the auditor reports on the effectiveness of the control "as of" a specific date, but has tested the effectiveness of the control at an interim date. The Board received a few comments on this topic, mainly from auditors. The comments were consistent in their view that the proposed standard improperly implies, by using the expression "if any" in relation to additional evidence the auditor is required to obtain, that the auditor may not need to do any roll-forward work. Commenters suggested that such an approach would be inconsistent with paragraph .99 of AU sec. 319 and suggested that the words "if any" be removed from the final standard. The Board believes that its standard should be consistent with AU sec. 319.99 in that the auditor should perform some level of roll-forward procedures. Consequently, the Board removed the words "if any" from the relevant paragraphs of Auditing Standard No. 5 to correct the inconsistency. The Board also noted that, in some circumstances, inquiry alone might be a sufficient roll-forward procedure.

## 10. Cumulative Knowledge and Rotation

The proposed standard on auditing internal control allowed the auditor to incorporate knowledge from previous years' audits into his or her decision making process for determining the nature, timing, and extent of testing necessary. The section in the proposed standard on special considerations for subsequent years' audits built upon the risk-based framework in the proposed standard for determining the nature, timing and extent of testing by describing certain additional factors for the auditor to evaluate in subsequent years. These factors included the results of prior years' testing and any change that may have taken place in the controls or the business since that testing was performed. This section retained the requirement in Auditing Standard No. 2 that each control deemed important to the auditor's conclusion be tested every year, but allowed for a reduction in testing when the additional risk factors indicated that the risk was lower than in the past.

Many commenters strongly supported these provisions as proposed. Many investors, in particular, stated that while they supported the proposed approach, they would not be supportive of rotation of control testing over a multiple-year period. These commenters were generally concerned that rotation of control testing would negatively affect audit quality. Among supporters of the approach in the proposed standard, several requested further clarification in the standard or additional guidance on how this approach should affect the level of testing.

Many issuers suggested that the standard should allow for full rotation—which exempts some important controls from testing each year—of at least controls in low-risk areas. Other commenters recommended that all controls should be tested on a multiyear rotating basis. These comments often focused on the fact that while the proposed standard required the auditor to evaluate whether there had been any relevant changes since the control was tested, it still required testing at some level even when there had been no change. These commenters considered this requirement to be unnecessary.

The Board shares the concern that multi-year rotation of control testing would not provide sufficient evidence for the auditor's opinion on internal control effectiveness, which is required by the Act to be issued each year. In the financial statement audit, control testing plays a supporting role—to the extent that controls have been tested and are effective, the auditor can reduce the level of (but not eliminate) the necessary substantive testing. In contrast, in the internal control audit, control testing does not play a supporting role but is the sole basis for the auditor's opinion. Additionally, even if the design of the control and its related process does not change from the prior year, it is not possible to assess the control's operating effectiveness without performing some level of testing. For these reasons, rotation is not a viable option in the audit of internal control.

Instead, the approach described in the proposed standard has been clarified in the final standard and continues to focus the auditor on relevant changes since a particular control was last tested, as many commenters suggested. Under this approach, the auditor would consider, in addition to the risk factors described in the standard that are always relevant to determining the nature, timing, and extent of testing, whether there has been a change in the controls or in the business that might necessitate a change in controls; the nature, timing, and extent of procedures performed in previous audits; and the results of the previous years' testing of the control.<sup>7</sup> After taking into account these additional factors, the additional information in subsequent years' audits might permit the auditor to assess risk as lower than in the initial year and, thus, might permit the auditor to reduce testing.

This treatment of cumulative knowledge is analogous to the roll-forward provisions in the final standard. In the case of subsequent years, the auditor, in essence, rolls forward the prior years' testing when the control was found to be effective in the past and no change has occurred (or would have been expected to occur due to changes in the environment or process that contains the control). Because the auditor might be able to assess the risk lower in the subsequent years, a walkthrough, or equivalent procedures, might be sufficient for low-risk controls. This approach appropriately factors in the effect of cumulative knowledge, while maintaining audit quality and providing a sufficient basis for the auditor's opinion.

## 11. Reporting the Results of the Audit

In the proposed standard, the Board attempted to address concerns that the separate opinion on management's assessment required by Auditing Standard No. 2 contributed to the complexity of the standard and caused confusion regarding the scope of the auditor's work.<sup>8</sup> Accordingly, to emphasize the proper scope of the audit and to simplify the reporting, the proposed standard required

---

<sup>7</sup> See paragraph 55.

<sup>8</sup> Although Auditing Standard No. 2 requires the auditor to evaluate management's process, the auditor's opinion on management's assessment is not an opinion on management's internal control evaluation process. Rather, it is the auditor's opinion on whether management's statements about the effectiveness of the company's internal controls are fairly stated.

that the auditor express only one opinion on internal control—a statement of the auditor's opinion on the effectiveness of the company's internal control over financial reporting. The proposal eliminated the separate opinion on management's assessment because it was redundant of the opinion on internal control itself and because the opinion on the effectiveness of controls more clearly conveys the same information—specifically, whether the company's internal control is effective.

Many commenters agreed with the Board that eliminating the separate opinion on management's assessment would reduce confusion and clarify the reporting. Some commenters, however, suggested that the Board should instead require only an opinion on management's assessment. These commenters expressed their belief that the Act requires only that the auditor review management's assessment process and not the company's internal control. Additionally, a few commenters expressed confusion about why the proposed standard continued to reference an audit of management's assessment in paragraph 1 of the proposed standard and the auditor's report.

The Board has determined, after considering these comments, to adopt the provision requiring only an opinion on internal control.<sup>9</sup> The Board continues to believe that the overall scope of the audit that was described by Auditing Standard No. 2 and the proposed standard is correct; that is, to attest to and report on management's assessment, as required by Section 404(b) of the Act, the auditor must test controls directly to determine whether they are effective.<sup>10</sup> Accordingly, paragraphs 1 and 2 of the proposed standard provided that the auditor audits management's assessment—the statement in management's annual report about whether internal control is effective—by auditing whether that statement is correct—that is, whether internal control is, in fact, effective. The final standard similarly makes this clear. In response to commenters, however, the Board has clarified the auditor's report so that it will consistently refer to the required audit as the audit of internal control.

## 12. Implementation

Some commenters urged the Board to focus on implementation issues after it adopts a final standard, and noted that effective implementation by the Board is crucial to the internal control reporting process. Some of these commenters focused on the inspections process, which they suggested is key to promoting audit efficiency. Some stated that auditors would be unlikely to change their audit approach until they are confident that the inspections will be similarly focused. The Board is committed to effective monitoring of firms' compliance with the new standard and will continue to promote proper implementation through other means, including the Board's Forums on Auditing in the Small Business Environment and guidance for auditors of smaller companies.

---

<sup>9</sup> The SEC has adopted changes to its rules that require the auditor to express an opinion directly on internal control.

<sup>10</sup> In addition, Section 103 of the Act requires the Board's standard on auditing internal control to include "testing of the internal control structure and procedures of the issuer. . ." Under Section 103, the Board's standard also must require the auditor to present in the audit report, among other things, "an evaluation of whether such internal control structure and procedures. . . provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles. . ."

## Auditing Standard No. 6

# *Evaluating Consistency of Financial Statements*

[Supersedes AU secs. 420 and 9420]

Source: Auditing Standard Nos. 8–15.

[Effective pursuant to SEC Release No. 34-58555, File No. PCAOB-2008-01 (September 16, 2008).]

### Consistency and the Auditor's Report on Financial Statements

1. This standard establishes requirements and provides direction for the auditor's evaluation of the consistency of the financial statements, including changes to previously issued financial statements, and the effect of that evaluation on the auditor's report on the financial statements.

2. To identify consistency matters that might affect the report, the auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by changes in accounting principles or by material adjustments to previously issued financial statements for the relevant periods.

3. The periods covered in the auditor's evaluation of consistency depend on the periods covered by the auditor's report on the financial statements. When the auditor reports only on the current period, he or she should evaluate whether the current-period financial statements are consistent with those of the preceding period. When the auditor reports on two or more periods, he or she should evaluate consistency between such periods and the consistency of such periods with the period prior thereto if such prior period is presented with the financial statements being reported upon.<sup>1</sup> The auditor also should evaluate whether the financial statements for periods described in this paragraph are consistent with previously issued financial statements for the respective periods.<sup>2</sup>

Note: The term "current period" means the most recent year, or period of less than one year, upon which the auditor is reporting.

---

<sup>1</sup> For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate consistency between the two years on which he or she reports and between those years and the earliest year presented.

<sup>2</sup> When a company uses retrospective application, as defined in Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("SFAS No. 154"), to account for a change in accounting principle, the financial statements presented generally will be consistent. However, the previous years' financial statements presented with the current year's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous years' financial statements on which the auditor previously reported. This standard clarifies that the auditor's evaluation of consistency should encompass previously issued financial statements for the relevant periods.

4. The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:

- a. A change in accounting principle
- b. An adjustment to correct a misstatement in previously issued financial statements.<sup>[3]</sup>

## Change in Accounting Principle

5. A change in accounting principle is a change from one generally accepted accounting principle to another generally accepted accounting principle when (1) there are two or more generally accepted accounting principles that apply, or when (2) the accounting principle formerly used is no longer generally accepted. A change in the method of applying an accounting principle also is considered a change in accounting principle.<sup>4</sup>

Note: A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of a misstatement.

6. The auditor should evaluate and report on a change in accounting estimate effected by a change in accounting principle like other changes in accounting principle.<sup>5</sup> In addition, the auditor should recognize a change in the reporting entity<sup>6</sup> by including an explanatory paragraph in the auditor's report, unless the change in reporting entity results from a transaction or event. A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit does not require recognition in the auditor's report.

7. The auditor should evaluate a change in accounting principle to determine whether—

- a. The newly adopted accounting principle is a generally accepted accounting principle,
- b. The method of accounting for the effect of the change is in conformity with generally accepted accounting principles,
- c. The disclosures related to the accounting change are adequate,<sup>7</sup> and
- d. The company has justified that the alternative accounting principle is preferable.<sup>8</sup>

---

<sup>[3]</sup> [Footnote deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>4</sup> See SFAS No. 154, paragraph 2c.

<sup>5</sup> SFAS No. 154, paragraph 2e, defines a "change in accounting estimate effected by a change in accounting principle" as "a change in accounting estimate that is inseparable from the effect of a related change in accounting principle."

<sup>6</sup> "Change in reporting entity" is a change that results in financial statements that, in effect, are those of a different reporting entity. See SFAS No. 154, paragraph 2f.

<sup>7</sup> Newly issued accounting pronouncements usually set forth the method of accounting for the effects of a change in accounting principle and the related disclosures. SFAS No. 154 sets forth the method of accounting for the change and the related disclosures when there are no specific requirements in the new accounting pronouncement.

<sup>8</sup> The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. See SFAS No. 154, paragraph 14.

8. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements. If the auditor concludes that the criteria in paragraph 7 have been met, the auditor should add an explanatory paragraph to the auditor's report, as described in AU sec. 508, *Reports on Audited Financial Statements*. If those criteria are not met, the auditor should treat this accounting change as a departure from generally accepted accounting principles and address the matter as described in AU sec. 508.

Note: If a company's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing company's financial statements, the auditor should add an explanatory paragraph (following the opinion paragraph) to the auditor's report, as described in AU sec. 508.

## Correction of a Material Misstatement in Previously Issued Financial Statements

9. The correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, as described in AU sec. 508.

10. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The accounting pronouncements generally require certain disclosures relating to restatements to correct misstatements in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the inadequacy of disclosure as described in paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*, and AU sec. 508.

## Change in Classification

11. Changes in classification in previously issued financial statements do not require recognition in the auditor's report, unless the change represents the correction of a material misstatement or a change in accounting principle. Accordingly, the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were incorrectly classified in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement. If the auditor determines that the reclassification is a change in accounting principle, he or she should address the matter as described in paragraphs 7 and 8 and AU sec. 508. If the auditor determines that the reclassification is a correction of a material misstatement in previously issued financial statements, he or she should address the matter as described in paragraphs 9 and 10 and AU sec. 508.

## Attachment

### PCAOB Release No. 2008-001

January 29, 2008

PCAOB Rulemaking  
Docket Matter No. 023

### Summary

After public comment, the Public Company Accounting Oversight Board is adopting Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, and amendments to the Board's interim auditing standards.

### Board Contacts

Greg Fletcher, Associate Chief Auditor (202/207-9203, fletcherg@pcaobus.org),  
Keith Wilson, Associate Chief Auditor (202/207-9134; wilsonk@pcaobus.org)

\*\*\*\*\*

### A. Introduction

The Board proposed certain changes to its auditing standards in response to two actions of the Financial Accounting Standards Board ("FASB"). In May 2005, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 154, *Accounting Changes and Error Corrections*,<sup>1</sup> which superseded Accounting Principles Board ("APB") Opinion No. 20, *Accounting Changes*.<sup>2</sup> The FASB has also issued an exposure draft of a proposed Statement of Financial Accounting Standards, *The Hierarchy of Generally Accepted Accounting Principles*.<sup>3</sup>

SFAS No. 154 establishes, unless impracticable, retrospective application as the required method for reporting a change in accounting principle in the absence of explicit transition requirements specific to a newly adopted accounting principle.<sup>4</sup> SFAS No. 154 also redefines the term "restatement" to refer only to "the process of revising previously issued financial statements to reflect the correction of an error in those financial statements."<sup>5</sup> Under SFAS No. 154, therefore, the term "restatement" does not refer to changes made to previously issued financial statements to reflect a change in accounting principle.

AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*, the Board's interim standard on the auditor's responsibilities for evaluating the consistency of the application of generally accepted accounting principles ("GAAP"), generally reflected the provisions of APB Opinion No. 20, which

---

<sup>1</sup> Financial Accounting Standards Board ("FASB"), Statement of Financial Accounting Standards ("SFAS") No. 154, *Accounting Changes and Error Corrections* (2005) ("SFAS No. 154").

<sup>2</sup> Accounting Principles Board ("APB") Opinion No. 20, *Accounting Changes* (1971). SFAS No. 154 also superseded SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements*.

<sup>3</sup> FASB, Proposed Statement of Financial Accounting Standards, *The Hierarchy of Generally Accepted Accounting Principles*, Exposure Draft (April 2005).

<sup>4</sup> Among other reasons for undertaking this project, the FASB intended to eliminate differences between APB Opinion No. 20 and the International Accounting Standards Board standard, IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*. See introduction to SFAS No. 154.

<sup>5</sup> See SFAS No. 154, paragraph 2j.

was superseded by SFAS No. 154. To better align the Board's standards with the new accounting standard, on April 3, 2007, the Board proposed a new auditing standard on evaluating consistency, which would supersede AU sec. 420, and conforming amendments to AU sec. 508, *Reports on Audited Financial Statements*, of its interim auditing standards.

The FASB's proposed standard on the GAAP hierarchy would incorporate the hierarchy found in the auditing standards into the accounting standards. Historically, a description of the GAAP hierarchy has resided only in the auditing standards.<sup>6</sup>

Because the GAAP hierarchy identifies the sources of accounting principles and the framework for selecting principles to be used in preparing financial statements, the Board believed that these requirements are more appropriately located in the accounting standards. Accordingly, also on April 3, 2007, the Board proposed to remove the GAAP hierarchy from the auditing standards.<sup>7</sup>

The proposed standard provided direction for the auditor's evaluation of the consistency of financial statements. It directed the auditor to recognize a change in accounting principle or an adjustment to correct a misstatement<sup>8</sup> in previously issued financial statements in the auditor's report if it had a material effect on the financial statements. The conforming amendments to AU sec. 508, *Reports on Audited Financial Statements*, provide language for the explanatory paragraph. The proposed standard also directed the auditor to review a material change in financial statement classification and the related disclosure to determine whether the change also is a change in accounting principle or a correction of a material misstatement.

The proposed standard and amendments were intended to update and clarify the auditing standards in light of SFAS No. 154 and the FASB's proposal on the GAAP hierarchy. In particular, these updates and clarifications should enhance the clarity of auditor reporting on accounting changes and corrections of misstatements by distinguishing between these events.

The Board received 11 comment letters. In general, the commenters were supportive of the proposed standard and amendments. They generally stated that the proposed auditing standard appropriately described how the auditor should evaluate the consistency of financial statements and reflected the changes to accounting requirements under SFAS No. 154. Several commenters suggested clarifications in various parts of the standard. As described in the following sections, the Board has considered the comments and made changes to the final standard and amendments.

The Board is adopting the proposed standard as Auditing Standard No. 6, as well as the amendments to the interim standards. This release describes key aspects and elements of the new standard and amendments, comments received, and changes incorporated in the final standard.

---

<sup>6</sup> See AU sec. 411, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles."* Although the Board is removing the GAAP hierarchy from this standard, the standard remains in existence, as amended.

<sup>7</sup> If the amendments are approved by the SEC, the effective date for the removal of the GAAP hierarchy from the auditing standards will be 60 days after the standard and amendments are approved by the SEC. The Board has coordinated with the FASB and understands that the FASB intends to coincide the effective date of its standard on the GAAP hierarchy with that of the PCAOB.

<sup>8</sup> SFAS No. 154 uses the term "error" instead of "misstatement." This release, including the final standard and amendments, uses "misstatement," the prevailing term used in PCAOB auditing standards. The term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards.

## B. Evaluating Consistency

Under Auditing Standard No. 6, auditors are required to evaluate the consistency of a company's financial statements and report on inconsistencies. The new standard updates these requirements and aligns them more closely with SFAS No. 154<sup>9</sup> by requiring the auditor's report to recognize a company's correction of a material misstatement, regardless of whether it involves the application of an accounting principle. Based on a discussion at an October 2005 meeting of the Board's Standing Advisory Group, the Board understands that this requirement is consistent with current practice. The new standard focuses on the auditor's responsibilities regarding events that warrant recognition in the auditor's report on the financial statements—changes in accounting principles and corrections of misstatements in previously issued financial statements.<sup>10</sup> This standard also clarifies that the auditor's report should indicate whether an adjustment to prior-period financial statements results from a change in accounting principle or the correction of a misstatement.

### 1. Materiality

There were several comments on materiality. Some commenters suggested that the standard should specifically state that the auditor need not recognize the correction of a misstatement that is immaterial to the previously issued financial statements. Another suggested that the standard should remind the auditor that professional judgment is required to evaluate consistency. Another commenter said that additional guidance on materiality as applied to individual matters in the financial statements would be helpful in applying the standard. Others suggested that clarity would be improved by inserting the word "material" in several places.

In general, the Board's view is that the purpose of the standard is to provide direction on evaluating consistency; for example, the accounting periods the auditor should evaluate, the recognition in the auditor's report of consistency matters prescribed by the accounting standards, and the related audit reporting requirements. Because an audit is predicated on the use of reasoned judgment and the consideration of materiality in planning, performing, and reporting on the audit, the Board does not believe it is necessary for this standard to specifically direct the auditor to exercise judgment and apply materiality. Further, materiality is a concept that is defined under the federal securities laws, and it is not the objective of this standard to alter or interpret that concept.

The Board did agree that clarity could be improved in some areas by inserting the word "material" to modify the word "misstatement." The Board added "material" to AU secs. 508.18A and B to be consistent with paragraph 4 of Auditing Standard No. 6. However, AU sec. 508.18C does not include "material" because that sentence summarizes the SFAS No. 154 requirement for correcting a misstatement, which does not directly mention materiality.

---

<sup>9</sup> Because SFAS No. 154 provides comprehensive, authoritative accounting guidance on changes in accounting principle and corrections of errors, Auditing Standard No. 6 omits the accounting guidance that was included in AU sec. 420.

<sup>10</sup> AU sec. 420 also required recognition of those events. However, it only required recognition in the auditor's report of the correction of a misstatement involving an accounting principle. In addition, unlike AU sec. 420, the new standard does not describe the accounting changes that do not require recognition in the auditor's report.

## 2. Periods Covered by the Evaluation of Consistency

The new standard describes the scope of the required evaluation of consistency in terms that are similar to the description in AU sec. 420. Under the new standard, when the auditor reports only on the current period, the auditor should evaluate whether the financial statements of the current period are consistent with those of the preceding period. When the auditor reports on two or more years, the auditor should evaluate whether the financial statements reported on are consistent with each other and with the prior year's financial statements, if presented. For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate consistency between the two years on which he or she reports and between those years and the earliest year presented. In response to comments, the Board added this example to the final standard.

When a company uses retrospective application, as defined in SFAS No. 154, to account for a change in accounting principle, the financial statements presented generally will be consistent. However, the previous years' financial statements presented with the current year's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous years' financial statements on which the auditor previously reported. For example, consider a company that adopts a new accounting standard in 2007 that requires retrospective application to 2006 and 2005. The financial statements for 2006 and 2005 will be consistent, as presented with 2007. However, the financial statements for the years 2006 and 2005 that were issued a year earlier will not reflect the retrospective application and hence will not be consistent with 2007 and will be different from the 2006 and 2005 financial statements that are presented with 2007. The new standard clarifies that the auditor's evaluation of consistency should encompass previously issued financial statements for the relevant periods.

Paragraph 3 of the proposed standard described the financial statement periods covered by the evaluation of consistency. The third sentence of that paragraph was intended to be a clarification of the requirement in AU sec. 420.22 regarding the evaluation of two or more years. However, some commenters found the third sentence of paragraph 3 to be confusing and recommended retaining the language in AU sec. 420.22, unless the Board had intended to change the auditor's responsibilities for evaluating the consistency of GAAP. Because the Board wanted to be clear that the auditor's responsibilities had not changed, the Board decided to retain the original sentence from AU sec. 420.22, with some changes, instead of the proposed third sentence of paragraph 3. The inserted sentence, adapted from AU sec. 420.22, reads as follows (additions underlined and deletions struck through):

When the ~~independent~~ auditor reports on two or more ~~periods~~years, he or she should ~~evaluate~~address the consistency of the ~~application of accounting principles~~ between such ~~periods~~years and the consistency of such ~~periods~~years with the ~~period~~year prior thereto if such prior ~~period~~year is presented with the financial statements being reported upon.

The Board did not include the reference to "the application of accounting principles" because paragraph 3 also relates to the auditor's evaluation of a company's correction of a material misstatement, regardless of whether it involves the application of an accounting principle. The Board also used the word "evaluate"

because it describes the auditor's responsibilities consistently with the rest of the paragraph.

Two commenters suggested that the last sentence of proposed paragraph 3, which described the auditor's responsibility to evaluate whether the financial statements are consistent with previously issued financial statements for the same period, was confusing and unnecessary. These commenters suggested deleting the last sentence of paragraph 3. In addition, one commenter suggested that paragraph 3 of the proposed standard could be clarified by including the explanatory language from the proposing release regarding retrospective application under SFAS No. 154. As discussed above, the new standard is intended to clarify that the auditor's evaluation of consistency should include an evaluation of previously issued financial statements for the relevant periods. Accordingly, the Board believed that the final sentence of paragraph 3 is necessary. However, the Board agreed that including the suggested explanatory language from the proposing release regarding retrospective application would clarify the paragraph and has added that language as a footnote to paragraph 3.

### 3. Reference to Application of Accounting Principles

Consistent with the discussion above related to paragraph 3 of the proposed standard, the Board also removed the reference to "application of accounting principles" from the first paragraph of Auditing Standard No. 6. Because the auditor's evaluation of consistency under this standard includes errors not involving an accounting principle, the consistency evaluation is broader than that described under the second standard of reporting. Accordingly, the Board also removed the reference to the second standard of reporting from paragraph 2 of Auditing Standard No. 6.

### 4. Change in Accounting Principle

The new standard requires the auditor to evaluate a change in accounting principle<sup>11</sup> that has a material effect on the financial statements to determine whether: (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with GAAP, (3) the disclosures related to the accounting change are adequate, and (4) the company justifies that the alternative accounting principle is preferable,<sup>12</sup> as required by SFAS No. 154.<sup>13</sup> Under the amendments to AU sec. 508, if the four criteria are met,<sup>14</sup> the auditor would recognize the change in accounting principle in the auditor's report through the addition of an explanatory paragraph consisting of an identification of the nature of the change and a reference to the issuer's note disclosure describing the change.

---

<sup>11</sup> The proposed and final standards use the definition of a change in accounting principle found in SFAS No. 154, paragraph 2c.

<sup>12</sup> In certain circumstances, Securities and Exchange Commission ("SEC") rules require issuers to file a letter from the auditor indicating whether or not a change is to an alternative accounting principle that is preferable. See Rule 10-01(b)(6) of Regulation S-X, 17 C.F.R. § 210.10-01(b)(6).

<sup>13</sup> Under SFAS No. 154, the issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle as long as the change in accounting principle is made in accordance with the GAAP hierarchy. See SFAS No. 154, paragraph 14.

<sup>14</sup> The auditor has substantially the same responsibility for evaluating a change in accounting principle as under AU sec. 431, *Adequacy of Disclosure in Financial Statements*, and paragraph .50 of AU sec. 508, *Reports on Audited Financial Statements*. The language in Auditing Standard No. 6 has, however, been updated to be consistent with SFAS No. 154.

If those criteria are not met, the auditor would issue a qualified or adverse opinion.<sup>15</sup>

Some commenters recommended that the Board reconsider whether it was necessary for the auditor to recognize in the audit report changes that result when a company is required to adopt a newly issued accounting standard. They indicated that the significance of a company's discretionary change in accounting principle may be diluted if the auditor recognizes both discretionary changes and those changes in accounting principles required by a newly-issued standard in the report. Another commenter suggested that the auditor should not be required to include an explanatory paragraph in the audit report when changes in accounting principle have been applied retrospectively because, in such cases, the financial statements included in the filing will appear consistent. As noted above, the Board believes that it is important for investors to be informed when the prior year financial statements presented with the current year are different from previously issued financial statements. In addition, the Board believes that the different language in the auditor's report for discretionary changes and those required by a newly-issued standard provides sufficient notification to investors of the general nature of the change. Therefore, the Board adopted the requirement as proposed.<sup>16</sup>

One commenter suggested that the proposed standard deleted useful information about a change in accounting principle that also involves a change in an estimate. The proposed standard did not carry forward the requirement of AU sec. 420.13 that the auditor should recognize in his or her report a change in accounting principle that is inseparable from a change in estimate. After considering this comment, the Board concluded that the requirement in AU sec. 420.13 does result in useful information being included in the auditor's report. Accordingly, the Board updated the language in AU sec. 420 to reflect the term used in SFAS 154, and included the requirement in Auditing Standard No. 6.<sup>17</sup>

Some commenters asked the Board to clarify the reporting requirement related to a change in reporting entity. According to AU sec. 420.08, a change in reporting entity resulting from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit, does not require that the auditor include an explanatory paragraph in the auditor's report. Under the proposed standard, the auditor may have been required to report on, for example, the disposition of a subsidiary or business unit because SFAS No. 154 (and its predecessor, APB Opinion No. 20) did not specifically exempt such a transaction from the definition of a change in reporting entity. Generally, dispositions or spin-offs have specific disclosure requirements in the accounting standards and the Board did not intend to change practice and require the auditor to report on these events through an explanatory paragraph. Accordingly, the Board carried forward the requirement from AU sec. 420.08 regarding a transaction or event. In addition, the Board also added a reference to paragraph 2f in SFAS No. 154, which describes a change in reporting entity, as suggested by some commenters.

---

<sup>15</sup> This responsibility is substantially unchanged from AU sec. 508.51.

<sup>16</sup> In addition, one commenter suggested that the standard include an example of a change in the method of applying an accounting principle. The final standard, like the proposed standard, notes that under SFAS No. 154 a change in the method of applying an accounting principle is also a change in accounting principle. While the Board believes that it is helpful for the standard to reference the accounting requirement, it also believes that it is not appropriate for the auditing standard to provide accounting guidance.

<sup>17</sup> The new standard uses the term "change in accounting estimate effected by a change in accounting principle," which is defined in SFAS No. 154 as "a change in accounting estimate that is inseparable from the effect of a related change in accounting principle."

In response to comments, the Board also modified paragraph 8 of the proposed standard, which provided direction for reporting a change in accounting principle. Some commenters noted that the proposed conforming amendments to AU sec. 508.17 had a more clearly stated version of the number of years that the auditor is required to include an explanatory paragraph related to a change in principle than did footnote 5 to paragraph 8. After considering the commenters' recommendation that the language in the footnote be changed, the Board decided that the footnote was not necessary because paragraph 8 referred the auditor directly to the reporting requirements in AU sec. 508. The Board therefore removed footnote 5 from the final standard.

## 5. Correction of a Material Misstatement in Previously Issued Financial Statements

Under Auditing Standard No. 6, the correction of a material misstatement in previously issued financial statements (i.e., a "restatement") is recognized in the auditor's report through the addition of an explanatory paragraph. Under the conforming amendments to AU sec. 508, the explanatory paragraph in the auditor's report regarding a restatement should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. The first statement in the explanatory paragraph distinguishes restatements from adjustments to prior-period financial statements resulting from changes in accounting principle. Previously, the auditor's responsibilities for reporting on most restatements were the same as for reporting on changes in accounting principle.

One commenter suggested that the proposed standard did not clearly explain whether corrections of an error not involving a principle would require recognition in the auditor's report. Unlike the previous requirement, the proposed standard did not distinguish between the "correction of an error in principle" and an "error correction not involving a principle."<sup>18</sup> Rather, the proposed standard required recognition in the auditor's report of any correction of a material misstatement, whether or not the error involved a principle. The Board reconsidered the language and concluded that the requirement as proposed was sufficiently clear. The new standard aligns the auditor's reporting responsibilities with the accounting standards, which require disclosure of all restatements, by requiring an explanatory paragraph when the company has restated the financial statements.

Some commenters suggested that it would not improve clarity to have the auditor's report include a statement that the financial statements were restated "to correct a material misstatement." They noted that SFAS No. 154 already defines a restatement as the revision of previously issued financial statements to reflect the correction of an error. The Board decided to retain the reporting requirement as proposed because it clearly distinguishes corrections of misstatements from changes in accounting principle. Also, the required reporting language regarding restatements is more informative because it does not rely entirely on the user's knowledge of the definition of "restatement" in the accounting standard.<sup>19</sup>

---

<sup>18</sup> This distinction previously was in paragraphs .12 and .16 of AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*.

<sup>19</sup> Two commenters suggested that the standard include the explanation from the release that the term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards. The Board agreed and has included that explanation in the final standard.

One commenter also recommended that the auditor's explanatory paragraph about the correction of a misstatement should contain additional information. The commenter recommended that the explanatory paragraph include a statement that (1) the previously issued auditor's report should not be relied on because the previously issued financial statements were materially misstated, and (2) the previously issued report is replaced by the auditor's report on the restated financial statements.

The Board believes that the recommended additional language is not necessary because existing PCAOB standards and rules of the Securities and Exchange Commission ("SEC") are sufficient to inform users about misstatements in previously issued financial statements. Specifically, AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, requires the auditor to take specific action when he or she concludes that information discovered after the financial statements have been issued would have affected his or her report if the company had not reflected the information in the financial statements and people are currently relying or are likely to rely on the financial statements and auditor's report. According to AU sec. 561.06, the auditor should advise the company to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to persons who are known to be currently relying or who are likely to rely on the financial statements and the related auditor's report.<sup>20</sup>

A U.S. public company that is not a foreign private issuer under SEC rules also is required to file a Form 8-K current report, if it concludes that any previously issued financial statements should no longer be relied upon because of an error in such financial statements.<sup>21</sup> If the auditor has notified the issuer that action should be taken to prevent future reliance on a previously issued audit report, the company also must disclose that information in the Form 8-K.

## 6. Changes in Classification

Auditing Standard No. 6 does not require the auditor's report to recognize a change in classification<sup>22</sup> in previously issued financial statements, except for a reclassification that is also a change in accounting principle or correction of a material misstatement.<sup>23</sup> Accordingly, the new standard clarifies that the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change is also a change in accounting principle or a correction of a material misstatement. For example, in some circumstances, a change in financial statement classification also may be the correction of a misstatement. A restatement to correct the misclassification of an account as short- or long-term or misclassification of cash flows would be

---

<sup>20</sup> AU sec. 561.06 also requires that if the effect on the financial statements or auditor's report can promptly be determined, disclosure should consist of issuing, as soon as practicable, revised financial statements and auditor's report. If issuance of the financial statements with an auditor's report for a later period is imminent, a company is permitted to disclose the revision to the financial statements instead of reissuing earlier statements. When the effect on the financial statements cannot be determined without a prolonged investigation, appropriate disclosure would consist of notification that the financial statements and auditor's report should not be relied on and that revised financial statements and auditor's report will be issued upon completion of an investigation.

<sup>21</sup> See Securities Exchange Act Rule 13a-11, 17 C.F.R. § 240.13a-11.

<sup>22</sup> AU sec. 420.17 also did not require recognition of a change in financial statement classification in the auditor's report.

<sup>23</sup> SFAS No. 154 uses the term "presentation" in its definition of an error in previously issued financial statements. The directions in paragraph 11 of the new standard address the auditor's responsibilities for changes in classification, which is an element of the presentation and disclosure financial statement assertion under the auditing standards. See, e.g., paragraph .08 of AU sec. 326, *Evidential Matter*.

both a restatement and reclassification. Therefore, the auditor should evaluate these matters as part of the evaluation of corrections of misstatements. Under Auditing Standard No. 6, a classification change that is also a change in accounting principle should be reported on as a change in accounting principle, and a classification change that is also a correction of a material misstatement should be reported on by the auditor as a restatement.

Some commenters recommended slight revisions to the first sentence of paragraph 11 to clarify the auditor's responsibilities. The first sentence stated that changes in classification in previously issued financial statements do not require recognition in the auditor's report. This seemed to conflict with the second sentence which required the auditor to review a material change in classification and related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. The Board agreed with the comments and modified the first sentence to state that a change in classification does not require audit report recognition unless the change represents the correction of a material misstatement or a change in accounting principle. Additionally, in the proposed standard, the Board used the word "review" to describe the auditor's responsibility when there has been a material change in financial statement classification. The Board concluded that the word "evaluate" better describes the auditor's responsibilities in this area and is more consistent with the other requirements in Auditing Standard No. 6. Accordingly, the Board replaced "review" with "evaluate."

## C. Description of GAAP and Removal of the GAAP Hierarchy from the Auditing Standards

As discussed previously, the FASB has proposed to incorporate the GAAP hierarchy into its own standards. The Board believes that it is appropriate to locate the GAAP hierarchy in the accounting standards rather than in the auditing standards. Thus, the Board amended its interim standards to remove the GAAP hierarchy from the auditing standards. These amendments do not change the principles in AU sec. 411 for evaluating fair presentation of the financial statements in conformity with GAAP.

Commenters strongly supported removing the GAAP hierarchy from the auditing standards and stated that it was appropriate for the GAAP hierarchy to be contained in the accounting standards. However, one commenter observed that the proposed amendments contain significant differences from the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's ("ASB") proposed amendment to AU sec. 411 of the ASB's standards.<sup>24</sup> The Board believes that the amendments to AU sec. 411 are consistent with the Board's objective of removing the GAAP hierarchy from the auditing standards, and retaining, or providing, direction necessary for audits of public companies. The significant differences between the ASB's amendments to its AU sec. 411 and the Board's amendments primarily are related to sources of GAAP for governmental entities and direction on the application of accounting principles, which the Board did not believe was appropriate for inclusion in the proposed amendments. In addition, the Board deleted references to Rule 203

---

<sup>24</sup> In addition, this commenter suggested that U.S. auditing standard-setters should work together to achieve consistency on core auditing standards that are used by almost all auditors of U.S. entities. This commenter also suggested that if the Board continues issuing its own standards for audits of public companies, it should adopt alternative numbering/referencing schemes in order to reduce confusion between its interim standards and the AICPA standards. The Board is considering these comments as it seeks to make continuous improvements to its standard-setting and other programs.

of the AICPA's *Code of Professional Conduct*. Rule 203 prohibits auditors from expressing an opinion on financial statements that do not conform to GAAP unless the auditor can demonstrate that due to unusual circumstances the financial statements would have been misleading without departing from GAAP. In 2003, when the Board adopted certain AICPA rules and ASB standards as interim Board standards, the Board did not adopt Rule 203. Consistent with that action, the proposed amendments did not include a reference to Rule 203.

## **D. Section-by-Section Description of Amendments to the Interim Auditing Standards**

In addition to proposing an auditing standard on evaluating consistency of financial statements, the Board also proposed amendments to other interim auditing standards and related interpretations. The following sections describe key aspects and elements of the amendments to the standards and interpretations, comments received, and changes incorporated in the final amendments.

### ***AU sec. 410, Adherence to Generally Accepted Accounting Principles***

The Board proposed to delete AU sec. 410.02 which discussed the meaning of "generally accepted accounting principles" and included other matters that are addressed elsewhere in the standards. However, some commenters suggested that, to improve clarity, AU sec. 410 should retain the sentence in existing AU sec. 410.02 which states that the "first standard is construed not to require a statement of fact by the auditor but an opinion."

The Board agreed that, when viewed alone, the first standard of reporting, contained in AU sec. 410.01, does not provide a complete description of the auditor's responsibilities related to fair presentation in conformity with GAAP. However, the first standard of reporting combined with the fourth standard clearly indicates that the auditor is providing a statement of an opinion and not a statement of fact. The fourth standard of reporting provides that the auditor's report shall contain either an expression of opinion regarding the financial statements taken as a whole, or an assertion to the effect that an opinion cannot be expressed. To emphasize that the first and fourth reporting standards must be read together, the Board is including the fourth standard of reporting in the final amendment to AU sec. 410. However, as proposed, the prior statement on the meaning of "generally accepted accounting principles" has been deleted from AU sec. 410.02.

### ***AU sec. 411, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles***

The Board proposed to delete AU sec. 411.02, which was a detailed description of GAAP, and AU secs. 411.05, .07 and .09-.15, which described the application of the GAAP hierarchy. The Board proposed to replace the description of GAAP in AU 411.02, with a statement that GAAP refers "to the accounting principles recognized in the standards of the Financial Accounting Standards Board or in the standards of any other standard-setting body recognized by the U.S. Securities and Exchange Commission."

However, commenters had concerns about the proposal. One commenter noted that the SEC might allow companies to file financial statement prepared in conformity with international financial reporting standards ("IFRS") but not recognize the International Accounting Standards Board, which issues IFRS, as a standard-setting body. Another commenter suggested that to avoid potential

confusion by users, the Board should acknowledge that there are other sources of GAAP for entities other than public companies.

In response to these comments, the Board decided to modify its proposed amendment of AU 411. It deleted AU sec. 411.02, which described GAAP, and revised AU sec. 411.01 to indicate that the auditor should look to the requirements of the SEC for the company under audit to identify the accounting principles that are applicable to that company. This change should also clarify that the standard is focused only on the accounting principles that may be used for purposes of the federal securities laws. Other accounting principles may apply to financial statements prepared for other purposes or by entities that are not issuers. The Board also modified AU 411.01 to better emphasize that standard's focus on the meaning of the phrase "present fairly."

Finally, as proposed, the Board eliminated AU secs. 411.16 and .17 which set an effective date and transition requirements that are no longer applicable.

### ***AU sec. 420, Consistency of Application of Generally Accepted Accounting Principles***

AU sec. 420 has been superseded by Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*. However, some commenters suggested that parts of AU sec. 420 should have been incorporated into Auditing Standard No. 6. Commenters suggested that guidance on the objective of the consistency standard and the relationship of consistency and comparability, matters that may not affect consistency, and changes expected to have a material future effect provided useful direction.

The Board believes that it is unnecessary to include the preceding direction. The proposed standard clarified that the auditor's report should recognize only those matters that require recognition under the existing auditing standards—i.e., a change in accounting principle or the correction of a material misstatement. The Board does not believe it is necessary to list in a standard those matters that do not require recognition in the auditor's report. Also, the Board believes that paragraph 1 clearly describes the objective of the standard. Paragraph 2 makes it clear that the standard considers comparability to be between periods for the company under audit.

### ***AU sec. 431, Adequacy of Disclosure in Financial Statements***

AU sec. 431 describes the auditor's responsibilities for evaluating the adequacy of disclosures in the financial statements. The amendments address two technical matters relating to that section.

Footnote 1 to AU sec. 431.03 is not consistent with the SEC's independence rules regarding non-audit services and therefore has been eliminated.

AU sec. 431.04 is an application of the AICPA's *Code of Professional Conduct* regarding the disclosure of confidential client information. In 2003, when the Board adopted certain AICPA rules and ASB standards as interim Board standards, the Board did not adopt Rule 301. Consistent with that action, the proposed amendments would eliminate AU sec. 431.04.

Some commenters expressed concerns that the proposed elimination of AU sec. 431.04 would change the auditor's obligations, or reflected Board policy, regarding the use of confidential client information in connection with evaluating the adequacy of financial statement disclosures. Those commenters generally recognized the limited nature of AU sec. 431.04 and acknowledged that, since in 2003 the Board did not adopt Rule 301, removing a portion of the interim standards based on that rule was a conforming amendment. However,

they were concerned that the Board's action might be construed as minimizing the auditor's responsibilities for maintaining the confidentiality of client information.

The Board is aware that many auditors have legal or professional obligations to maintain the confidentiality of client information. These requirements arise from the rules of state licensing authorities,<sup>25</sup> the rules of professional organizations such as the AICPA and the International Federation of Accountants, and the laws of some foreign jurisdictions. The Board's decision to omit Rule 301 from its interim standards was based on a determination that incorporation of that rule was not necessary to fulfill the Board's mandate under Section 103(a)(1) and (3) of the Sarbanes-Oxley Act. It did not reflect a decision that auditor confidentiality requirements imposed by other authorities were inappropriate. Similarly, in amending AU sec. 431, the Board seeks neither to modify nor to detract from existing confidentiality requirements.

### ***Interpretations of the Auditing Standards in AU 400 Sections***

The auditing interpretation in AU sec. 9420.52-.54 has been incorporated into Auditing Standard No. 6 and therefore has been eliminated, as proposed. The auditing interpretations in AU sec. 9411 and the remaining auditing interpretations in AU sec. 9420 are addressed by the accounting standards and therefore also have been eliminated as proposed.<sup>26</sup>

### ***AU sec. 508, Reports on Audited Financial Statements***

In general, the Board has adopted the amendments as proposed. The amendments have conformed this interim auditing standard to Auditing Standard No. 6 on evaluating consistency and the amendments to AU secs. 410 and 411, described above. For example, AU sec. 508.16 now specifically identifies the matters related to consistency of the company's financial statements that should be recognized in the auditor's report. Similarly, AU sec. 508.17A provides the requirements for evaluating consistency, that also is in paragraph 7 of Auditing Standard No. 6. AU secs. 508.17B and C, and AU sec. 508.18A provide separate requirements for reporting on changes in accounting principles and restatements, as discussed previously.

In addition, the amendments eliminate AU sec. 508.14-.15. Those paragraphs were an application of AICPA Ethics Rule 203, which, as previously noted, was not adopted as an interim standard by the Board.<sup>27</sup>

---

<sup>25</sup> For example, confidentiality requirements are included in the provisions of the Uniform Accountancy Act, which has been enacted in some form by many states.

<sup>26</sup> One commenter suggested that some of the auditing interpretations should be retained because the guidance is still relevant. The Board considered the view of this commenter but decided to eliminate the interpretations because other auditing standards provided the necessary direction regarding the matter addressed in the interpretation, the interpretation dealt with items not requiring recognition in the auditor's report, or the interpretation was related to an accounting consideration of the company.

<sup>27</sup> One commenter expressed concern about deleting these paragraphs and suggested that, if the Board's intent was to delete all reference to the AICPA Code of Professional Conduct from the Board's interim standards, the Board should indicate the professional ethics that auditors should follow when conducting audits according to PCAOB standards. The Board's Rules 3500T and 3600T describe the Board's interim ethics and independence standards, respectively. These standards include certain provisions from the AICPA's Code of Professional Conduct. In addition, the Board has adopted ethics and independence rules concerning independence, tax services, and contingent fees. See PCAOB Release No. 2005-014 (July 26, 2005). State law and membership organizations may impose additional requirements.

Finally, in light of the definitions in SFAS No. 154, the amendments change references to "restatements" to the more general term "adjustments" to refer broadly to changes to previously issued financial statements that may result from either a correction of a misstatement or a change in accounting principle.<sup>28</sup>

### **References to APB Opinion No. 20**

In addition, the Board has adopted other amendments to update references to APB Opinion No. 20, which was superseded by SFAS No. 154. Accordingly the Board amended AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, footnote 3 to paragraph .06, to reference paragraphs 25 and 26 of SFAS No. 154. For AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, footnote 4 to paragraph .19, the Board referenced paragraph 20 of SFAS No. 157, *Fair Value Measurements*, which states that a change in valuation technique or its application is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances. This replaces a reference to the preferability requirement in SFAS No. 157 because that requirement does not apply to a change in a company's method for determining fair value. Paragraph 20 is the accounting guidance applicable to a company's change in method for determining fair value.

## **E. Effective Date**

This standard and amendments will be effective 60 days after approval by the SEC.

\* \* \*

On the 29th day of January, in the year 2008, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

### **APPENDICES—**

1. Auditing Standard No. 6—*Evaluating Consistency of Financial Statements*
2. Amendments to Interim Auditing Standards

---

<sup>28</sup> Some commenters suggested that certain other changes were needed to AU sec. 508 or that certain amendments were not necessary. For example, some commenters suggested eliminating AU sec. 508.57 and retaining the original terminology in AU secs. 508.73-74. The Board decided that some of the suggested changes would change existing practice, such as the elimination of AU sec. 508.57, and were outside the scope of this project. For the others, the Board concluded that the amendments were consistent with the direction in Auditing Standard No. 6. In addition, one commenter believed that there were inconsistencies between the proposed amendments to AU sec. 508 and Staff Questions and Answers, *Adjustments to Prior-Period Financial Statements Audited By a Predecessor Auditor*. However, the Board reviewed the Staff Questions and Answers and did not agree that there were inconsistencies with the proposed amendments to AU sec. 508.

## Auditing Standard No. 7

### ***Engagement Quality Review***

[Supersedes SECPS Requirements of Membership §1000.08(f).]

Source: Auditing Standard Nos. 8–15.

#### **Applicability of Standard**

1. An engagement quality review and concurring approval of issuance are required for the following engagements conducted pursuant to the standards of the Public Company Accounting Oversight Board ("PCAOB"): (a) an audit engagement; (b) a review interim financial information; and (c) an attestation engagement performed pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*.

#### **Objective**

2. The objective of the engagement quality reviewer is to perform an evaluation of the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance.<sup>1</sup>

#### **Qualifications of an Engagement Quality Reviewer**

3. The engagement quality reviewer must be an associated person of a registered public accounting firm. An engagement quality reviewer from the firm that issues the engagement report (or communicates an engagement conclusion, if no report is issued) must be a partner or another individual in an equivalent position. The engagement quality reviewer may also be an individual from outside the firm.<sup>2</sup>

4. As described below, an engagement quality reviewer must have competence, independence, integrity, and objectivity.

Note: The firm's quality control policies and procedures should include provisions to provide the firm with reasonable assurance that the engagement

---

<sup>1</sup> In the context of an audit, "engagement report" refers to the audit report (or reports if, in an integrated audit, the auditor issues separate reports on the financial statements and internal control over financial reporting). In the context of an engagement to review interim financial information, the term refers to the report on interim financial information. An engagement report might not be issued in connection with a review of interim financial information. See paragraph .03 of AU section ("sec.") 722, *Interim Financial Information*.

<sup>2</sup> An outside reviewer who is not already associated with a registered public accounting firm would become associated with the firm issuing the report if *he or she* (rather than, or in addition to, his or her firm or other employer): (1) receives compensation from the firm issuing the report for performing the review or (2) performs the review as agent for the firm issuing the report. See PCAOB Rule 1001(p)(i) for the definition of an associated person of a registered public accounting firm.

quality reviewer has sufficient competence, independence, integrity, and objectivity to perform the engagement quality review in accordance with the standards of the PCAOB.

## Competence

5. The engagement quality reviewer must possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the engagement partner on the engagement under review.<sup>3</sup>

## Independence, Integrity, and Objectivity

6. The engagement quality reviewer must be independent of the company, perform the engagement quality review with integrity, and maintain objectivity in performing the review.

Note: The reviewer may use assistants in performing the engagement quality review. Personnel assisting the engagement quality reviewer also must be independent, perform the assigned procedures with integrity, and maintain objectivity in performing the review.

7. To maintain objectivity, the engagement quality reviewer and others who assist the reviewer should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team. The engagement partner remains responsible for the engagement and its performance, notwithstanding the involvement of the engagement quality reviewer and others who assist the reviewer.

8. The person who served as the engagement partner during either of the two audits preceding the audit subject to the engagement quality review may not be the engagement quality reviewer. Registered firms that qualify for the exemption under Rule 2-01(c)(6)(ii) of Regulation S-X, 17 C.F.R. 210.2-01(c)(6)(ii), are exempt from the requirement in this paragraph.

## Engagement Quality Review for an Audit

### Engagement Quality Review Process

9. In an audit engagement, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report. To evaluate such judgments and conclusions, the engagement quality reviewer should, to the extent necessary to satisfy the requirements of paragraphs 10 and 11: (1) hold discussions with the engagement partner and other members of the engagement team, and (2) review documentation.

10. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

---

<sup>3</sup> The term "engagement partner" has the same meaning as the "practitioner-in-charge of an engagement" in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control-Competencies Required by a Practitioner-in-Charge of an Attest Engagement*. QC sec. 40 describes the competencies required of a practitioner-in-charge of an attest engagement. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In an audit, the engagement quality reviewer should:

- a. Evaluate the significant judgments that relate to engagement planning, including—
  - The consideration of the firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process,
  - The consideration of the company's business, recent significant activities, and related financial reporting issues and risks, and
  - The judgments made about materiality and the effect of those judgments on the engagement strategy.
- b. Evaluate the engagement team's assessment of, and audit responses to—
  - Significant risks identified by the engagement team, including fraud risks, and
  - Other significant risks identified by the engagement quality reviewer through performance of the procedures required by this standard.

Note: A *significant risk* is a risk of material misstatement that requires special audit consideration.
- c. Evaluate the significant judgments made about (1) the materiality and disposition of corrected and uncorrected identified misstatements and (2) the severity and disposition of identified control deficiencies.
- d. Review the engagement team's evaluation of the firm's independence in relation to the engagement.
- e. Review the engagement completion document<sup>4</sup> and confirm with the engagement partner that there are no significant unresolved matters.
- f. Review the financial statements, management's report on internal control, and the related engagement report.
- g. Read other information in documents containing the financial statements to be filed with the Securities and Exchange Commission ("SEC")<sup>5</sup> and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or material misstatements of fact of which the engagement quality reviewer is aware.
- h. Based on the procedures required by this standard, evaluate whether appropriate consultations have taken place on difficult or contentious matters. Review the documentation, including conclusions, of such consultations.
- i. Based on the procedures required by this standard, evaluate whether appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.

---

<sup>4</sup> Paragraph 13 of PCAOB Auditing Standard No. 3, *Audit Documentation*, requires the auditor to identify all significant findings or issues in an engagement completion document.

<sup>5</sup> See paragraphs .04–.06 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*; AU sec. 711, *Filings Under Federal Securities Statutes*.

## Evaluation of Engagement Documentation

11. In an audit, the engagement quality reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 10—

- a. Indicates that the engagement team responded appropriately to significant risks, and
- b. Supports the conclusions reached by the engagement team with respect to the matters reviewed.

## Concurring Approval of Issuance

12. In an audit, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care<sup>6</sup> the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A *significant engagement deficiency* in an audit exists when (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

13. In an audit, the firm may grant permission to the client to use the engagement report only after the engagement quality reviewer provides concurring approval of issuance.<sup>7</sup>

## Engagement Quality Review for a Review of Interim Financial Information

### Engagement Quality Review Process

14. In an engagement to review interim financial information, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued. To evaluate such judgments and conclusions, the engagement quality reviewer should, to the extent necessary to satisfy the requirements of paragraphs 15 and 16: (1) hold discussions with the engagement partner and other members of the engagement team, and (2) review documentation.

15. In a review of interim financial information, the engagement quality reviewer should:

- a. Evaluate the significant judgments that relate to engagement planning, including the consideration of—

---

<sup>6</sup> See AU sec. 230, *Due Professional Care in the Performance of Work*.

<sup>7</sup> Concurring approval of issuance by the engagement quality reviewer also is required when reissuance of an engagement report requires the auditor to update his or her procedures for subsequent events. In that case, the engagement quality reviewer should update the engagement quality review by addressing those matters related to the subsequent events procedures.

- The firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process,
  - The company's business, recent significant activities, and related financial reporting issues and risks, and
  - The nature of identified risks of material misstatement due to fraud.
- b. Evaluate the significant judgments made about (1) the materiality and disposition of corrected and uncorrected identified misstatements and (2) any material modifications that should be made to the disclosures about changes in internal control over financial reporting.
  - c. Perform the procedures described in paragraphs 10.d and 10.e.
  - d. Review the interim financial information for all periods presented and for the immediately preceding interim period, management's disclosure for the period under review, if any, about changes in internal control over financial reporting, and the related engagement report, if a report is to be issued.
  - e. Read other information in documents containing interim financial information to be filed with the SEC<sup>8</sup> and evaluate whether the engagement team has taken appropriate action with respect to material inconsistencies with the interim financial information or material misstatements of fact of which the engagement quality reviewer is aware.
  - f. Perform the procedures in paragraphs 10.h and 10.i

## Evaluation of Engagement Documentation

**16.** In a review of interim financial information, the engagement quality reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 15 supports the conclusions reached by the engagement team with respect to the matters reviewed.

## Concurring Approval of Issuance

**17.** In a review of interim financial information, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A *significant engagement deficiency* in a review of interim financial information exists when (1) the engagement team failed to perform interim review procedures necessary in the circumstances of the engagement, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

**18.** In a review of interim financial information, the firm may grant permission to the client to use the engagement report (or communicate an engagement conclusion to its client, if no report is issued) only after the engagement quality reviewer provides concurring approval of issuance.

---

<sup>8</sup> See AU sec. 722.18f; AU sec. 711.

## **Engagement Quality Review for an Attestation Engagement Performed Pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers***

**18A.** In an attestation engagement performed pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the attestation engagement and in preparing the engagement report. To evaluate such judgments and conclusions, the engagement quality reviewer should, taking into account the procedures performed in the engagement quality review of the financial statement audit, (1) hold discussions with the engagement partner and other members of the engagement team, (2) read the engagement report and the document containing management's assertions, and (3) review the engagement completion document and other relevant documentation.

**18B.** In an attestation engagement performed pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A significant engagement deficiency in an attestation engagement performed pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, exists when (1) the engagement team failed to perform attestation procedures necessary in the circumstances of the engagement, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

**18C.** In an attestation engagement performed pursuant to Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, or Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, the firm may grant permission to the client to use the engagement report only after the engagement quality reviewer provides concurring approval of issuance.

## **Documentation of an Engagement Quality Review**

**19.** Documentation of an engagement quality review should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of this standard, including information that identifies:

- a. The engagement quality reviewer, and others who assisted the reviewer,

- b. The documents reviewed by the engagement quality reviewer, and others who assisted the reviewer,
- c. The date the engagement quality reviewer provided concurring approval of issuance or, if no concurring approval of issuance was provided, the reasons for not providing the approval.

**20.** Documentation of an engagement quality review should be included in the engagement documentation.

**21.** The requirements related to retention of and subsequent changes to audit documentation in PCAOB Auditing Standard No. 3, *Audit Documentation*, apply with respect to the documentation of the engagement quality review.

### PCAOB Release No. 2009-004

July 28, 2009

PCAOB Rulemaking  
Docket Matter No. 025

#### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting an auditing standard, *Engagement Quality Review*, that will be applicable to all registered firms and will supersede the Board's interim concurring partner review requirement, and a conforming amendment to the Board's interim quality control standards.

#### Board Contacts

Gregory Scates, Deputy Chief Auditor (202/207-9114; scatesg@pcaobus.org) and Dima Andriyenko, Associate Chief Auditor (202/207-9130; andriyenkod@pcaobus.org)

\* \* \* \* \*

#### I. Introduction

Section 103 of the Sarbanes-Oxley Act (the "Act") directs the Board, among other things, to set standards for public company audits, including a requirement or each registered public accounting firm to "provide a concurring or second partner review and approval of [each] audit report (and other related information), and concurring approval in its issuance. . . ." A well-performed engagement quality review ("EQR") can serve as an important safeguard against erroneous or insufficiently supported audit opinions and, accordingly, can contribute to audit quality. In February 2008, the Board proposed to replace its interim requirement with a new EQR standard.<sup>1</sup> The Board's original proposal was developed in response, among other things, to feedback from some members of its Standing Advisory Group ("SAG") that the existing interim requirements<sup>2</sup> (the "existing requirements") do not provide for a sufficiently thorough review to give investors assurance on the quality of engagements. The proposal was intended to enhance the quality of the EQR by strengthening the existing requirements.

Commenters recommended significant modifications to the original proposal, and, in response, the Board made changes designed to better tailor the standard to its purposes.<sup>3</sup> Because of the extent of those changes, the Board again sought public comment, this time on the standard as revised. The Board has considered

<sup>1</sup> PCAOB Release No. 2008-002, Proposed Auditing Standard—*Engagement Quality Review and Conforming Amendment to the Board's Interim Quality Control Standards* (February 26, 2008) (the "original proposal").

<sup>2</sup> The Securities and Exchange Commission Practice Section ("SECPS") of the American Institute of Certified Public Accountants ("AICPA") Requirements of Membership Sections 1000.08(f); 1000.39, Appendix E.

<sup>3</sup> Comments on the original proposal and the Board's responses are described in PCAOB Release No. 2009-001, Proposed Auditing Standard—*Engagement Quality Review* (March 4, 2009) (the "reproposing release").

those comments, as well as the input of the SAG, and the final standard ("AS No. 7" or the "EQR standard") has benefitted from the additional public input.<sup>4</sup>

The EQR standard the Board is adopting provides for a rigorous review that will serve as a meaningful check on the work performed by the engagement team. AS No. 7 should increase the likelihood that a registered public accounting firm will catch any significant engagement deficiencies before it issues its audit report. As a result, the Board recognizes that more work may be necessary under the EQR standard than was performed in some concurring reviews under the existing requirements.

At the same time, the Board has been sensitive to commenters' concerns and agrees that the EQR should not become, in effect, a second audit. Instead, the EQR should be—and, as described in AS No. 7, is—a review of work already performed by the engagement team. The EQR standard requires the engagement quality reviewer (or the "reviewer") to evaluate the significant judgments made and related conclusions reached by the engagement team in forming the overall conclusion on the engagement and in preparing the engagement report, and requires certain procedures designed to focus the reviewer on those judgments and conclusions.

The procedures required of the reviewer by AS No. 7 are different in nature from the procedures required of the engagement team. Unlike the engagement team, a reviewer does not perform substantive procedures or obtain sufficient evidence to support an opinion on the financial statements or internal control over financial reporting. If more audit work is necessary before the reviewer may provide concurring approval of issuance, the engagement team—not the reviewer—is responsible under PCAOB standards for performing the work. In contrast, the reviewer fulfills his or her responsibility to perform an effective review of the engagement under the EQR standard by holding discussions with the engagement team, reviewing documentation, and determining whether he or she can provide concurring approval of issuance.

## II. Overview of Auditing Standard No. 7

Overall, commenters preferred the repropoed standard to the original proposal, though some continued to believe that certain provisions were unclear and suggested certain changes to the standard. After considering commenters' feedback, the Board has made several modifications to the EQR standard to provide additional clarity. This section describes the comments received, the Board's response, and changes made in AS No. 7.<sup>5</sup>

### A. Applicability of the EQR Requirement

Paragraph 1 of the repropoed standard required an EQR for audit engagements and reviews of interim financial information ("interim reviews"), but not for other engagements performed according to the standards of the PCAOB. For

---

<sup>4</sup> The Board received 38 comments on the original proposal and 30 comments on the repropoed standard on April 2, 2009. A transcript of that discussion is available on the Board's website at [http://pcaobus.org/Rules/Rulemaking/Docket%20025/2009-04-02\\_EQR\\_SAG\\_Transcript.pdf](http://pcaobus.org/Rules/Rulemaking/Docket%20025/2009-04-02_EQR_SAG_Transcript.pdf). The SAG also discussed EQR on June 22, 2004 and October 5, 2005. Archived webcasts are available on the Board's website at <http://pcaobus.org/News/Webcasts/Pages/default.aspx>.

<sup>5</sup> The Board received some comments related to its standard-setting process in general. The Board continuously endeavors to improve its processes, including its standard-setting process, and is considering these comments as it does so.

the most part, commenters believed that this provision was appropriate.<sup>6</sup> One commenter, however, suggested including the EQR requirements for interim reviews in AU section ("sec.") 722, *Interim Financial Information*, instead of including them as part of the EQR standard to "make it clear that the scope of the procedures performed remain under the umbrella of the objective of a review of interim financial information (which is much different than the scope and objective of an audit)." Because the requirements for the EQR of interim reviews in AS No. 7 are closely related to and described by reference to the requirements for the EQR of an audit, the Board believes it is more appropriate to locate both sets of requirements in the same standard. Accordingly, the Board is adopting the provisions regarding applicability of the EQR standard as repropoed.

## B. Statement of Objective

The repropoed standard included a statement of objective intended to focus reviewers on the overall purpose of the standard as they carry out the more specific EQR requirements. As repropoed, the objective of the engagement quality reviewer was "to perform an evaluation of the significant judgments made by the engagement team and the conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance."

Most commenters agreed that the EQR standard should include a statement of objective. While some believed the objective was appropriate as repropoed, several suggested substituting the phrase "related conclusions reached" for "the conclusions reached" to indicate that the reviewer is required to evaluate conclusions relating to significant judgments, rather than all conclusions. In addition, some commenters suggested making the objective less vague, while others wanted the Board to broaden it or make it less procedural.

After considering these comments, the Board has, as suggested by commenters, revised the objective so that it refers to "significant judgments made by the engagement team<sup>7</sup> and the *related* conclusions reached. . . ." (emphasis added). This change should help reviewers maintain their focus on areas of the engagement that are most likely to contain a significant engagement deficiency. With this revision, the Board believes the statement of objective establishes, at the appropriate level of detail, a framework for the performance of the EQR that is consistent with the specific requirements in AS No. 7. Corresponding changes have been made in paragraphs 9 and 14, which describe the scope of the EQR for audits and interim reviews, respectively. The reviewer achieves his or her objective by complying with the specific requirements of the standard.

## C. Qualifications of the Engagement Quality Reviewer

In order to provide for a high-quality EQR, the repropoed standard described the qualifications that any reviewer would be required to meet. These provisions

---

<sup>6</sup> One commenter did not believe that an EQR should be required for interim reviews because of concerns about the scope of the EQR for interim reviews. The section entitled *Specifically Required Procedures in the EQR of an Interim Review* of this release discusses the EQR requirements for interim reviews.

<sup>7</sup> Because the engagement partner has final responsibility for the engagement, he or she has final responsibility for the significant judgments made during the engagement, notwithstanding any involvement in or responsibility for those judgments by firm personnel outside of the engagement team, such as members of the firm's national office. Accordingly the "significant judgments made by the engagement team" include all of the significant judgments made during the engagement.

were designed to provide assurance that the reviewer could effectively perform an EQR of the particular engagement under review. At the same time, the provisions recognized that smaller firms may have few partners—and, in the case of sole practitioners, no additional partners—available in-house to perform the EQR.

Accordingly, the repropoed standard required an engagement quality reviewer from within the firm issuing the engagement report to be a partner or another individual in an equivalent position, but also allowed a qualified individual from outside the firm to perform the EQR. In either event, the repropoed standard required the reviewer to be an associated person<sup>8</sup> of a registered public accounting firm.<sup>9</sup> The repropoed standard also included a general competence requirement and requirements related to the reviewer's independence, integrity, and objectivity.

### ***In-House Reviewer: Partner or an Individual in an Equivalent Position***

The requirement in the repropoed standard for a reviewer from within the firm to be a partner or an individual in an equivalent position was intended to address concerns expressed by some commenters on the original proposal about the authority of the engagement quality reviewer relative to that of the engagement partner. Because the EQR is intended to be an objective second look at work performed by the engagement team, the reviewer should be able to withstand pressure from the engagement partner or other firm personnel, such as members of the firm's national office. As described in the repropoing release, the Board believed that concerns about authority will most often arise when the reviewer and the engagement partner work at the same firm. The Board also believed that a standard based on perceptions of relative authority within a firm would not be sufficiently clear to be workable. Accordingly, the Board attempted to address these concerns with a requirement that an in-house reviewer—but not one from outside the firm—be a partner or person in an equivalent position.

While some commenters supported the repropoed requirement, others disagreed with it, generally because, in their view, being a partner or person in an equivalent position would not necessarily ensure that the reviewer possesses the qualities required to perform the EQR. These commenters noted that partners as well as non-partners may be subject to internal pressure within the firm to provide concurring approval of issuance. In addition, in one commenter's view, it would be burdensome for one-partner firms to hire an outside reviewer to comply with this requirement. Finally, some commenters also asked the Board to define the term "equivalent position."

While both partners and non-partners may experience pressure within the firm to provide concurring approval of issuance, the Board continues to believe that

---

<sup>8</sup> For clarity, in paragraph 3 of AS No. 7, the Board added a reference to Rule 1001(p)(i), which defines the term "associated person of a registered public accounting firm." A person not already associated with a registered firm can enter into a relationship with the firm issuing the report such that the person would become associated with that firm by performing the review. Specifically, a person not already associated with a firm would become associated with the firm issuing the report if *he or she* (rather than, or in addition to, his or her firm or other employer): (1) receives compensation from the firm issuing the report for performing the review or (2) performs the review as agent for the firm issuing the report. For example, if the firm issuing the report contracts directly with an employee of an unregistered accounting firm to perform the engagement quality review, that person would become associated with the firm issuing the report by virtue of that independent contractor relationship.

<sup>9</sup> A registered public accounting firm has an obligation to secure and enforce consents to cooperate with the Board from each associated person of the firm, see Section 102(b)(3) of the Act, including those who become associated with the firm by performing the review. The Board also may directly sanction any such person who fails to cooperate in an investigation or inspection. See Section 105(b)(3) of the Act and PCAOB Rules 5110 and 4006.

the repropoed requirement is the most appropriate way to address this issue. Partnership is not a perfect proxy for authority, but a partner is more likely to possess sufficient authority to conduct the EQR than a non-partner. The Board continues to believe that a requirement based on perceptions of authority would not be workable. Accordingly, the Board is adopting this requirement substantially as repropoed.<sup>10</sup> At a firm that is not organized as a partnership, "an individual in an equivalent position" is someone with the degree of authority and responsibility of a partner in a firm that is organized as a partnership.

### ***Qualified Reviewer from Outside the Firm***

As noted above, the repropoed standard also allowed a qualified reviewer from outside the firm to conduct the review. In the repropoing release, the Board expressed the view that allowing a sufficiently qualified professor or other individual not employed by an accounting firm to perform the EQR should not negatively affect audit quality and may mitigate the compliance burden on sole practitioners and smaller firms. The Board sought comment on whether a qualified accountant who is not employed by an accounting firm should be allowed to conduct the EQR.<sup>11</sup>

The majority of commenters on this topic did not oppose the repropoed provision. Some commenters, however, cautioned that reviewers from outside an accounting firm may not necessarily have the required technical expertise or recent audit experience. One commenter believed that allowing the use of such outside reviewers could "hamper the existing independence rules,"<sup>12</sup> increase costs, and limit the potential growth of partners.

After considering these comments, the Board continues to believe that the EQR standard can—and should—allow firms the proposed flexibility in choosing a reviewer, provided that reviewer meets the competence and other qualification requirements. According to these requirements, as discussed below, any reviewer would have to have the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the person who has overall responsibility for the engagement under review. Accordingly, while some persons from outside a firm might not have the required qualifications, those who do can effectively perform the EQR.<sup>13</sup>

The Board also does not agree that allowing the use of a reviewer from outside the firm issuing the report would negatively affect the application or enforcement of the independence rules. As the Board noted in the repropoing release, it will continue to consider anyone who performs the EQR to be an "audit partner" and a member of the "audit engagement team" for purposes of independence requirements.<sup>14</sup> In addition, because AS No. 7 would not require a firm to use an outside reviewer, allowing a firm to do so should not increase costs or limit the potential growth of partners. Any firm that is concerned that invoking the

---

<sup>10</sup> One commenter suggested that the phrasing of the repropoed standard did not establish a requirement for the in-house reviewer to be a partner because it stated that the reviewer "may be" a partner, a person in an equivalent position, or an individual outside the firm. While the use of "may" in that context imposed a requirement, to avoid any confusion on this point the Board has rephrased the requirement in paragraph 3 of AS No. 7 to use the word "must."

<sup>11</sup> As noted in the repropoing release, under the existing requirement a firm may seek a waiver to engage an outside experienced individual to perform the EQR. Because AS No. 7 allows a firm to use an outside reviewer, such a waiver is not necessary under AS No. 7.

<sup>12</sup> The comment did not explain how the independence rules would be hampered.

<sup>13</sup> Similarly, a reviewer does not meet all of the qualification requirements in AS No. 7 by virtue of his or her status as a partner or employee of an accounting firm.

<sup>14</sup> See Rule 2-01(f) of Regulation S-X, 17 C.F.R. 210.2-01(f), for the definitions of "audit partner" and "audit engagement team."

flexibility provided by the EQR standard would raise its costs or impede the development of its partners could, simply, decline to do so and use a reviewer from within the firm if one is available.

When considering an outside individual for the role of the engagement quality reviewer, the firm will likely need to make additional inquiries to obtain necessary information about the individual's qualifications. For example, while information about independence of the firm's partners is typically collected and evaluated as part of the periodic independence review, information about the independence of an outside reviewer will likely need to be requested and evaluated as part of the reviewer selection process. Firms also likely know more about the competence of their own partners than of an outside reviewer.

### **General Competence Requirement**

As noted above, the repropose standard, like the original proposal, included a requirement for the reviewer to "possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the person who has overall responsibility for the same type of engagement." This provision was intended to set a minimum requirement for those who would perform the EQR. In response to comments on the original proposal, the re-proposing release explained that this provision, by its terms, did not require the engagement quality reviewer's knowledge and competence to match those of the engagement partner, or for the reviewer to be a "clone" of the engagement partner.<sup>15</sup>

Some commenters reiterated their concerns that the engagement quality reviewer's skills would be expected to match those of the engagement partner, and that such a requirement could cause resource constraints for smaller firms. Other commenters suggested modifying the general competence provision by stating that the reviewer's competence should be established based on the facts and circumstances of the engagement, or describing the required qualifications from the reviewer's perspective, rather than by comparing them to the qualifications of the engagement partner. Finally, some commenters suggested including in the EQR standard a statement that the reviewer may obtain the required level of knowledge and competence through utilizing assistants.

The Board continues to believe that if a minimum level of knowledge and competence in accounting, auditing, and financial reporting is required to conduct an audit, it is similarly necessary to effectively review that audit.<sup>16</sup> The reviewer is not required to possess other competencies, e.g., those related to communication or management skills, that the engagement partner may have.

Accordingly, the Board is adopting the general competence provision substantially as proposed. The Board is, however, modifying the requirement to clarify further that the determination of what constitutes the appropriate level of knowledge and competence should be based on the circumstances of the engagement, including the size and complexity of the business under audit or under interim review.<sup>17</sup> In AS No. 7, the Board replaced the phrase "the same type of

---

<sup>15</sup> Specifically, the repropose release noted:

The general competence provision merely sets a minimum requirement for those who would perform the EQR, but it does not require the reviewer's competence to match that of the engagement partner. In many cases, both individuals' competence will exceed the minimum level prescribed, but there is no requirement that they do so in tandem, or even at all.

<sup>16</sup> While a reviewer may use assistants in performing the EQR, the reviewer's own skills should meet the requirements of AS No. 7.

<sup>17</sup> Footnote 18 on page 9 of the original release stated, "The determination of what constitutes the appropriate level of knowledge and competence should be based on the circumstances of the engagement, including the size or complexity of the business."

engagement" with "the engagement." The new phrasing focuses the reviewer on the particular engagement under review, rather than that "type" of engagement.<sup>18</sup> Firms that do not have partners that meet this general competence requirement available to perform the EQR may engage an outside reviewer to perform an EQR.

### ***Independence, Integrity, and Objectivity***

Like the original proposal, the repropoed standard required the reviewer to be independent of the company, perform the review with integrity, and maintain objectivity. Comments on the reproposal focused on two provisions regarding objectivity—the prohibition against the reviewer supervising the engagement team and the two-year "cooling-off" period before the engagement partner could perform the EQR.

### ***Supervision of the Engagement Team***

The repropoed standard provided that to maintain objectivity the engagement quality reviewer should not, among other things, "supervise the engagement team with respect to the engagement subject to the engagement quality review." The phrase "subject to the engagement quality review" was intended to clarify that partners with leadership responsibilities in a firm, region, service, or industry practice are not, solely because of those responsibilities, precluded from reviewing any engagement performed by their subordinates in the firm. Some commenters believed that the phrase "subject to the engagement quality review" was not sufficient to clarify this point.

After considering these comments, the Board has decided that the express prohibition against "supervis[ing] the engagement team with respect to the engagement subject to the engagement quality review" is not necessary to effectuate the Board's intent. The remaining two criteria for maintaining objectivity in paragraph 7 of AS No. 7—not making decisions on behalf of the engagement team and not assuming any responsibilities of the engagement team—are sufficient to preclude those involved in the engagement from serving as the engagement quality reviewer.<sup>19</sup> For example, partners (including the engagement partner and other partners on larger engagements), managers, and others who supervise engagement personnel on the audit under review would not qualify under the remaining criteria because they have assumed responsibilities of the engagement team. At the same time, removing the phrase "supervise the engagement team" from AS No. 7 should further clarify that those in leadership positions in the firm who did not make decisions for or assume responsibilities of the engagement team may perform the EQR.

---

<sup>18</sup> In addition, to simplify the text of AS No. 7, the Board replaced the phrase "person with overall responsibility for the engagement" with the term "engagement partner." Footnote 3 of AS No. 7 explains that the term "engagement partner" has the same meaning as the phrases the "auditor with final responsibility for the audit," as described in AU sec. 311, *Planning and Supervision*, and the "practitioner-in-charge of an engagement," as described in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control-Competencies Required by a Practitioner-in-Charge of an Attest Engagement*. Because all of these terms refer to the same person, this change does not alter the meaning of the EQR standard.

<sup>19</sup> AS No. 7 does not prohibit the engagement team from consulting with the reviewer, as long as the reviewer maintains his or her objectivity in accordance with paragraph 7. As noted in the repropoing release, such consultations may contribute to audit quality. In addition, one commenter asked the Board to clarify whether a reviewer may consult with the same personnel who previously consulted with the engagement team. The EQR standard does not prohibit the reviewer from holding discussions with such personnel. The reviewer may not, however, use personnel who previously consulted with the engagement team as assistants in performing the review unless they meet the objectivity and other qualification requirements of AS No. 7. To emphasize the requirement that assistants maintain objectivity, the Board added to paragraph 7 of AS No. 7 the phrase "and others who assist the reviewer."

### *The Two-Year "Cooling-Off" Period*

The repropoed standard included a provision prohibiting an engagement partner from serving as the engagement quality reviewer for at least two years following his or her last year as the engagement partner.<sup>20</sup> The Board included the "cooling-off" period because it believed that it would be harder for an engagement partner who has had overall responsibility for the audit for at least a year to perform the review with the necessary level of objectivity. While a number of commenters expressed general support for a two-year "cooling-off" period, some believed that it could impose an undue hardship on smaller firms, and suggested a shorter "cooling-off" period.

After considering these comments, the Board continues to believe that a "cooling-off" period will be beneficial to audit quality and that a two-year period appropriately safeguards objectivity without imposing unnecessary hardship on most firms. At the same time, the Board recognizes that compliance with this requirement could be difficult for smaller firms with fewer personnel. In its independence rules, the Securities and Exchange Commission ("SEC") exempted certain smaller firms from the audit partner rotation requirements. Specifically, Rule 2-01(c)(6)(ii) of Regulation S-X provides an exemption for firms with fewer than five issuer audit clients and fewer than ten partners, provided the Board "conducts a review at least once every three years of each of the audit client engagements that would result in a lack of auditor independence under" the SEC partner rotation requirements. The Board believes that this exemption—including the provision regarding Board inspections—also describes an appropriate exemption from the "cooling-off" requirement in the EQR standard. Accordingly, firms that qualify for the exemption from the SEC partner rotation requirements will also be exempt from the "cooling-off" period under AS No. 7.

## **D. EQR Process**

The Board's goal in proposing an EQR standard was to strengthen the existing requirements for concurring reviews in order to promote a more meaningful review of the work performed by the engagement team. Accordingly, the original proposal described certain procedures that the reviewer was required to perform that were more specific than those in the existing requirements. In response to comments received on the original proposal, the Board clarified some of the specifically required procedures and included, in a separate section in the repropoed standard, tailored requirements for an EQR of an interim review.

In general, commenters believed that the repropoed standard described the requirements of the EQR more clearly than the original proposal. However, a number of commenters suggested additional modifications that, in their view, would further clarify the Board's intent and ensure consistency of the requirements with the statement of objective. As described below, after considering these comments, the Board has modified certain of these requirements.

### ***Terminology Used to Describe the Required Procedures***

Several commenters noted that the specifically required procedures in paragraphs 9, 10, 14, and 15 of the repropoed standard were described using different, but in some cases similar, terms such as "determine," "evaluate," "identify,"

---

<sup>20</sup> SEC independence rules allow engagement partners and concurring partners to serve for five consecutive years, after which they may not serve in either role for another period of five years. Within a five-year period, SEC independence rules do not impose a "cooling-off" period before the engagement partner can serve as the concurring partner. See Rule 2-01(c)(6)(i)(A) of Regulation S-X.

"read," and "review," which some commenters found confusing. In one commenter's view, the terms "determine," "identify," and "evaluate" may require the reviewer to perform procedures that are similar in scope to the procedures performed by the engagement partner. The commenters asked the Board to clarify the terminology in these sections of the EQR standard.

While the Board does not believe that this terminology required the reviewer to perform procedures that are appropriately performed by the engagement partner, it does agree that the terminology should not be confusing. Accordingly, the Board reduced the number of terms used in AS No. 7, so that the required procedures in paragraphs 9, 10, 14, and 15 are described using two terms, "evaluate" and "review"—with one exception. Because AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, requires the auditor to read other information in documents containing the financial statements to be filed with the SEC, paragraphs 10.g and 15.e of AS No. 7, like in the original and repropoed standards, also require the reviewer to read such other information and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or interim financial information, respectively, or material misstatements of fact of which the engagement quality reviewer is aware.

### **Review of Documentation**

A number of commenters viewed the statement in paragraphs 9 and 14 of the repropoed standard that "the reviewer should perform the procedures . . . by reviewing documentation" as too open-ended.<sup>21</sup> Commenters were concerned that this provision could be interpreted to require the review of all of the engagement documentation.

The Board did not intend to require—and the repropoed provision did not require—the reviewer to review all of the engagement documentation. Nevertheless, to clarify this point, the Board has added the phrase "to the extent necessary to satisfy the requirements" of paragraphs 10 and 11, in an EQR of an audit, and 15 and 16, in an EQR of an interim review. As a practical matter, the reviewer cannot comply with the requirements of the EQR standard without holding discussions with the engagement partner and reviewing documentation. AS No. 7 requires the reviewer to hold sufficient discussions with the engagement partner and other members of the engagement team and review sufficient documentation to perform the required procedures with due professional care. What is sufficient will necessarily depend on the facts and circumstances of the particular engagement under review. Auditors often document their significant judgments and conclusions in various summary documents, which could serve as a starting point for the reviewer's evaluation of the engagement team's work.

Paragraph 11 of the repropoed standard required the reviewer, in an EQR of an audit, to evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 10 indicates that the engagement team responded appropriately to significant risks and supports the conclusions reached by the engagement team with respect to the matters reviewed. One commenter suggested adding a requirement to paragraph 11 to evaluate engagement documentation for compliance with the requirements of Auditing Standard No. 3, *Audit Documentation* ("AS No. 3").

---

<sup>21</sup> That statement was intended, along with other changes in the repropoed standard, to clarify that the EQR is a review of the engagement team's work rather than a second audit. See page 17 of the repropoing release.

The Board originally proposed such a requirement but, in response to comments, did not include it in the repropoed standard.<sup>22</sup> The Board continues to believe that the documentation review requirements of paragraph 11 of the repropoed standard are appropriate and is adopting them as repropoed.

In an EQR of an interim review, paragraph 16 of the repropoed standard required the reviewer to evaluate whether the engagement documentation that he or she reviewed "[i]ndicates that the engagement team responded appropriately to significant risks," and "[s]upports the conclusions reached by the engagement team with respect to the matters reviewed." Some commenters noted that the auditor is not required to identify significant risks in a review of interim financial information and suggested not including a corresponding requirement in the EQR standard. The Board agrees and has not included this requirement in AS No. 7.

### ***Specifically Required Procedures in the EQR of an Audit***

Like the original proposal, the repropoed standard required certain procedures designed to give the reviewer the necessary information to evaluate the engagement team's significant judgments and conclusions. In response to comments on the original proposal, the Board made changes to these provisions in the repropoed standard that were intended to clarify that the reviewer performs the EQR by reviewing the engagement team's work, rather than by auditing the company himself or herself. Some commenters suggested that the specifically required procedures in the repropoed standard needed additional clarification.

In the view of several commenters, the repropoed standard did not clearly articulate the requirement for the reviewer to focus on the significant judgments made and the related conclusions reached by the engagement team. These commenters believed that the repropoed standard might be interpreted as requiring the review of all of the engagement team's judgments and conclusions. In response, AS No. 7 refers to "significant judgments" instead of "judgments" in describing certain of the required procedures.

The Board also clarified the wording of paragraph 10.b of the repropoed standard, which required the reviewer to "evaluate the risk assessments and audit responses. . . ." Some commenters expressed concern that this formulation required a review of audit responses for all areas of the audit. In response, AS No. 7 more specifically requires the reviewer to evaluate the engagement team's audit responses to significant risks identified by the engagement team and other significant risks identified by the engagement quality reviewer through performance of the procedures required by the EQR standard.<sup>23</sup> This change should help focus reviewers on areas of the audit that are more likely to contain a significant engagement deficiency.

Some commenters also expressed concern about the requirements in paragraphs 10.e and 10.f of the repropoed standard to determine whether appropriate matters have been communicated to the audit committee, management, and others; and to determine whether appropriate consultations have taken

---

<sup>22</sup> Commenters suggested that such a requirement would duplicate the documentation review performed by the engagement partner.

<sup>23</sup> The term "significant risk" is defined in the Board's recently proposed auditing standard on identifying and assessing risks of material misstatement to mean a "risk of material misstatement that is important enough to require special audit consideration." PCAOB Release No. 2008-006, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Conforming Amendments to PCAOB Standards* (October 21, 2008). The Board intends that definition to apply to the EQR standard as well. The Board included this definition in a note to paragraph 10.b of AS No. 7. If, at the conclusion of the above mentioned rulemaking, the Board adopts a definition of significant risk that is different from that proposed, the Board will make a conforming change to the EQR standard.

place on difficult or contentious matters. According to these commenters, a requirement to determine whether all of the communications or consultations have taken place rather than to evaluate the engagement team's communications and consultations was inconsistent with the objective of the EQR. In response, the Board replaced the phrase "determine if" with "based on the procedures required by this standard, evaluate whether." This change should tailor the specific requirements more closely to the overall objective. The Board also placed these paragraphs after the other required procedures in paragraph 10 to emphasize that the reviewer performs the evaluation required by these paragraphs based on the information obtained through the other procedures required by the EQR standard, and made a corresponding change in paragraph 15 for the EQR of an interim review.

### ***Specifically Required Procedures in the EQR of an Interim Review***

In response to comments on the original proposal, the Board included in the repropoed standard separate requirements for reviewing audits and interim reviews. The EQR requirements for interim reviews were based on the requirements for an EQR of an audit but were tailored to the different procedures performed in an interim review. A number of commenters were supportive of including separate requirements for the EQR of interim reviews in the repropoed standard. Some commenters, as discussed below, suggested modifications to those requirements.

Paragraph 15.a of the repropoed standard required the evaluation of engagement planning, including the consideration of the firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process; the company's business, recent significant activities, and related financial reporting issues and risks; and the nature of identified risks of material misstatement due to fraud. In one commenter's view, that paragraph might suggest that an interim review should include the same type of risk assessment as an audit. After considering this comment, the Board disagrees. Paragraph 15.a does not impose a requirement on the engagement team to identify risks as part of an interim review. Rather, it requires the reviewer to evaluate the engagement team's consideration of risks that have already been identified, e.g., during the preceding year's audit.

Additionally, three commenters recommended not requiring the EQR of an interim review to include an evaluation of judgments made about the severity and disposition of identified control deficiencies. In one commenter's view, such an evaluation would be inconsistent with the scope of an interim review. AU sec. 722.07, provides that the auditor:

should perform limited procedures quarterly to provide a basis for determining whether he or she has become aware of any material modifications that, in the auditor's judgment, should be made to the disclosures about changes in internal control over financial reporting in order for the certifications to be accurate and to comply with the requirements of Section 302 of the Act.

In response, the Board modified the requirement in paragraph 15.b in AS No. 7 to be more consistent with the requirements of AU sec. 722. Accordingly, AS No. 7 requires the reviewer, among other things, to evaluate significant judgments made about any material modifications that should be made to the disclosures about changes in internal control over financial reporting.

Paragraph 15.c of the repropoed standard required the reviewer, in the EQR of an interim review, to "[r]ead the interim financial information for all periods presented and for the immediately preceding interim period, management's disclosure for the period under review, if any, about changes in internal control

over financial reporting, and the related engagement report, if a report is to be filed with the SEC." Some commenters suggested that the reviewer should be required to read the engagement report even when the issuer is not required to include the report in an SEC filing. The Board agrees and, accordingly, changed "to be filed with the SEC" to "to be issued."<sup>24</sup>

## E. Concurring Approval of Issuance

For an EQR of an audit, paragraph 12 of the repropose standard provided that the reviewer "may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency." A note to the same paragraph describes a "significant engagement deficiency" as any of the four conditions described in the original proposal.<sup>25</sup> The repropose requirements for providing concurring approval of issuance in an EQR of an interim review were the same, except that the first of these four conditions was modified in light of the differences between an interim review and an audit. Specifically, in an EQR of an interim review, the first condition was "the engagement team failed to perform interim review procedures necessary in the circumstances of the engagement" rather than "the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB."

Commenters generally believed that the concurring approval of issuance provision was appropriately described, though one recommended excluding the reference to "due professional care" from the EQR standard because AU sec. 230, *Due Professional Care in the Performance of Work*, already imposes an overall requirement on auditors to exercise due professional care. Many commenters, however, were critical of the repropose release's description of the repropose requirement. A significant number of commenters objected to, or stated that they disagreed with, the statement in the repropose release that the requirement to exercise due professional care imposes on the engagement quality reviewer essentially the same requirement as the "knows, or should know based on the requirements of this standard" formulation that was originally proposed. Some suggested that the Board is redefining the meaning of due professional care. One commenter stated that "[a] standard of 'knows, or should know' is akin to a strict liability requirement for engagement deficiencies," while another commenter suggested that the Board "clarify that in this context, 'due professional care' is not a negligence standard."

After considering the comments, the Board is adopting the concurring approval of issuance requirement as repropose. While auditors are already required to exercise due professional care in discharging their responsibilities, comments, as noted above and in the repropose release, have reflected some confusion about the applicable standard of care in an EQR. Accordingly, reference to due professional care in the requirement is appropriate.

---

<sup>24</sup> Additionally, one commenter recommended not requiring the reviewer to read interim financial information "for the immediately preceding interim period" because it was not clear, to this commenter, what one would review when performing the EQR for the first quarter. AU sec. 722.16 requires the accountant to apply analytical procedures to the interim financial information, which should include, among other things, comparing the quarterly interim financial information with comparable information for the immediately preceding interim period (i.e., the fourth quarter of the prior year, in a first quarter interim review). Because the Board believes the repropose requirement is appropriately within the scope of an EQR for an interim review, it has retained it in AS No. 7.

<sup>25</sup> As included in the repropose standard, these conditions were: (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB; (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement; (3) the engagement report is not appropriate in the circumstances; or (4) the firm is not independent of its client.

The Board is not redefining due professional care in the context of the EQR standard. As the Board noted in the reproposing release, AU sec. 230 describes due professional care as "reasonable care and diligence" and makes clear that an auditor who acts negligently, i.e., without "reasonable care and diligence," breaches the duty to exercise due professional care.<sup>26</sup> Due professional care, as described in AU sec. 230, imposes neither a strict liability nor an actual knowledge standard. The Board intends the term to mean "reasonable care and diligence," as described in AU sec. 230.

The application of a negligence standard to the concurring approval of issuance provision means, as noted in the reproposing release, that "a reviewer cannot evade responsibility because, as a result of an inadequate review, he or she did not discover a problem that a reasonably careful and diligent review would have revealed."<sup>27</sup> For that reason, the provision requires the reviewer to perform the required review with due professional care as a prerequisite to providing concurring approval of issuance. A qualified reviewer who has done so will, necessarily, have discovered any significant engagement deficiencies that could reasonably have been discovered under the circumstances. Accordingly, under AS No. 7, such a reviewer may provide concurring approval of issuance if "he or she is not aware of a significant engagement deficiency." Because a reviewer who has not performed the required review with due professional care might not have discovered any significant engagement deficiencies that could reasonably have been discovered under the circumstance—*s.i.e.*, those the reviewer reasonably should know about—such a reviewer may not, consistent with the standard, provide concurring approval of issuance.

## F. Documentation of the EQR

The reproposed standard required the EQR documentation to contain sufficient information to identify: who performed the review, the documents reviewed, whether and when concurring approval of issuance was provided or the reasons for not providing the approval, and the significant discussions held, including the details of such discussions. These provisions were intended to respond to comments expressing concern that the originally proposed documentation requirements were overly detailed and would result in duplication of the engagement team's work. Some commenters reiterated their concerns that some of the reproposed requirements were duplicative of requirements to document the engagement itself or overly burdensome.

The Board continues to believe that it is necessary to strengthen the documentation requirements in the interim standard to provide for an informative record of the work performed during the EQR. At the same time, the Board has reconsidered its approach to the documentation requirement in light of the comments received. As described below, the Board has added a general requirement that places the specific requirements in the context of the overall purpose of EQR documentation—to provide a record of how the reviewer carried out the review in accordance with the standard's requirements.

Specifically, paragraph 19 of AS No. 7 includes a requirement for the engagement documentation to contain sufficient information to enable an experienced

---

<sup>26</sup> See AU sec. 230.03.

<sup>27</sup> Of course, to impose the more severe sanctions authorized under the Act, such as a permanent bar or permanent revocation of registration, the Board must establish "(A) intentional or knowing conduct, including reckless conduct, that results in violation of the applicable statutory, regulatory, or professional standard; or (B) repeated instances of negligent conduct, each resulting in a violation of the applicable statutory, regulatory, or professional standard." Section 105(c)(5) of the Act; see also Rules on Investigations and Adjudications, PCAOB Release No. 2003-015, Appendix 2 at A2-76 (September 29, 2003) (discussing Section 105(c)(5)).

auditor,<sup>28</sup> having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of the standard.<sup>29</sup> This provision is similar to the audit documentation requirement in paragraph 6 of AS No. 3, and should clarify how the more specific requirements are meant to apply in particular circumstances.

For example, if a reviewer identified a significant engagement deficiency to be addressed by the engagement team, the engagement team should document its response to the identified deficiency in accordance with AS No. 3. Because AS No. 7 does not require duplication of documentation prepared by the engagement team, the engagement quality reviewer does not have to separately document the engagement team's response. Rather, the EQR documentation should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand, e.g., the significant deficiency identified, how the reviewer communicated the deficiency to the engagement team, why such matter was important, and how the reviewer evaluated the engagement team's response. Similarly, if the reviewer participated in the discussion of the potential for material misstatement due to fraud,<sup>30</sup> and the engagement team documented the discussion in accordance with AS No. 3, AS No. 7 only requires the engagement quality reviewer or reviewer's assistants to prepare separate documentation if the documentation prepared by the engagement team does not contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of AS No. 7.

In response to comments, the Board also considered whether modifications were necessary to the specific requirements. First, the Board received several comments related to the provisions of repropoed paragraph 19.b, which required the EQR documentation to contain information sufficient to identify the documents reviewed. One commenter believed that a reviewer "may feel compelled to engage in an unnecessary review of additional documents in order to compile a more 'complete' list." Conversely, another commenter believed that the reviewer would be discouraged "to inspect one or more documents than he or she otherwise might or should, thus reducing the quality of the EQR." Some commenters suggested clarifying how the documents should be identified as "reviewed" (i.e., electronically or manually), or suggested limiting the scope of paragraph 19.b to "significant documents."

After considering these comments, the Board has decided to include this requirement in AS No. 7. Identifying a document as reviewed by the engagement quality reviewer should not be unduly burdensome, and will provide an informative record. Such a record could provide registered firms, and the Board, with better information about the EQR, which can be used to evaluate and improve the EQR process. The Board believes it is unnecessary to require in the standard a particular document identification method, such as electronic or manual signature. Rather, this should be determined by each firm individually.

---

<sup>28</sup> As described in paragraph 6 of AS No. 3, "[a]n experienced auditor has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry."

<sup>29</sup> Additionally, for clarity of presentation, the Board moved the requirement to include documentation of an EQR in the engagement documentation from paragraph 19 to a new paragraph 20 in AS No. 7.

<sup>30</sup> See paragraph .14 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

Second, a number of commenters believed that the requirement in paragraph 19.c to document details of significant discussions held by the reviewer, and others who assisted the reviewer, would not improve audit quality and that it would be costly to implement. These commenters suggested that the reviewer might not be able to determine whether a discussion is significant at the time a discussion is held and therefore feel compelled to document every discussion. In order to make clear that documentation of every discussion is neither required nor a prudent use of resources, the Board has not included an explicit requirement to document discussions in AS No. 7. As explained above, however, if documentation of a particular discussion is necessary "to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed . . . to comply with the provisions of th[e] standard," such documentation is required under the general documentation requirement.

## G. Effective Date

In reproposing the standard, the Board intended to make a final standard effective for EQRs of interim reviews for fiscal years beginning after December 15, 2009 and for EQRs of audits for fiscal years ending on or after December 15, 2009. Several commenters were concerned that the proposed effective date would not allow for sufficient time to train the auditing firm's personnel and implement the new EQR requirements. These commenters recommended that the effective date of the EQR standard be linked to the beginning of an audit period to provide adequate time for registered firms to prepare for adoption. The Board agrees with the concerns expressed by the commenters and has decided to make AS No. 7 effective, subject to SEC approval, for both the EQR of audits and the EQR of interim reviews for fiscal years beginning on or after December 15, 2009.

## H. Comparison with other EQR Standards

Three commenters suggested that the Board provide a comparison between the EQR standard and standards of other standard-setters on this subject. One commenter noted that because issuer clients often represent a minor part of a smaller firm's audit client base, the audit methodology of such a firm may be based on other standards as well as PCAOB standards. In response, the Board has described certain significant differences between the Board's EQR standard and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB")<sup>31</sup> and the Auditing Standards Board ("ASB") of the AICPA<sup>32</sup> in Appendix 3. Each section of the appendix also includes references to the relevant paragraphs of AS No. 7.

Appendix 3 is provided for informational purposes only. It describes only certain provisions of AS No. 7, and is not a substitute for the EQR standard itself. The full text of AS No. 7 is included in Appendix 1 of this release. Compliance with AS No. 7 is required for registered public accounting firms. Compliance with the analogous ASB and IAASB standards is not sufficient to meet the requirements of AS No. 7.

# Auditing Standard No. 8

## Audit Risk

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

### Introduction

1. This standard discusses the auditor's consideration of audit risk in an audit of financial statements as part of an integrated audit<sup>1</sup> or an audit of financial statements only.

### Objective

2. The objective of the auditor is to conduct the audit of financial statements in a manner that reduces audit risk to an appropriately low level.

### Audit Risk

3. To form an appropriate basis for expressing an opinion on the financial statements, the auditor must plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement<sup>2</sup> due to error or fraud. Reasonable assurance<sup>3</sup> is obtained by reducing audit risk to an appropriately low level through applying due professional care, including obtaining sufficient appropriate audit evidence.

4. In an audit of financial statements, audit risk is the risk that the auditor expresses an inappropriate audit opinion when the financial statements are materially misstated, i.e., the financial statements are not presented fairly in conformity with the applicable financial reporting framework. Audit risk is a function of the risk of material misstatement and detection risk.

Note: The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

### Risk of Material Misstatement

5. The risk of material misstatement refers to the risk that the financial statements are materially misstated. Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, indicates that the auditor should assess the risks of material misstatement at two levels: (1) at the financial statement level and (2) at the assertion<sup>4</sup> level.<sup>5</sup>

---

<sup>1</sup> When the auditor is performing an integrated audit of financial statements and internal control over financial reporting, the requirements in Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, also apply. However, the risks of material misstatement of the financial statements are the same for both the audit of financial statements and the audit of internal control over financial reporting.

<sup>2</sup> Misstatement is defined in Appendix A of Auditing Standard No. 14, *Evaluating Audit Results*.

<sup>3</sup> See AU sec. 110, *Responsibilities and Functions of the Independent Auditor*, and paragraph .10 of AU sec. 230, *Due Professional Care in the Performance of Work*, for a further discussion of reasonable assurance.

<sup>4</sup> See Auditing Standard No. 15, *Audit Evidence*, for a description of financial statement assertions.

<sup>5</sup> Paragraph 59 of Auditing Standard No. 12.

6. Risks of material misstatement at the financial statement level relate pervasively to the financial statements as a whole and potentially affect many assertions. Risks of material misstatement at the financial statement level may be especially relevant to the auditor's consideration of the risk of material misstatement due to fraud. For example, an ineffective control environment, a lack of sufficient capital to continue operations, and declining conditions affecting the company's industry might create pressures or opportunities for management to manipulate the financial statements, leading to higher risk of material misstatement.

7. Risk of material misstatement at the assertion level consists of the following components:

- a. *Inherent risk*, which refers to the susceptibility of an assertion to a misstatement, due to error or fraud, that could be material, individually or in combination with other misstatements, before consideration of any related controls.
- b. *Control risk*, which is the risk that a misstatement due to error or fraud that could occur in an assertion and that could be material, individually or in combination with other misstatements, will not be prevented or detected on a timely basis by the company's internal control. Control risk is a function of the effectiveness of the design and operation of internal control.

8. Inherent risk and control risk are related to the company, its environment, and its internal control, and the auditor assesses those risks based on evidence he or she obtains. The auditor assesses inherent risk using information obtained from performing risk assessment procedures and considering the characteristics of the accounts and disclosures in the financial statements.<sup>6</sup> The auditor assesses control risk using evidence obtained from tests of controls (if the auditor plans to rely on those controls to assess control risk at less than maximum) and from other sources.<sup>7</sup>

## Detection Risk

9. In an audit of financial statements, detection risk is the risk that the procedures performed by the auditor will not detect a misstatement that exists and that could be material, individually or in combination with other misstatements. Detection risk is affected by (1) the effectiveness of the substantive procedures and (2) their application by the auditor, i.e., whether the procedures were performed with due professional care.

10. The auditor uses the assessed risk of material misstatement to determine the appropriate level of detection risk for a financial statement assertion. The higher the risk of material misstatement, the lower the level of detection risk needs to be in order to reduce audit risk to an appropriately low level.

11. The auditor reduces the level of detection risk through the nature, timing, and extent of the substantive procedures performed. As the appropriate level of detection risk decreases, the evidence from substantive procedures that the auditor should obtain increases.<sup>8</sup>

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004  
August 5, 2010  
PCAOB Rulemaking  
Docket Matter No. 026

## Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

## Board Contacts

\* \* \* \* \*

## I. Introduction

The Board is adopting eight auditing standards and related amendments that benefit investors by establishing requirements that enhance the effectiveness of the auditor's assessment of and response to the risks of material misstatement in an audit.

In an audit performed in accordance with PCAOB standards, risk underlies the entire audit process, including the procedures that the auditor performs to support the opinion expressed in the auditor's report. Most of the Board's interim auditing standards relating to assessing and responding to risk in an audit of financial statements were developed in the 1980s.<sup>1</sup> Those standards described in general terms the auditor's responsibilities for assessing and responding to risk. They directed auditors to vary the amount of audit attention related to particular financial statement accounts based on the risks presented by them. The standards also allowed the auditor to use tests of controls to reduce substantive testing.<sup>2</sup>

A number of factors and events led the Board to reexamine those standards and seek to improve them. These included the widespread use of risk-based audit methodologies; recommendations to the profession on ways in which auditors

---

<sup>1</sup> Examples of those standards include AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, and AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.

<sup>2</sup> AU sec. 319.

could improve risk assessment;<sup>3</sup> advice from the Board's Standing Advisory Group ("SAG");<sup>4</sup> adoption of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*; and observations from the Board's oversight activities.

On October 21, 2008, the Board proposed a set of auditing standards to update the requirements for assessing and responding to risk in an audit ("the original proposed standards").<sup>5</sup> The original proposed standards were intended to improve the auditing standards and to benefit investors by establishing requirements that enhance the effectiveness of auditors' assessment of and response to risk through:

- Performing procedures that provide a reasonable basis for identifying and assessing risks of material misstatement, whether due to error or fraud
- Tailoring the audit to respond appropriately to the risks of material misstatement
- Making a comprehensive evaluation of the evidence obtained during the audit to form the opinion(s) in the auditor's report

The Board also sought to emphasize the auditor's responsibilities for consideration of fraud by incorporating requirements for identifying and responding to the risks of material misstatement due to fraud ("fraud risks") and evaluating audit results from the existing PCAOB standard, AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.<sup>6</sup> Incorporating these requirements makes clear that the auditor's responsibilities for assessing and responding to fraud risks are an integral part of the audit process rather than a separate, parallel process. It also benefits investors by prompting auditors to make a more thoughtful and thorough assessment of fraud risks and to develop appropriate audit responses.

Improvements in the standards related to risk assessment also should enhance integration of the audit of financial statements with the audit of internal control over financial reporting ("audit of internal control") by articulating a process for identifying and assessing risks of material misstatement that applies to both portions of the integrated audit when the auditor is performing an integrated audit.

Many commenters on the original proposed standards were supportive of the Board's efforts to update its risk assessment requirements and offered numerous suggestions for changing the original proposed standards. After considering all of the comments received on those standards, the Board made numerous refinements to the original proposed standards. Because the standards address many fundamental aspects of the audit process and are expected to serve as

For a summary of the PAE's recommendations related to risk assessment, see PCAOB Standing Advisory Group ("SAG") Meeting Briefing Paper, "Risk Assessment in Financial Statement Audits" (February 16, 2005), Appendix A, available at: [http://www.pcaobus.org/News\\_and\\_Events/Events/2005/02-16.aspx](http://www.pcaobus.org/News_and_Events/Events/2005/02-16.aspx).

<sup>4</sup> Webcasts of SAG meetings are available on the Board's Web site at: [http://www.pcaobus.org/News\\_and\\_Events/Webcasts](http://www.pcaobus.org/News_and_Events/Webcasts).

<sup>5</sup> PCAOB Release No. 2008-006, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk* (October 21, 2008).

<sup>6</sup> Paragraphs .14–.51 and paragraphs .68–.78 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

a foundation for future standards-setting, the Board repropoed the standards for public comment on December 17, 2009 ("the repropoed standards").<sup>7</sup>

The Board received 23 comment letters on the repropoed standards.<sup>8</sup> The Board discussed the comments received with the SAG on April 8, 2010.<sup>9</sup> Most commenters were generally supportive of the repropoed standards and the improvements made to those standards. Many commenters also offered suggestions to improve the standards, which the Board has carefully analyzed.

After consideration of the comments received, the Board has refined the standards to provide additional clarity. The Board has decided to adopt the following standards for assessing and responding to risk in an audit and the related amendments to PCAOB standards:

- Auditing Standard No. 8, *Audit Risk*
- Auditing Standard No. 9, *Audit Planning*
- Auditing Standard No. 10, *Supervision of the Audit Engagement*
- Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*
- Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*
- Auditing Standard No. 14, *Evaluating Audit Results*
- Auditing Standard No. 15, *Audit Evidence*

Appendices 1–8 of this release present the auditing standards, and Appendix 9 presents the related amendments to PCAOB standards.

## II. Notable Areas of Change in the Standards

The changes made to the repropoed standards reflect refinements rather than significant shifts in approach. This section describes the areas of change to the repropoed standards that are most notable, e.g., because they affect multiple standards or multiple sections of an individual standard. Appendix 10 discusses these and other changes in more detail.

### A. Planning and Supervision Standards

The repropoed standards included a standard covering both audit planning and supervision. Some commenters observed that audit planning and supervision should be covered in separate standards.

Audit planning and supervision, although related in some respects, are distinct activities that should be presented in separate standards. Accordingly, the Board has divided the planning and supervision standard into separate standards for planning and for supervision. Presenting the requirements for planning and supervision in separate standards is a technical change that, by itself, does not affect the auditor's responsibilities for planning the audit or supervision of the work of engagement team members as described in the repropoed standards.

---

<sup>7</sup> PCAOB Release No. 2009-007, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk* (December 17, 2009).

<sup>8</sup> Comments on the original proposed standards and the repropoed standards are available on the Board's Web site at: <http://www.pcaobus.org/Rules/Rulemaking/Pages/Docket026.aspx>.

<sup>9</sup> A transcript of the portion of the meeting that related to the repropoed standards is available on the Board's Web site at: <http://www.pcaobus.org/Rules/Rulemaking/Pages/Docket026.aspx>.

## B. Requirements for Multi-location Audits

The repropoed standard on audit planning and supervision included requirements regarding establishing the scope of testing of individual locations in multi-location engagements. The repropoed standard on consideration of materiality in planning and performing an audit included requirements for determining materiality of individual locations in multi-location audits. Some commenters requested clarification on the Board's expectations regarding how to apply those requirements in audits in which part of the work is performed by other auditors, specifically, auditors of financial statements of individual locations or business units that are included in the consolidated financial statements.

The multi-location requirements have been revised to take into account situations in which part of the work is performed by other auditors.<sup>10</sup> Appendix 10 discusses those revisions in more detail and explains the Board's expectations regarding how to apply the respective requirements in situations involving other auditors.

The repropoed standard on audit planning and supervision also included a statement, similar to a statement in Auditing Standard No. 5, that "The direction in paragraph 5 of Proposed Auditing Standard, *The Auditor's Responses to the Risks of Material Misstatement*, regarding incorporating an element of unpredictability in the auditing procedures means that the auditor should vary the nature, timing, and extent of audit procedures at locations or business units from year to year." Some commenters stated that the statement in the repropoed audit planning and supervision standard was unnecessarily prescriptive. After considering the comments received, the requirement regarding unpredictability was removed from the audit planning standard, and the discussion in Auditing Standard No. 13 regarding incorporating an element of unpredictability was expanded to include varying the testing in the selected locations.<sup>11</sup> However, this does not change the requirements in Auditing Standard No. 5 regarding incorporating unpredictability in testing controls at individual locations in audits of internal control.<sup>12</sup>

## C. Requirement for Performing Walkthroughs

In the original proposed standards, the standard on identifying and assessing risks of material misstatement referred auditors to Auditing Standard No. 5 for a discussion of the performance of walkthroughs. Some commenters on the original proposed standards stated that the proposed standard should include a discussion of walkthroughs rather than referring to Auditing Standard No. 5. The repropoed standard on identifying and assessing risks of material misstatement included a discussion of the objectives for understanding likely sources of potential misstatements and of performing walkthroughs, which paralleled a discussion in Auditing Standard No. 5.<sup>13</sup> Some commenters expressed concerns that those new requirements would lead to unnecessary walkthroughs, particularly in audits of financial statements only.

The intention of including the discussion of walkthroughs was to describe how to perform walkthroughs, not to impose additional requirements regarding when

---

<sup>10</sup> Paragraphs 11–14 of Auditing Standard No. 9, *Audit Planning*, and paragraph 10 of Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*.

<sup>11</sup> Paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

<sup>12</sup> Paragraphs 61 and B13 of Auditing Standard No. 5.

<sup>13</sup> Paragraph 34 of Auditing Standard No. 5.

to perform walkthroughs. The discussion has been revised to focus on how the auditor should perform walkthroughs, and the discussion of the objectives for understanding likely sources of potential misstatements has been removed.<sup>14</sup> Consequently, the objectives in paragraph 34 of Auditing Standard No. 5 for understanding potential sources of likely misstatement will continue to apply only to integrated audits.

## D. Requirements Regarding Financial Statement Disclosures

Because of the importance of disclosures to the fair presentation of financial statements and based on observations from the Board's oversight activities, the repropoed standards included additional requirements intended to increase the auditor's attention on the disclosures in the financial statements. For example, the repropoed standard on identifying and assessing risks of material misstatement included a new requirement related to developing an expectation about the necessary financial statement disclosures as part of obtaining an understanding of the company and its environment. Some commenters stated that the requirements should be clarified as applying to disclosures required by the applicable financial reporting framework. Also, the repropoed standard on evaluating audit results included expanded requirements for the auditor to evaluate whether the financial statements include the required disclosures. Some commenters stated that the standard should clarify that the requirements apply only to material disclosures.

After analyzing the comments, those two requirements have been revised to clarify that they refer to the fair presentation of the financial statements in conformity with the applicable financial reporting framework.<sup>15</sup>

## III. Additional Discussion of Standards and Comments

Some commenters on the repropoed standards stated that the Board should provide more information about its requirements, including how the requirements are expected to affect audits. Commenters requested information about how the Board's standards compare to the standards of other standards-setters. Some commenters also requested more explanation for certain requirements in the Board's repropoed standards.

Appendix 10 of this release has been expanded to provide additional background for certain requirements in the Board's standards and further discussion of the Board's responses to comments, including the basis for its conclusions regarding certain requirements.

In analyzing comments on the appendix to the repropoed standards that compared the repropoed standards to the analogous standards of the International Auditing and Assurance Standards Board ("IAASB") and the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants, the Board observed that a number of the explanations sought by commenters, e.g., the reasons for the differences in certain requirements, were discussed elsewhere in the release, e.g., in the appendix that provided additional discussion of comments.

Appendix 10 of this release discusses the principal rationale for the objectives and requirements in the standards being adopted today. Appendix 11 of this release discusses certain differences between the objectives and requirements

---

<sup>14</sup> Paragraphs 37–38 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

<sup>15</sup> Paragraph 13 of Auditing Standard No. 12 and paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.

of the PCAOB standards and the analogous standards of the IAASB and ASB. When a difference between the Board's standards and the analogous standards of the IAASB and ASB is noted, Appendix 11 contains a reference to the discussion of the Board's requirements in Appendix 10.

## IV. Effective Date

The release accompanying the repropoed standards stated that the Board expects that the standards would be effective for audits of fiscal years beginning on or after December 15, 2010, subject to approval by the Securities and Exchange Commission ("SEC"), and the Board requested comment on the proposed effective date. Several commenters stated that the Board should establish sufficient time for auditing firms to make changes to their methodologies and train their staff on the new risk assessment standards.

After considering the comments received and the timing of the adoption of the standards, the Board has determined that the accompanying standards and related amendments will be effective, subject to SEC approval, for audits of fiscal periods beginning on or after December 15, 2010. In its determination, the Board considered that many auditors already employ risk-based audit methodologies, which should facilitate the methodology changes and training necessary to implement the standards by the effective date.

\* \* \*

On the 5th day of August, in the year 2010, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ J. Gordon Seymour  
J. Gordon Seymour  
Secretary

## Auditing Standard No. 9

### *Audit Planning*

Source: Auditing Standard No. 16.

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

#### Introduction

1. This standard establishes requirements regarding planning an audit.

#### Objective

2. The objective of the auditor is to plan the audit so that the audit is conducted effectively.

#### Responsibility of the Engagement Partner for Planning

3. The **engagement partner**<sup>1</sup> is responsible for the engagement and its performance. Accordingly, the engagement partner is responsible for planning the audit and may seek assistance from appropriate engagement team members in fulfilling this responsibility. Engagement team members who assist the engagement partner with audit planning also should comply with the relevant requirements in this standard.

#### Planning an Audit

4. The auditor should properly plan the audit. This standard describes the auditor's responsibilities for properly planning the audit.<sup>2</sup>

5. Planning the audit includes establishing the overall audit strategy for the engagement and developing an audit plan, which includes, in particular, planned risk assessment procedures and planned responses to the risks of material misstatement. Planning is not a discrete phase of an audit but, rather, a continual and iterative process that might begin shortly after (or in connection with) the completion of the previous audit and continues until the completion of the current audit.

#### Preliminary Engagement Activities

6. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

The auditor should perform the following activities at the beginning of the audit:

- a. Perform procedures regarding the continuance of the client relationship and the specific audit engagement,<sup>3</sup>

---

<sup>1</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

<sup>2</sup> The term, "auditor," as used in this standard, encompasses both the engagement partner and the engagement team members who assist the engagement partner in planning the audit.

<sup>3</sup> Paragraphs .14–.16 of QC sec. 20, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice*. AU sec. 161, *The Relationship of Generally Accepted Auditing Standards to Quality Control Standards*, explains how the quality control standards relate to the conduct of audits.

- b. Determine compliance with independence and ethics requirements, and

Note: The determination of compliance with independence and ethics requirements is not limited to preliminary engagement activities and should be reevaluated with changes in circumstances.

- c. Establish an understanding of the terms of the audit engagement with the audit committee in accordance with Auditing Standard No. 16, *Communications with Audit Committees*.<sup>[4]</sup>

## Planning Activities

7. The nature and extent of planning activities that are necessary depend on the size and complexity of the company, the auditor's previous experience with the company, and changes in circumstances that occur during the audit. When developing the audit strategy and audit plan, as discussed in paragraphs 8–10, the auditor should evaluate whether the following matters are important to the company's financial statements and internal control over financial reporting and, if so, how they will affect the auditor's procedures:

- Knowledge of the company's internal control over financial reporting obtained during other engagements performed by the auditor;
- Matters affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes;
- Matters relating to the company's business, including its organization, operating characteristics, and capital structure;
- The extent of recent changes, if any, in the company, its operations, or its internal control over financial reporting;
- The auditor's preliminary judgments about materiality,<sup>5</sup> risk, and, in integrated audits, other factors relating to the determination of material weaknesses;
- Control deficiencies previously communicated to the audit committee<sup>6</sup> or management;
- Legal or regulatory matters of which the company is aware;
- The type and extent of available evidence related to the effectiveness of the company's internal control over financial reporting;
- Preliminary judgments about the effectiveness of internal control over financial reporting;
- Public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and the effectiveness of the company's internal control over financial reporting;
- Knowledge about risks related to the company evaluated as part of the auditor's client acceptance and retention evaluation; and

---

<sup>[4]</sup> [Footnote deleted, effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]

<sup>5</sup> Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*.

<sup>6</sup> If no audit committee exists, all references to the audit committee in this standard apply to the entire board of directors of the company. See 15 U.S.C. §§78c(a)58 and 7201(a)(3).

- The relative complexity of the company's operations.

Note: Many smaller companies have less complex operations. Additionally, some larger, complex companies may have less complex units or processes. Factors that might indicate less complex operations include: fewer business lines; less complex business processes and financial reporting systems; more centralized accounting functions; extensive involvement by senior management in the day-to-day activities of the business; and fewer levels of management, each with a wide span of control.

## Audit Strategy

8. The auditor should establish an overall audit strategy that sets the scope, timing, and direction of the audit and guides the development of the audit plan.

9. In establishing the overall audit strategy, the auditor should take into account:

- a. The reporting objectives of the engagement and the nature of the communications required by PCAOB standards,<sup>7</sup>
- b. The factors that are significant in directing the activities of the engagement team,<sup>8</sup>
- c. The results of preliminary engagement activities<sup>9</sup> and the auditor's evaluation of the important matters in accordance with paragraph 7 of this standard, and
- d. The nature, timing, and extent of resources necessary to perform the engagement.<sup>10</sup>

## Audit Plan

10. The auditor should develop and document an audit plan that includes a description of:

- a. The planned nature, timing, and extent of the risk assessment procedures;<sup>11</sup>
- b. The planned nature, timing, and extent of tests of controls and substantive procedures;<sup>12</sup> and
- c. Other planned audit procedures required to be performed so that the engagement complies with PCAOB standards.

---

<sup>7</sup> See, e.g., Auditing Standard No. 16, *Communications with Audit Committees*. Also, various laws or regulations require other matters to be communicated. (See, e.g., Rule 2-07 of Regulation S-X, 17 CFR 210.2-07; and Rule 10A-3 under the Securities Exchange Act of 1934, 17 CFR 240.10A-3.) The requirements of this standard do not modify communications required by those other laws or regulations. [Footnote revised, effective for fiscal years ending on or after December 15, 2012, by PCAOB Release No. 2012-004.]

<sup>8</sup> See, e.g., paragraph 6 of Auditing Standard No. 10, *Supervision of the Audit Engagement*.

<sup>9</sup> Paragraph 6 of this standard.

<sup>10</sup> See, e.g., paragraph .06 of AU sec. 230, *Due Professional Care in the Performance of Work*, paragraph 16 of this standard, and paragraph 5.a. of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

<sup>11</sup> Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

<sup>12</sup> Auditing Standard No. 13 and Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

## Multi-location Engagements

11. In an audit of the financial statements of a company with operations in multiple locations or business units,<sup>13</sup> the auditor should determine the extent to which audit procedures should be performed at selected locations or business units to obtain sufficient appropriate evidence to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. This includes determining the locations or business units at which to perform audit procedures, as well as the nature, timing, and extent of the procedures to be performed at those individual locations or business units. The auditor should assess the risks of material misstatement to the consolidated financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk of material misstatement associated with that location or business unit.

12. Factors that are relevant to the assessment of the risks of material misstatement associated with a particular location or business unit and the determination of the necessary audit procedures include:

- a. The nature and amount of assets, liabilities, and transactions executed at the location or business unit, including, e.g., significant transactions executed at the location or business unit that are outside the normal course of business for the company, or that otherwise appear to be unusual given the auditor's understanding of the company and its environment,<sup>14</sup>
- b. The materiality of the location or business unit;<sup>15</sup>
- c. The specific risks associated with the location or business unit that present a reasonable possibility<sup>16</sup> of material misstatement to the company's consolidated financial statements;
- d. Whether the risks of material misstatement associated with the location or business unit apply to other locations or business units such that, in combination, they present a reasonable possibility of material misstatement to the company's consolidated financial statements;
- e. The degree of centralization of records or information processing;
- f. The effectiveness of the control environment, particularly with respect to management's control over the exercise of authority delegated to others and its ability to effectively supervise activities at the location or business unit; and
- g. The frequency, timing, and scope of monitoring activities by the company or others at the location or business unit.

Note: When performing an audit of internal control over financial reporting, refer to Appendix B, Special Topics, of Auditing Standard No. 5<sup>17</sup> for considerations when a company has multiple locations or business units.

---

<sup>13</sup> The term "business units" includes subsidiaries, divisions, branches, components, or investments.

<sup>14</sup> Paragraph .66 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

<sup>15</sup> Paragraph 10 of Auditing Standard No. 11 describes the consideration of materiality in planning and performing audit procedures at an individual location or business unit.

<sup>16</sup> There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

<sup>17</sup> Paragraphs B10–B16 of Auditing Standard No. 5.

**13.** In determining the locations or business units at which to perform audit procedures, the auditor may take into account relevant activities performed by internal audit, as described in AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, or others, as described in Auditing Standard No. 5. AU sec. 322 and Auditing Standard No. 5 establish requirements regarding using the work of internal audit and others, respectively.

**14.** AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, describes the auditor's responsibilities regarding using the work and reports of other independent auditors who audit the financial statements of one or more of the locations or business units that are included in the consolidated financial statements.<sup>18</sup> In those situations, the auditor should perform the procedures in paragraphs 11–13 of this standard to determine the locations or business units at which audit procedures should be performed.

## Changes During the Course of the Audit

**15.** The auditor should modify the overall audit strategy and the audit plan as necessary if circumstances change significantly during the course of the audit, including changes due to a revised assessment of the risks of material misstatement or the discovery of a previously unidentified risk of material misstatement.

## Persons with Specialized Skill or Knowledge

**16.** The auditor should determine whether specialized skill or knowledge is needed to perform appropriate risk assessments, plan or perform audit procedures, or evaluate audit results.

**17.** If a person with specialized skill or knowledge employed or engaged by the auditor participates in the audit, the auditor should have sufficient knowledge of the subject matter to be addressed by such a person to enable the auditor to:

- a. Communicate the objectives of that person's work;
- b. Determine whether that person's procedures meet the auditor's objectives; and
- c. Evaluate the results of that person's procedures as they relate to the nature, timing, and extent of other planned audit procedures and the effects on the auditor's report.

## Additional Considerations in Initial Audits

**18.** The auditor should undertake the following activities before starting an initial audit:

- a. Perform procedures regarding the acceptance of the client relationship and the specific audit engagement; and
- b. Communicate with the predecessor auditor in situations in which there has been a change of auditors in accordance with AU sec. 315, *Communications Between Predecessor and Successor Auditors*.

---

<sup>18</sup> For integrated audits, see also paragraphs C8–C11 of Auditing Standard No. 5.

19. The purpose and objective of planning the audit are the same for an initial audit or a recurring audit engagement. However, for an initial audit, the auditor should determine the additional planning activities necessary to establish an appropriate audit strategy and audit plan, including determining the audit procedures necessary to obtain sufficient appropriate audit evidence regarding the opening balances.<sup>19</sup>

---

<sup>19</sup> See also paragraph 3 of Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*.

## Appendix A

### Definition

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Engagement partner—The member of the engagement team with primary responsibility for the audit.

## Attachment

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004  
August 5, 2010

PCAOB Rulemaking  
Docket Matter No. 026

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

To view the release in its entirety, see the "Attachment" section of Auditing Standard No. 8.

## Auditing Standard No. 10

# *Supervision of the Audit Engagement*

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

### Introduction

1. This standard establishes requirements regarding supervision of the audit engagement, including supervising the work of engagement team members.

### Objective

2. The objective of the auditor is to supervise the audit engagement, including supervising the work of engagement team members so that the work is performed as directed and supports the conclusions reached.

### Responsibility of the Engagement Partner for Supervision

3. The **engagement partner**<sup>1</sup> is responsible for the engagement and its performance. Accordingly, the engagement partner is responsible for proper supervision of the work of engagement team members and for compliance with PCAOB standards, including standards regarding using the work of specialists,<sup>2</sup> other auditors,<sup>3</sup> internal auditors,<sup>4</sup> and others who are involved in testing controls.<sup>5</sup> Paragraphs 5–6 of this standard describe the nature and extent of supervisory activities necessary for proper supervision of engagement team members.<sup>6</sup>

4. The engagement partner may seek assistance from appropriate engagement team members in fulfilling his or her responsibilities pursuant to this standard. Engagement team members who assist the engagement partner with supervision of the work of other engagement team members also should comply with the requirements in this standard with respect to the supervisory responsibilities assigned to them.

### Supervision of Engagement Team Members

5. The engagement partner and, as applicable, other engagement team members performing supervisory activities, should:

---

<sup>1</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

<sup>2</sup> AU sec. 336, *Using the Work of a Specialist*.

<sup>3</sup> AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

<sup>4</sup> AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

<sup>5</sup> Paragraphs 16–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

<sup>6</sup> See also paragraph .06 of AU sec. 230, *Due Professional Care in the Performance of Work*.

- a. Inform engagement team members of their responsibilities,<sup>7</sup> including:
  - (1) The objectives of the procedures that they are to perform;
  - (2) The nature, timing, and extent of procedures they are to perform; and
  - (3) Matters that could affect the procedures to be performed or the evaluation of the results of those procedures, including relevant aspects of the company, its environment, and its internal control over financial reporting,<sup>8</sup> and possible accounting and auditing issues;

- b. Direct engagement team members to bring significant accounting and auditing issues arising during the audit to the attention of the engagement partner or other engagement team members performing supervisory activities so they can evaluate those issues and determine that appropriate actions are taken in accordance with PCAOB standards;<sup>9</sup>

Note: In applying due professional care in accordance with AU sec. 230, each engagement team member has a responsibility to bring to the attention of appropriate persons, disagreements or concerns the engagement team member might have with respect to accounting and auditing issues that he or she believes are of significance to the financial statements or the auditor's report regardless of how those disagreements or concerns may have arisen.

- c. Review the work of engagement team members to evaluate whether:
  - (1) The work was performed and documented;
  - (2) The objectives of the procedures were achieved; and
  - (3) The results of the work support the conclusions reached.<sup>10</sup>

**6.** To determine the extent of supervision necessary for engagement team members to perform their work as directed and form appropriate conclusions, the engagement partner and other engagement team members performing supervisory activities should take into account:

- a. The nature of the company, including its size and complexity;<sup>11</sup>
- b. The nature of the assigned work for each engagement team member, including:
  - (1) The procedures to be performed, and
  - (2) The controls or accounts and disclosures to be tested;
- c. The risks of material misstatement; and

<sup>7</sup> AU sec. 230.06 and paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, establish requirements regarding the appropriate assignment of engagement team members.

<sup>8</sup> Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, describes the auditor's responsibilities for obtaining an understanding of the company, its environment, and its internal control over financial reporting.

<sup>9</sup> See, e.g., paragraph 15 of Auditing Standard No. 9, *Audit Planning*, paragraph 74 of Auditing Standard No. 12, and paragraphs 20–23 and 35–36 of Auditing Standard No. 14, *Evaluating Audit Results*.

<sup>10</sup> Auditing Standard No. 14 describes the auditor's responsibilities for evaluating the results of the audit, and Auditing Standard No. 3, *Audit Documentation*, establishes requirements regarding audit documentation.

<sup>11</sup> Paragraph 10 of Auditing Standard No. 12.

- d. The knowledge, skill, and ability of each engagement team member.<sup>12</sup>

Note: In accordance with the requirements of paragraph 5 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, the extent of supervision of engagement team members should be commensurate with the risks of material misstatement.<sup>13</sup>

---

<sup>12</sup> See also paragraph 5.a. of Auditing Standard No. 13 and AU sec. 230.06.

<sup>13</sup> Paragraph 5.b. of Auditing Standard No. 13 indicates that the extent of supervision of engagement team members is part of the auditor's overall responses to the risks of material misstatement.

## Appendix A

### Definition

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Engagement partner—The member of the engagement team with primary responsibility for the audit.

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004  
August 5, 2010

PCAOB Rulemaking  
Docket Matter No. 026

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

## Auditing Standard No. 11

# *Consideration of Materiality in Planning and Performing an Audit*

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

### Introduction

1. This standard establishes requirements regarding the auditor's consideration of materiality in planning and performing an audit.<sup>1</sup>

### Materiality in the Context of an Audit

2. In interpreting the federal securities laws, the Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."<sup>2</sup> As the Supreme Court has noted, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him. . . ."<sup>3</sup>

3. To obtain reasonable assurance about whether the financial statements are free of material misstatement, the auditor should plan and perform audit procedures to detect misstatements that, individually or in combination with other misstatements, would result in material misstatement of the financial statements. This includes being alert while planning and performing audit procedures for misstatements that could be material due to quantitative or qualitative factors. Also, the evaluation of uncorrected misstatements in accordance with Auditing Standard No. 14, *Evaluating Audit Results*, requires consideration of both qualitative and quantitative factors.<sup>4</sup> However, it ordinarily is not practical to design audit procedures to detect misstatements that are material based solely on qualitative factors.

4. For integrated audits, Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states, "In planning the audit of internal control over financial reporting, the auditor should use the same materiality considerations he or she would use in planning the audit of the company's annual financial statements."<sup>5</sup>

---

<sup>1</sup> Auditing Standard No. 14 establishes requirements regarding the auditor's consideration of materiality in evaluating audit results.

<sup>2</sup> *TSC Industries v. Northway, Inc.*, 426 U.S. 438, 449 (1976). See also *Basic, Inc. v. Levinson*, 485 U.S. 224 (1988).

<sup>3</sup> *TSC Industries*, 426 U.S. at 450.

<sup>4</sup> Appendix B of Auditing Standard No. 14.

<sup>5</sup> Paragraph 20 of Auditing Standard No. 5.

## Objective

5. The objective of the auditor is to apply the concept of materiality appropriately in planning and performing audit procedures.

## Considering Materiality in Planning and Performing an Audit

### Establishing a Materiality Level for the Financial Statements as a Whole

6. To plan the nature, timing, and extent of audit procedures, the auditor should establish a materiality level for the financial statements as a whole that is appropriate in light of the particular circumstances. This includes consideration of the company's earnings and other relevant factors. To determine the nature, timing, and extent of audit procedures, the materiality level for the financial statements as a whole needs to be expressed as a specified amount.

Note: If financial statements for the audit period are not available, the auditor may establish an initial materiality level based on estimated or preliminary financial statement amounts. In those situations, the auditor should take into account the effects of known or expected changes in the company's financial statements, including significant transactions or adjustments that are expected to be reflected in the financial statements at the end of the period.

### Establishing Materiality Levels for Particular Accounts or Disclosures

7. The auditor should evaluate whether, in light of the particular circumstances, there are certain accounts or disclosures for which there is a substantial likelihood that misstatements of lesser amounts than the materiality level established for the financial statements as a whole would influence the judgment of a reasonable investor. If so, the auditor should establish separate materiality levels for those accounts or disclosures to plan the nature, timing, and extent of audit procedures for those accounts or disclosures.

Note: Lesser amounts of misstatements could influence the judgment of a reasonable investor because of qualitative factors, e.g., because of the sensitivity of circumstances surrounding misstatements, such as conflicts of interest in related party transactions.

### Determining Tolerable Misstatement

8. The auditor should determine the amount or amounts of tolerable misstatement for purposes of assessing risks of material misstatement and planning and performing audit procedures at the account or disclosure level. The auditor should determine tolerable misstatement at an amount or amounts that reduce to an appropriately low level the probability that the total of uncorrected and undetected misstatements would result in material misstatement of the financial statements. Accordingly, tolerable misstatement should be less than the materiality level for the financial statements as a whole and, if applicable, the materiality level or levels for particular accounts or disclosures.

9. In determining tolerable misstatement and planning and performing audit procedures, the auditor should take into account the nature, cause (if known), and amount of misstatements that were accumulated in audits of the financial statements of prior periods.

## Considerations for Multi-location Engagements

10. For purposes of the audit of the consolidated financial statements of a company with multiple locations or business units, the auditor should determine tolerable misstatement for the individual locations or business units at an amount that reduces to an appropriately low level the probability that the total of uncorrected and undetected misstatements would result in material misstatement of the consolidated financial statements. Accordingly, tolerable misstatement at an individual location should be less than the materiality level for the financial statements as a whole.

## Considerations as the Audit Progresses

11. The auditor should reevaluate the established materiality level or levels and tolerable misstatement when, because of changes in the particular circumstances or additional information that comes to the auditor's attention, there is a substantial likelihood that misstatements of amounts that differ significantly from the materiality level or levels that were established initially would influence the judgment of a reasonable investor. Situations in which changes in circumstances or additional information that comes to the auditor's attention would require such reevaluation include:

- a. The materiality level or levels and tolerable misstatement were established initially based on estimated or preliminary financial statement amounts that differ significantly from actual amounts.
- b. Events or changes in conditions occurring after the materiality level or levels and tolerable misstatement were established initially are likely to affect investors' perceptions about the company's financial position, results of operations, or cash flows.

Note: Examples of such events or changes in conditions include (1) changes in laws, regulations, or the applicable financial reporting framework that affect investors' expectations about the measurement or disclosure of certain items and (2) significant new contractual arrangements that draw attention to a particular aspect of a company's business that is separately disclosed in the financial statements.

12. If the auditor's reevaluation results in a lower amount for the materiality level or levels or tolerable misstatement than initially established by the auditor, the auditor should (1) evaluate the effect, if any, of the lower amount or amounts on his or her risk assessments and audit procedures and (2) modify the nature, timing, and extent of audit procedures as necessary to obtain sufficient appropriate audit evidence.

Note: The reevaluation of the materiality level or levels and tolerable misstatement is also relevant to the auditor's evaluation of uncorrected misstatements in accordance with Auditing Standard No. 14.<sup>6</sup>

---

<sup>6</sup> Paragraph 17 of Auditing Standard No. 14.

## Auditing Standard No. 12

# Identifying and Assessing Risks of Material Misstatement

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

### Introduction

1. This standard establishes requirements regarding the process of identifying and assessing risks of material misstatement<sup>1</sup> of the financial statements.

2. Paragraphs 4–58 of this standard discuss the auditor's responsibilities for performing **risk assessment procedures**.<sup>2</sup> Paragraphs 59–73 of this standard discuss identifying and assessing the risks of material misstatement using information obtained from performing risk assessment procedures.

### Objective

3. The objective of the auditor is to identify and appropriately assess the risks of material misstatement, thereby providing a basis for designing and implementing responses to the risks of material misstatement.

### Performing Risk Assessment Procedures

4. The auditor should perform risk assessment procedures that are sufficient to provide a reasonable basis for identifying and assessing the risks of material misstatement, whether due to error or fraud,<sup>3</sup> and designing further audit procedures.<sup>4</sup>

5. Risks of material misstatement can arise from a variety of sources, including external factors, such as conditions in the company's industry and environment, and company-specific factors, such as the nature of the company, its activities, and internal control over financial reporting. For example, external or company-specific factors can affect the judgments involved in determining accounting estimates or create pressures to manipulate the financial statements to achieve certain financial targets. Also, risks of material misstatement may relate to, e.g., personnel who lack the necessary financial reporting competencies, information systems that fail to accurately capture business transactions, or financial reporting processes that are not adequately aligned with the requirements in the applicable financial reporting framework. Thus, the audit procedures that are necessary to identify and appropriately assess the risks of material misstatement include consideration of both external factors and

---

<sup>1</sup> Paragraphs 5–8 of Auditing Standard No. 8, *Audit Risk*.

<sup>2</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

<sup>3</sup> AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, discusses fraud, its characteristics, and the types of misstatements due to fraud that are relevant to the audit, i.e., misstatements arising from fraudulent financial reporting and misstatements arising from asset misappropriation.

<sup>4</sup> Auditing Standard No. 15, *Audit Evidence*, describes further audit procedures as consisting of tests of controls and substantive procedures.

company-specific factors. This standard discusses the following risk assessment procedures:

- a. Obtaining an understanding of the company and its environment (paragraphs 7–17);
- b. Obtaining an understanding of internal control over financial reporting (paragraphs 18–40);
- c. Considering information from the client acceptance and retention evaluation, audit planning activities, past audits, and other engagements performed for the company (paragraphs 41–45);
- d. Performing analytical procedures (paragraphs 46–48);
- e. Conducting a discussion among engagement team members regarding the risks of material misstatement (paragraphs 49–53); and
- f. Inquiring of the audit committee, management, and others within the company about the risks of material misstatement (paragraphs 54–58).

Note: This standard describes an approach to identifying and assessing risks of material misstatement that begins at the financial statement level and with the auditor's overall understanding of the company and its environment and works down to the significant accounts and disclosures and their relevant assertions.<sup>5</sup>

6. In an integrated audit, the risks of material misstatement of the financial statements are the same for both the audit of internal control over financial reporting and the audit of financial statements. The auditor's risk assessment procedures should apply to both the audit of internal control over financial reporting and the audit of financial statements.

## Obtaining an Understanding of the Company and Its Environment

7. The auditor should obtain an understanding of the company and its environment ("understanding of the company") to understand the events, conditions, and company activities that might reasonably be expected to have a significant effect on the risks of material misstatement. Obtaining an understanding of the company includes understanding:

- a. Relevant industry, regulatory, and other external factors;
- b. The nature of the company;
- c. The company's selection and application of accounting principles, including related disclosures;
- d. The **company's objectives and strategies** and those related **business risks** that might reasonably be expected to result in risks of material misstatement; and
- e. The company's measurement and analysis of its financial performance.

8. In obtaining an understanding of the company, the auditor should evaluate whether significant changes in the company from prior periods, including changes in its internal control over financial reporting, affect the risks of material misstatement.

---

<sup>5</sup> Paragraph 11 of Auditing Standard No. 15 discusses financial statement assertions.

## Industry, Regulatory, and Other External Factors

9. Obtaining an understanding of relevant industry, regulatory, and other external factors encompasses industry factors, including the competitive environment and technological developments; the regulatory environment, including the applicable financial reporting framework<sup>6</sup> and the legal and political environment;<sup>7</sup> and external factors, including general economic conditions.

## Nature of the Company

10. Obtaining an understanding of the nature of the company includes understanding:

- The company's organizational structure and management personnel;
- The sources of funding of the company's operations and investment activities, including the company's capital structure, noncapital funding (e.g., subordinated debt or dependencies on supplier financing), and other debt instruments;
- The company's significant investments, including equity method investments, joint ventures, and variable interest entities;
- The company's operating characteristics, including its size and complexity;

Note: The size and complexity of a company might affect the risks of misstatement and how the company addresses those risks.

- The sources of the company's earnings, including the relative profitability of key products and services; and
- Key supplier and customer relationships.

Note: The auditor should take into account the information gathered while obtaining an understanding of the nature of the company when determining the existence of related parties in accordance with AU sec. 334, *Related Parties*.

11. As part of obtaining an understanding of the company as required by paragraph 7, the auditor should consider performing the following procedures and the extent to which the procedures should be performed:

- Reading public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and, in an integrated audit, the effectiveness of the company's internal control over financial reporting, e.g., company-issued press releases, company-prepared presentation materials for analysts or investor groups, and analyst reports;
- Observing or reading transcripts of earnings calls and, to the extent publicly available, other meetings with investors or rating agencies;

---

<sup>6</sup> The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

<sup>7</sup> AU sec. 317, *Illegal Acts by Clients*, discusses the auditor's consideration of laws and regulations relevant to the audit.

- Obtaining an understanding of compensation arrangements with senior management, including incentive compensation arrangements, changes or adjustments to those arrangements, and special bonuses; and
- Obtaining information about trading activity in the company's securities and holdings in the company's securities by significant holders to identify potentially significant unusual developments (e.g., from Forms 3, 4, 5, 13D, and 13G).

## Selection and Application of Accounting Principles, Including Related Disclosures

**12.** As part of obtaining an understanding of the company's selection and application of accounting principles, including related disclosures, the auditor should evaluate whether the company's selection and application of accounting principles are appropriate for its business and consistent with the applicable financial reporting framework and accounting principles used in the relevant industry. Also, to identify and assess risks of material misstatement related to omitted, incomplete, or inaccurate disclosures, the auditor should develop expectations about the disclosures that are necessary for the company's financial statements to be presented fairly in conformity with the applicable financial reporting framework.

**13.** The following matters, if present, are relevant to the necessary understanding of the company's selection and application of accounting principles, including related disclosures:

- Significant changes in the company's accounting principles, financial reporting policies, or disclosures and the reasons for such changes;
- The financial reporting competencies of personnel involved in selecting and applying significant new or complex accounting principles;
- The accounts or disclosures for which judgment is used in the application of significant accounting principles, especially in determining management's estimates and assumptions;
- The effect of significant accounting principles in controversial or emerging areas for which there is a lack of authoritative guidance or consensus;
- The methods the company uses to account for significant and unusual transactions; and
- Financial reporting standards and laws and regulations that are new to the company, including when and how the company will adopt such requirements.

## Company Objectives, Strategies, and Related Business Risks

**14.** The purpose of obtaining an understanding of the company's objectives, strategies, and related business risks is to identify business risks that could reasonably be expected to result in material misstatement of the financial statements.

Note: Some relevant business risks might be identified through other risk assessment procedures, such as obtaining an understanding of the nature of the company and understanding industry, regulatory, and other external factors.

15. The following are examples of situations in which business risks might result in material misstatement of the financial statements:

- Industry developments (a potential related business risk might be, e.g., that the company does not have the personnel or expertise to deal with the changes in the industry.)
- New products and services (a potential related business risk might be, e.g., that the new product or service will not be successful.)
- Use of information technology ("IT") (a potential related business risk might be, e.g., that systems and processes are incompatible.)
- New accounting requirements (a potential related business risk might be, e.g., incomplete or improper implementation of a new accounting requirement.)
- Expansion of the business (a potential related business risk might be, e.g., that the demand for the company's products or services has not been accurately estimated.)
- The effects of implementing a strategy, particularly any effects that will lead to new accounting requirements (a potential related business risk might be, e.g., incomplete or improper implementation of the strategy.)
- Current and prospective financing requirements (a potential related business risk might be, e.g., the loss of financing due to the company's inability to meet financing requirements.)
- Regulatory requirements (a potential related business risk might be, e.g., that there is increased legal exposure.)

Note: Business risks could affect risks of material misstatement at the financial statement level, which would affect many accounts and disclosures in the financial statements. For example, a company's loss of financing or declining conditions affecting the company's industry could affect its ability to settle its obligations when due. This, in turn, could affect the risks of material misstatement related to, e.g., the classification of long-term liabilities or valuation of long-term assets, or it could result in substantial doubt about the company's ability to continue as a going concern. Other business risks could affect the risks of material misstatement for particular accounts, disclosures, or assertions. For example, an unsuccessful new product or service or failed business expansion might affect the risks of material misstatement related to the valuation of inventory and other related assets.

## Company Performance Measures

16. The purpose of obtaining an understanding of the company's performance measures is to identify performance measures, whether external or internal, that affect the risks of material misstatement.

17. The following are examples of performance measures that might affect the risks of material misstatement:

- Measures that form the basis for contractual commitments or incentive compensation arrangements;
- Measures used by external parties, such as analysts and rating agencies, to review the company's performance; and
- Measures the company uses to monitor its operations that highlight unexpected results or trends that prompt management to investigate their cause and take corrective action, including correction of misstatements.

Note: The first two examples represent performance measures that can affect the risks of material misstatement by creating incentives or pressures for management of the company to manipulate certain accounts or disclosures to achieve certain performance targets (or conceal a failure to achieve those targets). The third example represents performance measures that management might use to monitor risks affecting the financial statements.

Note: Smaller companies might have less formal processes to measure and review financial performance. In such cases, the auditor might identify relevant performance measures by considering the information that the company uses to manage the business.

## Obtaining an Understanding of Internal Control Over Financial Reporting

18. The auditor should obtain a sufficient understanding of each component<sup>8</sup> of internal control over financial reporting ("understanding of internal control") to (a) identify the types of potential misstatements, (b) assess the factors that affect the risks of material misstatement, and (c) design further audit procedures.

19. The nature, timing, and extent of procedures that are necessary to obtain an understanding of internal control depend on the size and complexity of the company;<sup>9</sup> the auditor's existing knowledge of the company's internal control over financial reporting; the nature of the company's controls, including the company's use of IT; the nature and extent of changes in systems and operations; and the nature of the company's documentation of its internal control over financial reporting.

Note: The auditor also might obtain an understanding of certain controls that are not part of internal control over financial reporting, e.g., controls over the completeness and accuracy of operating or other nonfinancial information used as audit evidence.<sup>10</sup>

20. Obtaining an understanding of internal control includes evaluating the design of controls that are relevant to the audit and determining whether the controls have been implemented.

---

<sup>8</sup> Paragraphs 21–22 of this standard discuss components of internal control over financial reporting.

<sup>9</sup> Paragraph 13 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*, states, "The size and complexity of the company, its business processes, and business units, may affect the way in which the company achieves many of its control objectives. The size and complexity of the company also might affect the risks of misstatement and the controls necessary to address those risks."

<sup>10</sup> Paragraph 10 of Auditing Standard No. 15.

Note: Procedures the auditor performs to obtain evidence about design effectiveness include inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs, as described in paragraphs 37–38, that include these procedures ordinarily are sufficient to evaluate design effectiveness.

Note: Determining whether a control has been implemented means determining whether the control exists and whether the company is using it. The procedures to determine whether a control has been implemented may be performed in connection with the evaluation of its design. Procedures performed to determine whether a control has been implemented include inquiry of appropriate personnel, in combination with observation of the application of controls or inspection of documentation. Walkthroughs, as described in paragraphs 37–38, that include these procedures ordinarily are sufficient to determine whether a control has been implemented.

**21.** Internal control over financial reporting can be described as consisting of the following components:<sup>11</sup>

- The control environment,
- The company's risk assessment process,
- Information and communication,
- Control activities, and
- Monitoring of controls.

**22.** Management might use an internal control framework with components that differ from the components identified in the preceding paragraph when establishing and maintaining the company's internal control over financial reporting. In evaluating the design of controls and determining whether they have been implemented in an audit of financial statements only, the auditor may use the framework used by management or another suitable, recognized framework.<sup>12</sup> For integrated audits, Auditing Standard No. 5, states, "The auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting."<sup>13</sup> If the auditor uses a suitable, recognized internal control framework with components that differ from those listed in the preceding paragraph, the auditor should adapt the requirements in paragraphs 23–36 of this standard to conform to the components in the framework used.

## Control Environment

**23.** The auditor should obtain an understanding of the company's control environment, including the policies and actions of management, the board, and the audit committee concerning the company's control environment.

**24.** Obtaining an understanding of the control environment includes assessing:

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and

---

<sup>11</sup> Different internal control frameworks use different terms and approaches to describe the components of internal control over financial reporting.

<sup>12</sup> See Securities Exchange Act Release No. 34-47986 (June 5, 2003) for a description of the characteristics of a suitable, recognized framework.

<sup>13</sup> Paragraph 5 of Auditing Standard No. 5.

- Whether the board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

Note: In an audit of financial statements only, this assessment may be based on the evidence obtained in understanding the control environment, in accordance with paragraph 23, and the other relevant knowledge possessed by the auditor. In an integrated audit of financial statements and internal control over financial reporting, Auditing Standard No. 5<sup>14</sup> describes the auditor's responsibility for evaluating the control environment.

**25.** If the auditor identifies a control deficiency<sup>15</sup> in the company's control environment, the auditor should evaluate the extent to which this control deficiency is indicative of a fraud risk factor, as discussed in paragraphs 65–66 of this standard.

## The Company's Risk Assessment Process

**26.** The auditor should obtain an understanding of management's process for:

- a. Identifying risks relevant to financial reporting objectives, including risks of material misstatement due to fraud ("fraud risks");
- b. Assessing the likelihood and significance of misstatements resulting from those risks; and
- c. Deciding about actions to address those risks.

**27.** Obtaining an understanding of the company's risk assessment process includes obtaining an understanding of the risks of material misstatement identified and assessed by management and the actions taken to address those risks.

## Information and Communication

**28.** *Information System Relevant to Financial Reporting.* The auditor should obtain an understanding of the information system, including the related business processes, relevant to financial reporting, including:

- a. The classes of transactions in the company's operations that are significant to the financial statements;
- b. The procedures, within both automated and manual systems, by which those transactions are initiated, authorized, processed, recorded, and reported;
- c. The related accounting records, supporting information, and specific accounts in the financial statements that are used to initiate, authorize, process, and record transactions;
- d. How the information system captures events and conditions, other than transactions,<sup>16</sup> that are significant to the financial statements; and

---

<sup>14</sup> Paragraph 25 of Auditing Standard No. 5.

<sup>15</sup> Paragraph A3 of Auditing Standard No. 5.

<sup>16</sup> Examples of such events and conditions include depreciation and amortization and conditions affecting the recoverability of assets.

- e. The period-end financial reporting process.

Note: Appendix B discusses additional considerations regarding manual and automated systems and controls.

**29.** The auditor also should obtain an understanding of how IT affects the company's flow of transactions. (See Appendix B.)

Note: The identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the approach used to identify significant accounts and disclosures and their relevant assertions and, when applicable, to select the controls to test, as well as to assess risk and allocate audit effort.

- 30.** A company's business processes are the activities designed to:
- Develop, purchase, produce, sell and distribute a company's products or services;
  - Record information, including accounting and financial reporting information; and
  - Ensure compliance with laws and regulations relevant to the financial statements.

**31.** Obtaining an understanding of the company's business processes assists the auditor in obtaining an understanding of how transactions are initiated, authorized, processed, and recorded.

**32.** A company's period-end financial reporting process, as referred to in paragraph 28.e., includes the following:

- Procedures used to enter transaction totals into the general ledger;
- Procedures related to the selection and application of accounting principles;<sup>17</sup>
- Procedures used to initiate, authorize, record, and process journal entries in the general ledger;
- Procedures used to record recurring and nonrecurring adjustments to the annual financial statements (and quarterly financial statements, if applicable); and
- Procedures for preparing annual financial statements and related disclosures (and quarterly financial statements, if applicable).

**33. Communication.** The auditor should obtain an understanding of how the company communicates financial reporting roles and responsibilities and significant matters relating to financial reporting to relevant company personnel and others, including:

- Communications between management, the audit committee, and the board of directors; and
- Communications to external parties, including regulatory authorities and shareholders.

## Control Activities

**34.** The auditor should obtain an understanding of control activities that is sufficient to assess the factors that affect the risks of material misstatement and to design further audit procedures, as described in paragraph 18 of this standard.<sup>18</sup> As the auditor obtains an understanding of the other components

---

<sup>17</sup> Paragraphs 12–13 of this standard.

<sup>18</sup> Also see paragraph B5 of Appendix B of this standard.

of internal control over financial reporting, he or she is also likely to obtain knowledge about some control activities. The auditor should use his or her knowledge about the presence or absence of control activities obtained from the understanding of the other components of internal control over financial reporting in determining the extent to which it is necessary to devote additional attention to obtaining an understanding of control activities to assess the factors that affect the risks of material misstatement and to design further audit procedures.

Note: A broader understanding of control activities is needed for relevant assertions for which the auditor plans to rely on controls. Also, in the audit of internal control over financial reporting, the auditor's understanding of control activities encompasses a broader range of accounts and disclosures than what is normally obtained in a financial statement audit.

## Monitoring of Controls

**35.** The auditor should obtain an understanding of the major types of activities that the company uses to monitor the effectiveness of its internal control over financial reporting and how the company initiates corrective actions related to its controls.<sup>19</sup>

**36.** An understanding of the company's monitoring activities includes understanding the source of the information used in the monitoring activities.

## Performing Walkthroughs

**37.** As discussed in paragraph 20, the auditor may perform walkthroughs as part of obtaining an understanding of internal control over financial reporting. For example, the auditor may perform walkthroughs in connection with understanding the flow of transactions in the information system relevant to financial reporting, evaluating the design of controls relevant to the audit, and determining whether those controls have been implemented. In performing a walkthrough, the auditor follows a transaction from origination through the company's processes, including information systems, until it is reflected in the company's financial records, using the same documents and IT that company personnel use. Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and re-performance of controls.

Note: For integrated audits, Auditing Standard No. 5 establishes certain objectives that the auditor should achieve to further understand likely sources of potential misstatements and as part of selecting the controls to test. Auditing Standard No. 5 states that performing walkthroughs will frequently be the most effective way of achieving those objectives.<sup>20</sup>

**38.** In performing a walkthrough, at the points at which important processing procedures occur, the auditor questions the company's personnel about their understanding of what is required by the company's prescribed procedures and controls. These probing questions, combined with the other walkthrough procedures, allow the auditor to gain a sufficient understanding of the process

---

<sup>19</sup> In some companies, internal auditors or others performing an equivalent function contribute to the monitoring of controls. AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, establishes requirements regarding the auditor's consideration and use of the work of the internal audit function.

<sup>20</sup> See paragraphs 34–38 of Auditing Standard No. 5.

and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, probing questions that go beyond a narrow focus on the single transaction used as the basis for the walkthrough allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

## Relationship of Understanding of Internal Control to Tests of Controls

**39.** The objective of obtaining an understanding of internal control, as discussed in paragraph 18 of this standard, is different from testing controls for the purpose of assessing control risk<sup>21</sup> or for the purpose of expressing an opinion on internal control over financial reporting in the audit of internal control over financial reporting.<sup>22</sup> The auditor may obtain an understanding of internal control concurrently with performing tests of controls if he or she obtains sufficient appropriate evidence to achieve the objectives of both procedures. Also, the auditor should take into account the evidence obtained from understanding internal control when assessing control risk and, in the audit of internal control over financial reporting, forming an opinion about the effectiveness of internal control over financial reporting.

**40.** *Relationship of Understanding of Internal Control to Evaluating Entity-Level Controls in an Audit of Internal Control Over Financial Reporting.* Auditing Standard No. 5 states, "The auditor must test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal control over financial reporting."<sup>23</sup> The procedures performed to obtain an understanding of certain components of internal control in accordance with this standard, e.g., the control environment, the company's risk assessment process, information and communication, and monitoring of controls, might provide evidence that is relevant to the auditor's evaluation of entity-level controls.<sup>24</sup> The auditor should take into account the evidence obtained from understanding internal control when determining the nature, timing, and extent of procedures necessary to support the auditor's conclusions about the effectiveness of entity-level controls in the audit of internal control over financial reporting.

## Considering Information from the Client Acceptance and Retention Evaluation, Audit Planning Activities, Past Audits, and Other Engagements

**41.** *Client Acceptance and Retention and Audit Planning Activities.* The auditor should evaluate whether information obtained from the client acceptance and retention evaluation process or audit planning activities is relevant to identifying risks of material misstatement. Risks of material misstatement

---

<sup>21</sup> Paragraphs 16–35 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

<sup>22</sup> Paragraph B1 of Auditing Standard No. 5.

<sup>23</sup> Paragraph 22 of Auditing Standard No. 5.

<sup>24</sup> The entity-level controls included in paragraph 24 of Auditing Standard No. 5 include controls related to the control environment; the company's risk assessment process; centralized processing and controls; controls over the period-end financial reporting process; and controls to monitor other controls.

identified during those activities should be assessed as discussed beginning in paragraph 59 of this standard.

**42. *Past Audits.*** In subsequent years, the auditor should incorporate knowledge obtained during past audits into the auditor's process for identifying risks of material misstatement, including when identifying significant ongoing matters that affect the risks of material misstatement or determining how changes in the company or its environment affect the risks of material misstatement, as discussed in paragraph 8 of this standard.

**43.** If the auditor plans to limit the nature, timing, or extent of his or her risk assessment procedures by relying on information from past audits, the auditor should evaluate whether the prior years' information remains relevant and reliable.

**44. *Other Engagements.*** When the auditor has performed a review of interim financial information in accordance with AU sec. 722, *Interim Financial Information*, the auditor should evaluate whether information obtained during the review is relevant to identifying risks of material misstatement in the year-end audit.

**45.** The auditor should obtain an understanding of the nature of the services that have been performed for the company by the auditor or affiliates of the firm<sup>25</sup> and should take into account relevant information obtained from those engagements in identifying risks of material misstatement.<sup>26</sup>

## Performing Analytical Procedures

**46.** The auditor should perform analytical procedures that are designed to:

- a. Enhance the auditor's understanding of the client's business and the significant transactions and events that have occurred since the prior year end; and
- b. Identify areas that might represent specific risks relevant to the audit, including the existence of unusual transactions and events, and amounts, ratios, and trends that warrant investigation.

**47.** In applying analytical procedures as risk assessment procedures, the auditor should perform analytical procedures relating to revenue with the objective of identifying unusual or unexpected relationships involving revenue accounts that might indicate a material misstatement, including material misstatement due to fraud. Also, when the auditor has performed a review of interim financial information in accordance with AU sec. 722, he or she should take into account the analytical procedures applied in that review when designing and applying analytical procedures as risk assessment procedures.

**48.** When performing an analytical procedure, the auditor should use his or her understanding of the company to develop expectations about plausible relationships among the data to be used in the procedure.<sup>27</sup> When comparison of those expectations with relationships derived from recorded amounts yields unusual or unexpected results, the auditor should take into account those results in identifying the risks of material misstatement.

---

<sup>25</sup> See PCAOB Rule 3501(a)(i), which defines "affiliate of the accounting firm."

<sup>26</sup> Paragraph 7 of Auditing Standard No. 9, *Audit Planning*.

<sup>27</sup> Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data.

Note: Analytical procedures performed as risk assessment procedures often use data that is preliminary or data that is aggregated at a high level, and, in those instances, such analytical procedures are not designed with the level of precision necessary for substantive analytical procedures.

## Conducting a Discussion among Engagement Team Members Regarding Risks of Material Misstatement

49. The key engagement team members should discuss (1) the company's selection and application of accounting principles, including related disclosure requirements, and (2) the susceptibility of the company's financial statements to material misstatement due to error or fraud.

Note: The key engagement team members should discuss the potential for material misstatement due to fraud either as part of the discussion regarding risks of material misstatement or in a separate discussion.<sup>28</sup>

Note: As discussed in paragraph 67, the financial statements might be susceptible to misstatement through omission of required disclosures or presentation of inaccurate or incomplete disclosures.

50. Key engagement team members include all engagement team members who have significant engagement responsibilities, including the engagement partner. The manner in which the discussion is conducted depends on the individuals involved and the circumstances of the engagement. For example, if the audit involves more than one location, there could be multiple discussions with team members in differing locations. The engagement partner or other key engagement team members should communicate the important matters from the discussion to engagement team members who are not involved in the discussion.

Note: If the audit is performed entirely by the engagement partner, that engagement partner, having personally conducted the planning of the audit, is responsible for evaluating the susceptibility of the company's financial statements to material misstatement.

51. Communication among the engagement team members about significant matters affecting the risks of material misstatement should continue throughout the audit, including when conditions change.<sup>29</sup>

## Discussion of the Potential for Material Misstatement Due to Fraud

52. The discussion among the key engagement team members about the potential for material misstatement due to fraud should occur with an attitude that includes a questioning mind, and the key engagement team members should set aside any prior beliefs they might have that management is honest and has integrity. The discussion among the key engagement team members should include:

- An exchange of ideas, or "brainstorming," among the key engagement team members, including the engagement partner, about how and where they believe the company's financial statements

---

<sup>28</sup> Paragraphs 52–53 of this standard.

<sup>29</sup> See also paragraph 29 of Auditing Standard No. 14, *Evaluating Audit Results*.

might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how assets of the company could be misappropriated, including (a) the susceptibility of the financial statements to material misstatement through related party transactions and (b) how fraud might be perpetrated or concealed by omitting or presenting incomplete or inaccurate disclosures;

- A consideration of the known external and internal factors affecting the company that might (a) create incentives or pressures for management and others to commit fraud, (b) provide the opportunity for fraud to be perpetrated, and (c) indicate a culture or environment that enables management to rationalize committing fraud;
- A consideration of the risk of management override; and
- A consideration of the potential audit responses to the susceptibility of the company's financial statements to material misstatement due to fraud.

**53.** The auditor should emphasize the following matters to all engagement team members:

- The need to maintain a questioning mind throughout the audit and to exercise professional skepticism in gathering and evaluating evidence, as described in AU sec. 316;<sup>30</sup>
- The need to be alert for information or other conditions (such as those matters presented in Appendix C of Auditing Standard No. 14) that might affect the assessment of fraud risks; and
- If information or other conditions indicate that a material misstatement due to fraud might have occurred, the need to probe the issues, acquire additional evidence as necessary, and consult with other team members and, if appropriate, others in the firm including specialists.<sup>31</sup>

## Inquiring of the Audit Committee, Management, and Others within the Company about the Risks of Material Misstatement

**54.** The auditor should inquire of the audit committee, or equivalent (or its chair), management, the internal audit function, and others within the company who might reasonably be expected to have information that is important to the identification and assessment of risks of material misstatement.

Note: The auditor's inquiries about risks of material misstatement should include inquiries regarding fraud risks.

**55.** The auditor should use his or her knowledge of the company and its environment, as well as information from other risk assessment procedures, to determine the nature of the inquiries about risks of material misstatement.

---

<sup>30</sup> AU sec. 316.13.

<sup>31</sup> Paragraphs 20–23 of Auditing Standard No. 14 establish further requirements for evaluating whether misstatements might be indicative of fraud and determining the necessary procedures to be performed in those situations.

## Inquiries Regarding Fraud Risks

56. The auditor's inquiries regarding fraud risks should include the following:
- a. Inquiries of management regarding:
    - (1) Whether management has knowledge of fraud, alleged fraud, or suspected fraud affecting the company;
    - (2) Management's process for identifying and responding to fraud risks in the company, including any specific fraud risks the company has identified or account balances or disclosures for which a fraud risk is likely to exist, and the nature, extent, and frequency of management's fraud risk assessment process;
    - (3) Controls that the company has established to address fraud risks the company has identified, or that otherwise help to prevent and detect fraud, including how management monitors those controls;
    - (4) For a company with multiple locations (a) the nature and extent of monitoring of operating locations or business segments and (b) whether there are particular operating locations or business segments for which a fraud risk might be more likely to exist;
    - (5) Whether and how management communicates to employees its views on business practices and ethical behavior;
    - (6) Whether management has received tips or complaints regarding the company's financial reporting (including those received through the audit committee's internal whistleblower program, if such program exists) and, if so, management's responses to such tips and complaints; and
    - (7) Whether management has reported to the audit committee on how the company's internal control serves to prevent and detect material misstatements due to fraud.
  - b. Inquiries of the audit committee, or equivalent, or its chair regarding:
    - (1) The audit committee's views about fraud risks in the company;
    - (2) Whether the audit committee has knowledge of fraud, alleged fraud, or suspected fraud affecting the company;
    - (3) Whether the audit committee is aware of tips or complaints regarding the company's financial reporting (including those received through the audit committee's internal whistleblower program, if such program exists) and, if so, the audit committee's responses to such tips and complaints; and
    - (4) How the audit committee exercises oversight of the company's assessment of fraud risks and the establishment of controls to address fraud risks.

- c. If the company has an internal audit function, inquiries of appropriate internal audit personnel regarding:
- (1) The internal auditors' views about fraud risks in the company;
  - (2) Whether the internal auditors have knowledge of fraud, alleged fraud, or suspected fraud affecting the company;
  - (3) Whether internal auditors have performed procedures to identify or detect fraud during the year, and whether management has satisfactorily responded to the findings resulting from those procedures; and
  - (4) Whether internal auditors are aware of instances of management override of controls and the nature and circumstances of such overrides.

**57.** In addition to the inquiries outlined in the preceding paragraph, the auditor should inquire of others within the company about their views regarding fraud risks, including, in particular, whether they have knowledge of fraud, alleged fraud, or suspected fraud. The auditor should identify other individuals within the company to whom inquiries should be directed and determine the extent of such inquiries by considering whether others in the company might have additional knowledge about fraud, alleged fraud, or suspected fraud or might be able to corroborate fraud risks identified in discussions with management or the audit committee. Examples of other individuals within the company to whom inquiries might be directed include:

- Employees with varying levels of authority within the company, including, e.g., company personnel with whom the auditor comes into contact during the course of the audit (a) in obtaining an understanding of internal control, (b) in observing inventory or performing cutoff procedures, or (c) in obtaining explanations for significant differences identified when performing analytical procedures;
- Operating personnel not directly involved in the financial reporting process;
- Employees involved in initiating, recording, or processing complex or unusual transactions, e.g., a sales transaction with multiple elements or a significant related party transaction; and
- In-house legal counsel.

**58.** When evaluating management's responses to inquiries about fraud risks and determining when it is necessary to corroborate management's responses, the auditor should take into account the fact that management is often in the best position to commit fraud. Also, the auditor should obtain evidence to address inconsistencies in responses to the inquiries.

## Identifying and Assessing the Risks of Material Misstatement

**59.** The auditor should identify and assess the risks of material misstatement at the financial statement level and the assertion level. In identifying and assessing risks of material misstatement, the auditor should:

- a. Identify risks of misstatement using information obtained from performing risk assessment procedures (as discussed in paragraphs 4–58) and considering the characteristics of the accounts and disclosures in the financial statements.  
Note: Factors relevant to identifying fraud risks are discussed in paragraphs 65–69 of this standard.
- b. Evaluate whether the identified risks relate pervasively to the financial statements as a whole and potentially affect many assertions.
- c. Evaluate the types of potential misstatements that could result from the identified risks and the accounts, disclosures, and assertions that could be affected.  
Note: In identifying and assessing risks at the assertion level, the auditor should evaluate how risks at the financial statement level could affect risks of misstatement at the assertion level.
- d. Assess the likelihood of misstatement, including the possibility of multiple misstatements, and the magnitude of potential misstatement to assess the possibility that the risk could result in material misstatement of the financial statements.  
Note: In assessing the likelihood and magnitude of potential misstatement, the auditor may take into account the planned degree of reliance on controls selected to test.<sup>32</sup>
- e. Identify significant accounts and disclosures<sup>33</sup> and their relevant assertions<sup>34</sup> (paragraphs 60–64 of this standard).  
Note: The determination of whether an account or disclosure is significant or whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.
- f. Determine whether any of the identified and assessed risks of material misstatement are **significant risks** (paragraphs 70–71 of this standard).

## Identifying Significant Accounts and Disclosures and Their Relevant Assertions

**60.** To identify significant accounts and disclosures and their relevant assertions in accordance with paragraph 59.e., the auditor should evaluate the qualitative and quantitative risk factors related to the financial statement line items and disclosures. Risk factors relevant to the identification of significant accounts and disclosures and their relevant assertions include:

- Size and composition of the account;

---

<sup>32</sup> Paragraphs 16–35 of Auditing Standard No. 13.

<sup>33</sup> Paragraph A10 of Auditing Standard No. 5 states:

An account or disclosure is a significant account or disclosure if there is a reasonable possibility that the account or disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements, considering the risks of both overstatement and understatement. The determination of whether an account or disclosure is significant is based on inherent risk, without regard to the effect of controls.

<sup>34</sup> Paragraph A9 of Auditing Standard No. 5 states:

A relevant assertion is a financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.

- Susceptibility to misstatement due to error or fraud;
- Volume of activity, complexity, and homogeneity of the individual transactions processed through the account or reflected in the disclosure;
- Nature of the account or disclosure;
- Accounting and reporting complexities associated with the account or disclosure;
- Exposure to losses in the account;
- Possibility of significant contingent liabilities arising from the activities reflected in the account or disclosure;
- Existence of related party transactions in the account; and
- Changes from the prior period in account and disclosure characteristics.

**61.** As part of identifying significant accounts and disclosures and their relevant assertions, the auditor also should determine the likely sources of potential misstatements that would cause the financial statements to be materially misstated. The auditor might determine the likely sources of potential misstatements by asking himself or herself "what could go wrong?" within a given significant account or disclosure.

**62.** The risk factors that the auditor should evaluate in the identification of significant accounts and disclosures and their relevant assertions are the same in the audit of internal control over financial reporting as in the audit of the financial statements; accordingly, significant accounts and disclosures and their relevant assertions are the same for both audits.

Note: In the financial statement audit, the auditor might perform substantive auditing procedures on financial statement accounts, disclosures, and assertions that are not determined to be significant accounts and disclosures and relevant assertions.<sup>35</sup>

**63.** The components of a potential significant account or disclosure might be subject to significantly differing risks.

**64.** When a company has multiple locations or business units, the auditor should identify significant accounts and disclosures and their relevant assertions based on the consolidated financial statements.

## Factors Relevant to Identifying Fraud Risks

**65.** The auditor should evaluate whether the information gathered from the risk assessment procedures indicates that one or more fraud risk factors are present and should be taken into account in identifying and assessing fraud risks. Fraud risk factors are events or conditions that indicate (1) an incentive or pressure to perpetrate fraud, (2) an opportunity to carry out the fraud, or (3) an attitude or rationalization that justifies the fraudulent action. Fraud risk factors do not necessarily indicate the existence of fraud; however, they

---

<sup>35</sup> The auditor might perform substantive auditing procedures because his or her assessment of the risk that undetected misstatement would cause the financial statements to be materially misstated is unacceptably high or as a means of introducing unpredictability in the procedures performed. See paragraphs 11, 14, and 25 of Auditing Standard No. 14, for further discussion about undetected misstatement. See paragraph 61 of Auditing Standard No. 5 and paragraph 5.c. of Auditing Standard No. 13, for further discussion about the unpredictability of auditing procedures.

often are present in circumstances in which fraud exists. Examples of fraud risk factors related to fraudulent financial reporting and misappropriation of assets are listed in AU sec. 316.85. These illustrative risk factors are classified based on the three conditions discussed in this paragraph, which generally are present when fraud exists.

Note: The factors listed in AU sec. 316.85 cover a broad range of situations and are only examples. Accordingly, the auditor might identify additional or different fraud risk factors.

**66.** All three conditions discussed in the preceding paragraph are not required to be observed or evident to conclude that a fraud risk exists. The auditor might conclude that a fraud risk exists even when only one of these three conditions is present.

**67.** *Consideration of the Risk of Omitted, Incomplete, or Inaccurate Disclosures.* The auditor's evaluation of fraud risk factors in accordance with paragraph 65 should include evaluation of how fraud could be perpetrated or concealed by presenting incomplete or inaccurate disclosures or by omitting disclosures that are necessary for the financial statements to be presented fairly in conformity with the applicable financial reporting framework.

**68.** *Presumption of Fraud Risk Involving Improper Revenue Recognition.* The auditor should presume that there is a fraud risk involving improper revenue recognition and evaluate which types of revenue, revenue transactions, or assertions may give rise to such risks.

**69.** *Consideration of the Risk of Management Override of Controls.* The auditor's identification of fraud risks should include the risk of management override of controls.

Note: Controls over management override are important to effective internal control over financial reporting for all companies, and may be particularly important at smaller companies because of the increased involvement of senior management in performing controls and in the period-end financial reporting process. For smaller companies, the controls that address the risk of management override might be different from those at a larger company. For example, a smaller company might rely on more detailed oversight by the audit committee that focuses on the risk of management override.

## Factors Relevant to Identifying Significant Risks

**70.** To determine whether an identified and assessed risk is a significant risk, the auditor should evaluate whether the risk requires special audit consideration because of the nature of the risk or the likelihood and potential magnitude of misstatement related to the risk.

Note: The determination of whether a risk of material misstatement is a significant risk is based on inherent risk, without regard to the effect of controls.

**71.** Factors that should be evaluated in determining which risks are significant risks include:

- a. The effect of the quantitative and qualitative risk factors discussed in paragraph 60 on the likelihood and potential magnitude of misstatements;
- b. Whether the risk is a fraud risk;

Note: A fraud risk is a significant risk.

- c. Whether the risk is related to recent significant economic, accounting, or other developments;
- d. The complexity of transactions;
- e. Whether the risk involves significant transactions with related parties;
- f. The degree of complexity or judgment in the recognition or measurement of financial information related to the risk, especially those measurements involving a wide range of measurement uncertainty; and
- g. Whether the risk involves significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature.

## Further Consideration of Controls

**72.** When the auditor has determined that a significant risk, including a fraud risk, exists, the auditor should evaluate the design of the company's controls that are intended to address fraud risks and other significant risks and determine whether those controls have been implemented, if the auditor has not already done so when obtaining an understanding of internal control, as described in paragraphs 18–40 of this standard.<sup>36</sup>

**73.** Controls that address fraud risks include (a) specific controls designed to mitigate specific risks of fraud, e.g., controls to address risks of intentional misstatement of specific accounts and (b) controls designed to prevent, deter, and detect fraud, e.g., controls to promote a culture of honesty and ethical behavior.<sup>37</sup> Such controls also include those that address the risk of management override of other controls.

## Revision of Risk Assessment

**74.** The auditor's assessment of the risks of material misstatement, including fraud risks, should continue throughout the audit. When the auditor obtains audit evidence during the course of the audit that contradicts the audit evidence on which the auditor originally based his or her risk assessment, the auditor should revise the risk assessment and modify planned audit procedures or perform additional procedures in response to the revised risk assessments.<sup>38</sup>

---

<sup>36</sup> Auditing Standard No. 13 discusses the auditor's response to fraud risks and other significant risks.

<sup>37</sup> AU sec. 316.88 and paragraph 14 of Auditing Standard No. 5 present examples of controls that address fraud risks.

<sup>38</sup> See also paragraph 46 of Auditing Standard No. 13.

## Appendix A

### Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Business risks—Risks that result from significant conditions, events, circumstances, actions, or inactions that could adversely affect a company's ability to achieve its objectives and execute its strategies. Business risks also might result from setting inappropriate objectives and strategies or from changes or complexity in the company's operations or management.

A3. Company's objectives and strategies—The overall plans for the company as established by management or the board of directors. Strategies are the approaches by which management intends to achieve its objectives.

A4. Risk assessment procedures—The procedures performed by the auditor to obtain information for identifying and assessing the risks of material misstatement in the financial statements whether due to error or fraud.

Note: Risk assessment procedures by themselves do not provide sufficient appropriate evidence on which to base an audit opinion.

A5. Significant risk—A risk of material misstatement that requires special audit consideration.

## Appendix B

### Consideration of Manual and Automated Systems and Controls

B1. While obtaining an understanding of the company's information system related to financial reporting, the auditor should obtain an understanding of how the company uses information technology ("IT") and how IT affects the financial statements.<sup>1</sup> The auditor also should obtain an understanding of the extent of manual controls and automated controls used by the company, including the IT general controls that are important to the effective operation of the automated controls. That information should be taken into account in assessing the risks of material misstatement.<sup>2</sup>

B2. Controls in a manual system might include procedures such as approvals and reviews of transactions, and reconciliations and follow-up of reconciling items.

B3. Alternatively, a company might use automated procedures to initiate, record, process, and report transactions, in which case records in electronic format would replace paper documents. When IT is used to initiate, record, process, and report transactions, the IT systems and programs may include controls related to the relevant assertions of significant accounts and disclosures or may be critical to the effective functioning of manual controls that depend on IT.

B4. The auditor should obtain an understanding of specific risks to a company's internal control over financial reporting resulting from IT. Examples of such risks include:

- Reliance on systems or programs that are inaccurately processing data, processing inaccurate data, or both;
- Unauthorized access to data that might result in destruction of data or improper changes to data, including the recording of unauthorized or nonexistent transactions or inaccurate recording of transactions (particular risks might arise when multiple users access a common database);
- The possibility of IT personnel gaining access privileges beyond those necessary to perform their assigned duties, thereby breaking down segregation of duties;
- Unauthorized changes to data in master files;
- Unauthorized changes to systems or programs;
- Failure to make necessary changes to systems or programs;
- Inappropriate manual intervention; and
- Potential loss of data or inability to access data as required.

---

<sup>1</sup> See also AU sec. 324, *Service Organizations*, if the company uses a service organization for services that are part of the company's internal control over financial reporting.

<sup>2</sup> See also paragraphs 16–17 of Auditing Standard No. 9, *Audit Planning*.

B5. In obtaining an understanding of the company's control activities, the auditor should obtain an understanding of how the company has responded to risks arising from IT.

B6. When a company uses manual elements in internal control systems and the auditor plans to rely on, and therefore test, those manual controls, the auditor should design procedures to test the consistency in the application of those manual controls.

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004  
August 5, 2010

PCAOB Rulemaking  
Docket Matter No. 026

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

To view the release in its entirety, see the "Attachment" section of Auditing Standard No. 8.

## Auditing Standard No. 13

# *The Auditor's Responses to the Risks of Material Misstatement*

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

### Introduction

1. This standard establishes requirements regarding designing and implementing appropriate responses to the risks of material misstatement.

### Objective

2. The objective of the auditor is to address the risks of material misstatement through appropriate overall audit responses and audit procedures.

### Responding to the Risks of Material Misstatement

3. To meet the objective in the preceding paragraph, the auditor must design and implement audit responses that address the risks of material misstatement that are identified and assessed in accordance with Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

4. This standard discusses the following types of audit responses:

- a. Responses that have an overall effect on how the audit is conducted ("overall responses"), as described in paragraphs 5–7; and
- b. Responses involving the nature, timing, and extent of the audit procedures to be performed, as described in paragraphs 8–46.

### Overall Responses

5. *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

The auditor should design and implement overall responses to address the assessed risks of material misstatement as follows:

- a. *Making appropriate assignments of significant engagement responsibilities.* The knowledge, skill, and ability of engagement team members with significant engagement responsibilities should be commensurate with the assessed risks of material misstatement.<sup>1</sup>
- b. *Providing the extent of supervision that is appropriate for the circumstances, including, in particular, the assessed risks of material misstatement.* (See paragraphs 5–6 of Auditing Standard No. 10, *Supervision of the Audit Engagement*.)

---

<sup>1</sup> See also paragraph .06 of AU sec. 230, *Due Professional Care in the Performance of Work*.

- c. *Incorporating elements of unpredictability in the selection of audit procedures to be performed.* As part of the auditor's response to the assessed risks of material misstatement, including the assessed risks of material misstatement due to fraud ("fraud risks"), the auditor should incorporate an element of unpredictability in the selection of auditing procedures to be performed from year to year. Examples of ways to incorporate an element of unpredictability include:
- (1) Performing audit procedures related to accounts, disclosures, and assertions that would not otherwise be tested based on their amount or the auditor's assessment of risk;
  - (2) Varying the timing of the audit procedures;
  - (3) Selecting items for testing that have lower amounts or are otherwise outside customary selection parameters;
  - (4) Performing audit procedures on an unannounced basis; and
  - (5) In multi-location audits, varying the location or the nature, timing, and extent of audit procedures at related locations or business units from year to year.<sup>2</sup>
- d. *Evaluating the company's selection and application of significant accounting principles.* The auditor should evaluate whether the company's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions,<sup>3</sup> are indicative of bias that could lead to material misstatement of the financial statements.

**6.** The auditor also should determine whether it is necessary to make pervasive changes to the nature, timing, or extent of audit procedures to adequately address the assessed risks of material misstatement. Examples of such pervasive changes include modifying the audit strategy to:

- a. Increase the substantive testing of the valuation of numerous significant accounts at year end because of significantly deteriorating market conditions, and
- b. Obtain more persuasive audit evidence from substantive procedures due to the identification of pervasive weaknesses in the company's control environment.

**7.** Due professional care requires the auditor to exercise professional skepticism.<sup>4</sup> Professional skepticism is an attitude that includes a questioning mind and a critical assessment of the appropriateness and sufficiency of audit evidence. The auditor's responses to the assessed risks of material misstatement, particularly fraud risks, should involve the application of professional skepticism in gathering and evaluating audit evidence.<sup>5</sup> Examples of the application

---

<sup>2</sup> For integrated audits, paragraphs 61 and B13 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, establish requirements for introducing unpredictability in testing of controls from year to year and in multi-location audits.

<sup>3</sup> Paragraphs 12–13 of Auditing Standard No. 12 discuss the auditor's responsibilities regarding obtaining an understanding of the company's selection and application of accounting principles. See also paragraphs .66–.67 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, and paragraphs .04 and .06 of AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*.

<sup>4</sup> AU secs. 230.07–.09.

<sup>5</sup> AU sec. 316.13.

of professional skepticism in response to the assessed fraud risks are (a) modifying the planned audit procedures to obtain more reliable evidence regarding relevant assertions and (b) obtaining sufficient appropriate evidence to corroborate management's explanations or representations concerning important matters, such as through third-party confirmation, use of a specialist engaged or employed by the auditor, or examination of documentation from independent sources.

## Responses Involving the Nature, Timing, and Extent of Audit Procedures

8. The auditor should design and perform audit procedures in a manner that addresses the assessed risks of material misstatement for each relevant assertion of each significant account and disclosure.

9. In designing the audit procedures to be performed, the auditor should:

- a. Obtain more persuasive audit evidence the higher the auditor's assessment of risk;
- b. Take into account the types of potential misstatements that could result from the identified risks and the likelihood and magnitude of potential misstatement;<sup>6</sup>
- c. In an integrated audit, design the testing of controls to accomplish the objectives of both audits simultaneously:

(1) To obtain sufficient evidence to support the auditor's control risk<sup>7</sup> assessments for purposes of the audit of financial statements;<sup>8</sup> and

(2) To obtain sufficient evidence to support the auditor's opinion on internal control over financial reporting as of year-end.

Note: Auditing Standard No. 5 establishes requirements for tests of controls in the audit of internal control over financial reporting.

10. The audit procedures performed in response to the assessed risks of material misstatement can be classified into two categories: (1) tests of controls and (2) substantive procedures.<sup>9</sup> Paragraphs 16–35 of this standard discuss tests of controls, and paragraphs 36–46 discuss substantive procedures.

Note: Paragraphs 16–17 of this standard discuss when tests of controls are necessary in a financial statement audit. Ordinarily, tests of controls are performed for relevant assertions for which the auditor chooses to rely on controls to modify his or her substantive procedures.

## Responses to Significant Risks

11. For significant risks, the auditor should perform substantive procedures, including tests of details, that are specifically responsive to the assessed risks.

---

<sup>6</sup> For example, potential misstatements regarding disclosures include omission of required disclosures or presentation of inaccurate or incomplete disclosures.

<sup>7</sup> See paragraph 7.b. of Auditing Standard No. 8, *Audit Risk*, for a definition of control risk.

<sup>8</sup> For purposes of this standard, the term "audit of financial statements" refers to the financial statement portion of the integrated audit and to the audit of financial statements only.

<sup>9</sup> Substantive procedures consist of (a) tests of details of accounts and disclosures and (b) substantive analytical procedures.

Note: Auditing Standard No. 12 discusses identification of significant risks<sup>10</sup> and states that fraud risks are significant risks.

## Responses to Fraud Risks

**12.** The audit procedures that are necessary to address the assessed fraud risks depend upon the types of risks and the relevant assertions that might be affected.

Note: If the auditor identifies deficiencies in controls that are intended to address assessed fraud risks, the auditor should take into account those deficiencies when designing his or her response to those fraud risks.

Note: Auditing Standard No. 5 establishes requirements for addressing assessed fraud risks in the audit of internal control over financial reporting.<sup>11</sup>

**13.** *Addressing Fraud Risks in the Audit of Financial Statements.* In the audit of financial statements, the auditor should perform substantive procedures, including tests of details, that are specifically responsive to the assessed fraud risks. If the auditor selects certain controls intended to address the assessed fraud risks for testing in accordance with paragraphs 16–17 of this standard, the auditor should perform tests of those controls.

**14.** The following are examples of ways in which planned audit procedures may be modified to address assessed fraud risks:

- a. Changing the *nature* of audit procedures to obtain evidence that is more reliable or to obtain additional corroborative information;
- b. Changing the *timing* of audit procedures to be closer to the end of the period or to the points during the period in which fraudulent transactions are more likely to occur; and
- c. Changing the *extent* of the procedures applied to obtain more evidence, e.g., by increasing sample sizes or applying computer-assisted audit techniques to all of the items in an account.

Note: AU secs. 316.54–.67 provide additional examples of responses to assessed fraud risks relating to fraudulent financial reporting (e.g., revenue recognition, inventory quantities, and management estimates) and misappropriation of assets in the audit of financial statements.

**15.** Also, AU sec. 316 indicates that the auditor should perform audit procedures to specifically address the risk of management override of controls including:

- a. Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud (AU secs. 316.58–.62);
- b. Reviewing accounting estimates for biases that could result in material misstatement due to fraud (AU secs. 316.63–.65); and
- c. Evaluating the business rationale for significant unusual transactions (AU secs. 316.66–.67).

---

<sup>10</sup> See paragraph 71 of Auditing Standard No. 12 for factors that the auditor should evaluate in determining which risks are significant risks.

<sup>11</sup> Paragraphs 14–15 of Auditing Standard No. 5.

## Testing Controls

### Testing Controls in an Audit of Financial Statements

**16. *Controls to be Tested.*** If the auditor plans to assess control risk at less than the maximum by relying on controls,<sup>12</sup> and the nature, timing, and extent of planned substantive procedures are based on that lower assessment, the auditor must obtain evidence that the controls selected for testing are designed effectively and operated effectively during the entire **period of reliance**.<sup>13</sup> However, the auditor is not required to assess control risk at less than the maximum for *all* relevant assertions and, for a variety of reasons, the auditor may choose not to do so.

**17.** Also, tests of controls must be performed in the audit of financial statements for each relevant assertion for which substantive procedures alone cannot provide sufficient appropriate audit evidence and when necessary to support the auditor's reliance on the accuracy and completeness of financial information used in performing other audit procedures.<sup>14</sup>

Note: When a significant amount of information supporting one or more relevant assertions is electronically initiated, recorded, processed, or reported, it might be impossible to design effective substantive tests that, by themselves, would provide sufficient appropriate evidence regarding the assertions. For such assertions, significant audit evidence may be available only in electronic form. In such cases, the sufficiency and appropriateness of the audit evidence usually depend on the effectiveness of controls over their accuracy and completeness. Furthermore, the potential for improper initiation or alteration of information to occur and not be detected may be greater if information is initiated, recorded, processed, or reported only in electronic form and appropriate controls are not operating effectively.

**18. *Evidence about the Effectiveness of Controls in the Audit of Financial Statements.*** In designing and performing tests of controls for the audit of financial statements, the evidence necessary to support the auditor's control risk assessment depends on the degree of reliance the auditor plans to place on the effectiveness of a control. The auditor should obtain more persuasive audit evidence from tests of controls the greater the reliance the auditor places on the effectiveness of a control. The auditor also should obtain more persuasive evidence about the effectiveness of controls for each relevant assertion for which the audit approach consists primarily of tests of controls, including situations in which substantive procedures alone cannot provide sufficient appropriate audit evidence.

### Testing Design Effectiveness

**19.** The auditor should test the design effectiveness of the controls selected for testing by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and

---

<sup>12</sup> Reliance on controls that is supported by sufficient and appropriate audit evidence allows the auditor to assess control risk at less than the maximum, which results in a lower assessed risk of material misstatement. In turn, this allows the auditor to modify the nature, timing, and extent of planned substantive procedures.

<sup>13</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

<sup>14</sup> Paragraph 10 of Auditing Standard No. 15, *Audit Evidence*, and paragraph .16 of AU sec. 329, *Substantive Analytical Procedures*.

can effectively prevent or detect error or fraud that could result in material misstatements in the financial statements.

Note: A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organization. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.

**20.** Procedures the auditor performs to test design effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.<sup>15</sup>

## Testing Operating Effectiveness

**21.** The auditor should test the operating effectiveness of a control selected for testing by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

**22.** Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

## Obtaining Evidence from Tests of Controls

**23.** The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing might provide sufficient evidence in relation to the degree of reliance in an audit of financial statements.

Note: To obtain evidence about whether a control is effective, the control must be tested directly; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures.

## Nature of Tests of Controls

**24.** Some types of tests, by their nature, produce greater evidence of the effectiveness of controls than other tests. The following tests that the auditor might perform are presented in the order of the evidence that they ordinarily would produce, from least to most: inquiry, observation, inspection of relevant documentation, and re-performance of a control.

Note: Inquiry alone does not provide sufficient evidence to support a conclusion about the effectiveness of a control.

**25.** The nature of the tests of controls that will provide appropriate evidence depends, to a large degree, on the nature of the control to be tested, including whether the operation of the control results in documentary evidence of its operation. Documentary evidence of the operation of some controls, such as management's philosophy and operating style, might not exist.

---

<sup>15</sup> Paragraphs 37–38 of Auditing Standard No. 12 discuss performing a walkthrough.

Note: A smaller, less complex company or unit might have less formal documentation regarding the operation of its controls. In those situations, testing controls through inquiry combined with other procedures, such as observation of activities, inspection of less formal documentation, or re-performance of certain controls, might provide sufficient evidence about whether the control is effective.

## Extent of Tests of Controls

**26.** The more extensively a control is tested, the greater the evidence obtained from that test.

**27.** Matters that could affect the necessary extent of testing of a control in relation to the degree of reliance on a control include the following:

- The frequency of the performance of the control by the company during the audit period;
- The length of time during the audit period that the auditor is relying on the operating effectiveness of the control;
- The expected rate of deviation from a control;
- The relevance and reliability of the audit evidence to be obtained regarding the operating effectiveness of the control;
- The extent to which audit evidence is obtained from tests of other controls related to the assertion;
- The nature of the control, including, in particular, whether it is a manual control or an automated control; and
- For an automated control, the effectiveness of relevant information technology general controls.

Note: AU sec. 350, *Audit Sampling*, establishes requirements regarding the use of sampling in tests of controls.

## Timing of Tests of Controls

**28.** The timing of tests of controls relates to when the evidence about the operating effectiveness of the controls is obtained and the period of time to which it applies. Paragraph 16 of this standard indicates that the auditor must obtain evidence that the controls selected for testing are designed effectively and operated effectively during the entire period of reliance.

**29.** *Using Audit Evidence Obtained during an Interim Period.* When the auditor obtains evidence about the operating effectiveness of controls as of or through an interim date, he or she should determine what additional evidence is necessary concerning the operation of the controls for the remaining period of reliance.

**30.** The additional evidence that is necessary to update the results of testing from an interim date through the remaining period of reliance depends on the following factors:

- The possibility that there have been any significant changes in internal control over financial reporting subsequent to the interim date;

Note: If there have been significant changes to the control since the interim date, the auditor should obtain evidence about the effectiveness of the new or modified control;

- The inherent risk associated with the related account(s) or assertion(s);
- The specific control tested prior to year end, including the nature of the control and the risk that the control is no longer effective during the remaining period, and the results of the tests of the control;
- The planned degree of reliance on the control;
- The sufficiency of the evidence of effectiveness obtained at an interim date; and
- The length of the remaining period.

**31. *Using Audit Evidence Obtained in Past Audits.*** For audits of financial statements, the auditor should obtain evidence during the current year audit about the design and operating effectiveness of controls upon which the auditor relies. When controls on which the auditor plans to rely have been tested in past audits and the auditor plans to use evidence about the effectiveness of those controls that was obtained in prior years, the auditor should take into account the following factors to determine the evidence needed during the current year audit to support the auditor's control risk assessments:

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) or assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls that the auditor has tested, especially controls that monitor other controls;
- The nature of the controls and the frequency with which they operate;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective);<sup>16</sup>
- The complexity of the control and the significance of the judgments that must be made in connection with its operation;
- The planned degree of reliance on the control;
- The nature, timing, and extent of procedures performed in past audits;

---

<sup>16</sup> The auditor also may use a benchmarking strategy, when appropriate, for automated application controls in subsequent years' audits. Benchmarking is described further beginning at paragraph B28 of Auditing Standard No. 5.

- The results of the previous years' testing of the control;
- Whether there have been changes in the control or the process in which it operates since the previous audit; and
- For integrated audits, the evidence regarding the effectiveness of the controls obtained during the audit of internal control.

## Assessing Control Risk

**32.** The auditor should assess control risk for relevant assertions by evaluating the evidence obtained from all sources, including the auditor's testing of controls for the audit of internal control and the audit of financial statements, misstatements detected during the financial statement audit, and any identified control deficiencies.

**33.** Control risk should be assessed at the maximum level for relevant assertions (1) for which controls necessary to sufficiently address the assessed risk of material misstatement in those assertions are missing or ineffective or (2) when the auditor has not obtained sufficient appropriate evidence to support a control risk assessment below the maximum level.

**34.** When deficiencies affecting the controls on which the auditor intends to rely are detected, the auditor should evaluate the severity of the deficiencies and the effect on the auditor's control risk assessments. If the auditor plans to rely on controls relating to an assertion but the controls that the auditor tests are ineffective because of control deficiencies, the auditor should:

- a. Perform tests of other controls related to the same assertion as the ineffective controls, or
- b. Revise the control risk assessment and modify the planned substantive procedures as necessary in light of the increased assessment of risk.

Note: Auditing Standard No. 5 establishes requirements for evaluating the severity of a control deficiency and communicating identified control deficiencies to management and the audit committee in an integrated audit. AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, establishes requirements for communicating significant deficiencies and material weaknesses in an audit of financial statements only.

## Testing Controls in an Audit of Internal Control

**35.** Auditing Standard No. 5 states that the objective of the tests of controls in an audit of internal control is to obtain evidence about the effectiveness of controls to support the auditor's opinion on the company's internal control over financial reporting. The auditor's opinion relates to the effectiveness of the company's internal control over financial reporting as of a point in time and taken as a whole.<sup>17</sup> Auditing Standard No. 5 establishes requirements regarding the selection of controls to be tested and the necessary nature, timing, and extent of tests of controls in an audit of internal control over financial reporting.

## Substantive Procedures

**36.** The auditor should perform substantive procedures for each relevant assertion of each significant account and disclosure, regardless of the assessed level of control risk.

---

<sup>17</sup> Paragraph B1 of Auditing Standard No. 5.

**37.** As the assessed risk of material misstatement increases, the evidence from substantive procedures that the auditor should obtain also increases. The evidence provided by the auditor's substantive procedures depends upon the mix of the nature, timing, and extent of those procedures. Further, for an individual assertion, different combinations of the nature, timing, and extent of testing might provide sufficient appropriate evidence to respond to the assessed risk of material misstatement.

**38.** Internal control over financial reporting has inherent limitations,<sup>18</sup> which, in turn, can affect the evidence that is needed from substantive procedures. For example, more evidence from substantive procedures ordinarily is needed for relevant assertions that have a higher susceptibility to management override or to lapses in judgment or breakdowns resulting from human failures.<sup>19</sup>

## Nature of Substantive Procedures

**39.** Substantive procedures generally provide persuasive evidence when they are designed and performed to obtain evidence that is relevant and reliable. Also, some types of substantive procedures, by their nature, produce more persuasive evidence than others. Inquiry alone does not provide sufficient appropriate evidence to support a conclusion about a relevant assertion.

Note: Auditing Standard No. 15 discusses certain types of substantive procedures and the relevance and reliability of audit evidence.

**40.** Taking into account the types of potential misstatements in the relevant assertions that could result from identified risks, as required by paragraph 9.b., can help the auditor determine the types and combination of substantive audit procedures that are necessary to detect material misstatements in the respective assertions.

**41.** *Substantive Procedures Related to the Period-end Financial Reporting Process.* The auditor's substantive procedures must include the following audit procedures related to the period-end financial reporting process:

- a. Reconciling the financial statements with the underlying accounting records; and
- b. Examining material adjustments made during the course of preparing the financial statements.

Note: AU secs. 316.58–.62 establish requirements for examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.

## Extent of Substantive Procedures

**42.** The more extensively a substantive procedure is performed, the greater the evidence obtained from the procedure. The necessary extent of a substantive audit procedure depends on the materiality of the account or disclosure, the assessed risk of material misstatement, and the necessary degree of assurance from the procedure. However, increasing the extent of an audit procedure cannot adequately address an assessed risk of material misstatement unless the evidence to be obtained from the procedure is reliable and relevant.

---

<sup>18</sup> Paragraph A5 of Auditing Standard No. 5.

<sup>19</sup> See, e.g., paragraph .14 of AU sec. 328, *Auditing Fair Value Measurements and Disclosures*.

## Timing of Substantive Procedures

43. Performing certain substantive procedures at interim dates may permit early consideration of matters affecting the year-end financial statements, e.g., testing material transactions involving higher risks of misstatement. However, performing substantive procedures at an interim date without performing procedures at a later date increases the risk that a material misstatement could exist in the year-end financial statements that would not be detected by the auditor. This risk increases as the period between the interim date and year end increases.

44. In determining whether it is appropriate to perform substantive procedures at an interim date, the auditor should take into account the following:

- a. The assessed risk of material misstatement, including:
  - (1) The auditor's assessment of control risk, as discussed in paragraphs 32–34;
  - (2) The existence of conditions or circumstances, if any, that create incentives or pressures on management to misstate the financial statements between the interim test date and the end of the period covered by the financial statements;
  - (3) The effects of known or expected changes in the company, its environment, or its internal control over financial reporting during the remaining period;
- b. The nature of the substantive procedures;
- c. The nature of the account or disclosure and relevant assertion; and
- d. The ability of the auditor to perform the necessary audit procedures to cover the remaining period.

45. When substantive procedures are performed at an interim date, the auditor should cover the remaining period by performing substantive procedures, or substantive procedures combined with tests of controls, that provide a reasonable basis for extending the audit conclusions from the interim date to the period end. Such procedures should include (a) comparing relevant information about the account balance at the interim date with comparable information at the end of the period to identify amounts that appear unusual and investigating such amounts and (b) performing audit procedures to test the remaining period.

46. If the auditor obtains evidence that contradicts the evidence on which the original risk assessments were based, including evidence of misstatements that he or she did not expect, the auditor should revise the related risk assessments and modify the planned nature, timing, or extent of substantive procedures covering the remaining period as necessary. Examples of such modifications include extending or repeating at the period end the procedures performed at the interim date.

## Dual-purpose Tests

47. In some situations, the auditor might perform a substantive test of a transaction concurrently with a test of a control relevant to that transaction (a "**dual-purpose test**"). In those situations, the auditor should design the dual-purpose test to achieve the objectives of both the test of the control and the substantive test. Also, when performing a dual-purpose test, the auditor should evaluate the results of the test in forming conclusions about both the assertion and the effectiveness of the control being tested.<sup>20</sup>

---

<sup>20</sup> Paragraph .44 of AU sec. 350 discusses applying audit sampling in dual-purpose tests.

## Appendix A

### Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Dual-purpose test—Substantive test of a transaction and a test of a control relevant to that transaction that are performed concurrently, e.g., a substantive test of sales transactions performed concurrently with a test of controls over those transactions.

A3. Period of reliance—The period being covered by the company's financial statements, or the portion of that period, for which the auditor plans to rely on controls in order to modify the nature, timing, and extent of planned substantive procedures.

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004  
August 5, 2010

PCAOB Rulemaking  
Docket Matter No. 026

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

To view the release in its entirety, see the "Attachment" section of Auditing Standard No. 8.

## Auditing Standard No. 14

### *Evaluating Audit Results*

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

#### Introduction

1. This standard establishes requirements regarding the auditor's evaluation of audit results and determination of whether he or she has obtained sufficient appropriate audit evidence.

#### Objective

2. The objective of the auditor is to evaluate the results of the audit to determine whether the audit evidence obtained is sufficient and appropriate to support the opinion to be expressed in the auditor's report.

#### Evaluating the Results of the Audit of Financial Statements

3. In forming an opinion on whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework, the auditor should take into account all relevant audit evidence, regardless of whether it appears to corroborate or to contradict the assertions in the financial statements.

4. In the audit of financial statements,<sup>1</sup> the auditor's evaluation of audit results should include evaluation of the following:

- a. The results of analytical procedures performed in the overall review of the financial statements ("overall review");
- b. **Misstatements** accumulated during the audit, including, in particular, **uncorrected misstatements**;<sup>2</sup>
- c. The qualitative aspects of the company's accounting practices;
- d. Conditions identified during the audit that relate to the assessment of the risk of material misstatement due to fraud ("fraud risk");
- e. The presentation of the financial statements, including the disclosures; and
- f. The sufficiency and appropriateness of the audit evidence obtained.

---

<sup>1</sup> For purposes of this standard, the term "audit of financial statements" refers to the financial statement portion of the integrated audit and to the audit of financial statements only.

<sup>2</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

## Performing Analytical Procedures in the Overall Review

5. In the overall review, the auditor should read the financial statements and disclosures and perform analytical procedures to (a) evaluate the auditor's conclusions formed regarding significant accounts and disclosures and (b) assist in forming an opinion on whether the financial statements as a whole are free of material misstatement.

6. As part of the overall review, the auditor should evaluate whether:

- a. The evidence gathered in response to unusual or unexpected transactions, events, amounts, or relationships previously identified during the audit is sufficient; and
- b. Unusual or unexpected transactions, events, amounts, or relationships<sup>3</sup> indicate risks of material misstatement that were not identified previously, including, in particular, fraud risks.

Note: If the auditor discovers a previously unidentified risk of material misstatement or concludes that the evidence gathered is not adequate, he or she should modify his or her audit procedures or perform additional procedures as necessary in accordance with paragraph 36 of this standard.

7. The nature and extent of the analytical procedures performed during the overall review may be similar to the analytical procedures performed as risk assessment procedures. The auditor should perform analytical procedures relating to revenue through the end of the reporting period.<sup>4</sup>

8. The auditor should obtain corroboration for management's explanations regarding significant unusual or unexpected transactions, events, amounts, or relationships. If management's responses to the auditor's inquiries appear to be implausible, inconsistent with other audit evidence, imprecise, or not at a sufficient level of detail to be useful, the auditor should perform procedures to address the matter.

9. *Evaluating Whether Analytical Procedures Indicate a Previously Unrecognized Fraud Risk.* Whether an unusual or unexpected transaction, event, amount, or relationship indicates a fraud risk, as discussed in paragraph 6.b., depends on the relevant facts and circumstances, including the nature of the account or relationship among the data used in the analytical procedures. For example, certain unusual or unexpected transactions, events, amounts, or relationships could indicate a fraud risk if a component of the relationship involves accounts and disclosures that management has incentives or pressures to manipulate, e.g., significant unusual or unexpected relationships involving revenue and income.

## Accumulating and Evaluating Identified Misstatements

10. *Accumulating Identified Misstatements.* The auditor should accumulate misstatements identified during the audit, other than those that are clearly trivial.

Note: "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a smaller order of magnitude than the materiality

---

<sup>3</sup> Paragraphs 46–48 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement* and paragraph .03 of AU sec. 329, *Substantive Analytical Procedures*.

<sup>4</sup> Paragraph 47 of Auditing Standard No. 12 contains a requirement to perform analytical procedures relating to revenue as part of the risk assessment procedures.

level established in accordance with Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, and will be inconsequential, whether taken individually or in aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items is clearly trivial, the matter is not considered trivial.

**11.** The auditor may designate an amount below which misstatements are clearly trivial and do not need to be accumulated. In such cases, the amount should be set so that any misstatements below that amount would not be material to the financial statements, individually or in combination with other misstatements, considering the possibility of undetected misstatement.

**12.** The auditor's accumulation of misstatements should include the auditor's best estimate of the total misstatement in the accounts and disclosures that he or she has tested, not just the amount of misstatements specifically identified. This includes misstatements related to accounting estimates, as determined in accordance with paragraph 13 of this standard, and projected misstatements from substantive procedures that involve audit sampling, as determined in accordance with AU sec. 350, *Audit Sampling*.<sup>5</sup>

**13. Misstatements Relating to Accounting Estimates.** If the auditor concludes that the amount of an accounting estimate included in the financial statements is unreasonable or was not determined in conformity with the relevant requirements of the applicable financial reporting framework, he or she should treat the difference between that estimate and a reasonable estimate determined in conformity with the applicable accounting principles as a misstatement. If a range of reasonable estimates is supported by sufficient appropriate audit evidence and the recorded estimate is outside of the range of reasonable estimates, the auditor should treat the difference between the recorded accounting estimate and the closest reasonable estimate as a misstatement.

Note: If an accounting estimate is determined in conformity with the relevant requirements of the applicable financial reporting framework and the amount of the estimate is reasonable, a difference between an estimated amount best supported by the audit evidence and the recorded amount of the accounting estimate ordinarily would not be considered to be a misstatement. Paragraph 27 discusses evaluating accounting estimates for bias.

**14. Considerations as the Audit Progresses.** The auditor should determine whether the overall audit strategy and audit plan need to be modified if:

- a. The nature of accumulated misstatements and the circumstances of their occurrence indicate that other misstatements might exist that, in combination with accumulated misstatements, could be material; or
- b. The aggregate of misstatements accumulated during the audit approaches the materiality level or levels used in planning and performing the audit.<sup>6</sup>

Note: When the aggregate of accumulated misstatements approaches the materiality level or levels used in planning and performing the audit, there likely will be greater than an appropriately low level of risk that possible undetected misstatements, when combined with the aggregate of misstatements accumulated during the audit that remain uncorrected, could be material to the financial statements. If the auditor's assessment of this risk

---

<sup>5</sup> AU sec. 350.26.

<sup>6</sup> Auditing Standard No. 11.

is unacceptably high, he or she should perform additional audit procedures or determine that management has adjusted the financial statements so that the risk that the financial statements are materially misstated has been reduced to an appropriately low level.

**15.** The auditor should communicate accumulated misstatements to management on a timely basis to provide management with an opportunity to correct them.

**16.** If management has examined an account or a disclosure in response to misstatements detected by the auditor and has made corrections to the account or disclosure, the auditor should evaluate management's work to determine whether the corrections have been recorded properly and whether uncorrected misstatements remain.

**17.** *Evaluation of the Effect of Uncorrected Misstatements.* The auditor should evaluate whether uncorrected misstatements are material, individually or in combination with other misstatements. In making this evaluation, the auditor should evaluate the misstatements in relation to the specific accounts and disclosures involved and to the financial statements as a whole, taking into account relevant quantitative and qualitative factors.<sup>7</sup> (See Appendix B.)

Note: In interpreting the federal securities laws, the Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the ...fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."<sup>8</sup> As the Supreme Court has noted, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him ...."<sup>9</sup>

Note: As a result of the interaction of quantitative and qualitative considerations in materiality judgments, uncorrected misstatements of relatively small amounts could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility<sup>10</sup> that it could lead to a material contingent liability or a material loss of revenue.<sup>11</sup> Also, a misstatement made intentionally could be material for qualitative reasons, even if relatively small in amount.

Note: If the reevaluation of the established materiality level or levels, as set forth in Auditing Standard No. 11,<sup>12</sup> results in a lower amount for the materiality level or levels, the auditor should take into account that lower materiality level or levels in the evaluation of uncorrected misstatements.

**18.** The auditor's evaluation of uncorrected misstatements, as described in paragraph 17 of this standard, should include evaluation of the effects of uncorrected misstatements detected in prior years and misstatements detected in the current year that relate to prior years.

---

<sup>7</sup> If the financial statements contain material misstatements, AU sec. 508, *Reports on Audited Financial Statements*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AU sec. 508.35 discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

<sup>8</sup> *TSC Industries v. Northway, Inc.*, 426 U.S. 438, 449 (1976). See also *Basic, Inc. v. Levinson*, 485 U.S. 224 (1988).

<sup>9</sup> *TSC Industries*, 426 U.S. at 450.

<sup>10</sup> There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

<sup>11</sup> AU sec. 317, *Illegal Acts by Clients*.

<sup>12</sup> Paragraphs 11–12 of Auditing Standard No. 11.

**19.** The auditor cannot assume that an instance of error or fraud is an isolated occurrence. Therefore, the auditor should evaluate the nature and effects of the individual misstatements accumulated during the audit on the assessed risks of material misstatement. This evaluation is important in determining whether the risk assessments remain appropriate, as discussed in paragraph 36 of this standard.

**20.** *Evaluating Whether Misstatements Might Be Indicative of Fraud.* The auditor should evaluate whether identified misstatements<sup>13</sup> might be indicative of fraud and, in turn, how they affect the auditor's evaluation of materiality and the related audit responses. As indicated in AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, fraud is an intentional act that results in material misstatement of the financial statements.<sup>14</sup>

**21.** If the auditor believes that a misstatement is or might be intentional, and if the effect on the financial statements could be material or cannot be readily determined, the auditor should perform procedures to obtain additional audit evidence to determine whether fraud has occurred or is likely to have occurred and, if so, its effect on the financial statements and the auditor's report thereon.

**22.** For misstatements that the auditor believes are or might be intentional, the auditor should evaluate the implications on the integrity of management or employees and the possible effect on other aspects of the audit. If the misstatement involves higher-level management, it might be indicative of a more pervasive problem, such as an issue with the integrity of management, even if the amount of the misstatement is small. In such circumstances, the auditor should reevaluate the assessment of fraud risk and the effect of that assessment on (a) the nature, timing, and extent of the necessary tests of accounts or disclosures and (b) the assessment of the effectiveness of controls. The auditor also should evaluate whether the circumstances or conditions indicate possible collusion involving employees, management, or external parties and, if so, the effect of the collusion on the reliability of evidence obtained.

**23.** If the auditor becomes aware of information indicating that fraud or another illegal act has occurred or might have occurred, he or she also must determine his or her responsibilities under AU secs. 316.79–.82A, AU sec. 317, and Section 10A of the Securities Exchange Act of 1934, 15 U.S.C. §78j–1.

## Evaluating the Qualitative Aspects of the Company's Accounting Practices

**24.** When evaluating whether the financial statements as a whole are free of material misstatement, the auditor should evaluate the qualitative aspects of the company's accounting practices, including potential bias in management's judgments about the amounts and disclosures in the financial statements.

**25.** The following are examples of forms of management bias:

- a. The selective correction of misstatements brought to management's attention during the audit (e.g., correcting misstatements that have the effect of increasing reported earnings but not correcting misstatements that have the effect of decreasing reported earnings).

---

<sup>13</sup> Misstatements include omission and presentation of inaccurate or incomplete disclosures.

<sup>14</sup> AU sec. 316.05.

Note: To evaluate the potential effect of selective correction of misstatements, the auditor should obtain an understanding of the reasons that management decided not to correct misstatements communicated by the auditor in accordance with paragraph 15.

- b. The identification by management of additional adjusting entries that offset misstatements accumulated by the auditor. If such adjusting entries are identified, the auditor should perform procedures to determine why the underlying misstatements were not identified previously and evaluate the implications on the integrity of management and the auditor's risk assessments, including fraud risk assessments. The auditor also should perform additional procedures as necessary to address the risk of further undetected misstatement.
- c. Bias in the selection and application of accounting principles.<sup>15</sup>
- d. Bias in accounting estimates.<sup>16</sup>

**26.** If the auditor identifies bias in management's judgments about the amounts and disclosures in the financial statements, the auditor should evaluate whether the effect of that bias, together with the effect of uncorrected misstatements, results in material misstatement of the financial statements. Also, the auditor should evaluate whether the auditor's risk assessments, including, in particular, the assessment of fraud risks, and the related audit responses remain appropriate.

**27. *Evaluating Bias in Accounting Estimates.*** The auditor should evaluate whether the difference between estimates best supported by the audit evidence and estimates included in the financial statements, which are individually reasonable, indicate a possible bias on the part of the company's management. If each accounting estimate included in the financial statements was individually reasonable but the effect of the difference between each estimate and the estimate best supported by the audit evidence was to increase earnings or loss, the auditor should evaluate whether these circumstances indicate potential management bias in the estimates. Bias also can result from the cumulative effect of changes in multiple accounting estimates. If the estimates in the financial statements are grouped at one end of the range of reasonable estimates in the prior year and are grouped at the other end of the range of reasonable estimates in the current year, the auditor should evaluate whether management is using swings in estimates to achieve an expected or desired outcome, e.g., to offset higher or lower than expected earnings.

Note: AU secs. 316.64–.65 establish requirements regarding performing a retrospective review of accounting estimates and evaluating the potential for fraud risks.

## Evaluating Conditions Relating to the Assessment of Fraud Risks

**28.** When evaluating the results of the audit, the auditor should evaluate whether the accumulated results of auditing procedures<sup>17</sup> and other observations affect the assessment of the fraud risks made throughout the audit and

---

<sup>15</sup> Paragraph 5.d. of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

<sup>16</sup> Paragraph 27 of this standard.

<sup>17</sup> Such auditing procedures include, but are not limited to, procedures in the overall review (paragraph 9 of this standard), the evaluation of identified misstatements (paragraphs 20–23 of this standard), and the evaluation of the qualitative aspects of the company's accounting practices (paragraphs 24–27 of this standard).

whether the audit procedures need to be modified to respond to those risks. (See Appendix C.)

**29.** As part of this evaluation, the engagement partner should determine whether there has been appropriate communication with the other engagement team members throughout the audit regarding information or conditions that are indicative of fraud risks.

Note: To accomplish this communication, the engagement partner might arrange another discussion among the engagement team members about fraud risks. (See paragraphs 49–51 of Auditing Standard No. 12.)

## Evaluating the Presentation of the Financial Statements, Including the Disclosures

**30.** The auditor must evaluate whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework.

Note: AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*, establishes requirements for evaluating the presentation of the financial statements. Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, establishes requirements regarding evaluating the consistency of the accounting principles used in financial statements.

Note: The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

**31.** As part of the evaluation of the presentation of the financial statements, the auditor should evaluate whether the financial statements contain the information essential for a fair presentation of the financial statements in conformity with the applicable financial reporting framework. Evaluation of the information disclosed in the financial statements includes consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts set forth.

Note: According to AU sec. 508, if the financial statements, including the accompanying notes, fail to disclose information that is required by the applicable financial reporting framework, the auditor should express a qualified or adverse opinion and should provide the information in the report, if practicable, unless its omission from the report is recognized as appropriate by a specific auditing standard.<sup>18</sup>

## Evaluating the Sufficiency and Appropriateness of Audit Evidence

**32.** Auditing Standard No. 8, *Audit Risk*, states:

To form an appropriate basis for expressing an opinion on the financial statements, the auditor must plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material

---

<sup>18</sup> AU secs. 508.41–.44.

misstatement due to error or fraud. Reasonable assurance is obtained by reducing audit risk to an appropriately low level through applying due professional care, including obtaining sufficient appropriate audit evidence.<sup>19</sup>

**33.** As part of evaluating audit results, the auditor must conclude on whether sufficient appropriate audit evidence has been obtained to support his or her opinion on the financial statements.

**34.** Factors that are relevant to the conclusion on whether sufficient appropriate audit evidence has been obtained include the following:

- a. The significance of uncorrected misstatements and the likelihood of their having a material effect, individually or in combination, on the financial statements, considering the possibility of further undetected misstatement (paragraphs 14 and 17–19 of this standard).
- b. The results of audit procedures performed in the audit of financial statements, including whether the evidence obtained supports or contradicts management's assertions and whether such audit procedures identified specific instances of fraud (paragraphs 20–23 and 28–29 of this standard).
- c. The auditor's risk assessments (paragraph 36 of this standard).
- d. The results of audit procedures performed in the audit of internal control over financial reporting, if the audit is an integrated audit.
- e. The appropriateness (i.e., the relevance and reliability) of the audit evidence obtained.<sup>20</sup>

**35.** If the auditor has not obtained sufficient appropriate audit evidence about a relevant assertion or has substantial doubt about a relevant assertion, the auditor should perform procedures to obtain further audit evidence to address the matter. If the auditor is unable to obtain sufficient appropriate audit evidence to have a reasonable basis to conclude about whether the financial statements as a whole are free of material misstatement, AU sec. 508 indicates that the auditor should express a qualified opinion or a disclaimer of opinion.<sup>21</sup>

**36. *Evaluating the Appropriateness of Risk Assessments.*** As part of the evaluation of whether sufficient appropriate audit evidence has been obtained, the auditor should evaluate whether the assessments of the risks of material misstatement at the assertion level remain appropriate and whether the audit procedures need to be modified or additional procedures need to be performed as a result of any changes in the risk assessments. For example, the re-evaluation of the auditor's risk assessments could result in the identification of relevant assertions or significant risks that were not identified previously and for which the auditor should perform additional audit procedures.

Note: Auditing Standard No. 12 establishes requirements on revising the auditor's risk assessment.<sup>22</sup> Auditing Standard No. 13 discusses the auditor's responsibilities regarding the assessment of control risk and evaluation of control deficiencies in an audit of financial statements.<sup>23</sup>

---

<sup>19</sup> Paragraph 3 of Auditing Standard No. 8.

<sup>20</sup> Paragraphs 7–9 of Auditing Standard No. 15, *Audit Evidence*, discuss the relevance and reliability of audit evidence.

<sup>21</sup> AU sec. 508.22–.34 contains requirements regarding audit scope limitations.

<sup>22</sup> Paragraph 74 of Auditing Standard No. 12.

<sup>23</sup> Paragraphs 32–34 of Auditing Standard No. 13.

## Evaluating the Results of the Audit of Internal Control Over Financial Reporting

37. Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, indicates that the auditor should form an opinion on the effectiveness of internal control over financial reporting by evaluating evidence obtained from all sources, including the auditor's testing of controls, misstatements detected during the financial statement audit, and any identified control deficiencies. Auditing Standard No. 5 describes the auditor's responsibilities regarding evaluating the results of the audit, including evaluating the identified control deficiencies.<sup>24</sup>

---

<sup>24</sup> Paragraphs 62–70 of Auditing Standard No. 5 discuss evaluating identified control deficiencies, and paragraphs 71–73 of Auditing Standard No. 5 discuss forming an opinion on the effectiveness of internal control over financial reporting.

## Appendix A

### Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Misstatement—A misstatement, if material individually or in combination with other misstatements, causes the financial statements not to be presented fairly in conformity with the applicable financial reporting framework.<sup>1</sup> A misstatement may relate to a difference between the amount, classification, presentation, or disclosure of a reported financial statement item and the amount, classification, presentation, or disclosure that should be reported in conformity with the applicable financial reporting framework. Misstatements can arise from error (i.e., unintentional misstatement) or fraud.<sup>2</sup>

A3. Uncorrected misstatements—Misstatements, other than those that are clearly trivial,<sup>3</sup> that management has not corrected.

---

<sup>1</sup> The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.

<sup>2</sup> Paragraph .02 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

<sup>3</sup> Paragraph 10 of this standard states that, "[t]he auditor should accumulate misstatements identified during the audit, other than those that are clearly trivial."

## Appendix B

### Qualitative Factors Related to the Evaluation of the Materiality of Uncorrected Misstatements

B1. Paragraph 17 of this standard states:

The auditor should evaluate whether uncorrected misstatements are material, individually or in combination with other misstatements. In making this evaluation, the auditor should evaluate the misstatements in relation to the specific accounts and disclosures involved and to the financial statements as a whole, taking into account relevant quantitative and qualitative factors.<sup>1</sup>

Note: In interpreting the federal securities laws, the Supreme Court of the United States has held that a fact is material if there is "a substantial likelihood that the . . . fact would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."<sup>2</sup> As the Supreme Court has noted, determinations of materiality require "delicate assessments of the inferences a 'reasonable shareholder' would draw from a given set of facts and the significance of those inferences to him. . . ."<sup>3</sup>

Note: As a result of the interaction of quantitative and qualitative considerations in materiality judgments, uncorrected misstatements of relatively small amounts could have a material effect on the financial statements. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility<sup>4</sup> that it could lead to a material contingent liability or a material loss of revenue.<sup>5</sup> Also, a misstatement made intentionally could be material for qualitative reasons, even if relatively small in amount.

B2. Qualitative factors to consider in the auditor's evaluation of the materiality of uncorrected misstatements, if relevant, include the following:

- a. The potential effect of the misstatement on trends, especially trends in profitability.
- b. A misstatement that changes a loss into income or vice versa.
- c. The effect of the misstatement on segment information, for example, the significance of the matter to a particular segment important to the future profitability of the company, the pervasiveness of the matter on the segment information, and the impact of the matter on trends in segment information, all in relation to the financial statements taken as a whole.
- d. The potential effect of the misstatement on the company's compliance with loan covenants, other contractual agreements, and regulatory provisions.

---

<sup>1</sup> If the financial statements contain material misstatements, AU sec. 508, *Reports on Audited Financial Statements*, indicates that the auditor should issue a qualified or an adverse opinion on the financial statements. AU sec. 508.35 discusses situations in which the financial statements are materially affected by a departure from the applicable financial reporting framework.

<sup>2</sup> *TSC Industries v. Northway, Inc.*, 426 U.S. 438, 449 (1976). See also *Basic, Inc. v. Levinson*, 485 U.S. 224 (1988).

<sup>3</sup> *TSC Industries*, 426 U.S. at 450.

<sup>4</sup> There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

<sup>5</sup> AU sec. 317, *Illegal Acts by Clients*.

- e. The existence of statutory or regulatory reporting requirements that affect materiality thresholds.
- f. A misstatement that has the effect of increasing management's compensation, for example, by satisfying the requirements for the award of bonuses or other forms of incentive compensation.
- g. The sensitivity of the circumstances surrounding the misstatement, for example, the implications of misstatements involving fraud and possible illegal acts, violations of contractual provisions, and conflicts of interest.
- h. The significance of the financial statement element affected by the misstatement, for example, a misstatement affecting recurring earnings as contrasted to one involving a non-recurring charge or credit, such as an extraordinary item.
- i. The effects of misclassifications, for example, misclassification between operating and non-operating income or recurring and non-recurring income items.
- j. The significance of the misstatement or disclosures relative to known user needs, for example:
  - The significance of earnings and earnings per share to public company investors.
  - The magnifying effects of a misstatement on the calculation of purchase price in a transfer of interests (buy/sell agreement).
  - The effect of misstatements of earnings when contrasted with expectations.
- k. The definitive character of the misstatement, for example, the precision of an error that is objectively determinable as contrasted with a misstatement that unavoidably involves a degree of subjectivity through estimation, allocation, or uncertainty.
- l. The motivation of management with respect to the misstatement, for example, (i) an indication of a possible pattern of bias by management when developing and accumulating accounting estimates or (ii) a misstatement precipitated by management's continued unwillingness to correct weaknesses in the financial reporting process.
- m. The existence of offsetting effects of individually significant but different misstatements.
- n. The likelihood that a misstatement that is currently immaterial may have a material effect in future periods because of a cumulative effect, for example, that builds over several periods.
- o. The cost of making the correction—it may not be cost-beneficial for the client to develop a system to calculate a basis to record the effect of an immaterial misstatement. On the other hand, if management appears to have developed a system to calculate an amount that represents an immaterial misstatement, it may reflect a motivation of management as noted in paragraph B2.1 above.
- p. The risk that possible additional undetected misstatements would affect the auditor's evaluation.

## Appendix C

### Matters That Might Affect the Assessment of Fraud Risks

C1. If the following matters are identified during the audit, the auditor should take into account these matters in the evaluation of the assessment of fraud risks, as discussed in paragraph 28 of this standard:

- a. Discrepancies in the accounting records, including:
  - (1) Transactions that are not recorded in a complete or timely manner or are improperly recorded as to amount, accounting period, classification, or company policy.
  - (2) Unsupported or unauthorized balances or transactions.
  - (3) Last-minute adjustments that significantly affect financial results.
  - (4) Evidence of employees' access to systems and records that is inconsistent with the access that is necessary to perform their authorized duties.
  - (5) Tips or complaints to the auditor about alleged fraud.
- b. Conflicting or missing evidence, including:
  - (1) Missing documents.
  - (2) Documents that appear to have been altered.<sup>1</sup>
  - (3) Unavailability of other than photocopied or electronically transmitted documents when documents in original form are expected to exist.
  - (4) Significant unexplained items in reconciliations.
  - (5) Inconsistent, vague, or implausible responses from management or employees arising from inquiries or analytical procedures.
  - (6) Unusual discrepancies between the company's records and confirmation responses.
  - (7) Missing inventory or physical assets of significant magnitude.
  - (8) Unavailable or missing electronic evidence that is inconsistent with the company's record retention practices or policies.
  - (9) Inability to produce evidence of key systems development and program change testing and implementation activities for current year system changes and deployments.
  - (10) Unusual balance sheet changes or changes in trends or important financial statement ratios or relationships, e.g., receivables growing faster than revenues.
  - (11) Large numbers of credit entries and other adjustments made to accounts receivable records.
  - (12) Unexplained or inadequately explained differences between the accounts receivable subsidiary ledger and the general ledger control account, or between the customer statement and the accounts receivable subsidiary ledger.

---

<sup>1</sup> Paragraph 9 of Auditing Standard No. 15, *Audit Evidence*.

- (13) Missing or nonexistent cancelled checks in circumstances in which cancelled checks are ordinarily returned to the company with the bank statement.
- (14) Fewer responses to confirmation requests than anticipated or a greater number of responses than anticipated.
- c. Problematic or unusual relationships between the auditor and management, including:
  - (1) Denial of access to records, facilities, certain employees, customers, vendors, or others from whom audit evidence might be sought, including:<sup>2</sup>
    - a. Unwillingness to facilitate auditor access to key electronic files for testing through the use of computer-assisted audit techniques.
    - b. Denial of access to key information technology operations staff and facilities, including security, operations, and systems development.
  - (2) Undue time pressures imposed by management to resolve complex or contentious issues.
  - (3) Management pressure on engagement team members, particularly in connection with the auditor's critical assessment of audit evidence or in the resolution of potential disagreements with management.
  - (4) Unusual delays by management in providing requested information.
  - (5) Management's unwillingness to add or revise disclosures in the financial statements to make them more complete and transparent.
  - (6) Management's unwillingness to appropriately address significant deficiencies in internal control on a timely basis.
- d. Other matters, including:
  - (1) Objections by management to the auditor meeting privately with the audit committee.
  - (2) Accounting policies that appear inconsistent with industry practices that are widely recognized and prevalent.
  - (3) Frequent changes in accounting estimates that do not appear to result from changing circumstances.
  - (4) Tolerance of violations of the company's code of conduct.

---

<sup>2</sup> Denial of access to information might constitute a limitation on the scope of the audit that requires the auditor to qualify or disclaim an opinion. (See Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and AU sec. 508, *Reports on Audited Financial Statements*.)

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004  
August 5, 2010

PCAOB Rulemaking  
Docket Matter No. 026

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

To view the release in its entirety, see the "Attachment" section of Auditing Standard No. 8.

---

# Auditing Standard No. 15

## *Audit Evidence*

[Effective pursuant to SEC Release No. 34-63606, File No. PCAOB 2010-01 (December 23, 2010).]

### Introduction

1. This standard explains what constitutes audit evidence and establishes requirements regarding designing and performing audit procedures to obtain sufficient appropriate audit evidence.

2. Audit evidence is all the information, whether obtained from audit procedures or other sources, that is used by the auditor in arriving at the conclusions on which the auditor's opinion is based. Audit evidence consists of both information that supports and corroborates management's assertions regarding the financial statements or internal control over financial reporting and information that contradicts such assertions.

### Objective

3. The objective of the auditor is to plan and perform the audit to obtain appropriate audit evidence that is sufficient to support the opinion expressed in the auditor's report.<sup>1</sup>

### Sufficient Appropriate Audit Evidence

4. The auditor must plan and perform audit procedures to obtain sufficient appropriate audit evidence to provide a reasonable basis for his or her opinion.

5. Sufficiency is the measure of the quantity of audit evidence. The quantity of audit evidence needed is affected by the following:

- *Risk of material misstatement (in the audit of financial statements) or the risk associated with the control (in the audit of internal control over financial reporting).* As the risk increases, the amount of evidence that the auditor should obtain also increases. For example, ordinarily more evidence is needed to respond to significant risks.<sup>2</sup>
- *Quality of the audit evidence obtained.* As the quality of the evidence increases, the need for additional corroborating evidence decreases. Obtaining more of the same type of audit evidence, however, cannot compensate for the poor quality of that evidence.

---

<sup>1</sup> Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements regarding evaluating whether sufficient appropriate evidence has been obtained. Auditing Standard No. 3, *Audit Documentation*, establishes requirements regarding documenting the procedures performed, evidence obtained, and conclusions reached in an audit.

<sup>2</sup> Paragraph A5 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

6. Appropriateness is the measure of the quality of audit evidence, i.e., its relevance and reliability. To be appropriate, audit evidence must be both relevant and reliable in providing support for the conclusions on which the auditor's opinion is based.

## Relevance and Reliability

7. *Relevance.* The relevance of audit evidence refers to its relationship to the assertion or to the objective of the control being tested. The relevance of audit evidence depends on:

- a. The design of the audit procedure used to test the assertion or control, in particular whether it is designed to (1) test the assertion or control directly and (2) test for understatement or overstatement; and
- b. The timing of the audit procedure used to test the assertion or control.

8. *Reliability.* The reliability of evidence depends on the nature and source of the evidence and the circumstances under which it is obtained. For example, in general:

- Evidence obtained from a knowledgeable source that is independent of the company is more reliable than evidence obtained only from internal company sources.
- The reliability of information generated internally by the company is increased when the company's controls over that information are effective.
- Evidence obtained directly by the auditor is more reliable than evidence obtained indirectly.
- Evidence provided by original documents is more reliable than evidence provided by photocopies or facsimiles, or documents that have been filmed, digitized, or otherwise converted into electronic form, the reliability of which depends on the controls over the conversion and maintenance of those documents.

9. The auditor is not expected to be an expert in document authentication. However, if conditions indicate that a document may not be authentic or that the terms in a document have been modified but that the modifications have not been disclosed to the auditor, the auditor should modify the planned audit procedures or perform additional audit procedures to respond to those conditions and should evaluate the effect, if any, on the other aspects of the audit.

## Using Information Produced by the Company

10. When using information produced by the company as audit evidence, the auditor should evaluate whether the information is sufficient and appropriate for purposes of the audit by performing procedures to:<sup>3</sup>

---

<sup>3</sup> When using the work of a specialist engaged or employed by management, *see* AU sec. 336, *Using the Work of a Specialist*. When using information produced by a service organization or a service auditor's report as audit evidence, *see* AU sec. 324, *Service Organizations*, and for integrated audits, *see* Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

- Test the accuracy and completeness of the information, or test the controls over the accuracy and completeness of that information; and
- Evaluate whether the information is sufficiently precise and detailed for purposes of the audit.

## Financial Statement Assertions

11. In representing that the financial statements are presented fairly in conformity with the applicable financial reporting framework, management implicitly or explicitly makes assertions regarding the recognition, measurement, presentation, and disclosure of the various elements of financial statements and related disclosures. Those assertions can be classified into the following categories:

- *Existence or occurrence*—Assets or liabilities of the company exist at a given date, and recorded transactions have occurred during a given period.
- *Completeness*—All transactions and accounts that should be presented in the financial statements are so included.
- *Valuation or allocation*—Asset, liability, equity, revenue, and expense components have been included in the financial statements at appropriate amounts.
- *Rights and obligations*—The company holds or controls rights to the assets, and liabilities are obligations of the company at a given date.
- *Presentation and disclosure*—The components of the financial statements are properly classified, described, and disclosed.

12. The auditor may base his or her work on financial statement assertions that differ from those in this standard if the assertions are sufficient for the auditor to identify the types of potential misstatements and to respond appropriately to the risks of material misstatement<sup>4</sup> in each significant account and disclosure that has a reasonable possibility<sup>4</sup> of containing misstatements that would cause the financial statements to be materially misstated, individually or in combination with other misstatements.<sup>5</sup>

## Audit Procedures for Obtaining Audit Evidence

13. Audit procedures can be classified into the following categories:

- a. Risk assessment procedures,<sup>6</sup> and
- b. Further audit procedures,<sup>7</sup> which consist of:
  - (1) Tests of controls, and
  - (2) Substantive procedures, including tests of details and substantive analytical procedures.

---

<sup>4</sup> There is a reasonable possibility of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in the FASB Accounting Standards Codification, Contingencies Topic, paragraph 450-20-25-1.

<sup>5</sup> For an integrated audit, also see paragraph 28 of Auditing Standard No. 5.

<sup>6</sup> Auditing Standard No. 12.

<sup>7</sup> Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

14. Paragraphs 15–21 of this standard describe specific audit procedures. The purpose of an audit procedure determines whether it is a risk assessment procedure, test of controls, or substantive procedure.

## Inspection

15. Inspection involves examining records or documents, whether internal or external, in paper form, electronic form, or other media, or physically examining an asset. Inspection of records and documents provides audit evidence of varying degrees of reliability, depending on their nature and source and, in the case of internal records and documents, on the effectiveness of the controls over their production. An example of inspection used as a test of controls is inspection of records for evidence of authorization.

## Observation

16. Observation consists of looking at a process or procedure being performed by others, e.g., the auditor's observation of inventory counting by the company's personnel or the performance of control activities. Observation can provide audit evidence about the performance of a process or procedure, but the evidence is limited to the point in time at which the observation takes place and also is limited by the fact that the act of being observed may affect how the process or procedure is performed.<sup>8</sup>

## Inquiry

17. Inquiry consists of seeking information from knowledgeable persons in financial or nonfinancial roles within the company or outside the company. Inquiry may be performed throughout the audit in addition to other audit procedures. Inquiries may range from formal written inquiries to informal oral inquiries. Evaluating responses to inquiries is an integral part of the inquiry process.<sup>9</sup>

Note: Inquiry of company personnel, by itself, does not provide sufficient audit evidence to reduce audit risk to an appropriately low level for a relevant assertion or to support a conclusion about the effectiveness of a control.

## Confirmation

18. A confirmation response represents a particular form of audit evidence obtained by the auditor from a third party in accordance with PCAOB standards.<sup>10</sup>

## Recalculation

19. Recalculation consists of checking the mathematical accuracy of documents or records. Recalculation may be performed manually or electronically.

---

<sup>8</sup> AU sec. 331, *Inventories*, establishes requirements regarding observation of the counting of inventory.

<sup>9</sup> AU sec. 333, *Management Representations*, establishes requirements regarding written management representations, including confirmation of management responses to oral inquiries.

<sup>10</sup> AU sec. 330, *The Confirmation Process*.

## Reperformance

**20.** Reperformance involves the independent execution of procedures or controls that were originally performed by company personnel.

## Analytical Procedures

**21.** Analytical procedures consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass the investigation of significant differences from expected amounts.<sup>11</sup>

## Selecting Items for Testing to Obtain Audit Evidence

**22.** Designing substantive tests of details and tests of controls includes determining the means of selecting items for testing from among the items included in an account or the occurrences of a control. The auditor should determine the means of selecting items for testing to obtain evidence that, in combination with other relevant evidence, is sufficient to meet the objective of the audit procedure. The alternative means of selecting items for testing are:

- Selecting all items;
- Selecting specific items; and
- Audit sampling.

**23.** The particular means or combination of means of selecting items for testing that is appropriate depends on the nature of the audit procedure, the characteristics of the control or the items in the account being tested, and the evidence necessary to meet the objective of the audit procedure.

## Selecting All Items

**24.** Selecting all items (100 percent examination) refers to testing the entire population of items in an account or the entire population of occurrences of a control (or an entire stratum within one of those populations). The following are examples of situations in which 100 percent examination might be applied:

- The population constitutes a small number of large value items;
- The audit procedure is designed to respond to a significant risk, and other means of selecting items for testing do not provide sufficient appropriate audit evidence; and
- The audit procedure can be automated effectively and applied to the entire population.

## Selecting Specific Items

**25.** Selecting specific items refers to testing all of the items in a population that have a specified characteristic, such as:

---

<sup>11</sup> AU sec. 329, *Substantive Analytical Procedures*, establishes requirements on performing analytical procedures as substantive procedures.

- *Key items.* The auditor may decide to select specific items within a population because they are important to accomplishing the objective of the audit procedure or exhibit some other characteristic, e.g., items that are suspicious, unusual, or particularly risk-prone or items that have a history of error.
- *All items over a certain amount.* The auditor may decide to examine items whose recorded values exceed a certain amount to verify a large proportion of the total amount of the items included in an account.

**26.** The auditor also might select specific items to obtain an understanding about matters such as the nature of the company or the nature of transactions.

**27.** The application of audit procedures to items that are selected as described in paragraphs 25–26 of this standard does not constitute audit sampling, and the results of those audit procedures cannot be projected to the entire population.<sup>12</sup>

## Audit Sampling

**28.** Audit sampling is the application of an audit procedure to less than 100 percent of the items within an account balance or class of transactions for the purpose of evaluating some characteristic of the balance or class.<sup>13</sup>

## Inconsistency in, or Doubts about the Reliability of, Audit Evidence

**29.** If audit evidence obtained from one source is inconsistent with that obtained from another, or if the auditor has doubts about the reliability of information to be used as audit evidence, the auditor should perform the audit procedures necessary to resolve the matter and should determine the effect, if any, on other aspects of the audit.

---

<sup>12</sup> If misstatements are identified in the selected items, see paragraphs 12–13 and paragraphs 17–19 of Auditing Standard No. 14.

<sup>13</sup> AU sec. 350, *Audit Sampling*, establishes requirements regarding audit sampling.

## Attachment

### PCAOB Release No. 2010-004

PCAOB Release No. 2010-004

August 5, 2010

PCAOB Rulemaking  
Docket Matter No. 026

### Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting eight auditing standards related to the auditor's assessment of and response to risk that will supersede six of the Board's interim auditing standards and related amendments to PCAOB standards. The eight auditing standards and related amendments will be applicable to all registered firms conducting audits in accordance with PCAOB standards.

To view the release in its entirety, see the "Attachment" section of Auditing Standard No. 8.

## Auditing Standard No. 16

### *Communications with Audit Committees*

Source: Auditing Standard No. 17.

[Effective pursuant to SEC Release No. 34-68453, File No. PCAOB 2012-01 (December 17, 2012).]

[Supersedes AU sections 310 and 380.]

#### Introduction

1. This standard requires the auditor to communicate with the company's **audit committee**<sup>1</sup> regarding certain matters related to the conduct of an audit<sup>2</sup> and to obtain certain information from the audit committee relevant to the audit. This standard also requires the auditor to establish an understanding of the terms of the audit engagement with the audit committee and to record that understanding in an engagement letter.

2. Other Public Company Accounting Oversight Board ("PCAOB") rules and standards identify additional matters to be communicated to a company's audit committee (see Appendix B). Various laws or regulations also require the auditor to communicate certain matters to the audit committee.<sup>3</sup> The communication requirements of this standard do not modify or replace communications to the audit committee required by such other PCAOB rules and standards, and other laws or regulations. Nothing in this standard precludes the auditor from communicating other matters to the audit committee.

#### Objectives

3. The objectives of the auditor are to:

- a. Communicate to the audit committee the responsibilities of the auditor in relation to the audit and establish an understanding of the terms of the audit engagement with the audit committee;
- b. Obtain information from the audit committee relevant to the audit;
- c. Communicate to the audit committee an overview of the overall audit strategy and timing of the audit; and
- d. Provide the audit committee with timely observations arising from the audit that are significant to the financial reporting process.

Note: "Communicate to," as used in this standard, is meant to encourage effective two-way communication between the auditor and the audit committee throughout the audit to assist in understanding matters relevant to the audit.

---

<sup>1</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

<sup>2</sup> For purposes of this standard, an audit is either an audit of internal control over financial reporting that is integrated with an audit of financial statements or an audit of financial statements only.

<sup>3</sup> See *e.g.*, Section 10A(k) of the Securities Exchange Act of 1934 ("Exchange Act"), 15 U.S.C. §78j-1(k); Rule 2-07 of Regulation S-X, 17 C.F.R. §210.2-07; and Rule 10A-3 under the Exchange Act, 17 C.F.R. §240.10A-3.

## Appointment and Retention

### Significant Issues Discussed with Management in Connection with the Auditor's Appointment or Retention

4. The auditor should discuss with the audit committee any significant issues that the auditor discussed with management in connection with the appointment or retention of the auditor, including significant discussions regarding the application of accounting principles and auditing standards.

### Establish an Understanding of the Terms of the Audit

5. The auditor should establish an understanding of the terms of the audit engagement with the audit committee. This understanding includes communicating to the audit committee the following:

- a. The objective of the audit;
- b. The responsibilities of the auditor; and
- c. The responsibilities of management.

6. The auditor should record the understanding of the terms of the audit engagement in an engagement letter and provide the engagement letter to the audit committee annually. The auditor should have the engagement letter executed by the appropriate party or parties on behalf of the company.<sup>4</sup> If the appropriate party or parties are other than the audit committee, or its chair on behalf of the audit committee, the auditor should determine that the audit committee has acknowledged and agreed to the terms of the engagement.

Note: Appendix C describes matters that the auditor should include in the engagement letter about the terms of the audit engagement.

7. If the auditor cannot establish an understanding of the terms of the audit engagement with the audit committee, the auditor should decline to accept, continue, or perform the engagement.

## Obtaining Information and Communicating the Audit Strategy

### Obtaining Information Relevant to the Audit

8. The auditor should inquire of the audit committee about whether it is aware of matters relevant to the audit,<sup>5</sup> including, but not limited to, violations or possible violations of laws or regulations.<sup>6</sup>

---

<sup>4</sup> Absent evidence to the contrary, the auditor may rely on the company's identification of the appropriate party or parties to execute the engagement letter.

<sup>5</sup> In addition to this inquiry, paragraphs 5.f. and 54-57 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, describe the auditor's inquiries of the audit committee, or equivalent (or its chair) regarding the audit committee's knowledge of the risks of material misstatement, including fraud risks. These inquiries include, among other things, whether the audit committee is aware of tips or complaints regarding the company's financial reporting.

<sup>6</sup> See AU sec. 317, *Illegal Acts by Clients*, for a description of the auditor's responsibilities when a possible illegal act is detected. For audits of issuers, see also Section 10A(b) of the Exchange Act, 15 U.S.C. §78j-1(b), and Rule 10A-1 under the Exchange Act, 17 C.F.R. §240.10A-1.

## Overall Audit Strategy, Timing of the Audit, and Significant Risks

9. The auditor should communicate to the audit committee an overview of the overall audit strategy, including the timing of the audit,<sup>7</sup> and discuss with the audit committee the significant risks identified during the auditor's risk assessment procedures.<sup>8</sup>

Note: This overview is intended to provide information about the audit, but not specific details that would compromise the effectiveness of the audit procedures.

10. As part of communicating the overall audit strategy, the auditor should communicate the following matters to the audit committee, if applicable:

- a. The nature and extent of specialized skill or knowledge needed to perform the planned audit procedures or evaluate the audit results related to significant risks;<sup>9</sup>
- b. The extent to which the auditor plans to use the work of the company's internal auditors in an audit of financial statements;<sup>10</sup>
- c. The extent to which the auditor plans to use the work of internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee when performing an audit of internal control over financial reporting;<sup>11</sup>
- d. The names, locations, and planned responsibilities<sup>12</sup> of other independent public accounting firms or other persons, who are not employed by the auditor, that perform audit procedures in the current period audit; and

Note: The term "other independent public accounting firms" in the context of this communication includes firms that perform audit procedures in the current period audit regardless of whether they otherwise have any relationship with the auditor.

- e. The basis for the auditor's determination that the auditor can serve as principal auditor, if significant parts of the audit are to be performed by other auditors.<sup>13</sup>

---

<sup>7</sup> See paragraphs 8-9 of Auditing Standard No. 9, *Audit Planning*, for a description of the auditor's responsibilities for establishing an overall audit strategy.

<sup>8</sup> Auditing Standard No. 12 requires the auditor to determine whether identified and assessed risks are significant risks. A significant risk is defined as a risk of material misstatement that requires special audit consideration.

<sup>9</sup> See paragraph 16 of Auditing Standard No. 9 for the requirement for the auditor to determine whether specialized skill or knowledge is needed to perform appropriate risk assessments, plan or perform audit procedures, or evaluate audit results.

<sup>10</sup> See AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, which describes the auditor's responsibilities related to the work of internal auditors.

<sup>11</sup> See paragraphs 16-19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which describe the auditor's responsibilities related to using the work of others in an audit of internal control over financial reporting.

<sup>12</sup> See paragraphs 8-14 of Auditing Standard No. 9, which discuss the auditor's responsibilities for determining the audit strategy, audit plan, and extent to which audit procedures should be performed at selected locations or business units involving multi-location engagements.

<sup>13</sup> See AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, which discusses the professional judgments the auditor makes in deciding whether the auditor may serve as principal auditor.

11. The auditor should communicate to the audit committee significant changes to the planned audit strategy or the significant risks initially identified and the reasons for such changes.<sup>14</sup>

## Results of the Audit

### Accounting Policies and Practices, Estimates, and Significant Unusual Transactions

12. The auditor should communicate to the audit committee the following matters:

- a. Significant accounting policies and practices.<sup>15</sup>
  - (1) Management's initial selection of, or changes in, significant accounting policies or the application of such policies in the current period; and
  - (2) The effect on financial statements or disclosures of significant accounting policies in (i) controversial areas or (ii) areas for which there is a lack of authoritative guidance or consensus, or diversity in practice.
- b. **Critical accounting policies and practices.** All critical accounting policies and practices to be used, including:<sup>16</sup>
  - (1) The reasons certain policies and practices are considered critical; and
  - (2) How current and anticipated future events might affect the determination of whether certain policies and practices are considered critical.

Note: Critical accounting policies and practices, as defined in Appendix A, are a company's accounting policies and practices that are both most important to the portrayal of the company's financial condition and results, and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain. Critical accounting policies and practices are tailored to specific events in the current year, and the accounting policies and practices that are considered critical might change from year to year.
- c. **Critical accounting estimates.**
  - (1) A description of the process management used to develop critical accounting estimates,<sup>17</sup>

---

<sup>14</sup> See paragraph 15 of Auditing Standard No. 9, which discusses changes in audit strategy and the audit plan during the course of the audit.

<sup>15</sup> See, e.g., Financial Accounting Standards Board Accounting Standards Codification, Topic 235, Notes to Financial Statements, paragraph 235-10-50-1, which requires the entity to disclose a description of all significant accounting policies as an integral part of the financial statements, and paragraph 235-10-50-3, which describes what should be disclosed.

<sup>16</sup> See also Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k), and Rule 2-07(a)(1) of Regulation S-X, 17 C.F.R. §210.2-07(a)(1).

<sup>17</sup> See AU sec. 342, *Auditing Accounting Estimates*, which discusses the auditor's responsibilities to obtain and evaluate sufficient appropriate audit evidence to support significant accounting estimates in an audit of financial statements.

- (2) Management's significant assumptions used in critical accounting estimates that have a high degree of subjectivity,<sup>18</sup> and
  - (3) Any significant changes management made to the processes used to develop critical accounting estimates or significant assumptions, a description of management's reasons for the changes, and the effects of the changes on the financial statements.<sup>19</sup>
- d. Significant unusual transactions.
- (1) Significant transactions that are outside the normal course of business for the company or that otherwise appear to be unusual due to their timing, size, or nature;<sup>20</sup> and
  - (2) The policies and practices management used to account for significant unusual transactions.

Note: As part of its communications to the audit committee, management might communicate some or all of the matters in paragraph 12. If management communicates any of these matters, the auditor does not need to communicate them at the same level of detail as management, as long as the auditor (1) participated in management's discussion with the audit committee, (2) affirmatively confirmed to the audit committee that management has adequately communicated these matters, and (3) with respect to critical accounting policies and practices, identified for the audit committee those accounting policies and practices that the auditor considers critical. The auditor should communicate any omitted or inadequately described matters to the audit committee.

## Auditor's Evaluation of the Quality of the Company's Financial Reporting

**13.** The auditor should communicate to the audit committee the following matters:

- a. Qualitative aspects of significant accounting policies and practices.
  - (1) The results of the auditor's evaluation of, and conclusions about, the qualitative aspects of the company's significant accounting policies and practices, including situations in which the auditor identified bias in management's judgments about the amounts and disclosures in the financial statements;<sup>21</sup> and
  - (2) The results of the auditor's evaluation of the differences between (i) estimates best supported by the audit evidence and (ii) estimates included in the financial statements, which are individually reasonable, that indicate a possible bias on the part of the company's management.<sup>22</sup>

<sup>18</sup> *Id.*

<sup>19</sup> *Id.*

<sup>20</sup> See paragraph 71.g. of Auditing Standard No. 12.

<sup>21</sup> See paragraphs 24-27 of Auditing Standard No. 14, *Evaluating Audit Results*, which describe the auditor's responsibilities related to evaluating the qualitative aspects of the company's accounting practices.

<sup>22</sup> See paragraph 27 of Auditing Standard No. 14.

- b. Assessment of critical accounting policies and practices. The auditor's assessment of management's disclosures related to the critical accounting policies and practices, along with any significant modifications to the disclosure of those policies and practices proposed by the auditor that management did not make.
- c. Conclusions regarding critical accounting estimates. The basis for the auditor's conclusions regarding the reasonableness of the critical accounting estimates.<sup>23</sup>
- d. Significant unusual transactions. The auditor's understanding of the business rationale for significant unusual transactions.<sup>24</sup>
- e. Financial statement presentation. The results of the auditor's evaluation of whether the presentation of the financial statements and the related disclosures are in conformity with the applicable financial reporting framework, including the auditor's consideration of the form, arrangement, and content of the financial statements (including the accompanying notes), encompassing matters such as the terminology used, the amount of detail given, the classification of items, and the bases of amounts set forth.<sup>25</sup>
- f. New accounting pronouncements. Situations in which, as a result of the auditor's procedures, the auditor identified a concern regarding management's anticipated application of accounting pronouncements that have been issued but are not yet effective and might have a significant effect on future financial reporting.
- g. Alternative accounting treatments. All alternative treatments permissible under the applicable financial reporting framework for policies and practices related to material items that have been discussed with management, including the ramifications of the use of such alternative disclosures and treatments and the treatment preferred by the auditor.<sup>26</sup>

## Other Information in Documents Containing Audited Financial Statements

14. When other information is presented in documents containing audited financial statements, the auditor should communicate to the audit committee the auditor's responsibility under PCAOB rules and standards for such information, any related procedures performed, and the results of such procedures.<sup>27</sup>

---

<sup>23</sup> See AU sec. 342, which discusses the auditor's responsibilities to obtain and evaluate sufficient appropriate audit evidence to support significant accounting estimates in an audit of financial statements.

<sup>24</sup> See paragraph .66 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

<sup>25</sup> See paragraphs 30-31 of Auditing Standard No. 14, which describe the auditor's responsibilities related to the evaluation of whether the financial statements are presented fairly, in all material respects, in conformity with the applicable financial reporting framework. Other PCAOB standards, such as AU sec. 334, *Related Parties*, and AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, describe the auditor's responsibilities related to evaluation of specific disclosures in financial statements.

<sup>26</sup> See also Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k), and Rule 2-07(a)(2) of Regulation S-X, 17 C.F.R. §210.2-07(a)(2).

<sup>27</sup> See, e.g., AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*. In addition to AU sec. 550, discussion of the auditor's consideration of other information is included in Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements*, AU sec. 558, *Required Supplementary Information*, and AU sec. 711, *Filings Under Federal Securities Statutes*. [Footnote revised, effective for fiscal years ending on or after June 1, 2014. See PCAOB Release No. 2013-008.]

## Difficult or Contentious Matters for which the Auditor Consulted

15. The auditor should communicate to the audit committee matters that are difficult or contentious for which the auditor consulted outside the engagement team and that the auditor reasonably determined are relevant to the audit committee's oversight of the financial reporting process.

## Management Consultation with Other Accountants

16. When the auditor is aware that management consulted with other accountants about significant auditing or accounting matters and the auditor has identified a concern regarding such matters, the auditor should communicate to the audit committee his or her views about such matters that were the subject of such consultation.

## Going Concern

17. The auditor should communicate to the audit committee, when applicable, the following matters relating to the auditor's evaluation of the company's ability to continue as a going concern:<sup>28</sup>

- a. If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the conditions and events that the auditor identified that, when considered in the aggregate, indicate that there is substantial doubt;<sup>29</sup>
- b. If the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern is alleviated, the basis for the auditor's conclusion, including elements the auditor identified within management's plans that are significant to overcoming the adverse effects of the conditions and events;<sup>30</sup>
- c. If the auditor concludes, after consideration of management's plans, that substantial doubt about the company's ability to continue as a going concern for a reasonable period of time remains:<sup>31</sup>
  - (1) The effects, if any, on the financial statements and the adequacy of the related disclosure;<sup>32</sup> and
  - (2) The effects on the auditor's report.<sup>33</sup>

---

<sup>28</sup> See AU sec. 341 for the requirements regarding an auditor's responsibility to evaluate whether there is substantial doubt about a company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited. Additionally, AU secs. 341.03a-c provide the auditor with an overview of the requirements for evaluating whether there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.

<sup>29</sup> See AU sec. 341.06, which provides examples of such conditions and events and AU sec. 341.07, which discusses the auditor's procedures if the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.

<sup>30</sup> See AU sec. 341.08, which discusses the auditor's responsibilities related to the auditor's evaluation of management's plans.

<sup>31</sup> See AU sec. 341.12, which describes the effects on the auditor's report. See also AU sec. 341.03c, which discusses the auditor's evaluation of factors that indicate there is substantial doubt about the company's ability to continue as a going concern.

<sup>32</sup> See AU sec. 341.10, which discusses the possible effects on the financial statements and the adequacy of the related disclosure.

<sup>33</sup> See AU secs. 341.12-.16, which discuss the auditor's consideration of the effects on the auditor's report when the auditor concludes that substantial doubt exists about the company's ability to continue as a going concern for a reasonable period of time.

## Uncorrected and Corrected Misstatements

18. The auditor should provide the audit committee with the schedule of uncorrected misstatements related to accounts and disclosures<sup>34</sup> that the auditor presented to management.<sup>35</sup> The auditor should discuss with the audit committee, or determine that management has adequately discussed with the audit committee, the basis for the determination that the uncorrected misstatements were immaterial, including the qualitative factors<sup>36</sup> considered. The auditor also should communicate that uncorrected misstatements or matters underlying those uncorrected misstatements could potentially cause future-period financial statements to be materially misstated, even if the auditor has concluded that the uncorrected misstatements are immaterial to the financial statements under audit.

19. The auditor should communicate to the audit committee those corrected misstatements, other than those that are clearly trivial,<sup>37</sup> related to accounts and disclosures that might not have been detected except through the auditing procedures performed, and discuss with the audit committee the implications that such corrected misstatements might have on the company's financial reporting process.

## Material Written Communications

20. The auditor should communicate to the audit committee other material written communications between the auditor and management.<sup>38</sup>

## Departure from the Auditor's Standard Report

21. The auditor should communicate to the audit committee the following matters related to the auditor's report:

- a. When the auditor expects to modify the opinion in the auditor's report, the reasons for the modification, and the wording of the report; and
- b. When the auditor expects to include explanatory language or an explanatory paragraph in the auditor's report, the reasons for the explanatory language or paragraph, and the wording of the explanatory language or paragraph.

## Disagreements with Management

22. The auditor should communicate to the audit committee any disagreements with management about matters, whether or not satisfactorily resolved, that individually or in the aggregate could be significant to the company's financial statements or the auditor's report. Disagreements with management do not include differences of opinion based on incomplete facts or preliminary

---

<sup>34</sup> Footnote 13 to paragraph 20 of Auditing Standard No. 14 indicates that misstatements include omission and presentation of inaccurate or incomplete disclosures.

<sup>35</sup> See Section 13(i) of the Exchange Act, 15 U.S.C. §78m(i), which states, in part, that financial statements prepared in accordance with generally accepted accounting principles and filed with the Securities and Exchange Commission "shall reflect all material correcting adjustments that have been identified by a registered public accounting firm. . . ."

<sup>36</sup> Appendix B of Auditing Standard No. 14 discusses the qualitative factors related to the evaluation of the materiality of uncorrected misstatements.

<sup>37</sup> See paragraph 10 of Auditing Standard No. 14, which requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial.

<sup>38</sup> See also Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k) and Rule 2-07(a)(3) of Regulation S-X, 17 C.F.R. §210.2-07 (a)(3).

information that are later resolved by the auditor obtaining additional relevant facts or information prior to the issuance of the auditor's report.

## Difficulties Encountered in Performing the Audit

**23.** The auditor should communicate to the audit committee any significant difficulties encountered during the audit. Significant difficulties encountered during the audit include, but are not limited to:

- a. Significant delays by management, the unavailability of company personnel, or an unwillingness by management to provide information needed for the auditor to perform his or her audit procedures;
- b. An unreasonably brief time within which to complete the audit;
- c. Unexpected extensive effort required by the auditor to obtain sufficient appropriate audit evidence;
- d. Unreasonable management restrictions encountered by the auditor on the conduct of the audit; and
- e. Management's unwillingness to make or extend its assessment of the company's ability to continue as a going concern when requested by the auditor.

Note: Difficulties encountered by the auditor during the audit could represent a scope limitation,<sup>39</sup> which may result in the auditor modifying the auditor's opinion or withdrawing from the engagement.

## Other Matters

**24.** The auditor should communicate to the audit committee other matters arising from the audit that are significant to the oversight of the company's financial reporting process. This communication includes, among other matters, complaints or concerns regarding accounting or auditing matters that have come to the auditor's attention during the audit and the results of the auditor's procedures regarding such matters.<sup>40</sup>

## Form and Documentation of Communications

**25.** The auditor should communicate to the audit committee the matters in this standard, either orally or in writing,<sup>41</sup> unless otherwise specified in this standard. The auditor must document the communications in the work papers, whether such communications took place orally or in writing.<sup>42</sup>

Note: If, as part of its communications to the audit committee, management communicated some or all of the matters identified in paragraphs 12 or 18 and, as a result, the auditor did not communicate these matters at the same level of detail as management, the auditor must include a copy of or a summary of

---

<sup>39</sup> See paragraphs .22-.32 of AU sec. 508, *Reports on Audited Financial Statements*, for a discussion of scope limitations.

<sup>40</sup> AU secs. 316.79-.81 and AU sec. 317.17 include specific communication requirements relating to fraud or illegal acts, respectively.

<sup>41</sup> See paragraphs .07-.11 of AU sec. 532, *Restricting the Use of an Auditor's Report*, which apply to certain written reports on matters coming to the auditor's attention during the course of the audit.

<sup>42</sup> Consistent with the requirements of Auditing Standard No. 3, *Audit Documentation*, the audit documentation should be in sufficient detail to enable an experienced auditor, having no previous connection with the engagement, to understand the communications made to comply with the provisions of this standard.

management's communications provided to the audit committee in the audit documentation.

## Timing

**26.** All audit committee communications required by this standard should be made in a timely manner and prior to the issuance of the auditor's report.<sup>43</sup> The appropriate timing of a particular communication to the audit committee depends on factors such as the significance of the matters to be communicated and corrective or follow-up action needed, unless other timing requirements are specified by PCAOB rules or standards or the securities laws.

*Note:* An auditor may communicate to only the audit committee chair if done in order to communicate matters in a timely manner during the audit. The auditor, however, should communicate such matters to the audit committee prior to the issuance of the auditor's report.

---

<sup>43</sup> Consistent with Rule 2-07 of Regulation S-X, 17 C.F.R. § 210.2-07, in the case of a registered investment company, audit committee communication should occur annually, and if the annual communication is not within 90 days prior to the filing of the auditor's report, the auditor should provide an update in the 90-day period prior to the filing of the auditor's report, of any changes to the previously reported information.

## Appendix A

### Definitions

A1. For purposes of this standard, the terms listed below are defined as follows:

A2. Audit committee—A committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, the entire board of directors of the company.

For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the company, the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

A3. Critical accounting estimate—An accounting estimate where (a) the nature of the estimate is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change and (b) the impact of the estimate on financial condition or operating performance is material.

A4. Critical accounting policies and practices—A company's accounting policies and practices that are both most important to the portrayal of the company's financial condition and results, and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.

## Appendix B

### Communications with Audit Committees Required by Other PCAOB Rules and Standards

This appendix identifies other PCAOB rules and standards related to the audit that require communication of specific matters between the auditor and the audit committee.

- Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, paragraphs 60, 62, and 64
- Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, paragraphs 78-81, 91, C7, and C14
- Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, paragraphs 5.f. and 54-57
- Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, paragraphs 34 and 35.
- Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*, paragraph 15.
- PCAOB Rule 3524, *Audit Committee Pre-approval of Certain Tax Services*
- PCAOB Rule 3525, *Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting*
- PCAOB Rule 3526, *Communication with Audit Committees Concerning Independence*
- AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .79-.81
- AU sec. 317, *Illegal Acts by Clients*, paragraphs .08, .17, and .20
- AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, paragraphs 4-7 and 9
- AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, paragraph .50
- AU sec. 333, *Management Representations*, paragraph .05
- AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, paragraphs .04 and .06
- AU sec. 711, *Filings Under Federal Securities Statutes*, paragraph .13
- AU sec. 722, *Interim Financial Information*, paragraphs .08-.09, .30-.31, and .33-.36

## Appendix C

### Matters Included in the Audit Engagement Letter

C1. The auditor should include the following matters in the engagement letter.<sup>1</sup> The auditor's description of these matters will vary depending on whether the auditor is engaged in a financial statement audit or in an audit of internal control over financial reporting that is integrated with an audit of financial statements ("integrated audit").

- a. The objective of the audit is:
  1. **Integrated audit:** The expression of an opinion on both the effectiveness of internal control over financial reporting and the financial statements.
  2. **Audit of financial statements:** The expression of an opinion on the financial statements.
- b. Auditor's responsibilities:
  1. The auditor is responsible for conducting the audit in accordance with the standards of the Public Company Accounting Oversight Board. Those standards require that the auditor:
    - a. **Integrated audit:** Plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, and whether effective internal control over financial reporting was maintained in all material respects. Accordingly, there is some risk that a material misstatement of the financial statements or a material weakness in internal control over financial reporting would remain undetected. Although not absolute assurance, reasonable assurance is a high level of assurance.

Also, an integrated audit is not designed to detect error or fraud that is immaterial to the financial statements or deficiencies in internal control over financial reporting that, individually or in combination, are less severe than a material weakness. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.
    - b. **Audit of financial statements:** Plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. Accordingly, there is some risk that a material misstatement would remain undetected.

---

<sup>1</sup> Certain matters should not be included in an engagement letter; for example, under Securities and Exchange Commission, *Section 602.02.f.i. of the Codification of Financial Reporting Policies*, indemnification provisions are not permissible for audits of issuers.

## Auditing Standards

Although not absolute assurance, reasonable assurance is a high level of assurance. Also, a financial statement audit is not designed to detect error or fraud that is immaterial to the financial statements. If, for any reason, the auditor is unable to complete the audit or is unable to form or has not formed an opinion, he or she may decline to express an opinion or decline to issue a report as a result of the engagement.

2. An audit includes:
  - a. Integrated audit: In fulfillment of the responsibilities noted above, the auditor communicates:
    1. To the audit committee and management: all material weaknesses in internal control over financial reporting identified during the audit, in writing.
    2. To the audit committee: all significant deficiencies identified during the audit, in writing, and informs the audit committee when the auditor has informed management of all internal control deficiencies.
    3. To management: all internal control deficiencies identified during the audit and not previously communicated in writing by the auditor or by others, including internal auditors or others within the company.
    4. To the board of directors: any conclusion that the audit committee's oversight of the company's external financial reporting and internal control over financial reporting is ineffective, in writing.
  - b. Audit of financial statements: Obtaining an understanding of internal control sufficient to plan the audit and to determine the nature, timing, and extent of audit procedures to be performed.<sup>2</sup> An audit of financial statements is not designed to provide assurance on internal control or to identify internal control deficiencies. However, the auditor is responsible for communicating:
    1. To the audit committee and management: all significant deficiencies and material weaknesses identified during the audit, in writing.
    2. To the board of directors: if the auditor becomes aware that the oversight of the company's external financial reporting and internal control over financial

---

<sup>2</sup> AU sec. 325, *Communications About Control Deficiencies in an Audit of Financial Statements*, provides direction on control deficiencies identified in an audit of financial statements.

reporting by the audit committee is ineffective, that conclusion, in writing.

c. Management's responsibilities:

1. Management is responsible for the company's financial statements, including disclosures.
2. Management is responsible for establishing and maintaining effective internal control over financial reporting.
3. Management is responsible for identifying and ensuring that the company complies with the laws and regulations applicable to its activities.
4. Management is responsible for making all financial records and relevant information available to the auditor.
5. At the conclusion of the engagement, management will provide the auditor with a letter that confirms certain representations made during the audit.
6. Management is responsible for adjusting the financial statements to correct material misstatements relating to accounts or disclosures and for affirming to the auditor in the representation letter that the effects of any uncorrected misstatements aggregated by the auditor are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

C2. In connection with a review of interim financial information, to confirm and document the understanding, the auditor should either: (a) document in the audit engagement letter the nature and objectives of the engagement to review interim financial information and the responsibilities of management and the auditor or (b) issue a separate engagement letter that addresses such matters.<sup>3</sup>

---

<sup>3</sup> Paragraphs .08-.09 of AU sec. 722, *Interim Financial Information*, discuss the auditor's responsibilities related to establishing an understanding with the audit committee in connection with a review of the company's interim financial information.

## Attachment

### PCAOB Release No. 2012-004

August 15, 2012  
PCAOB Rulemaking  
Docket Matter No. 030

#### Summary

The Public Company Accounting Oversight Board ("PCAOB" or the "Board") is adopting (i) Auditing Standard No. 16, *Communications with Audit Committees*, that would supersede the Board's interim standards AU sec. 380, *Communication With Audit Committees*, and AU sec. 310, *Appointment of the Independent Auditor*, (ii) transitional amendments to AU sec. 380, and (iii) related amendments to PCAOB standards.

#### Board Contacts

Jennifer Rand, Deputy Chief Auditor (202/207-9206, randj@pcaobus.org), Jessica Watts, Associate Chief Auditor (202/207-9376, wattsj@pcaobus.org), and Hasnat Ahmad, Assistant Chief Auditor (202/207-9349, ahmadh@pcaobus.org).

\* \* \* \* \*

#### I. Introduction

With the passage of the Sarbanes-Oxley Act of 2002 (the "Act") and the establishment of the PCAOB, Congress acknowledged that auditors play an important role in protecting the interests of investors by preparing and issuing informative, accurate, and independent audit reports.<sup>1</sup> The audit committee<sup>2</sup> also plays an important role in protecting the interests of investors by assisting the board of directors in fulfilling its responsibility to a company's shareholders and others to oversee the integrity of a company's accounting and financial reporting processes and audits. The audit committee, among other things, serves as the board of director's principal interface with the company's auditors and facilitates communications between the company's board of directors, its management, and its independent auditors on significant accounting issues and policies. The roles of auditors and audit committees are critical to the efficiency and integrity of the capital markets.

Both the auditor and the audit committee benefit from a meaningful exchange of information regarding significant risks of material misstatement in the financial statements and other matters that may affect the integrity of the company's financial reports. Communications between the auditor and the audit

---

<sup>1</sup> See Section 101(a) of the Act, 15 U.S.C. §7211(a); Senate Report No. 107-206, at 5-6 (July 3, 2002).

<sup>2</sup> The term "audit committee," as defined in Auditing Standard No. 16, is a committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to a company, the entire board of directors of the company. For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the company, the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

committee allow the audit committee to be well-informed about accounting and disclosure matters, including the auditor's evaluation of matters that are significant to the financial statements, and to be better able to carry out its oversight role. Communications with the audit committee provide auditors with a forum separate from management to discuss matters about the audit and the company's financial reporting process.

The Board is adopting Auditing Standard No. 16, *Communications with Audit Committees* (the "standard"), and related amendments to improve the audit by enhancing communications between auditors and audit committees. Auditing Standard No. 16 will replace interim standards AU sec. 380, *Communication With Audit Committees* ("AU sec. 380"), and AU sec. 310, *Appointment of the Independent Auditor* ("AU sec. 310"). Adoption of the standard is in the public interest because the standard establishes requirements that enhance the relevance, timeliness, and quality of the communications between the auditor and the audit committee. The enhanced relevance, timeliness, and quality of communications should facilitate audit committees' financial reporting oversight, fostering improved financial reporting, thereby benefitting investors.

Auditing Standard No. 16 is aligned with the requirements of the Act. For many public companies, the Act served to strengthen and expand the role of the audit committee in the financial reporting process. For example, the Act requires that audit committee members of listed companies be independent and that audit committees be responsible for the appointment, compensation, and oversight of the work of the external auditor for the purpose of preparing or issuing an audit report or related work.<sup>3</sup> These requirements place the audit committee at the center of the relationship between management of a public company and its auditor.

Auditing Standard No. 16 is intended to improve the audit<sup>4</sup> by fostering constructive dialogue between the auditor and the audit committee about significant audit and financial statement matters. The standard requires the auditor to communicate certain matters regarding the audit and the financial statements to the audit committee, which should assist the audit committee in fulfilling its oversight responsibilities regarding the financial reporting process. Effective two-way communication between the auditor and the audit committee on such relevant matters also will benefit the auditor in performing an effective audit.

Auditing Standard No. 16 encourages effective two-way communication between the auditor and the audit committee throughout the audit to assist both parties in understanding matters relevant to the audit. Communications that are tailored to the circumstances and informative, rather than "boiler-plate" or standardized, will enable the auditor and the audit committee to engage in a dialogue that is more likely to benefit both the audit committee, in conducting its oversight responsibilities, and the auditor, in conducting an effective audit. Effective communication between the auditor and the audit committee may involve many forms of communication, such as presentations, charts, written reports, or robust discussions.

AU sec. 380, which became effective in January 1989, indicated that audit committee communications are incidental to the audit and are not required to occur

---

<sup>3</sup> See Section 301 of the Act and Section 10A(m)(2) of the Securities Exchange Act of 1934 ("Exchange Act"), 15 U.S.C. §78j-1(m)(2).

<sup>4</sup> For purposes of this release and standard, an audit is either an audit of internal control over financial reporting that is integrated with an audit of financial statements or an audit of financial statements only.

prior to the issuance of the auditor's report. In contrast, Auditing Standard No. 16 recognizes the importance of the auditor's communications with the audit committee in today's business and regulatory environment; therefore, Auditing Standard No. 16 requires the auditor to communicate the audit strategy and results of the audit to the audit committee in a timely manner and prior to the issuance of the auditor's report to provide an opportunity for the audit committee and the auditor to take appropriate action to address the matters communicated.

Timely communications with the audit committee help the auditor improve the audit by, among other things (i) informing the audit committee, which has responsibility for the oversight of financial reporting, about significant matters related to the audit and the financial statements, (ii) enabling the auditor to obtain the audit committee's insights and information about transactions and events, (iii) enabling the auditor to learn about complaints regarding accounting or auditing matters, and (iv) assisting the auditor in gaining a better understanding of the company and its control environment.

Auditing Standard No. 16 generally links the new communication requirements to the results of related audit performance requirements in other PCAOB standards, or the conduct of the audit. The standard does not otherwise impose new performance requirements, other than communications. Because other PCAOB standards already require the auditor to perform procedures underlying the communications required in Auditing Standard No. 16, and the standard primarily requires communication of the results of the auditor's procedures, the Board does not anticipate a significant increase in cost as a result of the implementation of the standard.

Some of the matters to be communicated under Auditing Standard No. 16 relate specifically to matters involving management's preparation of the company's financial statements. In many companies, management might communicate these matters or take the lead on communicating these matters to the audit committee. The PCAOB does not have the authority to require management to communicate to the audit committee. Additionally, certain communications by the auditor are mandated by federal securities laws and Securities and Exchange Commission ("SEC") rules.<sup>5</sup> Therefore, Auditing Standard No. 16 establishes required communications by the auditor to the audit committee but, at the same time, clearly recognizes and acknowledges that management might communicate to the audit committee certain matters related to the company's financial statements. In such circumstances, the auditor does not need to communicate those matters at the same level of detail as management, as long as certain conditions are met, as specified in the standard.

Auditing Standard No. 16 is scalable for audits of companies of various sizes and complexities. A company's size and complexity might affect the risks of misstatements, the audit strategy, and other significant matters that warrant the attention of the audit committee. Based on the specific company's circumstances, the standard requires communications only to the extent that the matters are relevant to the audit of the financial statements of the company or of internal control over financial reporting. For example, an auditor of a smaller, less complex company with fewer difficult auditing or financial reporting issues may have fewer matters to communicate than the auditor of a larger, more complex company.

---

<sup>5</sup> See e.g., Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k); SEC Rule 2-07 of Regulation S-X ("SEC Rule 2-07"), 17 C.F.R. §210.2-07; and Rule 10A-3 under the Exchange Act, 17 C.F.R. §240.10A-3.

## II. Background

On March 29, 2010, the Board proposed a standard, *Communications with Audit Committees* (the "original proposed standard"), to improve the audit by enhancing the relevance and effectiveness of the communications between the auditor and the audit committee.<sup>6</sup> The original proposed standard was informed by, among other things, the increased use of risk-based audit methodologies, the emphasis on judgments and estimates in the financial reporting frameworks and discussions with the Board's Standing Advisory Group ("SAG").<sup>7</sup>

The Board received 35 comment letters on the original proposed standard.<sup>8</sup> Most commenters were supportive of the original proposed standard, although several commenters suggested that additional outreach to stakeholders might be beneficial. The comments were discussed with the SAG on July 15, 2010.<sup>9</sup> Additionally, on September 21, 2010, the Board held a roundtable<sup>10</sup> to obtain insight from additional stakeholders, including investors, audit committee members, auditors, and preparers.<sup>11</sup> The roundtable discussion explored many key issues that commenters had raised in response to the original proposed standard regarding:

- i. Communications beneficial to audit committees;
- ii. Accounting policies, practices, and estimates;
- iii. Effective two-way communication between the auditor and the audit committee;
- iv. Balance between written and oral communications;
- v. Audit committee responsibilities in the engagement letter;
- vi. Management communications; and
- vii. Uncorrected misstatements.

To provide all interested parties with an opportunity for additional comments on the topics discussed at the roundtable, the Board reopened the public comment period on the original proposed standard. The Board received nine additional comment letters during this extended comment period.<sup>12</sup>

The original proposed standard was revised in response to comments received in comment letters and at the roundtable, and discussions with the SAG. The Board repropose the standard for public comment on December 20, 2011 (the "reproposed standard") to seek comment on:<sup>13</sup>

---

<sup>6</sup> *Proposed Auditing Standard Related to Communications with Audit Committees and Related Amendments to Certain PCAOB Auditing Standards*, PCAOB Release No. 2010-001 (March 29, 2010).

<sup>7</sup> The SAG discussed the audit committee communications standard at a number of its meetings, including meetings on: June 21-22, 2004, June 8, 2005, October 5-6, 2005, and October 14-15, 2009.

<sup>8</sup> Comments on the original proposed standard are available at <http://pcaobus.org/Rules/Rulemaking/Pages/Docket030Comments.aspx>.

<sup>9</sup> A transcript of the portion of the meeting related to the original proposed standard is available at [http://pcaobus.org/Rules/Rulemaking/Docket030/Communications\\_with\\_Audit\\_Committees.pdf](http://pcaobus.org/Rules/Rulemaking/Docket030/Communications_with_Audit_Committees.pdf).

<sup>10</sup> A listing of the roundtable participants is available at [http://pcaobus.org/News/Releases/Pages/09162010\\_RoundtableParticipants.aspx](http://pcaobus.org/News/Releases/Pages/09162010_RoundtableParticipants.aspx).

<sup>11</sup> A transcript of the roundtable is available at [http://pcaobus.org/Rules/Rulemaking/Docket030/Roundtable\\_Transcript.pdf](http://pcaobus.org/Rules/Rulemaking/Docket030/Roundtable_Transcript.pdf).

<sup>12</sup> Comments on the original proposed standard are available at <http://pcaobus.org/Rules/Rulemaking/Pages/Docket030Comments.aspx>.

<sup>13</sup> *Proposed Auditing Standard Related to Communications with Audit Committees; Related Amendments to PCAOB Standards; and Transitional Amendments to AU sec. 380*, PCAOB Release No. 2011-008 (Dec. 20, 2011).

- The revisions to the original proposed standard to align many of the audit committee communication requirements with the auditor performance requirements included in the risk assessment standards, which were adopted subsequent to the issuance of the original proposed standard;
- The applicability of the proposed standard to the audits of brokers and dealers; and
- The addition of the requirement to communicate significant unusual transactions to the audit committee and to communicate the auditor's understanding of the business rationale for such transactions.

The Board received 39 comment letters in response to the repropoed standard.<sup>14</sup> Commenters to the repropoed standard generally were supportive of the changes made to the original proposed standard to enhance the communications between the auditor and the audit committee. Commenters indicated that the changes made enhanced the quality of information exchanged between the auditor and the audit committee. Commenters also indicated that fuller and more relevant communications between the auditor and the audit committee would enable the audit committee to effectively fulfill its oversight responsibilities regarding the financial reporting process, and allow the auditor to perform a more informed, and thus more efficient and effective, audit.

Commenters on the repropoed standard specifically commented on, among other things, the following matters:

- The definition of audit committee in relation to nonissuers without an audit committee or board of directors;
- Management's communication of significant unusual transactions;
- The communication of the auditor's evaluation of the company's ability to continue as a going concern; and
- The application of the standard to the audits of brokers and dealers.

The Board took all comments received during this standard-setting project into consideration in revising the standard. The definition of audit committee was retained substantially in the form as repropoed, with additional clarification provided in Appendix 4 of this release. Auditing Standard No. 16 was revised to acknowledge that management might communicate certain matters related to significant unusual transactions and that the auditor would not have to communicate such matters at the same level of detail as long as certain criteria within the standard are met. Additionally, communication requirements related to the auditor's evaluation of the company's ability to continue as a going concern were revised to align the communications more precisely with the auditor's procedures related to such evaluation. Section IV below discusses the application of Auditing Standard No. 16 to the audits of brokers and dealers.

Significant comments received regarding the repropoed standard are addressed in detail in Appendix 4 of this release.

---

<sup>14</sup> Comments on the repropoed standard are available at <http://pcaobus.org/Rules/Rulemaking/Pages/Docket030Comments.aspx>.

### III. Overview of Auditing Standard No. 16

Auditing Standard No. 16 provides a definition of audit committee, retains or enhances existing communication requirements, incorporates certain SEC auditor communication requirements to audit committees, and adds new communication requirements that are generally linked to performance requirements in other PCAOB standards.

For audits of issuers, Auditing Standard No. 16 incorporates the Act's definition of audit committee as a committee (or equivalent body) established by and among the board of directors of a company for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company; if no such committee exists with respect to the company, then the audit committee is the entire board of directors of the company. For audits of nonissuers, the definition of audit committee contained in Auditing Standard No. 16 provides that if no audit committee or board of directors (or equivalent body) exists with respect to the company, then the audit committee is the person(s) who oversee the accounting and financial reporting processes of the company and audits of the financial statements of the company.

AU sec. 310 requires the auditor to establish an understanding with the client regarding the services to be performed. Auditing Standard No. 16 requires the auditor to establish the understanding of the terms of the audit engagement with the audit committee. This requirement aligns the auditing standard with the provision of the Act that requires the audit committee of listed companies to be responsible for the appointment of the external auditor.<sup>15</sup>

Additionally, Auditing Standard No. 16 requires the auditor to record the terms of the engagement in an engagement letter and to have the engagement letter executed by the appropriate party or parties on behalf of the company and determine that the audit committee has acknowledged and agreed to the terms. These requirements are an expansion of the requirement in AU sec. 310 for the auditor to document the understanding in the working papers, preferably through a written communication with the client.

Auditing Standard No. 16 retains many of the communication requirements in AU sec. 380 and also incorporates the SEC communication requirements.<sup>16</sup> The standard improves the current communication requirements of AU sec. 380 by requiring the communications with the audit committee to occur before the issuance of the audit report. Additionally, the standard enhances certain existing auditor communication requirements by requiring the auditor to communicate:

- Certain matters regarding the company's accounting policies, practices, and estimates;
- The auditor's evaluation of the quality of the company's financial reporting;
- Information related to significant unusual transactions, including the business rationale for such transactions; and
- The auditor's views regarding significant accounting or auditing matters when the auditor is aware that management consulted with other accountants about such matters and the auditor has identified a concern regarding these matters.

---

<sup>15</sup> See Section 301 of the Act, and Sections 10A(m)(2) of the Exchange Act, 15 U.S.C. §78j-1(m)(2).

<sup>16</sup> See Section 10A(k) of the Exchange Act, 15 U.S.C. §78j-1(k) and SEC Rule 2-07(a)(1)-(3).

Auditing Standard No. 16 expands the inquiries of the audit committee required by Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, which requires the auditor to inquire of the audit committee regarding the matters important to the identification and assessment of risks of material misstatement and fraud risks. The additional inquiries in Auditing Standard No. 16 address whether the audit committee is aware of matters relevant to the audit, including, but not limited to, violations or possible violations of laws or regulations.

Additionally, Auditing Standard No. 16 adds new communication requirements that provide the audit committee with additional information about significant aspects of the audit. These communications are generally linked to the results of the audit procedures or the conduct of the audit. Under Auditing Standard No. 16 the auditor would be required to communicate:

- An overview of the overall audit strategy, including timing of the audit, significant risks the auditor identified, and significant changes to the planned audit strategy or identified risks;
- Information about the nature and extent of specialized skill or knowledge needed in the audit, the extent of the planned use of internal auditors, company personnel or other third parties, and other independent public accounting firms, or other persons not employed by the auditor that are involved in the audit;
- The basis for the auditor's determination that he or she can serve as principal auditor, if significant parts of the audit will be performed by other auditors;
- Situations in which the auditor identified a concern regarding management's anticipated application of accounting pronouncements that have been issued but are not yet effective and might have a significant effect on future financial reporting;
- Difficult or contentious matters for which the auditor consulted outside the engagement team;
- The auditor's evaluation of going concern;
- Departure from the auditor's standard report; and
- Other matters arising from the audit that are significant to the oversight of the company's financial reporting process, including complaints or concerns regarding accounting or auditing matters that have come to the auditor's attention during the audit.

In addition to the communication requirements included in Auditing Standard No. 16, other PCAOB standards and rules that require the auditor to communicate specific matters to the audit committee are referenced in Appendix B to Auditing Standard No. 16.

While the standard establishes certain requirements regarding auditor communications to the audit committee, Auditing Standard No. 16 does not preclude the auditor from providing additional information to the audit committee. Nor does the standard preclude the auditor from responding to audit committee requests for additional information from the auditor.

## IV. Audits of Brokers and Dealers

Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act")<sup>17</sup> gave the Board oversight of the audits of brokers and dealers registered with the SEC. In September 2010, the Commission issued interpretive guidance clarifying that the references in Commission rules and staff guidance and in the federal securities laws to generally accepted auditing standards ("GAAS") or to specific standards under GAAS, as they relate to nonissuer brokers or dealers, should continue to be understood to mean the auditing and attestation standards established by the American Institute of Certified Public Accountants ("AICPA"), but noted that it intended to revisit this interpretation in connection with a SEC rulemaking project to update the audit and attestation requirements for brokers and dealers in light of the Dodd-Frank Act.<sup>18</sup> On June 15, 2011, the SEC proposed to amend its rules, including SEC Rule 17a-5 under the Exchange Act, to require, among other things, that audits of brokers' and dealers' financial statements and examinations of reports regarding compliance with SEC requirements be performed in accordance with the standards of the PCAOB.<sup>19</sup>

If the SEC adopts its proposed amendments to SEC Rule 17a-5 or provides other direction that auditors of brokers and dealers are to comply with PCAOB professional standards, the Board's auditing, attestation, quality control, and, where applicable, independence standards would then apply to audits of brokers and dealers as required by Section 17 of the Exchange Act and SEC Rule 17a-5.<sup>20</sup>

Further, if the SEC adopts its proposed amendments to SEC Rule 17a-5 or provides other direction that auditors of brokers and dealers are to comply with PCAOB standards, prior to the effective date of Auditing Standard No. 16,<sup>21</sup> the Board's interim standard, AU sec. 380, would be in effect for audits of brokers and dealers conducted for periods prior to the effective date of Auditing Standard No. 16. The Board's interim standard, AU sec. 380, which was last amended in 1999, indicates that it is not applicable to the audit of a broker or dealer if the broker or dealer does not have an audit committee<sup>22</sup> or is registered with the SEC only because of Section 15(a) of the Exchange Act.<sup>23</sup> Conversely, the auditor communication requirements under GAAS, which are contained in Statement on Auditing Standards ("SAS") 114, *The Auditor's Communication With Those Charged With Governance*, which was issued by the Auditing Standards Board ("ASB") of the AICPA in 2006, are applicable to audits of all brokers

---

<sup>17</sup> Pub. L. No. 111-203, 124 Stat. 1376 (July 21, 2010).

<sup>18</sup> SEC, *Commission Guidance Regarding Auditing, Attestation, and Related Professional Practice Standards Related to Brokers and Dealers*, Exchange Act Release No. 62991 (Sept. 24, 2010).

<sup>19</sup> SEC, *Broker-Dealer Reports*, Exchange Act Release No. 64676 (June 15, 2011).

<sup>20</sup> 17 C.F.R. § 240.17a-5.

<sup>21</sup> As noted in Section VII of this release, the Board anticipates that Auditing Standard No. 16 will be effective, subject to SEC approval, for audits of fiscal years beginning on or after December 15, 2012.

<sup>22</sup> AU sec. 380.01 states that the communications required by AU sec. 380 are applicable to entities that either have an audit committee or that have otherwise formally designated oversight of the financial reporting process to a group equivalent to an audit committee (such as a finance committee or budget committee).

<sup>23</sup> See AU sec. 380.01, which states that the communications required by the standard "are applicable to . . . all Securities and Exchange Commission (SEC) engagements." As noted in footnote 2 to AU sec. 380.01, the audits of brokers and dealers do not fall within an SEC engagement as defined in AU sec. 380 if the broker or dealer is registered only because of Section 15(a) of the Exchange Act.

and dealers.<sup>24</sup> Because of this difference in the applicability of the auditor communication standards to the audits of brokers and dealers, there could be a gap in required audit committee communications if the SEC amendments to SEC Rule 17a-5 are adopted and become effective prior to the effective date of Auditing Standard No. 16. To eliminate this gap, the Board is amending AU sec. 380 to delete the current exception for audits of brokers and dealers that do not have an audit committee or are registered with the SEC only because of Section 15(a) of the Exchange Act. The transitional amendment, which is contained in Appendix 2 to this release, would eliminate the above-referenced gap in audit committee communications by making the communication requirements in AU sec. 380 applicable to audits of issuers and brokers and dealers, as those terms are defined in the Act, prior to the effective date of Auditing Standard No. 16.

If PCAOB standards are applicable to audits of brokers and dealers prior to the effective date of Auditing Standard No. 16, the communication requirements under Auditing Standard No. 16 would be applicable to the audits of brokers and dealers upon the effective date of the standard.

## V. Emerging Growth Companies

Pursuant to Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act"), any rules adopted by the Board subsequent to April 5, 2012, do not apply to the audits of emerging growth companies ("EGCs") (as defined in Section 3(a)(80) of the Exchange Act) unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation."<sup>25</sup> Auditing Standard No. 16 is the first auditing standard adopted by the Board subsequent to enactment of the JOBS Act and accordingly is subject to a separate determination by the SEC regarding its applicability to audits of EGCs.

Pursuant to Section 107(b) of the Act, the Board will file Auditing Standard No. 16 for approval by the SEC. The Board will also request that the SEC approve the application of Auditing Standard No. 16, and the related amendments, to the audits of EGCs.

## VI. Appendices

Appendix 1 to this release contains the text of Auditing Standard No. 16, *Communications with Audit Committees*, which has three appendices:

- (1) Appendix A—Definitions,
- (2) Appendix B—Communications with Audit Committees Required by Other PCAOB Rules and Standards, and
- (3) Appendix C—Matters Included in the Audit Engagement Letter.

---

<sup>24</sup> See paragraph 1 of SAS 114 which states "[t]his statement . . . establishes standards and provides guidance on the auditor's communication with those charged with governance in relation to an audit of financial statements," and section 5.129 of the *AICPA Audit & Accounting Guide: Brokers and Dealers in Securities* (July 2010), which states, in part: "AU section 380, *The Auditor's Communication with Those Charged with Governance* . . . has been updated for the issuance of SAS No. 114. . . . AU 380 is applicable to all broker-dealers being audited under GAAS, regardless of their governance structure or size."

<sup>25</sup> Pub. L. No. 112-106, 126 STAT. 306 (April 5, 2012). See Section 103(a)(3)(C) of the Act, 15 U.S.C. §7213 (a)(3)(C), as added by Section 104 of the JOBS Act.

Appendix 2 to this release contains the transitional amendments to AU sec. 380. Appendix 3 to this release contains amendments to other existing PCAOB standards. Appendix 4 provides additional discussion of Auditing Standard No. 16, the amendments to other PCAOB standards, and comments received on the repropoed standard. Appendix 5 to this release discusses certain significant differences between the objectives and requirements of Auditing Standard No. 16 and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB") and the Auditing Standards Board of the AICPA. In developing the standard, the Board considered the requirements of the relevant standards of the IAASB and the ASB.

## VII. Effective Date

The Board anticipates that the transitional amendments to AU sec. 380 included in Appendix 2 would be effective, subject to SEC approval, for the periods that PCAOB standards become applicable to audits of brokers and dealers, as designated by the SEC upon adoption of its amendments to SEC Rule 17a-5, if such periods precede the effective date of Auditing Standard No. 16.

The Board anticipates that Auditing Standard No. 16 and related amendments, included in Appendices 1 and 3, respectively, will be effective, subject to SEC approval, for audits of fiscal years beginning on or after December 15, 2012.

On the 15th day of August, in the year 2012, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Auditing Standard No. 17

# *Auditing Supplemental Information Accompanying Audited Financial Statements*

[Effective pursuant to SEC Release No. 34-70843, File No. PCAOB 2013-02 (October 10, 2013).]

[Supersedes AU section 551.]

### Introduction

1. This standard sets forth the auditor's responsibilities when the auditor of the company's financial statements is engaged to perform audit procedures and report on **supplemental information**<sup>1</sup> that accompanies financial statements<sup>2</sup> audited pursuant to Public Company Accounting Oversight Board ("PCAOB") standards.

### Objective

2. The objective of the auditor of the financial statements, when engaged to perform audit procedures and report on supplemental information that accompanies audited financial statements, is to obtain sufficient appropriate audit evidence to express an opinion on whether the supplemental information is fairly stated, in all material respects, in relation to the financial statements as a whole.

### Performing Audit Procedures on Supplemental Information Accompanying Audited Financial Statements

3. The auditor should perform audit procedures to obtain appropriate audit evidence that is sufficient to support the auditor's opinion regarding whether the supplemental information is fairly stated, in all material respects, in relation to the financial statements as a whole. The nature, timing, and extent of audit procedures necessary to obtain sufficient appropriate audit evidence and to report on the supplemental information depends on, among other things:

- a. The risk of material misstatement of the supplemental information;
- b. The materiality considerations relevant to the information presented;

Note: When planning and performing the audit procedures to report on supplemental information, the auditor generally should use the same materiality considerations as those used in planning

---

<sup>1</sup> Terms defined in Appendix A, Definitions, are set in **boldface type** the first time they appear.

<sup>2</sup> For purposes of this standard, supplemental information "accompanies financial statements" when it is (1) presented in the same document as the audited financial statements, (2) presented in a document in which the audited financial statements are incorporated by reference, or (3) incorporated by reference in a document containing the audited financial statements.

and performing the audit of the financial statements.<sup>3</sup> However, if applicable regulatory requirements specify a lower materiality level to be applied to certain supplemental information, the auditor should use those prescribed threshold requirements in planning and performing audit procedures for the supplemental information.

- c. The evidence obtained from the audit of the financial statements and, if applicable, other engagements by the auditor or affiliates of the firm,<sup>4</sup> for the period presented; and

Note: The procedures performed regarding the supplemental information should be planned and performed in conjunction with the audit of the financial statements. For audits of brokers and dealers, the procedures should be coordinated with the attestation engagements related to compliance or exemption reports required by the U.S. Securities and Exchange Commission ("SEC").<sup>5</sup> The auditor should take into account relevant evidence from the audit of the financial statements and, for audits of brokers or dealers, the attestation engagements, in planning and performing audit procedures related to the supplemental information and in evaluating the results of the audit procedures to form the opinion on the supplemental information.

- d. Whether a qualified opinion, an adverse opinion, or a disclaimer of opinion was issued on the financial statements.

4. In performing the audit procedures on supplemental information, the auditor should:

- a. Obtain an understanding of the purpose of the supplemental information and the criteria management used to prepare the supplemental information, including relevant regulatory requirements;
- b. Obtain an understanding of the methods of preparing the supplemental information, evaluate the appropriateness of those methods, and determine whether those methods have changed from the methods used in the prior period and, if the methods have changed, determine the reasons for and evaluate the appropriateness of such changes;
- c. Inquire of management about any significant assumptions or interpretations underlying the measurement or presentation of the supplemental information;
- d. Determine that the supplemental information reconciles to the underlying accounting and other records or to the financial statements, as applicable;
- e. Perform procedures to test the completeness and accuracy of the information presented in the supplemental information to the extent that it was not tested as part of the audit of financial statements; and

---

<sup>3</sup> Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*, establishes requirements regarding the auditor's consideration of materiality in planning and performing an audit.

<sup>4</sup> The term "affiliates of the firm" as used in this standard has the same meaning as the term "affiliates of the accounting firm" as defined in PCAOB Rule 3501.

<sup>5</sup> See Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, and Attestation Standard No. 2, *Review Engagements Regarding Exemption Reports of Brokers and Dealers*.

- f. Evaluate whether the supplemental information, including its form and content, complies with relevant regulatory requirements or other applicable criteria, if any.

## Management Representations

5. The auditor should obtain written representations from management, including:

- a. A statement that management acknowledges its responsibility for the fair presentation of the supplemental information and, if applicable, the form and content of that supplemental information, in conformity with relevant regulatory requirements or other applicable criteria;
- b. A statement that management believes the supplemental information, including its form and content, is fairly stated, in all material respects;
- c. A statement that the methods of measurement or presentation have not changed from those used in the prior period or, if the methods of measurement or presentation have changed, the reasons for such changes and why those changes are appropriate;
- d. If the form and content of the supplemental information is prescribed by regulatory requirements or other applicable criteria, a statement that the supplemental information complies, in all material respects, with the regulatory requirements or other applicable criteria, and identification of those requirements or other applicable criteria; and
- e. A description of any significant assumptions or interpretations underlying the measurement or presentation of the supplemental information, and a statement that management believes that such assumptions or interpretations are appropriate.

## Evaluation of Audit Results

6. To form an opinion on the supplemental information, the auditor should evaluate whether the supplemental information, including its form and content, is fairly stated, in all material respects, in relation to the financial statements as a whole, including whether the supplemental information is presented in conformity, in all material respects, with the relevant regulatory requirements or other applicable criteria.

7. The auditor should accumulate misstatements regarding the supplemental information identified during performance of audit procedures on the supplemental information and in the audit of the financial statements.<sup>6</sup> The auditor should communicate accumulated misstatements regarding the supplemental information to management on a timely basis to provide management with an opportunity to correct them.

8. The auditor should evaluate whether uncorrected misstatements related to the supplemental information are material, either individually or in combination with other misstatements, taking into account relevant quantitative and qualitative factors.

---

<sup>6</sup> See paragraph 10 of Auditing Standard No. 14, *Evaluating Audit Results*, which discusses the auditor's responsibilities regarding the accumulation of misstatements in an audit of financial statements.

Note: The auditor should evaluate the effect of uncorrected misstatements related to the supplemental information in evaluating the results of the financial statement audit.<sup>7</sup>

**9.** The auditor should evaluate the effect of any modifications to the audit report on the financial statements when forming an opinion on the supplemental information:

- a. When the auditor expresses a qualified opinion on the financial statements and the basis for the qualification also applies to the supplemental information, the auditor should describe the effects of the qualification on the supplemental information in the report on supplemental information and should express a qualified opinion on the supplemental information.
- b. When the auditor expresses an adverse opinion, or disclaims an opinion on the financial statements, the auditor should express an adverse opinion, or disclaim an opinion, on the supplemental information, whichever is appropriate.

## Reporting

**10.** The auditor's report on supplemental information accompanying audited financial statements should include the following:

- a. Identification of the supplemental information.  
Note: Identification may be by descriptive title of the supplemental information or reference to the page number and document where the supplemental information is located.
- b. A statement that the supplemental information is the responsibility of management.
- c. A statement that the supplemental information has been subjected to audit procedures performed in conjunction with the audit of the financial statements.  
Note: If the financial statements are presented in a separate document from the supplemental information or otherwise are not readily identifiable to the user of the supplemental information, the auditor's report on supplemental information should identify the document containing the company's financial statements.
- d. A statement that the audit procedures performed included determining whether the supplemental information reconciles to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the supplemental information.
- e. A statement that in forming the auditor's opinion, the auditor evaluated whether supplemental information, including its form and content, complies, in all material respects, with the specified regulatory requirements or other criteria, if applicable.
- f. A statement, if applicable, that the supplemental information is presented on a basis that differs from the financial statements and is not prescribed by regulatory requirements. When such a

---

<sup>7</sup> See paragraph 17 of Auditing Standard No. 14, which discusses evaluation of uncorrected misstatements in the financial statement audit.

statement is made, the report should describe the basis for the supplemental information presentation.

- g. An opinion on whether the supplemental information is fairly stated, in all material respects, in relation to the financial statements as a whole, or a disclaimer of opinion.

**11.** Unless prescribed by regulatory requirements, the auditor may either include the auditor's report on the supplemental information in the auditor's report on the financial statements or issue a separate report on the supplemental information. If the auditor issues a separate report on the supplemental information, that report should identify the auditor's report on the financial statements.

**12.** The date of the auditor's report on the supplemental information in relation to the financial statements as a whole should not be earlier than:

- a. The date of the auditor's report on the financial statements from which the supplemental information was derived, and
- b. The date on which the auditor obtained sufficient appropriate audit evidence to support the auditor's opinion on the supplemental information in relation to the financial statements as a whole.<sup>8</sup>

**13.** The following is an example of an auditor's report on supplemental information when included in the auditor's report on the financial statements:

The [identify supplemental information] has been subjected to audit procedures performed in conjunction with the audit of [Company's] financial statements. The [supplemental information] is the responsibility of the Company's management. Our audit procedures included determining whether the [supplemental information] reconciles to the financial statements or the underlying accounting and other records, as applicable, and performing procedures to test the completeness and accuracy of the information presented in the [supplemental information]. In forming our opinion on the [supplemental information], we evaluated whether the [supplemental information], including its form and content, is presented in conformity with [specify the relevant regulatory requirement or other criteria, if any]. In our opinion, the [identify supplemental information] is fairly stated, in all material respects, in relation to the financial statements as a whole.

**14.** If the auditor determines that the supplemental information is materially misstated in relation to the financial statements as a whole, the auditor should describe the material misstatement in the auditor's report on the supplemental information and express a qualified or adverse opinion on the supplemental information.

**15.** If the auditor is unable to obtain sufficient appropriate audit evidence to support an opinion on the supplemental information, the auditor should disclaim an opinion on the supplemental information. In those situations, the auditor's report on the supplemental information should describe the reason for the disclaimer and state that the auditor is unable to and does not express an opinion on the supplemental information.

---

<sup>8</sup> AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, sets forth procedures to be followed by the auditor who, subsequent to the date of the report upon audited financial statements becomes aware that facts may have existed at that date that might have affected the report had he or she then been aware of such facts. AU sec. 561 applies to situations in which the auditor identifies a material misstatement of the financial statements while performing audit procedures on supplemental information after the date of the auditor's report on the financial statements.

Note: If the supplemental information consists of two or more schedules, and the auditor is able to obtain sufficient appropriate audit evidence to support an opinion on some but not all schedules, the auditor may express an opinion on only those schedules for which he or she obtained sufficient appropriate evidence but should disclaim an opinion on the other schedules.

## Appendix A

### Definitions

A1. For purposes of this standard, the term listed below is defined as follows:

A2. Supplemental Information—Refers to the following information when it accompanies audited financial statements:

- a. Supporting schedules that brokers and dealers are required to file pursuant to Rule 17a-5 under the Securities Exchange Act of 1934;<sup>1</sup>
- b. Supplemental information (i) required to be presented pursuant to the rules and regulations of a regulatory authority and (ii) covered by an independent public accountant's report on that information in relation to financial statements that are audited in accordance with PCAOB standards; or
- c. Information that is (i) ancillary to the audited financial statements, (ii) derived from the company's accounting books and records, and (iii) covered by an independent public accountant's report on that information in relation to the financial statements that are audited in accordance with PCAOB standards.

---

<sup>1</sup> See 17 C.F.R. §240.17a-5 (d)(2).

## Attachment

### PCAOB Release No. 2013-008

October 10, 2013  
PCAOB Rulemaking  
Docket Matter No. 036

#### Summary

After public comment, the Public Company Accounting Oversight Board ("PCAOB" or the "Board") is adopting Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements*, which will supersede the Board's auditing standard, AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*. The Board is also adopting related amendments to certain PCAOB auditing standards.

#### Board Contacts

Keith Wilson, Deputy Chief Auditor (202/207-9134, wilsonk@pcaobus.org), Barbara Vanich, Associate Chief Auditor (202/207-9363, vanichb@pcaobus.org), and Nicholas Grillo, Assistant Chief Auditor (202/207-9104, grillon@pcaobus.org).

\* \* \* \* \*

#### I. Introduction

The Board is adopting Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements* (the "standard"). The standard sets forth the auditor's responsibilities when the auditor of the financial statements is engaged to perform audit procedures and report on whether supplemental information accompanying the financial statements is fairly stated, in all material respects, in relation to the financial statements as a whole. The standard supersedes AU sec. 551, *Reporting on Information Accompanying the Basic Financial Statements in Auditor-Submitted Documents*. The Board also is amending certain other related PCAOB auditing standards.

Supplemental information is often in the form of schedules accompanying the financial statements. The Board's existing standard, AU sec. 551, describes the auditor's reporting responsibilities regarding supplemental information accompanying audited financial statements in auditor-submitted documents and does not specify the audit procedures to be applied to test supplemental information. In contrast, Auditing Standard No. 17 contains audit procedures that are designed to support the auditor's reporting requirements, including procedures to test the supplemental information accompanying the financial statements.

Briefly, the standard requires auditors to perform certain audit procedures when engaged to audit and report on supplemental information accompanying financial statements. Supplemental information is required by regulators, including the Securities and Exchange Commission ("SEC" or "Commission"),<sup>1</sup>

---

<sup>1</sup> Rule 17a-5 under the Securities Exchange Act of 1934 ("Exchange Act") requires brokers and dealers registered with the SEC to submit financial reports to the SEC that include audited financial statements as well as certain required supporting schedules ("SEC Rule 17a-5"). See

(continued)

who have determined the information is important in carrying out their regulatory oversight. The standard includes auditor performance requirements to (1) determine that the supplemental information reconciles to the underlying accounting and other records or to the financial statements, as applicable; (2) test the completeness and accuracy of the supplemental information, to the extent that it was not tested as part of the audit of the financial statements; and (3) evaluate whether the supplemental information, including its form and content, complies with relevant regulatory requirements or other applicable criteria, if any. The standard has been designed to promote coordination between the work performed on the supplemental information and the work performed on the financial statement audit. This approach should enhance audit effectiveness as well as avoid duplication of audit procedures.

In the Board's view, Auditing Standard No. 17 should provide regulators with greater confidence in the quality and consistency of supplemental information accompanying audited financial statements of brokers<sup>2</sup>, dealers<sup>3</sup>, and others.<sup>4</sup> Supplemental information is often required by regulators for their oversight purposes. For example, the supplemental information brokers and dealers are required to include in their annual reports relates to their compliance with certain SEC rules regarding maintaining minimum net capital and reserves,<sup>5</sup> specifically those governing the safeguarding of customer securities and funds in their filings with the Commission. Also, supplemental information includes schedules included in annual reports filed by employee stock purchase, savings, and similar plans on Form 11-K ("11-K filers"), *For Annual Reports Of Employee Stock Purchase, Savings and Similar Plans Pursuant To Section 15(D) Of The Securities Exchange Act Of 1934*,<sup>6</sup> when those entities elect to file plan financial statements and schedules prepared in accordance with the financial reporting requirements of the Employee Retirement Income Security Act of 1974.<sup>7</sup>

## II. Background

On July 12, 2011, the Board proposed a new standard, *Auditing Supplemental Information Accompanying Audited Financial Statements* (the "proposed

---

(footnote continued)

17 C.F.R. § 240.17a-5. On July 30, 2013, the SEC adopted amendments to SEC Rule 17a-5 to strengthen and clarify broker and dealer financial reporting requirements and also require that broker and dealer audits be conducted in accordance with PCAOB standards. See SEC Exchange Act Release No. 34-70073, *Broker-Dealer Reports* (July 30, 2013), 78 Federal Register 51910 (August 21, 2013) ("SEC Release").

<sup>2</sup> According to PCAOB Rule 1001(b)(iii), the term "broker" means a broker (as defined in Section 3(a)(4) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>3</sup> According to PCAOB Rule 1001(d)(iii), the term "dealer" means a dealer (as defined in Section 3(a)(5) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>4</sup> For example, certain employee benefit plans that are subject to the Employee Retirement Income Security Act of 1974 ("ERISA") file an annual report with the Commission on Form 11-K, which includes the plan's financial statements and schedules prepared in accordance with the financial reporting requirements of ERISA. See 17 C.F.R. §240.15d-21, 17 C.F.R. §249.311 and item 4 of the "Required Information" section of SEC Form 11-K "For Annual Reports Of Employee Stock Purchase, Savings And Similar Plans Pursuant To Section 15(D) Of The Securities Exchange Act Of 1934."

<sup>5</sup> See paragraph (d)(2) of SEC Rule 17a-5.

<sup>6</sup> See 29 C.F.R. §2520.103-1.

<sup>7</sup> See 17 C.F.R. §240.15d-21, 17 C.F.R. §249.311, and item 4 of the "Required Information" section of SEC Form 11-K "For Annual Reports Of Employee Stock Purchase, Savings And Similar Plans Pursuant To Section 15(D) Of The Securities Exchange Act Of 1934."

standard"), to improve the quality of audit procedures performed and related reports on supplemental information, including supplemental information that is included in SEC filings.

The Board received eleven comment letters on the proposed standard. Most commenters were supportive of the Board's effort to improve the auditing standards in this area. Also, comments were provided on certain requirements or other specific aspects of the proposed standard. For example, a number of comments related to the specific wording of the opinion the auditor would express regarding the supplemental information. While commenters generally supported the Board's efforts to retain the "in relation to" opinion from AU sec. 551, some commenters stated that some of the language in the proposed standard implied that the auditor was required to perform a stand-alone audit of the supplemental information. Some commenters also stated that the required language in the auditor's report, in effect, expressed two opinions—one on whether the supplemental information was fairly stated and a second on whether the form and content of the information presented complied with applicable regulatory requirements.

The Board made certain revisions to the standard to address these issues raised by commenters. For example, revisions were made to the language of the standard to clarify that the auditor is required to perform certain procedures regarding the supplemental information rather than a stand-alone audit of that information. Also, the reporting requirements were revised to clarify that the evaluation of compliance with regulatory requirements is a required part of forming an opinion on whether the supplemental information is fairly stated.

Additionally, some commenters stated that the definition of "supplemental information" in the proposed standard was too restrictive and did not encompass some types of supplemental information that currently are reported on by auditors of issuers. Accordingly, the definition in the standard has been revised to take into account those other types of supplemental information by removing the references to SEC filings. However, by its terms, Auditing Standard No. 17 applies only to situations in which an auditor is engaged to perform audit procedures and report on supplemental information that accompanies financial statements audited pursuant to PCAOB standards. The standard does not, by itself, impose an obligation to audit such supplemental information. Rather, such obligations for auditor reporting on supplemental information generally are based on the rules of regulatory agencies requiring supplemental information, such as SEC Rule 17a-5.<sup>8</sup> Also, the standard does not apply if the auditor who is engaged to audit and report on supplemental information did not audit the financial statements. In those situations, the auditor of the supplemental information should look to the requirements in AU sec. 623, *Special Reports*.

Appendix 3 discusses comments received on the proposed standard in greater detail.

### III. Considerations in Adopting Auditing Standard No. 17

A number of developments led the Board to re-examine its requirements regarding supplemental information. Primarily, Section 982 of the Dodd-Frank

---

<sup>8</sup> ERISA Section 103(a)(3)(A) requires a plan administrator to engage an independent auditor to conduct an examination of the plan's financial statements and required schedules in accordance with generally accepted auditing standards (GAAS). See 29 C.F.R. §2520.103-1. An employee benefit plan that has a reporting obligation under Section 15(d) of the Exchange Act also must file its annual report on Form 11-K with the Commission and engage an auditor to conduct an examination of the plan's financial statements and schedules under PCAOB standards.

Wall Street Reform and Consumer Protection Act<sup>9</sup> (the "Dodd-Frank Act") gave the Board oversight of audits of brokers and dealers registered with the SEC. Under SEC Rule 17a-5, brokers and dealers are required to submit to the SEC financial reports containing certain schedules, including supporting schedules regarding (i) the computation of net capital; (ii) the computation for determination of reserve requirements; and (iii) information related to the broker's or dealer's possession or control of its clients' assets.<sup>10</sup> These schedules provide important information that can support and assist the Commission and other broker or dealer "designated examining authorities"<sup>11</sup> in their oversight of financial responsibility practices of brokers and dealers. In addition, as described in the SEC's release, one of the SEC's motivations for its amendments to SEC Rule 17a-5 to require that audits of brokers and dealers—including the examination of the financial statements and supplemental schedules in the financial report—be conducted in accordance with PCAOB standards was to "better ensure alignment between broker-dealer audits and the regulatory policy objectives reflected in the Commission's financial responsibility rules."<sup>12</sup>

On July 30, 2013, the Commission adopted amendments to SEC Rule 17a-5 to require, among other things, that an auditor engaged by the broker or dealer provide an audit report based on an auditor's examination of the broker's or dealer's financial report, which consists of the financial statements and supporting schedules, in accordance with the standards of the PCAOB.<sup>13</sup> However, the PCAOB's existing audit standards do not contemplate the SEC's requirements for an auditor's report on the examination of the financial statements and supporting schedules of a broker or dealer. As noted earlier, the Board's existing standard, AU sec. 551, describes the auditor's reporting responsibilities regarding supplemental information accompanying audited financial statements in terms of *auditor-submitted* documents and, additionally, does not specify audit procedures to be applied to test the supplemental information that is provided to the regulator. Accordingly, the Board decided to adopt Auditing Standard No. 17 and align its standard for performing auditing procedures and reporting on supplemental information with the SEC's requirements. Due to the importance of the required supplemental information for regulatory purposes, the Board also determined to include audit procedures designed to support the auditor's reporting requirements, including procedures for testing the supplemental information accompanying the financial statements.

Additionally, the amendments to SEC Rule 17a-5 also require certain brokers and dealers to include in their annual reports a compliance report that addresses, among other things, the broker's or dealer's compliance with the SEC rules requiring a broker or dealer to maintain a minimum level of net capital and a reserve of funds or qualified securities in an amount at least equal to the value of the amount of net funds owed to customers of the respective broker or dealer.<sup>14</sup> In conjunction with these recent amendments, the Board also

---

<sup>9</sup> Pub. L. No. 111-203, 124 Stat. 1376 (July 21, 2010).

<sup>10</sup> See paragraph (d)(2) of SEC Rule 17a-5.

<sup>11</sup> Under SEC Rule 17d-1, *Examination for Compliance with Applicable Financial Responsibility Rules*, a registered broker or dealer that is a member of more than one securities self-regulatory organization may be assigned a "designated examining authority" or "DEA" that is responsible for examining the broker or dealer for compliance with SEC financial responsibility rules. An example of a securities self-regulatory organization that is a DEA is the Financial Industry Regulatory Authority.

<sup>12</sup> See the SEC Release at 208.

<sup>13</sup> See paragraphs (f)(1) and (g)(1) of SEC Rule 17a-5. See also paragraph (d)(1)(i)(C) of SEC Rule 17a-5, which requires that the auditor's report on the examination of the financial report of the broker or dealer be filed with the Commission.

<sup>14</sup> See paragraphs (f)(1), (g)(2)(i) and (ii) of SEC Rule 17a-5. The net capital rule is 17 C.F.R. §240.15c3-1, and the reserve requirements rule is paragraph (e) of 17 C.F.R. §240.15c3-3.

is adopting new standards for attestation engagements (the "attestation standards") that relate to brokers' and dealers' compliance reports required in SEC Rule 17a-5.<sup>15</sup> The requirements in the attestation standards are closely related to the audit requirements in this standard regarding supporting schedules for brokers and dealers. Among other things, the attestation standards emphasize the importance of coordinating the work in the compliance attestation engagement with the audit of the financial statements and audit procedures performed on the schedules required under SEC Rule 17a-5.<sup>16</sup>

In addition to the schedules required by SEC Rule 17a-5, Auditing Standard No. 17 covers supplemental information required to be presented pursuant to the rules and regulations of a regulatory authority when that information is reported on in relation to financial statements that are audited in accordance with PCAOB standards. For example, Auditing Standard No. 17 covers the schedules in Form 11-K of an 11-K filer that elects to file plan financial statements and schedules prepared in accordance with the financial reporting requirements of ERISA ("covered 11-K filer").<sup>17</sup>

In the Board's view, Auditing Standard No. 17 promotes investor protection because of the importance of supplemental information in meeting regulatory objectives regarding audits of financial statements of brokers, dealers, and others. Because such information is often critical to the effectiveness of regulatory oversight, Auditing Standard No. 17 requires the performance of audit procedures to test the supplemental information to support the auditor's report on the supplemental information. The standard also requires the auditor to evaluate whether the supplemental information complies with applicable regulatory requirements, which should help facilitate consistent compliance with regulatory requirements and give regulators greater confidence about the reliability of the supplemental information provided for regulatory oversight activities that are important to investor protection.

For example, in the context of oversight of brokers and dealers, the requirements in the standard for testing and evaluating supplemental information could improve the quality of the supporting schedules that regulators rely on when considering whether the broker or dealer maintains adequate safeguards over customer funds and securities. Also, strengthening and clarifying the auditing requirements for applying procedures and reporting on supplemental information could facilitate consistent compliance with SEC Rule 17a-5.

For 11-K filers, the requirements in the standard for testing and evaluating supplemental information may increase the quality of information available to investors, especially the plans' participants.

Auditing Standard No. 17 also requires the auditor to coordinate the auditor's work with the financial statement audit. To the extent that the supplemental information relates to information in the financial statements, the enhanced audit attention to the supplemental information could enhance the confidence of regulators and other users in the reliability of the financial statements and supplemental information.

---

<sup>15</sup> See *Standards for Attestation Engagements Related to Broker and Dealer Compliance or Exemption Reports Required by the U.S. Securities and Exchange Commission and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-007 (October 10, 2013).

<sup>16</sup> *Id.*

<sup>17</sup> The new standard would not apply to 11-K filers that do not make that election because the SEC-required schedules for those 11-K filers are part of the audited financial statements.

## IV. Overview of Auditing Standard No. 17

Auditing Standard No. 17 is being adopted by the Board substantially as proposed. However, certain revisions have been made by the Board to address issues raised by commenters. The following discussion provides a high-level overview of the standard. Appendix 3 provides a more detailed discussion of the standard, significant comments received, and changes made.

*Scope of the Standard.* The standard applies when the auditor of the company's financial statements is engaged to perform audit procedures and report on supplemental information that accompanies financial statements audited pursuant to PCAOB standards.<sup>18</sup> Such supplemental information includes:

- Supporting schedules that brokers and dealers are required to file pursuant to SEC Rule 17a-5;<sup>19</sup>
- Supplemental information (i) required to be presented pursuant to the rules and regulations of a regulatory authority and (ii) covered by an independent public accountant's report on that information in relation to financial statements that are audited in accordance with PCAOB standards; or
- Information that is (i) ancillary to the audited financial statements, (ii) derived from the company's accounting books and records, and (iii) covered by an independent public accountant's report on that information in relation to the financial statements that are audited in accordance with PCAOB standards.

Thus, the standard covers supplemental information required by regulatory authorities and supplemental information that is voluntarily provided, when the auditor is engaged to report on that information in relation to the financial statements as a whole and the financial statements are audited in accordance with PCAOB standards.

*"In Relation To" Opinion.* Historically, when auditors reported on supplemental information, they often expressed their opinions on the supplemental information "in relation to" the basic financial statements taken as a whole.<sup>20</sup> Audit procedures regarding that supplemental information generally have been performed in conjunction with the audit of the financial statements. The auditor's report on supplemental information under AU sec. 551 is rooted in the concept that the supplemental information is fairly presented "in relation to" the financial statements as a whole. The standard retains the existing "in relation to" language in the auditor's report; however, it also updates the report to describe the auditor's responsibilities for the supplemental information.<sup>21</sup>

*Performance and Reporting Requirements.* The standard establishes procedural and reporting responsibilities for the auditor regarding supplemental information accompanying financial statements. The standard establishes:

- Requirements that the auditor perform audit procedures to test the supplemental information;
- Requirements that the auditor evaluate the supplemental information, which include evaluating (1) whether the supplemental information, including its form and content, is fairly stated, in

---

<sup>18</sup> Similar to AU sec. 551, the standard does not apply to unaudited supplementary information, such as the information required by Item 302 of Regulation S-K, 17 C.F.R. §229.302.

<sup>19</sup> See paragraph (d)(2) of SEC Rule 17a-5.

<sup>20</sup> See AU sec. 551.12.

<sup>21</sup> Appendix 3 discusses the auditor's "in relation to" opinion in more detail.

all material respects, in relation to the financial statements as a whole, and (2) whether the supplemental information is presented in conformity, in all material respects, with the relevant regulatory requirements or other applicable criteria;

- Requirements that promote enhanced coordination between the work performed on the supplemental information with work performed on the financial statement audit and, if applicable, other engagements, such as a compliance attestation engagement for brokers and dealers; and
- Reporting requirements that clearly articulate the auditor's responsibilities when reporting on supplemental information.

The standard will not apply to schedules prepared pursuant to Regulation S-X, 17 C.F.R. § 210 because those schedules are deemed by SEC rule to be part of the financial statements.<sup>22</sup>

## V. Economic Considerations, including for Audits of Emerging Growth Companies

### A. Economic Considerations

This release, and the related appendices, provide additional detail regarding the background and need for the new standard, Auditing Standard No. 17; significant comments received and alternatives considered; and key differences between the new standard and AU sec. 551. As discussed below, the Board also considered the economic consequences of Auditing Standard No. 17.

At the outset, the Board's objective was to determine that it had an auditing standard appropriate for reporting on the supplemental information required by SEC Rule 17a-5. The Board determined that it was necessary to develop a new auditing standard for supplemental information because the Board's existing standard, AU sec. 551, applies to supplemental information in auditor-submitted documents and does not establish requirements for performing procedures to support the opinion to be expressed on the supplemental information, including procedures for evaluating compliance with corresponding regulatory requirements, if any.

In developing Auditing Standard No. 17, the Board sought to develop a new auditing standard that takes into account the SEC's requirements for supplemental information in SEC Rule 17a-5. As part of its process, the Board also considered the SEC's economic analysis for its amendments to SEC Rule 17a-5, which included considerations relating to efficiency, competition, and capital formation. Notably, the SEC's analysis considers the economic effects, including the costs and benefits, of the required use of PCAOB standards, and discusses the impact of such change on audits of financial statements and supporting schedules that are required by the SEC to be filed by registered brokers and dealers pursuant to SEC Rule 17a-5.<sup>23</sup>

---

<sup>22</sup> See Section 1-01(b) of Regulation S-X, 17 C.F.R. §210.1-01(b), which states in part, "the term financial statements ... shall be deemed to include all notes to the statements and all related schedules." See also Appendix 3 of this release.

<sup>23</sup> See the SEC Release at 220-226. Notably, after analysis of the views of commenters on the costs of the SEC's proposal to replace GAAS with PCAOB standards with respect to audits of brokers and dealers, the SEC concluded that the Commission "does not expect that a requirement that an audit of financial statements and supporting schedules be conducted in accordance with the standards of the PCAOB instead of with GAAS will result in substantial changes for broker-dealer audit programs and therefore the Commission does not anticipate that this change will result in significant costs to broker-dealers in the form of increased audit fees."

In addition to considering the SEC's requirements and economic analysis, the Board also took into account other related economic considerations, including comments received on the proposed standard, as discussed further below.<sup>24</sup>

### **1. Economic Baseline**

Regulators such as the SEC make the determination regarding whether an entity must file supplemental information and whether auditors are required to report on that information.

To the Board's knowledge, the only entities that are required to file supplemental information to which the standard would apply are (1) brokers and dealers pursuant to SEC Rule 17a-5<sup>25</sup> and (2) covered 11-K filers.

Accordingly, the Board's consideration of the economic consequences of Auditing Standard No. 17 takes into account how the new standard differs from the pre-existing auditing standards applicable to supplemental information required in audits of brokers and dealers and covered 11-K filers.

For brokers and dealers, as discussed previously, the SEC's amendments to Rule 17a-5 require audits of brokers and dealers to be conducted in accordance with PCAOB standards. This includes the examination of the financial report, which consists of the financial statements and supporting schedules. Before the SEC's amendments to Rule 17a-5, audits of brokers and dealers were performed under generally accepted auditing standards ("GAAS"), established by the American Institute of Certified Public Accountants ("AICPA"). Specifically, AU-C Section 725-C, *Supplementary Information in Relation to the Financial Statements as a Whole*, addressed the auditor's responsibilities when auditors were engaged to report on supplemental information in relation to audited financial statements.

For covered 11-K filers, auditors generally use the reporting language in AU sec. 551 in preparing their auditor's reports on the supplemental information under PCAOB standards.

Both GAAS and AU sec. 551 use an "in relation to" approach to reporting. That is, the auditor's report on the supplemental information generally presents an opinion on whether the supplemental information is fairly stated in all material respects "in relation to" the audited financial statements taken as a whole. When reporting using the "in relation to" approach, the materiality considerations generally are the same as those used in forming an opinion on the basic financial statements taken as a whole.<sup>26</sup> However, GAAS includes requirements for audit procedures to be applied to the supplemental information, whereas AU sec. 551 generally does not specify audit procedures.

### **2. Consideration of Alternatives of Audit Approach**

In developing Auditing Standard No. 17, the PCAOB sought to adopt a standard that is tailored to the circumstances under which supplemental information is required in SEC filings of brokers and dealers and covered 11-K filers.

---

<sup>24</sup> The Board did not specifically request comments that attempted to quantify costs related to the auditing standard, but the Board did request comment on the appropriateness of the standard and received comments that pertained to audit effort and related costs that it considered. The discussion in this section reflects the Board's qualitative assessment of the standard.

<sup>25</sup> See paragraphs (d)(1)(i)(A) and (d)(2) of SEC Rule 17a-5.

<sup>26</sup> See e.g., AU sec. 551.08, which provides that the "measurement of materiality" under that standard is the same as that used in forming an opinion on the financial statements.

Two principal alternatives were considered in developing the new standard<sup>27</sup>—

- A stand-alone audit of the supplemental information
- An "in relation to" approach

As adopted, Auditing Standard No. 17 builds on existing auditing standards by retaining the "in relation to" approach for reporting on supplemental information "in relation to" the financial statements as a whole. The PCAOB assessed the alternative, which would have required the supplemental information to be audited on a stand-alone basis. In the Board's view, the stand-alone alternative could require substantial additional audit effort because the materiality considerations would be substantially lower than in an "in relation to" approach.<sup>28</sup> The Board does not believe that this additional audit effort would enhance the quality of supplemental information significantly over properly performed testing and evaluation under the "in relation to" approach. In the Board's view, the use of the "in relation to" approach—together with the required coordination with the work on the financial statement audit—can accomplish the objectives of the financial statement audit and audit procedures on the supplemental information with more efficient use of resources than the alternative stand-alone approach.

Commenters on the proposed standard generally supported the use of the "in relation to" approach and generally observed that the "in relation to" audit opinion meets the needs of users in a cost-effective manner. Nothing in the comments received indicates that an "in relation to" opinion on supplemental information is inadequate for users of that information.

### 3. Additional Considerations

As discussed in more detail in Appendix 3, Auditing Standard No. 17 differs from AU sec. 551 in the following key respects:

- Auditing Standard No. 17 specifies audit procedures to be applied to test supplemental information, while AU sec. 551 generally does not specify audit procedures. Furthermore, those audit procedures include consideration of the regulatory requirements for supplemental information, for example, requirements to evaluate whether the supplemental information complies with the applicable regulatory requirements.
- The new audit procedures are risk-based so that the required level of testing of the supplemental information is commensurate with the risks of material misstatement.
- Auditing Standard No. 17 requires that the audit procedures on the supplemental information be "planned and performed" "in conjunction with" the auditor's work on the financial statement audit and, if applicable, other engagements.

In developing Auditing Standard No. 17, the Board has taken note of observations from its oversight activities regarding the inconsistencies and deficiencies in auditing practices regarding the application of auditing procedures to supplemental information. For example, a 2013 PCAOB inspection report on audits of brokers and dealers, which were performed under GAAS, indicated that

---

<sup>27</sup> The preceding section discusses the Board's decision to adopt a new standard rather than retain AU sec. 551.

<sup>28</sup> In a stand-alone audit, the auditor would apply materiality considerations for the supplemental information by itself, which typically would be substantially lower than the materiality level for the financial statements as a whole. *See e.g.*, paragraph .13 of AU sec 623.

PCAOB inspections staff in their inspections of broker and dealer audits identified auditing deficiencies in 57 of 60 audits and that deficiencies in auditing procedures regarding supporting schedules were among the most frequently noted deficiencies in compliance with audit requirements.<sup>29</sup>

The Board believes that strengthening and clarifying the requirements for supplemental information—and tailoring the required procedures for the supplemental information required by regulatory authorities—will promote consistent auditor performance to support audit reports on supplemental information. Similarly, the risk-based approach set forth in the standard should direct auditors to devote more audit attention to the areas of greatest risk to material misstatement of the supplemental information. The auditor's enhanced focus on the supplemental information should help give regulators greater confidence about the reliability of the supplemental information used in their regulatory oversight, which is important to investor protection. For example, as noted previously, in the context of oversight of brokers and dealers, the audit performance requirements in the standard could improve the quality of supplemental information that regulators rely on when considering whether the broker or dealer maintains adequate safeguards over customer funds and securities.

The Board also has taken into account cost considerations in developing Auditing Standard No. 17. As discussed previously, the use of the "in relation to" approach can accomplish the objectives of the financial statement audit and audit procedures on the supplemental information with more efficient use of resources than the alternative stand-alone approach. Also, the risk-based approach helps avoid unnecessary procedures by focusing audit attention on areas of higher risk. Furthermore, the required coordination of the audit procedures on the supplemental information with the audit of the financial statements—and other engagements, when applicable—helps avoid unnecessary duplication of audit procedures. These measures can facilitate the transition to the new standard and help lessen the effects of the associated costs.

Auditing Standard No. 17 has some commonalities with GAAS, for example, the "in relation to" approach and the requirement to apply audit procedures to the supplemental information. This should help facilitate the transition from GAAS to Auditing Standard No. 17 generally and lessen the associated costs for 11-K filers that are audited under both GAAS and PCAOB standards.

The PCAOB acknowledges that the new standard will create some additional compliance costs for affected market participants. These costs include the one-time implementation costs for registered firms to update their audit methodologies to reflect the new standard and train their personnel. However, because, as mentioned above, the new standard builds on concepts in existing standards and has commonalities with GAAS, the PCAOB does not anticipate that changes associated with initial implementation will result in significant costs to auditors (or to brokers and dealers or covered 11-K filers in the form of increased audit fees).

---

<sup>29</sup> See *Second Report on the Progress of the Interim Inspection Program Related to Audits of Brokers and Dealers*, PCAOB Release No. 2013-006 (August 19, 2013), which reports that PCAOB inspection staff identified auditing deficiencies in 57 of the 60 audits of brokers and dealers selected for inspection and that deficiencies in compliance with audit requirements for brokers and dealers under the Exchange Act that were among the most frequently noted by PCAOB inspection staff included deficiencies in audit procedures related to net capital and customer reserve supporting schedules, compliance with the conditions of the exemption claimed by the broker or dealer, and the accountant's supplemental report on material inadequacies. See PCAOB Release 2013-006, Executive Summary, at ii.

Further compliance costs, which are associated with audit effort, may depend on auditors' existing auditing practices under pre-existing auditing standards and the size and complexity of the entity being audited.

The Board has taken note of the views of commenters on the proposed standard in assessing economic considerations. Some auditors who commented on the Board's proposal indicated that the procedures required by the proposed auditing standard were similar to their current practices. Comments from other auditors suggested that they did not perform specific procedures to test supplemental information. To the extent that auditors already are testing supplemental information, the PCAOB does not anticipate significant incremental costs associated with compliance with Auditing Standard No. 17. Those incremental costs might be somewhat higher for auditors that have not been performing specific tests of supplemental information.<sup>30</sup>

Auditing Standard No. 17 is designed to be scalable based on an entity's size and complexity. Specifically, the audit effort under the standard likely will be greater for entities that have more supplemental information or more complex supplemental information. For example, audit effort generally would be greater for larger, more complex brokers or dealers that carry securities for customers than for smaller, less complex brokers that neither carry nor clear securities. Similarly, audit effort generally would be greater for larger, more complex covered 11-K filers that have more investments and reportable transactions subject to regulatory reporting requirements.

## B. Applicability to Audits of Emerging Growth Companies

The Board is adopting Auditing Standard No. 17 pursuant to its authority under the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley" or the "Act").<sup>31</sup>

Before rules adopted by the Board can take effect, they must be approved by the SEC. Pursuant to Section 107(b)(3) of Sarbanes-Oxley, the SEC shall approve a proposed rule if it finds that the rule is "consistent with the requirements of [the] Act and the securities laws, or is necessary or appropriate in the public interest or for the protection of investors."

Additionally, Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act")<sup>32</sup> amended Sarbanes-Oxley to provide that any additional rules adopted by the PCAOB after April 5, 2012 do not apply to audits of emerging growth companies ("EGCs")<sup>33</sup> unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after

---

<sup>30</sup> The auditors whose comments suggested that they did not perform specific procedures on supplemental information did not address in their letters their current practices for complying with GAAS, which requires audit procedures for supplemental information. To the extent that those auditors apply audit procedures to supplemental information in audits under GAAS, the Board anticipates that the costs of transitioning to Auditing Standard No. 17 would not be significant.

<sup>31</sup> Pub. L. No. 107-204, 116 Stat. 745 (2002). Under Section 101 of the Act, the mission of the PCAOB is to oversee the audit of companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports. Section 103 of the Act authorizes the Board to adopt auditing standards for use by registered public accounting firms in the preparation and issuance of audit reports "as required by [the] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors."

<sup>32</sup> Pub. L. No. 112-106, 126 Stat. 306 (2012).

<sup>33</sup> Section 3(a)(80) of the Exchange Act defines the term "emerging growth company." An issuer generally qualifies as an EGC if it has total annual gross revenue of less than \$1 billion during its most recently completed fiscal year (and its first sale of common equity securities pursuant to an effective Securities Act registration statement did not occur on or before December 8, 2011.) See JOBS Act Section 101(a), (b), and (d). Once an issuer is an EGC, it retains its EGC status until the earliest of: (i) the first year after it has total annual gross revenue of \$1 billion or more (as indexed for inflation

considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation."<sup>34</sup>

The following discussion is intended to provide information that may assist the SEC in any determination it may make regarding whether to apply the new standard to audits of EGCs.

As noted above, Auditing Standard No. 17:

- Strengthens and clarifies the audit requirements regarding supplemental information to promote consistent audit performance and compliance with regulatory requirements, which can enhance the quality of information that is used in regulatory oversight for investor protection and, with respect to covered 11-K filers, increase the quality of information available to investors;
- Helps lessen the effects of the costs associated with the new auditing standard by retaining the "in relation to" approach, setting forth a risk-based approach for the required audit procedures, and requiring coordination with the financial statement audit to avoid redundancy in testing; and
- Is designed to be scalable based on the size and complexity of the entity.

The PCAOB has begun monitoring implementation of the JOBS Act to better understand the characteristics of EGCs and inform the Board's considerations regarding whether it should recommend to the SEC that it apply the new standard and related amendments to audits of EGCs. Based on the PCAOB's research of self-identified EGCs, a substantial majority of EGCs are smaller reporting companies that began reporting under the Exchange Act in 2012 or later.<sup>35</sup>

Currently, the PCAOB is not aware of EGCs for which auditors would be required to apply this standard. PCAOB staff has performed research on filings of self-identified EGCs. Text searches were used to identify any issuers with audit reports that opine on supplemental information required by Rule 17a-5, and PCAOB staff read the most recent filings of those companies. For those companies for which audited financial statements were available and based on information included in the most recent audited financial statements filed as of May 15, 2013, PCAOB staff has observed that none of the EGCs is a broker or dealer or an 11-K filer. The staff observed one SEC filing containing supplemental information for which an auditor expressed an opinion. Based on the nature of the supplemental information filed, it appears that the issuer included the supplemental information voluntarily rather than pursuant to a requirement specified by rule.

---

every five years by the SEC); (ii) the end of the fiscal year after the fifth anniversary of its first sale of common equity securities under an effective Securities Act registration statement; (iii) the date on which the company issues more than \$1 billion in nonconvertible debt during the prior three-year period; or (iv) the date on which it is deemed to be a "large accelerated filer" under the Exchange Act (generally, an entity that has been public for at least one year and has an equity float of at least \$700 million).

<sup>34</sup> See Section 103(a)(3)(C) of Sarbanes-Oxley (15 U.S.C.—7213(a)(3)), as added by Section 104 of the JOBS Act, Pub. L. No. 112-106 (April 5, 2012).

<sup>35</sup> See Appendix 7 of *The Auditor's Report on an Audit of Financial Statements When the Auditor Expresses an Unqualified Opinion, Reports on Audited Financial Statements, and The Auditor's Responsibilities Regarding Other Information in Certain Documents Containing Audited Financial Statements and the Related Auditor's Report, and Related Amendments to PCAOB Standards*, PCAOB Release No. 2013-005 (August 13, 2013).

As noted previously, to the Board's knowledge, the only entities that are required to file supplemental information to which Auditing Standard No. 17 will apply are (1) brokers and dealers pursuant to SEC Rule 17a-5 and (2) covered 11-K filers. PCAOB staff has discussed the applicability of the JOBS Act to this rulemaking with the SEC staff. The reporting regimes for registered brokers and dealers under SEC Rule 17a-5 and the reporting regime for employee benefit plans that must comply with financial reporting requirements under both ERISA and the SEC are separate and distinct from those for companies subject to reporting requirements pursuant to Section 13 and 15 of the Exchange Act or for a Securities Act registration statement. The Board defers to the SEC on the applicability of the JOBS Act to this rulemaking for these entities and stands ready to assist the SEC with any additional analysis that may become necessary.

In the event that the standard would be applied to an EGC, the Board has no reason to believe that the economic effects on those EGCs would be different from those described previously for brokers, dealers, and covered 11-K filers. Accordingly, and pursuant to the foregoing discussions, the PCAOB requests that the Commission, to the extent necessary, determine that it is necessary or appropriate in the public interest, after considering the protection of investors and whether the action will promote efficiency, competition, and capital formation, to apply these amendments to audits of EGCs.

## VI. Effective Date

Auditing Standard No. 17 will be effective, subject to approval by the SEC, for audit procedures and reports on supplemental information that accompanies financial statements for fiscal years ending on or after June 1, 2014. This effective date coincides with the effective date for the corresponding amendments to SEC Rule 17a-5.<sup>36</sup>

\* \* \*

On the 10th day of October, in the year 2013, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Attestation Standard No. 1

# Examination Engagements Regarding Compliance Reports of Brokers and Dealers

[Effective, subject to approval by the SEC, for examination engagements and review engagements for fiscal years ending on or after June 1, 2014]

### Introduction

1. This standard establishes requirements that apply when an auditor is engaged to perform an examination<sup>1</sup> of certain statements made by a broker<sup>2</sup> or dealer<sup>3</sup> in a compliance report ("compliance report") prepared pursuant to Securities and Exchange Act of 1934 ("Exchange Act") Rule 17a-5, 17 C.F.R. §240.17a-5 ("SEC Rule 17a-5") of the U.S. Securities and Exchange Commission ("SEC").<sup>4</sup>

2. SEC Rule 17a-5 requires a broker's or dealer's compliance report to include the following statements (hereinafter referred to as "assertions") by the broker or dealer as to whether:<sup>5</sup>

- a. The **Internal Control Over Compliance**<sup>6</sup> of the broker or dealer was effective during the most recent fiscal year;
- b. The Internal Control Over Compliance of the broker or dealer was effective as of the end of the most recent fiscal year;<sup>7</sup>

---

<sup>1</sup> See paragraphs (d)(1)(i)(C) and (g)(2)(i) of SEC Rule 17a-5, which require that certain brokers or dealers file with the SEC a report prepared by an independent accountant based on an examination of the compliance report, if the broker or dealer is required to file a compliance report with the SEC.

<sup>2</sup> According to PCAOB Rule 1001(b)(iii), the term "broker" means a broker (as defined in Section 3(a)(4) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>3</sup> According to PCAOB Rule 1001(d)(iii), the term "dealer" means a dealer (as defined in Section 3(a)(5) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>4</sup> See paragraph (g)(2)(i) of SEC Rule 17a-5.

<sup>5</sup> The scope of the auditor's examination does not encompass the statement required by paragraph (d)(3)(i)(A)(1) of SEC Rule 17a-5, which is a statement as to whether the broker or dealer has established and maintained Internal Control Over Compliance as that term is defined in paragraph (d)(3)(ii) of SEC Rule 17a-5. See paragraphs (d)(3) and (g)(2)(i) of SEC Rule 17a-5.

<sup>6</sup> Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear. The definitions of the terms in Appendix A are consistent with paragraphs (d)(3)(ii) and (iii) of SEC Rule 17a-5.

<sup>7</sup> See paragraph (d)(3)(iii) of SEC Rule 17a-5, which provides that "a broker or dealer is not permitted to conclude that its Internal Control Over Compliance was effective during the most recent fiscal year if there were one or more material weaknesses in its Internal Control Over Compliance during the most recent fiscal year. The broker or dealer is not permitted to conclude that its Internal Control Over Compliance was effective as of the end of the most recent fiscal year if there were one or more material weaknesses in its Internal Control Over Compliance as of the end of the most recent fiscal year."

- c. The broker or dealer was in compliance with 17 C.F.R. §§ 240.15c3-1 (the "net capital rule") and 240.15c3-3(e) (the "reserve requirements rule") as of the end of the most recent fiscal year; and
- d. The information the broker or dealer used to state whether it was in compliance with the net capital rule and the reserve requirements rule was derived from the books and records of the broker or dealer.

## Objective

3. When performing an examination of the assertions made by a broker or dealer in a compliance report (an "examination engagement"), the auditor's objective is to express an opinion regarding whether the assertions made by the broker or dealer in its compliance report are fairly stated, in all material respects.

4. To express an opinion on the assertions made by a broker or dealer in a compliance report, the auditor must plan and perform the examination engagement to obtain appropriate evidence that is sufficient<sup>8</sup> to obtain reasonable assurance<sup>9</sup> about whether (1) one or more **Material Weaknesses** existed during the most recent fiscal year specified in the broker's or dealer's assertion; (2) one or more Material Weaknesses existed as of the end of the most recent fiscal year specified in the broker's or dealer's assertion; and (3) one or more instances of non-compliance with the net capital rule or the reserve requirements rule existed as of the end of the most recent fiscal year specified in the broker's or dealer's assertion.

Note: Because the broker's or dealer's assertions include assertions regarding Internal Control Over Compliance and its compliance with both the net capital rule and the reserve requirements rule, the auditor's examination should evaluate (a) the effectiveness of Internal Control Over Compliance with each financial responsibility rule<sup>10</sup> during, and as of the end of, the most recent fiscal year, and (b) compliance with the net capital rule and with the reserve requirements rule as of the end of the most recent fiscal year.

Note: The auditor is not required to express an opinion on the process the broker or dealer used to arrive at the conclusions stated in the broker's or dealer's assertions.

5. The auditor also must plan and perform the examination engagement to obtain appropriate evidence that is sufficient to obtain reasonable assurance to support the auditor's opinion regarding whether the assertion by the broker or dealer that the information used to assert compliance with the net capital rule and the reserve requirements rule was derived from the books and records of the broker or dealer, is fairly stated, in all material respects.

---

<sup>8</sup> See the description of "sufficiency" and "appropriateness" in Auditing Standard No. 15, *Audit Evidence*.

<sup>9</sup> Although not absolute assurance, reasonable assurance is a high level of assurance.

<sup>10</sup> The term "financial responsibility rules" refers to: 17 C.F.R. § 240.15c3-1 ("SEC Rule 15c3-1" or the "net capital rule"); 17 C.F.R. § 240.15c3-3 ("SEC Rule 15c3-3"); 17 C.F.R. § 240.17a-13 ("SEC Rule 17a-13"); and any rule of the designated examining authority ("DEA") of the broker or dealer that requires account statements to be sent to the customers of the broker or dealer. The financial responsibility rules are the same as the rules cited in paragraph (d)(3)(ii) of SEC Rule 17a-5.

## Performing the Examination Engagement

### General Requirements

6. An auditor who performs an examination engagement pursuant to this standard must:

- a. Have adequate technical proficiency in attestation engagements;
- b. Obtain an understanding of the financial responsibility rules and other rules and regulations that are relevant to the broker's or dealer's assertions;
- c. Determine the auditor's compliance with independence and ethics requirements; and
- d. Exercise due professional care, which includes application of professional skepticism, in planning and performing the examination and the preparation of the report.

Note: Due professional care imposes a responsibility on each engagement team member to comply with this standard. The exercise of due professional care requires critical review at every level of supervision of the work done and the judgment exercised by those assisting in the engagement, including preparing the report.<sup>11</sup>

Note: Auditing Standard No. 3, *Audit Documentation*, establishes the documentation requirements for examination engagements performed pursuant to this standard.

7. The engagement partner is responsible for the examination engagement and performance of the examination procedures. Accordingly, the engagement partner is responsible for proper planning of the examination engagement, proper supervision of the work of engagement team members, and compliance with the requirements of this standard. The engagement partner may seek assistance from appropriate engagement team members in fulfilling these responsibilities.

Note: For purposes of this standard, the term "engagement partner" means the member of the engagement team with primary responsibility for the examination engagement.

Note: Proper planning includes establishing an overall strategy for the examination engagement and developing a plan for the engagement, which includes, in particular, the nature, timing, and extent of procedures necessary to obtain reasonable assurance. Proper supervision includes supervising the work of engagement team members so that the work is performed as directed and supports the conclusions reached.

### Relationship Between the Examination Engagement and the Audit of the Financial Statements and the Audit Procedures Performed on Supplemental Information

8. The examination engagement should be coordinated with the audit of the financial statements and the audit procedures performed on supplemental

---

<sup>11</sup> The auditor's responsibility to exercise due professional care is consistent with the description in paragraphs .40-.41 of AT sec. 101, *Attest Engagements*.

information of the broker or dealer.<sup>12</sup> In planning and performing procedures for, and evaluating the results of the procedures performed in, the examination engagement, the auditor should take into account relevant evidence from the audit of the financial statements and the audit procedures performed on the supplemental information. However, the objectives of the financial statement audit and the examination engagement are not the same, so the auditor must plan and perform the work to meet the objectives of both engagements.

## Planning the Examination Engagement

9. The auditor should plan the examination engagement to perform procedures that are sufficient to provide a reasonable basis for determining whether the broker's or dealer's assertions are fairly stated, in all material respects. In planning the examination engagement, the auditor should:

- a. Evaluate the nature of instances of non-compliance with the financial responsibility rules and **Deficiencies in Internal Control Over Compliance** identified during previous examination engagements;
- b. Obtain an understanding of the broker's or dealer's processes, including relevant controls, regarding compliance with the financial responsibility rules<sup>13</sup>;

Note: The nature, timing, and extent of procedures that are necessary to obtain an understanding of the broker's or dealer's processes, including relevant controls, regarding compliance with the financial responsibility rules depend on the size and complexity of the broker or dealer; the auditor's existing knowledge of the broker's or dealer's processes and controls; the degree to which the broker's or dealer's compliance depends on the completeness and accuracy of the broker's or dealer's internally-generated data; the nature and extent of changes in systems and operations, if any; and the nature of the broker's or dealer's documentation of its processes and controls.

Note: Obtaining an understanding of the broker's or dealer's processes, including relevant controls, includes evaluating the design of controls that are relevant to the examination and determining whether the controls have been implemented.

- c. Obtain an understanding of instances of non-compliance with the financial responsibility rules and **Deficiencies in Internal Control Over Compliance** identified by management during the most recent fiscal year;
- d. Assess the risks associated with related parties,<sup>14</sup> including related parties that are investment advisors or entities with which the broker or dealer has a custodial or clearing relationship, that are relevant to compliance and controls over compliance;

---

<sup>12</sup> Under the definition of supplemental information included in Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements*, supplemental information includes the supporting schedules described in paragraph (d)(2) of SEC Rule 17a-5, which are required to be filed with the SEC, DEA, and the Securities Investor Protection Corporation ("SIPC") by brokers and dealers. Such supporting schedules include a Computation of Net Capital Under SEC Rule 15c3-1, a Computation for Determination of the Reserve Requirements under Exhibit A of SEC Rule 15c3-3, and Information Relating to Possession or Control Requirements Under SEC Rule 15c3-3.

<sup>13</sup> Appendix B of this standard discusses considerations for brokers and dealers with multiple divisions or branches.

<sup>14</sup> The auditor should look to the definition in the applicable financial reporting framework with respect to the term "related parties."

- e. Obtain an understanding of management's competence regarding the relevant rules and regulations;
- f. Read the Financial and Operational Combined Uniform Single Reports ("FOCUS Reports")<sup>15</sup> filed by the broker or dealer and obtain an understanding of the reasons for resubmissions, if any;
- g. Read reports of internal auditors, others who perform an equivalent function, compliance functions, and other auditors that are relevant to the broker's or dealer's assertions;
- h. Inquire of management, and, if applicable, other individuals at the broker or dealer who have relevant knowledge regarding regulatory examinations and correspondence between the SEC or the broker's or dealer's DEA and the broker or dealer that are relevant to the broker's or dealer's assertions;
- i. Read correspondence and notifications regarding non-compliance that the broker or dealer has sent to or received from the SEC or the broker's or dealer's DEA that are relevant to the broker's or dealer's assertions, and, when necessary in the circumstances, make inquiries of the regulatory agencies; and
- j. Obtain an understanding of the nature and frequency of customer complaints that are relevant to compliance with the financial responsibility rules.

**10.** In addition, in planning the examination engagement, the auditor should assess the risk of fraud, including the risk of misappropriation of customer assets, relevant to compliance with the net capital rule and the reserve requirements rule and the effectiveness of the broker's or dealer's Internal Control Over Compliance.

## Testing Controls over Compliance

**11.** The auditor must test those controls that are important to the auditor's conclusion about whether the broker or dealer maintained effective Internal Control Over Compliance for each financial responsibility rule during the fiscal year and as of the end of the fiscal year. The auditor must obtain evidence that the controls over compliance selected for testing are designed effectively and operated effectively during the fiscal year and as of the fiscal year end.

**12.** For each control selected for testing, the evidence necessary to persuade the auditor that the control is effective depends upon the risk associated with the control. The risk associated with a control consists of the risk that the control might not be effective and, if not effective, the risk that a Material Weakness would result. As the risk associated with the control being tested increases, the persuasiveness of the evidence that the auditor should obtain also increases.

Note: Although the auditor must obtain evidence about the effectiveness of the selected controls for each financial responsibility rule, the auditor is not responsible for obtaining sufficient evidence to support an opinion about the effectiveness of each individual control.

**13.** Factors that affect the risk associated with a control include:

- The nature of the financial responsibility rule;

---

<sup>15</sup> The FOCUS Reports are: Form X-17A-5 Schedule I; Form X-17A-5 Part II; Form X-17A-5 Part IIa; Form X-17A-5 Part IIb; and Form X-17A-5 Part III.

- The risk associated with non-compliance with the financial responsibility rule and the significance of potential non-compliance;
- Changes in the broker's or dealer's policies or procedures or personnel that might adversely affect control design or operating effectiveness;
- The broker's or dealer's history of instances of non-compliance with the financial responsibility rule that the control is intended to prevent or detect;
- The existence and effectiveness of controls that monitor other controls;
- The risk of management override of controls over compliance;
- The nature of the control and the frequency with which it operates;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- The extent of use of part-time personnel to perform controls over compliance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective); and
- The complexity of the control and the significance of the judgments made in connection with its operation.

### ***Testing Design Effectiveness***

**14.** The auditor should test the design effectiveness of the selected controls by determining whether the broker's or dealer's controls, if they are operating as prescribed by persons possessing the necessary authority and competence to perform the control effectively, can effectively prevent or detect instances of non-compliance with the financial responsibility rules on a timely basis.

Note: If a broker or dealer makes changes to its policies and procedures or key personnel during the fiscal year, the auditor should obtain evidence regarding the design effectiveness of the selected controls before and after the change.

**15.** Procedures the auditor performs to obtain evidence about design effectiveness include inquiry of appropriate personnel, observation of the broker's or dealer's operations, and inspection of relevant documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.

### ***Testing Operating Effectiveness***

**16.** The auditor should test the operating effectiveness of the selected controls by determining whether each selected control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

Note: The auditor should obtain evidence regarding the operating effectiveness of the selected controls throughout the entire year and as of the end of the fiscal year.

**17.** Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the broker's or dealer's operations, inspection of relevant documentation, and re-performance of the control.

**18.** The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing might provide sufficient evidence in relation to the risk associated with the control.

Note: Generally, a conclusion that a control is not operating effectively can be supported by less evidence than is necessary to support a conclusion that a control is operating effectively.

### ***Using Evidence Obtained in Past Examination Engagements***

**19.** The auditor should obtain evidence during the current fiscal year about the design and operating effectiveness of controls selected for testing. If controls selected for testing in the current year were tested in past examination engagements, and if the auditor plans to use evidence about the effectiveness of those controls that was obtained in prior years, the auditor should take into account the factors discussed in paragraph 13 and the following factors to determine the evidence needed during the current fiscal year examination:

- The nature, timing, and extent of procedures performed in previous examination engagements;
- The results of the previous years' testing of the control; and
- Changes in the control or the process in which the control operates since the previous examination engagement.

### ***Using Tests of Controls that are Modified During the Year***

**20.** A broker or dealer might implement changes to controls over compliance to make them more effective or efficient or to address control deficiencies. The auditor should obtain an understanding of the reason for the change and obtain evidence regarding the design and operating effectiveness of the new and superseded controls. The nature, timing, and extent of the testing of new and superseded controls depend on the evidence needed to support the auditor's conclusions about the effectiveness of Internal Control Over Compliance during and as of the end of the fiscal year.

## **Performing Compliance Tests**

**21.** The auditor must perform procedures ("compliance tests") that are sufficient to support the auditor's conclusions regarding whether the broker or dealer was in compliance with the net capital rule and reserve requirements rule as of the end of its most recent fiscal year. This includes performing the following procedures on the schedules<sup>16</sup> the broker or dealer used to determine

---

<sup>16</sup> The term "schedules" used in this paragraph refers to the computations of the broker or dealer, in whatever form, that are performed to determine the broker's or dealer's compliance with the net capital rule and the reserve requirements rule.

compliance with the net capital rule and the reserve requirements rule as of its fiscal year end:

- a. Evaluate whether the amounts in the schedules were determined in accordance with the net capital rule or reserve requirements rule, as applicable;
- b. Test the accuracy and completeness of the information in the schedules;
- c. Determine whether the broker or dealer maintained the required level of net capital in accordance with the net capital rule;
- d. Determine whether the broker or dealer maintained a special reserve bank account for the exclusive benefit of customers and deposited funds in at least the required amount in accordance with the reserve requirements rule;
- e. Determine whether the information in the schedules was derived from the books and records of the broker or dealer; and
- f. Determine whether the broker or dealer made the notifications, if any, required by the net capital rule and reserve requirements rule as of the end of the most recent fiscal year.

Note: Procedures performed as part of the audit of the financial statements and audit procedures performed on supplemental information also might provide evidence regarding the broker's or dealer's compliance with the net capital rule and the reserve requirements rule.

**22.** The auditor should plan and perform compliance tests that are responsive to the risks, including fraud risks, associated with non-compliance with the net capital rule and the reserve requirements rule. As the risk associated with non-compliance with the net capital rule or the reserve requirements rule increases, the persuasiveness of the evidence that the auditor should obtain from compliance tests also increases. The evidence provided by the auditor's compliance tests depends upon the mix of the nature, timing, and extent of those procedures. Inquiry alone does not provide sufficient appropriate evidence to support the auditor's conclusions about the broker's or dealer's compliance with the net capital rule or the reserve requirements rule.

**23.** In conjunction with performing the compliance tests pursuant to paragraphs 21 and 22, the auditor must perform procedures to obtain evidence about the existence of customer funds or securities held for customers.

Note: Examples of procedures that provide evidence about the existence of customer assets include: (1) counting customer securities or observing and testing the broker's or dealer's procedures for physical inspection and (2) confirming customer security positions directly with depositories and clearing organizations. Procedures performed in the audit of the financial statements and the audit procedures performed on supplemental information to test the existence of assets held for customers also may provide evidence that is relevant to the requirement in this paragraph.

### ***Effect of Tests of Internal Controls on Compliance Tests***

**24.** The auditor should take into account the results of the auditor's tests of controls over compliance with the net capital rule and the reserve requirements rule in determining the necessary nature, timing, and extent of compliance tests. If the test results indicate that the controls are effective, less evidence is needed from compliance tests. If the test results indicate that the controls are ineffective, the auditor should revise the planned compliance tests as necessary to obtain more persuasive evidence regarding compliance.

## Evaluating the Results of the Examination Procedures

**25.** In forming an opinion on whether the assertions made by the broker or dealer in the compliance report are fairly stated, in all material respects, the auditor should evaluate all evidence obtained, regardless of whether the evidence corroborates or contradicts the broker's or dealer's assertions.

**26.** The auditor should evaluate:

- a. Identified instances of non-compliance with the net capital rule and the reserve requirements rule to determine whether any instance of noncompliance existed as of the end of the most recent fiscal year;
- b. Identified instances in which the information used to assert compliance with the net capital rule or the reserve requirements rule was not derived from the broker's or dealer's books and records to determine whether they are material, individually or in combination; and
- c. Identified Deficiencies in Internal Control Over Compliance to determine whether the deficiencies, individually or in combination, are Material Weaknesses.

Note: A Material Weakness can exist even when no instances of non-compliance exist. However, instances of non-compliance might indicate the existence of one or more Deficiencies in Internal Control Over Compliance.

Note: The auditor cannot assume that an identified instance of non-compliance or an identified Deficiency in Internal Control Over Compliance is an isolated occurrence. The auditor should evaluate the effect of any instance of noncompliance or identified control deficiency on the auditor's assessment of the risks associated with controls and noncompliance.

Note: The auditor also should evaluate the effect on the audit of the financial statements and audit procedures performed on supplemental information of any noncompliance, Material Weaknesses, or instances in which the information used to assert compliance with the net capital rule or reserve requirements rule was not derived, in all material respects, from the broker's or dealer's books and records.

**27.** The auditor should evaluate whether he or she has obtained sufficient appropriate evidence to support the conclusions to be presented in the examination report taking into account the risks associated with controls and non-compliance, the results of the examination procedures performed, and the appropriateness (i.e., the relevance and reliability) of the evidence obtained.

**28.** If the auditor has not obtained sufficient appropriate evidence about an assertion or has substantial doubt about an assertion, the auditor should perform procedures to obtain further evidence to address the matter.

**29.** If the auditor is unable to obtain sufficient appropriate evidence about an assertion, the auditor should express a disclaimer of opinion.<sup>17</sup>

---

<sup>17</sup> See Appendix C of this standard, "Examination Report Modifications," which describes the situations in which the auditor should modify his or her examination report and the specific modifications to be made to the auditor's examination report. The requirement in paragraph 29 does not preclude the auditor from withdrawing from the examination engagement.

## Subsequent Events

**30.** For the period from the end of the period specified in the broker's or dealer's assertions to the date of the auditor's examination report (the "subsequent period"), the auditor should perform procedures to identify subsequent events relevant to the auditor's conclusions about the assertions made by the broker or dealer in the compliance report. Such procedures should include, but are not limited to:

- a. Reading relevant reports of internal auditors, others who perform an equivalent function, compliance functions, and other auditors, and correspondence that the broker or dealer has sent to or received from the SEC or the broker's or dealer's DEA during the subsequent period that is relevant to the broker's or dealer's assertions; and
- b. Evaluating information obtained through other engagements performed by the auditor for the broker or dealer, including subsequent events procedures performed in the audit of the financial statements and the audit procedures performed on supplemental information.

**31.** The auditor should evaluate the results of the procedures described in the previous paragraph to determine whether the results corroborate or contradict the broker's or dealer's assertions.

## Obtaining a Representation Letter

**32.** The auditor should obtain written representations from management of the broker or dealer:

- a. Acknowledging management's responsibility for establishing and maintaining a system of internal control with the objective of providing the broker or dealer with reasonable assurance that any instances of noncompliance with the financial responsibility rules will be prevented or detected on a timely basis;
- b. Stating the broker's or dealer's assertions included in the compliance report are the responsibility of management;
- c. Stating that management has made available to the auditor all records and other information relevant to the broker's or dealer's assertions, including all known matters contradicting the assertions, and all communications from regulatory agencies, internal auditors, others who perform an equivalent function, compliance functions, and other auditors, that are relevant to the broker's or dealer's assertions, received through the date of the auditor's report; and
- d. Stating whether there were, subsequent to the period addressed in the broker's or dealer's assertions, any known events or other factors that might significantly affect the broker's or dealer's assertions.

**33.** The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the engagement, as described in Appendix C of this standard.

## Communication Requirements

**34.** The auditor should communicate to management all identified Deficiencies in Internal Control Over Compliance.

**35.** The auditor should communicate to management and the audit committee<sup>18</sup> identified instances of non-compliance with the financial responsibility rules, identified Material Weaknesses, and identified instances in which information used to determine compliance with the net capital rule or the reserve requirements rule was not derived, in all material respects, from the broker's or dealer's books and records.

Note: The auditor also must comply with the requirements of paragraph (h) of SEC Rule 17a-5, which contains notification requirements that apply to auditors of brokers and dealers.

## Reporting on the Examination Engagement

**36.** The auditor's examination report must include the following elements, modified as necessary in the circumstances and manner discussed in Appendix C:

- a. A title that includes the word *independent*;
- b. An identification of the compliance report and the broker's or dealer's assertions regarding the effectiveness of Internal Control Over Compliance during the fiscal year and as of the fiscal year end, compliance with the net capital rule and the reserve requirements rule as of the fiscal year end, and whether the information used to assert compliance with those rules was derived from the broker's or dealer's books and records;
- c. A statement that management of the broker or dealer is responsible for establishing and maintaining a system of internal control that has the objective of providing the broker or dealer with reasonable assurance that any instances of non-compliance with the financial responsibility rules will be prevented or detected on a timely basis;
- d. A statement that the auditor's responsibility is to express an opinion on the broker's or dealer's assertions based on his or her examination;
- e. A statement that the examination was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);
- f. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the examination engagement to obtain reasonable assurance about whether the broker's or dealer's Internal Control Over Compliance was effective during and as of the end of the most recent fiscal year, whether the broker or dealer complied with the net capital rule and the reserve requirements rule as of the end of the most recent fiscal year, and whether the information used to assert compliance with the net capital rule and the reserve requirements rule was derived from the books and records of the broker or dealer;
- g. A statement that an examination engagement includes evaluating the design and operating effectiveness of Internal Control Over Compliance; testing and evaluating the broker's or dealer's

---

<sup>18</sup> For purposes of this standard, the term "audit committee" has the same definition as that in Auditing Standard No. 16, *Communications with Audit Committees*.

compliance with the net capital rule and the reserve requirements rule; determining whether the information used to assert compliance with the net capital rule and reserve requirements rule was derived from the broker's or dealer's books and records; and performing such other procedures as the auditor considered necessary in the circumstances;

- h. A statement that the auditor believes the examination provides a reasonable basis for his or her opinion;<sup>19</sup>
- i. The auditor's opinion on whether the assertions made by the broker or dealer in the compliance report are fairly stated, in all material respects;
- j. The manual signature of the auditor's firm;
- k. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's examination report has been issued; and
- l. The date of the examination report.

**37.** The following example examination report expressing an unqualified opinion on the assertions made by a broker or dealer in a compliance report illustrates the report elements described in this section.

Report of Independent Registered Public Accounting Firm

*[Introductory paragraph]*

We have examined W Broker's statements, included in the accompanying *[title of the compliance report]*, that (1) W Broker's internal control over compliance was effective during the most recent fiscal year ended [date]; (2) W Broker's internal control over compliance was effective as of [date]; (3) W Broker was in compliance with 17 C.F.R. §§240.15c3-1 and 240.15c3-3(e) as of [date]; and (4) the information used to state that W Broker was in compliance with 17 C.F.R. §§240.15c3-1 and 240.15c3-3(e) was derived from W Broker's books and records. W Broker's management is responsible for establishing and maintaining a system of internal control over compliance that has the objective of providing W Broker with reasonable assurance that non-compliance with 17 C.F.R. §240.15c3-1, 17 C.F.R. §240.15c3-3, 17 C.F.R. §240.17a-13, or Rule [fill in name/number] of [fill in DEA] that requires account statements to be sent to the customers of W Broker will be prevented or detected on a timely basis. Our responsibility is to express an opinion on W Broker's statements based on our examination.

*[Scope paragraph]*

We conducted our examination in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the examination to obtain reasonable assurance about whether W Broker's internal control over compliance was effective as of and during the most recent fiscal year ended [date]; W Broker complied with 17 C.F.R. §§ 240.15c3-1 and 240.15c3-3(e) as of [date]; and the information used to assert compliance with 17 C.F.R. §§ 240.15c3-1 and 240.15c3-3(e) as of [date] was derived from W Broker's books and records. Our examination includes testing and evaluating the design and operating effectiveness of internal control over compliance, testing and evaluating W Broker's compliance with 17

---

<sup>19</sup> When management has made an interpretation of the financial responsibility rules and the auditor has determined that it is necessary to emphasize this interpretation in the auditor's report, the auditor may include a paragraph stating the description and the source of the interpretation made directly following the scope paragraph.

C.F.R. §§ 240.15c3-1 and 240.15c3-3(e), determining whether the information used to assert compliance with 240.15c3-1 and 240.15c3-3(e) was derived from W Broker's books and records, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

*[Opinion paragraph]*

In our opinion, W Broker's statements referred to above are fairly stated, in all material respects.

*[Signature]*

*[City and State or Country]*

*[Date]*

## Examination Report Date

**38.** The auditor should date the examination report no earlier than the date on which the auditor obtains sufficient appropriate evidence to support his or her opinion.

Note: Because of the coordination between the examination engagement, the audit of the financial statements and the audit procedures performed on supplemental information, the date of the examination report should not be earlier than the date of the auditor's report on the financial statements and supplemental information.

## Appendix A

### Definitions

**A1.** For purposes of this standard, the terms listed below are defined as follows:

**A2.** Deficiency in Internal Control Over Compliance—A Deficiency in Internal Control Over Compliance exists when the design or operation of a control does not allow the management or employees of the broker or dealer, in the normal course of performing their assigned functions, to prevent or detect on a timely basis non-compliance with 17 C.F.R. § 240.15c3-1, § 240.15c3-3, § 240.17a-13 or any rule of the designated examining authority of the broker or dealer that requires account statements to be sent to the customers of the broker or dealer.<sup>1</sup>

**A3.** Internal Control Over Compliance—Internal controls that have the objective of providing the broker or dealer with reasonable assurance that non-compliance with 17 C.F.R. § 240.15c3-1, § 240.15c3-3, § 240.17a-13, or any rule of the designated examining authority of the broker or dealer that requires account statements to be sent to the customers of the broker or dealer, will be prevented or detected on a timely basis.<sup>2</sup>

**A4.** Material Weakness—A Material Weakness is a deficiency, or a combination of deficiencies, in Internal Control Over Compliance such that there is a reasonable possibility that non-compliance with 17 C.F.R. § 240.15c3-1 or 17 C.F.R. § 240.15c3-3(e) will not be prevented or detected on a timely basis or that non-compliance to a material extent with 17 C.F.R. § 240.15c3-3, except for paragraph (e), 17 C.F.R. § 240.17a-13, or any rule of the designated examining authority of the broker or dealer that requires account statements to be sent to the customers of the broker or dealer will not be prevented or detected on a timely basis.<sup>3</sup>

---

<sup>1</sup> The definition of "Deficiencies in Internal Control Over Compliance" is consistent with the same term in paragraph (d)(3)(iii) of SEC Rule 17a-5.

<sup>2</sup> The definition of "Internal Control Over Compliance" is consistent with the same term in paragraph (d)(3)(ii) of SEC Rule 17a-5.

<sup>3</sup> The definition of a "Material Weakness" is consistent with the same term in paragraph (d)(3)(iii) of SEC Rule 17a-5.

## Appendix B

### Considerations for Brokers and Dealers with Multiple Divisions or Branches

**B1.** When the broker or dealer has multiple divisions or branches, the auditor should determine the extent to which he or she should perform examination procedures at selected divisions or branches to obtain sufficient appropriate evidence to support the conclusions expressed in the auditor's examination report. This includes determining the divisions or branches at which to perform examination procedures, as well as the nature, timing, and extent of the procedures to be performed at those individual divisions or branches. In determining the extent of the examination procedures to be performed, the auditor should take into account:

- a. The degree to which the financial responsibility rules relate to activities at the division or branch level;
- b. The nature and significance of the related assets, transactions, or activities at the division or branch to the financial responsibility rules;
- c. The degree of centralization of records or information processing relevant to the financial responsibility rules; and
- d. The degree and effectiveness of management supervision and monitoring of the relevant activities of the division or branch.

## Appendix C

### Examination Report Modifications

**C1.** The auditor should modify his or her examination report if any of the following conditions exist:

- a. There is non-compliance with the net capital rule or the reserve requirements rule as of the end of the most recent fiscal year, one or more Material Weaknesses in Internal Control Over Compliance during or as of the end of the most recent fiscal year, or the information used to assert compliance with the net capital rule or the reserve requirements rule was not derived, in all material respects, from the books and records of the broker or dealer (paragraphs C2-C3).
- b. There is a restriction on the scope of the examination engagement (paragraphs C4-C8).
- c. There is information other than the assertions and descriptions required under paragraph (d)(3)(i) of SEC Rule 17a-5 contained in the compliance report (paragraphs C9-C10).

### Non-Compliance, Material Weakness, or Instance in which Information Used to Assert Compliance was not Derived from the Broker's or Dealer's Books and Records

**C2.** If (1) one or more instances of non-compliance with the net capital rule or the reserve requirements rule exist as of the end of the fiscal year; (2) one or more Material Weaknesses in Internal Control Over Compliance exist during or as of the end of the fiscal year; or (3) the information used to assert compliance with the net capital rule or the reserve requirements rule was not derived, in all material respects, from the books and records of the broker or dealer, the auditor must express an adverse opinion directly on the subject matter of the respective assertions, rather than on the assertions themselves, unless there is a restriction on the scope of the examination engagement.

Note: The requirement in this paragraph to express an adverse opinion applies regardless of whether the non-compliance, Material Weakness, or other matters preventing the unqualified opinion were identified by management or by the auditor.

**C3.** When expressing such an adverse opinion, the auditor's examination report should include, as applicable:

- a. A statement that non-compliance with the net capital rule or the reserve requirements rule has been identified and an identification of each instance of non-compliance described in the broker's or dealer's compliance report as of the end of the most recent fiscal year.
- b. A statement that one or more Material Weaknesses in Internal Control Over Compliance have been identified during the fiscal year and an identification of each Material Weakness described in the compliance report.
- c. A statement that one or more Material Weaknesses in Internal Control Over Compliance have been identified as of the end of

the fiscal year and an identification of each Material Weakness described in the compliance report.

- d. A statement that one or more instances in which the information used to assert compliance with the net capital rule or the reserve requirements rule was not derived, in all material respects, from the broker's or dealer's books and records have been identified.

Note: If a description of all identified instances of noncompliance with the net capital rule or the reserve requirements rule and all identified Material Weaknesses has not been included in the broker's or dealer's compliance report, the examination report must be modified to describe those instances of non-compliance or Material Weaknesses that the auditor has identified but that are not described in the broker's or dealer's compliance report.<sup>1</sup>

## Scope Limitations

**C4.** The auditor can express an opinion on whether the assertions made by a broker or dealer in a compliance report are fairly stated, in all material respects, only if the auditor has been able to apply the procedures necessary in the circumstances. If there are restrictions on the scope of the examination engagement, the auditor should withdraw from the engagement or disclaim an opinion. A disclaimer of opinion should state that the auditor does not express an opinion on the assertions made by the broker or dealer in the compliance report.

**C5.** When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the examination engagement was not sufficient for the auditor to express an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer, including the procedures that were deemed necessary by the auditor that have been omitted and the reason for their omission. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an examination engagement.

**C6.** When the auditor plans to disclaim an opinion and the limited procedures performed by the auditor caused the auditor to conclude that: (1) one or more instances of non-compliance with the net capital rule or the reserve requirements rule existed as of the end of the fiscal year; (2) one or more Material Weaknesses in Internal Control Over Compliance existed during or as of the end of the most recent fiscal year; or (3) the information used to assert compliance with the net capital rule or the reserve requirements rule was not derived, in all material respects, from the books and records of the broker or dealer, the auditor's report also must include the matters described in paragraph C3, as applicable.

**C7.** The auditor may issue a report disclaiming an opinion on the assertions made by a broker or dealer in a compliance report as soon as the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion. The auditor is not required to perform any additional work before issuing a disclaimer when the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion.

---

<sup>1</sup> Paragraphs (d)(3)(i)(B) and (C) of SEC Rule 17a-5 require the broker's or dealer's compliance report to contain a description of each material weakness in Internal Control Over Compliance during the most recent fiscal year and any instance of non-compliance with the net capital rule or the reserve requirements rule as of the end of the most recent fiscal year.

Note: In this case, in following the direction in paragraph 38 of this standard regarding dating the auditor's examination report, the report date is the date on which the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion.

**C8.** If the auditor concludes that he or she cannot express an opinion because of a limitation on the scope of the examination engagement, the auditor should communicate on a timely basis, in writing, to management and the audit committee that the examination engagement cannot be satisfactorily completed.

### Other Information in the Compliance Report

**C9.** If the compliance report contains other information besides the statements and descriptions required by SEC Rule 17a-5,<sup>2</sup> the auditor should disclaim an opinion on the other information.

**C10.** If the auditor believes that the other information in the compliance report contains a material misstatement of fact, he or she should discuss the matter with management of the broker or dealer. If, after discussing the matter with management, the auditor concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee of the auditor's views concerning the information.<sup>3</sup>

---

<sup>2</sup> See paragraph (d)(3)(i) of SEC Rule 17a-5.

<sup>3</sup> See also AU sec. 317, *Illegal Acts by Clients*, which describes the auditor's responsibilities in a financial statement audit regarding illegal acts.

### PCAOB Release No. 2013-007

October 10, 2013  
PCAOB Rulemaking  
Docket Matter No. 035

#### Summary

After public comment, the Public Company Accounting Oversight Board ("PCAOB" or the "Board") is adopting two new attestation standards, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, and *Review Engagements Regarding Exemption Reports of Brokers and Dealers*. The Board is also adopting related amendments to certain PCAOB standards. The attestation standards and related amendments will be applicable to all registered firms conducting attestation engagements related to broker and dealer compliance or exemption reports required by the U.S. Securities and Exchange Commission ("SEC" or "Commission").

#### Board Contacts

Keith Wilson, Deputy Chief Auditor (202/207-9134, wilsonk@pcaobus.org), Barbara Vanich, Associate Chief Auditor (202/207-9363, vanichb@pcaobus.org), and Nicholas Grillo, Assistant Chief Auditor (202/207-9104, grillon@pcaobus.org).

\* \* \* \* \*

#### I. Introduction

On July 30, 2013, the SEC adopted amendments to Rule 17a-5<sup>1</sup> under the Securities Exchange Act of 1934 ("Exchange Act") to strengthen and clarify broker and dealer annual financial reporting requirements and also facilitate the ability of the PCAOB to implement the oversight of independent public accountants of brokers<sup>2</sup> and dealers<sup>3</sup> provided by Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act").<sup>4</sup>

The Board is adopting two attestation standards, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers* (the "examination standard") and *Review Engagements Regarding Exemption Reports of Brokers and*

---

<sup>1</sup> See Rule 17a-5, 17 C.F.R. §240.17a-5 ("SEC Rule 17a-5") and SEC Exchange Act Release No. 34-70073, *Broker-Dealer Reports* (July 30, 2013), 78 Federal Register 51910 (August 21, 2013) ("SEC Release"), available at <http://www.sec.gov/rules/final/2013/34-70073.pdf>.

<sup>2</sup> According to PCAOB Rule 1001(b)(iii), the term "broker" means a broker (as defined in Section 3(a)(4) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>3</sup> According to PCAOB Rule 1001(d)(iii), the term "dealer" means a dealer (as defined in Section 3(a)(5) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>4</sup> Pub. L. No. 111-203, 124 Stat. 1376 (2010).

*Dealers* (the "review standard") (collectively, the "attestation standards"). These attestation standards will apply to examination engagements regarding compliance reports of brokers and dealers ("examination engagements") and review engagements regarding exemption reports of brokers and dealers ("review engagements"), pursuant to requirements contained in SEC Rule 17a-5.<sup>5</sup> Pursuant to SEC Rule 17a-5, the audits of brokers and dealers, including the attestation engagements covered by this release, are required to be performed under PCAOB standards.<sup>6</sup> Before these amendments to SEC Rule 17a-5, audits of brokers and dealers were required to be performed under generally accepted auditing standards ("GAAS") established by the American Institute of Certified Public Accountants ("AICPA"). The attestation standards will be effective, subject to approval by the SEC, for examination engagements and review engagements for fiscal years ending on or after June 1, 2014. This effective date would coincide with the effective date for the corresponding amendments to SEC Rule 17a-5.

## II. Background

Sections 17(a) and (e) of the Exchange Act and SEC Rule 17a-5 together generally require a broker or dealer to, among other things, file an annual report<sup>7</sup> with the SEC and the broker's or dealer's designated examining authority ("DEA").<sup>8</sup> SEC Rule 17a-5 requires the annual report to contain, among other things:

- a. A financial report consisting of audited financial statements and supporting schedules;<sup>9</sup> and
- b. A compliance report or an exemption report.<sup>10</sup>

The requirements for the compliance report and the exemption report are new requirements that are the result of the Commission's amendments to SEC Rule 17a-5. According to the SEC, these reports contain information regarding broker and dealer compliance with key SEC financial responsibility rules<sup>11</sup> that enhance the ability of the SEC to oversee the financial responsibility practices of registered brokers and dealers and, in particular, the safekeeping of customer assets.

<sup>5</sup> See paragraphs (g)(2)(i) and (ii) of SEC Rule 17a-5.

<sup>6</sup> See paragraph (g) of SEC Rule 17a-5.

<sup>7</sup> Paragraph (d) of SEC Rule 17a-5 contains general requirements for annual reports to be filed by SEC-registered brokers and dealers. Paragraphs (d)(1)(iii) and (iv) of SEC Rule 17a-5 provide certain limited exceptions to the requirement to file an annual report.

<sup>8</sup> Under SEC Rule 17d-1, 17 C.F.R. § 240.17d-1, a registered broker or dealer that is a member of more than one securities self-regulatory organization may be assigned a "designated examining authority" or "DEA" that is responsible for examining the broker or dealer for compliance with SEC financial responsibility rules. An example of a securities self-regulatory organization that is a designated examining authority is the Financial Industry Regulatory Authority.

<sup>9</sup> See paragraph (d)(2) of SEC Rule 17a-5. Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements* (PCAOB Release No. 2013-008) (October 10, 2013), applies to the audit procedures performed and the audit report on supporting schedules.

<sup>10</sup> See paragraphs (d)(3) and (4) of SEC Rule 17a-5. The attestation standard in Appendix 1 of this release applies to an examination of certain statements made by the broker or dealer in the compliance report. The attestation standard in Appendix 2 of this release applies to a review of the statements made by the broker or dealer in the exemption report.

<sup>11</sup> The SEC Release used the term "financial responsibility rules" to refer to: 17 C.F.R. § 240.15c3-1 ("SEC Rule 15c3-1" or the "net capital rule"); 17 C.F.R. § 240.15c3-3 ("SEC Rule 15c3-3"); 17 C.F.R. § 240.17a-13 ("SEC Rule 17a-13"); and any rule of the DEA of the broker or dealer that requires account statements to be sent to the customers of the broker or dealer (an "account statement rule"). See the SEC Release at 8-9. The terms "financial responsibility rules" and "account statement rule" have the same meaning in these standards as they have in the SEC Release.

Generally, SEC Rule 17a-5 provides that brokers or dealers that did not claim an exemption from SEC Rule 15c3-3 throughout the most recent fiscal year must prepare and file the compliance report. A broker or dealer must prepare and file the exemption report if the broker or dealer did claim that it was exempt from SEC Rule 15c3-3 throughout the most recent fiscal year.

Brokers and dealers also must generally file reports prepared by a PCAOB registered independent public accountant covering the financial report and the compliance report or exemption report, as applicable.<sup>12</sup>

The auditor's examination report or review report would replace the prior requirement in SEC Rule 17a-5 that the auditor report on material inadequacies identified in the broker's or dealer's accounting system, internal accounting controls, procedures of the broker or dealer for safeguarding securities, and certain practices and procedures related to customer protection and securities.

### III. Considerations in Adopting the Attestation Standards

The Board is adopting the attestation standards to establish requirements aligned with the auditor's responsibilities under SEC Rule 17a-5.<sup>13</sup> Specifically, the attestation standards establish requirements for examining certain statements in a broker's or dealer's compliance report and reviewing a broker's or dealer's statements in an exemption report. The Board is also adopting related amendments to certain PCAOB standards, including amendments regarding documentation and amendments to require engagement quality reviews of the examination and the review engagements.<sup>14</sup>

The attestation standards for the examination and review engagements, included in appendices 1 and 2 of this release, represent stand-alone standards that are based on existing concepts and principles in the existing attestation standards but are tailored for the specific requirements under SEC Rule 17a-5.<sup>15</sup>

In general, both standards set forth a framework of specific procedures that are required for auditors to opine or conclude on a broker's or dealer's statements—referred to in the standards as "assertions"<sup>16</sup>—in compliance reports and exemption reports required by SEC Rule 17a-5, respectively.<sup>17</sup>

---

<sup>12</sup> See paragraph (d)(1)(i)(C) of SEC Rule 17a-5.

<sup>13</sup> See paragraphs (g) and (h) of SEC Rule 17a-5.

<sup>14</sup> In addition, on February 28, 2012, the Board proposed to update certain of its rules to conform to the Dodd-Frank Act amendments to the Sarbanes-Oxley Act of 2002. See *Proposed Amendments to Conform the Board's Rules and Forms to the Dodd-Frank Act and Make Certain Updates and Clarifications*, PCAOB Release No. 2012-002 (February 28, 2012). Among other things, these proposed amendments would amend the Board's rules to require that registered firms comply with the Board's interim standards in broker or dealer engagements. See proposed amendments to Rule 1001(a)(v), Rule 1001(a)(vi), Rule 3200T, and Rule 3300T, Rule 3400T, Rule 3500T, and Rule 3600T. The Board expects to act on these proposed amendments in a separate rulemaking in the near future.

<sup>15</sup> The requirements in the examination standard are generally consistent with the requirements of AT sec. 101, *Attest Engagements*, and AT sec. 601, *Compliance Attestation*. Similarly, the requirements in the review standard are generally consistent with AT sec. 101. However, when an auditor performs an engagement pursuant to the examination standard or a review pursuant to the review standard, AT sec. 101 and AT sec. 601 would not apply.

<sup>16</sup> These standards use the term "assertion" to refer to the broker's or dealer's individual statements that are covered by the examination and review. In the examination standard, the term "assertion" also distinguishes the portion of the statements in the broker's or dealer's compliance report that are covered by the examination.

<sup>17</sup> See paragraphs (i)(3)(iii)(A) and (B) of SEC Rule 17a-5 for the specific requirement for an opinion or conclusion to be expressed in the auditor's report.

Furthermore, both of the attestation standards emphasize coordination between the examination engagement or review engagement, the audit of the broker's or dealer's financial statements and audit procedures performed on the supporting schedules (referred to in this release as "supplemental information"). This emphasis on coordination, when properly executed, can promote overall audit effectiveness and avoid redundancy in the work performed. For example, auditors can take into account, when appropriate, evidence obtained while planning and performing the audit of the financial statements and the audit procedures performed on supplemental information in planning and performing the attestation engagement.

This emphasis on coordination is also a key aspect of Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements* (the "auditing standard"),<sup>18</sup> which the Board is separately adopting. Auditing Standard No. 17 will apply when the auditor of the financial statements is engaged to perform audit procedures and report on supplemental information accompanying audited financial statements in accordance with PCAOB standards, including supporting schedules prepared pursuant to SEC Rule 17a-5.<sup>19</sup> The auditing standard also includes requirements for the procedures on the supplemental information to be planned and performed in conjunction with the audit of the financial statements, and for the audits of brokers and dealers to be coordinated with the attestation engagements related to compliance or exemption reports.<sup>20</sup>

In the Board's view, the attestation standards further the public interest and promote investor protection because they are tailored to the corresponding requirements of SEC Rule 17a-5, which are designed to provide safeguards with respect to broker and dealer custody of customer securities and funds. For example, the specific requirements in the examination standard for evaluating Internal Control Over Compliance<sup>21</sup> can help auditors to identify deficiencies in a broker's or dealer's internal controls for safeguarding customer securities and funds or maintaining necessary capital or reserves. Similarly, the specific requirements in the review standard should focus auditors on whether the broker or dealer appropriately meets the exemption provisions in paragraph (k) of SEC Rule 15c3-3.

Also, the SEC Release states that SEC enforcement actions alleging fraudulent conduct by brokers and dealers highlight the need for enhancements to the rules governing broker and dealer custody of customer assets, including increased focus on compliance and internal compliance controls by brokers and dealers and their auditors.<sup>22</sup> The attestation standards include requirements related to the auditor's consideration of fraud risks, including the risk of misappropriation of customer assets. The new standard includes requirements for testing controls of the broker or dealer for safeguarding customer assets and funds and for performing procedures to obtain evidence about the existence of customer funds and securities held for customers.

Furthermore, PCAOB inspections staff in their inspections of broker and dealer audits have identified auditing deficiencies in 57 of 60 audits that

---

<sup>18</sup> See Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements*, PCAOB Release No. 2013-008 (October 10, 2013).

<sup>19</sup> See paragraph (d)(2) of SEC Rule 17a-5.

<sup>20</sup> See the note to paragraph 3.c. of Auditing Standard No. 17.

<sup>21</sup> Consistent with SEC Rule 17a-5, the examination standard defines "Internal Control Over Compliance" as "internal controls that have the objective of providing the broker or dealer with reasonable assurance that non-compliance with the [financial responsibility rules], will be prevented or detected on a timely basis." See paragraph (d)(3)(ii) of SEC Rule 17a-5.

<sup>22</sup> See the SEC Release at 206-207.

were conducted under GAAS and the prior SEC Rule 17a-5.<sup>23</sup> The attestation standards—tailored for the new audit and reporting requirements under SEC Rule 17a-5—establish an approach specific to examining compliance reports and reviewing exemption reports that should provide greater clarity as to the procedures that should be used and facilitate consistent compliance for auditors of SEC registered brokers and dealers.

The financial responsibility rules serve an important investor protection function by requiring brokers and dealers to maintain minimum levels of net capital and take steps to safeguard customer securities and cash.<sup>24</sup> As described in the SEC Release, the new requirements for engagement of accountants should result in higher levels of compliance with the financial responsibility rules by increasing the focus of carrying brokers and dealers and their independent public accountants on specific statements made in compliance reports and increasing the focus of non-carrying brokers and dealers and their independent public accountants regarding whether the broker or dealer meets applicable exemption provisions.<sup>25</sup> Moreover, in the Board's view, the involvement of auditors, under the attestation standards and PCAOB oversight, should enhance the quality of the compliance information provided to the SEC and used in its regulatory oversight, which is important to the protection of investors who entrust their cash and securities with brokers and dealers.

## A. Consideration of Comments Received

In developing the attestation standards, the Board also considered comments received. On July 12, 2011, the Board proposed two attestation standards, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers* ("proposed examination standard"), and *Review Engagements Regarding Exemption Reports of Brokers and Dealers* ("proposed review standard") (collectively, the "proposed attestation standards") and related amendments to PCAOB standards. The proposed attestation standards were developed to align the standards of the PCAOB with the SEC's 2011 proposed amendments to SEC Rule 17a-5 ("SEC Proposed Rule 17a-5"),<sup>26</sup> which included requirements for brokers and dealers to engage auditors to perform either a compliance examination engagement or review engagement, whichever would be required pursuant to the SEC's proposed amendments.

The Board received eleven comment letters on the proposed attestation standards. Commenters generally were supportive of the Board's efforts to draft attestation standards applicable to brokers and dealers and the Board's efforts to align the attestation standards with the Commission's proposed amendments to SEC Rule 17a-5. Commenters provided observations and comments on certain requirements and other specific aspects of the attestation standards and related amendments to PCAOB standards. Many of the significant comments, which dealt with the meaning of the term "material non-compliance" in the context of the auditor's examination of the broker's or dealer's assertions in the compliance report, are no longer applicable because of subsequent changes made by the SEC in its adoption of final amendments to SEC Rule 17a-5. The Board did, however, revise the attestation standards in response to certain of

<sup>24</sup> See the SEC Release at 255.

<sup>25</sup> See the SEC Release at 238.

<sup>26</sup> See SEC Exchange Act Release No. 34-64676, *Broker-Dealer Reports* (June 15, 2011), 76 Federal Register 37572 (June 27, 2011).

the comments received. Also, the Board made revisions to the standards in view of the final requirements contained in the SEC's amendments. Such changes are intended to align the Board's attestation standards with the SEC's requirements. Section IV below summarizes the key points and changes made to the attestation standards. Appendix 4 discusses the significant comments received on the proposed attestation standards in greater detail, as well as the revisions to the attestation standards.

## IV. Overview of the Attestation Standards

### A. Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*

The examination standard, which is presented in Appendix 1, establishes requirements for the auditor with respect to the auditor's examination regarding a broker's or dealer's compliance report. Consistent with SEC Rule 17a-5, the examination standard requires auditors to obtain sufficient appropriate evidence to opine on a broker's or dealer's statements in its compliance report as to whether:

- The Internal Control Over Compliance of the broker or dealer was effective during the most recent fiscal year;
- The Internal Control Over Compliance of the broker or dealer was effective as of the end of the most recent fiscal year;
- The broker or dealer was in compliance with the net capital rule and 17 C.F.R. § 240.15c3-3(e) (the "reserve requirements rule") as of the end of the most recent fiscal year; and
- The information the broker or dealer used to state whether it was in compliance with the net capital rule and reserve requirements rule was derived from the books and records of the broker or dealer.<sup>27</sup>

The examination standard provides requirements for auditors that:

- Focus the auditor on the matters that are most important to the auditor's conclusions regarding the broker's or dealer's assertions;
- Incorporate consideration of fraud risks, including the risk of misappropriation of customer assets;
- Are designed to be scalable based on the broker's or dealer's size and complexity;
- Coordinate the examination engagement with the audit of the financial statements and the audit procedures performed on supplemental information; and
- Describe how to report on an examination engagement, in connection with the requirements of SEC Rule 17a-5.

---

<sup>27</sup> See paragraphs (d)(3)(i)(A)(2),(3),(4), and (5), (g)(2)(i), and (i)(3)(iii)(A) of SEC Rule 17a-5. The scope of the auditor's examination does not encompass the statement as to whether the broker or dealer has established and maintained Internal Control Over Compliance required by paragraph (d)(3)(i)(A)(1) of SEC Rule 17a-5.

The examination standard retains the requirement that the auditor obtain reasonable assurance to support the auditor's opinion. In particular, the examination standard requires the auditor to obtain reasonable assurance in order to opine on whether the broker's or dealer's assertions are fairly stated, in all material respects. This replaces the requirement to obtain reasonable assurance in prior SEC Rule 17a-5, which stated that "[t]he scope of the audit and review of the accounting system, the internal control and procedures for safeguarding securities shall be sufficient to provide reasonable assurance that any material inadequacies existing at the date of the examination in (a) the accounting system; (b) the internal accounting controls; (c) procedures for safeguarding securities; and (d) the practices and procedures whose review is specified [in SEC Rule 17a-5] would be disclosed."<sup>28</sup>

The examination standard reflects changes from the proposed standard to align with SEC Rule 17a-5 and in light of comments received. Significant revisions include the following:

- The auditor's reporting requirements were revised to align with the statements of the broker or dealer pursuant to SEC Rule 17a-5;
- The requirements for auditor testing of controls over compliance were revised to cover internal controls over compliance both as of the end of the fiscal year and during the fiscal year, as provided by SEC Rule 17a-5; and
- The requirements for auditors to test for compliance were revised in view of the changes to SEC Rule 17a-5 to focus specifically on testing compliance with the net capital rule and reserve requirements rule.

Appendix 4 discusses further the revisions reflected in the examination standard.

## **B. Attestation Standard No. 2, Review Engagements Regarding Exemption Reports of Brokers and Dealers**

The review standard, which is presented in Appendix 2, establishes requirements for the auditor with respect to the auditor's review regarding the broker's or dealer's exemption report. Consistent with SEC Rule 17a-5, the review standard establishes requirements that apply when an auditor is engaged to perform a review of the broker's or dealer's statements in an exemption report.<sup>29</sup>

Like the examination standard, the review standard establishes requirements that are designed specifically for the review required by SEC Rule 17a-5.<sup>30</sup> The review standard establishes requirements for making inquiries and performing

---

<sup>28</sup> Prior to the amendments, SEC Rule 17a-5 provided that "[a]dditionally, as specific objectives, the audit shall include reviews of the practices and procedures followed by the client: (i) In making the periodic computations of aggregate indebtedness and net capital under 17 C.F.R. § 240.17a-3(a)(11) and the reserve required by 17 C.F.R. § 240.15c3-3(e); (ii) In making the quarterly securities examinations, counts, verifications and comparisons and the recordation of differences required by 17 C.F.R. § 240.17a-13; (iii) In complying with the requirement for prompt payment for securities of section 4(c) of Regulation T (§ 220.4(c) of chapter II of title 12) of the Board of Governors of the Federal Reserve System; and (iv) In obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by 17 C.F.R. § 240.15c3-3. Such review shall include a determination as to the adequacy of the procedures described in the records required to be maintained pursuant to 17 C.F.R. § 240.15c3-3(d)(4)."

<sup>29</sup> See paragraphs (d)(4) and (g)(2)(ii) of SEC Rule 17a-5.

<sup>30</sup> *Id.*

other procedures that are commensurate with the auditor's responsibility to obtain moderate assurance<sup>31</sup> regarding whether one or more conditions exist that would cause one or more of the broker's or dealer's assertions not to be fairly stated, in all material respects. The broker's or dealer's exemption report includes the following assertions:

- A statement that identifies the provisions in paragraph (k) of SEC Rule 15c3-3 (the "exemption provisions") under which the broker or dealer claimed an exemption from SEC Rule 15c3-3 (the "identified exemption provisions");
- A statement that the broker or dealer (1) met the identified exemption provisions throughout the most recent fiscal year without exception or (2) met the identified exemption provisions throughout the most recent fiscal year except as described in the exemption report; and
- If applicable, a statement that identifies each exception during the most recent fiscal year in meeting the identified exemption provisions (an "exception") and that briefly describes the nature of each exception and the approximate date(s) on which the exceptions existed.<sup>32</sup>

The auditor's review report regarding a broker's or dealer's exemption report replaces the statement provided by auditors under the prior SEC rules. Before the amendments, SEC Rule 17a-5 provided that the auditor engaged by the broker or dealer must "ascertain that the conditions of the exemption were being complied with as of the examination date and that no facts came to the independent public accountant's attention to indicate that the exemption had not been complied with during the period since the independent public accountant's last examination."

The procedures required by the review standard include evaluating relevant evidence obtained from the audit of the financial statements and the audit procedures performed on supplemental information and are designed to enable the auditor to scale the review engagement based on the broker's or dealer's size and complexity. The review standard also establishes requirements for the content of the review report.

The review standard reflects changes from the proposed standard to align the standard with SEC Rule 17a-5 and in light of comments received. Significant revisions include the following:

- The requirements of the standard were revised to include consideration of disclosure of exceptions to the exemption provisions, as provided by SEC Rule 17a-5; and
- The auditor's reporting requirements were revised to align with the statements of the broker or dealer pursuant to SEC Rule 17a-5.

---

<sup>31</sup> Obtaining moderate assurance in a review engagement is consistent with both existing PCAOB standards and the SEC Release. AT sec. 101.55 describes a review as an attest engagement designed to provide a moderate level of assurance. See the SEC Release at 88, which states that a "moderate level of assurance [is] contemplated by the required review."

<sup>32</sup> See paragraph (d)(4) of SEC Rule 17a-5.

## V. Economic Considerations, including Audits of Emerging Growth Companies

### A. Economic Considerations

This release, and the related appendices, provide additional detail regarding the background and need for the new attestation standards; significant comments received; and alternatives considered. As discussed below, the Board also considered the economic consequences of the new standards.<sup>33</sup>

As noted above, in developing the attestation standards, the Board's objective was to consider the SEC's amendments to SEC Rule 17a-5 and evaluate whether its standards were appropriate for the SEC's requirements for examinations of compliance reports and reviews of exemption reports.

As part of its process, the Board also considered the SEC's economic analysis related to its amendments to SEC Rule 17a-5. The SEC's analysis considers the economic effects, including the benefits and costs, of the new examinations of compliance reports and reviews of exemption reports that are now required by the SEC to be filed by registered brokers and dealers pursuant to SEC Rule 17a-5 and includes considerations relating to efficiency, competition, and capital formation.<sup>34</sup>

The SEC's economic analysis considered the Board's proposed attestation standards. As described in the SEC Release, after considering the views of commenters relating to anticipated costs, including with respect to the Board's proposed attestation standards, the SEC concluded that, while the total costs associated with the new compliance and review requirements would depend on the final PCAOB standards for attestation engagements, "as the PCAOB's proposed standards were tailored to the proposed amendments, nothing in those standards causes the Commission to change its estimates of the costs associated with these requirements, or to question that the benefits will justify the costs."<sup>35</sup> The Board notes that, as adopted, the new attestation standards are aligned with SEC Rule 17a-5, and most of the differences between the proposed standards and the attestation standards in this release result from changes to conform to the SEC's final amendments to SEC Rule 17a-5.

In addition to considering the SEC's requirements and economic analysis, the Board also took into account other related economic considerations as discussed below.

#### 1. Economic Baseline

The SEC made the determination to require brokers and dealers to include in their annual reports either a compliance report that is examined by an auditor or an exemption report that is reviewed by an auditor.

---

<sup>33</sup> The Board did not specifically request comments that attempted to quantify costs related to the attestation standards, but the Board did request comment on the appropriateness of the standards and received comments that pertained to audit effort and related costs that it considered. The discussion in this section reflects the Board's qualitative assessment of the standards.

<sup>34</sup> See the SEC Release, which discusses costs and benefits of the requirements for examined compliance reports and reviewed exemption reports at 226-245.

<sup>35</sup> See the SEC Release at 241.

Therefore, the SEC Release contains a discussion of the economic baseline in its economic analysis. Aspects of the SEC's discussion of the baseline that are relevant to the attestation standards include:

- Before the SEC's amendments, Rule 17a-5 required that the audit under GAAS include a "review" of the broker's or dealer's accounting system, internal accounting control, and procedures for safeguarding securities.<sup>36</sup> The scope of the auditor's work was required to be sufficient to provide reasonable assurance that any material inadequacies<sup>37</sup> existing as of the date of the examination would be disclosed.
- Before the SEC's amendments, if the broker or dealer was exempt from the reserve requirements rule, the auditor was required to ascertain that the conditions of the exemption were being complied with as of the examination date and that no facts came to the auditor's attention to indicate that the exemption had not been complied with during the period since the last examination.

Under the SEC's amendments, audits of brokers and dealers are now required to be conducted in accordance with PCAOB standards, the material inadequacy report has been replaced with an examination of the compliance report, and the requirement to ascertain compliance with the exemption conditions has been replaced with a review of the exemption report.

## 2. Consideration of Alternatives and Additional Considerations

In general, the Board sought to evaluate whether its attestation standards were appropriate for performing and reporting on the newly required examinations and reviews. The SEC is a key user of the new reports, which serve to facilitate the SEC's compliance oversight function. Accordingly, the Board's standards for those engagements needed to reflect a compliance focus and needed to be aligned with the requirements in SEC Rule 17a-5.

The Board considered two principal alternatives: (1) issuing guidance on applying existing PCAOB attestation standards to the new examination and review engagements, or (2) developing standards tailored to the requirements of SEC Rule 17a-5. In considering the first alternative, the Board observed that auditors performing examinations of compliance reports would need to look to a patchwork of requirements in existing attestation standards, including AT sec. 101 and AT sec. 601, and apply them to the new examination of the compliance report and review of the exemption report. This could lead to more inconsistencies in compliance with the SEC's rule as compared to a tailored standard that sets forth the necessary procedures for complying with the SEC's rule.

The Board preliminarily determined that a broker and dealer specific approach to examining compliance reports and reviewing exemption reports that is

---

<sup>36</sup> See the SEC Release at 70.

<sup>37</sup> Prior to the SEC's amendments, paragraph (g)(3) of Rule 17a-5 described a "material inadequacy" in a broker's or dealer's accounting system, internal accounting controls, procedures for safeguarding securities, and practices and procedures to include "any condition which has contributed substantially to or, if appropriate corrective action is not taken, could reasonably be expected to: (i) inhibit a broker-dealer from promptly completing securities transactions or promptly discharging its responsibilities to customers, other broker-dealers or creditors; (ii) result in material financial loss; (iii) result in material misstatements of the broker-dealer's financial statements; or (iv) result in violations of the Commission's recordkeeping or financial responsibility rules to an extent that could reasonably be expected to result in the conditions described in [(i) through (iii)] above." See the SEC Release at 70, footnote 287.

tailored to the SEC's rule would promote consistent audit practices and compliance with the SEC's rule because auditors could more readily determine the procedures necessary to meet the requirements for reasonable assurance in the examination and moderate assurance in the review. The greater clarity also can help facilitate more efficient use of audit resources, which can help mitigate the associated costs. Since the Board's initial proposal, the high level of auditing deficiencies observed by PCAOB inspections of audits of brokers and dealers under pre-existing standards have underscored the Board's initial concerns about the need for standards that facilitate more consistent compliance with the SEC's rule.<sup>38</sup>

In developing the new standards, the Board took into account economic considerations, including taking note of commenters' views on the proposed attestation standards. The Board's approach is intended to focus and streamline the auditor's work in order to promote overall audit effectiveness and avoid duplicative procedures. The Board sought to ease the transition to the new standards and help lessen the effect of associated costs by:

- Building on principles and concepts in existing attestation standards, such as the general requirements in AT sec. 101, and the risk-based principles for testing controls as set forth in Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*;
- Focusing the auditor's attention on the most important matters related to the objective of the examination or review, as applicable, including addressing the risk of misappropriation of customer assets;
- Requiring coordination of the attestation standards with the audit of the financial statements and audit procedures on the supplemental information, to enhance the effectiveness of the coordinated work and avoid unnecessary duplication of work;<sup>39</sup> and
- Establishing risk-based approaches for the examination and review that are scalable—that is, the required audit effort is commensurate with the broker's or dealer's size and complexity<sup>40</sup>—and that facilitate consistent compliance with SEC Rule 17a-5.

The Board also considered commenters' views. Commenters on the Board's proposed attestation standards generally agreed that the proposed standards were

---

<sup>38</sup> See PCAOB Release 2013-006, which reports that PCAOB inspection staff identified auditing deficiencies in 57 of the 60 audits of brokers and dealers selected for inspection and that deficiencies in compliance with audit requirements for brokers and dealers under the Exchange Act that were among the most frequently noted by PCAOB inspection staff included deficiencies in audit procedures related to net capital and customer reserve supporting schedules, compliance with the conditions of the exemption claimed by the broker or dealer, and the accountant's supplemental report on material inadequacies. See PCAOB Release 2013-006, Executive Summary, at ii.

<sup>39</sup> By its terms, SEC Rule 17a-5 requires the financial statement audit and the compliance examination or review to be performed by the same auditor. See paragraph (g) of SEC Rule 17a-5.

<sup>40</sup> This view is also analogous to the SEC's view for preparation of the compliance report discussed in the SEC Release. In the SEC Release, the SEC observed that the controls necessary for a carrying broker or dealer that engages in limited custodial activities generally should be less complex than the controls necessary for a carrying broker or dealer that engages in more extensive custodial activities, so a carrying broker or dealer with limited custodial activities should have to expend less effort to make the statements in the compliance report regarding Internal Control Over Compliance. See the SEC Release at 229. Similarly, the necessary audit effort related to test controls should be less for brokers and dealers with limited custodial activities.

appropriately tailored for the SEC's proposed amendments to Rule 17a-5. Notably, when the attestation standards were proposed, the PCAOB requested comment on whether the standards were appropriately scalable based on the size and complexity of the broker or dealer. Some commenters specifically agreed that the standards are scalable, and no commenters asserted that the standards are not scalable. Additionally, several comments on the proposed standards were no longer relevant because of changes the SEC made when it adopted the amendments.

Some commenters on the proposed standards expressed concerns about costs associated with extending the requirements for engagement quality reviews to encompass the attestation engagements covered by these standards. In light of the importance of the attestation engagements to investor protection and the high level of deficiencies observed by PCAOB inspection staff in areas that would be covered by the attestation engagements, the Board believes that engagement quality reviews can enhance the consistency of compliance with the SEC's rule. An effective engagement quality review can increase the likelihood of identifying significant engagement deficiencies before the examination report or review report is issued. Additionally, the Board took note of the fact that, in a February 2011 AICPA Peer Review Alert, the AICPA designated audits of carrying brokers or dealers as a "must select" for peer review, recognizing the significant public interest in audits of such firms.<sup>41</sup>

Regarding the incremental costs of engagement quality reviews, because engagement quality reviews are required for audits of financial statements under PCAOB standards, the requirements for auditors to coordinate their audits of the financial statements and attestation engagements should facilitate the engagement quality review of the attestation engagement and help mitigate incremental costs. Furthermore, the Board anticipates that incremental costs for an engagement quality review of an attest engagement will vary with the nature of the attest engagement. For example, the required effort for an engagement quality review of a review engagement generally would be less than for an examination engagement, and the required effort for an examination of a smaller, less complex broker or dealer generally would be less than for a larger, more complex broker or dealer.

## B. Applicability to Audits of Emerging Growth Companies

The Board is adopting the attestation standards pursuant to its authority under the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley" or the "Act").<sup>42</sup>

Before rules adopted by the Board can take effect, they must be approved by the SEC. Pursuant to Section 107(b)(3) of Sarbanes-Oxley, the SEC shall approve a proposed rule if it finds that the rule is "consistent with the requirements of [the] Act and the securities laws, or is necessary or appropriate in the public interest or for the protection of investors."

Additionally, Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act")<sup>43</sup> amended Sarbanes-Oxley to provide that any additional rules adopted

---

<sup>41</sup> See AICPA Peer Review Alert 11-01 (February 2011).

<sup>42</sup> Pub. L. 107-204, 116 Stat. 745 (2002). Under Section 101 of the Act, the mission of the PCAOB is to oversee the audit of companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports. Section 103 of the Act authorizes the Board to adopt auditing standards for use by registered public accounting firms in the preparation and issuance of audit reports "as required by [the] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors."

<sup>43</sup> Pub. L. No. 112-106, 126 Stat. 306 (2012).

by the PCAOB after April 5, 2012 do not apply to audits of emerging growth companies ("EGCs")<sup>44</sup> unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation".<sup>45</sup>

As previously discussed, the attestation standards will apply solely in connection with audits of registered brokers and dealers pursuant to SEC Rule 17a-5. PCAOB staff has discussed the applicability of the JOBS Act to this rulemaking with the SEC staff. The PCAOB is not aware of any EGCs that are also registered brokers or dealers.<sup>46</sup> Moreover, the reporting regimes for registered brokers and dealers under SEC Rule 17a-5 are separate and distinct from those for companies subject to reporting requirements pursuant to Section 13 and 15 of the Exchange Act or for a Securities Act registration statement. The Board defers to the SEC on the applicability of the JOBS Act to this rulemaking and stands ready to assist the SEC with any additional analysis that may become necessary.

## VI. Effective Date

The attestation standards will be effective, subject to approval by the SEC, for examination engagements and review engagements for fiscal years ending on or after June 1, 2014. This effective date coincides with the effective date for the corresponding amendments to SEC Rule 17a-5.<sup>47</sup>

\* \* \*

On the 10th day of October, in the year 2013, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Attestation Standard No. 2

# Review Engagements Regarding Exemption Reports of Brokers and Dealers

### Introduction

1. This standard establishes requirements that apply when an auditor is engaged to perform a review<sup>1</sup> of the statements made by a broker<sup>2</sup> or dealer<sup>3</sup> in an exemption report ("exemption report") prepared pursuant to Securities and Exchange Act of 1934 ("Exchange Act") Rule 17a-5, 17 C.F.R. §240.17a-5 ("SEC Rule 17a-5") of the U.S. Securities and Exchange Commission ("SEC").<sup>4</sup>

2. SEC Rule 17a-5 requires a broker's or dealer's exemption report to contain the following statements by the broker or dealer:

- a. A statement that identifies the provisions in paragraph (k) of SEC Rule 15c3-3<sup>5</sup> (the "exemption provisions") under which the broker or dealer claimed an exemption from SEC Rule 15c3-3 (the "identified exemption provisions");
- b. A statement that the broker or dealer (1) met the identified exemption provisions throughout the most recent fiscal year without exception or (2) met the identified exemption provisions throughout the most recent fiscal year except as described in the exemption report; and
- c. If applicable, a statement that identifies each exception during the most recent fiscal year in meeting the identified exemption provisions (an "exception") and that briefly describes the nature of each exception and the approximate date(s) on which the exception existed.<sup>6</sup>

### Objective

3. When performing a review of the statements (hereinafter referred to as "assertions") made by a broker or dealer in an exemption report (a "review engagement"), the auditor's objective is to state whether, based upon the results

---

<sup>1</sup> See paragraphs (d)(1)(i)(C) and (g)(2)(ii) of SEC Rule 17a-5, which require that certain brokers or dealers file with the SEC a report prepared by an independent accountant based on a review of the statements in the exemption report, if the broker or dealer is required to file an exemption report with the SEC.

<sup>2</sup> According to PCAOB Rule 1001(b)(iii), the term "broker" means a broker (as defined in Section 3(a)(4) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>3</sup> According to PCAOB Rule 1001(d)(iii), the term "dealer" means a dealer (as defined in Section 3(a)(5) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>4</sup> See paragraph (g)(2)(ii) of SEC Rule 17a-5.

<sup>5</sup> See 17 C.F.R. §240.15c3-3 ("SEC Rule 15c3-3").

<sup>6</sup> See paragraph (d)(4) of SEC Rule 17a-5.

of the review procedures, the auditor is aware of any material modifications that should be made to the broker's or dealer's assertions for the assertions to be fairly stated, in all material respects.

4. The auditor must plan and perform the review engagement to obtain appropriate evidence that is sufficient to obtain moderate assurance<sup>7</sup> about whether one or more conditions exist that would cause one or more of the broker's or dealer's assertions not to be fairly stated, in all material respects. Such conditions include:

- a. The broker's or dealer's assertion that identifies the provisions in paragraph (k) of SEC Rule 15c3-3 under which the broker or dealer claimed an exemption for SEC Rule 15c3-3 is inaccurate;
- b. The broker or dealer asserts that it met the identified exemption provisions in paragraph (k) of SEC Rule 15c3-3 without exception when the auditor is aware of exceptions in meeting the exemption provisions; or
- c. The broker's or dealer's assertion that identifies and describes each exception during the most recent fiscal year in meeting the identified exemption provisions in paragraph (k) of SEC Rule 15c3-3 is inaccurate or incomplete.

## Performing the Review Engagement

### General Requirements

5. An auditor who performs a review engagement must:
- a. Have adequate technical proficiency in attestation engagements;
  - b. Obtain an understanding of the exemption conditions and other rules and regulations that are relevant to the broker's or dealer's assertions;
  - c. Determine the auditor's compliance with independence and ethics requirements; and
  - d. Exercise due professional care, which includes application of professional skepticism, in planning and performing the review and preparation of the report.

Note: Due professional care imposes a responsibility on each engagement team member to comply with this standard. The exercise of due professional care requires critical review at every level of supervision of the work done and the judgment exercised by those assisting in the engagement, including preparing the report.<sup>8</sup>

Note: Auditing Standard No. 3, *Audit Documentation*, establishes the documentation requirements for review engagements performed pursuant to this standard.

---

<sup>7</sup> Moderate assurance is obtained by performing with due professional care the inquiries and other procedures required by this standard in order to reach a conclusion about whether there is a need to modify the broker's or dealer's assertions regarding the exemption provisions for the assertions to be fairly stated, in all material respects. Further, this standard is consistent with the concept of moderate assurance as described in paragraph .55 of AT sec. 101, *Attest Engagements*.

<sup>8</sup> The auditor's responsibility to exercise due professional care is consistent with the description in paragraphs .40-.41 of AT sec. 101.

**6.** The engagement partner is responsible for the review engagement and performance of the review procedures. Accordingly, the engagement partner is responsible for proper planning of the review engagement, proper supervision of the work of engagement team members, and compliance with the requirements of this standard. The engagement partner may seek assistance from appropriate engagement team members in fulfilling these responsibilities.

Note: For purposes of this standard, the term "engagement partner" means the member of the engagement team with primary responsibility for the review engagement.

Note: Proper planning includes determining the nature, timing, and extent of procedures necessary to obtain moderate assurance. Proper supervision includes supervising the work of engagement team members so that the work is performed as directed and supports the conclusions reached.

## Relationship Between the Review Engagement and the Audit of Financial Statements and the Audit Procedures Performed on Supplemental Information

**7.** The review engagement should be coordinated with the audit of the financial statements and the audit procedures performed on supplemental information of the broker or dealer.<sup>9</sup> In planning and performing procedures for, and evaluating the results of the procedures performed in, the review engagement, the auditor should take into account relevant evidence from the audit of the financial statements and the procedures performed on the supplemental information. However, the objectives of the financial statement audit and the review engagement are not the same, so the auditor must plan and perform the work to meet the objectives of both engagements.

## Review Procedures

**8.** A review engagement includes the following procedures:

- a. Reading the exemption report to determine the exemption provisions under which the broker or dealer asserts its exemption and the identified exceptions to the exemption provisions;
- b. Performing inquiries and other review procedures set forth in this standard; and
- c. Evaluating whether the evidence indicates that there should be modifications to the broker's or dealer's assertions based on the results of the procedures performed.

**9.** The nature, timing, and extent of the necessary inquiries and other review procedures depend on:

- a. The following risk factors:

---

<sup>9</sup> Under the definition of supplemental information included in Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements*, supplemental information includes the supporting schedules described in paragraph (d)(2) of SEC Rule 17a-5, which are required to be filed by brokers and dealers with the SEC and the broker's and dealer's designated examining authority ("DEA") and the Securities Investor Protection Corporation ("SIPC"). Such supporting schedules consist of, as applicable, a Computation of Net Capital Under Rule 15c3-1, a Computation for Determination of the Reserve Requirements under Exhibit A of SEC Rule 15c3-3, and Information Relating to Possession or Control Requirements Under SEC Rule 15c3-3.

- (1) The broker's or dealer's history of instances of non-compliance with the exemption provisions;
  - (2) Changes in the broker's or dealer's procedures, controls, or the environment in which the controls operate since the prior year;
  - (3) Changes in the broker's or dealer's operations that are relevant to compliance with the exemption provisions;
  - (4) Competence of the personnel who are responsible for compliance with the exemption provisions or who perform important controls over compliance, and whether there have been changes in those personnel during the period of the review;
  - (5) The risk of fraud, including the risk of misappropriation of customer assets, relevant to the exemption provisions;
  - (6) Potential non-compliance associated with related parties,<sup>10</sup> including related parties that are investment advisors or entities with which the broker or dealer has a custodial or clearing relationship;
  - (7) The degree to which the broker's or dealer's processes that relate to the exemption provisions are performed, monitored, or controlled in a centralized or decentralized environment; and
- b. Evidence about the broker's or dealer's compliance with the exemption provisions or about the effectiveness of controls over compliance with the exemption provisions obtained from the audit of the financial statements and the audit procedures performed on supplemental information.

**10.** The auditor should perform procedures to identify exceptions to the exemption provisions, including the following:

- a. If the broker or dealer identified exceptions to the exemption provisions during the year under review, the auditor should read the broker's or dealer's documentation regarding the exceptions to the exemption provisions and compare it to the information included in the exemption report.
- b. Inquire of management, and, if applicable, other individuals at the broker or dealer who have relevant knowledge regarding:
  - (1) Whether the broker or dealer was in compliance with the exemption provisions throughout the year under review or whether exceptions have been identified.
  - (2) Regulatory examinations and correspondence between the SEC or the broker's or dealer's DEA and the broker or dealer that are relevant to compliance with the exemption provisions.

Note: If the broker or dealer has sent or received correspondence with the SEC or the broker's or dealer's DEA that is relevant to compliance with the exemption provisions, the auditor should read such correspondence and, when necessary in the circumstances, make inquiries of the regulatory agencies.

---

<sup>10</sup> The auditor should look to the definition in the applicable financial reporting framework with respect to the term "related parties."

- (3) Subsequent events through the date of the auditor's review report that might have a material effect on the broker's or dealer's assertions.
- c. Inquire of individuals at the broker or dealer who have relevant knowledge of controls relevant to the broker's or dealer's compliance with the exemption provisions regarding:
    - (1) The controls that are in place to maintain compliance with the exemption provisions, including the nature of the controls and their frequency of operation.

Note: The auditor should take into account procedures performed during the audit of the financial statements and the audit procedures performed on supplemental information in obtaining an understanding of controls or other activities relevant to the broker's or dealer's compliance with the exemption provisions.
    - (2) Whether the individual is aware of:
      - i. Any exceptions to the exemption provisions and, if so, the nature, frequency, timing, and cause (if known) of the exceptions to the exemption provisions, during the year under review.
      - ii. Any deficiencies in controls over compliance with the exemption provisions and, if so, the nature, frequency, and cause (if known) of the control deficiencies during the year under review.
  - d. Inquire of individuals who are responsible for monitoring compliance with the exemption provisions or the controls over compliance regarding:
    - (1) The nature and frequency of the monitoring activities.
    - (2) The results of those monitoring activities, including the nature, frequency, timing, and cause (if known) of any exceptions to the exemption provisions or deficiencies in controls over compliance.
    - (3) The nature and frequency of customer complaints that are relevant to the broker's or dealer's compliance with the exemption provisions.
  - e. Read reports of internal auditors, others who perform an equivalent function, compliance functions, and other auditors that are relevant to the broker's or dealer's compliance with the exemption provisions.
  - f. Read regulatory filings of the broker or dealer that are relevant to the broker's or dealer's compliance with the exemption provisions.
  - g. Evaluate whether the evidence obtained and the results of the procedures performed in the audit of the financial statements and the audit procedures performed on supplemental information corroborate or contradict the broker's or dealer's assertions regarding compliance with the exemption provisions.

Note: Examples of procedures performed during the audit of the financial statements that might provide evidence relevant to the broker's or dealer's compliance with the exemption provisions include: (i) testing related to customer trades; (ii) testing of specially designated cash accounts; (iii) testing investment inventory or transactions related to the broker's or dealer's trading for its own

account; and (iv) reading the clearing agreement in connection with testing trade fee or commission revenue or expenses.

- h. Perform other procedures as necessary in the circumstances to obtain moderate assurance regarding whether a material modification should be made to the broker's or dealer's assertions for the assertions to be fairly stated, in all material respects.

## Evaluating the Results of the Review Procedures

**11.** The auditor should evaluate whether information has come to the auditor's attention that causes the auditor to believe that one or more of the broker's or dealer's assertions are not fairly stated, in all material respects.<sup>11</sup> If a broker's or dealer's assertion is not fairly stated, in all material respects, the auditor should:

- a. Modify the review report, as discussed in paragraph 19 of this standard; and
- b. Evaluate the effect of the matter on the audit of the financial statements and the audit procedures performed on supplemental information.

**12.** If information coming to the auditor's attention indicates that one or more exceptions to the exemption provisions occurred during the year under review or might exist at year-end, other than exceptions disclosed in the exemption report, that might cause one or more of the broker's or dealer's assertions not to be fairly stated, in all material respects, or if the auditor has substantial doubt about one or more of the broker's or dealer's assertions, the auditor should perform additional procedures as necessary to address the matter.

## Obtaining a Representation Letter

**13.** The auditor should obtain written representations from management of the broker or dealer:

- a. Acknowledging management's responsibility for compliance with the identified exemption provisions throughout the fiscal year;
- b. Stating the broker's or dealer's assertions and that they are the responsibility of management;
- c. Stating that management has made available to the auditor all records and other information relevant to the broker's or dealer's assertions, including all communications from regulatory agencies, internal auditors, others who perform an equivalent function, compliance functions, and other auditors concerning possible exceptions to the exemption provisions, received through the date of the auditor's review report; and
- d. Stating whether there were, subsequent to the period addressed in the broker's or dealer's assertions, any known events or other factors that might significantly affect the broker's or dealer's compliance with the identified exemption provisions.

**14.** The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the review engagement as described in paragraph 20 of this standard.

---

<sup>11</sup> See paragraph 4 of this standard, which provides examples of conditions that would cause one or more of the broker's or dealer's assertions not to be fairly stated, in all material respects.

## Communication Requirements

**15.** The auditor should communicate to management and to the audit committee<sup>12</sup> any exceptions to the exemption provisions identified by the auditor and information that causes the broker's or dealer's assertions about the exemption provisions not to be fairly stated, in all material respects.

Note: The auditor must also comply with the requirements of paragraph (h) of SEC Rule 17a-5, which contains notification requirements that apply to auditors of brokers and dealers.

## Reporting on the Review Engagement

**16.** The auditor's review report must include the following elements, modified as necessary in the circumstances and manner discussed in paragraphs 19-20:

1. A title that includes the word *independent*;
2. An identification of the exemption report and the broker's or dealer's assertions;
3. A statement that management of the broker or dealer is responsible for compliance with the identified exemption provisions throughout the fiscal year and for its assertions;
4. A statement that the review was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included inquiries and other required procedures to obtain evidence about the broker's or dealer's compliance with the exemption provisions;
5. A statement that a review is substantially less in scope than an examination, the objective of which is the expression of an opinion on management's assertions, and accordingly, no such opinion is expressed;
6. A statement about whether the auditor is aware of any material modifications that should be made to the assertions for them to be fairly stated, in all material respects;
7. The manual signature of the auditor's firm;
8. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's review report has been issued; and
9. The date of the review report.

**17.** The following example report illustrates the report elements described in this section.

### Report of Independent Registered Public Accounting Firm

*[Introductory paragraph—no exceptions to the exemption provisions included in the broker's or dealer's assertion]*

We have reviewed management's statements, included in the accompanying *[title of the exemption report]*, in which (1) Z Broker identified the following provisions of 17 C.F.R. §15c3-3(k) under which Z Broker claimed an exemption from 17 C.F.R. §240.15c3-3: (*fill in which exemption provision—(1), (2)(i), (2)(ii)*,

---

<sup>12</sup> For purposes of this standard, the term "audit committee" has the same definition as that in Auditing Standard No. 16, *Communications with Audit Committees*.

or (3)) (the "exemption provisions") and (2) Z Broker stated that Z Broker met the identified exemption provisions throughout the most recent fiscal year without exception. Z Broker's management is responsible for compliance with the exemption provisions and its statements.

*[Introductory paragraph—exceptions to the exemption provisions included in the broker's or dealer's assertion]*

We have reviewed management's statements, included in the accompanying *[title of the exemption report]*, in which (1) Z Broker identified the following provisions of 17 C.F.R. §15c3-3(k) under which Z Broker claimed an exemption from 17 C.F.R. §240.15c3-3: (*fill in which exemption provision—(1), (2)(i), (2)(ii), or (3)*) (the "exemption provisions") and (2) Z Broker stated that Z Broker met the identified exemption provisions throughout the most recent fiscal year except as described in its exemption report. Z Broker's management is responsible for compliance with the exemption provisions and its statements.

*[Scope paragraph]*

Our review was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) and, accordingly, included inquiries and other required procedures to obtain evidence about Z Broker's compliance with the exemption provisions. A review is substantially less in scope than an examination, the objective of which is the expression of an opinion on management's statements. Accordingly, we do not express such an opinion.

*[Review results paragraph]*

Based on our review, we are not aware of any material modifications that should be made to management's statements referred to above for them to be fairly stated, in all material respects, based on the provisions set forth in paragraph (k)(*fill-in which exemption provision—(1), (2)(i), (2)(ii), or (3)*) of Rule 15c3-3 under the Securities Exchange Act of 1934.

*[Signature]*

*[City and State or Country]*

*[Date]*

## Review Report Date

**18.** The auditor should date the review report no earlier than the date on which the auditor has completed his or her review procedures.

Note: Because of the coordination between the review engagement and the audit of the financial statements and the audit procedures performed on supplemental information, the date of the review report should not be earlier than the date of the auditor's report on the financial statements and supplemental information.

## Modifications of the Report

**19.** If one or more of the broker's or dealer's assertions are not fairly stated, in all material respects, the auditor must modify the review report to describe the reasons the assertions are not fairly stated, in all material respects. If a broker's or dealer's assertion is not fairly stated, in all material respects, because of one or more omitted exceptions, the auditor's review report should disclose each omitted exception.

**20. *Scope Limitations.*** If the auditor cannot perform the procedures required by this standard or other procedures that the auditor deems necessary in the circumstances, the review is incomplete because of the scope limitation. An incomplete review is not a sufficient basis for stating a conclusion regarding the broker's or dealer's assertions. In those circumstances, the auditor should withdraw from the engagement or should modify the review report to:

- a. Describe the scope limitation and any review procedures deemed necessary by the auditor that have been omitted and the reason for their omission;
- b. State that the auditor does not express any form of assurance on the broker's or dealer's assertions; and, if applicable,
- c. Describe any circumstances that cause one or more of the broker's or dealer's assertions not to be fairly stated, in all material respects.

### PCAOB Release No. 2013-007

October 10, 2013  
PCAOB Rulemaking  
Docket Matter No. 035

#### Summary

After public comment, the Public Company Accounting Oversight Board ("PCAOB" or the "Board") is adopting two new attestation standards, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*, and *Review Engagements Regarding Exemption Reports of Brokers and Dealers*. The Board is also adopting related amendments to certain PCAOB standards. The attestation standards and related amendments will be applicable to all registered firms conducting attestation engagements related to broker and dealer compliance or exemption reports required by the U.S. Securities and Exchange Commission ("SEC" or "Commission").

#### Board Contacts

Keith Wilson, Deputy Chief Auditor (202/207-9134, wilsonk@pcaobus.org), Barbara Vanich, Associate Chief Auditor (202/207-9363, vanichb@pcaobus.org), and Nicholas Grillo, Assistant Chief Auditor (202/207-9104, grillon@pcaobus.org).

\* \* \* \* \*

#### I. Introduction

On July 30, 2013, the SEC adopted amendments to Rule 17a-5<sup>1</sup> under the Securities Exchange Act of 1934 ("Exchange Act") to strengthen and clarify broker and dealer annual financial reporting requirements and also facilitate the ability of the PCAOB to implement the oversight of independent public accountants of brokers<sup>2</sup> and dealers<sup>3</sup> provided by Section 982 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act").<sup>4</sup>

The Board is adopting two attestation standards, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers* (the "examination standard") and *Review Engagements Regarding Exemption Reports of Brokers and*

---

<sup>1</sup> See Rule 17a-5, 17 C.F.R. §240.17a-5 ("SEC Rule 17a-5") and SEC Exchange Act Release No. 34-70073, *Broker-Dealer Reports* (July 30, 2013), 78 Federal Register 51910 (August 21, 2013) ("SEC Release"), available at <http://www.sec.gov/rules/final/2013/34-70073.pdf>.

<sup>2</sup> According to PCAOB Rule 1001(b)(iii), the term "broker" means a broker (as defined in Section 3(a)(4) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>3</sup> According to PCAOB Rule 1001(d)(iii), the term "dealer" means a dealer (as defined in Section 3(a)(5) of the Exchange Act) that is required to file a balance sheet, income statement, or other financial statement under Section 17(e)(1)(A) of that Act, where such balance sheet, income statement, or financial statement is required to be certified by a registered public accounting firm.

<sup>4</sup> Pub. L. No. 111-203, 124 Stat. 1376 (2010).

*Dealers* (the "review standard") (collectively, the "attestation standards"). These attestation standards will apply to examination engagements regarding compliance reports of brokers and dealers ("examination engagements") and review engagements regarding exemption reports of brokers and dealers ("review engagements"), pursuant to requirements contained in SEC Rule 17a-5.<sup>5</sup> Pursuant to SEC Rule 17a-5, the audits of brokers and dealers, including the attestation engagements covered by this release, are required to be performed under PCAOB standards.<sup>6</sup> Before these amendments to SEC Rule 17a-5, audits of brokers and dealers were required to be performed under generally accepted auditing standards ("GAAS") established by the American Institute of Certified Public Accountants ("AICPA"). The attestation standards will be effective, subject to approval by the SEC, for examination engagements and review engagements for fiscal years ending on or after June 1, 2014. This effective date would coincide with the effective date for the corresponding amendments to SEC Rule 17a-5.

## II. Background

Sections 17(a) and (e) of the Exchange Act and SEC Rule 17a-5 together generally require a broker or dealer to, among other things, file an annual report<sup>7</sup> with the SEC and the broker's or dealer's designated examining authority ("DEA").<sup>8</sup> SEC Rule 17a-5 requires the annual report to contain, among other things:

- a. A financial report consisting of audited financial statements and supporting schedules;<sup>9</sup> and
- b. A compliance report or an exemption report.<sup>10</sup>

The requirements for the compliance report and the exemption report are new requirements that are the result of the Commission's amendments to SEC Rule 17a-5. According to the SEC, these reports contain information regarding broker and dealer compliance with key SEC financial responsibility rules<sup>11</sup> that enhance the ability of the SEC to oversee the financial responsibility practices of registered brokers and dealers and, in particular, the safekeeping of customer assets.

---

<sup>5</sup> See paragraphs (g)(2)(i) and (ii) of SEC Rule 17a-5.

<sup>6</sup> See paragraph (g) of SEC Rule 17a-5.

<sup>7</sup> Paragraph (d) of SEC Rule 17a-5 contains general requirements for annual reports to be filed by SEC-registered brokers and dealers. Paragraphs (d)(1)(iii) and (iv) of SEC Rule 17a-5 provide certain limited exceptions to the requirement to file an annual report.

<sup>8</sup> Under SEC Rule 17d-1, 17 C.F.R. § 240.17d-1, a registered broker or dealer that is a member of more than one securities self-regulatory organization may be assigned a "designated examining authority" or "DEA" that is responsible for examining the broker or dealer for compliance with SEC financial responsibility rules. An example of a securities self-regulatory organization that is a designated examining authority is the Financial Industry Regulatory Authority.

<sup>9</sup> See paragraph (d)(2) of SEC Rule 17a-5. Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements* (PCAOB Release No. 2013-008) (October 10, 2013), applies to the audit procedures performed and the audit report on supporting schedules.

<sup>10</sup> See paragraphs (d)(3) and (4) of SEC Rule 17a-5. The attestation standard in Appendix 1 of this release applies to an examination of certain statements made by the broker or dealer in the compliance report. The attestation standard in Appendix 2 of this release applies to a review of the statements made by the broker or dealer in the exemption report.

<sup>11</sup> The SEC Release used the term "financial responsibility rules" to refer to: 17 C.F.R. § 240.15c3-1 ("SEC Rule 15c3-1" or the "net capital rule"); 17 C.F.R. § 240.15c3-3 ("SEC Rule 15c3-3"); 17 C.F.R. § 240.17a-13 ("SEC Rule 17a-13"); and any rule of the DEA of the broker or dealer that requires account statements to be sent to the customers of the broker or dealer (an "account statement rule"). See the SEC Release at 8-9. The terms "financial responsibility rules" and "account statement rule" have the same meaning in these standards as they have in the SEC Release.

Generally, SEC Rule 17a-5 provides that brokers or dealers that did not claim an exemption from SEC Rule 15c3-3 throughout the most recent fiscal year must prepare and file the compliance report. A broker or dealer must prepare and file the exemption report if the broker or dealer did claim that it was exempt from SEC Rule 15c3-3 throughout the most recent fiscal year.

Brokers and dealers also must generally file reports prepared by a PCAOB registered independent public accountant covering the financial report and the compliance report or exemption report, as applicable.<sup>12</sup>

The auditor's examination report or review report would replace the prior requirement in SEC Rule 17a-5 that the auditor report on material inadequacies identified in the broker's or dealer's accounting system, internal accounting controls, procedures of the broker or dealer for safeguarding securities, and certain practices and procedures related to customer protection and securities.

### III. Considerations in Adopting the Attestation Standards

The Board is adopting the attestation standards to establish requirements aligned with the auditor's responsibilities under SEC Rule 17a-5.<sup>13</sup> Specifically, the attestation standards establish requirements for examining certain statements in a broker's or dealer's compliance report and reviewing a broker's or dealer's statements in an exemption report. The Board is also adopting related amendments to certain PCAOB standards, including amendments regarding documentation and amendments to require engagement quality reviews of the examination and the review engagements.<sup>14</sup>

The attestation standards for the examination and review engagements, included in appendices 1 and 2 of this release, represent stand-alone standards that are based on existing concepts and principles in the existing attestation standards but are tailored for the specific requirements under SEC Rule 17a-5.<sup>15</sup>

In general, both standards set forth a framework of specific procedures that are required for auditors to opine or conclude on a broker's or dealer's statements—referred to in the standards as "assertions"<sup>16</sup>—in compliance reports and exemption reports required by SEC Rule 17a-5, respectively.<sup>17</sup>

---

<sup>12</sup> See paragraph (d)(1)(i)(C) of SEC Rule 17a-5.

<sup>13</sup> See paragraphs (g) and (h) of SEC Rule 17a-5.

<sup>14</sup> In addition, on February 28, 2012, the Board proposed to update certain of its rules to conform to the Dodd-Frank Act amendments to the Sarbanes-Oxley Act of 2002. See *Proposed Amendments to Conform the Board's Rules and Forms to the Dodd-Frank Act and Make Certain Updates and Clarifications*, PCAOB Release No. 2012-002 (February 28, 2012). Among other things, these proposed amendments would amend the Board's rules to require that registered firms comply with the Board's interim standards in broker or dealer engagements. See proposed amendments to Rule 1001(a)(v), Rule 1001(a)(vi), Rule 3200T, and Rule 3300T, Rule 3400T, Rule 3500T, and Rule 3600T. The Board expects to act on these proposed amendments in a separate rulemaking in the near future.

<sup>15</sup> The requirements in the examination standard are generally consistent with the requirements of AT sec. 101, *Attest Engagements*, and AT sec. 601, *Compliance Attestation*. Similarly, the requirements in the review standard are generally consistent with AT sec. 101. However, when an auditor performs an engagement pursuant to the examination standard or a review pursuant to the review standard, AT sec. 101 and AT sec. 601 would not apply.

<sup>16</sup> These standards use the term "assertion" to refer to the broker's or dealer's individual statements that are covered by the examination and review. In the examination standard, the term "assertion" also distinguishes the portion of the statements in the broker's or dealer's compliance report that are covered by the examination.

<sup>17</sup> See paragraphs (i)(3)(iii)(A) and (B) of SEC Rule 17a-5 for the specific requirement for an opinion or conclusion to be expressed in the auditor's report.

Furthermore, both of the attestation standards emphasize coordination between the examination engagement or review engagement, the audit of the broker's or dealer's financial statements and audit procedures performed on the supporting schedules (referred to in this release as "supplemental information"). This emphasis on coordination, when properly executed, can promote overall audit effectiveness and avoid redundancy in the work performed. For example, auditors can take into account, when appropriate, evidence obtained while planning and performing the audit of the financial statements and the audit procedures performed on supplemental information in planning and performing the attestation engagement.

This emphasis on coordination is also a key aspect of Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements* (the "auditing standard"),<sup>18</sup> which the Board is separately adopting. Auditing Standard No. 17 will apply when the auditor of the financial statements is engaged to perform audit procedures and report on supplemental information accompanying audited financial statements in accordance with PCAOB standards, including supporting schedules prepared pursuant to SEC Rule 17a-5.<sup>19</sup> The auditing standard also includes requirements for the procedures on the supplemental information to be planned and performed in conjunction with the audit of the financial statements, and for the audits of brokers and dealers to be coordinated with the attestation engagements related to compliance or exemption reports.<sup>20</sup>

In the Board's view, the attestation standards further the public interest and promote investor protection because they are tailored to the corresponding requirements of SEC Rule 17a-5, which are designed to provide safeguards with respect to broker and dealer custody of customer securities and funds. For example, the specific requirements in the examination standard for evaluating Internal Control Over Compliance<sup>21</sup> can help auditors to identify deficiencies in a broker's or dealer's internal controls for safeguarding customer securities and funds or maintaining necessary capital or reserves. Similarly, the specific requirements in the review standard should focus auditors on whether the broker or dealer appropriately meets the exemption provisions in paragraph (k) of SEC Rule 15c3-3.

Also, the SEC Release states that SEC enforcement actions alleging fraudulent conduct by brokers and dealers highlight the need for enhancements to the rules governing broker and dealer custody of customer assets, including increased focus on compliance and internal compliance controls by brokers and dealers and their auditors.<sup>22</sup> The attestation standards include requirements related to the auditor's consideration of fraud risks, including the risk of misappropriation of customer assets. The new standard includes requirements for testing controls of the broker or dealer for safeguarding customer assets and funds and for performing procedures to obtain evidence about the existence of customer funds and securities held for customers.

Furthermore, PCAOB inspections staff in their inspections of broker and dealer audits have identified auditing deficiencies in 57 of 60 audits that

---

<sup>18</sup> See Auditing Standard No. 17, *Auditing Supplemental Information Accompanying Audited Financial Statements*, PCAOB Release No. 2013-008 (October 10, 2013).

<sup>19</sup> See paragraph (d)(2) of SEC Rule 17a-5.

<sup>20</sup> See the note to paragraph 3.c. of Auditing Standard No. 17.

<sup>21</sup> Consistent with SEC Rule 17a-5, the examination standard defines "Internal Control Over Compliance" as "internal controls that have the objective of providing the broker or dealer with reasonable assurance that non-compliance with the [financial responsibility rules], will be prevented or detected on a timely basis." See paragraph (d)(3)(ii) of SEC Rule 17a-5.

<sup>22</sup> See the SEC Release at 206-207.

were conducted under GAAS and the prior SEC Rule 17a-5.<sup>23</sup> The attestation standards—tailored for the new audit and reporting requirements under SEC Rule 17a-5—establish an approach specific to examining compliance reports and reviewing exemption reports that should provide greater clarity as to the procedures that should be used and facilitate consistent compliance for auditors of SEC registered brokers and dealers.

The financial responsibility rules serve an important investor protection function by requiring brokers and dealers to maintain minimum levels of net capital and take steps to safeguard customer securities and cash.<sup>24</sup> As described in the SEC Release, the new requirements for engagement of accountants should result in higher levels of compliance with the financial responsibility rules by increasing the focus of carrying brokers and dealers and their independent public accountants on specific statements made in compliance reports and increasing the focus of non-carrying brokers and dealers and their independent public accountants regarding whether the broker or dealer meets applicable exemption provisions.<sup>25</sup> Moreover, in the Board's view, the involvement of auditors, under the attestation standards and PCAOB oversight, should enhance the quality of the compliance information provided to the SEC and used in its regulatory oversight, which is important to the protection of investors who entrust their cash and securities with brokers and dealers.

## A. Consideration of Comments Received

In developing the attestation standards, the Board also considered comments received. On July 12, 2011, the Board proposed two attestation standards, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers* ("proposed examination standard"), and *Review Engagements Regarding Exemption Reports of Brokers and Dealers* ("proposed review standard") (collectively, the "proposed attestation standards") and related amendments to PCAOB standards. The proposed attestation standards were developed to align the standards of the PCAOB with the SEC's 2011 proposed amendments to SEC Rule 17a-5 ("SEC Proposed Rule 17a-5"),<sup>26</sup> which included requirements for brokers and dealers to engage auditors to perform either a compliance examination engagement or review engagement, whichever would be required pursuant to the SEC's proposed amendments.

The Board received eleven comment letters on the proposed attestation standards. Commenters generally were supportive of the Board's efforts to draft attestation standards applicable to brokers and dealers and the Board's efforts to align the attestation standards with the Commission's proposed amendments to SEC Rule 17a-5. Commenters provided observations and comments on certain requirements and other specific aspects of the attestation standards and related amendments to PCAOB standards. Many of the significant comments, which dealt with the meaning of the term "material non-compliance" in the context of the auditor's examination of the broker's or dealer's assertions in the compliance report, are no longer applicable because of subsequent changes made by the SEC in its adoption of final amendments to SEC Rule 17a-5. The Board did, however, revise the attestation standards in response to certain of

<sup>23</sup> See *Second Report on the Progress of the Interim Inspection Program Related to Audits of Brokers and Dealers*, PCAOB Release No. 2013-006 (August 19, 2013) at 6.

<sup>24</sup> See the SEC Release at 255.

<sup>25</sup> See the SEC Release at 238.

<sup>26</sup> See SEC Exchange Act Release No. 34-64676, *Broker-Dealer Reports* (June 15, 2011), 76 Federal Register 37572 (June 27, 2011).

the comments received. Also, the Board made revisions to the standards in view of the final requirements contained in the SEC's amendments. Such changes are intended to align the Board's attestation standards with the SEC's requirements. Section IV below summarizes the key points and changes made to the attestation standards. Appendix 4 discusses the significant comments received on the proposed attestation standards in greater detail, as well as the revisions to the attestation standards.

## IV. Overview of the Attestation Standards

### A. Attestation Standard No. 1, *Examination Engagements Regarding Compliance Reports of Brokers and Dealers*

The examination standard, which is presented in Appendix 1, establishes requirements for the auditor with respect to the auditor's examination regarding a broker's or dealer's compliance report. Consistent with SEC Rule 17a-5, the examination standard requires auditors to obtain sufficient appropriate evidence to opine on a broker's or dealer's statements in its compliance report as to whether:

- The Internal Control Over Compliance of the broker or dealer was effective during the most recent fiscal year;
- The Internal Control Over Compliance of the broker or dealer was effective as of the end of the most recent fiscal year;
- The broker or dealer was in compliance with the net capital rule and 17 C.F.R. § 240.15c3-3(e) (the "reserve requirements rule") as of the end of the most recent fiscal year; and
- The information the broker or dealer used to state whether it was in compliance with the net capital rule and reserve requirements rule was derived from the books and records of the broker or dealer.<sup>27</sup>

The examination standard provides requirements for auditors that:

- Focus the auditor on the matters that are most important to the auditor's conclusions regarding the broker's or dealer's assertions;
- Incorporate consideration of fraud risks, including the risk of misappropriation of customer assets;
- Are designed to be scalable based on the broker's or dealer's size and complexity;
- Coordinate the examination engagement with the audit of the financial statements and the audit procedures performed on supplemental information; and
- Describe how to report on an examination engagement, in connection with the requirements of SEC Rule 17a-5.

The examination standard retains the requirement that the auditor obtain reasonable assurance to support the auditor's opinion. In particular, the examination standard requires the auditor to obtain reasonable assurance in order to opine on whether the broker's or dealer's assertions are fairly stated, in all

---

<sup>27</sup> See paragraphs (d)(3)(i)(A)(2),(3),(4), and (5), (g)(2)(i), and (i)(3)(iii)(A) of SEC Rule 17a-5. The scope of the auditor's examination does not encompass the statement as to whether the broker or dealer has established and maintained Internal Control Over Compliance required by paragraph (d)(3)(i)(A)(1) of SEC Rule 17a-5.

material respects. This replaces the requirement to obtain reasonable assurance in prior SEC Rule 17a-5, which stated that "[t]he scope of the audit and review of the accounting system, the internal control and procedures for safeguarding securities shall be sufficient to provide reasonable assurance that any material inadequacies existing at the date of the examination in (a) the accounting system; (b) the internal accounting controls; (c) procedures for safeguarding securities; and (d) the practices and procedures whose review is specified [in SEC Rule 17a-5] would be disclosed."<sup>28</sup>

The examination standard reflects changes from the proposed standard to align with SEC Rule 17a-5 and in light of comments received. Significant revisions include the following:

- The auditor's reporting requirements were revised to align with the statements of the broker or dealer pursuant to SEC Rule 17a-5;
- The requirements for auditor testing of controls over compliance were revised to cover internal controls over compliance both as of the end of the fiscal year and during the fiscal year, as provided by SEC Rule 17a-5; and
- The requirements for auditors to test for compliance were revised in view of the changes to SEC Rule 17a-5 to focus specifically on testing compliance with the net capital rule and reserve requirements rule.

Appendix 4 discusses further the revisions reflected in the examination standard.

## **B. Attestation Standard No. 2, Review Engagements Regarding Exemption Reports of Brokers and Dealers**

The review standard, which is presented in Appendix 2, establishes requirements for the auditor with respect to the auditor's review regarding the broker's or dealer's exemption report. Consistent with SEC Rule 17a-5, the review standard establishes requirements that apply when an auditor is engaged to perform a review of the broker's or dealer's statements in an exemption report.<sup>29</sup>

Like the examination standard, the review standard establishes requirements that are designed specifically for the review required by SEC Rule 17a-5.<sup>30</sup> The review standard establishes requirements for making inquiries and performing other procedures that are commensurate with the auditor's responsibility to obtain moderate assurance<sup>31</sup> regarding whether one or more conditions exist

---

<sup>28</sup> Prior to the amendments, SEC Rule 17a-5 provided that "[a]dditionally, as specific objectives, the audit shall include reviews of the practices and procedures followed by the client: (i) In making the periodic computations of aggregate indebtedness and net capital under 17 C.F.R. § 240.17a-3(a)(11) and the reserve required by 17 C.F.R. § 240.15c3-3(e); (ii) In making the quarterly securities examinations, counts, verifications and comparisons and the recodation of differences required by 17 C.F.R. § 240.17a-13; (iii) In complying with the requirement for prompt payment for securities of section 4(c) of Regulation T (§ 220.4(c) of chapter II of title 12) of the Board of Governors of the Federal Reserve System; and (iv) In obtaining and maintaining physical possession or control of all fully paid and excess margin securities of customers as required by 17 C.F.R. § 240.15c3-3. Such review shall include a determination as to the adequacy of the procedures described in the records required to be maintained pursuant to 17 C.F.R. § 240.15c3-3(d)(4)."

<sup>29</sup> See paragraphs (d)(4) and (g)(2)(ii) of SEC Rule 17a-5.

<sup>30</sup> *Id.*

<sup>31</sup> Obtaining moderate assurance in a review engagement is consistent with both existing PCAOB standards and the SEC Release. AT sec. 101.55 describes a review as an attest engagement designed to provide a moderate level of assurance. See the SEC Release at 88, which states that a "moderate level of assurance [is] contemplated by the required review."

that would cause one or more of the broker's or dealer's assertions not to be fairly stated, in all material respects. The broker's or dealer's exemption report includes the following assertions:

- A statement that identifies the provisions in paragraph (k) of SEC Rule 15c3-3 (the "exemption provisions") under which the broker or dealer claimed an exemption from SEC Rule 15c3-3 (the "identified exemption provisions");
- A statement that the broker or dealer (1) met the identified exemption provisions throughout the most recent fiscal year without exception or (2) met the identified exemption provisions throughout the most recent fiscal year except as described in the exemption report; and
- If applicable, a statement that identifies each exception during the most recent fiscal year in meeting the identified exemption provisions (an "exception") and that briefly describes the nature of each exception and the approximate date(s) on which the exceptions existed.<sup>32</sup>

The auditor's review report regarding a broker's or dealer's exemption report replaces the statement provided by auditors under the prior SEC rules. Before the amendments, SEC Rule 17a-5 provided that the auditor engaged by the broker or dealer must "ascertain that the conditions of the exemption were being complied with as of the examination date and that no facts came to the independent public accountant's attention to indicate that the exemption had not been complied with during the period since the independent public accountant's last examination."

The procedures required by the review standard include evaluating relevant evidence obtained from the audit of the financial statements and the audit procedures performed on supplemental information and are designed to enable the auditor to scale the review engagement based on the broker's or dealer's size and complexity. The review standard also establishes requirements for the content of the review report.

The review standard reflects changes from the proposed standard to align the standard with SEC Rule 17a-5 and in light of comments received. Significant revisions include the following:

- The requirements of the standard were revised to include consideration of disclosure of exceptions to the exemption provisions, as provided by SEC Rule 17a-5; and
- The auditor's reporting requirements were revised to align with the statements of the broker or dealer pursuant to SEC Rule 17a-5.

## V. Economic Considerations, including Audits of Emerging Growth Companies

### A. Economic Considerations

This release, and the related appendices, provide additional detail regarding the background and need for the new attestation standards; significant

---

<sup>32</sup> See paragraph (d)(4) of SEC Rule 17a-5.

comments received; and alternatives considered. As discussed below, the Board also considered the economic consequences of the new standards.<sup>33</sup>

As noted above, in developing the attestation standards, the Board's objective was to consider the SEC's amendments to SEC Rule 17a-5 and evaluate whether its standards were appropriate for the SEC's requirements for examinations of compliance reports and reviews of exemption reports.

As part of its process, the Board also considered the SEC's economic analysis related to its amendments to SEC Rule 17a-5. The SEC's analysis considers the economic effects, including the benefits and costs, of the new examinations of compliance reports and reviews of exemption reports that are now required by the SEC to be filed by registered brokers and dealers pursuant to SEC Rule 17a-5 and includes considerations relating to efficiency, competition, and capital formation.<sup>34</sup>

The SEC's economic analysis considered the Board's proposed attestation standards. As described in the SEC Release, after considering the views of commenters relating to anticipated costs, including with respect to the Board's proposed attestation standards, the SEC concluded that, while the total costs associated with the new compliance and review requirements would depend on the final PCAOB standards for attestation engagements, "as the PCAOB's proposed standards were tailored to the proposed amendments, nothing in those standards causes the Commission to change its estimates of the costs associated with these requirements, or to question that the benefits will justify the costs."<sup>35</sup> The Board notes that, as adopted, the new attestation standards are aligned with SEC Rule 17a-5, and most of the differences between the proposed standards and the attestation standards in this release result from changes to conform to the SEC's final amendments to SEC Rule 17a-5.

In addition to considering the SEC's requirements and economic analysis, the Board also took into account other related economic considerations as discussed below.

## 1. Economic Baseline

The SEC made the determination to require brokers and dealers to include in their annual reports either a compliance report that is examined by an auditor or an exemption report that is reviewed by an auditor.

Therefore, the SEC Release contains a discussion of the economic baseline in its economic analysis. Aspects of the SEC's discussion of the baseline that are relevant to the attestation standards include:

- Before the SEC's amendments, Rule 17a-5 required that the audit under GAAS include a "review" of the broker's or dealer's accounting system, internal accounting control, and procedures for safeguarding securities.<sup>36</sup> The scope of the auditor's work was required to be sufficient to provide reasonable assurance that any

---

<sup>33</sup> The Board did not specifically request comments that attempted to quantify costs related to the attestation standards, but the Board did request comment on the appropriateness of the standards and received comments that pertained to audit effort and related costs that it considered. The discussion in this section reflects the Board's qualitative assessment of the standards.

<sup>34</sup> See the SEC Release, which discusses costs and benefits of the requirements for examined compliance reports and reviewed exemption reports at 226-245.

<sup>35</sup> See the SEC Release at 241.

<sup>36</sup> See the SEC Release at 70.

material inadequacies<sup>37</sup> existing as of the date of the examination would be disclosed.

- Before the SEC's amendments, if the broker or dealer was exempt from the reserve requirements rule, the auditor was required to ascertain that the conditions of the exemption were being complied with as of the examination date and that no facts came to the auditor's attention to indicate that the exemption had not been complied with during the period since the last examination.

Under the SEC's amendments, audits of brokers and dealers are now required to be conducted in accordance with PCAOB standards, the material inadequacy report has been replaced with an examination of the compliance report, and the requirement to ascertain compliance with the exemption conditions has been replaced with a review of the exemption report.

## 2. Consideration of Alternatives and Additional Considerations

In general, the Board sought to evaluate whether its attestation standards were appropriate for performing and reporting on the newly required examinations and reviews. The SEC is a key user of the new reports, which serve to facilitate the SEC's compliance oversight function. Accordingly, the Board's standards for those engagements needed to reflect a compliance focus and needed to be aligned with the requirements in SEC Rule 17a-5.

The Board considered two principal alternatives: (1) issuing guidance on applying existing PCAOB attestation standards to the new examination and review engagements, or (2) developing standards tailored to the requirements of SEC Rule 17a-5. In considering the first alternative, the Board observed that auditors performing examinations of compliance reports would need to look to a patchwork of requirements in existing attestation standards, including AT sec. 101 and AT sec. 601, and apply them to the new examination of the compliance report and review of the exemption report. This could lead to more inconsistencies in compliance with the SEC's rule as compared to a tailored standard that sets forth the necessary procedures for complying with the SEC's rule.

The Board preliminarily determined that a broker and dealer specific approach to examining compliance reports and reviewing exemption reports that is tailored to the SEC's rule would promote consistent audit practices and compliance with the SEC's rule because auditors could more readily determine the procedures necessary to meet the requirements for reasonable assurance in the examination and moderate assurance in the review. The greater clarity also can help facilitate more efficient use of audit resources, which can help mitigate the associated costs. Since the Board's initial proposal, the high level of auditing deficiencies observed by PCAOB inspections of audits of brokers and dealers under pre-existing standards have underscored the Board's initial

---

<sup>37</sup> Prior to the SEC's amendments, paragraph (g)(3) of Rule 17a-5 described a "material inadequacy" in a broker's or dealer's accounting system, internal accounting controls, procedures for safeguarding securities, and practices and procedures to include "any condition which has contributed substantially to or, if appropriate corrective action is not taken, could reasonably be expected to: (i) inhibit a broker-dealer from promptly completing securities transactions or promptly discharging its responsibilities to customers, other broker-dealers or creditors; (ii) result in material financial loss; (iii) result in material misstatements of the broker-dealer's financial statements; or (iv) result in violations of the Commission's recordkeeping or financial responsibility rules to an extent that could reasonably be expected to result in the conditions described in [(i) through (iii)] above." See the SEC Release at 70, footnote 287.

concerns about the need for standards that facilitate more consistent compliance with the SEC's rule.<sup>38</sup>

In developing the new standards, the Board took into account economic considerations, including taking note of commenters' views on the proposed attestation standards. The Board's approach is intended to focus and streamline the auditor's work in order to promote overall audit effectiveness and avoid duplicative procedures. The Board sought to ease the transition to the new standards and help lessen the effect of associated costs by:

- Building on principles and concepts in existing attestation standards, such as the general requirements in AT sec. 101, and the risk-based principles for testing controls as set forth in Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*;
- Focusing the auditor's attention on the most important matters related to the objective of the examination or review, as applicable, including addressing the risk of misappropriation of customer assets;
- Requiring coordination of the attestation standards with the audit of the financial statements and audit procedures on the supplemental information, to enhance the effectiveness of the coordinated work and avoid unnecessary duplication of work;<sup>39</sup> and
- Establishing risk-based approaches for the examination and review that are scalable—that is, the required audit effort is commensurate with the broker's or dealer's size and complexity<sup>40</sup>—and that facilitate consistent compliance with SEC Rule 17a-5.

The Board also considered commenters' views. Commenters on the Board's proposed attestation standards generally agreed that the proposed standards were appropriately tailored for the SEC's proposed amendments to Rule 17a-5. Notably, when the attestation standards were proposed, the PCAOB requested comment on whether the standards were appropriately scalable based on the size and complexity of the broker or dealer. Some commenters specifically agreed that the standards are scalable, and no commenters asserted that the standards are not scalable. Additionally, several comments on the proposed standards were no longer relevant because of changes the SEC made when it adopted the amendments.

---

<sup>38</sup> See PCAOB Release 2013-006, which reports that PCAOB inspection staff identified auditing deficiencies in 57 of the 60 audits of brokers and dealers selected for inspection and that deficiencies in compliance with audit requirements for brokers and dealers under the Exchange Act that were among the most frequently noted by PCAOB inspection staff included deficiencies in audit procedures related to net capital and customer reserve supporting schedules, compliance with the conditions of the exemption claimed by the broker or dealer, and the accountant's supplemental report on material inadequacies. See PCAOB Release 2013-006, Executive Summary, at ii.

<sup>39</sup> By its terms, SEC Rule 17a-5 requires the financial statement audit and the compliance examination or review to be performed by the same auditor. See paragraph (g) of SEC Rule 17a-5.

<sup>40</sup> This view is also analogous to the SEC's view for preparation of the compliance report discussed in the SEC Release. In the SEC Release, the SEC observed that the controls necessary for a carrying broker or dealer that engages in limited custodial activities generally should be less complex than the controls necessary for a carrying broker or dealer that engages in more extensive custodial activities, so a carrying broker or dealer with limited custodial activities should have to expend less effort to make the statements in the compliance report regarding Internal Control Over Compliance. See the SEC Release at 229. Similarly, the necessary audit effort related to test controls should be less for brokers and dealers with limited custodial activities.

Some commenters on the proposed standards expressed concerns about costs associated with extending the requirements for engagement quality reviews to encompass the attestation engagements covered by these standards. In light of the importance of the attestation engagements to investor protection and the high level of deficiencies observed by PCAOB inspection staff in areas that would be covered by the attestation engagements, the Board believes that engagement quality reviews can enhance the consistency of compliance with the SEC's rule. An effective engagement quality review can increase the likelihood of identifying significant engagement deficiencies before the examination report or review report is issued. Additionally, the Board took note of the fact that, in a February 2011 AICPA Peer Review Alert, the AICPA designated audits of carrying brokers or dealers as a "must select" for peer review, recognizing the significant public interest in audits of such firms.<sup>41</sup>

Regarding the incremental costs of engagement quality reviews, because engagement quality reviews are required for audits of financial statements under PCAOB standards, the requirements for auditors to coordinate their audits of the financial statements and attestation engagements should facilitate the engagement quality review of the attestation engagement and help mitigate incremental costs. Furthermore, the Board anticipates that incremental costs for an engagement quality review of an attest engagement will vary with the nature of the attest engagement. For example, the required effort for an engagement quality review of a review engagement generally would be less than for an examination engagement, and the required effort for an examination of a smaller, less complex broker or dealer generally would be less than for a larger, more complex broker or dealer.

## B. Applicability to Audits of Emerging Growth Companies

The Board is adopting the attestation standards pursuant to its authority under the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley" or the "Act").<sup>42</sup>

Before rules adopted by the Board can take effect, they must be approved by the SEC. Pursuant to Section 107(b)(3) of Sarbanes-Oxley, the SEC shall approve a proposed rule if it finds that the rule is "consistent with the requirements of [the] Act and the securities laws, or is necessary or appropriate in the public interest or for the protection of investors."

Additionally, Section 104 of the Jumpstart Our Business Startups Act ("JOBS Act")<sup>43</sup> amended Sarbanes-Oxley to provide that any additional rules adopted by the PCAOB after April 5, 2012 do not apply to audits of emerging growth companies ("EGCs")<sup>44</sup> unless the SEC "determines that the application of such additional requirements is necessary or appropriate in the public interest, after considering the protection of investors, and whether the action will promote efficiency, competition, and capital formation".<sup>45</sup>

---

<sup>41</sup> See AICPA Peer Review Alert 11-01 (February 2011).

<sup>42</sup> Pub. L. 107-204, 116 Stat. 745 (2002). Under Section 101 of the Act, the mission of the PCAOB is to oversee the audit of companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports. Section 103 of the Act authorizes the Board to adopt auditing standards for use by registered public accounting firms in the preparation and issuance of audit reports "as required by [the] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors."

<sup>43</sup> Pub. L. No. 112-106, 126 Stat. 306 (2012).

<sup>44</sup> Section 3(a)(80) of the Exchange Act defines the term "emerging growth company."

<sup>45</sup> See Section 103(a)(3)(C) of Sarbanes-Oxley (15 U.S.C. §7213(a)(3)), as amended by Section 104 of the JOBS Act, Pub. L. No. 112-106 (2012).

As previously discussed, the attestation standards will apply solely in connection with audits of registered brokers and dealers pursuant to SEC Rule 17a-5. PCAOB staff has discussed the applicability of the JOBS Act to this rulemaking with the SEC staff. The PCAOB is not aware of any EGCs that are also registered brokers or dealers.<sup>46</sup> Moreover, the reporting regimes for registered brokers and dealers under SEC Rule 17a-5 are separate and distinct from those for companies subject to reporting requirements pursuant to Section 13 and 15 of the Exchange Act or for a Securities Act registration statement. The Board defers to the SEC on the applicability of the JOBS Act to this rulemaking and stands ready to assist the SEC with any additional analysis that may become necessary.

## VI. Effective Date

The attestation standards will be effective, subject to approval by the SEC, for examination engagements and review engagements for fiscal years ending on or after June 1, 2014. This effective date coincides with the effective date for the corresponding amendments to SEC Rule 17a-5.<sup>47</sup>

\* \* \*

On the 10th day of October, in the year 2013, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

## Interim Standards

---

### References to GAAS

PCAOB Auditing Standard No. 1 (PCAOB Release No. 2003-025) supersedes all references in the PCAOB interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA. It also requires that auditor's reports on the financial statements of issuers that are issued or reissued after the effective date of Auditing Standard No. 1 (AS 1) include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

The AICPA has not made conforming changes to the PCAOB's Interim Professional Auditing Standards (which are contained in this section) to reflect this requirement and intent of AS 1 issued by the PCAOB and approved by the Securities and Exchange Commission. AS 1 should be followed where there are conflicts between AS 1 and the PCAOB's Interim Professional Auditing Standards. Such conforming changes will be made when the PCAOB issues a rule or standard that identifies and makes such changes.

## AU Section 110

# ***Responsibilities and Functions of the Independent Auditor***

**Source:** SAS No. 1, section 110; SAS No. 78; SAS No. 82; Auditing Standard Nos. 8–15.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** The objective of the ordinary audit of financial statements by the independent auditor is the expression of an opinion on the fairness with which they present, in all material respects, financial position, results of operations, and its cash flows in conformity with generally accepted accounting principles. The auditor's report is the medium through which he expresses his opinion or, if circumstances require, disclaims an opinion. In either case, he states whether his audit has been made in accordance with generally accepted auditing standards. These standards require him to state whether, in his opinion, the financial statements are presented in conformity with generally accepted accounting principles and to identify those circumstances in which such principles have not been consistently observed in the preparation of the financial statements of the current period in relation to those of the preceding period.

## **Distinction Between Responsibilities of Auditor and Management**

**.02** The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud.<sup>1</sup> Because of the nature of audit evidence and the characteristics of fraud, the auditor is able to obtain reasonable, but not absolute, assurance that material misstatements are detected.<sup>2</sup> The auditor has no responsibility to plan and perform the audit to obtain reasonable assurance that misstatements, whether caused by errors or fraud, that are not material to the financial statements are detected. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.03** The financial statements are management's responsibility. The auditor's responsibility is to express an opinion on the financial statements. Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, initiate, record, process, and report transactions (as well as events and conditions) consistent

---

<sup>1</sup> See Auditing Standard No. 11, *Consideration of Materiality in Planning and Performing an Audit*. The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for error or fraud. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>2</sup> See section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

with management's assertions embodied in the financial statements. The entity's transactions and the related assets, liabilities, and equity are within the direct knowledge and control of management. The auditor's knowledge of these matters and internal control is limited to that acquired through the audit. Thus, the fair presentation of financial statements in conformity with generally accepted accounting principles<sup>3</sup> is an implicit and integral part of management's responsibility. The independent auditor may make suggestions about the form or content of the financial statements or draft them, in whole or in part, based on information from management during the performance of the audit. However, the auditor's responsibility for the financial statements he or she has audited is confined to the expression of his or her opinion on them. [Revised, April 1989, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards Nos. 53 through 62. As amended, effective for audits of financial statements for periods beginning on or after January 1, 1997, by Statement on Auditing Standards No. 78. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997. Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

## Professional Qualifications

**.04** The professional qualifications required of the independent auditor are those of a person with the education and experience to practice as such. They do not include those of a person trained for or qualified to engage in another profession or occupation. For example, the independent auditor, in observing the taking of a physical inventory, does not purport to act as an appraiser, a valuer, or an expert in materials. Similarly, although the independent auditor is informed in a general manner about matters of commercial law, he does not purport to act in the capacity of a lawyer and may appropriately rely upon the advice of attorneys in all matters of law. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

**.05** In the observance of generally accepted auditing standards, the independent auditor must exercise his judgment in determining which auditing procedures are necessary in the circumstances to afford a reasonable basis for his opinion. His judgment is required to be the informed judgment of a qualified professional person. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

## Detection of Fraud

**[.06-.09]** [Superseded January 1977 by Statement on Auditing Standards No. 16, as superseded by Statement on Auditing Standards No. 53, as superseded by section 316. Paragraphs renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

---

<sup>3</sup> The responsibilities and functions of the independent auditor are also applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles; references in this section to financial statements presented in conformity with generally accepted accounting principles also include those presentations. [Footnote added, effective for audits of financial statements for periods beginning on or after January 1, 1997, by Statement on Auditing Standards No. 78. Footnote renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

## Responsibility to the Profession

**.10** The independent auditor also has a responsibility to his profession, the responsibility to comply with the standards accepted by his fellow practitioners. In recognition of the importance of such compliance, the American Institute of Certified Public Accountants has adopted, as part of its Code of Professional Conduct, rules which support the standards and provide a basis for their enforcement. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 82, February 1997.]

---

## AU Section 150

# Generally Accepted Auditing Standards

(Supersedes SAS No. 1, section 150)

Source: SAS No. 95; SAS No. 98; Auditing Standard Nos. 8–15.

**Effective for audits of financial statements for periods beginning on or after December 15, 2001, unless otherwise indicated.**

.01 An independent auditor plans, conducts, and reports the results of an audit in accordance with generally accepted auditing standards (GAAS). Auditing standards provide a measure of audit quality and the objectives to be achieved in an audit. Auditing procedures differ from auditing standards. Auditing procedures are acts that the auditor performs during the course of an audit to comply with auditing standards.

## Auditing Standards

.02 *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The general, field work, and reporting standards (the 10 standards) approved and adopted by the membership of the AICPA, as amended by the AICPA Auditing Standards Board (ASB), are as follows:

### *General Standards*

1. The audit is to be performed by a person or persons having adequate technical training and proficiency as an auditor.
2. In all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor or auditors.
3. Due professional care is to be exercised in the performance of the audit and the preparation of the report.

### *Standards of Field Work*

1. The work is to be adequately planned and assistants, if any, are to be properly supervised.
2. A sufficient understanding of internal control is to be obtained to plan the audit and to determine the nature, timing, and extent of tests to be performed.
3. Sufficient appropriate evidential matter is to be obtained through inspection, observation, inquiries, and confirmations to afford a reasonable basis for an opinion regarding the financial statements under audit.

### *Standards of Reporting*

1. The report shall state whether the financial statements are presented in accordance with generally accepted accounting principles (GAAP).
2. The report shall identify those circumstances in which such principles have not been consistently observed in the current period in relation to the preceding period.

3. Informative disclosures in the financial statements are to be regarded as reasonably adequate unless otherwise stated in the report.
4. The report shall contain either an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.

**.03** Rule 202, *Compliance With Standards*, of the AICPA Code of Professional Conduct [ET section 202.01], requires an AICPA member who performs an audit (the auditor) to comply with standards promulgated by the ASB.<sup>1</sup> The ASB develops and issues standards in the form of Statements on Auditing Standards (SASs) through a due process that includes deliberation in meetings open to the public, public exposure of proposed SASs, and a formal vote. The SASs are codified within the framework of the 10 standards.

**.04** The auditor should have sufficient knowledge of the SASs to identify those that are applicable to his or her audit. The nature of the 10 standards and the SASs requires the auditor to exercise professional judgment in applying them. Materiality and audit risk also underlie the application of the 10 standards and the SASs, particularly those related to field work and reporting.<sup>[2]</sup> The auditor should be prepared to justify departures from the SASs.

## Interpretive Publications

**.05** *Interpretive publications* consist of auditing Interpretations of the SASs, appendixes to the SASs,<sup>3</sup> auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.<sup>4</sup> Interpretive publications are not auditing standards. Interpretive publications are recommendations on the application of the SASs in specific circumstances, including engagements for entities in specialized industries. An interpretive publication is issued under the authority of the ASB after all ASB members have been provided an opportunity to consider and comment on whether the proposed interpretive publication is consistent with the SASs. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.06** The auditor should be aware of and consider interpretive publications applicable to his or her audit. If the auditor does not apply the auditing guidance included in an applicable interpretive publication, the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance.

---

<sup>1</sup> In certain engagements, the auditor also may be subject to other auditing requirements, such as Government Auditing Standards issued by the comptroller general of the United States, or rules and regulations promulgated by the U.S. Securities and Exchange Commission.

<sup>[2]</sup> [Footnote deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>3</sup> Appendixes to SASs referred to in paragraph .05 of this section do not include previously issued appendixes to original pronouncements that when adopted modified other SASs. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98.]

<sup>4</sup> Auditing Interpretations of the SASs are included in the codified version of the SASs and are cross-referenced from the related AU sections in Appendix C. AICPA Audit and Accounting Guides and auditing Statements of Position are listed in Appendix D. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

## Other Auditing Publications

**.07** *Other auditing publications* include AICPA auditing publications not referred to above; auditing articles in the *Journal of Accountancy* and other professional journals; auditing articles in the *AICPA CPA Letter*; continuing professional education programs and other instruction materials, textbooks, guide books, audit programs, and checklists; and other auditing publications from state CPA societies, other organizations, and individuals.<sup>5</sup> Other auditing publications have no authoritative status; however, they may help the auditor understand and apply the SASs.

**.08** If an auditor applies the auditing guidance included in an other auditing publication, he or she should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit, and appropriate. In determining whether an other auditing publication is appropriate, the auditor may wish to consider the degree to which the publication is recognized as being helpful in understanding and applying the SASs and the degree to which the issuer or author is recognized as an authority in auditing matters. Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are presumed to be appropriate.<sup>6</sup>

## Effective Date

**.09** This section is effective for audits of financial statements for periods beginning on or after December 15, 2001.

---

---

<sup>5</sup> The auditor is not expected to be aware of the full body of other auditing publications. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

<sup>6</sup> Other auditing publications published by the AICPA that have been reviewed by the AICPA Audit and Attest Standards staff are listed in AU Appendix F. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

## AU Section 161

# ***The Relationship of Generally Accepted Auditing Standards to Quality Control Standards***

(Supersedes SAS No. 4)<sup>[1]</sup>

**Source:** SAS No. 25; SAS No. 98.

**Issue date, unless otherwise indicated:** November, 1979.

**.01** The independent auditor is responsible for compliance with generally accepted auditing standards in an audit engagement. Rule 202 [ET section 202.01] of the Rules of Conduct of the Code of Professional Conduct of the American Institute of Certified Public Accountants requires members to comply with such standards when associated with financial statements.

**.02** A firm of independent auditors has a responsibility to adopt a system of quality control in conducting an audit practice.<sup>2</sup> Thus, a firm should establish quality control policies and procedures to provide it with reasonable assurance that its personnel comply with generally accepted auditing standards in its audit engagements. The nature and extent of a firm's quality control policies and procedures depend on factors such as its size, the degree of operating autonomy allowed its personnel and its practice offices, the nature of its practice, its organization, and appropriate cost-benefit considerations. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 96. As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

**.03** Generally accepted auditing standards relate to the conduct of individual audit engagements; quality control standards relate to the conduct of a firm's audit practice as a whole. Thus, generally accepted auditing standards and quality control standards are related, and the quality control policies and procedures that a firm adopts may affect both the conduct of individual audit engagements and the conduct of a firm's audit practice as a whole. However, deficiencies in or instances of noncompliance with a firm's quality control policies and procedures do not, in and of themselves, indicate that a particular audit engagement was not performed in accordance with generally accepted auditing standards. [As amended, effective September 2002, by Statement on Auditing Standards No. 98.]

---

<sup>[1]</sup> [Footnote deleted by the issuance of Statement on Auditing Standards No. 98, September 2002.]

<sup>2</sup> The elements of quality control are identified in Statement on Quality Control Standards (SQCS) No. 2, *System of Quality Control for a CPA Firm's Accounting and Auditing Practice* [QC section 20]. A system of quality control is broadly defined as a process to provide the firm with reasonable assurance that its personnel comply with applicable professional standards and the firm's standards of quality. [Footnote added, effective September 2002, by Statement on Auditing Standards No. 98.]

## AU Section 201

### *Nature of the General Standards*

**Source:** SAS No. 1, section 201.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** The general standards are personal in nature and are concerned with the qualifications of the auditor and the quality of his work as distinct from those standards which relate to the performance of his field work and to his reporting. These personal, or general, standards apply alike to the areas of field work and reporting.

---

## AU Section 210

# Training and Proficiency of the Independent Auditor

**Source:** SAS No. 1, section 210; SAS No. 5; Auditing Standard Nos. 8–15.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** The first general standard is:

The audit is to be performed by a person or persons having adequate technical training and proficiency as an auditor.

**.02** This standard recognizes that however capable a person may be in other fields, including business and finance, he cannot meet the requirements of the auditing standards without proper education and experience in the field of auditing.

**.03** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In the performance of the audit which leads to an opinion, the independent auditor holds himself out as one who is proficient in accounting and auditing. The attainment of that proficiency begins with the auditor's formal education and extends into his subsequent experience. The independent auditor must undergo training adequate to meet the requirements of a professional. This training must be adequate in technical scope and should include a commensurate measure of general education. The junior assistant, just entering upon an auditing career, must obtain his professional experience with the proper supervision and review of his work by a more experienced superior. The nature and extent of supervision and review must necessarily reflect wide variances in practice. The engagement partner must exercise seasoned judgment in the varying degrees of his supervision and review of the work done and judgments exercised by his subordinates, who in turn must meet the responsibilities attaching to the varying gradations and functions of their work.

**.04** The independent auditor's formal education and professional experience complement one another; each auditor exercising authority upon an engagement should weigh these attributes in determining the extent of his supervision of subordinates and review of their work. It should be recognized that the training of a professional man includes a continual awareness of developments taking place in business and in his profession. He must study, understand, and apply new pronouncements on accounting principles and auditing procedures as they are developed by authoritative bodies within the accounting profession.

**.05** In the course of his day-to-day practice, the independent auditor encounters a wide range of judgment on the part of management, varying from true objective judgment to the occasional extreme of deliberate misstatement. He is retained to audit and report upon the financial statements of a business because, through his training and experience, he has become skilled in accounting and auditing and has acquired the ability to consider objectively and to exercise independent judgment with respect to the information recorded in books of account or otherwise disclosed by his audit. [As amended July, 1975 by Statement on Auditing Standards No. 5.]

## AU Section 220

# Independence

Source: SAS No. 1, section 220.

Issue date, unless otherwise indicated: November, 1972.

.01 The second general standard is:

In all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor or auditors.

.02 This standard requires that the auditor be independent; aside from being in public practice (as distinct from being in private practice), he must be without bias with respect to the client since otherwise he would lack that impartiality necessary for the dependability of his findings, however excellent his technical proficiency may be. However, independence does not imply the attitude of a prosecutor but rather a judicial impartiality that recognizes an obligation for fairness not only to management and owners of a business but also to creditors and those who may otherwise rely (in part, at least) upon the independent auditor's report, as in the case of prospective owners or creditors.

.03 It is of utmost importance to the profession that the general public maintain confidence in the independence of independent auditors. Public confidence would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence. To be independent, the auditor must be intellectually honest; to be *recognized* as independent, he must be free from any obligation to or interest in the client, its management, or its owners. For example, an independent auditor auditing a company of which he was also a director might be intellectually honest, but it is unlikely that the public would accept him as independent since he would be in effect auditing decisions which he had a part in making. Likewise, an auditor with a substantial financial interest in a company might be unbiased in expressing his opinion on the financial statements of the company, but the public would be reluctant to believe that he was unbiased. Independent auditors should not only be independent in fact; they should avoid situations that may lead outsiders to doubt their independence.

.04 The profession has established, through the AICPA's Code of Professional Conduct, precepts to guard against the *presumption* of loss of independence. "Presumption" is stressed because the possession of intrinsic independence is a matter of personal quality rather than of rules that formulate certain objective tests. Insofar as these precepts have been incorporated in the profession's code, they have the force of professional law for the independent auditor.

.05 The Securities and Exchange Commission (SEC) has also adopted requirements for independence of auditors who report on financial statements filed with it that differ from the AICPA requirements in certain respects.<sup>[1]</sup>

---

<sup>[1]</sup> [Footnote deleted, December 2001, to acknowledge the dissolution of the Independence Standard Board.]

**.06** The independent auditor should administer his practice within the spirit of these precepts and rules if he is to achieve a proper degree of independence in the conduct of his work.

**.07** To emphasize independence from management, many corporations follow the practice of having the independent auditor appointed by the board of directors or elected by the stockholders.

---

## AU Section 230

# *Due Professional Care in the Performance of Work*<sup>\*</sup>

**Source:** SAS No. 1, section 230; SAS No. 41; SAS No. 82; SAS No. 99; Auditing Standard No. 5; Auditing Standard Nos. 8–15.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** The third general standard is:

Due professional care is to be exercised in the planning and performance of the audit and the preparation of the report.<sup>1</sup>

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.02** This standard requires the independent auditor to plan and perform his or her work with due professional care. Due professional care imposes a responsibility upon each professional within an independent auditor's organization to observe the standards of field work and reporting. [As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.03** *Cooley on Torts*, a legal treatise, describes the obligation for due care as follows:

Every man who offers his services to another and is employed assumes the duty to exercise in the employment such skill as he possesses with reasonable care and diligence. In all these employments where peculiar skill is requisite, if one offers his services, he is understood as holding himself out to the public as possessing the degree of skill commonly possessed by others in the same employment, and if his pretensions are unfounded, he commits a species of fraud upon every man who employs him in reliance on his public profession. But no man, whether skilled or unskilled, undertakes that the task he assumes shall be performed successfully, and without fault or error; he undertakes for good faith and integrity, but not for infallibility, and he is liable to his employer for negligence, bad faith, or dishonesty, but not for losses consequent upon pure errors of judgment.<sup>2</sup>

[As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.04** The matter of due professional care concerns what the independent auditor does and how well he or she does it. The quotation from *Cooley on Torts* provides a source from which an auditor's responsibility for conducting an audit with due professional care can be derived. The remainder of the section discusses the auditor's responsibility in the context of an audit. [As amended,

---

<sup>\*</sup> [Title amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>1</sup> This amendment revises the third general standard of the ten generally accepted auditing standards. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>2</sup> D. Haggard, *Cooley on Torts*, 472 (4th ed., 1932). [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

April 1982, by Statement on Auditing Standards No. 41. As amended, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.05** An auditor should possess "the degree of skill commonly possessed" by other auditors and should exercise it with "reasonable care and diligence" (that is, with due professional care). [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.06** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

Auditors should be assigned to tasks and supervised commensurate with their level of knowledge, skill, and ability so that they can evaluate the audit evidence they are examining.<sup>[3]</sup> The engagement partner should know, at a minimum, the relevant professional accounting and auditing standards and should be knowledgeable about the client. The engagement partner is responsible for the assignment of tasks to, and supervision of, the members of the engagement team.<sup>4</sup> [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Professional Skepticism

**.07** Due professional care requires the auditor to exercise *professional skepticism*. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor uses the knowledge, skill, and ability called for by the profession of public accounting to diligently perform, in good faith and with integrity, the gathering and objective evaluation of evidence. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.08** Gathering and objectively evaluating audit evidence requires the auditor to consider the competency and sufficiency of the evidence. Since evidence is gathered and evaluated throughout the audit, professional skepticism should be exercised throughout the audit process. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

**.09** The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest. [Paragraph added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

## Reasonable Assurance

**.10** [The following paragraph is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]

---

<sup>[3]</sup> [Footnote deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>4</sup> See Auditing Standard No. 10, *Supervision of the Audit Engagement*. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

The exercise of due professional care allows the auditor to obtain *reasonable assurance* about whether the financial statements are free of material misstatement, whether caused by error or fraud, or whether any material weaknesses exist as of the date of management's assessment. Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud. Although not absolute assurance, reasonable assurance is a high level of assurance. Therefore, an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) may not detect a material weakness in internal control over financial reporting or a material misstatement to the financial statements.

**.11** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The independent auditor's objective is to obtain sufficient appropriate evidential matter to provide him or her with a reasonable basis for forming an opinion. The nature of most evidence derives, in part, from the concept of selective testing of the data being audited, which involves judgment regarding both the areas to be tested and the nature, timing, and extent of the tests to be performed. In addition, judgment is required in interpreting the results of audit testing and evaluating audit evidence. Even with good faith and integrity, mistakes and errors in judgment can be made. Furthermore, accounting presentations contain accounting estimates, the measurement of which is inherently uncertain and depends on the outcome of future events. The auditor exercises professional judgment in evaluating the reasonableness of accounting estimates based on information that could reasonably be expected to be available prior to the completion of field work.<sup>5</sup> As a result of these factors, in the great majority of cases, the auditor has to rely on evidence that is persuasive rather than convincing.<sup>[6]</sup>

**.12** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Because of the characteristics of fraud, a properly planned and performed audit may not detect a material misstatement. Characteristics of fraud include (a) concealment through collusion among management, employees, or third parties; (b) withheld, misrepresented, or falsified documentation; and (c) the ability of management to override or instruct others to override what otherwise appears to be effective controls. For example, auditing procedures may be ineffective for detecting an intentional misstatement that is concealed through collusion among personnel within the entity and third parties or among management or employees of the entity. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. In addition, an audit conducted in accordance with generally accepted auditing standards rarely involves authentication of documentation, nor are auditors trained as or expected to be experts in such authentication. (See paragraph 9 of Auditing Standard No. 15, *Audit Evidence*.) Furthermore, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed. Finally, management has the ability to directly or indirectly manipulate accounting records and present fraudulent financial information by overriding controls in unpredictable ways.

---

<sup>5</sup> See section 342, *Auditing Accounting Estimates*. [Footnote added, effective for audits of financial statements for periods ending on or after December 15, 1997, by Statement on Auditing Standards No. 82.]

<sup>[6]</sup> *[Footnote deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

**.13** *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Since the auditor's opinion on the financial statements or internal control over financial reporting is based on the concept of obtaining reasonable assurance, the auditor is not an insurer and his or her report does not constitute a guarantee. Therefore, the subsequent discovery that either a material misstatement, whether from error or fraud, exists in the financial statements or a material weakness in internal control over financial reporting exists does not, in and of itself, evidence (a) failure to obtain reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with the standards of the Public Company Accounting Oversight Board (United States).

## AU Section 315

# Communications Between Predecessor and Successor Auditors

(Supersedes SAS No. 7)

**Source:** SAS No. 84; SAS No. 93; Auditing Standard No. 5; Auditing Standard Nos. 8–15.

**Effective with respect to acceptance of an engagement after March 31, 1998, unless otherwise indicated.**

## Introduction

**.01** This section provides guidance on communications between predecessor and successor auditors when a change of auditors is in process or has taken place. It also provides communications guidance when possible misstatements are discovered in financial statements reported on by a predecessor auditor. This section applies whenever an independent auditor is considering accepting an engagement to audit or reaudit (see paragraph .14 of this section) financial statements in accordance with generally accepted auditing standards, and after such auditor has been appointed to perform such an engagement.

**.02** For the purposes of this section, the term *predecessor auditor* refers to an auditor who (a) has reported on the most recent audited financial statements<sup>1</sup> or was engaged to perform but did not complete an audit of the financial statements<sup>2</sup> and (b) has resigned, declined to stand for reappointment, or been notified that his or her services have been, or may be, terminated. The term *successor auditor* refers to an auditor who is considering accepting an engagement to audit financial statements but has not communicated with the predecessor auditor as provided in paragraphs .07 through .10 and to an auditor who has accepted such an engagement. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

## Change of Auditors

**.03** An auditor should not accept an engagement until the communications described in paragraphs .07 through .10 have been evaluated.<sup>3</sup> However, an

---

<sup>1</sup> The provisions of this section are not required if the most recent audited financial statements are more than two years prior to the beginning of the earliest period to be audited by the successor auditor.

<sup>2</sup> There may be two predecessor auditors: the auditor who reported on the most recent audited financial statements and the auditor who was engaged to perform but did not complete an audit of any subsequent financial statements. [As amended, effective for audits of financial statements for periods ending on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

<sup>3</sup> When the most recent financial statements have been compiled or reviewed in accordance with the Statements on Standards for Accounting and Review Services, the accountant who reported on

(continued)

auditor may make a proposal for an audit engagement before communicating with the predecessor auditor. The auditor may wish to advise the prospective client (for example, in a proposal) that acceptance cannot be final until the communications have been evaluated.

**.04** Other communications between the successor and predecessor auditors, described in paragraph .11, are advisable to assist in the planning of the engagement. However, the timing of these other communications is more flexible. The successor auditor may initiate these other communications either prior to acceptance of the engagement or subsequent thereto.

**.05** When more than one auditor is considering accepting an engagement, the predecessor auditor should not be expected to be available to respond to inquiries until a successor auditor has been selected by the prospective client and has accepted the engagement subject to the evaluation of the communications with the predecessor auditor as provided in paragraphs .07 through .10.

**.06** The initiative for communicating rests with the successor auditor. The communication may be either written or oral. Both the predecessor and successor auditors should hold in confidence information obtained from each other. This obligation applies whether or not the successor auditor accepts the engagement.

### **Communications Before Successor Auditor Accepts Engagement**

**.07** Inquiry of the predecessor auditor is a necessary procedure because the predecessor auditor may be able to provide information that will assist the successor auditor in determining whether to accept the engagement. The successor auditor should bear in mind that, among other things, the predecessor auditor and the client may have disagreed about accounting principles, auditing procedures, or similarly significant matters.

**.08** The successor auditor should request permission from the prospective client to make an inquiry of the predecessor auditor prior to final acceptance of the engagement. Except as permitted by the Rules of the Code of Professional Conduct, an auditor is precluded from disclosing confidential information obtained in the course of an engagement unless the client specifically consents. Thus, the successor auditor should ask the prospective client to authorize the predecessor auditor to respond fully to the successor auditor's inquiries. If a prospective client refuses to permit the predecessor auditor to respond or limits the response, the successor auditor should inquire as to the reasons and consider the implications of that refusal in deciding whether to accept the engagement.

**.09** The successor auditor should make specific and reasonable inquiries of the predecessor auditor regarding matters that will assist the successor auditor in determining whether to accept the engagement. Matters subject to inquiry should include—

- Information that might bear on the integrity of management.
- Disagreements with management as to accounting principles, auditing procedures, or other similarly significant matters.

---

*(footnote continued)*

those financial statements is not a predecessor auditor. Although not required by this section, in these circumstances the successor auditor may find the matters described in paragraphs .08 and .09 useful in determining whether to accept the engagement.

- Communications to audit committees or others with equivalent authority and responsibility<sup>4</sup> regarding fraud, illegal acts by clients, and internal-control-related matters.<sup>5</sup>
- The predecessor auditor's understanding as to the reasons for the change of auditors.

The successor auditor may wish to consider other reasonable inquiries.

.10 The predecessor auditor should respond promptly and fully, on the basis of known facts, to the successor auditor's reasonable inquiries. However, should the predecessor auditor decide, due to unusual circumstances such as impending, threatened, or potential litigation; disciplinary proceedings; or other unusual circumstances, not to respond fully to the inquiries, the predecessor auditor should clearly state that the response is limited. If the successor auditor receives a limited response, its implications should be considered in deciding whether to accept the engagement.

## Other Communications

.11 The successor auditor should request that the client authorize the predecessor auditor to allow a review of the predecessor auditor's working papers. The predecessor auditor may wish to request a consent and acknowledgment letter from the client to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized.<sup>6</sup> It is customary in such circumstances for the predecessor auditor to make himself or herself available to the successor auditor and make available for review certain of the working papers. The predecessor auditor should determine which working papers are to be made available for review and which may be copied. The predecessor auditor should ordinarily permit the successor auditor to review working papers, including documentation of planning, internal control, audit results, and other matters of continuing accounting and auditing significance, such as the working paper analysis of balance sheet accounts, and those relating to contingencies. Also, the predecessor auditor should reach an understanding with the successor auditor as to the use of the working papers.<sup>7</sup> The extent, if any, to which a predecessor auditor permits access to the working papers is a matter of judgment.

## Successor Auditor's Use of Communications

.12 *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The successor auditor must obtain sufficient appropriate evidential matter to afford a reasonable basis for expressing an opinion on the financial statements he or she has been engaged to audit, including evaluating the consistency of the application of accounting principles. The audit evidence used in analyzing the impact of the opening balances on the current-year financial statements

---

<sup>4</sup> For entities that do not have audit committees, the phrase "others with equivalent authority and responsibility" may include the board of directors, the board of trustees, or the owner in owner-managed entities.

<sup>5</sup> See section 316, *Consideration of Fraud in a Financial Statement Audit*; section 317, *Illegal Acts by Clients*; and section 325, *Communication of Internal Control Related Matters Noted in an Audit*.

<sup>6</sup> Appendix A [paragraph .24] contains an illustrative client consent and acknowledgment letter.

<sup>7</sup> Before permitting access to the working papers, the predecessor auditor may wish to obtain a written communication from the successor auditor regarding the use of the working papers. Appendix B [paragraph .25] contains an illustrative successor auditor acknowledgment letter.

and consistency of accounting principles is a matter of professional judgment. Such audit evidence may include the most recent audited financial statements, the predecessor auditor's report thereon,<sup>8</sup> the results of inquiry of the predecessor auditor, the results of the successor auditor's review of the predecessor auditor's working papers relating to the most recently completed audit, and audit procedures performed on the current period's transactions that may provide evidence about the opening balances or consistency. For example, evidence gathered during the current year's audit may provide information about the realizability and existence of receivables and inventory recorded at the beginning of the year. The successor auditor may also apply appropriate auditing procedures to account balances at the beginning of the period under audit and to transactions in prior periods.

**.13** The successor auditor's review of the predecessor auditor's working papers may affect the nature, timing, and extent of the successor auditor's procedures with respect to the opening balances and consistency of accounting principles. However, the nature, timing, and extent of audit work performed and the conclusions reached in both these areas are solely the responsibility of the successor auditor. In reporting on the audit, the successor auditor should not make reference to the report or work of the predecessor auditor as the basis, in part, for the successor auditor's own opinion.

## Audits of Financial Statements That Have Been Previously Audited

**.14** If an auditor is asked to audit and report on financial statements that have been previously audited and reported on (henceforth referred to as a reaudit), the auditor considering acceptance of the reaudit engagement is also a successor auditor, and the auditor who previously reported is also a predecessor auditor. In addition to the communications described in paragraphs .07 through .10, the successor auditor should state that the purpose of the inquiries is to obtain information about whether to accept an engagement to perform a reaudit.

**.15** If the successor auditor accepts the reaudit engagement, he or she may consider the information obtained from inquiries of the predecessor auditor and review of the predecessor auditor's report and working papers in planning the reaudit. However, the information obtained from those inquiries and any review of the predecessor auditor's report and working papers is not sufficient to afford a basis for expressing an opinion. The nature, timing, and extent of the audit work performed and the conclusions reached in the reaudit are solely the responsibility of the successor auditor performing the reaudit.

**.16** *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

The successor auditor should plan and perform the reaudit in accordance with generally accepted auditing standards. The successor auditor should not assume responsibility for the predecessor auditor's work or issue a report that reflects divided responsibility as described in section 543, *Part of Audit Performed by Other Independent Auditors*. Furthermore, the predecessor auditor is not a specialist as defined in AU sec. 336, *Using the Work of a Specialist*, nor does the predecessor auditor's work constitute the work of others as described in AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in*

---

<sup>8</sup> The successor auditor may wish to make inquiries about the professional reputation and standing of the predecessor auditor. See section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph 10a.

*an Audit of Financial Statements*, or paragraphs 16–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

**.17** If the successor auditor has audited the current period, the results of that audit may be considered in planning and performing the reaudit of the preceding period or periods and may provide evidential matter that is useful in performing the reaudit.

**.18** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

If, in a reaudit engagement, the successor auditor is unable to obtain sufficient appropriate evidential matter to express an opinion on the financial statements, the successor auditor should qualify or disclaim an opinion because of the inability to perform procedures the successor auditor considers necessary in the circumstances.

**.19** The successor auditor should request working papers for the period or periods under reaudit and the period prior to the reaudit period. However, the extent, if any, to which the predecessor auditor permits access to the working papers is a matter of judgment. (See paragraph .11 of this section.)

**.20** In a reaudit, the successor auditor generally will be unable to observe inventory or make physical counts at the reaudit date or dates in the manner discussed in paragraphs .09 through .11 of section 331, *Inventories*. In such cases, the successor auditor may consider the knowledge obtained from his or her review of the predecessor auditor's working papers and inquiries of the predecessor auditor to determine the nature, timing, and extent of procedures to be applied in the circumstances. The successor auditor performing the reaudit should, if material, observe or perform some physical counts of inventory at a date subsequent to the period of the reaudit, in connection with a current audit or otherwise, and apply appropriate tests of intervening transactions. Appropriate procedures may include tests of prior transactions, reviews of records of prior counts, and the application of analytical procedures, such as gross profit tests.

## Discovery of Possible Misstatements in Financial Statements Reported on by a Predecessor Auditor

**.21** If during the audit or reaudit, the successor auditor becomes aware of information that leads him or her to believe that financial statements reported on by the predecessor auditor may require revision, the successor auditor should request that the client inform the predecessor auditor of the situation and arrange for the three parties to discuss this information and attempt to resolve the matter. The successor auditor should communicate to the predecessor auditor any information that the predecessor auditor may need to consider in accordance with section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, which sets out the procedures that an auditor should follow when the auditor subsequently discovers facts that may have affected the audited financial statements previously reported on.<sup>9</sup>

**.22** If the client refuses to inform the predecessor auditor or if the successor auditor is not satisfied with the resolution of the matter, the successor auditor should evaluate (a) possible implications on the current engagement and

---

<sup>9</sup> See section 508, *Reports on Audited Financial Statements*, paragraphs .70 through .74, for reporting guidance.

(b) whether to resign from the engagement. Furthermore, the successor auditor may wish to consult with his or her legal counsel in determining an appropriate course of further action.

## **Effective Date**

**.23** This section will be effective with respect to acceptance of an engagement after March 31, 1998. Earlier application is permitted.

.24

## Appendix A

### Illustrative Client Consent and Acknowledgment Letter

1. Paragraph .11 of this section states, "The successor auditor should request that the client authorize the predecessor auditor to allow a review of the predecessor auditor's working papers. The predecessor auditor may wish to request a consent and acknowledgment letter from the client to document this authorization in an effort to reduce misunderstandings about the scope of the communications being authorized." The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

ABC Enterprises

[Address]

You have given your consent to allow [name of successor CPA firm], as successor independent auditors for ABC Enterprises (ABC), access to our working papers for our audit of the December 31, 19X1, financial statements of ABC. You also have given your consent to us to respond fully to [name of successor CPA firm] inquiries. You understand and agree that the review of our working papers is undertaken solely for the purpose of obtaining an understanding about ABC and certain information about our audit to assist [name of successor CPA firm] in planning the audit of the December 31, 19X2, financial statements of ABC.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Attached is the form of the letter we will furnish [name of successor CPA firm] regarding the use of the working papers.

Very truly yours,

[Predecessor Auditor]

## Appendix B

### Illustrative Successor Auditor Acknowledgment Letter

1. Paragraph .11, footnote 7, of this section states, "Before permitting access to the working papers, the predecessor auditor may wish to obtain a written communication from the successor auditor regarding the use of the working papers." The following letter is presented for illustrative purposes only and is not required by professional standards.

[Date]

[Successor Auditor]

[Address]

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the December 31, 20X1, financial statements of ABC Enterprises (ABC). We rendered a report on those financial statements and have not performed any audit procedures subsequent to the audit report date. In connection with your audit of ABC's 20X2 financial statements, you have requested access to our working papers prepared in connection with that audit. ABC has authorized our firm to allow you to review those working papers.

Our audit, and the working papers prepared in connection therewith, of ABC's financial statements were not planned or conducted in contemplation of your review. Therefore, items of possible interest to you may not have been specifically addressed. Our use of professional judgment and the assessment of audit risk and materiality for the purpose of our audit mean that matters may have existed that would have been assessed differently by you. We make no representation as to the sufficiency or appropriateness of the information in our working papers for your purposes.

We understand that the purpose of your review is to obtain information about ABC and our 19X1 audit results to assist you in planning your 19X2 audit of ABC. For that purpose only, we will provide you access to our working papers that relate to that objective.

Upon request, we will provide copies of those working papers that provide factual information about ABC. You agree to subject any such copies or information otherwise derived from our working papers to your normal policy for retention of working papers and protection of confidential client information. Furthermore, in the event of a third-party request for access to your working papers prepared in connection with your audits of ABC, you agree to obtain our permission before voluntarily allowing any such access to our working papers or information otherwise derived from our working papers, and to obtain on our behalf any releases that you obtain from such third party. You agree to advise us promptly and provide us a copy of any subpoena, summons, or other court order for access to your working papers that include copies of our working papers or information otherwise derived therefrom.

Please confirm your agreement with the foregoing by signing and dating a copy of this letter and returning it to us.

Very truly yours,

[Predecessor Auditor]

By: \_\_\_\_\_

Accepted:

[*Successor Auditor*]

By: \_\_\_\_\_ Date: \_\_\_\_\_

Even with the client's consent, access to the predecessor auditor's working papers may still be limited. Experience has shown that the predecessor auditor may be willing to grant broader access if given additional assurance concerning the use of the working papers. Accordingly, the successor auditor might consider agreeing to the following limitations on the review of the predecessor auditor's working papers in order to obtain broader access:

- The successor auditor will not comment, orally or in writing, to anyone as a result of the review as to whether the predecessor auditor's engagement was performed in accordance with generally accepted auditing standards.
- The successor auditor will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of the predecessor auditor's audit.
- The successor auditor will not use the audit procedures or results thereof documented in the predecessor auditor's working papers as evidential matter in rendering an opinion on the 19X2 financial statements of ABC Enterprises, except as contemplated in Statement on Auditing Standards No. 84.

The following paragraph illustrates the above:

Because your review of our working papers is undertaken solely for the purpose described above and may not entail a review of all our working papers, you agree that (1) the information obtained from the review will not be used by you for any other purpose, (2) you will not comment, orally or in writing, to anyone as a result of that review as to whether our audit was performed in accordance with generally accepted auditing standards, (3) you will not provide expert testimony or litigation support services or otherwise accept an engagement to comment on issues relating to the quality of our audit, and (4) you will not use the audit procedures or results thereof documented in our working papers as evidential matter in rendering your opinion on the 19X2 financial statements of ABC, except as contemplated in Statement on Auditing Standards No. 84.

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

## AU Section 316

# Consideration of Fraud in a Financial Statement Audit

(Supersedes SAS No. 82)

**Source:** SAS No. 99; Auditing Standard No. 2; Auditing Standard No. 5; Auditing Standard Nos. 8–15; Auditing Standard No. 16.

**Effective for audits of financial statements for periods beginning on or after December 15, 2002.**

## Introduction and Overview

**.01** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Section 110, *Responsibilities and Functions of the Independent Auditor*, paragraph .02, states, "The auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud. [footnote omitted]"<sup>1</sup> This section establishes requirements and provides direction relevant to fulfilling that responsibility, as it relates to fraud, in an audit of financial statements.<sup>2</sup>

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: When performing an integrated audit of financial statements and internal control over financial reporting, refer to paragraphs 14–15 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, regarding fraud considerations, in addition to the fraud consideration set forth in this section.

**.01A** *[The following paragraph is added and effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements regarding the process of identifying and assessing risks of material misstatement of the financial statements. Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, establishes requirements regarding designing and implementing appropriate responses to the risks of material misstatement. Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements regarding the auditor's

---

<sup>1</sup> The auditor's consideration of illegal acts and responsibility for detecting misstatements resulting from illegal acts is defined in section 317, *Illegal Acts by Clients*. For those illegal acts that are defined in that section as having a direct and material effect on the determination of financial statement amounts, the auditor's responsibility to detect misstatements resulting from such illegal acts is the same as that for errors, or fraud. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

<sup>2</sup> For purposes of this standard, the term "audit of financial statements" refers to the financial statement portion of the integrated audit and to the audit of financial statements only. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

evaluation of audit results and determination of whether he or she has obtained sufficient appropriate audit evidence.

**.02** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The following is an overview of the organization and content of this section:

- *Description and characteristics of fraud.* This section describes fraud and its characteristics. (See paragraphs .05 through .12.)
- *The importance of exercising professional skepticism.* This section discusses the need for auditors to exercise professional skepticism when considering the possibility that a material misstatement due to fraud could be present. (See paragraph .13.)
- *Responding to fraud risks.* This section discusses certain responses to fraud risks involving the nature, timing, and extent of audit procedures, including:
  - Responses to assessed fraud risks relating to fraudulent financial reporting and misappropriation of assets (see paragraphs .52 through .56).
  - Responses to specifically address the fraud risks arising from management override of internal controls (see paragraphs .57 through .67).
- *Communicating about fraud to management, the audit committee, and others.* This section provides guidance regarding the auditor's communications about fraud to management, the audit committee, and others. (See paragraphs .79 through .82.)
- *Documenting the auditor's consideration of fraud.* This section describes related documentation requirements. (See paragraph .83.)

**[.03]** *[Paragraph deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

**.04** Although this section focuses on the auditor's consideration of fraud in an audit of financial statements, it is management's responsibility to design and implement programs and controls to prevent, deter, and detect fraud.<sup>3</sup> That responsibility is described in section 110.03, which states, "Management is responsible for adopting sound accounting policies and for establishing and maintaining internal control that will, among other things, initiate, record, process, and report transactions (as well as events and conditions) consistent with management's assertions embodied in the financial statements." Management, along with those who have responsibility for oversight of the financial reporting process (such as the audit committee, board of trustees, board of directors, or the owner in owner-managed entities), should set the proper tone; create and maintain a culture of honesty and high ethical standards; and establish appropriate controls to prevent, deter, and detect fraud. When management and those responsible for the oversight of the financial reporting process fulfill those responsibilities, the opportunities to commit fraud can be reduced significantly.

---

<sup>3</sup> In its October 1987 report, the National Commission on Fraudulent Financial Reporting, also known as the Treadway Commission, noted, "The responsibility for reliable financial reporting resides first and foremost at the corporate level. Top management, starting with the chief executive officer, sets the tone and establishes the financial reporting environment. Therefore, reducing the risk of fraudulent financial reporting must start with the reporting company."

## Description and Characteristics of Fraud

**.05** Fraud is a broad legal concept and auditors do not make legal determinations of whether fraud has occurred. Rather, the auditor's interest specifically relates to acts that result in a material misstatement of the financial statements. The primary factor that distinguishes fraud from error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. For purposes of the section, *fraud* is an intentional act that results in a material misstatement in financial statements that are the subject of an audit.<sup>4</sup>

**.06** Two types of misstatements are relevant to the auditor's consideration of fraud—misstatements arising from fraudulent financial reporting and misstatements arising from misappropriation of assets.

- *Misstatements arising from fraudulent financial reporting* are intentional misstatements or omissions of amounts or disclosures in financial statements designed to deceive financial statement users where the effect causes the financial statements not to be presented, in all material respects, in conformity with generally accepted accounting principles (GAAP).<sup>5</sup> Fraudulent financial reporting may be accomplished by the following:
  - Manipulation, falsification, or alteration of accounting records or supporting documents from which financial statements are prepared
  - Misrepresentation in or intentional omission from the financial statements of events, transactions, or other significant information
  - Intentional misapplication of accounting principles relating to amounts, classification, manner of presentation, or disclosure

Fraudulent financial reporting need not be the result of a grand plan or conspiracy. It may be that management representatives rationalize the appropriateness of a material misstatement, for example, as an aggressive rather than indefensible interpretation of complex accounting rules, or as a temporary misstatement of financial statements, including interim statements, expected to be corrected later when operational results improve.

- *Misstatements arising from misappropriation of assets* (sometimes referred to as theft or defalcation) involve the theft of an entity's assets where the effect of the theft causes the financial statements not to be presented, in all material respects, in conformity with GAAP. Misappropriation of assets can be accomplished in various ways, including embezzling receipts, stealing assets, or causing an entity to pay for goods or services that have not been received.

---

<sup>4</sup> Intent is often difficult to determine, particularly in matters involving accounting estimates and the application of accounting principles. For example, unreasonable accounting estimates may be unintentional or may be the result of an intentional attempt to misstate the financial statements. Although an audit is not designed to determine intent, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether the misstatement is intentional or not.

<sup>5</sup> The auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to accounting principles applicable to that company. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

Misappropriation of assets may be accompanied by false or misleading records or documents, possibly created by circumventing controls. The scope of this section includes only those misappropriations of assets for which the effect of the misappropriation causes the financial statements not to be fairly presented, in all material respects, in conformity with GAAP.

**.07** Three conditions generally are present when fraud occurs. First, management or other employees have an *incentive* or are under *pressure*, which provides a reason to commit fraud. Second, circumstances exist—for example, the absence of controls, ineffective controls, or the ability of management to override controls—that provide an *opportunity* for a fraud to be perpetrated. Third, those involved are able to *rationalize* committing a fraudulent act. Some individuals possess an *attitude*, character, or set of ethical values that allow them to knowingly and intentionally commit a dishonest act. However, even otherwise honest individuals can commit fraud in an environment that imposes sufficient pressure on them. The greater the incentive or pressure, the more likely an individual will be able to rationalize the acceptability of committing fraud.

**.08** Management has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively.<sup>6</sup> Management can either direct employees to perpetrate fraud or solicit their help in carrying it out. In addition, management personnel at a component of the entity may be in a position to manipulate the accounting records of the component in a manner that causes a material misstatement in the consolidated financial statements of the entity. Management override of controls can occur in unpredictable ways.

**.09** Typically, management and employees engaged in fraud will take steps to conceal the fraud from the auditors and others within and outside the organization. Fraud may be concealed by withholding evidence or misrepresenting information in response to inquiries or by falsifying documentation. For example, management that engages in fraudulent financial reporting might alter shipping documents. Employees or members of management who misappropriate cash might try to conceal their thefts by forging signatures or falsifying electronic approvals on disbursement authorizations. An audit conducted in accordance with GAAS rarely involves the authentication of such documentation, nor are auditors trained as or expected to be experts in such authentication. In addition, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed.

**.10** Fraud also may be concealed through collusion among management, employees, or third parties. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. For example, through collusion, false evidence that controls have been operating effectively may be presented to the auditor, or consistent misleading explanations may be given to the auditor by more than one individual within the entity to explain an unexpected result of an analytical procedure.

---

<sup>6</sup> Frauds have been committed by management override of existing controls using such techniques as (a) recording fictitious journal entries, particularly those recorded close to the end of an accounting period to manipulate operating results, (b) intentionally biasing assumptions and judgments used to estimate account balances, and (c) altering records and terms related to significant and unusual transactions.

As another example, the auditor may receive a false confirmation from a third party that is in collusion with management.

**.11** Although fraud usually is concealed and management's intent is difficult to determine, the presence of certain conditions may suggest to the auditor the possibility that fraud may exist. For example, an important contract may be missing, a subsidiary ledger may not be satisfactorily reconciled to its control account, or the results of an analytical procedure performed during the audit may not be consistent with expectations. However, these conditions may be the result of circumstances other than fraud. Documents may legitimately have been lost or misfiled; the subsidiary ledger may be out of balance with its control account because of an unintentional accounting error; and unexpected analytical relationships may be the result of unanticipated changes in underlying economic factors. Even reports of alleged fraud may not always be reliable because an employee or outsider may be mistaken or may be motivated for unknown reasons to make a false allegation.

**.12** As indicated in paragraph .01, the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by fraud or error.<sup>7</sup> However, absolute assurance is not attainable and thus even a properly planned and performed audit may not detect a material misstatement resulting from fraud. A material misstatement may not be detected because of the nature of audit evidence or because the characteristics of fraud as discussed above may cause the auditor to rely unknowingly on audit evidence that appears to be valid, but is, in fact, false and fraudulent. Furthermore, audit procedures that are effective for detecting an error may be ineffective for detecting fraud.

## The Importance of Exercising Professional Skepticism

**.13** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Due professional care requires the auditor to exercise professional skepticism. See section 230, *Due Professional Care in the Performance of Work*, paragraphs .07 through .09. Because of the characteristics of fraud, the auditor's exercise of professional skepticism is important when considering fraud risks. Professional skepticism is an attitude that includes a questioning mind and a critical assessment of audit evidence. The auditor should conduct the engagement with a mindset that recognizes the possibility that a material misstatement due to fraud could be present, regardless of any past experience with the entity and regardless of the auditor's belief about management's honesty and integrity. Furthermore, professional skepticism requires an ongoing questioning of whether the information and evidence obtained suggests that a material misstatement due to fraud has occurred. In exercising professional skepticism in gathering and evaluating evidence, the auditor should not be satisfied with less-than-persuasive evidence because of a belief that management is honest.

**[.14-.45]<sup>[8-19]</sup>** *[Paragraphs .14-.45 and preceding heading, "Discussion Among Engagement Personnel Regarding the Risks of Material Misstatement Due to Fraud," deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

---

<sup>7</sup> For a further discussion of the concept of reasonable assurance, see section 230, *Due Professional Care in the Performance of Work*, paragraphs .10 through .13.

<sup>[8-19]</sup> *[Footnotes 8-19 deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

## Responding to Assessed Fraud Risks

[.46–.50] *[Paragraphs .46–.50 deleted and preceding heading revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

### Overall Responses to the Risk of Material Misstatement

#### Responses Involving the Nature, Timing, and Extent of Procedures to Be Performed

[.51] *[Paragraph .51 deleted and preceding heading revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

**.52** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Paragraph 8 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, states that "[t]he auditor should design and perform audit procedures in a manner that addresses the assessed risks of material misstatement due to error or fraud for each relevant assertion of each significant account and disclosure." Paragraph 12 of Auditing Standard No. 13 states that "the audit procedures that are necessary to address the assessed fraud risks depend upon the types of risks and the relevant assertions that might be affected."

Note: Paragraph 71.b. of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, states that a fraud risk is a significant risk. Accordingly, the requirement for responding to significant risks also applies to fraud risks.

**.53** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The following are examples of responses to assessed fraud risks involving the nature, timing, and extent of audit procedures:

- Performing procedures at locations on a surprise or unannounced basis, for example, observing inventory on unexpected dates or at unexpected locations or counting cash on a surprise basis.
- Requesting that inventories be counted at the end of the reporting period or on a date closer to period end to minimize the risk of manipulation of balances in the period between the date of completion of the count and the end of the reporting period.
- Making oral inquiries of major customers and suppliers in addition to sending written confirmations, or sending confirmation requests to a specific party within an organization.
- Performing substantive analytical procedures using disaggregated data, for example, comparing gross profit or operating margins by location, line of business, or month to auditor-developed expectations.<sup>20</sup>

---

<sup>20</sup> AU sec. 329, *Substantive Analytical Procedures*, establishes requirements regarding performing analytical procedures as substantive tests. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

- Interviewing personnel involved in activities in areas in which a fraud risk has been identified to obtain their insights about the risk and how controls address the risk. (See paragraph 54 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.)
- If other independent auditors are auditing the financial statements of one or more subsidiaries, divisions, or branches, discussing with them the extent of work that needs to be performed to address the fraud risk resulting from transactions and activities among these components.

### **Additional Examples of Audit Procedures Performed to Respond to Assessed Fraud Risks Relating to Fraudulent Financial Reporting**

**.54** [The following paragraph and preceding heading are effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

The following are additional examples of audit procedures that might be performed in response to assessed fraud risks relating to fraudulent financial reporting:

- *Revenue recognition.* Because revenue recognition is dependent on the particular facts and circumstances, as well as accounting principles and practices that can vary by industry, the auditor ordinarily will develop auditing procedures based on the auditor's understanding of the entity and its environment, including the composition of revenues, specific attributes of the revenue transactions, and unique industry considerations. If there is an identified fraud risk that involves improper revenue recognition, the auditor also may want to consider:
  - Performing substantive analytical procedures relating to revenue using disaggregated data, for example, comparing revenue reported by month and by product line or business segment during the current reporting period with comparable prior periods. Computer-assisted audit techniques may be useful in identifying unusual or unexpected revenue relationships or transactions.
  - Confirming with customers certain relevant contract terms and the absence of side agreements, because the appropriate accounting often is influenced by such terms or agreements.<sup>21</sup> For example, acceptance criteria, delivery and payment terms, the absence of future or continuing vendor obligations, the right to return the product, guaranteed resale amounts, and cancellation or refund provisions often are relevant in such circumstances.
  - Inquiring of the entity's sales and marketing personnel or in-house legal counsel regarding sales or shipments near the end of the period and their knowledge of any unusual terms or conditions associated with these transactions.

---

<sup>21</sup> AU sec. 330, *The Confirmation Process*, establishes requirements regarding the confirmation process in audits of financial statements. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

- Being physically present at one or more locations at period end to observe goods being shipped or being readied for shipment (or returns awaiting processing) and performing other appropriate sales and inventory cutoff procedures.
- For those situations for which revenue transactions are electronically initiated, processed, and recorded, testing controls to determine whether they provide assurance that recorded revenue transactions occurred and are properly recorded.
- *Inventory quantities.* If there is an identified fraud risk that affects inventory quantities, examining the entity's inventory records may help identify locations or items that require specific attention during or after the physical inventory count. Such a review may lead to a decision to observe inventory counts at certain locations on an unannounced basis (see paragraph .53) or to conduct inventory counts at all locations on the same date. In addition, it may be appropriate for inventory counts to be conducted at or near the end of the reporting period to minimize the risk of inappropriate manipulation during the period between the count and the end of the reporting period.

It also may be appropriate for the auditor to perform additional procedures during the observation of the count, for example, more rigorously examining the contents of boxed items, the manner in which the goods are stacked (for example, hollow squares) or labeled, and the quality (that is, purity, grade, or concentration) of liquid substances such as perfumes or specialty chemicals. Using the work of a specialist may be helpful in this regard.<sup>22</sup> Furthermore, additional testing of count sheets, tags, or other records, or the retention of copies of these records, may be warranted to minimize the risk of subsequent alteration or inappropriate compilation.

Following the physical inventory count, the auditor may want to employ additional procedures directed at the quantities included in the priced out inventories to further test the reasonableness of the quantities counted—for example, comparison of quantities for the current period with prior periods by class or category of inventory, location or other criteria, or comparison of quantities counted with perpetual records. The auditor also may consider using computer-assisted audit techniques to further test the compilation of the physical inventory counts—for example, sorting by tag number to test tag controls or by item serial number to test the possibility of item omission or duplication.

- *Management estimates.* The auditor may identify a fraud risk involving the development of management estimates. This risk may affect a number of accounts and assertions, including asset valuation, estimates relating to specific transactions (such as acquisitions, restructurings, or disposals of a segment of the business), and other significant accrued liabilities (such as pension and other postretirement benefit obligations, or environmental remediation

---

<sup>22</sup> AU sec. 336, *Using the Work of a Specialist*, establishes requirements for an auditor who uses the work of a specialist in performing an audit of financial statements. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

liabilities). The risk may also relate to significant changes in assumptions relating to recurring estimates. As indicated in section 342, *Auditing Accounting Estimates*, estimates are based on subjective as well as objective factors and there is a potential for bias in the subjective factors, even when management's estimation process involves competent personnel using relevant and reliable data.

In addressing an identified fraud risk involving accounting estimates, the auditor may want to supplement the audit evidence otherwise obtained (see section 342.09 through .14). In certain circumstances (for example, evaluating the reasonableness of management's estimate of the fair value of a derivative), it may be appropriate to engage a specialist or develop an independent estimate for comparison to management's estimate. Information gathered about the entity and its environment may help the auditor evaluate the reasonableness of such management estimates and underlying judgments and assumptions.

A retrospective review of similar management judgments and assumptions applied in prior periods (see paragraphs .63 through .65) may also provide insight about the reasonableness of judgments and assumptions supporting management estimates.

### **Examples of Audit Procedures Performed to Respond to Fraud Risks Relating to Misappropriations of Assets**

**.55** *[The following paragraph and preceding heading are effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor may have identified a fraud risk relating to misappropriation of assets. For example, the auditor may conclude that the risk of asset misappropriation at a particular operating location is significant because a large amount of easily accessible cash is maintained at that location, or there are inventory items such as laptop computers at that location that can easily be moved and sold.

**.56** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The audit procedures performed in response to a fraud risk relating to misappropriation of assets usually will be directed toward certain account balances. Although some of the audit procedures noted in paragraphs .53 and .54 and in paragraphs 8 through 15 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, may apply in such circumstances, such as the procedures directed at inventory quantities, the scope of the work should be linked to the specific information about the misappropriation risk that has been identified. For example, if a particular asset is highly susceptible to misappropriation and a potential misstatement would be material to the financial statements, obtaining an understanding of the controls related to the prevention and detection of such misappropriation and testing the design and operating effectiveness of such controls may be warranted. In certain circumstances, physical inspection of such assets (for example, counting cash or securities) at or near the end of the reporting period may be appropriate. In addition, the use of substantive analytical procedures, such as the development by the auditor of an expected dollar amount at a high level of precision, to be compared with a recorded amount, may be effective in certain circumstances.

## Audit Procedures Performed to Specifically Address the Risk of Management Override of Controls

**.57** [The following paragraph and preceding heading are effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

As noted in paragraph .08, management is in a unique position to perpetrate fraud because of its ability to directly or indirectly manipulate accounting records and prepare fraudulent financial statements by overriding established controls that otherwise appear to be operating effectively. By its nature, management override of controls can occur in unpredictable ways. Accordingly, as part of the auditor's responses that address fraud risks, the procedures described in paragraphs .58 through .67 should be performed to specifically address the risk of management override of controls.

**.58 Examining journal entries and other adjustments for evidence of possible material misstatement due to fraud.** Material misstatements of financial statements due to fraud often involve the manipulation of the financial reporting process by (a) recording inappropriate or unauthorized journal entries throughout the year or at period end, or (b) making adjustments to amounts reported in the financial statements that are not reflected in formal journal entries, such as through consolidating adjustments, report combinations, and reclassifications. Accordingly, the auditor should design procedures to test the appropriateness of journal entries recorded in the general ledger and other adjustments (for example, entries posted directly to financial statement drafts) made in the preparation of the financial statements. More specifically, the auditor should:

- a. Obtain an understanding of the entity's financial reporting process<sup>23</sup> and the controls over journal entries and other adjustments. (See paragraphs .59 and .60.)
- b. Identify and select journal entries and other adjustments for testing. (See paragraph .61.)
- c. Determine the timing of the testing. (See paragraph .62.)
- d. Inquire of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments.

**.59** The auditor's understanding of the entity's financial reporting process may help in identifying the type, number, and monetary value of journal entries and other adjustments that typically are made in preparing the financial statements. For example, the auditor's understanding may include the sources of significant debits and credits to an account, who can initiate entries to the general ledger or transaction processing systems, what approvals are required for such entries, and how journal entries are recorded (for example, entries may be initiated and recorded online with no physical evidence, or may be created in paper form and entered in batch mode).

**.60** An entity may have implemented specific controls over journal entries and other adjustments. For example, an entity may use journal entries that are preformatted with account numbers and specific user approval criteria, and may have automated controls to generate an exception report for any entries that were unsuccessfully proposed for recording or entries that were recorded

---

<sup>23</sup> See paragraphs 28 through 32 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

and processed outside of established parameters. The auditor should obtain an understanding of the design of such controls over journal entries and other adjustments and determine whether they are suitably designed and have been placed in operation.

**.61** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should use professional judgment in determining the nature, timing, and extent of the testing of journal entries and other adjustments. For purposes of identifying and selecting specific entries and other adjustments for testing, and determining the appropriate method of examining the underlying support for the items selected, the auditor should consider:

- *The auditor's assessment of fraud risk due to fraud.* The presence of fraud risk factors or other conditions may help the auditor to identify specific classes of journal entries for testing and indicate the extent of testing necessary.
- *The effectiveness of controls that have been implemented over journal entries and other adjustments.* Effective controls over the preparation and posting of journal entries and adjustments may affect the extent of substantive testing necessary, provided that the auditor has tested the controls. However, even though controls might be implemented and operating effectively, the auditor's substantive procedures for testing journal entries and other adjustments should include the identification and substantive testing of specific items.
- *The entity's financial reporting process and the nature of the evidence that can be examined.* The auditor's procedures for testing journal entries and other adjustments will vary based on the nature of the financial reporting process. For many entities, routine processing of transactions involves a combination of manual and automated steps and procedures. Similarly, the processing of journal entries and other adjustments might involve both manual and automated procedures and controls. Regardless of the method, the auditor's procedures should include selecting from the general ledger journal entries to be tested and examining support for those items. In addition, the auditor should be aware that journal entries and other adjustments might exist in either electronic or paper form. When information technology (IT) is used in the financial reporting process, journal entries and other adjustments might exist only in electronic form. Electronic evidence often requires extraction of the desired data by an auditor with IT knowledge and skills or the use of an IT specialist. In an IT environment, it may be necessary for the auditor to employ computer-assisted audit techniques (for example, report writers, software or data extraction tools, or other systems-based techniques) to identify the journal entries and other adjustments to be tested.
- *The characteristics of fraudulent entries or adjustments.* Inappropriate journal entries and other adjustments often have certain unique identifying characteristics. Such characteristics may include entries (a) made to unrelated, unusual, or seldom-used accounts, (b) made by individuals who typically do not make journal entries, (c) recorded at the end of the period or as post-closing entries that have little or no explanation or description, (d) made either before or during the preparation of the financial statements

that do not have account numbers, or (e) containing round numbers or a consistent ending number.

- *The nature and complexity of the accounts.* Inappropriate journal entries or adjustments may be applied to accounts that (a) contain transactions that are complex or unusual in nature, (b) contain significant estimates and period-end adjustments, (c) have been prone to errors in the past, (d) have not been reconciled on a timely basis or contain unreconciled differences, (e) contain intercompany transactions, or (f) are otherwise associated with an identified fraud risk. The auditor should recognize, however, that inappropriate journal entries and adjustments also might be made to other accounts. In audits of entities that have multiple locations or business units, the auditor should determine whether to select journal entries from locations based on factors set forth in paragraphs 11 through 14 of Auditing Standard No. 9, *Audit Planning*.
- *Journal entries or other adjustments processed outside the normal course of business.* Standard journal entries used on a recurring basis to record transactions such as monthly sales, purchases, and cash disbursements, or to record recurring periodic accounting estimates generally are subject to the entity's internal controls. Nonstandard entries (for example, entries used to record nonrecurring transactions, such as a business combination, or entries used to record a nonrecurring estimate, such as an asset impairment) might not be subject to the same level of internal control. In addition, other adjustments such as consolidating adjustments, report combinations, and reclassifications generally are not reflected in formal journal entries and might not be subject to the entity's internal controls. Accordingly, the auditor should consider placing additional emphasis on identifying and testing items processed outside of the normal course of business.

**.62** Because fraudulent journal entries often are made at the end of a reporting period, the auditor's testing ordinarily should focus on the journal entries and other adjustments made at that time. However, because material misstatements in financial statements due to fraud can occur throughout the period and may involve extensive efforts to conceal how it is accomplished, the auditor should consider whether there also is a need to test journal entries throughout the period under audit.

**.63** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

**Reviewing accounting estimates for biases that could result in material misstatement due to fraud.** In preparing financial statements, management is responsible for making a number of judgments or assumptions that affect significant accounting estimates<sup>24</sup> and for monitoring the reasonableness of such estimates on an ongoing basis. Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates. Paragraphs 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results*, discuss the auditor's responsibilities for assessing bias in accounting estimates and the effect of bias on the financial statements.

**.64** The auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to

---

<sup>24</sup> See section 342, *Auditing Accounting Estimates*, paragraphs .02 and .16, for a definition of accounting estimates and a listing of examples.

determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management. The significant accounting estimates selected for testing should include those that are based on highly sensitive assumptions or are otherwise significantly affected by judgments made by management. With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current-year estimates. This review, however, is not intended to call into question the auditor's professional judgments made in the prior year that were based on information available at the time.

**.65** If the auditor identifies a possible bias on the part of management in making accounting estimates, the auditor should evaluate whether circumstances producing such a bias represent a risk of a material misstatement due to fraud. For example, information coming to the auditor's attention may indicate a risk that adjustments to the current-year estimates might be recorded at the instruction of management to arbitrarily achieve a specified earnings target.

**.66 *Evaluating the business rationale for significant unusual transactions.*** During the course of the audit, the auditor may become aware of significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual given the auditor's understanding of the entity and its environment. The auditor should gain an understanding of the business rationale for such transactions and whether that rationale (or the lack thereof) suggests that the transactions may have been entered into to engage in fraudulent financial reporting or conceal misappropriation of assets.

**.67** In understanding the business rationale for the transactions, the auditor should consider:

- Whether the form of such transactions is overly complex (for example, involves multiple entities within a consolidated group or unrelated third parties).
- Whether management has discussed the nature of and accounting for such transactions with the audit committee or board of directors.
- Whether management is placing more emphasis on the need for a particular accounting treatment than on the underlying economics of the transaction.
- Whether transactions that involve unconsolidated related parties, including special purpose entities, have been properly reviewed and approved by the audit committee or board of directors.
- Whether the transactions involve previously unidentified related parties<sup>25</sup> or parties that do not have the substance or the financial strength to support the transaction without assistance from the entity under audit.

**[.68–.78]** <sup>[26–36]</sup> [*Paragraphs .68–.78 and preceding heading, "Evaluating Audit Evidence," deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.*]

---

<sup>25</sup> Section 334, *Related Parties*, provides guidance with respect to the identification of related-party relationships and transactions, including transactions that may be outside the ordinary course of business (see, in particular, section 334.06).

<sup>[26–36]</sup> [*Footnotes 26–36 deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.*]

## Communicating About Possible Fraud to Management, the Audit Committee, and Others<sup>37</sup>

**.79** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

Whenever the auditor has determined that there is evidence that fraud may exist, that matter should be brought to the attention of an appropriate level of management. This is appropriate even if the matter might be considered inconsequential, such as a minor defalcation by an employee at a low level in the entity's organization. Fraud involving senior management and fraud (whether caused by senior management or other employees) that causes a material misstatement of the financial statements should be reported directly to the audit committee in a timely manner and prior to the issuance of the auditor's report. In addition, the auditor should reach an understanding with the audit committee regarding the nature and extent of communications with the committee about misappropriations perpetrated by lower-level employees.

**.80** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If the auditor, as a result of the assessment of the risks of material misstatement, has identified fraud risks that have continuing control implications (whether or not transactions or adjustments that could be the result of fraud have been detected), the auditor should consider whether these risks represent significant deficiencies that must be communicated to senior management and the audit committee.<sup>38</sup> (See section 325, "Communications About Control Deficiencies in An Audit of Financial Statements," paragraph 4.). The auditor also should evaluate whether the absence of or deficiencies in controls that address fraud risks or otherwise help prevent, deter, and detect fraud (see paragraphs 72–73 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*) represent significant deficiencies or material weaknesses that should be communicated to senior management and the audit committee.

**.81** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

*[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor also should consider communicating other fraud risks, if any, identified by the auditor. Such a communication may be a part of an overall communication to the audit committee of business and financial statement risks affecting the entity and/or in conjunction with the auditor communication about the qualitative aspects of the entity's accounting policies and practices (see paragraphs 12–13 of Auditing Standard No. 16, *Communications with Audit Committees*). The auditor should communicate these matters to the audit committee in a timely manner and prior to the issuance of the auditor's report.

**.82** The disclosure of possible fraud to parties other than the client's senior management and its audit committee ordinarily is not part of the auditor's responsibility and ordinarily would be precluded by the auditor's ethical or legal

---

<sup>37</sup> The requirements to communicate noted in paragraphs .79 through .82 extend to any intentional misstatement of financial statements (see paragraph .03). However, the communication may use terms other than fraud—for example, irregularity, intentional misstatement, misappropriation, or defalcations—if there is possible confusion with a legal definition of fraud or other reason to prefer alternative terms.

<sup>38</sup> Alternatively, the auditor may decide to communicate solely with the audit committee.

obligations of confidentiality unless the matter is reflected in the auditor's report. The auditor should recognize, however, that in the following circumstances a duty to disclose to parties outside the entity may exist:

- a. To comply with certain legal and regulatory requirements<sup>39</sup>
- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*<sup>40</sup>
- c. In response to a subpoena
- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive governmental financial assistance<sup>41</sup>

Because potential conflicts between the auditor's ethical and legal obligations for confidentiality of client matters may be complex, the auditor may wish to consult with legal counsel before discussing matters covered by paragraphs .79 through .81 with parties outside the client.

## Documenting the Auditor's Consideration of Fraud

**.83** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

The auditor should document the following:

- The discussion among engagement personnel in planning the audit regarding the susceptibility of the entity's financial statements to material misstatement due to fraud, including how and when the discussion occurred, the audit team members who participated, and the subject matter discussed (See paragraphs 52 and 53 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.)
- The procedures performed to obtain information necessary to identify and assess the fraud risks (See paragraph 47, paragraphs 56 through 58, and paragraphs 65 through 69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.)
- The fraud risks that were identified at the financial statement and assertion levels (see paragraphs 59 through 69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*), and the linkage of those risks to the auditor's response (see paragraphs 5 through 15 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*).
- If the auditor has not identified in a particular circumstance, improper revenue recognition as a fraud risk, the reasons supporting the auditor's conclusion (See paragraph 68 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.)

---

<sup>39</sup> These requirements include reports in connection with the termination of the engagement, such as when the entity reports an auditor change on Form 8-K and the fraud or related risk factors constitute a *reportable event* or is the source of a *disagreement*, as these terms are defined in Item 304 of Regulation S-K. These requirements also include reports that may be required, under certain circumstances, pursuant to Section 10A(b)1 of the Securities Exchange Act of 1934 relating to an illegal act that has a material effect on the financial statements.

<sup>40</sup> Section 315 requires the specific permission of the client.

<sup>41</sup> For example, *Government Auditing Standards* (the Yellow Book) require auditors to report fraud or illegal acts directly to parties outside the audited entity in certain circumstances.

- The results of the procedures performed to address the assessed fraud risks, including those procedures performed to further address the risk of management override of controls (See paragraph 15 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatements*.)
- Other conditions and analytical relationships that caused the auditor to believe that additional auditing procedures or other responses were required and any further responses the auditor concluded were appropriate, to address such risks or other conditions (See paragraphs 5 through 9 of Auditing Standard No. 14, *Evaluating Audit Results*.)
- The nature of the communications about fraud made to management, the audit committee, and others (See paragraphs .79 through .82.)

[.84] *[Paragraph .84 and preceding heading, "Effective Date," deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

.85

## Appendix

### Examples of Fraud Risk Factors

*[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

**A.1** This appendix contains examples of risk factors discussed in paragraphs 65 through 69 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*. Separately presented are examples relating to the two types of fraud relevant to the auditor's consideration—that is, fraudulent financial reporting and misappropriation of assets. For each of these types of fraud, the risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may wish to consider additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different size or with different ownership characteristics or circumstances. Also, the order of the examples of risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

### Risk Factors Relating to Misstatements Arising From Fraudulent Financial Reporting

**A.2** The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

#### Incentives/Pressures

- a. Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):
  - High degree of competition or market saturation, accompanied by declining margins
  - High vulnerability to rapid changes, such as changes in technology, product obsolescence, or interest rates
  - Significant declines in customer demand and increasing business failures in either the industry or overall economy
  - Operating losses making the threat of bankruptcy, foreclosure, or hostile takeover imminent
  - Recurring negative cash flows from operations or an inability to generate cash flows from operations while reporting earnings and earnings growth
  - Rapid growth or unusual profitability, especially compared to that of other companies in the same industry
  - New accounting, statutory, or regulatory requirements
- b. Excessive pressure exists for management to meet the requirements or expectations of third parties due to the following:

- Profitability or trend level expectations of investment analysts, institutional investors, significant creditors, or other external parties (particularly expectations that are unduly aggressive or unrealistic), including expectations created by management in, for example, overly optimistic press releases or annual report messages
  - Need to obtain additional debt or equity financing to stay competitive—including financing of major research and development or capital expenditures
  - Marginal ability to meet exchange listing requirements or debt repayment or other debt covenant requirements
  - Perceived or real adverse effects of reporting poor financial results on significant pending transactions, such as business combinations or contract awards
- c. Information available indicates that management or the board of directors' personal financial situation is threatened by the entity's financial performance arising from the following:
- Significant financial interests in the entity
  - Significant portions of their compensation (for example, bonuses, stock options, and earn-out arrangements) being contingent upon achieving aggressive targets for stock price, operating results, financial position, or cash flow<sup>1</sup>
  - Personal guarantees of debts of the entity
- d. There is excessive pressure on management or operating personnel to meet financial targets set up by the board of directors or management, including sales or profitability incentive goals.

## Opportunities

- a. The nature of the industry or the entity's operations provides opportunities to engage in fraudulent financial reporting that can arise from the following:
- Significant related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm
  - A strong financial presence or ability to dominate a certain industry sector that allows the entity to dictate terms or conditions to suppliers or customers that may result in inappropriate or non-arm's-length transactions
  - Assets, liabilities, revenues, or expenses based on significant estimates that involve subjective judgments or uncertainties that are difficult to corroborate
  - Significant, unusual, or highly complex transactions, especially those close to period end that pose difficult "substance over form" questions

---

<sup>1</sup> Management incentive plans may be contingent upon achieving targets relating only to certain accounts or selected activities of the entity, even though the related accounts or activities may not be material to the entity as a whole.

- Significant operations located or conducted across international borders in jurisdictions where differing business environments and cultures exist
  - Significant bank accounts or subsidiary or branch operations in tax-haven jurisdictions for which there appears to be no clear business justification
- b. There is ineffective monitoring of management as a result of the following:
- Domination of management by a single person or small group (in a nonowner-managed business) without compensating controls
  - Ineffective board of directors or audit committee oversight over the financial reporting process and internal control
- c. There is a complex or unstable organizational structure, as evidenced by the following:
- Difficulty in determining the organization or individuals that have controlling interest in the entity
  - Overly complex organizational structure involving unusual legal entities or managerial lines of authority
  - High turnover of senior management, counsel, or board members
- d. Internal control components are deficient as a result of the following:
- Inadequate monitoring of controls, including automated controls and controls over interim financial reporting (where external reporting is required)
  - High turnover rates or employment of ineffective accounting, internal audit, or information technology staff
  - Ineffective accounting and information systems, including situations involving reportable conditions

### Attitudes/Rationalizations

Risk factors reflective of attitudes/rationalizations by board members, management, or employees, that allow them to engage in and/or justify fraudulent financial reporting, may not be susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence of such information should consider it in identifying the risks of material misstatement arising from fraudulent financial reporting. For example, auditors may become aware of the following information that may indicate a risk factor:

- Ineffective communication, implementation, support, or enforcement of the entity's values or ethical standards by management or the communication of inappropriate values or ethical standards
- Nonfinancial management's excessive participation in or preoccupation with the selection of accounting principles or the determination of significant estimates
- Known history of violations of securities laws or other laws and regulations, or claims against the entity, its senior management, or board members alleging fraud or violations of laws and regulations

- Excessive interest by management in maintaining or increasing the entity's stock price or earnings trend
- A practice by management of committing to analysts, creditors, and other third parties to achieve aggressive or unrealistic forecasts
- Management failing to correct known reportable conditions on a timely basis
- An interest by management in employing inappropriate means to minimize reported earnings for tax-motivated reasons
- Recurring attempts by management to justify marginal or inappropriate accounting on the basis of materiality
- The relationship between management and the current or predecessor auditor is strained, as exhibited by the following:
  - Frequent disputes with the current or predecessor auditor on accounting, auditing, or reporting matters
  - Unreasonable demands on the auditor, such as unreasonable time constraints regarding the completion of the audit or the issuance of the auditor's report
  - Formal or informal restrictions on the auditor that inappropriately limit access to people or information or the ability to communicate effectively with the board of directors or audit committee
  - Domineering management behavior in dealing with the auditor, especially involving attempts to influence the scope of the auditor's work or the selection or continuance of personnel assigned to or consulted on the audit engagement

## Risk Factors Relating to Misstatements Arising From Misappropriation of Assets

**A.3** Risk factors that relate to misstatements arising from misappropriation of assets are also classified according to the three conditions generally present when fraud exists: incentives/pressures, opportunities, and attitudes/rationalizations. Some of the risk factors related to misstatements arising from fraudulent financial reporting also may be present when misstatements arising from misappropriation of assets occur. For example, ineffective monitoring of management and weaknesses in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

### Incentives/Pressures

- a. Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.
- b. Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example, adverse relationships may be created by the following:

- Known or anticipated future employee layoffs
- Recent or anticipated changes to employee compensation or benefit plans
- Promotions, compensation, or other rewards inconsistent with expectations

## Opportunities

- a. Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation. For example, opportunities to misappropriate assets increase when there are the following:
  - Large amounts of cash on hand or processed
  - Inventory items that are small in size, of high value, or in high demand
  - Easily convertible assets, such as bearer bonds, diamonds, or computer chips
  - Fixed assets that are small in size, marketable, or lacking observable identification of ownership
- b. Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:
  - Inadequate segregation of duties or independent checks
  - Inadequate management oversight of employees responsible for assets, for example, inadequate supervision or monitoring of remote locations
  - Inadequate job applicant screening of employees with access to assets
  - Inadequate recordkeeping with respect to assets
  - Inadequate system of authorization and approval of transactions (for example, in purchasing)
  - Inadequate physical safeguards over cash, investments, inventory, or fixed assets
  - Lack of complete and timely reconciliations of assets
  - Lack of timely and appropriate documentation of transactions, for example, credits for merchandise returns
  - Lack of mandatory vacations for employees performing key control functions
  - Inadequate management understanding of information technology, which enables information technology employees to perpetrate a misappropriation
  - Inadequate access controls over automated records, including controls over and review of computer systems event logs.

## Attitudes/Rationalizations

Risk factors reflective of employee attitudes/rationalizations that allow them to justify misappropriations of assets, are generally not susceptible to observation by the auditor. Nevertheless, the auditor who becomes aware of the existence

of such information should consider it in identifying the risks of material misstatement arising from misappropriation of assets. For example, auditors may become aware of the following attitudes or behavior of employees who have access to assets susceptible to misappropriation:

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets
- Disregard for internal control over misappropriation of assets by overriding existing controls or by failing to correct known internal control deficiencies
- Behavior indicating displeasure or dissatisfaction with the company or its treatment of the employee
- Changes in behavior or lifestyle that may indicate assets have been misappropriated

.86

## ***Amendment to Section 230, Due Professional Care in the Performance of Work***

1. This section amends section 230, *Due Professional Care in the Performance of Work*, paragraphs .12 and .13, to include a discussion about the characteristics of fraud and a discussion about collusion. (The new language is shown in boldface italics; deleted language is shown by strikethrough.)

### **Reasonable Assurance**

**.10** The exercise of due professional care allows the auditor to obtain *reasonable assurance* that the financial statements are free of material misstatement, whether caused by error or fraud. Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud. Therefore, an audit conducted in accordance with generally accepted auditing standards may not detect a material misstatement.

**.11** The independent auditor's objective is to obtain sufficient competent evidential matter to provide him or her with a reasonable basis for forming an opinion. The nature of most evidence derives, in part, from the concept of selective testing of the data being audited, which involves judgment regarding both the areas to be tested and the nature, timing, and extent of the tests to be performed. In addition, judgment is required in interpreting the results of audit testing and evaluating audit evidence. Even with good faith and integrity, mistakes and errors in judgment can be made. Furthermore, accounting presentations contain accounting estimates, the measurement of which is inherently uncertain and depends on the outcome of future events. The auditor exercises professional judgment in evaluating the reasonableness of accounting estimates based on information that could reasonably be expected to be available prior to the completion of field work.<sup>5</sup> As a result of these factors, in the great majority of cases, the auditor has to rely on evidence that is persuasive rather than convincing.<sup>6</sup>

**.12** Because of the characteristics of fraud, ~~particularly those involving concealment and falsified documentation (including forgery),~~ a properly planned and performed audit may not detect a material misstatement. ***Characteristics of fraud include (a) concealment through collusion among management, employees, or third parties; (b) withheld, misrepresented, or falsified documentation; and (c) the ability of management to override or instruct others to override what otherwise appears to be effective controls.*** For example, ~~an audit conducted in accordance with generally accepted auditing standards rarely involves authentication of documentation, nor are auditors trained as or expected to be experts in such authentication. Also, auditing procedures may be ineffective for detecting an intentional misstatement that is concealed through collusion among client personnel~~ ***within the entity and third parties or among management or employees of the client entity. Collusion may cause the auditor who has properly performed the audit to conclude that evidence provided is persuasive when it is, in fact, false. In addition, an audit conducted in accordance with generally accepted auditing standards rarely involves authentication of documentation, nor are auditors trained as or expected to be experts in such authentication. Furthermore, an auditor may not discover the existence of a modification of documentation through a side agreement that management or a third party has not disclosed. Finally, management has***

<sup>5</sup> See section 342, *Auditing Accounting Estimates*.

<sup>6</sup> See section 326, *Evidential Matter*.

***the ability to directly or indirectly manipulate accounting records and present fraudulent financial information by overriding controls in unpredictable ways.***

.13 Since the auditor's opinion on the financial statements is based on the concept of obtaining reasonable assurance, the auditor is not an insurer and his or her report does not constitute a guarantee. Therefore, the subsequent discovery that a material misstatement, whether from error or fraud, exists in the financial statements does not, in and of itself, evidence (a) failure to obtain reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with generally accepted auditing standards.

## Amendment to Section 333, *Management Representations*, paragraph .06 and Appendix A [paragraph .16]

1. This section requires the auditor to make inquiries of management about fraud and the risk of fraud. In support of and consistent with these inquiries, this amendment revises the guidance for management representations about fraud currently found in section 333, *Management Representations*, paragraph .06*h*, and Appendix A [paragraph .16]). New language is shown in boldface italics; deleted language is shown by strikethrough.

h. Management's acknowledgment of its responsibility for the design and implementation of programs and controls to prevent and detect fraud

~~ih.~~ ***Knowledge of fraud or suspected fraud affecting the entity*** involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements<sup>8</sup>

j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others

2. Subsequent subparagraphs and footnotes are to be renumbered accordingly.

### Appendix A

#### Illustrative Management Representation Letter

2. If matters exist that should be disclosed to the auditor, they should be indicated by ~~listing them following~~ ***modifying*** the ***related*** representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ." ~~Similarly, in~~ appropriate circumstances, item ~~97~~ could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for ~~its~~ ***our*** plans to dispose of segment A, as disclosed in ~~footn~~ ***Note X*** to the financial statements, which are discussed in the minutes of the December 7, ~~2019~~ ***20X1***, meeting of the board of directors." ***Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allegation discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."***

3. The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

<sup>8</sup> See section 316.

4. Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in section 316, and related parties, in section 334, footnote 1. To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

5. The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of this section.

6.

[Date]

To [Independent Auditor]

We are providing this letter in connection with your audit(s) of the [*identification of financial statements*] of [*name of entity*] as of [*dates*] and for the [*periods*] for the purpose of expressing an opinion as to whether the [*consolidated*] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [*consolidated*] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report)*], the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.
2. We have made available to you all—
  - a. Financial records and related data.
  - b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.<sup>fn 1</sup>  
[Footnote omitted]

**6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.**

**7. ~~6.~~ We have no knowledge of any fraud or suspected fraud affecting the entity involving** ~~There has been no—~~

~~a. Management, Fraud involving management, or employees who have significant roles in the internal control~~

**b. Employees who have significant roles in internal control, or**

~~c. Fraud involving~~ **Others** where the fraud could have a material effect on the financial statements.

**8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.**

3. Subsequent subparagraphs are to be renumbered accordingly.

## Exhibit—Management Antifraud Programs and Controls

### Guidance to Help Prevent, Deter, and Detect Fraud

.88

(This exhibit is reprinted for the reader's convenience but is not an integral part of the section.)

This document is being issued jointly by the following organizations:

American Institute of Certified Public Accountants  
 Association of Certified Fraud Examiners  
 Financial Executives International  
 Information Systems Audit and Control Association  
 The Institute of Internal Auditors  
 Institute of Management Accountants  
 Society for Human Resource Management

In addition, we would also like to acknowledge the American Accounting Association, the Defense Industry Initiative, and the National Association of Corporate Directors for their review of the document and helpful comments and materials.

We gratefully acknowledge the valuable contribution provided by the Anti-Fraud Detection Subgroup:

Daniel D. Montgomery, <i>Chair</i>	David L. Landsittel
Toby J.F. Bishop	Carol A. Langelier
Dennis H. Chookaszian	Joseph T. Wells
Susan A. Finn	Janice Wilkins
Dana Hermanson	

Finally, we thank the staff of the American Institute of Certified Public Accountants for their support on this project:

Charles E. Landes <i>Director</i> <i>Audit and Attest Standards</i>	Kim M. Gibson <i>Senior Technical Manager</i> <i>Audit and Attest Standards</i>
Richard Lanza <i>Senior Program Manager</i> <i>Chief Operating Office</i>	Hugh Kelsey <i>Program Manager</i> <i>Knowledge Management</i>

This document was commissioned by the Fraud Task Force of the AICPA's Auditing Standards Board. This document has not been adopted, approved, disapproved, or otherwise acted upon by a board, committee, governing body, or membership of the above issuing organizations.

### Preface

Some organizations have significantly lower levels of misappropriation of assets and are less susceptible to fraudulent financial reporting than other organizations because these organizations take proactive steps to prevent or deter

fraud. It is only those organizations that seriously consider fraud risks and take proactive steps to create the right kind of climate to reduce its occurrence that have success in preventing fraud. This document identifies the key participants in this antifraud effort, including the board of directors, management, internal and independent auditors, and certified fraud examiners.

Management may develop and implement some of these programs and controls in response to specific identified risks of material misstatement of financial statements due to fraud. In other cases, these programs and controls may be a part of the entity's enterprise-wide risk management activities.

Management is responsible for designing and implementing systems and procedures for the prevention and detection of fraud and, along with the board of directors, for ensuring a culture and environment that promotes honesty and ethical behavior. However, because of the characteristics of fraud, a material misstatement of financial statements due to fraud may occur notwithstanding the presence of programs and controls such as those described in this document.

## Introduction

Fraud can range from minor employee theft and unproductive behavior to misappropriation of assets and fraudulent financial reporting. Material financial statement fraud can have a significant adverse effect on an entity's market value, reputation, and ability to achieve its strategic objectives. A number of highly publicized cases have heightened the awareness of the effects of fraudulent financial reporting and have led many organizations to be more proactive in taking steps to prevent or deter its occurrence. Misappropriation of assets, though often not material to the financial statements, can nonetheless result in substantial losses to an entity if a dishonest employee has the incentive and opportunity to commit fraud.

The risk of fraud can be reduced through a combination of prevention, deterrence, and detection measures. However, fraud can be difficult to detect because it often involves concealment through falsification of documents or collusion among management, employees, or third parties. Therefore, it is important to place a strong emphasis on fraud prevention, which may reduce opportunities for fraud to take place, and fraud deterrence, which could persuade individuals that they should not commit fraud because of the likelihood of detection and punishment. Moreover, prevention and deterrence measures are much less costly than the time and expense required for fraud detection and investigation.

An entity's management has both the responsibility and the means to implement measures to reduce the incidence of fraud. The measures an organization takes to prevent and deter fraud also can help create a positive workplace environment that can enhance the entity's ability to recruit and retain high-quality employees.

Research suggests that the most effective way to implement measures to reduce wrongdoing is to base them on a set of core values that are embraced by the entity. These values provide an overarching message about the key principles guiding all employees' actions. This provides a platform upon which a more detailed code of conduct can be constructed, giving more specific guidance about permitted and prohibited behavior, based on applicable laws and the organization's values. Management needs to clearly articulate that all employees will be held accountable to act within the organization's code of conduct.

This document identifies measures entities can implement to prevent, deter, and detect fraud. It discusses these measures in the context of three fundamental elements. Broadly stated, these fundamental elements are (1) create and maintain a *culture* of honesty and high ethics; (2) *evaluate* the risks of fraud and implement the processes, procedures, and controls needed to mitigate the risks and reduce the opportunities for fraud; and (3) develop an appropriate *oversight* process. Although the entire management team shares the responsibility for implementing and monitoring these activities, with oversight from the board of directors, the entity's chief executive officer (CEO) should initiate and support such measures. Without the CEO's active support, these measures are less likely to be effective.

The information presented in this document generally is applicable to entities of all sizes. However, the degree to which certain programs and controls are applied in smaller, less-complex entities and the formality of their application are likely to differ from larger organizations. For example, management of a smaller entity (or the owner of an owner-managed entity), along with those charged with governance of the financial reporting process, are responsible for creating a culture of honesty and high ethics. Management also is responsible for implementing a system of internal controls commensurate with the nature and size of the organization, but smaller entities may find that certain types of control activities are not relevant because of the involvement of and controls applied by management. However, all entities must make it clear that unethical or dishonest behavior will not be tolerated.

## Creating a Culture of Honesty and High Ethics

It is the organization's responsibility to create a culture of honesty and high ethics and to clearly communicate acceptable behavior and expectations of each employee. Such a culture is rooted in a strong set of core values (or value system) that provides the foundation for employees as to how the organization conducts its business. It also allows an entity to develop an ethical framework that covers (1) fraudulent financial reporting, (2) misappropriation of assets, and (3) corruption as well as other issues.<sup>1</sup>

Creating a culture of honesty and high ethics should include the following.

### ***Setting the Tone at the Top***

Directors and officers of corporations set the "tone at the top" for ethical behavior within any organization. Research in moral development strongly suggests that honesty can best be reinforced when a proper example is set—sometimes referred to as the tone at the top. The management of an entity cannot act one way and expect others in the entity to behave differently.

In many cases, particularly in larger organizations, it is necessary for management to both behave ethically and openly communicate its expectations for ethical behavior because most employees are not in a position to observe management's actions. Management must show employees through its words and actions that dishonest or unethical behavior will not be tolerated, even if the result of the action benefits the entity. Moreover, it should be evident that all employees will be treated equally, regardless of their position.

For example, statements by management regarding the absolute need to meet operating and financial targets can create undue pressures that may lead

---

<sup>1</sup> Corruption includes bribery and other illegal acts.

employees to commit fraud to achieve them. Setting unachievable goals for employees can give them two unattractive choices: fail or cheat. In contrast, a statement from management that says, "We are aggressive in pursuing our targets, while requiring truthful financial reporting at all times," clearly indicates to employees that integrity is a requirement. This message also conveys that the entity has "zero tolerance" for unethical behavior, including fraudulent financial reporting.

The cornerstone of an effective antifraud environment is a culture with a strong value system founded on integrity. This value system often is reflected in a code of conduct.<sup>2</sup> The code of conduct should reflect the core values of the entity and guide employees in making appropriate decisions during their workday. The code of conduct might include such topics as ethics, confidentiality, conflicts of interest, intellectual property, sexual harassment, and fraud.<sup>3</sup> For a code of conduct to be effective, it should be communicated to all personnel in an understandable fashion. It also should be developed in a participatory and positive manner that will result in both management and employees taking ownership of its content. Finally, the code of conduct should be included in an employee handbook or policy manual, or in some other formal document or location (for example, the entity's intranet) so it can be referred to when needed.

Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. For examples of codes of conduct, see Attachment 1, "AICPA 'CPA's Handbook of Fraud and Commercial Crime Prevention,' An Organizational Code of Conduct," and Attachment 2, "Financial Executives International Code of Ethics Statement" provided by Financial Executives International. In addition, visit the Institute of Management Accountant's Ethics Center at [www.imanet.org](http://www.imanet.org) for their members' standards of ethical conduct.

### ***Creating a Positive Workplace Environment***

Research results indicate that wrongdoing occurs less frequently when employees have positive feelings about an entity than when they feel abused, threatened, or ignored. Without a positive workplace environment, there are more opportunities for poor employee morale, which can affect an employee's attitude about committing fraud against an entity. Factors that detract from a positive work environment and may increase the risk of fraud include:

- Top management that does not seem to care about or reward appropriate behavior
- Negative feedback and lack of recognition for job performance
- Perceived inequities in the organization
- Autocratic rather than participative management
- Low organizational loyalty or feelings of ownership
- Unreasonable budget expectations or other financial targets

---

<sup>2</sup> An entity's value system also could be reflected in an ethics policy, a statement of business principles, or some other concise summary of guiding principles.

<sup>3</sup> Although the discussion in this document focuses on fraud, the subject of fraud often is considered in the context of a broader set of principles that govern an organization. Some organizations, however, may elect to develop a fraud policy separate from an ethics policy. Specific examples of topics in a fraud policy might include a requirement to comply with all laws and regulations and explicit guidance regarding making payments to obtain contracts, holding pricing discussions with competitors, environmental discharges, relationships with vendors, and maintenance of accurate books and records.

- Fear of delivering "bad news" to supervisors and/or management
- Less-than-competitive compensation
- Poor training and promotion opportunities
- Lack of clear organizational responsibilities
- Poor communication practices or methods within the organization

The entity's human resources department often is instrumental in helping to build a corporate culture and a positive work environment. Human resource professionals are responsible for implementing specific programs and initiatives, consistent with management's strategies, that can help to mitigate many of the detractors mentioned above. Mitigating factors that help create a positive work environment and reduce the risk of fraud may include:

- Recognition and reward systems that are in tandem with goals and results
- Equal employment opportunities
- Team-oriented, collaborative decision-making policies
- Professionally administered compensation programs
- Professionally administered training programs and an organizational priority of career development

Employees should be empowered to help create a positive workplace environment and support the entity's values and code of conduct. They should be given the opportunity to provide input to the development and updating of the entity's code of conduct, to ensure that it is relevant, clear, and fair. Involving employees in this fashion also may effectively contribute to the oversight of the entity's code of conduct and an environment of ethical behavior (see the section titled "Developing an Appropriate Oversight Process").

Employees should be given the means to obtain advice internally before making decisions that appear to have significant legal or ethical implications. They should also be encouraged and given the means to communicate concerns, anonymously if preferred, about potential violations of the entity's code of conduct, without fear of retribution. Many organizations have implemented a process for employees to report on a confidential basis any actual or suspected wrongdoing, or potential violations of the code of conduct or ethics policy. For example, some organizations use a telephone "hotline" that is directed to or monitored by an ethics officer, fraud officer, general counsel, internal audit director, or another trusted individual responsible for investigating and reporting incidents of fraud or illegal acts.

### ***Hiring and Promoting Appropriate Employees***

Each employee has a unique set of values and personal code of ethics. When faced with sufficient pressure and a perceived opportunity, some employees will behave dishonestly rather than face the negative consequences of honest behavior. The threshold at which dishonest behavior starts, however, will vary among individuals. If an entity is to be successful in preventing fraud, it must have effective policies that minimize the chance of hiring or promoting individuals with low levels of honesty, especially for positions of trust.

Proactive hiring and promotion procedures may include:

- Conducting background investigations on individuals being considered for employment or for promotion to a position of trust<sup>4</sup>
- Thoroughly checking a candidate's education, employment history, and personal references
- Periodic training of all employees about the entity's values and code of conduct, (training is addressed in the following section)
- Incorporating into regular performance reviews an evaluation of how each individual has contributed to creating an appropriate workplace environment in line with the entity's values and code of conduct
- Continuous objective evaluation of compliance with the entity's values and code of conduct, with violations being addressed immediately

### **Training**

New employees should be trained at the time of hiring about the entity's values and its code of conduct. This training should explicitly cover expectations of all employees regarding (1) their duty to communicate certain matters; (2) a list of the types of matters, including actual or suspected fraud, to be communicated along with specific examples; and (3) information on how to communicate those matters. There also should be an affirmation from senior management regarding employee expectations and communication responsibilities. Such training should include an element of "fraud awareness," the tone of which should be positive but nonetheless stress that fraud can be costly (and detrimental in other ways) to the entity and its employees.

In addition to training at the time of hiring, employees should receive refresher training periodically thereafter. Some organizations may consider ongoing training for certain positions, such as purchasing agents or employees with financial reporting responsibilities. Training should be specific to an employee's level within the organization, geographic location, and assigned responsibilities. For example, training for senior manager level personnel would normally be different from that of nonsupervisory employees, and training for purchasing agents would be different from that of sales representatives.

### **Confirmation**

Management needs to clearly articulate that all employees will be held accountable to act within the entity's code of conduct. All employees within senior management and the finance function, as well as other employees in areas that might be exposed to unethical behavior (for example, procurement, sales and marketing) should be required to sign a code of conduct statement annually, at a minimum.

Requiring periodic confirmation by employees of their responsibilities will not only reinforce the policy but may also deter individuals from committing fraud and other violations and might identify problems before they become significant. Such confirmation may include statements that the individual understands the entity's expectations, has complied with the code of conduct, and is not aware of any violations of the code of conduct other than those the individual lists in his or her response. Although people with low integrity may not hesitate to sign a false confirmation, most people will want to avoid making a false statement in writing. Honest individuals are more likely to return

---

<sup>4</sup> Some organizations also have considered follow-up investigations, particularly for employees in positions of trust, on a periodic basis (for example, every five years) or as circumstances dictate.

their confirmations and to disclose what they know (including any conflicts of interest or other personal exceptions to the code of conduct). Thorough follow-up by internal auditors or others regarding nonreplies may uncover significant issues.

### ***Discipline***

The way an entity reacts to incidents of alleged or suspected fraud will send a strong deterrent message throughout the entity, helping to reduce the number of future occurrences. The following actions should be taken in response to an alleged incident of fraud:

- A thorough investigation of the incident should be conducted.<sup>5</sup>
- Appropriate and consistent actions should be taken against violators.
- Relevant controls should be assessed and improved.
- Communication and training should occur to reinforce the entity's values, code of conduct, and expectations.

Expectations about the consequences of committing fraud must be clearly communicated throughout the entity. For example, a strong statement from management that dishonest actions will not be tolerated, and that violators may be terminated and referred to the appropriate authorities, clearly establishes consequences and can be a valuable deterrent to wrongdoing. If wrongdoing occurs and an employee is disciplined, it can be helpful to communicate that fact, on a no-name basis, in an employee newsletter or other regular communication to employees. Seeing that other people have been disciplined for wrongdoing can be an effective deterrent, increasing the perceived likelihood of violators being caught and punished. It also can demonstrate that the entity is committed to an environment of high ethical standards and integrity.

## **Evaluating Antifraud Processes and Controls**

Neither fraudulent financial reporting nor misappropriation of assets can occur without a perceived opportunity to commit and conceal the act. Organizations should be proactive in reducing fraud opportunities by (1) identifying and measuring fraud risks, (2) taking steps to mitigate identified risks, and (3) implementing and monitoring appropriate preventive and detective internal controls and other deterrent measures.

### ***Identifying and Measuring Fraud Risks***

Management has primary responsibility for establishing and monitoring all aspects of the entity's fraud risk-assessment and prevention activities.<sup>6</sup> Fraud risks often are considered as part of an enterprise-wide risk management

---

<sup>5</sup> Many entities of sufficient size are employing antifraud professionals, such as certified fraud examiners, who are responsible for resolving allegations of fraud within the organization and who also assist in the detection and deterrence of fraud. These individuals typically report their findings internally to the corporate security, legal, or internal audit departments. In other instances, such individuals may be empowered directly by the board of directors or its audit committee.

<sup>6</sup> Management may elect to have internal audit play an active role in the development, monitoring, and ongoing assessment of the entity's fraud risk-management program. This may include an active role in the development and communication of the entity's code of conduct or ethics policy, as well as in investigating actual or alleged instances of noncompliance.

program, though they may be addressed separately.<sup>7</sup> The fraud risk-assessment process should consider the vulnerability of the entity to fraudulent activity (fraudulent financial reporting, misappropriation of assets, and corruption) and whether any of those exposures could result in a material misstatement of the financial statements or material loss to the organization. In identifying fraud risks, organizations should consider organizational, industry, and country-specific characteristics that influence the risk of fraud.

The nature and extent of management's risk assessment activities should be commensurate with the size of the entity and complexity of its operations. For example, the risk assessment process is likely to be less formal and less structured in smaller entities. However, management should recognize that fraud can occur in organizations of any size or type, and that almost any employee may be capable of committing fraud given the right set of circumstances. Accordingly, management should develop a heightened "fraud awareness" and an appropriate fraud risk-management program, with oversight from the board of directors or audit committee.

### ***Mitigating Fraud Risks***

It may be possible to reduce or eliminate certain fraud risks by making changes to the entity's activities and processes. An entity may choose to sell certain segments of its operations, cease doing business in certain locations, or reorganize its business processes to eliminate unacceptable risks. For example, the risk of misappropriation of funds may be reduced by implementing a central lockbox at a bank to receive payments instead of receiving money at the entity's various locations. The risk of corruption may be reduced by closely monitoring the entity's procurement process. The risk of financial statement fraud may be reduced by implementing shared services centers to provide accounting services to multiple segments, affiliates, or geographic locations of an entity's operations. A shared services center may be less vulnerable to influence by local operations managers and may be able to implement more extensive fraud detection measures cost-effectively.

### ***Implementing and Monitoring Appropriate Internal Controls***

Some risks are inherent in the environment of the entity, but most can be addressed with an appropriate system of internal control. Once fraud risk assessment has taken place, the entity can identify the processes, controls, and other procedures that are needed to mitigate the identified risks. Effective internal control will include a well-developed control environment, an effective and secure information system, and appropriate control and monitoring activities.<sup>8</sup> Because of the importance of information technology in supporting operations and the processing of transactions, management also needs to implement and maintain appropriate controls, whether automated or manual, over computer-generated information.

In particular, management should evaluate whether appropriate internal controls have been implemented in any areas management has identified as posing

---

<sup>7</sup> Some organizations may perform a periodic self-assessment using questionnaires or other techniques to identify and measure risks. Self-assessment may be less reliable in identifying the risk of fraud due to a lack of experience with fraud (although many organizations experience some form of fraud and abuse, material financial statement fraud or misappropriation of assets is a rare event for most) and because management may be unwilling to acknowledge openly that they might commit fraud given sufficient pressure and opportunity.

<sup>8</sup> The report of the Committee of Sponsoring Organizations (COSO) of the Treadway Commission, *Internal Control—Integrated Framework*, provides reasonable criteria for management to use in evaluating the effectiveness of the entity's system of internal control.

a higher risk of fraudulent activity, as well as controls over the entity's financial reporting process. Because fraudulent financial reporting may begin in an interim period, management also should evaluate the appropriateness of internal controls over interim financial reporting.

Fraudulent financial reporting by upper-level management typically involves override of internal controls within the financial reporting process. Because management has the ability to override controls, or to influence others to perpetrate or conceal fraud, the need for a strong value system and a culture of ethical financial reporting becomes increasingly important. This helps create an environment in which other employees will decline to participate in committing a fraud and will use established communication procedures to report any requests to commit wrongdoing. The potential for management override also increases the need for appropriate oversight measures by the board of directors or audit committee, as discussed in the following section.

Fraudulent financial reporting by lower levels of management and employees may be deterred or detected by appropriate monitoring controls, such as having higher-level managers review and evaluate the financial results reported by individual operating units or subsidiaries. Unusual fluctuations in results of particular reporting units, or the lack of expected fluctuations, may indicate potential manipulation by departmental or operating unit managers or staff.

## Developing an Appropriate Oversight Process

To effectively prevent or deter fraud, an entity should have an appropriate oversight function in place. Oversight can take many forms and can be performed by many within and outside the entity, under the overall oversight of the audit committee (or board of directors where no audit committee exists).

### ***Audit Committee or Board of Directors***

The audit committee (or the board of directors where no audit committee exists) should evaluate management's identification of fraud risks, implementation of antifraud measures, and creation of the appropriate "tone at the top." Active oversight by the audit committee can help to reinforce management's commitment to creating a culture with "zero tolerance" for fraud. An entity's audit committee also should ensure that senior management (in particular, the CEO) implements appropriate fraud deterrence and prevention measures to better protect investors, employees, and other stakeholders. The audit committee's evaluation and oversight not only helps make sure that senior management fulfills its responsibility, but also can serve as a deterrent to senior management engaging in fraudulent activity (that is, by ensuring an environment is created whereby any attempt by senior management to involve employees in committing or concealing fraud would lead promptly to reports from such employees to appropriate persons, including the audit committee).

The audit committee also plays an important role in helping the board of directors fulfill its oversight responsibilities with respect to the entity's financial reporting process and the system of internal control.<sup>9</sup> In exercising this oversight responsibility, the audit committee should consider the potential for management override of controls or other inappropriate influence over the financial reporting process. For example, the audit committee may obtain from

---

<sup>9</sup> See the Report of the NACD Blue Ribbon Commission on the Audit Committee, (Washington, D.C.: National Association of Corporate Directors, 2000). For the board's role in the oversight of risk management, see Report of the NACD Blue Ribbon Commission on Risk Oversight, (Washington, D.C.: National Association of Corporate Directors, 2002).

the internal auditors and independent auditors their views on management's involvement in the financial reporting process and, in particular, the ability of management to override information processed by the entity's financial reporting system (for example, the ability for management or others to initiate or record nonstandard journal entries). The audit committee also may consider reviewing the entity's reported information for reasonableness compared with prior or forecasted results, as well as with peers or industry averages. In addition, information received in communications from the independent auditors<sup>10</sup> can assist the audit committee in assessing the strength of the entity's internal control and the potential for fraudulent financial reporting.

As part of its oversight responsibilities, the audit committee should encourage management to provide a mechanism for employees to report concerns about unethical behavior, actual or suspected fraud, or violations of the entity's code of conduct or ethics policy. The committee should then receive periodic reports describing the nature, status, and eventual disposition of any fraud or unethical conduct. A summary of the activity, follow-up and disposition also should be provided to the full board of directors.

If senior management is involved in fraud, the next layer of management may be the most likely to be aware of it. As a result, the audit committee (and other directors) should consider establishing an open line of communication with members of management one or two levels below senior management to assist in identifying fraud at the highest levels of the organization or investigating any fraudulent activity that might occur.<sup>11</sup> The audit committee typically has the ability and authority to investigate any alleged or suspected wrongdoing brought to its attention. Most audit committee charters empower the committee to investigate any matters within the scope of its responsibilities, and to retain legal, accounting, and other professional advisers as needed to advise the committee and assist in its investigation.

All audit committee members should be financially literate, and each committee should have at least one financial expert. The financial expert should possess:

- An understanding of generally accepted accounting principles and audits of financial statements prepared under those principles. Such understanding may have been obtained either through education or experience. It is important for someone on the audit committee to have a working knowledge of those principles and standards.
- Experience in the preparation and/or the auditing of financial statements of an entity of similar size, scope and complexity as the entity on whose board the committee member serves. The experience would generally be as a chief financial officer, chief accounting officer, controller, or auditor of a similar entity. This background will provide a necessary understanding of the transactional and operational environment that produces the issuer's financial statements. It will also bring an understanding of what is involved in, for example, appropriate accounting estimates, accruals, and reserve provisions, and an appreciation of what is necessary to maintain a good internal control environment.

---

<sup>10</sup> See section 325, *Communication of Internal Control Related Matters Noted in an Audit*, and Auditing Standard No. 16, *Communications with Audit Committees*. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]

<sup>11</sup> *Report of the NACD Best Practices Council: Coping with Fraud and Other Illegal Activity, A Guide for Directors, CEOs, and Senior Managers* (1998) sets forth "basic principles" and "implementation approaches" for dealing with fraud and other illegal activity.

- Experience in internal governance and procedures of audit committees, obtained either as an audit committee member, a senior corporate manager responsible for answering to the audit committee, or an external auditor responsible for reporting on the execution and results of annual audits.

### **Management**

Management is responsible for overseeing the activities carried out by employees, and typically does so by implementing and monitoring processes and controls such as those discussed previously. However, management also may initiate, participate in, or direct the commission and concealment of a fraudulent act. Accordingly, the audit committee (or the board of directors where no audit committee exists) has the responsibility to oversee the activities of senior management and to consider the risk of fraudulent financial reporting involving the override of internal controls or collusion (see discussion on the audit committee and board of directors above).

Public companies should include a statement in the annual report acknowledging management's responsibility for the preparation of the financial statements and for establishing and maintaining an effective system of internal control. This will help improve the public's understanding of the respective roles of management and the auditor. This statement has also been generally referred to as a "Management Report" or "Management Certificate." Such a statement can provide a convenient vehicle for management to describe the nature and manner of preparation of the financial information and the adequacy of the internal accounting controls. Logically, the statement should be presented in close proximity to the formal financial statements. For example, it could appear near the independent auditor's report, or in the financial review or management analysis section.

### **Internal Auditors**

An effective internal audit team can be extremely helpful in performing aspects of the oversight function. Their knowledge about the entity may enable them to identify indicators that suggest fraud has been committed. The *Standards for the Professional Practice of Internal Auditing* (IIA Standards), issued by the Institute of Internal Auditors, state, "The internal auditor should have sufficient knowledge to identify the indicators of fraud but is not expected to have the expertise of a person whose primary responsibility is detecting and investigating fraud." Internal auditors also have the opportunity to evaluate fraud risks and controls and to recommend action to mitigate risks and improve controls. Specifically, the IIA Standards require internal auditors to assess risks facing their organizations. This risk assessment is to serve as the basis from which audit plans are devised and against which internal controls are tested. The IIA Standards require the audit plan to be presented to and approved by the audit committee (or board of directors where no audit committee exists). The work completed as a result of the audit plan provides assurance on which management's assertion about controls can be made.

Internal audits can be both a detection and a deterrence measure. Internal auditors can assist in the deterrence of fraud by examining and evaluating the adequacy and the effectiveness of the system of internal control, commensurate with the extent of the potential exposure or risk in the various segments of the organization's operations. In carrying out this responsibility, internal auditors should, for example, determine whether:

- The organizational environment fosters control consciousness.
- Realistic organizational goals and objectives are set.
- Written policies (for example, a code of conduct) exist that describe prohibited activities and the action required whenever violations are discovered.
- Appropriate authorization policies for transactions are established and maintained.
- Policies, practices, procedures, reports, and other mechanisms are developed to monitor activities and safeguard assets, particularly in high-risk areas.
- Communication channels provide management with adequate and reliable information.
- Recommendations need to be made for the establishment or enhancement of cost-effective controls to help deter fraud.

Internal auditors may conduct proactive auditing to search for corruption, misappropriation of assets, and financial statement fraud. This may include the use of computer-assisted audit techniques to detect particular types of fraud. Internal auditors also can employ analytical and other procedures to isolate anomalies and perform detailed reviews of high-risk accounts and transactions to identify potential financial statement fraud. The internal auditors should have an independent reporting line directly to the audit committee, to enable them to express any concerns about management's commitment to appropriate internal controls or to report suspicions or allegations of fraud involving senior management.

### ***Independent Auditors***

Independent auditors can assist management and the board of directors (or audit committee) by providing an assessment of the entity's process for identifying, assessing, and responding to the risks of fraud. The board of directors (or audit committee) should have an open and candid dialogue with the independent auditors regarding management's risk assessment process and the system of internal control. Such a dialogue should include a discussion of the susceptibility of the entity to fraudulent financial reporting and the entity's exposure to misappropriation of assets.

### ***Certified Fraud Examiners***

Certified fraud examiners may assist the audit committee and board of directors with aspects of the oversight process either directly or as part of a team of internal auditors or independent auditors. Certified fraud examiners can provide extensive knowledge and experience about fraud that may not be available within a corporation. They can provide more objective input into management's evaluation of the risk of fraud (especially fraud involving senior management, such as financial statement fraud) and the development of appropriate antifraud controls that are less vulnerable to management override. They can assist the audit committee and board of directors in evaluating the fraud risk assessment and fraud prevention measures implemented by management. Certified fraud examiners also conduct examinations to resolve allegations or suspicions of fraud, reporting either to an appropriate level of management or to the audit committee or board of directors, depending upon the nature of the issue and the level of personnel involved.

## Attachment 1: AICPA "CPA's Handbook of Fraud and Commercial Crime Prevention," An Organizational Code of Conduct

The following is an example of an organizational code of conduct, which includes definitions of what is considered unacceptable, and the consequences of any breaches thereof. The specific content and areas addressed in an entity's code of conduct should be specific to that entity.

### *Organizational Code of Conduct*

The Organization and its employees must, at all times, comply with all applicable laws and regulations. The Organization will not condone the activities of employees who achieve results through violation of the law or unethical business dealings. This includes any payments for illegal acts, indirect contributions, rebates, and bribery. The Organization does not permit any activity that fails to stand the closest possible public scrutiny.

All business conduct should be well above the minimum standards required by law. Accordingly, employees must ensure that their actions cannot be interpreted as being, in any way, in contravention of the laws and regulations governing the Organization's worldwide operations.

Employees uncertain about the application or interpretation of any legal requirements should refer the matter to their superior, who, if necessary, should seek the advice of the legal department.

### *General Employee Conduct*

The Organization expects its employees to conduct themselves in a businesslike manner. Drinking, gambling, fighting, swearing, and similar unprofessional activities are strictly prohibited while on the job.

Employees must not engage in sexual harassment, or conduct themselves in a way that could be construed as such, for example, by using inappropriate language, keeping or posting inappropriate materials in their work area, or accessing inappropriate materials on their computer.

### *Conflicts of Interest*

The Organization expects that employees will perform their duties conscientiously, honestly, and in accordance with the best interests of the Organization. Employees must not use their position or the knowledge gained as a result of their position for private or personal advantage. Regardless of the

circumstances, if employees sense that a course of action they have pursued, are presently pursuing, or are contemplating pursuing may involve them in a conflict of interest with their employer, they should immediately communicate all the facts to their superior.

#### *Outside Activities, Employment, and Directorships*

All employees share a serious responsibility for the Organization's good public relations, especially at the community level. Their readiness to help with religious, charitable, educational, and civic activities brings credit to the Organization and is encouraged. Employees must, however, avoid acquiring any business interest or participating in any other activity outside the Organization that would, or would appear to:

- Create an excessive demand upon their time and attention, thus depriving the Organization of their best efforts on the job.
- Create a conflict of interest—an obligation, interest, or distraction—that may interfere with the independent exercise of judgment in the Organization's best interest.

#### *Relationships With Clients and Suppliers*

Employees should avoid investing in or acquiring a financial interest for their own accounts in any business organization that has a contractual relationship with the Organization, or that provides goods or services, or both to the Organization, if such investment or interest could influence or create the impression of influencing their decisions in the performance of their duties on behalf of the Organization.

#### *Gifts, Entertainment, and Favors*

Employees must not accept entertainment, gifts, or personal favors that could, in any way, influence, or appear to influence, business decisions in favor of any person or organization with whom or with which the Organization has, or is likely to have, business dealings. Similarly, employees must not accept any other preferential treatment under these circumstances because their position with the Organization might be inclined to, or be perceived to, place them under obligation.

#### *Kickbacks and Secret Commissions*

Regarding the Organization's business activities, employees may not receive payment or compensation of any kind, except as authorized under the Organization's remuneration policies. In particular, the Organization strictly prohibits the acceptance of kickbacks and secret commissions from suppliers or others. Any breach of this rule will result in immediate termination and prosecution to the fullest extent of the law.

#### *Organization Funds and Other Assets*

Employees who have access to Organization funds in any form must follow the prescribed procedures for recording, handling, and protecting money as detailed in the Organization's instructional manuals or other explanatory materials, or both. The Organization imposes strict standards to prevent fraud and dishonesty. If employees become aware of any evidence of fraud and dishonesty, they should immediately advise their superior or the Law Department so that the Organization can promptly investigate further.

When an employee's position requires spending Organization funds or incurring any reimbursable personal expenses, that individual must use good judgment on the Organization's behalf to ensure that good value is received for every expenditure.

Organization funds and all other assets of the Organization are for Organization purposes only and not for personal benefit. This includes the personal use of organizational assets, such as computers.

#### *Organization Records and Communications*

Accurate and reliable records of many kinds are necessary to meet the Organization's legal and financial obligations and to manage the affairs of the Organization. The Organization's books and records must reflect in an accurate and timely manner all business transactions. The employees responsible for accounting and recordkeeping must fully disclose and record all assets, liabilities, or both, and must exercise diligence in enforcing these requirements.

Employees must not make or engage in any false record or communication of any kind, whether internal or external, including but not limited to:

- False expense, attendance, production, financial, or similar reports and statements
- False advertising, deceptive marketing practices, or other misleading representations

#### *Dealing With Outside People and Organizations*

Employees must take care to separate their personal roles from their Organization positions when communicating on matters not involving Organization business. Employees must not use organization identification, stationery, supplies, and equipment for personal or political matters.

When communicating publicly on matters that involve Organization business, employees must not presume to speak for the Organization on any topic, unless they are certain that the views they express are those of the Organization, and it is the Organization's desire that such views be publicly disseminated.

When dealing with anyone outside the Organization, including public officials, employees must take care not to compromise the integrity or damage the reputation of either the Organization, or any outside individual, business, or government body.

#### *Prompt Communications*

In all matters relevant to customers, suppliers, government authorities, the public and others in the Organization, all employees must make every effort to achieve complete, accurate, and timely communications—responding promptly and courteously to all proper requests for information and to all complaints.

#### *Privacy and Confidentiality*

When handling financial and personal information about customers or others with whom the Organization has dealings, observe the following principles:

1. Collect, use, and retain only the personal information necessary for the Organization's business. Whenever possible, obtain any relevant information directly from the person concerned. Use only reputable and reliable sources to supplement this information.
2. Retain information only for as long as necessary or as required by law. Protect the physical security of this information.
3. Limit internal access to personal information to those with a legitimate business reason for seeking that information. Use only personal information for the purposes for which it was originally obtained. Obtain the consent of the person concerned before externally disclosing any personal information, unless legal process or contractual obligation provides otherwise.

## Attachment 2: Financial Executives International Code of Ethics Statement

The mission of Financial Executives International (FEI) includes significant efforts to promote ethical conduct in the practice of financial management throughout the world. Senior financial officers hold an important and elevated role in corporate governance. While members of the management team, they are uniquely capable and empowered to ensure that all stakeholders' interests are appropriately balanced, protected, and preserved. This code provides principles that members are expected to adhere to and advocate. They embody rules regarding individual and peer responsibilities, as well as responsibilities to employers, the public, and other stakeholders.

All members of FEI will:

1. Act with honesty and integrity, avoiding actual or apparent conflicts of interest in personal and professional relationships.
  2. Provide constituents with information that is accurate, complete, objective, relevant, timely, and understandable.
  3. Comply with rules and regulations of federal, state, provincial, and local governments, and other appropriate private and public regulatory agencies.
  4. Act in good faith; responsibly; and with due care, competence, and diligence, without misrepresenting material facts or allowing one's independent judgment to be subordinated.
  5. Respect the confidentiality of information acquired in the course of one's work except when authorized or otherwise legally obligated to disclose. Confidential information acquired in the course of one's work will not be used for personal advantage.
  6. Share knowledge and maintain skills important and relevant to constituents' needs.
  7. Proactively promote ethical behavior as a responsible partner among peers, in the work environment, and in the community.
  8. Achieve responsible use of and control over all assets and resources employed or entrusted.
-

## AU Section 317

### *Illegal Acts by Clients*

(Supersedes section 328)

**Source:** SAS No. 54; Auditing Standard Nos. 8–15; Auditing Standard No. 16.

See section 9317 for interpretations of this section.

**Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.**

.01 This section prescribes the nature and extent of the consideration an independent auditor should give to the possibility of illegal acts by a client in an audit of financial statements in accordance with generally accepted auditing standards. The section also provides guidance on the auditor's responsibilities when a possible illegal act is detected.

#### Definition of Illegal Acts

.02 The term *illegal acts*, for purposes of this section, refers to violations of laws or governmental regulations. Illegal acts by clients are acts attributable to the entity whose financial statements are under audit or acts by management or employees acting on behalf of the entity. Illegal acts by clients do not include personal misconduct by the entity's personnel unrelated to their business activities.

#### Dependence on Legal Judgment

.03 Whether an act is, in fact, illegal is a determination that is normally beyond the auditor's professional competence. An auditor, in reporting on financial statements, presents himself as one who is proficient in accounting and auditing. The auditor's training, experience, and understanding of the client and its industry may provide a basis for recognition that some client acts coming to his attention may be illegal. However, the determination as to whether a particular act is illegal would generally be based on the advice of an informed expert qualified to practice law or may have to await final determination by a court of law.

#### Relation to Financial Statements

.04 Illegal acts vary considerably in their relation to the financial statements. Generally, the further removed an illegal act is from the events and transactions ordinarily reflected in financial statements, the less likely the auditor is to become aware of the act or to recognize its possible illegality.

.05 The auditor considers laws and regulations that are generally recognized by auditors to have a direct and material effect on the determination of financial statement amounts. For example, tax laws affect accruals and the amount recognized as expense in the accounting period; applicable laws and regulations may affect the amount of revenue accrued under government contracts. However, the auditor considers such laws or regulations from the perspective of their known relation to audit objectives derived from financial statements

assertions rather than from the perspective of legality *per se*. The auditor's responsibility to detect and report misstatements resulting from illegal acts having a direct and material effect on the determination of financial statement amounts is the same as that for misstatements caused by error or fraud as described in section 110, *Responsibilities and Functions of the Independent Auditor*.

**.06** Entities may be affected by many other laws or regulations, including those related to securities trading, occupational safety and health, food and drug administration, environmental protection, equal employment, and price-fixing or other antitrust violations. Generally, these laws and regulations relate more to an entity's operating aspects than to its financial and accounting aspects, and their financial statement effect is indirect. An auditor ordinarily does not have sufficient basis for recognizing possible violations of such laws and regulations. Their indirect effect is normally the result of the need to disclose a contingent liability because of the allegation or determination of illegality. For example, securities may be purchased or sold based on inside information. While the direct effects of the purchase or sale may be recorded appropriately, their indirect effect, the possible contingent liability for violating securities laws, may not be appropriately disclosed. Even when violations of such laws and regulations can have consequences material to the financial statements, the auditor may not become aware of the existence of the illegal act unless he is informed by the client, or there is evidence of a governmental agency investigation or enforcement proceeding in the records, documents, or other information normally inspected in an audit of financial statements.

## The Auditor's Consideration of the Possibility of Illegal Acts

**.07** As explained in paragraph .05, certain illegal acts have a direct and material effect on the determination of financial statement amounts. Other illegal acts, such as those described in paragraph .06, may, in particular circumstances, be regarded as having material but indirect effects on financial statements. The auditor's responsibility with respect to detecting, considering the financial statement effects of, and reporting these other illegal acts is described in this section. These other illegal acts are hereinafter referred to simply as *illegal acts*. The auditor should be aware of the possibility that such illegal acts may have occurred. If specific information comes to the auditor's attention that provides evidence concerning the existence of possible illegal acts that could have a material indirect effect on the financial statements, the auditor should apply audit procedures specifically directed to ascertaining whether an illegal act has occurred. However, because of the characteristics of illegal acts explained above, an audit made in accordance with generally accepted auditing standards provides no assurance that illegal acts will be detected or that any contingent liabilities that may result will be disclosed.

## Audit Procedures in the Absence of Evidence Concerning Possible Illegal Acts

**.08** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

Normally, an audit in accordance with generally accepted auditing standards does not include audit procedures specifically designed to detect illegal acts. However, procedures applied for the purpose of forming an opinion on the financial statements may bring possible illegal acts to the auditor's attention.

For example, such procedures include reading minutes; inquiring of the client's management and legal counsel concerning litigation, claims, and assessments; performing substantive tests of details of transactions or balances. The auditor should make inquiries of management and the audit committee<sup>1</sup> concerning the client's compliance with laws and regulations and knowledge of violations or possible violations of laws or regulations. Where applicable, the auditor should also inquire of management concerning—

- The client's policies relative to the prevention of illegal acts.
- The use of directives issued by the client and periodic representations obtained by the client from management at appropriate levels of authority concerning compliance with laws and regulations.

The auditor also obtains written representations from management concerning the absence of violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency. (See section 333, *Management Representations*.) The auditor need perform no further procedures in this area absent specific information concerning possible illegal acts.

### Specific Information Concerning Possible Illegal Acts

**.09** In applying audit procedures and evaluating the results of those procedures, the auditor may encounter specific information that may raise a question concerning possible illegal acts, such as the following:

- Unauthorized transactions, improperly recorded transactions, or transactions not recorded in a complete or timely manner in order to maintain accountability for assets
- Investigation by a governmental agency, an enforcement proceeding, or payment of unusual fines or penalties
- Violations of laws or regulations cited in reports of examinations by regulatory agencies that have been made available to the auditor
- Large payments for unspecified services to consultants, affiliates, or employees
- Sales commissions or agents' fees that appear excessive in relation to those normally paid by the client or to the services actually received
- Unusually large payments in cash, purchases of bank cashiers' checks in large amounts payable to bearer, transfers to numbered bank accounts, or similar transactions
- Unexplained payments made to government officials or employees
- Failure to file tax returns or pay government duties or similar fees that are common to the entity's industry or the nature of its business

---

<sup>1</sup> For this standard, audit committee is defined as a committee (or equivalent body) established by and among the board of directors of an entity for the purpose of overseeing the accounting and financial reporting processes of the entity and audits of the financial statements of the entity; if no such committee exists with respect to the entity, the entire board of directors of the entity. For audits of nonissuers, if no such committee or board of directors (or equivalent body) exists with respect to the entity, the person(s) who oversee the accounting and financial reporting processes of the entity and audits of the financial statements of the entity. [Footnote added, effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]

## Audit Procedures in Response to Possible Illegal Acts

**.10** When the auditor becomes aware of information concerning a possible illegal act, the auditor should obtain an understanding of the nature of the act, the circumstances in which it occurred, and sufficient other information to evaluate the effect on the financial statements. In doing so, the auditor should inquire of management at a level above those involved, if possible. If management does not provide satisfactory information that there has been no illegal act, the auditor should—

- a. Consult with the client's legal counsel or other specialists about the application of relevant laws and regulations to the circumstances and the possible effects on the financial statements. Arrangements for such consultation with client's legal counsel should be made by the client.
- b. Apply additional procedures, if necessary, to obtain further understanding of the nature of the acts.

**.11** The additional audit procedures considered necessary, if any, might include procedures such as the following:

- a. Examine supporting documents, such as invoices, canceled checks, and agreements and compare with accounting records.
- b. Confirm significant information concerning the matter with the other party to the transaction or with intermediaries, such as banks or lawyers.
- c. Determine whether the transaction has been properly authorized.
- d. Consider whether other similar transactions or events may have occurred, and apply procedures to identify them.

## The Auditor's Response to Detected Illegal Acts

**.12** When the auditor concludes, based on information obtained and, if necessary, consultation with legal counsel, that an illegal act has or is likely to have occurred, the auditor should consider the effect on the financial statements as well as the implications for other aspects of the audit.

## The Auditor's Consideration of Financial Statement Effect

**.13** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In evaluating the materiality of an illegal act that comes to his attention, the auditor should consider both the quantitative and qualitative materiality of the act. For example, an illegal payment of an otherwise immaterial amount could be material if there is a reasonable possibility that it could lead to a material contingent liability or a material loss of revenue.

**.14** The auditor should consider the effect of an illegal act on the amounts presented in financial statements including contingent monetary effects, such as fines, penalties and damages. Loss contingencies resulting from illegal acts that may be required to be disclosed should be evaluated in the same manner as other loss contingencies. Examples of loss contingencies that may arise from an illegal act are: threat of expropriation of assets, enforced discontinuance of operations in another country, and litigation.

**.15** The auditor should evaluate the adequacy of disclosure in the financial statements of the potential effects of an illegal act on the entity's operations.

If material revenue or earnings are derived from transactions involving illegal acts, or if illegal acts create significant unusual risks associated with material revenue or earnings, such as loss of a significant business relationship, that information should be considered for disclosure.

## Implications for Audit

**.16** The auditor should consider the implications of an illegal act in relation to other aspects of the audit, particularly the reliability of representations of management. The implications of particular illegal acts will depend on the relationship of the perpetration and concealment, if any, of the illegal act to specific control procedures and the level of management or employees involved.

## Communication With the Audit Committee

**.17** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

The auditor should assure himself that the audit committee is adequately informed as soon as practicable and prior to the issuance of the auditor's report with respect to illegal acts that come to the auditor's attention.<sup>[1]</sup> The auditor need not communicate matters that are clearly inconsequential and may reach agreement in advance with the audit committee on the nature of such matters to be communicated. The communication should describe the act, the circumstances of its occurrence, and the effect on the financial statements. Senior management may wish to have its remedial actions communicated to the audit committee simultaneously. Possible remedial actions include disciplinary action against involved personnel, seeking restitution, adoption of preventive or corrective company policies, and modifications of specific control activities. If senior management is involved in an illegal act, the auditor should communicate directly with the audit committee. The communication may be oral or written. If the communication is oral, the auditor should document it.

## Effect on the Auditor's Report

**.18** If the auditor concludes that an illegal act has a material effect on the financial statements, and the act has not been properly accounted for or disclosed, the auditor should express a qualified opinion or an adverse opinion on the financial statements taken as a whole, depending on the materiality of the effect on the financial statements.

**.19** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If the auditor is precluded by the client from obtaining sufficient appropriate evidential matter to evaluate whether an illegal act that could be material to the financial statements has, or is likely to have, occurred, the auditor generally should disclaim an opinion on the financial statements.

**.20** If the client refuses to accept the auditor's report as modified for the circumstances described in paragraphs .18 and .19, the auditor should withdraw from the engagement and indicate the reasons for withdrawal in writing to the audit committee or board of directors.

---

<sup>[1]</sup> *[Footnote deleted, effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

.21 The auditor may be unable to determine whether an act is illegal because of limitations imposed by the circumstances rather than by the client or because of uncertainty associated with interpretation of applicable laws or regulations or surrounding facts. In these circumstances, the auditor should consider the effect on his report.<sup>2</sup>

## Other Considerations in an Audit in Accordance With Generally Accepted Auditing Standards

.22 In addition to the need to withdraw from the engagement, as described in paragraph .20, the auditor may conclude that withdrawal is necessary when the client does not take the remedial action that the auditor considers necessary in the circumstances even when the illegal act is not material to the financial statements. Factors that should affect the auditor's conclusion include the implications of the failure to take remedial action, which may affect the auditor's ability to rely on management representations, and the effects of continuing association with the client. In reaching a conclusion on such matters, the auditor may wish to consult with his own legal counsel.

.23 Disclosure of an illegal act to parties other than the client's senior management and its audit committee or board of directors is not ordinarily part of the auditor's responsibility, and such disclosure would be precluded by the auditor's ethical or legal obligation of confidentiality, unless the matter affects his opinion on the financial statements. The auditor should recognize, however, that in the following circumstances a duty to notify parties outside the client may exist:<sup>3</sup>

- a. When the entity reports an auditor change under the appropriate securities law on Form 8-K<sup>4</sup>
- b. To a successor auditor when the successor makes inquiries in accordance with section 315, *Communications Between Predecessor and Successor Auditors*<sup>5</sup>
- c. In response to a subpoena
- d. To a funding agency or other specified agency in accordance with requirements for the audits of entities that receive financial assistance from a government agency

Because potential conflicts with the auditor's ethical and legal obligations for confidentiality may be complex, the auditor may wish to consult with legal counsel before discussing illegal acts with parties outside the client.

---

<sup>2</sup> See section 508, *Reports on Audited Financial Statements*.

<sup>3</sup> Auditors may be required, under certain circumstances, pursuant to the Private Securities Litigation Reform Act of 1995 (codified in section 10A(b)1 of the Securities Exchange Act of 1934) to make a report to the Securities and Exchange Commission relating to an illegal act that has a material effect on the financial statements. [Footnote added, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

<sup>4</sup> Disclosure to the Securities and Exchange Commission may be necessary if, among other matters, the auditor withdraws because the board of directors has not taken appropriate remedial action. Such failure may be a reportable disagreement on Form 8-K. [Footnote renumbered, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

<sup>5</sup> In accordance with section 315, communications between predecessor and successor auditors require the specific permission of the client. [Footnote renumbered, July 1997, to reflect conforming changes necessary due to the issuance of the Private Securities Litigation Reform Act of 1995.]

## Responsibilities in Other Circumstances

**.24** An auditor may accept an engagement that entails a greater responsibility for detecting illegal acts than that specified in this section. For example, a governmental unit may engage an independent auditor to perform an audit in accordance with the Single Audit Act of 1984. In such an engagement, the independent auditor is responsible for testing and reporting on the governmental unit's compliance with certain laws and regulations applicable to Federal financial assistance programs. Also, an independent auditor may undertake a variety of other special engagements. For example, a corporation's board of directors or its audit committee may engage an auditor to apply agreed-upon procedures and report on compliance with the corporation's code of conduct under the attestation standards.

## Effective Date

**.25** This section is effective for audits of financial statements for periods beginning on or after January 1, 1989. Early application of the provisions of this section is permissible.

---

## AU Section 9317

### ***Illegal Acts by Clients: Auditing Interpretations of Section 317***

#### **1. Consideration of Internal Control in a Financial Statement Audit and the Foreign Corrupt Practices Act**

**.01 Question**—The second standard of field work requires the auditor to obtain a sufficient understanding of internal control to plan the audit and to determine the nature, timing, and extent of tests to be performed. Is the auditor of an entity subject to the Securities Exchange Act of 1934 required, because of the *Foreign Corrupt Practices Act of 1977* and the provisions of section 317, to expand his consideration of internal control beyond that which is required by the second standard of field work?

**.02 Interpretation**—No. There is nothing in the Act or the related legislative history that purports to alter the auditor's duty to his client or the purpose of his consideration of internal control. The Act creates express new duties only for companies subject to the Securities Exchange Act of 1934, not for auditors.

[Issue Date: October, 1978.]

#### **2. Material Weaknesses in Internal Control and the Foreign Corrupt Practices Act**

**.03 Question**—What course of action should be followed by the auditor of an entity subject to the internal accounting control provision of the *Foreign Corrupt Practices Act of 1977* to comply with section 317 when a material weakness in internal control comes to his attention?

**.04 Interpretation**—The standards applied by an auditor in determining a material weakness in internal control may differ from the standards for determining a violation of the Act. Nevertheless, a specific material weakness may ultimately be determined to be a violation and, hence, an illegal act. Therefore, the auditor should inquire of the client's management and consult with the client's legal counsel as to whether the material weakness is a violation of the Act.

**.05** In consultation with management and legal counsel, consideration should be given to corrective action taken or in process. If management has concluded that corrective action for a material weakness is not practicable, consideration should be given to the reasons underlying that conclusion, including management's evaluation of the costs of correction in relation to the expected benefit to be derived.<sup>1</sup> If it is determined that there has been a violation of

---

<sup>1</sup> The legislative history of the Act indicates that cost-benefit considerations are appropriate in determining compliance with the accounting provisions of the Act. For example, the Senate committee report stated that "the size of the business, diversity of operations, degree of centralization of financial and operating management, amount of contact by top management with day-to-day operations, and numerous other circumstances are factors which management must consider in establishing and maintaining an internal accounting control system."

the Act and appropriate consideration is not given to the violation, the auditor should consider withdrawing from the current engagement or dissociating himself from any future relationship with the client (see section 317.22).

**.06** A violation of the internal accounting control provision of the Act would not, in and of itself, have a direct effect on amounts presented in audited financial statements. However, the contingent monetary effect on an entity ultimately determined to have willfully violated the internal accounting control provision of the Act could be fines of up to \$10,000 for the violation. The auditor should consider the materiality of such contingent monetary effect in relation to the audited financial statements taken as a whole. Other loss contingencies, as defined by FASB Statement No. 5 [AC section C59], ordinarily would not result from a weakness in internal control which gives rise to such a violation of the Act.

[Issue Date: October, 1978.]

---

## **AU Section 319**

# ***Consideration of Internal Control in a Financial Statement Audit***

*[This section was superseded, effective December 15, 2010, by PCAOB Auditing Standard Nos. 8–15. See PCAOB Release No. 2010-004.]*

## AU Section 322

# ***The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements***

(Supersedes SAS No. 9)

**Source:** SAS No. 65; Auditing Standard No. 2; Auditing Standard No. 5; Auditing Standard Nos. 8–15.

**Effective for audits of financial statements for periods ending after December 15, 1991, unless otherwise indicated.**

**.01** The auditor considers many factors in determining the nature, timing, and extent of auditing procedures to be performed in an audit of an entity's financial statements. One of the factors is the existence of an internal audit function.<sup>1</sup> This section provides the auditor with guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor in an audit performed in accordance with generally accepted auditing standards.

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: When performing an integrated audit of financial statements and internal control over financial reporting, refer to paragraphs 16–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for discussion on using the work of others to alter the nature, timing, and extent of the work that otherwise would have been performed to test controls.

## **Roles of the Auditor and the Internal Auditors**

**.02** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

One of the auditor's responsibilities in an audit conducted in accordance with generally accepted auditing standards is to obtain sufficient appropriate evidential matter to provide a reasonable basis for the opinion on the entity's financial statements. In fulfilling this responsibility, the auditor maintains independence from the entity.<sup>2</sup>

**.03** Internal auditors are responsible for providing analyses, evaluations, assurances, recommendations, and other information to the entity's management and board of directors or to others with equivalent authority and

---

<sup>1</sup> An *internal audit function* may consist of one or more individuals who perform internal auditing activities within an entity. This section is not applicable to personnel who have the title *internal auditor* but who do not perform internal auditing activities as described herein.

<sup>2</sup> Although internal auditors are not independent from the entity, The Institute of Internal Auditors' *Standards for the Professional Practice of Internal Auditing* defines internal auditing as an independent appraisal function and requires internal auditors to be independent of the activities they audit. This concept of independence is different from the independence the auditor maintains under the AICPA Code of Professional Conduct.

responsibility. To fulfill this responsibility, internal auditors maintain objectivity with respect to the activity being audited.

## Obtaining an Understanding of the Internal Audit Function

**.04** An important responsibility of the internal audit function is to monitor the performance of an entity's controls. When obtaining an understanding of internal control,<sup>3</sup> the auditor should obtain an understanding of the internal audit function sufficient to identify those internal audit activities that are relevant to planning the audit. The extent of the procedures necessary to obtain this understanding will vary, depending on the nature of those activities.

**.05** The auditor ordinarily should make inquiries of appropriate management and internal audit personnel about the internal auditors'—

- a. Organizational status within the entity.
- b. Application of professional standards (see paragraph .11).
- c. Audit plan, including the nature, timing, and extent of audit work.
- d. Access to records and whether there are limitations on the scope of their activities.

In addition, the auditor might inquire about the internal audit function's charter, mission statement, or similar directive from management or the board of directors. This inquiry will normally provide information about the goals and objectives established for the internal audit function.

**.06** Certain internal audit activities may not be relevant to an audit of the entity's financial statements. For example, the internal auditors' procedures to evaluate the efficiency of certain management decision-making processes are ordinarily not relevant to a financial statement audit.

**.07** Relevant activities are those that provide evidence about the design and effectiveness of controls that pertain to the entity's ability to initiate, record, process, and report financial data consistent with the assertions embodied in the financial statements or that provide direct evidence about potential misstatements of such data. The auditor may find the results of the following procedures helpful in assessing the relevancy of internal audit activities:

- a. Considering knowledge from prior-year audits
- b. Reviewing how the internal auditors allocate their audit resources to financial or operating areas in response to their risk-assessment process
- c. Reading internal audit reports to obtain detailed information about the scope of internal audit activities

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.08** If, after obtaining an understanding of the internal audit function, the auditor concludes that the internal auditors' activities are not relevant to the financial statement audit, the auditor does not have to give further consideration to the internal audit function unless the auditor requests direct assistance from the internal auditors as described in paragraph .27. Even if some of the

---

<sup>3</sup> Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, describes the procedures the auditor performs to obtain an understanding of internal control over financial reporting. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

internal auditors' activities are relevant to the audit, the auditor may conclude that it would not be efficient to consider further the work of the internal auditors. If the auditor decides that it would be efficient to consider how the internal auditors' work might affect the nature, timing, and extent of audit procedures, the auditor should assess the competence and objectivity of the internal audit function in light of the intended effect of the internal auditors' work on the audit.

## Assessing the Competence and Objectivity of the Internal Auditors

### Competence of the Internal Auditors

.09 When assessing the internal auditors' competence, the auditor should obtain or update information from prior years about such factors as—

- Educational level and professional experience of internal auditors.
- Professional certification and continuing education.
- Audit policies, programs, and procedures.
- Practices regarding assignment of internal auditors.
- Supervision and review of internal auditors' activities.
- Quality of working-paper documentation, reports, and recommendations.
- Evaluation of internal auditors' performance.

### Objectivity of the Internal Auditors

.10 When assessing the internal auditors' objectivity, the auditor should obtain or update information from prior years about such factors as—

- The organizational status of the internal auditor responsible for the internal audit function, including—
  - Whether the internal auditor reports to an officer of sufficient status to ensure broad audit coverage and adequate consideration of, and action on, the findings and recommendations of the internal auditors.
  - Whether the internal auditor has direct access and reports regularly to the board of directors, the audit committee, or the owner-manager.
  - Whether the board of directors, the audit committee, or the owner-manager oversees employment decisions related to the internal auditor.
- Policies to maintain internal auditors' objectivity about the areas audited, including—
  - Policies prohibiting internal auditors from auditing areas where relatives are employed in important or audit-sensitive positions.
  - Policies prohibiting internal auditors from auditing areas where they were recently assigned or are scheduled to be assigned on completion of responsibilities in the internal audit function.

## Assessing Competence and Objectivity

.11 In assessing competence and objectivity, the auditor usually considers information obtained from previous experience with the internal audit function, from discussions with management personnel, and from a recent external quality review, if performed, of the internal audit function's activities. The auditor may also use professional internal auditing standards<sup>4</sup> as criteria in making the assessment. The auditor also considers the need to test the effectiveness of the factors described in paragraphs .09 and .10. The extent of such testing will vary in light of the intended effect of the internal auditors' work on the audit. If the auditor determines that the internal auditors are sufficiently competent and objective, the auditor should then consider how the internal auditors' work may affect the audit.

## Effect of the Internal Auditors' Work on the Audit

.12 The internal auditors' work may affect the nature, timing, and extent of the audit, including—

- Procedures the auditor performs when obtaining an understanding of the entity's internal control (paragraph .13).
- Procedures the auditor performs when assessing risk (paragraphs .14 through .16).
- Substantive procedures the auditor performs (paragraph .17).

When the work of the internal auditors is expected to affect the audit, the guidance in paragraphs .18 through .26 should be followed for considering the extent of the effect, coordinating audit work with internal auditors, and evaluating and testing the effectiveness of internal auditors' work.

## Understanding of Internal Control

.13 The auditor obtains a sufficient understanding of the design of controls relevant to the audit of financial statements to plan the audit and to determine whether they have been placed in operation. Since a primary objective of many internal audit functions is to review, assess, and monitor controls, the procedures performed by the internal auditors in this area may provide useful information to the auditor. For example, internal auditors may develop a flowchart of a new computerized sales and receivables system. The auditor may review the flowchart to obtain information about the design of the related controls. In addition, the auditor may consider the results of procedures performed by the internal auditors on related controls to obtain information about whether the controls have been placed in operation. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 78.]

## Risk Assessment

.14 The auditor assesses the risk of material misstatement at both the financial-statement level and the account-balance or class-of-transaction level.

---

<sup>4</sup> Standards have been developed for the professional practice of internal auditing by The Institute of Internal Auditors and the General Accounting Office. These standards are meant to (a) impart an understanding of the role and responsibilities of internal auditing to all levels of management, boards of directors, public bodies, external auditors, and related professional organizations; (b) permit measurement of internal auditing performance; and (c) improve the practice of internal auditing.

### **Financial-Statement Level**

.15 At the financial-statement level, the auditor makes an overall assessment of the risk of material misstatement. When making this assessment, the auditor should recognize that certain controls may have a pervasive effect on many financial statement assertions. The control environment and accounting system often have a pervasive effect on a number of account balances and transaction classes and therefore can affect many assertions. The auditor's assessment of risk at the financial-statement level often affects the overall audit strategy. The entity's internal audit function may influence this overall assessment of risk as well as the auditor's resulting decisions concerning the nature, timing, and extent of auditing procedures to be performed. For example, if the internal auditors' plan includes relevant audit work at various locations, the auditor may coordinate work with the internal auditors (see paragraph .23) and reduce the number of the entity's locations at which the auditor would otherwise need to perform auditing procedures.

### **Account-Balance or Class-of-Transaction Level**

.16 *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2004, for accelerated filers, and on or after July 15, 2005, for all other issuers. See PCAOB Release No. 2004-008.]*

At the account-balance or class-of-transaction level, the auditor performs procedures to obtain and evaluate evidential matter concerning management's assertions. The auditor assesses control risk for each of the relevant financial statement assertions related to all significant accounts and disclosures in the financial statements and performs tests of controls to support assessments below the maximum. When planning and performing tests of controls, the auditor may consider the results of procedures planned or performed by the internal auditors. For example, the internal auditors' scope may include tests of controls for the completeness of accounts payable. The results of internal auditors' tests may provide appropriate information about the effectiveness of controls and change the nature, timing, and extent of testing the auditor would otherwise need to perform.

### **Substantive Procedures**

.17 Some procedures performed by the internal auditors may provide direct evidence about material misstatements in assertions about specific account balances or classes of transactions. For example, the internal auditors, as part of their work, may confirm certain accounts receivable and observe certain physical inventories. The results of these procedures can provide evidence the auditor may consider in restricting detection risk for the related assertions. Consequently, the auditor may be able to change the timing of the confirmation procedures, the number of accounts receivable to be confirmed, or the number of locations of physical inventories to be observed.

### **Extent of the Effect of the Internal Auditors' Work**

.18 *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Even though the internal auditors' work may affect the auditor's procedures, the auditor should perform procedures to obtain sufficient, appropriate, evidential matter to support the auditor's report. Evidence obtained through the auditor's direct personal knowledge, including physical examination, observation,

computation, and inspection, is generally more persuasive than information obtained indirectly.<sup>5</sup>

**.19** The responsibility to report on the financial statements rests solely with the auditor. Unlike the situation in which the auditor uses the work of other independent auditors,<sup>6</sup> this responsibility cannot be shared with the internal auditors. Because the auditor has the ultimate responsibility to express an opinion on the financial statements, judgments about assessments of inherent and control risks, the materiality of misstatements, the sufficiency of tests performed, the evaluation of significant accounting estimates, and other matters affecting the auditor's report should always be those of the auditor.

**.20** In making judgments about the extent of the effect of the internal auditors' work on the auditor's procedures, the auditor considers—

- a. The materiality of financial statement amounts—that is, account balances or classes of transactions.
- b. The risk (consisting of inherent risk and control risk) of material misstatement of the assertions related to these financial statement amounts.
- c. The degree of subjectivity involved in the evaluation of the audit evidence gathered in support of the assertions.<sup>7</sup>

As the materiality of the financial statement amounts increases and either the risk of material misstatement or the degree of subjectivity increases, the need for the auditor to perform his or her own tests of the assertions increases. As these factors decrease, the need for the auditor to perform his or her own tests of the assertions decreases.

*[Note deleted, effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

**.21** For assertions related to material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is high, the auditor should perform sufficient procedures to fulfill the responsibilities described in paragraphs .18 and .19. In determining these procedures, the auditor gives consideration to the results of work (either tests of controls or substantive tests) performed by internal auditors on those particular assertions. However, for such assertions, the consideration of internal auditors' work cannot alone reduce audit risk to an acceptable level to eliminate the necessity to perform tests of those assertions directly by the auditor. Assertions about the valuation of assets and liabilities involving significant accounting estimates, and about the existence and disclosure of related-party transactions, contingencies, uncertainties, and subsequent events, are examples of assertions that might have a high risk of material misstatement or involve a high degree of subjectivity in the evaluation of audit evidence.

**.22** On the other hand, for certain assertions related to less material financial statement amounts where the risk of material misstatement or the degree of subjectivity involved in the evaluation of the audit evidence is low, the auditor may decide, after considering the circumstances and the results of work (either

---

<sup>5</sup> See paragraph 8 of Auditing Standard No. 15, *Audit Evidence*. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>6</sup> See section 543, *Part of Audit Performed by Other Independent Auditors*.

<sup>7</sup> For some assertions, such as existence and occurrence, the evaluation of audit evidence is generally objective. More subjective evaluation of the audit evidence is often required for other assertions, such as the valuation and disclosure assertions.

tests of controls or substantive tests) performed by internal auditors on those particular assertions, that audit risk has been reduced to an acceptable level and that testing of the assertions directly by the auditor may not be necessary. Assertions about the existence of cash, prepaid assets, and fixed-asset additions are examples of assertions that might have a low risk of material misstatement or involve a low degree of subjectivity in the evaluation of audit evidence.

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: When performing an integrated audit of financial statements and internal control over financial reporting, refer to paragraphs 18–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, regarding assessing the interrelationship of the nature of the controls and the competence and objectivity of those who performed the work.

## Coordination of the Audit Work With Internal Auditors

**.23** If the work of the internal auditors is expected to have an effect on the auditor's procedures, it may be efficient for the auditor and the internal auditors to coordinate their work by—

- Holding periodic meetings.
- Scheduling audit work.
- Providing access to internal auditors' working papers.
- Reviewing audit reports.
- Discussing possible accounting and auditing issues.

## Evaluating and Testing the Effectiveness of Internal Auditors' Work

**.24** The auditor should perform procedures to evaluate the quality and effectiveness of the internal auditors' work, as described in paragraphs .12 through .17, that significantly affects the nature, timing, and extent of the auditor's procedures. The nature and extent of the procedures the auditor should perform when making this evaluation are a matter of judgment depending on the extent of the effect of the internal auditors' work on the auditor's procedures for significant account balances or classes of transactions.

**.25** In developing the evaluation procedures, the auditor should consider such factors as whether the internal auditors'—

- Scope of work is appropriate to meet the objectives.
- Audit programs are adequate.
- Working papers adequately document work performed, including evidence of supervision and review.
- Conclusions are appropriate in the circumstances.
- Reports are consistent with the results of the work performed.

**.26** In making the evaluation, the auditor should test some of the internal auditors' work related to the significant financial statement assertions. These tests may be accomplished by either (a) examining some of the controls, transactions, or balances that the internal auditors examined or (b) examining similar

controls, transactions, or balances not actually examined by the internal auditors. In reaching conclusions about the internal auditors' work, the auditor should compare the results of his or her tests with the results of the internal auditors' work. The extent of this testing will depend on the circumstances and should be sufficient to enable the auditor to make an evaluation of the overall quality and effectiveness of the internal audit work being considered by the auditor.

## Using Internal Auditors to Provide Direct Assistance to the Auditor

.27 In performing the audit, the auditor may request direct assistance from the internal auditors. This direct assistance relates to work the auditor specifically requests the internal auditors to perform to complete some aspect of the auditor's work. For example, internal auditors may assist the auditor in obtaining an understanding of internal control or in performing tests of controls or substantive tests, consistent with the guidance about the auditor's responsibility in paragraphs .18 through .22. When direct assistance is provided, the auditor should assess the internal auditors' competence and objectivity (see paragraphs .09 through .11) and supervise,<sup>8</sup> review, evaluate, and test the work performed by internal auditors to the extent appropriate in the circumstances. The auditor should inform the internal auditors of their responsibilities, the objectives of the procedures they are to perform, and matters that may affect the nature, timing, and extent of audit procedures, such as possible accounting and auditing issues. The auditor should also inform the internal auditors that all significant accounting and auditing issues identified during the audit should be brought to the auditor's attention.

## Effective Date

.28 This section is effective for audits of financial statements for periods ending after December 15, 1991. Early application of the provisions of this section is permissible.

---

<sup>8</sup> See Auditing Standard No. 10, *Supervision of the Audit Engagement*, for the type of supervisory procedures to apply. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

.29

## Appendix

# The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements

## AU Section 324

### ***Service Organizations***\*

(Supersedes SAS No. 44)

**Sources:** SAS No. 70; SAS No. 78; SAS No. 88; SAS No. 98; Auditing Standard No. 2; Auditing Standard No. 5; Auditing Standard Nos. 8–15.

See section 9324 for interpretations of this section.

**Effective for service auditors' reports dated after March 31, 1993, unless otherwise indicated.**

### **Introduction and Applicability**

.01 This section provides guidance on the factors an independent auditor should consider when auditing the financial statements of an entity that uses a service organization to process certain transactions. This section also provides guidance for independent auditors who issue reports on the processing of transactions by a service organization for use by other auditors.

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: When performing an integrated audit of financial statements and internal control over financial reporting, refer to paragraphs B17–B27 of Appendix B, *Special Topics*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, regarding the use of service organizations.

.02 For purposes of this section, the following definitions apply:

- *User organization*—The entity that has engaged a service organization and whose financial statements are being audited
- *User auditor*—The auditor who reports on the financial statements of the user organization
- *Service organization*—The entity (or segment of an entity) that provides services to a user organization that are part of the user organization's information system
- *Service auditor*—The auditor who reports on controls of a service organization that may be relevant to a user organization's internal control as it relates to an audit of financial statements
- *Report on controls placed in operation*—A service auditor's report on a service organization's description of its controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, and on whether they had been placed in operation as of a specific date

---

\* Title amended, effective December 1999, by Statement on Auditing Standards No. 88.

- *Report on controls placed in operation and tests of operating effectiveness*—A service auditor's report on a service organization's description of its controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements,<sup>1</sup> on whether such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.03** The guidance in this section is applicable to the audit of the financial statements of an entity that obtains services from another organization that are part of its information system. A service organization's services are part of an entity's information system if they affect any of the following:

- The classes of transactions in the entity's operations that are significant to the entity's financial statements
- The procedures, both automated and manual, by which the entity's transactions are initiated, recorded, processed, and reported from their occurrence to their inclusion in the financial statements
- The related accounting records, whether electronic or manual, supporting information, and specific accounts in the entity's financial statements involved in initiating, recording, processing and reporting the entity's transactions
- How the entity's information system captures other events and conditions that are significant to the financial statements
- The financial reporting process used to prepare the entity's financial statements, including significant accounting estimates and disclosures

Service organizations that provide such services include, for example, bank trust departments that invest and service assets for employee benefit plans or for others, mortgage bankers that service mortgages for others, and application service providers that provide packaged software applications and a technology environment that enables customers to process financial and operational transactions. The guidance in this section may also be relevant to situations in which an organization develops, provides, and maintains the software used by client organizations. The provisions of this section are not intended to apply to situations in which the services provided are limited to executing client organization transactions that are specifically authorized by the client, such as the processing of checking account transactions by a bank or the execution of securities transactions by a broker. This section also is not intended to apply to the audit of transactions arising from financial interests in partnerships, corporations, and joint ventures, such as working interests in oil and gas ventures, when proprietary interests are accounted for and reported to interest holders. [As amended, effective December 1999, by Statement on Auditing Standards No. 88. Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

---

<sup>1</sup> In this section, a service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements will be referred to as a service organization's *controls*.

**.04** This section is organized into the following sections:

- a. The user auditor's consideration of the effect of the service organization on the user organization's internal control and the availability of evidence to—
  - Obtain the necessary understanding of the user organization's internal control to plan the audit
  - Assess control risk at the user organization
  - Perform substantive procedures
- b. Considerations in using a service auditor's report
- c. Responsibilities of service auditors

## **The User Auditor's Consideration of the Effect of the Service Organization on the User Organization's Internal Control and the Availability of Audit Evidence**

**.05** The user auditor should consider the discussion in paragraphs .06 through .21 when planning and performing the audit of an entity that uses a service organization to process its transactions.

### **The Effect of Use of a Service Organization on a User Organization's Internal Control**

**.06** When a user organization uses a service organization, transactions that affect the user organization's financial statements are subjected to controls that are, at least in part, physically and operationally separate from the user organization. The significance of the controls of the service organization to those of the user organization depends on the nature of the services provided by the service organization, primarily the nature and materiality of the transactions it processes for the user organization and the degree of interaction between its activities and those of the user organization. To illustrate how the degree of interaction affects user organization controls, when the user organization initiates transactions and the service organization executes and does the accounting processing of those transactions, there is a high degree of interaction between the activities at the user organization and those at the service organization. In these circumstances, it may be practicable for the user organization to implement effective controls for those transactions. However, when the service organization initiates, executes, and does the accounting processing of the user organization's transactions, there is a lower degree of interaction and it may not be practicable for the user organization to implement effective controls for those transactions. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

### **Planning the Audit**

**.07** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, states that an auditor should obtain an understanding of each of the five components of the entity's internal control sufficient to plan the audit. This understanding may encompass controls placed in operation by the entity

and by service organizations whose services are part of the entity's information system. In planning the audit, such knowledge should be used to—

- Identify types of potential misstatements.
- Consider factors that affect the risk of material misstatement.
- Design tests of controls, when applicable. Paragraphs 65 through 69 of SAS No. 55 discuss factors the auditor considers in determining whether to perform tests of controls.
- Design substantive tests.

**[.08]** [Paragraph deleted by the issuance of Statement on Auditing Standards No. 88, December 1999.]

**.09** Information about the nature of the services provided by a service organization that are part of the user organization's information system and the service organization's controls over those services may be available from a wide variety of sources, such as user manuals, system overviews, technical manuals, the contract between the user organization and the service organization, and reports by service auditors, internal auditors, or regulatory authorities on the service organization's controls. If the services and the service organization's controls over those services are highly standardized, information obtained through the user auditor's prior experience with the service organization may be helpful in planning the audit. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

**.10** After considering the available information, the user auditor may conclude that he or she has the means to obtain a sufficient understanding of internal control to plan the audit. If the user auditor concludes that information is not available to obtain a sufficient understanding to plan the audit, he or she may consider contacting the service organization, through the user organization, to obtain specific information or request that a service auditor be engaged to perform procedures that will supply the necessary information, or the user auditor may visit the service organization and perform such procedures. If the user auditor is unable to obtain sufficient evidence to achieve his or her audit objectives, the user auditor should qualify his or her opinion or disclaim an opinion on the financial statements because of a scope limitation. [As amended, effective December 1999, by Statement on Auditing Standards No. 88.]

## Assessing Control Risk at the User Organization

**.11** The user auditor uses his or her understanding of the internal control to assess control risk for the assertions embodied in the account balances and classes of transactions, including those that are affected by the activities of the service organization. In doing so, the user auditor may identify certain user organization controls that, if effective, would permit the user auditor to assess control risk below the maximum for particular assertions. Such controls may be applied at either the user organization or the service organization. The user auditor may conclude that it would be efficient to obtain evidential matter about the operating effectiveness of controls to provide a basis for assessing control risk below the maximum. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.12** A service auditor's report on controls placed in operation at the service organization should be helpful in providing a sufficient understanding to plan the audit of the user organization. Such a report, however, is not intended to provide any evidence of the operating effectiveness of the relevant controls that

would allow the user auditor to reduce the assessed level of control risk below the maximum. Such evidential matter should be derived from one or more of the following:

- a. Tests of the user organization's controls over the activities of the service organization (for example, the user auditor may test the service organization's independent reperformance of selected items processed by a service organization or test the user organization's reconciliation of output reports with source documents)
- b. A service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed-upon procedures that describes relevant tests of controls
- c. Appropriate tests of controls performed by the user auditor at the service organization

**.13** The user organization may establish effective controls over the service organization's activities that may be tested and that may enable the user auditor to reduce the assessed level of control risk below the maximum for some or all of the related assertions. If a user organization, for example, uses a service organization to process its payroll transactions, the user organization may establish controls over the submission and receipt of payroll information that could prevent or detect material misstatements. The user organization might reperform the service organization's payroll calculations on a test basis. In this situation, the user auditor may perform tests of the user organization's controls over payroll processing that would provide a basis for assessing control risk below the maximum for the assertions related to payroll transactions. Alternatively, the user auditor may decide to assess control risk at the maximum level because he or she believes controls are unlikely to pertain to an assertion, are unlikely to be effective, or because he or she believes obtaining evidence about the operating effectiveness of the service organization's controls, such as those over changes in payroll programs, would not be efficient. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.14** The user auditor may find that controls relevant to assessing control risk below the maximum for particular assertions are applied only at the service organization. If the user auditor plans to assess control risk below the maximum for those assertions, he or she should evaluate the operating effectiveness of those controls by obtaining a service auditor's report that describes the results of the service auditor's tests of those controls (that is, a report on controls placed in operation and tests of operating effectiveness, or an agreed-upon procedures report)<sup>2</sup> or by performing tests of controls at the service organization. If the user auditor decides to use a service auditor's report, the user auditor should consider the extent of the evidence provided by the report about the effectiveness of controls intended to prevent or detect material misstatements in the particular assertions. The user auditor remains responsible for evaluating the evidence presented by the service auditor and for determining its effect on the assessment of control risk at the user organization.

**.15** The user auditor's assessments of control risk regarding assertions about account balances or classes of transactions are based on the combined evidence provided by the service auditor's report and the user auditor's own procedures. In making these assessments, the user auditor should consider

---

<sup>2</sup> See AT section 201, *Agreed-Upon Procedures Engagements*, for guidance on performing and reporting on agreed-upon procedures engagements. [Footnote added, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

the nature, source, and interrelationships among the evidence, as well as the period covered by the tests of controls. The user auditor uses the assessed levels of control risk, as well as his or her understanding of internal control, in determining the nature, timing, and extent of substantive tests for particular assertions.

**.16** [*The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.*]

The guidance in paragraph 18 and paragraphs 29 through 31 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*, regarding the auditor's consideration of the sufficiency of evidential matter to support a specific assessed level of control risk is applicable to user auditors considering evidential matter provided by a service auditor's report on controls placed in operation and tests of operating effectiveness. Because the report may be intended to satisfy the needs of several different user auditors, a user auditor should determine whether the specific tests of controls and results in the service auditor's report are relevant to assertions that are significant in the user organization's financial statements. For those tests of controls and results that are relevant, a user auditor should consider whether the nature, timing, and extent of such tests of controls and results provide appropriate evidence about the effectiveness of the controls to support the user auditor's assessed level of control risk. In evaluating these factors, user auditors should also keep in mind that, for certain assumptions, the shorter the period covered by a specific test and the longer the time elapsed since the performance of the test, the less support for control risk reduction the test may provide. [Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

## **Audit Evidence From Substantive Audit Procedures Performed by Service Auditors**

**.17** Service auditors may be engaged to perform procedures that are substantive in nature for the benefit of user auditors. Such engagements may involve the performance, by the service auditor, of procedures agreed upon by the user organization and its auditor and by the service organization and its auditor. In addition, there may be requirements imposed by governmental authorities or through contractual arrangements whereby service auditors perform designated procedures that are substantive in nature. The results of the application of the required procedures to balances and transactions processed by the service organization may be used by user auditors as part of the evidence necessary to support their opinions.

## **Considerations in Using a Service Auditor's Report**

**.18** In considering whether the service auditor's report is satisfactory for his or her purposes, the user auditor should make inquiries concerning the service auditor's professional reputation. Appropriate sources of information concerning the professional reputation of the service auditor are discussed in section 543, *Part of Audit Performed by Other Independent Auditors*, paragraph .10a.

**.19** In considering whether the service auditor's report is sufficient to meet his or her objectives, the user auditor should give consideration to the guidance in section 543.12. If the user auditor believes that the service auditor's report may not be sufficient to meet his or her objectives, the user auditor may

supplement his or her understanding of the service auditor's procedures and conclusions by discussing with the service auditor the scope and results of the service auditor's work. Also, if the user auditor believes it is necessary, he or she may contact the service organization, through the user organization, to request that the service auditor perform agreed-upon procedures at the service organization, or the user auditor may perform such procedures.

**.20** *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2004, for accelerated filers, and on or after July 15, 2005, for all other issuers. See PCAOB Release No. 2004-008.]*

When assessing a service organization's controls and how they interact with a user organization's controls, the user auditor may become aware of the existence of significant deficiencies. In such circumstances, the user auditor should consider the guidance provided in section 325, *Communications About Control Deficiencies in An Audit of Financial Statements*.

**.21** The user auditor should not make reference to the report of the service auditor as a basis, in part, for his or her own opinion on the user organization's financial statements. The service auditor's report is used in the audit, but the service auditor is not responsible for examining any portion of the financial statements as of any specific date or for any specified period. Thus, there cannot be a division of responsibility for the audit of the financial statements.

## Responsibilities of Service Auditors

**.22** The service auditor is responsible for the representations in his or her report and for exercising due care in the application of procedures that support those representations. Although a service auditor's engagement differs from an audit of financial statements conducted in accordance with generally accepted auditing standards, it should be performed in accordance with the general standards and with the relevant fieldwork and reporting standards. Although the service auditor should be independent from the service organization, it is not necessary for the service auditor to be independent from each user organization.

**.23** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

As a result of procedures performed at the service organization, the service auditor may become aware of illegal acts, fraud, or uncorrected errors attributable to the service organization's management or employees that may affect one or more user organizations. The terms *errors*, *fraud*, and *illegal acts* are discussed in Auditing Standard No. 14, *Evaluating Audit Results*, and section 317, *Illegal Acts by Clients*; the discussions therein are relevant to this section. When the service auditor becomes aware of such matters, he or she should determine from the appropriate level of management of the service organization whether this information has been communicated appropriately to affected user organizations, unless those matters are clearly inconsequential. If the management of the service organization has not communicated the information to affected user organizations and is unwilling to do so, the service auditor should inform the service organization's audit committee or others with equivalent authority or responsibility. If the audit committee does not respond appropriately to the service auditor's communication, the service auditor should consider whether to resign from the engagement. The service auditor may wish to consult with his or her attorney in making this decision.

**.24** The type of engagement to be performed and the related report to be prepared should be established by the service organization. However, when circumstances permit, discussions between the service organization and the

user organizations are advisable to determine the type of report that will be most suitable for the user organizations' needs. This section provides guidance on the two types of reports that may be issued:

- a. *Reports on controls placed in operation*—A service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, and on whether they had been placed in operation as of a specific date. Such reports may be useful in providing a user auditor with an understanding of the controls necessary to plan the audit and to design effective tests of controls and substantive tests at the user organization, but they are not intended to provide the user auditor with a basis for reducing his or her assessments of control risk below the maximum.
- b. *Reports on controls placed in operation and tests of operating effectiveness*—A service auditor's report on a service organization's description of the controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, on whether such controls were suitably designed to achieve specified control objectives, on whether they had been placed in operation as of a specific date, and on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified. Such reports may be useful in providing the user auditor with an understanding of the controls necessary to plan the audit and may also provide the user auditor with a basis for reducing his or her assessments of control risk below the maximum.

## Reports on Controls Placed in Operation

**.25** The information necessary for a report on controls placed in operation ordinarily is obtained through discussions with appropriate service organization personnel and through reference to various forms of documentation, such as system flowcharts and narratives.

**.26** After obtaining a description of the relevant controls, the service auditor should determine whether the description provides sufficient information for user auditors to obtain an understanding of those aspects of the service organization's controls that may be relevant to a user organization's internal control. The description should contain a discussion of the features of the service organization's controls that would have an effect on a user organization's internal control. Such features are relevant when they directly affect the service provided to the user organization. They may include controls within the control environment, risk assessment, control activities, information and communication, and monitoring components of internal control. The control environment may include hiring practices and key areas of authority and responsibility. Risk assessment may include the identification of risks associated with processing specific transactions. Control activities may include policies and procedures over the modification of computer programs and are ordinarily designed to meet specific control objectives. The specific control objectives of the service organization should be set forth in the service organization's description of controls. Information and communication may include ways in which user transactions are initiated and processed. Monitoring may include the involvement of internal

auditors. [As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78.]

**.27** Evidence of whether controls have been placed in operation is ordinarily obtained through previous experience with the service organization and through procedures such as inquiry of appropriate management, supervisory, and staff personnel; inspection of service organization documents and records; and observation of service organization activities and operations. For the type of report described in paragraph .24*a*, these procedures need not be supplemented by tests of the operating effectiveness of the service organization's controls.

**.28** Although a service auditor's report on controls placed in operation is as of a specified date, the service auditor should inquire about changes in the service organization's controls that may have occurred before the beginning of fieldwork. If the service auditor believes that the changes would be considered significant by user organizations and their auditors, those changes should be included in the description of the service organization's controls. If the service auditor concludes that the changes would be considered significant by user organization's and their auditors and the changes are not included in the description of the service organization's controls, the service auditor should describe the changes in his or her report. Such changes might include—

- Procedural changes made to accommodate provisions of a new FASB Statement of Financial Accounting Standards.
- Major changes in an application to permit on-line processing.
- Procedural changes to eliminate previously identified deficiencies.

Changes that occurred more than twelve months before the date being reported on normally would not be considered significant, because they generally would not affect user auditors' considerations.

**.29** A service auditor's report expressing an opinion on a description of controls placed in operation at a service organization should contain—

- a.* A specific reference to the applications, services, products, or other aspects of the service organization covered.
- b.* A description of the scope and nature of the service auditor's procedures.
- c.* Identification of the party specifying the control objectives.
- d.* An indication that the purpose of the service auditor's engagement was to obtain reasonable assurance about whether (1) the service organization's description presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls were suitably designed to achieve specified control objectives, and (3) such controls had been placed in operation as of a specific date.
- e.* A disclaimer of opinion on the operating effectiveness of the controls.
- f.* The service auditor's opinion on whether the description presents fairly, in all material respects, the relevant aspects of the service organization's controls that had been placed in operation as of a specific date and whether, in the service auditor's opinion, the controls were suitably designed to provide reasonable assurance that the specified control objectives would be achieved if those controls were complied with satisfactorily.

- g.* A statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to future periods any evaluation of the description.
- h.* Identification of the parties for whom the report is intended.

**.30** If the service auditor believes that the description is inaccurate or insufficiently complete for user auditors, the service auditor's report should so state and should contain sufficient detail to provide user auditors with an appropriate understanding.

**.31** It may become evident to the service auditor, when considering the service organization's description of controls placed in operation, that the system was designed with the assumption that certain controls would be implemented by the user organization. If the service auditor is aware of the need for such complementary user organization controls, these should be delineated in the description of controls. If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of the Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs.

**.32** The service auditor should consider conditions that come to his or her attention that, in the service auditor's judgment, represent significant deficiencies in the design or operation of the service organization's controls that preclude the service auditor from obtaining reasonable assurance that specified control objectives would be achieved. The service auditor should also consider whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.33** The description of controls and control objectives required for these reports may be prepared by the service organization. If the service auditor prepares the description of controls and control objectives, the representations in the description remain the responsibility of the service organization.

**.34** For the service auditor to express an opinion on whether the controls were suitably designed to achieve the specified control objectives, it is necessary that—

- a.* The service organization identify and appropriately describe such control objectives and the relevant controls.
- b.* The service auditor consider the linkage of the controls to the stated control objectives.
- c.* The service auditor obtain sufficient evidence to reach an opinion.

**.35** The control objectives may be designated by the service organization or by outside parties such as regulatory authorities, a user group, or others. When the control objectives are not established by outside parties, the service auditor should be satisfied that the control objectives, as set forth by the service organization, are reasonable in the circumstances and consistent with the service organization's contractual obligations.

**.36** The service auditor's report should state whether the controls were suitably designed to achieve the specified control objectives. The report should

not state whether they were suitably designed to achieve objectives beyond the specifically identified control objectives.

**.37** The service auditor's opinion on whether the controls were suitably designed to achieve the specified control objectives is not intended to provide evidence of operating effectiveness or to provide the user auditor with a basis for concluding that control risk may be assessed below the maximum.

**.38** The following is a sample report on controls placed in operation at a service organization. The report should have, as an attachment, a description of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements. This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

To XYZ Service Organization:

We have examined the accompanying description of controls related to the \_\_ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,<sup>3</sup> and (3) such controls had been placed in operation as of \_\_\_\_. The control objectives were specified by \_\_\_\_. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

We did not perform procedures to determine the operating effectiveness of controls for any period. Accordingly, we express no opinion on the operating effectiveness of any aspects of XYZ Service Organization's controls, individually or in the aggregate.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_\_. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

The description of controls at XYZ Service Organization is as of \_\_\_\_ and any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers \_\_\_\_.

---

<sup>3</sup> If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

**.39** If the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors, the service auditor should so state in an explanatory paragraph preceding the opinion paragraph. An example of such an explanatory paragraph follows:

The accompanying description states that XYZ Service Organization uses operator identification numbers and passwords to prevent unauthorized access to the system. Based on inquiries of staff personnel and inspections of activities, we determined that such procedures are employed in Applications A and B but are not required to access the system in Applications C and D.

In addition, the first sentence of the opinion paragraph would be modified to read as follows:

In our opinion, except for the matter referred to in the preceding paragraph, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_\_.

**.40** If, after applying the criteria in paragraph .32, the service auditor concludes that there are significant deficiencies in the design or operation of the service organization's controls, the service auditor should report those conditions in an explanatory paragraph preceding the opinion paragraph. An example of an explanatory paragraph describing a significant deficiency in the design or operation of the service organization's controls follows:

As discussed in the accompanying description, from time to time the Service Organization makes changes in application programs to correct deficiencies or to enhance capabilities. The procedures followed in determining whether to make changes, in designing the changes, and in implementing them do not include review and approval by authorized individuals who are independent from those involved in making the changes. There are also no specified requirements to test such changes or provide test results to an authorized reviewer prior to implementing the changes.

In addition, the second sentence of the opinion paragraph would be modified to read as follows:

Also in our opinion, except for the deficiency referred to in the preceding paragraph, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

## Reports on Controls Placed in Operation and Tests of Operating Effectiveness

*Paragraphs .41 through .56 repeat some of the information contained in paragraphs .25 through .40 to provide readers with a comprehensive, stand-alone presentation of the relevant considerations for each type of report.*

**.41** The information necessary for a report on controls placed in operation and tests of operating effectiveness ordinarily is obtained through discussions with appropriate service organization personnel, through reference to various forms of documentation, such as system flowcharts and narratives, and through the performance of tests of controls. Evidence of whether controls have been placed in operation is ordinarily obtained through previous experience with the service organization and through procedures such as inquiry of appropriate management, supervisory, and staff personnel; inspection of service organization documents and records; and observation of service organization activities and operations. The service auditor applies tests of controls to

determine whether specific controls are operating with sufficient effectiveness to achieve specified control objectives. Section 350, *Audit Sampling*, provides guidance on the application and evaluation of audit sampling in performing tests of controls.

**.42** After obtaining a description of the relevant controls, the service auditor should determine whether the description provides sufficient information for user auditors to obtain an understanding of those aspects of the service organization's controls that may be relevant to a user organization's internal control. The description should contain a discussion of the features of the service organization's controls that would have an effect on a user organization's internal control. Such features are relevant when they directly affect the service provided to the user organization. They may include controls within the control environment, risk assessment, control activities, information and communication, and monitoring components of internal control. The control environment may include hiring practices and key areas of authority and responsibility. Risk assessment may include the identification of risks associated with processing specific transactions. Control activities may include policies and procedures over the modification of computer programs and are ordinarily designed to meet specific control objectives. The specific control objectives of the service organization should be set forth in the service organization's description of controls. Information and communication may include ways in which user transactions are initiated and processed. Monitoring may include the involvement of internal auditors. [As amended, effective for service auditor's reports covering descriptions as of or after January 1, 1997, by Statement on Auditing Standards No. 78.]

**.43** The service auditor should inquire about changes in the service organization's controls that may have occurred before the beginning of fieldwork. If the service auditor believes the changes would be considered significant by user organizations and their auditors, those changes should be included in the description of the service organization's controls. If the service auditor concludes that the changes would be considered significant by user organizations and their auditors and the changes are not included in the description of the service organization's controls, the service auditor should describe the changes in his or her report. Such changes might include—

- Procedural changes made to accommodate provisions of a new FASB Statement of Financial Accounting Standards.
- Major changes in an application to permit on-line processing.
- Procedural changes to eliminate previously identified deficiencies.

Changes that occurred more than twelve months before the date being reported on normally would not be considered significant, because they generally would not affect user auditors' considerations.

**.44** A service auditor's report expressing an opinion on a description of controls placed in operation at a service organization and tests of operating effectiveness should contain—

- a. A specific reference to the applications, services, products, or other aspects of the service organization covered.
- b. A description of the scope and nature of the service auditor's procedures.
- c. Identification of the party specifying the control objectives.

- d.* An indication that the purpose of the service auditor's engagement was to obtain reasonable assurance about whether (1) the service organization's description presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls were suitably designed to achieve specified control objectives, and (3) such controls had been placed in operation as of a specific date.
- e.* The service auditor's opinion on whether the description presents fairly, in all material respects, the relevant aspects of the service organization's controls that had been placed in operation as of a specific date and whether, in the service auditor's opinion, the controls were suitably designed to provide reasonable assurance that the specified control objectives would be achieved if those controls were complied with satisfactorily.
- f.* A reference to a description of tests of specific service organization controls designed to obtain evidence about the operating effectiveness of those controls in achieving specified control objectives. The description should include the controls that were tested, the control objectives the controls were intended to achieve, the tests applied, and the results of the tests. The description should include an indication of the nature, timing, and extent of the tests, as well as sufficient detail to enable user auditors to determine the effect of such tests on user auditors' assessments of control risk. To the extent that the service auditor identified causative factors for exceptions, determined the current status of corrective actions, or obtained other relevant qualitative information about exceptions noted, such information should be provided.
- g.* A statement of the period covered by the service auditor's report on the operating effectiveness of the specific controls tested.
- h.* The service auditor's opinion on whether the controls that were tested were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the related control objectives were achieved during the period specified.
- i.* When all of the control objectives listed in the description of controls placed in operation are not covered by tests of operating effectiveness, a statement that the service auditor does not express an opinion on control objectives not listed in the description of tests performed at the service organization.
- j.* A statement that the relative effectiveness and significance of specific service organization controls and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations.
- k.* A statement that the service auditor has performed no procedures to evaluate the effectiveness of controls at individual user organizations.
- l.* A statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to the future any evaluation of the description or any conclusions about the effectiveness of controls in achieving control objectives.
- m.* Identification of the parties for whom the report is intended.

**.45** If the service auditor believes that the description is inaccurate or insufficiently complete for user auditors, the service auditor's report should so state and should contain sufficient detail to provide user auditors with an appropriate understanding.

**.46** It may become evident to the service auditor, when considering the service organization's description of controls placed in operation, that the system was designed with the assumption that certain controls would be implemented by the user organization. If the service auditor is aware of the need for such complementary user organization controls, these should be delineated in the description of controls. If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of the Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. Similarly, if the operating effectiveness of controls at the service organization is dependent on the application of controls at user organizations, this should be delineated in the description of tests performed.

**.47** The service auditor should consider conditions that come to his or her attention that, in the service auditor's judgment, represent significant deficiencies in the design or operation of the service organization's controls that preclude the service auditor from obtaining reasonable assurance that specified control objectives would be achieved. The service auditor should also consider whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies. [Revised, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.48** The description of controls and control objectives required for these reports may be prepared by the service organization. If the service auditor prepares the description of controls and control objectives, the representations in the description remain the responsibility of the service organization.

**.49** For the service auditor to express an opinion on whether the controls were suitably designed to achieve the specified control objectives, it is necessary that—

- a. The service organization identify and appropriately describe such control objectives and the relevant controls.
- b. The service auditor consider the linkage of the controls to the stated control objectives.
- c. The service auditor obtain sufficient evidence to reach an opinion.

**.50** The control objectives may be designated by the service organization or by outside parties such as regulatory authorities, a user group, or others. When the control objectives are not established by outside parties, the service auditor should be satisfied that the control objectives, as set forth by the service organization, are reasonable in the circumstances and consistent with the service organization's contractual obligations.

**.51** The service auditor's report should state whether the controls were suitably designed to achieve the specified control objectives. The report should not state whether they were suitably designed to achieve objectives beyond the specifically identified control objectives.

.52 The service auditor's opinion on whether the controls were suitably designed to achieve the specified control objectives is not intended to provide evidence of operating effectiveness or to provide the user auditor with a basis for concluding that control risk may be assessed below the maximum. Evidence that may enable the user auditor to conclude that control risk may be assessed below the maximum may be obtained from the results of specific tests of operating effectiveness.

.53 The management of the service organization specifies whether all or selected applications and control objectives will be covered by the tests of operating effectiveness. The service auditor determines which controls are, in his or her judgment, necessary to achieve the control objectives specified by management. The service auditor then determines the nature, timing, and extent of the tests of controls needed to evaluate operating effectiveness. Testing should be applied to controls in effect throughout the period covered by the report. To be useful to user auditors, the report should ordinarily cover a minimum reporting period of six months.

.54 The following is a sample report on controls placed in operation at a service organization and tests of operating effectiveness. It should be assumed that the report has two attachments: (a) a description of the service organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements and (b) a description of controls for which tests of operating effectiveness were performed, the control objectives the controls were intended to achieve, the tests applied, and the results of those tests. This report is illustrative only and should be modified as appropriate to suit the circumstances of individual engagements.

To XYZ Service Organization:

We have examined the accompanying description of controls related to the \_\_ application of XYZ Service Organization. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of XYZ Service Organization's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements, (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily,<sup>4</sup> and (3) such controls had been placed in operation as of \_\_\_\_. The control objectives were specified by \_\_\_\_. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_\_. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls,

---

<sup>4</sup> If the application of controls by user organizations is necessary to achieve the stated control objectives, the service auditor's report should be modified to include the phrase "and user organizations applied the controls contemplated in the design of XYZ Service Organization's controls" following the words "complied with satisfactorily" in the scope and opinion paragraphs. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

listed in Schedule X, to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from \_\_\_ to \_\_\_. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of XYZ Service Organization and to their auditors to be taken into consideration, along with information about the internal control at user organizations, when making assessments of control risk for user organizations. In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from \_\_\_ to \_\_\_. [However, the scope of our engagement did not include tests to determine whether control objectives not listed in Schedule X were achieved; accordingly, we express no opinion on the achievement of control objectives not included in Schedule X.]<sup>5</sup>

The relative effectiveness and significance of specific controls at XYZ Service Organization and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at XYZ Service Organization is as of \_\_\_\_, and information about tests of the operating effectiveness of specific controls covers the period from \_\_\_ to \_\_\_. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

This report is intended solely for use by the management of XYZ Service Organization, its customers, and the independent auditors of its customers.

**.55** If the service auditor concludes that the description is inaccurate or insufficiently complete for user auditors, the service auditor should so state in an explanatory paragraph preceding the opinion paragraph. An example of such an explanatory paragraph follows:

The accompanying description states that XYZ Service Organization uses operator identification numbers and passwords to prevent unauthorized access to the system. Based on inquiries of staff personnel and inspection of activities, we determined that such procedures are employed in Applications A and B but are not required to access the system in Applications C and D.

In addition, the first sentence of the opinion paragraph would be modified to read as follows:

In our opinion, except for the matter referred to in the preceding paragraph, the accompanying description of the aforementioned application presents fairly, in all material respects, the relevant aspects of XYZ Service Organization's controls that had been placed in operation as of \_\_\_.

---

<sup>5</sup> This sentence should be added when all of the control objectives listed in the description of controls placed in operation are not covered by the tests of operating effectiveness. This sentence would be omitted when all of the control objectives listed in the description of controls placed in operation are included in the tests of operating effectiveness. [Footnote renumbered, April 2002, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

**.56** If, after applying the criteria in paragraph .47, the service auditor concludes that there are significant deficiencies in the design or operation of the service organization's controls, the service auditor should report those conditions in an explanatory paragraph preceding the opinion paragraph. An example of an explanatory paragraph describing a significant deficiency in the design or operation of the service organization's controls follows:

As discussed in the accompanying description, from time to time the Service Organization makes changes in application programs to correct deficiencies or to enhance capabilities. The procedures followed in determining whether to make changes, in designing the changes, and in implementing them do not include review and approval by authorized individuals who are independent from those involved in making the changes. There are also no specified requirements to test such changes or provide test results to an authorized reviewer prior to implementing the changes.

In addition, the second sentence of the opinion paragraph would be modified to read as follows:

Also in our opinion, except for the deficiency referred to in the preceding paragraph, the controls, as described, are suitably designed to provide reasonable assurance that the related control objectives would be achieved if the described controls were complied with satisfactorily.

## **Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events**

**.57** Changes in a service organization's controls that could affect user organizations' information systems may occur subsequent to the period covered by the service auditor's report but before the date of the service auditor's report. These occurrences are referred to as subsequent events. A service auditor should consider information about two types of subsequent events that come to his or her attention. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

**.58** The first type consists of events that provide additional information about conditions that existed during the period covered by the service auditor's report. This information should be used by the service auditor in determining whether controls at the service organization that could affect user organizations' information systems were placed in operation, suitably designed, and, if applicable, operating effectively during the period covered by the engagement. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

**.59** The second type consists of those events that provide information about conditions that arose subsequent to the period covered by the service auditor's report that are of such a nature and significance that their disclosure is necessary to prevent users from being misled. This type of information ordinarily will not affect the service auditor's report if the information is adequately disclosed by management in a section of the report containing "Other Information Provided by the Service Organization." If this information is not disclosed by the service organization, the service auditor should disclose it in a section of the report containing "Other Information Provided by the Service Auditor" and/or in the service auditor's report. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

**.60** Although a service auditor has no responsibility to detect subsequent events, the service auditor should inquire of management as to whether it is

aware of any subsequent events through the date of the service auditor's report that would have a significant effect on user organizations. In addition, a service auditor should obtain a representation from management regarding subsequent events. [Paragraph added, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

## Written Representations of the Service Organization's Management

.61 Regardless of the type of report issued, the service auditor should obtain written representations from the service organization's management that—

- Acknowledge management's responsibility for establishing and maintaining appropriate controls relating to the processing of transactions for user organizations.
- Acknowledge the appropriateness of the specified control objectives.
- State that the description of controls presents fairly, in all material respects, the aspects of the service organization's controls that may be relevant to a user organization's internal control.
- State that the controls, as described, had been placed in operation as of a specific date.
- State that management believes its controls were suitably designed to achieve the specified control objectives.
- State that management has disclosed to the service auditor any significant changes in controls that have occurred since the service organization's last examination.
- State that management has disclosed to the service auditor any illegal acts, fraud, or uncorrected errors attributable to the service organization's management or employees that may affect one or more user organizations.
- State that management has disclosed to the service auditor all design deficiencies in controls of which it is aware, including those for which management believes the cost of corrective action may exceed the benefits.
- State that management has disclosed to the service auditor any subsequent events that would have a significant effect on user organizations.

If the scope of the work includes tests of operating effectiveness, the service auditor should obtain a written representation from the service organization's management stating that management has disclosed to the service auditor all instances, of which it is aware, when controls have not operated with sufficient effectiveness to achieve the specified control objectives. [Paragraph renumbered and amended, effective for reports issued on or after January 1, 2003, by Statement on Auditing Standards No. 98.]

## Reporting on Substantive Procedures

.62 The service auditor may be requested to apply substantive procedures to user transactions or assets at the service organization. In such circumstances, the service auditor may make specific reference in his or her report to having

carried out the designated procedures or may provide a separate report in accordance with AT section 201, *Agreed-Upon Procedures Engagements*. Either form of reporting should include a description of the nature, timing, extent, and results of the procedures in sufficient detail to be useful to user auditors in deciding whether to use the results as evidence to support their opinions. [Revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

## Effective Date

**.63** This section is effective for service auditors' reports dated after March 31, 1993. Earlier application of this section is encouraged. [Paragraph renumbered by the issuance of Statement on Auditing Standards No. 98, September 2002.]

---

## AU Section 9324

# Service Organizations: Auditing Interpretations of Section 324

### 1. Describing Tests of Operating Effectiveness and the Results of Such Tests

**.01 Question**—Paragraph .44f of section 324, *Service Organizations*, specifies the elements that should be included in a description of tests of operating effectiveness, which is part of a report on controls placed in operation and tests of operating effectiveness. Section 324.44f states:

"...The description should include the controls that were tested, the control objectives the controls were intended to achieve, the tests applied and the results of the tests. The description should include an indication of the nature, timing, and extent of the tests, as well as sufficient detail to enable user auditors to determine the effect of such tests on user auditors' assessments of control risk. To the extent that the service auditor identified causative factors for exceptions, determined the current status of corrective actions, or obtained other relevant qualitative information about exceptions noted, such information should be provided."

When a service auditor performs an engagement that includes tests of operating effectiveness, what information and how much detail should be included in the description of the "tests applied" and the "results of the tests"?

**.02 Interpretation**—In all cases, for each control objective tested, the description of tests of operating effectiveness should include all of the elements listed in section 324.44f, whether or not the service auditor concludes that the control objective has been achieved. The description should provide sufficient information to enable user auditors to assess control risk for financial statement assertions affected by the service organization. The description need not be a duplication of the service auditor's detailed audit program, which in some cases would make the report too voluminous for user auditors and would provide more than the required level of detail.

**.03** In describing the nature, timing, and extent of the tests applied, the service auditor also should indicate whether the items tested represent a sample or all of the items in the population, but need not indicate the size of the population. In describing the results of the tests, the service auditor should include exceptions and other information that in the service auditor's judgment could be relevant to user auditors. Such exceptions and other information should be included for each control objective, whether or not the service auditor concludes that the control objective has been achieved. When exceptions that could be relevant to user auditors are noted, the description also should include the following information:

- The size of the sample, when sampling has been used
- The number of exceptions noted
- The nature of the exceptions

If no exceptions or other information that could be relevant to user auditors are identified by the tests, the service auditor should indicate that finding (for example, "No relevant exceptions noted").

[Issue Date: April, 1995.]

## 2. Service Organizations That Use the Services of Other Service Organizations (Subservice Organizations)

**.04 Question**—A service organization may use the services of another service organization, such as a bank trust department that uses an independent computer processing service organization to perform its data processing. In this situation, the bank trust department is a service organization and the computer processing service organization is considered a subservice organization. How are a user auditor's and a service auditor's procedures affected when a service organization uses a subservice organization?

**.05 Interpretation**—When a service organization uses a subservice organization, the user auditor should determine whether the processing performed by the subservice organization affects assertions in the user organization's financial statements and whether those assertions are significant to the user organization's financial statements. To plan the audit and assess control risk, a user auditor may need to consider the controls at both the service organization and the subservice organization. Paragraphs .06 through .17 of section 324, *Service Organizations*, provide guidance to user auditors on considering the effect of a service organization on a user organization's internal control. Although section 324.06-.17 do not specifically refer to subservice organizations, when a subservice organization provides services to a service organization, the guidance in these paragraphs should be interpreted to include the subservice organization. For example, in situations where subservice organizations are used, the interaction between the user organization and the service organization described in section 324.06 would be expanded to include the interaction between the user organization, the service organization and the subservice organization.

**.06** Similarly, a service auditor engaged to examine the controls of a service organization and issue a service auditor's report may need to consider functions performed by the subservice organization and the effect of the subservice organization's controls on the service organization.

**.07** The degree of interaction and the nature and materiality of the transactions processed by the service organization and the subservice organization are the most important factors to consider in determining the significance of the subservice organization's controls to the user organization's internal control. Section 324.11-.16 describe how a user auditor's assessment of control risk is affected when a user organization uses a service organization. When a subservice organization is involved, the user auditor may need to consider activities at both the service organization and the subservice organization in applying the guidance in these paragraphs.

**.08 Question**—How does a user auditor obtain information about controls at a subservice organization?

**.09 Interpretation**—If a user auditor concludes that he or she needs information about the subservice organization to plan the audit or to assess control risk, the user auditor (a) may contact the service organization through the user organization and may contact the subservice organization either through the user organization or the service organization to obtain specific information or (b) may request that a service auditor be engaged to perform procedures that will supply the necessary information. Alternatively, the user auditor may visit the service organization or subservice organization and perform such procedures.

**.10 Question**—When a service organization uses a subservice organization, what information about the subservice organization should be included in the service organization's description of controls?

**.11 Interpretation**—A service organization's description of controls should include a description of the functions and nature of the processing performed by the subservice organization in sufficient detail for user auditors to understand the significance of the subservice organization's functions to the processing of the user organizations' transactions. Ordinarily, disclosure of the identity of the subservice organization is not required. However, if the service organization determines that the identity of the subservice organization would be relevant to user organizations, the name of the subservice organization may be included in the description. The purpose of the description of the functions and nature of the processing performed by the subservice organization is to alert user organizations and their auditors to the fact that another entity (that is, the subservice organization) is involved in the processing of the user organizations' transactions and to summarize the functions the subservice organization performs.

**.12** When a subservice organization performs services for a service organization, there are two alternative methods of presenting the description of controls. The service organization determines which method will be used.

- a. *The Carve-Out Method*—The subservice organization's relevant control objectives and controls are excluded from the description and from the scope of the service auditor's engagement. The service organization states in the description that the subservice organization's control objectives and related controls are omitted from the description and that the control objectives in the report include only the objectives the service organization's controls are intended to achieve.
- b. *The Inclusive Method*—The subservice organization's relevant controls are included in the description and in the scope of the engagement. The description should clearly differentiate between controls of the service organization and controls of the subservice organization. The set of control objectives includes all of the objectives a user auditor would expect both the service organization and the subservice organization to achieve. To accomplish this, the service organization should coordinate the preparation and presentation of the description of controls with the subservice organization.

In either method, the service organization includes in its description of controls a description of the functions and nature of the processing performed by the subservice organization, as set forth in paragraph .11.

**.13** If the functions and processing performed by the subservice organization are significant to the processing of user organization transactions, and the service organization does not disclose the existence of the subservice organization and the functions it performs, the service auditor may need to issue a qualified or adverse opinion as to the fairness of the presentation of the description of controls.

**.14 Question**—How is the service auditor's report affected by the method of presentation selected?

**.15 Interpretation**—If the service organization has adopted the carve-out method, the service auditor should modify the scope paragraph of the service auditor's report to briefly summarize the functions and nature of the processing performed by the subservice organization. This summary ordinarily would be

briefier than the information provided by the service organization in its description of the functions and nature of the processing performed by the subservice organization. The service auditor should include a statement in the scope paragraph of the service auditor's report indicating that the description of controls includes only the control objectives and related controls of the service organization; accordingly, the service auditor's examination does not extend to controls at the subservice organization.

.16 An example of the scope paragraph of a service auditor's report using the carve-out method is presented below. Additional or modified report language is shown in *boldface italics*.

### **Sample Scope Paragraph of a Service Auditor's Report Using the Carve-Out Method**

#### Independent Service Auditor's Report

To the Board of Directors of Example Trust Company:

We have examined the accompanying description of the controls of Example Trust Company applicable to the processing of transactions for users of the Institutional Trust Division. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of Example Trust Company's controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements; (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and user organizations applied the controls contemplated in the design of Example Trust Company's controls; and (3) such controls had been placed in operation as of June 30, 20XX. ***Example Trust Company uses a computer processing service organization for all of its computerized application processing. The accompanying description includes only those control objectives and related controls of Example Trust Company and does not include control objectives and related controls of the computer processing service organization. Our examination did not extend to controls of the computer processing service organization.*** The control objectives were specified by the management of Example Trust Company. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

[The remainder of the report is the same as the standard service auditor's report illustrated in section 324.38 and .54.]

.17 If the service organization has used the inclusive method, the service auditor should perform procedures comparable to those described in section 324.12. Such procedures may include performing tests of the service organization's controls over the activities of the subservice organization or performing procedures at the subservice organization. If the service auditor will be performing procedures at the subservice organization, the service organization should arrange for such procedures. The service auditor should recognize that the subservice organization generally is not the client for the engagement. Accordingly, in these circumstances the service auditor should determine whether it will be possible to obtain the required evidence to support the portion of the opinion covering the subservice organization and whether it will be possible to obtain an appropriate letter of representations regarding the subservice organization's controls.

.18 An example of a service auditor's report using the inclusive method is presented below. Additional or modified report language is shown in ***boldface italics***.

### ***Sample Service Auditor's Report Using the Inclusive Method***

#### Independent Service Auditor's Report

To the Board of Directors of Example Trust Company:

We have examined the accompanying description of the controls of Example Trust Company ***and Computer Processing Service Organization, an independent service organization that provides computer processing services to Example Trust Company***, applicable to the processing of transactions for users of the Institutional Trust Division. Our examination included procedures to obtain reasonable assurance about whether (1) the accompanying description presents fairly, in all material respects, the aspects of Example Trust Company's ***and Computer Processing Service Organization's*** controls that may be relevant to a user organization's internal control as it relates to an audit of financial statements; (2) the controls included in the description were suitably designed to achieve the control objectives specified in the description, if those controls were complied with satisfactorily, and user organizations applied the controls contemplated in the design of Example Trust Company's controls; and (3) the controls had been placed in operation as of June 30, 20XX. The control objectives were specified by the management of Example Trust Company. Our examination was performed in accordance with standards established by the American Institute of Certified Public Accountants and included those procedures we considered necessary in the circumstances to obtain a reasonable basis for rendering our opinion.

In our opinion, the accompanying description of the aforementioned controls presents fairly, in all material respects, the relevant aspects of Example Trust Company's ***and Computer Processing Service Organization's*** controls that had been placed in operation as of June 30, 20XX. Also, in our opinion, the controls, as described, are suitably designed to provide reasonable assurance that the specified control objectives would be achieved if the described controls were complied with satisfactorily and user organizations applied the controls contemplated in the design of Example Trust Company's controls.

In addition to the procedures we considered necessary to render our opinion as expressed in the previous paragraph, we applied tests to specific controls, listed in Schedule X to obtain evidence about their effectiveness in meeting the control objectives, described in Schedule X, during the period from January 1, 20XX, to June 30, 20XX. The specific controls and the nature, timing, extent, and results of the tests are listed in Schedule X. This information has been provided to user organizations of Example Trust Company and to their auditors to be taken into consideration, along with information about internal control at user organizations, when making assessments of control risk for user organizations. In our opinion the controls that were tested, as described in Schedule X, were operating with sufficient effectiveness to provide reasonable, but not absolute, assurance that the control objectives specified in Schedule X were achieved during the period from January 1, 20XX, to June 30, 20XX.

The relative effectiveness and significance of specific controls at Example Trust Company ***and Computer Processing Service Organization***, and their effect on assessments of control risk at user organizations are dependent on their interaction with the controls and other factors present at individual user organizations. We have performed no procedures to evaluate the effectiveness of controls at individual user organizations.

The description of controls at Example Trust Company *and Computer Processing Service Organization* is as of June 30, 20XX, and information about tests of the operating effectiveness of specific controls covers the period from January 1, 20XX, to June 30, 20XX. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization *and Computer Processing Service Organization* is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.<sup>1</sup>

This report is intended solely for use by the management of Example Trust Company, its users, and the independent auditors of its users.

July 10, 20XX

[Issue Date: April, 1995; Revised: February, 1997;  
Revised: April, 2002.]

### **[3.] Responsibilities of Service Organizations and Service Auditors With Respect to Information About the Year 2000 Issue in a Service Organization's Description of Controls**

[.19–.34] [Withdrawn July, 2000 by the Audit Issues Task Force.]

## **4. Responsibilities of Service Organizations and Service Auditors With Respect to Forward-Looking Information in a Service Organization's Description of Controls**

**.35 Question**—*Section 324.32 requires a service auditor to consider "whether any other information, irrespective of specified control objectives, has come to his or her attention that causes him or her to conclude (a) that design deficiencies exist that could adversely affect the ability to initiate, record, process, or report financial data to user organizations without error, and (b) that user organizations would not generally be expected to have controls in place to mitigate such design deficiencies."* A service auditor performing a service auditor's engagement may become aware that a service organization, whose system is correctly processing data during the period covered by the service auditor's examination, has not performed contingency planning or made adequate provision for disaster recovery, and may not be able to retrieve or process data in future periods. Does section 324.32 require a service auditor to identify, in his or her report, design deficiencies that do not affect processing during the period covered by the service auditor's examination but may represent potential problems in future periods?

**.36 Interpretation**—No. Section 324.32 addresses design deficiencies that could adversely affect processing *during the period covered by the service auditor's examination*. Section 324.32 does not apply to design deficiencies that potentially could affect processing *in future periods*. If the computer programs are correctly processing data during the period covered by the service auditor's examination, and such design deficiencies currently do not affect user

---

<sup>1</sup> This sentence has been expanded to describe the risks of projecting any evaluation of the controls to future periods because of the failure to make needed changes to a system or controls, as provided for in Interpretation No. 5, "Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods" (paragraphs .38–.40).

organizations' abilities to initiate, record, process, or report financial data, the service auditor would not be required to report such design deficiencies in his or her report, based on the requirements in section 324.32. However, if a service auditor becomes aware of design deficiencies at the service organization that could potentially affect the processing of user organizations' transactions in future periods, the service auditor, in his or her judgment, may choose to communicate this information to the service organization's management and advise management to disclose this information and its plans for correcting the design deficiencies in a section of the service auditor's document titled "Other Information Provided by the Service Organization."<sup>2</sup>

**.37** If the service organization includes information about the design deficiencies in the section of the document titled "Other Information Provided by the Service Organization," the service auditor should read the information and consider applying by analogy the guidance in section 550, *Other Information in Documents Containing Audited Financial Statements*. In addition, the service auditor should include a paragraph in his or her report disclaiming an opinion on the information provided by the service organization. The following is an example of such a paragraph.

The information in section 4 describing XYZ Service Organization's plans to modify its disaster recovery plan is presented by the Service Organization to provide additional information and is not a part of the Service Organization's description of controls that may be relevant to a user organization's internal control. Such information has not been subjected to the procedures applied in the examination of the description of the controls applicable to the processing of transactions for user organizations and, accordingly, we express no opinion on it.

A service auditor also may consider communicating information about the design deficiencies in the section of the service auditor's document titled "Other Information Provided by the Service Auditor."

[Issue Date: February, 2002.]

## 5. Statements About the Risk of Projecting Evaluations of the Effectiveness of Controls to Future Periods

**.38 Question**—Section 324.29g and .44l state that a service auditor's report should contain a statement of the inherent limitations of the potential effectiveness of controls at the service organization and of the risk of projecting to future periods any evaluation of the description. Section 324.44l goes on to state that the report also should refer to the risk of projecting to the future "any conclusions about the effectiveness of controls in achieving control objectives." The sample service auditor's reports in section 324.38 and .54 include

---

<sup>2</sup> Chapter 2 of the AICPA Audit Guide *Service Organizations: Applying SAS No. 70, as Amended*, proposes four sections of a service auditor's document.

1. Independent service auditor's report (the letter from the service auditor expressing his or her opinion)
2. Service organization's description of controls
3. Information provided by the independent service auditor (This section generally contains a description of the service auditor's tests of operating effectiveness and the results of those tests.)
4. Other information provided by the service organization

illustrative paragraphs that illustrate this caveat. The following excerpt is from section 324.54:

The description of controls at XYZ Service Organization is as of \_\_\_\_\_, and information about tests of the operating effectiveness of specific controls covers the period from \_\_\_\_\_ to \_\_\_\_\_. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes may alter the validity of such conclusions.

The validity of projections to the future about the effectiveness of controls may be affected by changes made to the system and the controls, and also by the failure to make needed changes, for example, changes to accommodate new processing requirements. May a service auditor's report be expanded to describe the risk of projecting to the future conclusions about the effectiveness of controls?

**.39 Interpretation**—The sample reports in section 324.38 and .54 may be expanded to describe this risk. The first and second sentences of the illustrative paragraph above address the potential effect of change on the description of controls as of a specified date; accordingly, they do not require modification because new processing requirements would not affect the description as of the specified date. However, the last sentence in the sample report paragraph above could be expanded to describe the risk of projecting an evaluation of the controls to future periods because of changes to the system or controls, or the failure to make needed changes to the system or controls.

**.40** Suggested additions to the paragraph in the illustrative service auditor's reports in section 324.38 and .54 are the following (new language is shown in italics.):

The description of controls at XYZ Service Organization is as of \_\_\_\_\_, and information about tests of the operating effectiveness of specific controls covers the period from \_\_\_\_\_ to \_\_\_\_\_. Any projection of such information to the future is subject to the risk that, because of change, the description may no longer portray the controls in existence. The potential effectiveness of specific controls at the Service Organization is subject to inherent limitations and, accordingly, errors or fraud may occur and not be detected. Furthermore, the projection of any conclusions, based on our findings, to future periods is subject to the risk that changes *made to the system or controls, or the failure to make needed changes to the system or controls*, may alter the validity of such conclusions.

[Issue Date: February, 2002.]

## **[6.] Responsibilities of Service Organizations and Service Auditors With Respect to Subsequent Events in a Service Auditor's Engagement**

**.41** [Rescinded September, 2002, by Statement on Auditing Standards No. 98.]

## AU Section 325

# Communications About Control Deficiencies in an Audit of Financial Statements

### Source: Auditing Standard No. 5.

*[The following is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

*AU section 325 is superseded as follows:*

- *In an integrated audit of financial statements and internal control over financial reporting*, by paragraphs 78–84 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
  - *In an audit of financial statements only*, by the following paragraphs.
1. In an audit of financial statements, the auditor may identify deficiencies in the company's internal control over financial reporting. A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.
    - A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective is not always met.
    - A deficiency in operation exists when a properly designed control does not operate as designed or when the person performing the control does not possess the necessary authority or qualifications to perform the control effectively.
  2. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control over financial reporting, that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting.
  3. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Note: There is a reasonable possibility of an event when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in paragraph 3 of Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*.

Note: In evaluating whether a deficiency exists and whether deficiencies, either individually or in combination with other deficiencies, are material weaknesses, the auditor should follow the direction in paragraphs 62–70 of PCAOB Auditing

Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements.*

4. The auditor must communicate in writing to management and the audit committee all significant deficiencies and material weaknesses identified during the audit. The written communication should be made prior to the issuance of the auditor's report on the financial statements. The auditor's communication should distinguish clearly between those matters considered significant deficiencies and those considered material weaknesses, as defined in paragraphs 2 and 3.

Note: If no such committee exists with respect to the company, all references to the audit committee in this standard apply to the entire board of directors of the company.<sup>1</sup> The auditor should be aware that companies whose securities are not listed on a national securities exchange or an automated inter-dealer quotation system of a national securities association (such as the New York Stock Exchange, American Stock Exchange, or NASDAQ) may not be required to have independent directors for their audit committees. In this case, the auditor should not consider the lack of independent directors or an audit committee at these companies indicative, by themselves, of a control deficiency. Likewise, the independence requirements of Securities Exchange Act Rule 10A-3<sup>2</sup> are not applicable to the listing of non-equity securities of a consolidated or at least 50 percent beneficially owned subsidiary of a listed issuer that is subject to the requirements of Securities Exchange Act Rule 10A-3(c)(2).<sup>3</sup> Therefore, the auditor should interpret references to the audit committee in this standard, as applied to a subsidiary registrant, as being consistent with the provisions of Securities Exchange Act Rule 10A-3(c)(2).<sup>4</sup> Furthermore, for subsidiary registrants, communications required by this standard to be directed to the audit committee should be made to the same committee or equivalent body that pre-approves the retention of the auditor by or on behalf of the subsidiary registrant pursuant to Rule 2-01(c)(7) of Regulation S-X<sup>5</sup> (which might be, for example, the audit committee of the subsidiary registrant, the full board of the subsidiary registrant, or the audit committee of the subsidiary registrant's parent). In all cases, the auditor should interpret the terms "board of directors" and "audit committee" in this standard as being consistent with provisions for the use of those terms as defined in relevant SEC rules.

5. If oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, that circumstance should be regarded as an indicator that a material weakness in internal control over financial reporting exists. Although there is not an explicit requirement to evaluate the effectiveness of the audit committee's oversight in an audit of only the financial statements, if the auditor becomes aware that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that information in writing to the board of directors.

---

<sup>1</sup> See 15 U.S.C. 78c(a)58 and 15 U.S.C. 7201(a)(3).

<sup>2</sup> See 17 C.F.R. 240.10A-3.

<sup>3</sup> See 17 C.F.R. 240.10A-3(c)(2).

<sup>4</sup> See 17 C.F.R. 240.10A-3(c)(2).

<sup>5</sup> See 17 C.F.R. 210-2-01(c)(7).

6. These written communications should include:
    - a. The definitions of significant deficiencies and material weaknesses and should clearly distinguish to which category the deficiencies being communicated relate.
    - b. A statement that the objective of the audit was to report on the financial statements and not to provide assurance on internal control.
    - c. A statement that the communication is intended solely for the information and use of the board of directors, audit committee, management, and others within the organization. When there are requirements established by governmental authorities to furnish such written communications, specific reference to such regulatory authorities may be made.
  7. The auditor might identify matters in addition to those required to be communicated by this standard. Such matters include control deficiencies identified by the auditor that are neither significant deficiencies nor material weaknesses and matters the company may request the auditor to be alert to that go beyond those contemplated by this standard. The auditor may report such matters to management, the audit committee, or others, as appropriate.
  8. The auditor should not report in writing that no significant deficiencies were discovered during an audit of financial statements because of the potential that the limited degree of assurance associated with such a report will be misunderstood.
  9. When timely communication is important, the auditor should communicate the preceding matters during the course of the audit rather than at the end of the engagement. The decision about whether to issue an interim communication should be determined based on the relative significance of the matters noted and the urgency of corrective follow-up action required. In an audit of financial statements only, auditing interpretation 1 to AU sec. 325, "Reporting on the Existence of Material Weaknesses," continues to apply except that the term "reportable condition" means "significant deficiency," as defined in paragraph 2 of this standard.
-

## AU Section 9325

# Communication of Internal Control Related Matters Noted in an Audit: Auditing Interpretations of Section 325

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: In an audit of financial statements only, auditing interpretation 1 to AU sec. 325, "Reporting on the Existence of Material Weaknesses," continues to apply except that the term "reportable condition" means "significant deficiency" as defined in paragraph 2 of this standard. Within the example report within paragraph 4 of the interpretation, the third sentence is replaced with the definition of a material weakness in paragraph A7 of Appendix A, *Definitions*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

### 1. Reporting on the Existence of Material Weaknesses

**.01 Question**—Section 325 requires the auditor to report to the audit committee or to individuals with equivalent authority and responsibility significant deficiencies noted during an audit of financial statements. It permits the issuance of reports that include a statement about whether any of the significant deficiencies identified are material weaknesses. In connection with an audit, may the auditor issue a written report on material weaknesses separate from the report on significant deficiencies?

**.02 Interpretation**—Yes. Section 325 does not preclude the auditor from issuing a separate report stating whether he or she noted any material weaknesses during the audit. Reports on material weaknesses should—

- Indicate that the purpose of the audit was to report on the financial statements and not to provide assurance on internal control.
- Include the definition of a material weakness.
- State that the communication is intended solely for the information and the use of the audit committee, management, and others within the organization and is not intended to be and should not be used by anyone other than these specified parties. When there are requirements established by governmental agencies to furnish such reports, specific reference to such regulatory authorities may be made.

**.03** Section 325 prohibits the auditor from issuing a written report representing that no significant deficiencies were noted during the audit. Therefore, in issuing a report stating that no material weaknesses were noted, the auditor should not imply that no significant deficiencies were noted.

**.04** The following is an illustration of a report encompassing the above requirements:

In planning and performing our audit of the financial statements of ABC Corporation for the year ended December 31, 19XX, we considered its internal control in order to determine our auditing procedures for the purpose of expressing our

opinion on the financial statements and not to provide assurance on the internal control. Our consideration of the internal control would not necessarily disclose all matters in the internal control that might be material weaknesses under standards established by the American Institute of Certified Public Accountants. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements caused by error or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. However, we noted no matters involving the internal control and its operation that we consider to be material weaknesses as defined above.

This report is intended solely for the information and use of the audit committee (board of directors, board of trustees, or owners in owner-managed enterprises), management, and others within the organization (or specified regulatory agency) and is not intended to be and should not be used by anyone other than these specified parties.

**.05** If conditions believed to be material weaknesses are disclosed, the report should describe the weaknesses that have come to the auditor's attention. The last sentence of the first paragraph of the report illustrated in paragraph .04 should be modified as follows and paragraphs describing the material weaknesses should follow the first paragraph:

However, we noted the following matters involving internal control and its operation that we consider to be material weaknesses as defined above.

**.06** In some cases reports on material weaknesses may include comments on specific aspects of internal control or on additional matters. For example, a regulatory agency may require comments on the accounting system and controls (but not on the control environment) or on compliance with certain provisions in contracts or regulations. In such cases the language in paragraph .04 should be modified to:

- a. identify clearly the specific aspects of internal controls or the additional matters covered by the report
- b. distinguish any additional matters from internal control
- c. describe in reasonable detail the scope of the review and tests concerning the additional matters
- d. express conclusions in language comparable to that in paragraph .04 or .05, as appropriate

**.07** The identification of the specific aspects of internal control or additional matters covered in the report should be as specific as the auditor considers necessary to prevent misunderstanding in this respect. Such identification can be made in some cases by reference to specific portions of other documents such as contracts or regulations.

[Issue Date: February, 1989; Revised: February, 1999; Revised October, 2007.]

## [2.] Audit Considerations for the Year 2000 Issue

[.08–.17] [Withdrawn July, 2000 by the Audit Issues Task Force.]

---

**AU Section 326*****Evidential Matter***

*[This section was superseded, effective December 15, 2010, by PCAOB Auditing Standard Nos. 8–15. See PCAOB Release No. 2010-004.]*

*[See Auditing Standard No. 15, Audit Evidence, in the "Auditing Standards" section.]*

---

## AU Section 9326

# ***Evidential Matter: Auditing Interpretations of Section 326***

**Source:** Auditing Standard Nos. 8–15.

### **[1.] Evidential Matter for an Audit of Interim Financial Statements**

**[.01–.05]**

*[Paragraphs .01–.05 deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

### **2. The Effect of an Inability to Obtain Evidential Matter Relating to Income Tax Accruals**

**.06 Question**—The Internal Revenue Service's audit manual instructs its examiners on how to secure from corporate officials "tax accrual workpapers" or the "tax liability contingency analysis," including, "a memorandum discussing items reflected in the financial statements as income or expense where the ultimate tax treatment is unclear." The audit manual states that the examiner may question or summons a corporate officer or manager concerning the "knowledge of the items that make up the corporation's contingent reserve accounts." It also states that "in unusual circumstances, access may be had to the audit or tax workpapers" of an independent accountant or an accounting firm after attempting to obtain the information from the taxpayer. IRS policy also includes specific procedures to be followed in circumstances involving "Listed Transactions," to help address what the IRS considers to be abusive tax avoidance transactions (Internal Revenue Manual, section 4024.2-.5, 5/14/81, and Internal Revenue Service Announcement 2002-63, 6/17/02).

**.07** Concern over IRS access to tax accrual working papers might cause some clients to not prepare or maintain appropriate documentation of the calculation or contents of the accrual for income taxes included in the financial statements, or to deny the independent auditor access to such information.

**.08** What effect does this situation have on the auditor's opinion on the financial statements?

**.09 Interpretation**—The client is responsible for its tax accrual, the underlying support for the accrual, and the related disclosures. Limitations on the auditor's access to information considered necessary to audit the tax accrual will affect the auditor's ability to issue an unqualified opinion on the financial statements. Thus, if the client does not have appropriate documentation of the calculation or contents of the accrual for income taxes and denies the auditor access to client personnel responsible for making the judgments and estimates relating to the accrual, the auditor should assess the importance of that inadequacy in the accounting records and the client imposed limitation on his or her ability to form an opinion on the financial statements. Also, if the client has appropriate documentation but denies the auditor access to it and to client personnel who possess the information, the auditor should assess the importance of the client-imposed scope limitation on his or her ability to form an opinion.

**.10** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

The third standard of field work requires the auditor to obtain sufficient appropriate evidential matter through, among other things, inspection and inquiries to afford a reasonable basis for an opinion on the financial statements. Paragraph 35 of Auditing Standard No. 14, *Evaluating Audit Results*, requires the auditor to obtain sufficient appropriate evidential matter about assertions in the financial statements of material significance or else to qualify or disclaim his or her opinion on the statements. Section 508, *Reports on Audited Financial Statements*, paragraph .24, states that, "When restrictions that significantly limit the scope of the audit are imposed by the client, ordinarily the auditor should disclaim an opinion on the financial statements." Also, section 333 on *Management Representations* requires the auditor to obtain written representations from management. Section 333.06 states that specific representations should relate to the following matters, "availability of all financial records and related data," and section 333.08 states that a materiality limit does not apply to that representation. Section 333.13 states that "management's refusal to furnish a written representation" constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion.

**.11 Question**—A client may allow the auditor to inspect its tax accrual workpapers, but request that copies not be retained for audit documentation, particularly copies of the tax liability contingency analysis. The client also may suggest that the auditor not prepare and maintain similar documentation of his or her own. What should the auditor consider in deciding a response to such a request?

**.12** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

*Interpretation*—Section 339, *Audit Documentation*, states that audit documentation is the principal record of auditing procedures applied, evidence obtained, and conclusions reached by the auditor in the engagement. Audit documentation should include sufficient appropriate evidential matter to afford a reasonable basis for an opinion. In addition, audit documentation should be sufficient to enable members of the engagement team with supervision and review responsibilities to understand the nature, timing, extent, and results of auditing procedures performed, and the evidence obtained.

**.13** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

The auditor's documentation of the results of auditing procedures directed at the tax accounts and related disclosures also should include sufficient appropriate evidential matter about the significant elements of the client's tax liability contingency analysis. This documentation should include copies of the client's documents, schedules, or analyses (or auditor-prepared summaries thereof) to enable the auditor to support his or her conclusions regarding the appropriateness of the client's accounting and disclosure of significant tax-related contingency matters. The audit documentation should reflect the procedures performed and conclusions reached by the auditor and, for significant matters, include the client's documentary support for its financial statement amounts and disclosures.

**.14** The audit documentation should include the significant elements of the client's analysis of tax contingencies or reserves, including roll-forward of material changes to such reserves. In addition, the documentation should provide the client's position and support for income tax related disclosures, such as its effective tax rate reconciliation, and support for its intra-period allocation

of income tax expense or benefit to continuing operations and to items other than continuing operations. Where applicable, the documentation also should include the client's basis for assessing deferred tax assets and related valuation allowances and its support for applying the "indefinite reversal criteria" in APB Opinion No. 23, *Accounting for Income Taxes—Special Areas*, including its specific plans for reinvestment of undistributed foreign earnings.

**.15 Question**—In some situations, a client may furnish its outside legal counsel or in-house legal or tax counsel with information concerning the tax contingencies covered by the accrual for income taxes included in the financial statements and ask counsel to provide the auditor an opinion on the adequacy of the accrual for those contingencies.

**.16** In such circumstances, rather than inspecting and obtaining documentary evidence of the client's tax liability contingency analysis and making inquiries of the client, may the auditor consider the counsel as a specialist within the meaning of section 336, *Using the Work of a Specialist*, and rely solely on counsel's opinion as an appropriate procedure for obtaining evidential matter to support his or her opinion on the financial statements?

**.17** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

*Interpretation*—No. The opinion of legal counsel in this situation would not provide sufficient appropriate evidential matter to afford a reasonable basis for an opinion on the financial statements.

**.18** Section 336.01 defines a specialist as "a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing." It is intended to apply to situations requiring special knowledge of matters about which the auditor does not have adequate technical training and proficiency. The auditor's education, training, and experience, on the other hand, do enable him or her to be knowledgeable concerning income tax matters and competent to assess their presentation in the financial statements.

**.19** The opinion of legal counsel on specific tax issues that he or she is asked to address and to which he or she has devoted substantive attention, as contemplated by section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, can be useful to the auditor in forming his or her own opinion. However, the audit of income tax accounts requires a combination of tax expertise and knowledge about the client's business that is accumulated during all aspects of an audit. Therefore, as stated above, it is not appropriate for the auditor to rely solely on such legal opinion.

**.20 Question**—A client may have obtained the advice or opinion of an outside tax adviser related to the tax accrual or matters affecting it, including tax contingencies, and further may attempt to limit the auditor's access to such advice or opinion, or limit the auditor's documentation of such advice or opinion. This limitation on the auditor's access may be proposed on the basis that such information is privileged. Can the auditor rely solely on the conclusions of third party tax advisers? What evidential matter should the auditor obtain and include in the audit documentation?

**.21** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

*Interpretation*—As discussed in paragraphs .17 through .19 above, the auditor cannot accept a client's or a third party's analysis or opinion with respect to tax matters without careful consideration and application of the auditor's tax expertise and knowledge about the client's business. As a result of applying such knowledge to the facts, the auditor may encounter situations in which the

auditor either disagrees with the position taken by the client, or its advisers, or does not have sufficient appropriate evidential matter to support his or her opinion.

**.22** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If the client's support for the tax accrual or matters affecting it, including tax contingencies, is based upon an opinion issued by an outside adviser with respect to a potentially material matter, the auditor should obtain access to the opinion, notwithstanding potential concerns regarding attorney-client or other forms of privilege. The audit documentation should include either the actual advice or opinions rendered by an outside adviser, or other sufficient documentation or abstracts supporting both the transactions or facts addressed as well as the analysis and conclusions reached by the client and adviser. Alternatives such as redacted or modified opinions may be considered, but must nonetheless include sufficient content to articulate and document the client's position so that the auditor can formulate his or her conclusion. Similarly, it may be possible to accept a client's analysis summarizing an outside adviser's opinion, but the client's analysis must provide sufficient appropriate evidential matter for the auditor to formulate his or her conclusion. In addition, client representations may be obtained stating that the client has not received any advice or opinions that are contradictory to the client's support for the tax accrual.

**.23** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If the auditor is unable to accumulate sufficient appropriate evidence about whether there is a supported and reasonable basis for the client's position, the auditor should consider the effect of this scope limitation on his or her report.

[Issue Date: March, 1981; Amended: April 9, 2003.]

### **[3.] The Auditor's Consideration of the Completeness Assertion**

**[.24-.27]** *[Paragraphs .24-.27 deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

## AU Section 328

# Auditing Fair Value Measurements and Disclosures

**Source:** SAS No. 101; Auditing Standard No. 5; Auditing Standard No. 6; Auditing Standard Nos. 8–15; Auditing Standard No. 16.

**Effective for audits of financial statements for periods beginning on or after June 15, 2003, unless otherwise indicated.**

## Introduction

**.01** The purpose of this section is to establish standards and provide guidance on auditing fair value measurements and disclosures contained in financial statements. In particular, this section addresses audit considerations relating to the measurement and disclosure of assets, liabilities, and specific components of equity presented or disclosed at fair value in financial statements. Fair value measurements of assets, liabilities, and components of equity may arise from both the initial recording of transactions and later changes in value. Changes in fair value measurements that occur over time may be treated in different ways under generally accepted accounting principles (GAAP). For example, GAAP may require that some fair value changes be reflected in net income and that other fair value changes be reflected in other comprehensive income and equity.

**.02** While this section provides guidance on auditing fair value measurements and disclosures, evidence obtained from other audit procedures also may provide evidence relevant to the measurement and disclosure of fair values. For example, inspection procedures to verify existence of an asset measured at fair value also may provide relevant evidence about its valuation, such as the physical condition of the asset.

**.03** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should obtain sufficient appropriate audit evidence to provide reasonable assurance that fair value measurements and disclosures are in conformity with GAAP. GAAP requires that certain items be measured at fair value. Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 7, *Using Cash Flow Information and Present Value in Accounting Measurements*, defines the fair value of an asset (liability) as "the amount at which that asset (or liability) could be bought (or incurred) or sold (or settled) in a current transaction between willing parties, that is, other than in a forced or liquidation sale."<sup>1</sup> Although GAAP may not prescribe the

---

<sup>1</sup> Generally accepted accounting principles (GAAP) contain various definitions of fair value. However, all of the definitions reflect the concepts in the definition that appears in Financial Accounting Standards Board (FASB) Statement of Financial Accounting Concepts No. 7, *Using Cash Flow Information and Present Value in Accounting Measurements*. For example, Governmental Accounting Standards Board Statement of Governmental Accounting Standards No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, defines fair value as "the amount at which an investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale."

method for measuring the fair value of an item, it expresses a preference for the use of observable market prices to make that determination. In the absence of observable market prices, GAAP requires fair value to be based on the best information available in the circumstances.

**.04** Management is responsible for making the fair value measurements and disclosures included in the financial statements. As part of fulfilling its responsibility, management needs to establish an accounting and financial reporting process for determining the fair value measurements and disclosures, select appropriate valuation methods, identify and adequately support any significant assumptions used, prepare the valuation, and ensure that the presentation and disclosure of the fair value measurements are in accordance with GAAP.

**.05** Fair value measurements for which observable market prices are not available are inherently imprecise. That is because, among other things, those fair value measurements may be based on assumptions about future conditions, transactions, or events whose outcome is uncertain and will therefore be subject to change over time. The auditor's consideration of such assumptions is based on information available to the auditor at the time of the audit. The auditor is not responsible for predicting future conditions, transactions, or events that, had they been known at the time of the audit, may have had a significant effect on management's actions or management's assumptions underlying the fair value measurements and disclosures.<sup>2</sup>

**.06** Assumptions used in fair value measurements are similar in nature to those required when developing other accounting estimates. However, if observable market prices are not available, GAAP requires that valuation methods incorporate assumptions that marketplace participants would use in their estimates of fair value whenever that information is available without undue cost and effort. If information about market assumptions is not available, an entity may use its own assumptions as long as there are no contrary data indicating that marketplace participants would use different assumptions. These concepts generally are not relevant for accounting estimates made under measurement bases other than fair value. Section 342, *Auditing Accounting Estimates*, provides guidance on auditing accounting estimates in general. This section addresses considerations similar to those in section 342 as well as others in the specific context of fair value measurements and disclosures in accordance with GAAP.

**.07** GAAP requires or permits a variety of fair value measurements and disclosures in financial statements. GAAP also varies in the level of guidance that it provides on measuring fair values and disclosures. While this section provides guidance on auditing fair value measurements and disclosures, it does not address specific types of assets, liabilities, components of equity, transactions, or industry-specific practices.<sup>3</sup>

**.08** The measurement of fair value may be relatively simple for certain assets or liabilities, for example, investments that are bought and sold in active markets that provide readily available and reliable information on the prices at which actual exchanges occur. For those items, the existence of published price quotations in an active market is the best evidence of fair value. The measurement of fair value for other assets or liabilities may be more complex.

---

<sup>2</sup> For purposes of this section, management's assumptions include assumptions developed by management under the guidance of the board of directors and assumptions developed by a specialist engaged or employed by management.

<sup>3</sup> See, for example, section 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*.

A specific asset may not have an observable market price or may possess such characteristics that it becomes necessary for management to estimate its fair value based on the best information available in the circumstances (for example, a complex derivative financial instrument). The estimation of fair value may be achieved through the use of a valuation method (for example, a model premised on discounting of estimated future cash flows).

## Understanding the Entity's Process for Determining Fair Value Measurements and Disclosures and the Relevant Controls, and Assessing Risk

**.09** The auditor should obtain an understanding of the entity's process for determining fair value measurements and disclosures and of the relevant controls sufficient to develop an effective audit approach.

**.10** Management is responsible for establishing an accounting and financial reporting process for determining fair value measurements. In some cases, the measurement of fair value and therefore the process set up by management to determine fair value may be simple and reliable. For example, management may be able to refer to published price quotations in an active market to determine fair value for marketable securities held by the entity. Some fair value measurements, however, are inherently more complex than others and involve uncertainty about the occurrence of future events or their outcome, and therefore assumptions that may involve the use of judgment need to be made as part of the measurement process.

**.11** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, requires the auditor to obtain an understanding of each of the five components of internal control sufficient to plan the audit. In the specific context of this section, the auditor obtains such an understanding related to the determination of the entity's fair value measurements and disclosures in order to plan the nature, timing, and extent of the audit procedures.

**.12** When obtaining an understanding of the entity's process for determining fair value measurements and disclosures, the auditor considers, for example:

- Controls over the process used to determine fair value measurements, including, for example, controls over data and the segregation of duties between those committing the entity to the underlying transactions and those responsible for undertaking the valuations.
- The expertise and experience of those persons determining the fair value measurements.
- The role that information technology has in the process.
- The types of accounts or transactions requiring fair value measurements or disclosures (for example, whether the accounts arise from the recording of routine and recurring transactions or whether they arise from nonroutine or unusual transactions).
- The extent to which the entity's process relies on a service organization to provide fair value measurements or the data that supports the measurement. When an entity uses a service

organization, the auditor considers the requirements of section 324, *Service Organizations*, as amended.

- The extent to which the entity engages or employs specialists in determining fair value measurements and disclosures.
- The significant management assumptions used in determining fair value.
- The documentation supporting management's assumptions.
- The process used to develop and apply management assumptions, including whether management used available market information to develop the assumptions.
- The process used to monitor changes in management's assumptions.
- The integrity of change controls and security procedures for valuation models and relevant information systems, including approval processes.
- The controls over the consistency, timeliness, and reliability of the data used in valuation models.

**.13** The auditor uses his or her understanding of the entity's process, including its complexity, and of the controls when assessing the risk of material misstatement. Based on that risk assessment, the auditor determines the nature, timing, and extent of the audit procedures. The risk of material misstatement may increase as the accounting and financial reporting requirements for fair value measurements become more complex.

**.14** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Paragraph A5, second note of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, discusses the inherent limitations of internal control. As fair value determinations often involve subjective judgments by management, this may affect the nature of controls that are capable of being implemented, including the possibility of management override of controls. The auditor considers the inherent limitations of internal control in such circumstances in assessing control risk.

## Evaluating Conformity of Fair Value Measurements and Disclosures With GAAP

**.15** The auditor should evaluate whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP. The auditor's understanding of the requirements of GAAP and knowledge of the business and industry, together with the results of other audit procedures, are used to evaluate the accounting for assets or liabilities requiring fair value measurements, and the disclosures about the basis for the fair value measurements and significant uncertainties related thereto.

**.16** The evaluation of the entity's fair value measurements and of the audit evidence depends, in part, on the auditor's knowledge of the nature of the business. This is particularly true where the asset or liability or the valuation method is highly complex. For example, derivative financial instruments may be highly complex, with a risk that differing assumptions used in determining fair values will result in different conclusions. The measurement of the

fair value of some items, for example "in process research and development" or intangible assets acquired in a business combination, may involve special considerations that are affected by the nature of the entity and its operations. Also, the auditor's knowledge of the business, together with the results of other audit procedures, may help identify assets for which management should assess the need to recognize an impairment loss under applicable GAAP.

**.17** The auditor should evaluate management's intent to carry out specific courses of action where intent is relevant to the use of fair value measurements, the related requirements involving presentation and disclosures, and how changes in fair values are reported in financial statements. The auditor also should evaluate management's ability to carry out those courses of action. Management often documents plans and intentions relevant to specific assets or liabilities and GAAP may require it to do so. While the extent of evidence to be obtained about management's intent and ability is a matter of professional judgment, the auditor's procedures ordinarily include inquiries of management, with appropriate corroboration of responses, for example, by:

- Considering management's past history of carrying out its stated intentions with respect to assets or liabilities.
- Reviewing written plans and other documentation, including, where applicable, budgets, minutes, and other such items.
- Considering management's stated reasons for choosing a particular course of action.
- Considering management's ability to carry out a particular course of action given the entity's economic circumstances, including the implications of its contractual commitments.

**.18** When there are no observable market prices and the entity estimates fair value using a valuation method, the auditor should evaluate whether the entity's method of measurement is appropriate in the circumstances. That evaluation requires the use of professional judgment. It also involves obtaining an understanding of management's rationale for selecting a particular method by discussing with management its reasons for selecting the valuation method. The auditor considers whether:

- a. Management has sufficiently evaluated and appropriately applied the criteria, if any, provided by GAAP to support the selected method.
- b. The valuation method is appropriate in the circumstances given the nature of the item being valued.
- c. The valuation method is appropriate in relation to the business, industry, and environment in which the entity operates.

Management may have determined that different valuation methods result in a range of significantly different fair value measurements. In such cases, the auditor evaluates how the entity has investigated the reasons for these differences in establishing its fair value measurements.

**.19** The auditor should evaluate whether the entity's method for determining fair value measurements is applied consistently and if so, whether the consistency is appropriate considering possible changes in the environment or circumstances affecting the entity, or changes in accounting principles. If management has changed the method for determining fair value, the auditor considers whether management can adequately demonstrate that the method to which it has changed provides a more appropriate basis of measurement or whether the change is supported by a change in the GAAP requirements or a

change in circumstances.<sup>4</sup> For example, the introduction of an active market for an equity security may indicate that the use of the discounted cash flows method to estimate the fair value of the security is no longer appropriate.

## Engaging a Specialist

**.20** The auditor should consider whether to engage a specialist and use the work of that specialist as evidential matter in performing substantive tests to evaluate material financial statement assertions. The auditor may have the necessary skill and knowledge to plan and perform audit procedures related to fair values or may decide to use the work of a specialist. If the use of such a specialist is planned, the auditor should consider the guidance in section 336, *Using the Work of a Specialist*.

**.21** When planning to use the work of a specialist in auditing fair value measurements, the auditor considers whether the specialist's understanding of the definition of fair value and the method that the specialist will use to determine fair value are consistent with those of management and with GAAP. For example, the method used by a specialist for estimating the fair value of real estate or a complex derivative may not be consistent with the measurement principles specified in GAAP. Accordingly, the auditor considers such matters, often through discussions with the specialist or by reading the report of the specialist.

**.22** Section 336 provides that, while the reasonableness of assumptions and the appropriateness of the methods used and their application are the responsibility of the specialist, the auditor obtains an understanding of the assumptions and methods used. However, if the auditor believes the findings are unreasonable, he or she applies additional procedures as required in section 336.

## Testing the Entity's Fair Value Measurements and Disclosures

**.23** Based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures. Because of the wide range of possible fair value measurements, from relatively simple to complex, and the varying levels of risk of material misstatement associated with the process for determining fair values, the auditor's planned audit procedures can vary significantly in nature, timing, and extent. For example, substantive tests of the fair value measurements may involve (a) testing management's significant assumptions, the valuation model, and the underlying data (see paragraphs .26 through .39), (b) developing independent fair value estimates for corroborative purposes (see paragraph .40), or (c) reviewing subsequent events and transactions (see paragraphs .41 and .42).

**.24** Some fair value measurements are inherently more complex than others. This complexity arises either because of the nature of the item being measured at fair value or because of the valuation method used to determine fair value. For example, in the absence of quoted prices in an active market, an estimate of a security's fair value may be based on valuation methods such as the

---

<sup>4</sup> [The following footnote is effective November 15, 2008. See PCAOB Release 2008-001.] Statement of Financial Accounting Standard No. 157, *Fair Value Measurements*, states that a change in valuation technique or its application is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances.

discounted cash flow method or the transactions method. Complex fair value measurements normally are characterized by greater uncertainty regarding the reliability of the measurement process. This greater uncertainty may be a result of:

- The length of the forecast period
- The number of significant and complex assumptions associated with the process
- A higher degree of subjectivity associated with the assumptions and factors used in the process
- A higher degree of uncertainty associated with the future occurrence or outcome of events underlying the assumptions used
- Lack of objective data when highly subjective factors are used

**.25** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor uses both the understanding of management's process for determining fair value measurements and his or her assessment of the risk of material misstatement to determine the nature, timing, and extent of the audit procedures. The following are examples of considerations in the development of audit procedures:

- The fair value measurement (for example, a valuation by an independent appraiser) may be made at a date that does not coincide with the date at which the entity is required to measure and report that information in its financial statements. In such cases, the auditor obtains evidence that management has taken into account the effect of events, transactions, and changes in circumstances occurring between the date of the fair value measurement and the reporting date.
- Collateral often is assigned for certain types of investments in debt instruments that either are required to be measured at fair value or are evaluated for possible impairment. If the collateral is an important factor in measuring the fair value of the investment or evaluating its carrying amount, the auditor obtains sufficient appropriate audit evidence regarding the existence, value, rights, and access to or transferability of such collateral, including consideration of whether all appropriate liens have been filed, and considers whether appropriate disclosures about the collateral have been made.
- In some situations, additional procedures, such as the inspection of an asset by the auditor, may be necessary to obtain sufficient appropriate audit evidence about the appropriateness of a fair value measurement. For example, inspection of the asset may be necessary to obtain information about the current physical condition of the asset relevant to its fair value, or inspection of a security may reveal a restriction on its marketability that may affect its value.

## Testing Management's Significant Assumptions, the Valuation Model, and the Underlying Data

**.26** The auditor's understanding of the reliability of the process used by management to determine fair value is an important element in support of the resulting amounts and therefore affects the nature, timing, and extent of audit

procedures. When testing the entity's fair value measurements and disclosures, the auditor evaluates whether:

- a. Management's assumptions are reasonable and reflect, or are not inconsistent with, market information (see paragraph .06).
- b. The fair value measurement was determined using an appropriate model, if applicable.
- c. Management used relevant information that was reasonably available at the time.

**.27** Estimation methods and assumptions, and the auditor's consideration and comparison of fair value measurements determined in prior periods, if any, to results obtained in the current period, may provide evidence of the reliability of management's processes. However, the auditor also considers whether variances from the prior-period fair value measurements result from changes in market or economic circumstances.

**.28** Where applicable, the auditor should evaluate whether the significant assumptions used by management in measuring fair value, taken individually and as a whole, provide a reasonable basis for the fair value measurements and disclosures in the entity's financial statements.

**.29** Assumptions are integral components of more complex valuation methods, for example, valuation methods that employ a combination of estimates of expected future cash flows together with estimates of the values of assets or liabilities in the future, discounted to the present. Auditors pay particular attention to the significant assumptions underlying a valuation method and evaluate whether such assumptions are reasonable and reflect, or are not inconsistent with, market information (see paragraph .06).

**.30** Specific assumptions will vary with the characteristics of the item being valued and the valuation approach used (for example, cost, market, or income). For example, where the discounted cash flows method (a method under the income approach) is used, there will be assumptions about the level of cash flows, the period of time used in the analysis, and the discount rate.

**.31** Assumptions ordinarily are supported by differing types of evidence from internal and external sources that provide objective support for the assumptions used. The auditor evaluates the source and reliability of evidence supporting management's assumptions, including consideration of the assumptions in light of historical and market information.

**.32** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Audit procedures dealing with management's assumptions are performed in the context of the audit of the entity's financial statements. The objective of the audit procedures is therefore not intended to obtain sufficient appropriate audit evidence to provide an opinion on the assumptions themselves. Rather, the auditor performs procedures to evaluate whether the assumptions provide a reasonable basis for measuring fair values in the context of an audit of the financial statements taken as a whole.

**.33** Identifying those assumptions that appear to be significant to the fair value measurement requires the exercise of judgment by management. The auditor focuses attention on the significant assumptions that management has identified. Generally, significant assumptions cover matters that materially affect the fair value measurement and may include those that are:

- a. Sensitive to variation or uncertainty in amount or nature. For example, assumptions about short-term interest rates may be

less susceptible to significant variation compared to assumptions about long-term interest rates.

*b.* Susceptible to misapplication or bias.

**.34** The auditor considers the sensitivity of the valuation to changes in significant assumptions, including market conditions that may affect the value. Where applicable, the auditor encourages management to use techniques such as sensitivity analysis to help identify particularly sensitive assumptions. If management has not identified particularly sensitive assumptions, the auditor considers whether to employ techniques to identify those assumptions.

**.35** The evaluation of whether the assumptions provide a reasonable basis for the fair value measurements relates to the whole set of assumptions as well as to each assumption individually. Assumptions are frequently interdependent and therefore need to be internally consistent. A particular assumption that may appear reasonable when taken in isolation may not be reasonable when used in conjunction with other assumptions. The auditor considers whether management has identified the significant assumptions and factors influencing the measurement of fair value.

**.36** To be reasonable, the assumptions on which the fair value measurements are based (for example, the discount rate used in calculating the present value of future cash flows),<sup>5</sup> individually and taken as a whole, need to be realistic and consistent with:

- a.* The general economic environment, the economic environment of the specific industry, and the entity's economic circumstances;
- b.* Existing market information;
- c.* The plans of the entity, including what management expects will be the outcome of specific objectives and strategies;
- d.* Assumptions made in prior periods, if appropriate;
- e.* Past experience of, or previous conditions experienced by, the entity to the extent currently applicable;
- f.* Other matters relating to the financial statements, for example, assumptions used by management in accounting estimates for financial statement accounts other than those relating to fair value measurements and disclosures; and
- g.* The risk associated with cash flows, if applicable, including the potential variability in the amount and timing of the cash flows and the related effect on the discount rate.

Where assumptions are reflective of management's intent and ability to carry out specific courses of action, the auditor considers whether they are consistent with the entity's plans and past experience.

**.37** If management relies on historical financial information in the development of assumptions, the auditor considers the extent to which such reliance is justified. However, historical information might not be representative of future conditions or events, for example, if management intends to engage in new activities or circumstances change.

**.38** For items valued by the entity using a valuation model, the auditor does not function as an appraiser and is not expected to substitute his or her judgment for that of the entity's management. Rather, the auditor reviews the model and evaluates whether the assumptions used are reasonable and the

---

<sup>5</sup> The auditor also should consider requirements of GAAP that may influence the selection of assumptions (see FASB Concepts Statement No. 7).

model is appropriate considering the entity's circumstances. For example, it may be inappropriate to use discounted cash flows for valuing an equity investment in a start-up enterprise if there are no current revenues on which to base the forecast of future earnings or cash flows.

**.39** The auditor should test the data used to develop the fair value measurements and disclosures and evaluate whether the fair value measurements have been properly determined from such data and management's assumptions. Specifically, the auditor evaluates whether the data on which the fair value measurements are based, including the data used in the work of a specialist, is accurate, complete, and relevant; and whether fair value measurements have been properly determined using such data and management's assumptions. The auditor's tests also may include, for example, procedures such as verifying the source of the data, mathematical recomputation of inputs, and reviewing of information for internal consistency, including whether such information is consistent with management's intent and ability to carry out specific courses of action discussed in paragraph .17.

### Developing Independent Fair Value Estimates for Corroborative Purposes

**.40** The auditor may make an independent estimate of fair value (for example, by using an auditor-developed model) to corroborate the entity's fair value measurement.<sup>6</sup> When developing an independent estimate using management's assumptions, the auditor evaluates those assumptions as discussed in paragraphs .28 to .37. Instead of using management's assumptions, the auditor may develop his or her own assumptions to make a comparison with management's fair value measurements. In that situation, the auditor nevertheless understands management's assumptions. The auditor uses that understanding to ensure that his or her independent estimate takes into consideration all significant variables and to evaluate any significant difference from management's estimate. The auditor also should test the data used to develop the fair value measurements and disclosures as discussed in paragraph .39.

### Reviewing Subsequent Events and Transactions

**.41** *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Events and transactions that occur after the balance-sheet date but before the date of the auditor's report (for example, a sale of an investment shortly after the balance-sheet date), may provide audit evidence regarding management's fair value measurements as of the balance-sheet date.<sup>7</sup> In such circumstances, the audit procedures described in paragraphs .26 through .40 may be minimized or unnecessary because the subsequent event or transaction can be used to substantiate the fair value measurement.

**.42** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Some subsequent events or transactions may reflect changes in circumstances occurring after the balance-sheet date and thus do not constitute appropriate

---

<sup>6</sup> See section 329, *Analytical Procedures*.

<sup>7</sup> The auditor's consideration of a subsequent event or transaction, as contemplated in this paragraph, is a substantive test and thus differs from the review of subsequent events performed pursuant to section 560, *Subsequent Events*.

evidence of the fair value measurement at the balance-sheet date (for example, the prices of actively traded marketable securities that change after the balance-sheet date). When using a subsequent event or transaction to substantiate a fair value measurement, the auditor considers only those events or transactions that reflect circumstances existing at the balance-sheet date.

## Disclosures About Fair Values

**.43** The auditor should evaluate whether the disclosures about fair values made by the entity are in conformity with GAAP.<sup>8</sup> Disclosure of fair value information is an important aspect of financial statements. Often, fair value disclosure is required because of the relevance to users in the evaluation of an entity's performance and financial position. In addition to the fair value information required under GAAP, some entities disclose voluntary additional fair value information in the notes to the financial statements.

**.44** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

When auditing fair value measurements and related disclosures included in the notes to the financial statements, whether required by GAAP or disclosed voluntarily, the auditor ordinarily performs essentially the same types of audit procedures as those employed in auditing a fair value measurement recognized in the financial statements. The auditor obtains sufficient appropriate audit evidence that the valuation principles are appropriate under GAAP and are being consistently applied, and that the method of estimation and significant assumptions used are adequately disclosed in accordance with GAAP.

**.45** The auditor evaluates whether the entity has made adequate disclosures about fair value information. If an item contains a high degree of measurement uncertainty, the auditor assesses whether the disclosures are sufficient to inform users of such uncertainty.<sup>9</sup>

**.46** When disclosure of fair value information under GAAP is omitted because it is not practicable to determine fair value with sufficient reliability, the auditor evaluates the adequacy of disclosures required in these circumstances. If the entity has not appropriately disclosed fair value information required by GAAP, the auditor evaluates whether the financial statements are materially misstated.

## Evaluating the Results of Audit Procedures

**.47** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should evaluate the sufficiency and competence of the audit evidence obtained from auditing fair value measurements and disclosures as well as the consistency of that evidence with other audit evidence obtained and evaluated during the audit. The auditor's evaluation of whether the fair value measurements and disclosures in the financial statements are in conformity with GAAP is performed in the context of the financial statements taken as a whole (see paragraphs 12 through 18 and 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results*).

---

<sup>8</sup> See also paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

<sup>9</sup> See Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.

## Management Representations

.48 Section 333, *Management Representations*, requires that the independent auditor obtain written representations from management as a part of an audit of financial statements performed in accordance with generally accepted auditing standards and provides guidance concerning the representations to be obtained. The auditor ordinarily should obtain written representations from management regarding the reasonableness of significant assumptions, including whether they appropriately reflect management's intent and ability to carry out specific courses of action on behalf of the entity where relevant to the use of fair value measurements or disclosures.

.49 Depending on the nature, materiality, and complexity of fair values, management representations about fair value measurements and disclosures contained in the financial statements also may include representations about:

- The appropriateness of the measurement methods, including related assumptions, used by management in determining fair value and the consistency in application of the methods.
- The completeness and adequacy of disclosures related to fair values.
- Whether subsequent events require adjustment to the fair value measurements and disclosures included in the financial statements.

## Communication With Audit Committees

.50 *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2012. See PCAOB Release 2012-004.]*

Paragraphs 12–13 of Auditing Standard No. 16, *Communications with Audit Committees*, require the auditor to communicate to the audit committee matters related to critical accounting estimates, which may include fair value measurements.

## Effective Date

.51 This section is effective for audits of financial statements for periods beginning on or after June 15, 2003. Earlier application of the provisions of this section is permitted.

---

## AU Section 329

# Substantive Analytical Procedures

*[Section title revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

**(Supersedes section 318)**

**Source: SAS No. 56; SAS No. 96; Auditing Standard No. 2; Auditing Standard Nos. 8–15.**

**Effective for audits of financial statements for periods beginning on or after January 1, 1989, unless otherwise indicated.**

**.01** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

This section establishes requirements regarding the use of substantive analytical procedures in an audit.

Note: Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, establishes requirements regarding performing analytical procedures as a risk assessment procedure in identifying and assessing risks of material misstatement.

Note: Auditing Standard No. 14, *Evaluating Audit Results*, establishes requirements regarding performing analytical procedures as part of the overall review stage of the audit.

**.02** Analytical procedures are an important part of the audit process and consist of evaluations of financial information made by a study of plausible relationships among both financial and nonfinancial data. Analytical procedures range from simple comparisons to the use of complex models involving many relationships and elements of data. A basic premise underlying the application of analytical procedures is that plausible relationships among data may reasonably be expected to exist and continue in the absence of known conditions to the contrary. Particular conditions that can cause variations in these relationships include, for example, specific unusual transactions or events, accounting changes, business changes, random fluctuations, or misstatements.

**.03** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Understanding financial relationships is essential in planning and evaluating the results of analytical procedures, and generally requires knowledge of the client and the industry or industries in which the client operates. An understanding of the purposes of analytical procedures and the limitations of those procedures is also important.

**.04** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Analytical procedures are used as a substantive test to obtain evidential matter about particular assertions related to account balances or classes of transactions. In some cases, analytical procedures can be more effective or efficient than tests of details for achieving particular substantive testing objectives.

**.05** Analytical procedures involve comparisons of recorded amounts, or ratios developed from recorded amounts, to expectations developed by the auditor. The auditor develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the auditor's understanding of the client and of the industry in which the client operates. Following are examples of sources of information for developing expectations:

- a. Financial information for comparable prior period(s) giving consideration to known changes
- b. Anticipated results—for example, budgets, or forecasts including extrapolations from interim or annual data
- c. Relationships among elements of financial information within the period
- d. Information regarding the industry in which the client operates—for example, gross margin information
- e. Relationships of financial information with relevant nonfinancial information

**[.06–.08]** *[Paragraphs .06–.08 and preceding heading, "Analytical Procedures in Planning the Audit," deleted, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

## Analytical Procedures Used as Substantive Tests

**.09** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor's reliance on substantive tests to achieve an audit objective related to a particular assertion<sup>1</sup> may be derived from tests of details, from analytical procedures, or from a combination of both. The decision about which procedure or procedures to use to achieve a particular audit objective is based on the auditor's judgment on the expected effectiveness and efficiency of the available procedures. For significant risks of material misstatement, it is unlikely that audit evidence obtained from substantive analytical procedures alone will be sufficient. (See paragraph 11 of Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.)

**.10** *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2004, for accelerated filers, and on or after July 15, 2005, for all other issuers. PCAOB Release No. 2004-008.]*

The auditor considers the level of assurance, if any, he wants from substantive testing for a particular audit objective and decides, among other things, which procedure, or combination of procedures, can provide that level of assurance. For some assertions, analytical procedures are effective in providing the appropriate level of assurance. For other assertions, however, analytical procedures may not be as effective or efficient as tests of details in providing the desired level of assurance. When designing substantive analytical procedures, the auditor also should evaluate the risk of management override of controls. As part of this process, the auditor should evaluate whether such an override might have allowed adjustments outside of the normal period-end financial reporting process to have been made to the financial statements. Such adjustments might have resulted in artificial changes to the financial statement relationships being

---

<sup>1</sup> Assertions are representations by management that are embodied in financial statement components. See Auditing Standard No. 15, *Audit Evidence*. *[Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

analyzed, causing the auditor to draw erroneous conclusions. For this reason, substantive analytical procedures alone are not well suited to detecting fraud.

.11 The expected effectiveness and efficiency of an analytical procedure in identifying potential misstatements depends on, among other things, (a) the nature of the assertion, (b) the plausibility and predictability of the relationship, (c) the availability and reliability of the data used to develop the expectation, and (d) the precision of the expectation.

## Nature of Assertion

.12 Analytical procedures may be effective and efficient tests for assertions in which potential misstatements would not be apparent from an examination of the detailed evidence or in which detailed evidence is not readily available. For example, comparisons of aggregate salaries paid with the number of personnel may indicate unauthorized payments that may not be apparent from testing individual transactions. Differences from expected relationships may also indicate potential omissions when independent evidence that an individual transaction should have been recorded may not be readily available.

## Plausibility and Predictability of the Relationship

.13 It is important for the auditor to understand the reasons that make relationships plausible because data sometimes appear to be related when they are not, which could lead the auditor to erroneous conclusions. In addition, the presence of an unexpected relationship can provide important evidence when appropriately scrutinized.

.14 As higher levels of assurance are desired from analytical procedures, more predictable relationships are required to develop the expectation. Relationships in a stable environment are usually more predictable than relationships in a dynamic or unstable environment. Relationships involving income statement accounts tend to be more predictable than relationships involving only balance sheet accounts since income statement accounts represent transactions over a period of time, whereas balance sheet accounts represent amounts as of a point in time. Relationships involving transactions subject to management discretion are sometimes less predictable. For example, management may elect to incur maintenance expense rather than replace plant and equipment, or they may delay advertising expenditures.

## Availability and Reliability of Data

.15 Data may or may not be readily available to develop expectations for some assertions. For example, to test the completeness assertion, expected sales for some entities might be developed from production statistics or square feet of selling space. For other entities, data relevant to the assertion of completeness of sales may not be readily available, and it may be more effective or efficient to use the details of shipping records to test that assertion.

.16 *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2004, for accelerated filers, and on or after July 15, 2005, for all other issuers. See PCAOB Release No. 2004-008.]*

Before using the results obtained from substantive analytical procedures, the auditor should either test the design and operating effectiveness of controls over financial information used in the substantive analytical procedures or perform other procedures to support the completeness and accuracy of the underlying

information. The auditor obtains assurance from analytical procedures based upon the consistency of the recorded amounts with expectations developed from data derived from other sources. The reliability of the data used to develop the expectations should be appropriate for the desired level of assurance from the analytical procedure. The auditor should assess the reliability of the data by considering the source of the data and the conditions under which it was gathered, as well as other knowledge the auditor may have about the data. The following factors influence the auditor's consideration of the reliability of data for purposes of achieving audit objectives:

- Whether the data was obtained from independent sources outside the entity or from sources within the entity
- Whether sources within the entity were independent of those who are responsible for the amount being audited
- Whether the data was developed under a reliable system with adequate controls
- Whether the data was subjected to audit testing in the current or prior year
- Whether the expectations were developed using data from a variety of sources

### Precision of the Expectation

**.17** The expectation should be precise enough to provide the desired level of assurance that differences that may be potential material misstatements, individually or when aggregated with other misstatements, would be identified for the auditor to investigate (see paragraph .20). As expectations become more precise, the range of expected differences becomes narrower and, accordingly, the likelihood increases that significant differences from the expectations are due to misstatements. The precision of the expectation depends on, among other things, the auditor's identification and consideration of factors that significantly affect the amount being audited and the level of detail of data used to develop the expectation.

**.18** Many factors can influence financial relationships. For example, sales are affected by prices, volume and product mix. Each of these, in turn, may be affected by a number of factors, and offsetting factors can obscure misstatements. More effective identification of factors that significantly affect the relationship is generally needed as the desired level of assurance from analytical procedures increases.

**.19** Expectations developed at a detailed level generally have a greater chance of detecting misstatement of a given amount than do broad comparisons. Monthly amounts will generally be more effective than annual amounts and comparisons by location or line of business usually will be more effective than company-wide comparisons. The level of detail that is appropriate will be influenced by the nature of the client, its size and its complexity. Generally, the risk that material misstatement could be obscured by offsetting factors increases as a client's operations become more complex and more diversified. Disaggregation helps reduce this risk.

### Investigation and Evaluation of Significant Differences

**.20** In planning the analytical procedures as a substantive test, the auditor should consider the amount of difference from the expectation that can

be accepted without further investigation. This consideration is influenced primarily by materiality and should be consistent with the level of assurance desired from the procedures. Determination of this amount involves considering the possibility that a combination of misstatements in the specific account balances, or class of transactions, or other balances or classes could aggregate to an unacceptable amount.<sup>[2]</sup>

**.21** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should evaluate significant unexpected differences. Reconsidering the methods and factors used in developing the expectation and inquiry of management may assist the auditor in this regard. Management responses, however, should ordinarily be corroborated with other evidential matter. In those cases when an explanation for the difference cannot be obtained, the auditor should obtain sufficient evidence about the assertion by performing other audit procedures to satisfy himself as to whether the difference is a misstatement.<sup>[3]</sup> In designing such other procedures, the auditor should consider that unexplained differences may indicate an increased risk of material misstatement. (See Auditing Standard No. 14, *Evaluating Audit Results.*)

## Documentation of Substantive Analytical Procedures

**.22** When an analytical procedure is used as the principal substantive test of a significant financial statement assertion, the auditor should document all of the following:

- a. The expectation, where that expectation is not otherwise readily determinable from the documentation of the work performed, and factors considered in its development
- b. Results of the comparison of the expectation to the recorded amounts or ratios developed from recorded amounts
- c. Any additional auditing procedures performed in response to significant unexpected differences arising from the analytical procedure and the results of such additional procedures

## AU Section 330

### *The Confirmation Process*

(Supersedes section 331.03–.08)

Source: SAS No. 67; Auditing Standard Nos. 8–15.

Effective for audits of fiscal periods ending after June 15, 1992, unless otherwise indicated.

#### Introduction and Applicability

.01 This section provides guidance about the confirmation process in audits performed in accordance with generally accepted auditing standards. This section—

- Defines the confirmation process (see paragraph .04).
- Discusses the relationship of confirmation procedures to the auditor's assessment of audit risk (see paragraphs .05 through .10).
- Describes certain factors that affect the reliability of confirmations (see paragraphs .16 through .27).
- Provides guidance on performing alternative procedures when responses to confirmation requests are not received (see paragraphs .31 and .32).
- Provides guidance on evaluating the results of confirmation procedures (see paragraph .33).
- Specifically addresses the confirmation of accounts receivable and supersedes section 331, *Inventories*, paragraphs .03-.08 and the portion of section 331.01 that addresses the confirmation of receivables (see paragraphs .34 and .35). This section does not supersede the portion of section 331.01 that addresses the observation of inventories.

.02 *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

This section does not address the extent or timing of confirmation procedures. Guidance on the extent of audit procedures (that is, considerations involved in determining the number of items to confirm) is found in section 350, *Audit Sampling*, and Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*. Guidance on the timing of audit procedures is included in Auditing Standard No. 13, *The Auditor's Responses to the Risks of Material Misstatement*.

.03 In addition, this section does not address matters described in section 336, *Using the Work of a Specialist*, or in section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*.

#### Definition of the Confirmation Process

.04 Confirmation is the process of obtaining and evaluating a direct communication from a third party in response to a request for information about a particular item affecting financial statement assertions. The process includes—

- Selecting items for which confirmations are to be requested.
- Designing the confirmation request.
- Communicating the confirmation request to the appropriate third party.
- Obtaining the response from the third party.
- Evaluating the information, or lack thereof, provided by the third party about the audit objectives, including the reliability of that information.

## Relationship of Confirmation Procedures to the Auditor's Assessment of Audit Risk

**.05** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Auditing Standard No. 8, *Audit Risk*, discusses the audit risk model. It describes the concept of assessing inherent and control risks, determining the acceptable level of detection risk, and designing an audit program to achieve an appropriately low level of audit risk. The auditor uses the audit risk assessment in determining the audit procedures to be applied, including whether they should include confirmation.

**.06** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Confirmation is undertaken to obtain evidence from third parties about financial statement assertions made by management. See paragraph 8 of Auditing Standard No. 15, *Audit Evidence*, which discusses the reliability of audit evidence.

**.07** The greater the combined assessed level of inherent and control risk, the greater the assurance that the auditor needs from substantive tests related to a financial statement assertion. Consequently, as the combined assessed level of inherent and control risk increases, the auditor designs substantive tests to obtain more or different evidence about a financial statement assertion. In these situations, the auditor might use confirmation procedures rather than or in conjunction with tests directed toward documents or parties within the entity.

**.08** Unusual or complex transactions may be associated with high levels of inherent risk and control risk. If the entity has entered into an unusual or complex transaction and the combined assessed level of inherent and control risk is high, the auditor should consider confirming the terms of the transaction with the other parties in addition to examining documentation held by the entity. For example, if the combined assessed level of inherent and control risk over the occurrence of revenue related to an unusual, year-end sale is high, the auditor should consider confirming the terms of that sale.

**.09** The auditor should assess whether the evidence provided by confirmations reduces audit risk for the related assertions to an acceptably low level. In making that assessment, the auditor should consider the materiality of the account balance and his or her inherent and control risk assessments. When the auditor concludes that evidence provided by confirmations alone is not sufficient, additional procedures should be performed. For example, to achieve an appropriately low level of audit risk related to the completeness and existence assertions for accounts receivable, an auditor may perform sales cutoff tests in addition to confirming accounts receivable.

**.10** The lower the combined assessed level of inherent and control risk, the less assurance the auditor needs from substantive tests to form a conclusion about a financial statement assertion. Consequently, as the combined assessed level of inherent and control risk decreases for a particular assertion, the auditor may modify substantive tests by changing their nature from more effective (but costly) tests to less effective (and less costly) tests. For example, if the combined assessed level of inherent and control risk over the existence of cash is low, the auditor might limit substantive procedures to inspecting client-provided bank statements rather than confirming cash balances.

## Assertions Addressed by Confirmations

**.11** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

For the evidence obtained to be appropriate, it must be reliable and relevant. Factors affecting the reliability of confirmations are discussed in paragraphs .16 through .27. The relevance of evidence depends on its relationship to the financial statement assertion being addressed. Auditing Standard No. 15, *Audit Evidence*, classifies financial statement assertions into five categories:

- a. Existence or occurrence
- b. Completeness
- c. Rights and obligations
- d. Valuation or allocation
- e. Presentation and disclosure

**.12** Confirmation requests, if properly designed by the auditor, may address any one or more of those assertions. However, confirmations do not address all assertions equally well. Confirmation of goods held on consignment with the consignee would likely be more effective for the existence and the rights-and-obligations assertions than for the valuation assertion. Accounts receivable confirmations are likely to be more effective for the existence assertion than for the completeness and valuation assertions. Thus, when obtaining evidence for assertions not adequately addressed by confirmations, auditors should consider other audit procedures to complement confirmation procedures or to be used instead of confirmation procedures.

**.13** Confirmation requests can be designed to elicit evidence that addresses the completeness assertion: that is, if properly designed, confirmations may provide evidence to aid in assessing whether all transactions and accounts that should be included in the financial statements are included. Their effectiveness in addressing the completeness assertion depends, in part, on whether the auditor selects from an appropriate population for testing. For example, when using confirmations to provide evidence about the completeness assertion for accounts payable, the appropriate population might be a list of vendors rather than the amounts recorded in the accounts payable subsidiary ledger.

**.14** Some confirmation requests are not designed to elicit evidence regarding the completeness assertion. For example, the AICPA Standard Form to Confirm Account Balance Information With Financial Institutions is designed to substantiate information that is stated on the confirmation request; the form is not designed to provide assurance that information about accounts not listed on the form will be reported.

## The Confirmation Process

.15 The auditor should exercise an appropriate level of professional skepticism throughout the confirmation process (see section 230, *Due Professional Care in the Performance of Work*). Professional skepticism is important in designing the confirmation request, performing the confirmation procedures, and evaluating the results of the confirmation procedures.

### Designing the Confirmation Request

.16 Confirmation requests should be tailored to the specific audit objectives. Thus, when designing the confirmation requests, the auditor should consider the assertion(s) being addressed and the factors that are likely to affect the reliability of the confirmations. Factors such as the form of the confirmation request, prior experience on the audit or similar engagements, the nature of the information being confirmed, and the intended respondent should affect the design of the requests because these factors have a direct effect on the reliability of the evidence obtained through confirmation procedures.

#### Form of Confirmation Request

.17 There are two types of confirmation requests: the positive form and the negative form. Some positive forms request the respondent to indicate whether he or she agrees with the information stated on the request. Other positive forms, referred to as blank forms, do not state the amount (or other information) on the confirmation request, but request the recipient to fill in the balance or furnish other information.

.18 Positive forms provide audit evidence only when responses are received from the recipients; nonresponses do not provide audit evidence about the financial statement assertions being addressed.

.19 Since there is a risk that recipients of a positive form of confirmation request with the information to be confirmed contained on it may sign and return the confirmation without verifying that the information is correct, blank forms may be used as one way to mitigate this risk. Thus, the use of blank confirmation requests may provide a greater degree of assurance about the information confirmed. However, blank forms might result in lower response rates because additional effort may be required of the recipients; consequently, the auditor may have to perform more alternative procedures.

.20 The negative form requests the recipient to respond only if he or she disagrees with the information stated on the request. Negative confirmation requests may be used to reduce audit risk to an acceptable level when (a) the combined assessed level of inherent and control risk is low, (b) a large number of small balances is involved, and (c) the auditor has no reason to believe that the recipients of the requests are unlikely to give them consideration. For example, in the examination of demand deposit accounts in a financial institution, it may be appropriate for an auditor to include negative confirmation requests with the customers' regular statements when the combined assessed level of inherent and control risk is low and the auditor has no reason to believe that the recipients will not consider the requests. The auditor should consider performing other substantive procedures to supplement the use of negative confirmations.

.21 Negative confirmation requests may generate responses indicating misstatements, and are more likely to do so if the auditor sends a large number of negative confirmation requests and such misstatements are widespread. The auditor should investigate relevant information provided on negative

confirmations that have been returned to the auditor to determine the effect such information may have on the audit. If the auditor's investigation of responses to negative confirmation requests indicates a pattern of misstatements, the auditor should reconsider his or her combined assessed level of inherent and control risk and consider the effect on planned audit procedures.

**.22** Although returned negative confirmations may provide evidence about the financial statement assertions, unreturned negative confirmation requests rarely provide significant evidence concerning financial statement assertions other than certain aspects of the existence assertion. For example, negative confirmations may provide some evidence of the existence of third parties if they are not returned with an indication that the addressees are unknown. However, unreturned negative confirmations do not provide explicit evidence that the intended third parties received the confirmation requests and verified that the information contained on them is correct.

### **Prior Experience**

**.23** In determining the effectiveness and efficiency of employing confirmation procedures, the auditor may consider information from prior years' audits or audits of similar entities. This information includes response rates, knowledge of misstatements identified during prior years' audits, and any knowledge of inaccurate information on returned confirmations. For example, if the auditor has experienced poor response rates to properly designed confirmation requests in prior audits, the auditor may instead consider obtaining audit evidence from other sources.

### **Nature of Information Being Confirmed**

**.24** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

When designing confirmation requests, the auditor should consider the types of information respondents will be readily able to confirm, since the nature of the information being confirmed may directly affect the appropriateness of the evidence obtained as well as the response rate. For example, certain respondents' accounting systems may facilitate the confirmation of single transactions rather than of entire account balances. In addition, respondents may not be able to confirm the balances of their installment loans, but they may be able to confirm whether their payments are up-to-date, the amount of the payment, and the key terms of their loans.

**.25** The auditor's understanding of the client's arrangements and transactions with third parties is key to determining the information to be confirmed. The auditor should obtain an understanding of the substance of such arrangements and transactions to determine the appropriate information to include on the confirmation request. The auditor should consider requesting confirmation of the terms of unusual agreements or transactions, such as bill and hold sales,<sup>1</sup> in addition to the amounts. The auditor also should consider whether there may be oral modifications to agreements, such as unusual payment terms or liberal rights of return. When the auditor believes there is a moderate or high degree of risk that there may be significant oral modifications, he or she should inquire about the existence and details of any such modifications to written agreements. One method of doing so is to confirm both the terms of the agreements and whether any oral modifications exist.

---

<sup>1</sup> Bill and hold sales are sales of merchandise that are billed to customers before delivery and are held by the entity for the customers.

### Respondent

**.26** The auditor should direct the confirmation request to a third party who the auditor believes is knowledgeable about the information to be confirmed. For example, to confirm a client's oral and written guarantees with a financial institution, the auditor should direct the request to a financial institution official who is responsible for the financial institution's relationship with the client or is knowledgeable about the transactions or arrangements.

**.27** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If information about the respondent's competence, knowledge, motivation, ability, or willingness to respond, or about the respondent's objectivity and freedom from bias with respect to the audited entity<sup>2</sup> comes to the auditor's attention, the auditor should consider the effects of such information on designing the confirmation request and evaluating the results, including determining whether other procedures are necessary. In addition, there may be circumstances (such as for significant, unusual year-end transactions that have a material effect on the financial statements or where the respondent is the custodian of a material amount of the audited entity's assets) in which the auditor should exercise a heightened degree of professional skepticism relative to these factors about the respondent. In these circumstances, the auditor should consider whether there is sufficient basis for concluding that the confirmation request is being sent to a respondent from whom the auditor can expect the response will provide meaningful and appropriate evidence.

### Performing Confirmation Procedures

**.28** During the performance of confirmation procedures, the auditor should maintain control over the confirmation requests and responses. Maintaining control<sup>3</sup> means establishing direct communication between the intended recipient and the auditor to minimize the possibility that the results will be biased because of interception and alteration of the confirmation requests or responses.

**.29** There may be situations in which the respondent, because of timeliness or other considerations, responds to a confirmation request other than in a written communication mailed to the auditor. When such responses are received, additional evidence may be required to support their validity. For example, facsimile responses involve risks because of the difficulty of ascertaining the sources of the responses. To restrict the risks associated with facsimile responses and treat the confirmations as valid audit evidence, the auditor should consider taking certain precautions, such as verifying the source and contents of a facsimile response in a telephone call to the purported sender. In addition, the auditor should consider requesting the purported sender to mail the *original* confirmation directly to the auditor. Oral confirmations should be documented in the workpapers. If the information in the oral confirmations is significant, the auditor should request the parties involved to submit written confirmation of the specific information directly to the auditor.

---

<sup>2</sup> Section 334, *Related Parties*, paragraphs .09 and .10, provide guidance on examining related-party transactions that have been identified by the auditor.

<sup>3</sup> The need to maintain control does not preclude the use of internal auditors in the confirmation process. Section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, provides guidance on considering the work of internal auditors and on using internal auditors to provide direct assistance to the auditor.

.30 When using confirmation requests other than the negative form, the auditor should generally follow up with a second and sometimes a third request to those parties from whom replies have not been received.

## Alternative Procedures

.31 When the auditor has not received replies to positive confirmation requests, he or she should apply alternative procedures to the nonresponses to obtain the evidence necessary to reduce audit risk to an acceptably low level. However, the omission of alternative procedures may be acceptable (a) when the auditor has not identified unusual qualitative factors or systematic characteristics related to the nonresponses, such as that all nonresponses pertain to year-end transactions, and (b) when testing for overstatement of amounts, the nonresponses in the aggregate, when projected as 100 percent misstatements to the population and added to the sum of all other unadjusted differences, would not affect the auditor's decision about whether the financial statements are materially misstated.

.32 The nature of alternative procedures varies according to the account and assertion in question. In the examination of accounts receivable, for example, alternative procedures may include examination of subsequent cash receipts (including matching such receipts with the actual items being paid), shipping documents, or other client documentation to provide evidence for the existence assertion. In the examination of accounts payable, for example, alternative procedures may include examination of subsequent cash disbursements, correspondence from third parties, or other records to provide evidence for the completeness assertion.

## Evaluating the Results of Confirmation Procedures

.33 After performing any alternative procedures, the auditor should evaluate the combined evidence provided by the confirmations and the alternative procedures to determine whether sufficient evidence has been obtained about all the applicable financial statement assertions. In performing that evaluation, the auditor should consider (a) the reliability of the confirmations and alternative procedures; (b) the nature of any exceptions, including the implications, both quantitative and qualitative, of those exceptions; (c) the evidence provided by other procedures; and (d) whether additional evidence is needed. If the combined evidence provided by the confirmations, alternative procedures, and other procedures is not sufficient, the auditor should request additional confirmations or extend other tests, such as tests of details or analytical procedures.

## Confirmation of Accounts Receivable

.34 For the purpose of this section, *accounts receivable* means—

- a. The entity's claims against customers that have arisen from the sale of goods or services in the normal course of business, and
- b. A financial institution's loans.

Confirmation of accounts receivable is a generally accepted auditing procedure. As discussed in paragraph .06, it is generally presumed that evidence obtained from third parties will provide the auditor with higher-quality audit evidence than is typically available from within the entity. Thus, there is a presumption

that the auditor will request the confirmation of accounts receivable during an audit unless one of the following is true:

- Accounts receivable are immaterial to the financial statements.
- The use of confirmations would be ineffective.<sup>4</sup>
- The auditor's combined assessed level of inherent and control risk is low, and the assessed level, in conjunction with the evidence expected to be provided by analytical procedures or other substantive tests of details, is sufficient to reduce audit risk to an acceptably low level for the applicable financial statement assertions. In many situations, both confirmation of accounts receivable and other substantive tests of details are necessary to reduce audit risk to an acceptably low level for the applicable financial statement assertions.

**.35** An auditor who has not requested confirmations in the examination of accounts receivable should document how he or she overcame this presumption.

## Effective Date

**.36** This section is effective for audits of fiscal periods ending after June 15, 1992. Early application of this section is permissible.

---

<sup>4</sup> For example, if, based on prior years' audit experience or on experience with similar engagements, the auditor concludes that response rates to properly designed confirmation requests will be inadequate, or if responses are known or expected to be unreliable, the auditor may determine that the use of confirmations would be ineffective.

## AU Section 331

### *Inventories*<sup>\*</sup>

**Source:** SAS No. 1, section 331; SAS No. 43; SAS No. 67.

**Issue date, unless otherwise indicated:** November, 1972.

**.01** Observation of inventories is a generally accepted auditing procedure. The independent auditor who issues an opinion when he has not employed them must bear in mind that he has the burden of justifying the opinion expressed. [As amended, effective for fiscal periods ending after June 15, 1992, by Statement on Auditing Standards No. 67.]

**.02** The purpose of this section is to provide guidelines for the independent auditor in observing inventories. This section relates only to observation of inventories and does not deal with other important auditing procedures which generally are required for the independent auditor to satisfy himself as to these assets. [Revised, December 1991, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 67.]

### Receivables

[.03-.08] [Superseded November 1991 by Statement on Auditing Standards No. 67.]<sup>[1-2]</sup>

### Inventories

**.09** When inventory quantities are determined solely by means of a physical count, and all counts are made as of the balance-sheet date or as of a single date within a reasonable time before or after the balance-sheet date, it is ordinarily necessary for the independent auditor to be present at the time of count and, by suitable observation, tests, and inquiries, satisfy himself respecting the effectiveness of the methods of inventory-taking and the measure of reliance which may be placed upon the client's representations about the quantities and physical condition of the inventories.

**.10** When the well-kept perpetual inventory records are checked by the client periodically by comparisons with physical counts, the auditor's observation procedures usually can be performed either during or after the end of the period under audit.

**.11** In recent years, some companies have developed inventory controls or methods of determining inventories, including statistical sampling, which are highly effective in determining inventory quantities and which are sufficiently reliable to make unnecessary an annual physical count of each item of inventory. In such circumstances, the independent auditor must satisfy himself that the client's procedures or methods are sufficiently reliable to produce results

---

\* Title amended, effective for audits of fiscal periods ending after June 15, 1992, by Statement on Auditing Standards No. 67.

<sup>[1-2]</sup> [Superseded November 1991, by Statement on Auditing Standards No. 67.]

substantially the same as those which would be obtained by a count of all items each year. The auditor must be present to observe such counts as he deems necessary and must satisfy himself as to the effectiveness of the counting procedures used. If statistical sampling methods are used by the client in the taking of the physical inventory, the auditor must be satisfied that the sampling plan is reasonable and statistically valid, that it has been properly applied, and that the results are reasonable in the circumstances. [Revised, June 1981, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 39.]

**.12** When the independent auditor has not satisfied himself as to inventories in the possession of the client through the procedures described in paragraphs .09 through .11, tests of the accounting records alone will not be sufficient for him to become satisfied as to quantities; it will always be necessary for the auditor to make, or observe, some physical counts of the inventory and apply appropriate tests of intervening transactions. This should be coupled with inspection of the records of any client's counts and procedures relating to the physical inventory on which the balance-sheet inventory is based.

**.13** The independent auditor may be asked to audit financial statements covering the current period and one or more periods for which he had not observed or made some physical counts of prior inventories. He may, nevertheless, be able to become satisfied as to such prior inventories through appropriate procedures, such as tests of prior transactions, reviews of the records of prior counts, and the application of gross profit tests, provided that he has been able to become satisfied as to the current inventory.

## Inventories Held in Public Warehouses<sup>3</sup>

**.14** If inventories are in the hands of public warehouses or other outside custodians, the auditor ordinarily would obtain direct confirmation in writing from the custodian. If such inventories represent a significant proportion of current or total assets, to obtain reasonable assurance with respect to their existence, the auditor should apply one or more of the following procedures as he considers necessary in the circumstances.

- a. Test the owner's procedures for investigating the warehouseman and evaluating the warehouseman's performance.
- b. Obtain an independent accountant's report on the warehouseman's control procedures relevant to custody of goods and, if applicable, pledging of receipts, or apply alternative procedures at the warehouse to gain reasonable assurance that information received from the warehouseman is reliable.
- c. Observe physical counts of the goods, if practicable and reasonable.
- d. If warehouse receipts have been pledged as collateral, confirm with lenders pertinent details of the pledged receipts (on a test basis, if appropriate).

[As amended, effective after August 31, 1982, by Statement on Auditing Standards No. 43.]

---

<sup>3</sup> See section 901 for Special Report of Committee on Auditing Procedure.

## Effect on the Auditor's Report

**.15** For a discussion of the circumstances relating to receivables and inventories affecting the independent auditor's report, see sections 508.24 and 508.67. [As amended, effective for periods ending on or after December 31, 1974, by Statement on Auditing Standards No. 2. Paragraph renumbered by the issuance of Statement on Auditing Standards No. 43, effective after August 1982.]

---

## AU Section 332

# Auditing Derivative Instruments, Hedging Activities, and Investments in Securities<sup>1</sup>

(Supersedes SAS No. 81)

**Source:** SAS No. 92; Auditing Standard No. 5; Auditing Standard Nos. 8–15.

**Effective for audits of financial statements for fiscal years ending on or after June 30, 2001. Early application is permitted.**

## Applicability

**.01** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

This section provides guidance to auditors in planning and performing auditing procedures for assertions about derivative instruments, hedging activities, and investments in securities<sup>2</sup> that are made in an entity's financial statements.<sup>3</sup> Those assertions<sup>4</sup> are classified according to five broad categories that are discussed in paragraphs 11 and 12 of Auditing Standard No. 15, *Audit Evidence*, and address the following:

- a. Existence or occurrence
- b. Completeness
- c. Rights and obligations
- d. Valuation or allocation
- e. Presentation and disclosure

## Derivative Instruments and Hedging Activities Included in the Scope of this Section

**.02** The guidance in this section applies to derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives), of all entities. This section uses the definition of derivative that is in Financial Accounting Standards Board (FASB) Statement

---

<sup>1</sup> The AICPA will issue an Audit Guide section entitled *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (the Guide). The Guide provides practical guidance for implementing this section.

<sup>2</sup> Throughout the remainder of this section, the word *security* or *securities* refers to an entity's investment in a security or securities.

<sup>3</sup> The guidance provided in this section applies to audits of financial statements prepared in accordance with generally accepted accounting principles or a comprehensive basis of accounting other than generally accepted accounting principles. Such other bases of accounting are described in section 623, *Special Reports*, paragraph .04. References in this section to generally accepted accounting principles are intended to also refer to other comprehensive bases of accounting when the reference is relevant to the basis of accounting used.

<sup>4</sup> Throughout the remainder of this section, the word *assertion* refers to an assertion made in an entity's financial statements.

of Financial Accounting Standards (Statement) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended [AC section D50] (hereinafter referred to as FASB Statement No. 133). FASB Statement No. 133 addresses the accounting for derivatives that are either freestanding or embedded in contracts or agreements. For purposes of applying the guidance in this section, a derivative is a financial instrument or other contract with all three of the characteristics listed in FASB Statement No. 133, which are the following.

- a. It has (1) one or more underlyings and (2) one or more notional amounts or payment provisions or both. Those terms determine the amount of the settlement or settlements, and, in some cases, whether or not settlement is required.
- b. It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- c. Its terms require or permit net settlement, it can readily be settled net by a means outside the contract, or it provides for delivery of an asset that puts the recipient in a position not substantially different from net settlement.

.03 An entity may enter into a derivative<sup>5</sup> for investment purposes or to designate it as a hedge of exposure to changes in fair value (referred to as a *fair value hedge*), exposure to variability in cash flows (referred to as a *cash flow hedge*), or foreign currency exposure. The guidance in this section applies to hedging activities in which the entity designates a derivative or a nonderivative financial instrument as a hedge of exposure for which FASB Statement No. 133 permits hedge accounting.

## Securities Included in the Scope of this Section

.04 The guidance in this section applies to all securities. There are two types of securities—debt securities and equity securities. This section uses the definitions of debt security and equity security that are in FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities* [AC section I80]. This section applies to debt and equity securities without regard to whether they are subject to the accounting requirements of FASB Statement No. 115. For example, it applies to assertions about securities accounted for under the equity method following the requirements of Accounting Principles Board Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock* [AC section I82].

## The Need for Special Skill or Knowledge to Plan and Perform Auditing Procedures

.05 The auditor may need special skill or knowledge to plan and perform auditing procedures for certain assertions about derivatives and securities. Examples of such auditing procedures and the special skill or knowledge required include—

- Obtaining an understanding of an entity's information system for derivatives and securities, including services provided by a service

---

<sup>5</sup> To simplify the use of terminology, the remainder of this section often uses the term *derivative* to refer to both the derivative and the purpose for which the entity uses it.

organization, which may require that the auditor have special skill or knowledge with respect to computer applications when significant information about derivatives and securities is transmitted, processed, maintained, or accessed electronically.

- Identifying controls placed in operation by a service organization that provides services to an entity that are part of the entity's information system for derivatives and securities, which may require that the auditor have an understanding of the operating characteristics of entities in a certain industry.
- Understanding the application of generally accepted accounting principles for assertions about derivatives, which might require that the auditor have special knowledge because of the complexity of those principles. In addition, a derivative may have complex features that require the auditor to have special knowledge to evaluate the measurement and disclosure of the derivative in conformity with generally accepted accounting principles. For example, features embedded in contracts or agreements may require separate accounting as a derivative, and complex pricing structures may increase the complexity of the assumptions used in estimating the fair value of a derivative.
- Understanding the determination of the fair values of derivatives and securities, including the appropriateness of various types of valuation models and the reasonableness of key factors and assumptions, which may require knowledge of valuation concepts.
- Assessing inherent risk and control risk for assertions about derivatives used in hedging activities, which may require an understanding of general risk management concepts and typical asset/liability management strategies.

**.06** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

Auditing Standard No. 9, *Audit Planning*, discusses the auditor's responsibilities for consideration of the use of persons with specialized skill or knowledge. Auditing Standard No. 10, *Supervision of the Audit Engagement*, discusses the auditor's responsibilities for supervision of specialists who are employed by the auditor. AU sec. 336, *Using the Work of a Specialist*, discusses the auditor's responsibilities for using the work of a specialist engaged by the auditor.

## Audit Risk and Materiality

**.07** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor should design and perform audit procedures regarding relevant assertions of derivatives and investments in securities that are based on and that address the risks of material misstatement in those assertions. The auditor may also consider the work performed by the entity's internal auditors in designing procedures. Guidance on considering the work performed by internal auditors is found in section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

## Inherent Risk Assessment

.08 The inherent risk for an assertion about a derivative or security is its susceptibility to a material misstatement, assuming there are no related controls. Examples of considerations that might affect the auditor's assessment of inherent risk for assertions about a derivative or security include the following.

- *Management's objectives.* Accounting requirements based on management's objectives may increase the inherent risk for certain assertions. For example, in response to management's objective of minimizing the risk of loss from changes in market conditions, the entity may enter into derivatives as hedges. The use of hedges is subject to the risk that market conditions will change in a manner other than expected when the hedge was implemented so that the hedge is no longer effective. That increases the inherent risk for certain assertions about the derivatives because in such circumstances continued application of hedge accounting would not be in conformity with generally accepted accounting principles.
- *The complexity of the features of the derivative or security.* The complexity of the features of the derivative or security may increase the complexity of measurement and disclosure considerations required by generally accepted accounting principles. For example, interest payments on a structured note may be based on two or more factors, such as one or more interest rates and the market price of certain equity securities. A formula may dictate the interaction of the factors, such as a prescribed interest rate less a multiple of another rate. The number and interaction of the factors may increase the inherent risk for assertions about the fair value of the note.
- *Whether the transaction that gave rise to the derivative or security involved the exchange of cash.* Derivatives that do not involve an initial exchange of cash are subject to an increased risk that they will not be identified for valuation and disclosure considerations. For example, a foreign exchange forward contract that is not recorded at its inception because the entity does not pay cash to enter into the contract is subject to an increased risk that it will not be identified for subsequent adjustment to fair value. Similarly, a stock warrant for a traded security that is donated to an entity is subject to an increased risk that it will not be identified for initial or continuing measurement at fair value.
- *The entity's experience with the derivative or security.* An entity's inexperience with a derivative or security increases the inherent risk for assertions about it. For example, under a new arrangement, an entity may pay a small deposit to enter into a futures contract for foreign currency to pay for purchases from an overseas supplier. The entity's inexperience with such derivatives may lead it to incorrectly account for the deposit, such as treating it as inventory cost, thereby increasing the risk that the contract will not be identified for subsequent adjustment to fair value.
- *Whether a derivative is freestanding or an embedded feature of an agreement.* Embedded derivatives are less likely to be identified by management, which increases the inherent risk for certain assertions. For example, an option to convert the principal outstanding under a loan agreement into equity securities is less likely to

be identified for valuation and disclosure considerations if it is a clause in a loan agreement than if it is a freestanding agreement. Similarly, a structured note may include a provision for payments related to changes in a stock index or commodities prices that requires separate accounting.

- *Whether external factors affect the assertion.* Assertions about derivatives and securities may be affected by a variety of risks related to external factors, such as—

- *Credit risk*, which exposes the entity to the risk of loss as a result of the issuer of a debt security or the counterparty to a derivative failing to meet its obligation.
- *Market risk*, which exposes the entity to the risk of loss from adverse changes in market factors that affect the fair value of a derivative or security, such as interest rates, foreign exchange rates, and market indexes for equity securities.
- *Basis risk*, which exposes the entity to the risk of loss from ineffective hedging activities. Basis risk is the difference between the fair value (or cash flows) of the hedged item and the fair value (or cash flows) of the hedging derivative. The entity is subject to the risk that fair values (or cash flows) will change so that the hedge will no longer be effective.
- *Legal risk*, which exposes the entity to the risk of loss from a legal or regulatory action that invalidates or otherwise precludes performance by one or both parties to the derivative or security.

Following are examples of how changes in external factors can affect assertions about derivatives and securities.

- The increase in credit risk associated with amounts due under debt securities issued by entities that operate in declining industries increases the inherent risk for valuation assertions about those securities.
  - Significant changes in and the volatility of general interest rates increase the inherent risk for the valuation of derivatives whose value is significantly affected by interest rates.
  - Significant changes in default rates and prepayments increase the inherent risk for the valuation of retained interests in a securitization.
  - The fair value of a foreign currency forward contract will be affected by changes in the exchange rate, and the fair value of a put option for an available-for-sale security will be affected by changes in the fair value of the underlying security.
- *The evolving nature of derivatives and the applicable generally accepted accounting principles.* As new forms of derivatives are developed, interpretive accounting guidance for them may not be issued until after the derivatives are broadly used in the marketplace. In addition, generally accepted accounting principles for derivatives may be subject to frequent interpretation by various standard-setting bodies. Evolving interpretive guidance and its

applicability increase the inherent risk for valuation and other assertions about existing forms of derivatives.

- *Significant reliance on outside parties.* An entity that relies on external expertise may be unable to appropriately challenge the specialist's methodology or assumptions. This may occur, for example, when a valuation specialist values a derivative.
- *Generally accepted accounting principles may require developing assumptions about future conditions.* As the number and subjectivity of those assumptions increase, the inherent risk of material misstatement increases for certain assertions. For example, the inherent risk for valuation assertions based on assumptions about debt securities whose value fluctuates with changes in prepayments (for example, interest-only strips) increases as the expected holding period lengthens. Similarly, the inherent risk for assertions about cash flow hedges fluctuates with the subjectivity of the assumptions about probability, timing, and amounts of future cash flows.

## Control Risk Assessment

### *Obtaining an Understanding of Internal Control to Plan the Audit*

**.09** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, requires the auditor to obtain an understanding of internal control that will enable the auditor to—

- a. Identify the types of potential misstatement of the assertions.
- b. Consider factors that affect the risk that the misstatements would be material to the financial statements.
- c. Design tests of controls, when applicable.
- d. Design substantive tests.

[Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

**.10** Controls should be related to management's objectives for financial reporting, operations, and compliance.<sup>6</sup> For example, to achieve its objectives, management of an entity with extensive derivatives transactions may implement controls that call for—

- a. Monitoring by a control staff that is fully independent of derivatives activities.
- b. Derivatives personnel to obtain, prior to exceeding limits, at least oral approval from members of senior management who are independent of derivatives activities.

---

<sup>6</sup> The AICPA issued an Audit Guide concurrent with this section entitled *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities* (the Guide). Chapter 5 of the Guide, "Control Risk Assessment," provides sample control objectives for derivatives, hedging activities, and securities which may be useful to auditors in assessing control risk for relevant assertions. Additionally, in 1996, The Committee of Sponsoring Organizations of the Treadway Commission (COSO) issued *Internal Control Issues in Derivatives Usage: An Information Tool for Considering the COSO Internal Control—Integrated Framework in Derivatives Applications*. Although the document precedes FASB Statement No. 133, its guidance may be useful to entities in developing controls over derivatives transactions and to auditors in assessing control risk for assertions about those transactions.

- c. Senior management to properly address limit excesses and divergences from approved derivatives strategies.
- d. The accurate transmittal of derivatives positions to the risk measurement systems.
- e. The performance of appropriate reconciliations to ensure data integrity across the full range of derivatives, including any new or existing derivatives that may be monitored apart from the main processing networks.
- f. Derivatives traders, risk managers, and senior management to define constraints on derivatives activities and justify identified excesses.
- g. Senior management, an independent group, or an individual that management designates to perform a regular review of the identified controls and financial results of the derivatives activities to determine whether controls are being effectively implemented and the entity's business objectives and strategies are being achieved.
- h. A review of limits in the context of changes in strategy, risk tolerance of the entity, and market conditions.

**.11** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The extent of the understanding of internal control over derivatives and securities obtained by the auditor depends on how much information the auditor needs to identify the types of potential misstatements, consider factors that affect the risk of material misstatement, design tests of controls when applicable, and design substantive tests. The understanding obtained may include controls over derivatives and securities transactions from their initiation to their inclusion in the financial statements. It may encompass controls placed in operation by the entity and by service organizations whose services are part of the entity's information system. Paragraphs 28 through 32 and B1 through B6 of Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*, discuss the information system, including related business processes, relevant to financial reporting. Following the guidance in section 324, *Service Organizations*, a service organization's services are part of an entity's information system for derivatives and securities if they affect any of the following:

- a. How the entity's derivatives and securities transactions are initiated.
- b. The accounting records, supporting information, and specific accounts in the financial statements involved in the processing and reporting of the entity's derivatives and securities transactions
- c. The accounting processing involved from the initiation of those transactions to their inclusion in the financial statements, including electronic means (such as computers and electronic data interchange) used to transmit, process, maintain, and access information
- d. The process the entity uses to report information about derivatives and securities transactions in its financial statements, including significant accounting estimates and disclosures

[Revised, May 2001, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 94.]

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: When performing an integrated audit of financial statements and internal control over financial reporting, paragraph 39 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states "[t]he auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion." Therefore, in an integrated audit of financial statements and internal control over financial reporting, if there are relevant assertions related to the company's investment in derivatives and securities, the auditor's understanding of controls should include controls over derivatives and securities transactions from their initiation to their inclusion in the financial statements and should encompass controls placed in operation by the entity and service organizations whose services are part of the entity's information system.

**.12** Examples of a service organization's services that would be part of an entity's information system include—

- The initiation of the purchase or sale of equity securities by a service organization acting as investment adviser or manager.
- Services that are ancillary to holding<sup>7</sup> an entity's securities such as—
  - Collecting dividend and interest income and distributing that income to the entity.
  - Receiving notification of corporate actions.
  - Receiving notification of security purchase and sale transactions.
  - Receiving payments from purchasers and disbursing proceeds to sellers for security purchase and sale transactions.
  - Maintaining records of securities transactions for the entity.
- A pricing service providing fair values of derivatives and securities through paper documents or electronic downloads that the entity uses to value its derivatives and securities for financial statement reporting.

**.13** Examples of a service organization's services that would not be part of an entity's information system are the following:

- The execution by a securities broker of trades that are initiated by either the entity or its investment adviser
- The holding of an entity's securities

**.14** An auditor who needs information about the nature of a service organization's services that are part of an entity's information system for derivatives and securities transactions, or its controls over those services, to plan the audit may be able to gather the information from a variety of sources, such as the following:

- User manuals
- System overviews
- Technical manuals

---

<sup>7</sup> In this section, maintaining custody of securities, either in physical or electronic form, is referred to as *holding* securities, and performing ancillary services is referred to as *servicing* securities.

- The contract between the entity and the service organization
- Reports by auditors,<sup>8</sup> internal auditors, or regulatory authorities on the information system and other controls placed in operation by a service organization
- Inquiry or observation of personnel at the entity or at the service organization

In addition, if the services and the service organization's controls over those services are highly standardized, information about the service organization's services, or its controls over those services, obtained through the auditor's prior experience with the service organization may be helpful in planning the audit.

## Assessing Control Risk

**.15** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

After obtaining the understanding of internal control over derivatives and securities transactions, the auditor should assess control risk for the related assertions. Guidance on that assessment is found in Auditing Standard No. 12, *Identifying and Assessing Risks of Material Misstatement*.

**.16** If the auditor plans to assess control risk below the maximum for one or more assertions about derivatives and securities, the auditor should identify specific controls relevant to the assertions that are likely to prevent or detect material misstatements and that have been placed in operation by either the entity or the service organization, and gather evidential matter about their operating effectiveness. Evidential matter about the operating effectiveness of a service organization's controls may be gathered through tests performed by the auditor or by an auditor engaged by either the auditor or the service organization—

- a. As part of an engagement in which a service auditor reports on the controls placed in operation by the service organization and the operating effectiveness of those controls, as described in section 324.
- b. An agreed-upon procedures engagement.<sup>9</sup>
- c. To work under the direction of the auditor of the entity's financial statements.

Confirmations of balances or transactions from a service organization do not provide evidential matter about its controls.

**.17** The auditor should consider the size of the entity, the entity's organizational structure, the nature of its operations, the types, frequency, and complexity of its derivatives and securities transactions, and its controls over those transactions in designing auditing procedures for assertions about derivatives and securities. For example, if the entity has a variety of derivatives and securities that are reported at fair value estimated using valuation models, the auditor may be able to reduce the substantive procedures for valuation assertions by gathering evidential matter about the controls over the design and

---

<sup>8</sup> Section 324 provides guidance on auditors' reports on controls placed in operation by a service organization and the operating effectiveness of those controls.

<sup>9</sup> AT section 201, *Agreed-Upon Procedures Engagements*, provides guidance on applying agreed-upon procedures to controls. [Footnote revised, January 2001, to reflect conforming changes necessary due to the issuance of Statement on Standards for Attestation Engagements No. 10.]

use of the models (including the significant assumptions) and evaluating their operating effectiveness.

**.18** In some circumstances, it may not be practicable or possible for the auditor to reduce audit risk to an acceptable level without identifying controls placed in operation by the entity or a service organization and gathering evidential matter about the operating effectiveness of those controls. For example, if the entity has a large number of derivatives or securities transactions, the auditor likely would be unable to reduce audit risk to an acceptable level for assertions about the occurrence of earnings on those securities, including gains and losses from sales, without identifying controls over the authorization, recording, custody, and segregation of duties for those transactions and gathering evidential matter about their operating effectiveness.<sup>10</sup>

## Designing Substantive Procedures Based on Risk Assessments

**.19** The auditor should use the assessed levels of inherent risk and control risk for assertions about derivatives and securities to determine the nature, timing, and extent of the substantive procedures to be performed to detect material misstatements of the financial statement assertions. Some substantive procedures address more than one assertion about a derivative or security. Whether one or a combination of substantive procedures should be used to address an assertion depends on the auditor's assessment of the inherent and control risk associated with it as well as the auditor's judgment about a procedure's effectiveness. Paragraphs .21 through .58 provide examples of substantive procedures that address assertions about derivatives and securities. In addition, the auditor should consider whether the results of other audit procedures conflict with management's assertions about derivatives and securities. The auditor should consider the impact of any such identified matters on management's assertions about derivatives and securities. Additionally, the auditor should consider the impact of such matters on the sufficiency of the evidential matter evaluated by the auditor in support of the assertions.

**.20** The provision by a service organization of services that are part of an entity's information system may affect the nature, timing, and extent of the auditor's substantive procedures for assertions about derivatives and securities in a variety of ways. Following are examples of such services and how they may affect the nature, timing, and extent of the auditor's substantive procedures.

- Supporting documentation, such as derivative contracts and securities purchases and sales advices, may be located at the service organization's facilities. As a result, either the auditor of the entity's financial statements, an auditor working under the direction of that auditor, or an auditor engaged by the service organization may need to visit the facilities to inspect the documentation.
- Data processors, investment advisers, holders of securities, record-keepers, and other service organizations may electronically transmit, process, maintain, or access significant information about an entity's securities. In such situations, it may not be practicable or possible for the auditor to reduce audit risk to an acceptable level without identifying controls placed in operation by the service organization or the entity and gathering evidential matter about the operating effectiveness of those controls.

---

<sup>10</sup> See footnote 6.

- Service organizations may initiate securities transactions for an entity and hold and service the securities. In determining the level of detection risk for substantive tests, the auditor should consider whether there is a segregation of duties and other controls for the services provided. Examples include—
  - When one service organization initiates transactions as an investment adviser and another service organization holds and services those securities, the auditor may corroborate the information provided by the two organizations. For example, the auditor may confirm holdings with the holder of the securities and apply other substantive tests to transactions reported by the entity based on information provided by the investment adviser. Depending on the facts and circumstances, the auditor also may confirm transactions or holdings with the investment adviser and review the reconciliation of differences. Paragraph .24 provides additional guidance on the auditor's considerations.
  - If one service organization initiates transactions as an investment adviser and also holds and services the securities, all of the information available to the auditor is based on the service organization's information. The auditor may be unable to sufficiently limit audit risk without obtaining evidential matter about the operating effectiveness of one or more of the service organization's controls. An example of such controls is establishing independent departments that provide the investment advisory services and the holding and servicing of securities, then reconciling the information about the securities that is provided by each department.

## Financial Statement Assertions

### *Existence or Occurrence*

.21 Existence assertions address whether the derivatives and securities reported in the financial statements through recognition or disclosure exist at the date of the statement of financial position. Occurrence assertions address whether derivatives and securities transactions reported in the financial statements, as a part of earnings, other comprehensive income, or cash flows or through disclosure, occurred. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for existence or occurrence assertions about derivatives and securities include—

- Confirmation with the issuer of the security.
- Confirmation with the holder of the security, including securities in electronic form, or with the counterparty to the derivative.<sup>11</sup>

---

<sup>11</sup> Section 330, provides guidance to auditors in using confirmations as substantive tests of financial statement assertions. Confirmations may be used as a substantive test of various financial statement assertions about derivatives and securities. For example, a confirmation may be designed to—

- Obtain information about valuation assertions or assumptions underlying valuations.
- Determine whether there are any side agreements that affect assertions about the entity's rights and obligations associated with a transaction, such as an agreement to repurchase securities sold or an agreement to pledge securities as collateral for a loan.
- Determine whether the holder of the entity's securities agrees to deliver the securities reported or their value when required by the entity.

- Confirmation of settled transactions with the broker-dealer or counterparty.
- Confirmation of unsettled transactions with the broker-dealer or counterparty.
- Physical inspection of the security or derivative contract.
- Reading executed partnership or similar agreements.
- Inspecting underlying agreements and other forms of supporting documentation, in paper or electronic form, for the following:
  - Amounts reported
  - Evidence that would preclude the sales treatment of a transfer
  - Unrecorded repurchase agreements
- Inspecting supporting documentation for subsequent realization or settlement after the end of the reporting period.
- Performing analytical procedures.<sup>12</sup> For example, the absence of a material difference from an expectation that interest income will be a fixed percentage of a debt security based on the effective interest rate determined when the entity purchased the security provides evidence about existence of the security.

### Completeness

.22 Completeness assertions address whether all of the entity's derivatives and securities are reported in the financial statements through recognition or disclosure. They also address whether all derivatives and securities transactions are reported in the financial statements as a part of earnings, other comprehensive income, or cash flows or through disclosure. The extent of substantive procedures for completeness may properly vary in relation to the assessed level of control risk. In addition, the auditor should consider that since derivatives may not involve an initial exchange of tangible consideration, it may be difficult to limit audit risk for assertions about the completeness of derivatives to an acceptable level with an assessed level of control risk at the maximum. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for completeness assertions about derivatives and securities are—

- Requesting the counterparty to a derivative or the holder of a security to provide information about it, such as whether there are any side agreements or agreements to repurchase securities sold.
- Requesting counterparties or holders who are frequently used, but with whom the accounting records indicate there are presently no derivatives or securities, to state whether they are counterparties to derivatives with the entity or holders of its securities.<sup>13</sup>
- Inspecting financial instruments and other agreements to identify embedded derivatives.

---

<sup>12</sup> Section 329, provides guidance to auditors in using analytical procedures as substantive tests.

<sup>13</sup> Section 330.17 discusses the blank form of positive confirmation in which the auditor does not state the amount or other information but instead asks the respondent to provide information.

- Inspecting documentation in paper or electronic form for activity subsequent to the end of the reporting period.
- Performing analytical procedures. For example, a difference from an expectation that interest expense is a fixed percentage of a note based on the interest provisions of the underlying agreement may indicate the existence of an interest rate swap agreement.
- Comparing previous and current account detail to identify assets that have been removed from the accounts and testing those items further to determine that the criteria for sales treatment have been met.
- Reading other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees.

**.23** One of the characteristics of derivatives is that they may involve only a commitment to perform under a contract and not an initial exchange of tangible consideration. Therefore, auditors designing tests related to the completeness assertion should not focus exclusively on evidence relating to cash receipts and disbursements. When testing for completeness, auditors should consider making inquiries, inspecting agreements, and reading other information, such as minutes of meetings of the board of directors or finance, asset/liability, investment, or other committees. Auditors should also consider making inquiries about aspects of operating activities that might present risks hedged using derivatives. For example, if the entity conducts business with foreign entities, the auditor should inquire about any arrangements the entity has made for purchasing foreign currency. Similarly, if an entity is in an industry in which commodity contracts are common, the auditor should inquire about any commodity contracts with fixed prices that run for unusual durations or involve unusually large quantities. The auditor also should consider inquiring as to whether the entity has converted interest-bearing debt from fixed to variable, or vice versa, using derivatives.

**.24** Derivatives may not involve an initial exchange of tangible consideration, as discussed in paragraphs .22 and .23. If one or more service organizations provide services that are part of the entity's information system for derivatives, the auditor may be unable to sufficiently limit audit risk for assertions about the completeness of derivatives without obtaining evidential matter about the operating effectiveness of controls at one or more of the service organizations. Since the auditor's concern is that derivatives that do not require an initial exchange of tangible consideration may not have been recorded, testing reconciliations of information provided by two or more of the service organizations as discussed in paragraph .20 of this section may not sufficiently limit audit risk for assertions about the completeness of derivatives.

### ***Rights and Obligations***

**.25** Assertions about rights and obligations address whether the entity has the rights and obligations associated with derivatives and securities, including pledging arrangements, reported in the financial statements. Paragraph .19 provides guidance on the auditor's determination of the nature, timing, and extent of substantive procedures to be performed. Examples of substantive procedures for assertions about rights and obligations associated with derivatives and securities are—

- Confirming significant terms with the counterparty to a derivative or the holder of a security, including the absence of any side agreements.

- Inspecting underlying agreements and other forms of supporting documentation, in paper or electronic form.
- Considering whether the findings of other auditing procedures, such as reviewing minutes of meetings of the board of directors and reading contracts and other agreements, provide evidence about rights and obligations, such as pledging of securities as collateral or selling securities with a commitment to repurchase them.

### Valuation

**.26** Assertions about the valuation of derivatives and securities address whether the amounts reported in the financial statements through measurement or disclosure were determined in conformity with generally accepted accounting principles. Tests of valuation assertions should be designed according to the valuation method used for the measurement or disclosure. Generally accepted accounting principles may require that a derivative or security be valued based on cost, the investee's financial results, or fair value. They also may require disclosures about the value of a derivative or security and specify that impairment losses should be recognized in earnings prior to their realization. Also, generally accepted accounting principles for securities may vary depending on the type of security, the nature of the transaction, management's objectives related to the security, and the type of entity. Procedures for evaluating management's consideration of the need to recognize impairment losses are discussed in paragraphs .47 and .48 of this section.

**.27** *Valuation Based on Cost.* Procedures to obtain evidence about the cost of securities may include inspection of documentation of the purchase price, confirmation with the issuer or holder, and testing discount or premium amortization, either by recomputation or analytical procedures. The auditor should evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its cost that is other than temporary.

**.28** *Valuation Based on an Investee's Financial Results.* For valuations based on an investee's financial results, including but not limited to the equity method of accounting, the auditor should obtain sufficient evidence in support of the investee's financial results. The auditor should read available financial statements of the investee and the accompanying audit report, if any. Financial statements of the investee that have been audited by an auditor whose report is satisfactory, for this purpose,<sup>14</sup> to the investor's auditor may constitute sufficient evidential matter.

**.29** If in the auditor's judgment additional evidential matter is needed, the auditor should perform procedures to gather such evidence. For example, the auditor may conclude that additional evidential matter is needed because of significant differences in fiscal year-ends, significant differences in accounting principles, changes in ownership, changes in conditions affecting the use of the equity method, or the materiality of the investment to the investor's financial position or results of operations. Examples of procedures the auditor may perform are reviewing information in the investor's files that relates to the investee such as investee minutes and budgets and cash flows information about the investee and making inquiries of investor management about the investee's financial results.

---

<sup>14</sup> In determining whether the report of another auditor is satisfactory for this purpose, the auditor may consider performing procedures such as making inquiries as to the professional reputation and standing of the other auditor, visiting the other auditor and discussing the audit procedures followed and the results thereof, and reviewing the audit program and/or working papers of the other auditor.

**.30** If the investee's financial statements are not audited, or if the investee auditor's report is not satisfactory to the investor's auditor for this purpose, the investor's auditor should apply, or should request that the investor arrange with the investee to have another auditor apply, appropriate auditing procedures to such financial statements, considering the materiality of the investment in relation to the financial statements of the investor.

**.31** If the carrying amount of the security reflects factors that are not recognized in the investee's financial statements or fair values of assets that are materially different from the investee's carrying amounts, the auditor should obtain sufficient evidence in support of these amounts. Paragraphs .35 through .46 of this section provide guidance on audit evidence that may be used to corroborate assertions about the fair value of derivatives and securities, and paragraphs .47 and .48 provide guidance on procedures for evaluating management's consideration of the need to recognize impairment losses.

**.32** There may be a time lag in reporting between the date of the financial statements of the investor and that of the investee. A time lag in reporting should be consistent from period to period. If a time lag between the date of the entity's financial statements and those of the investee has a material effect on the entity's financial statements, the auditor should determine whether the entity's management has properly considered the lack of comparability. The effect may be material, for example, because the time lag is not consistent with the prior period in comparative statements or because a significant transaction occurred during the time lag. If a change in time lag occurs that has a material effect on the investor's financial statements, an explanatory paragraph should be added to the auditor's report because of the change in reporting period.<sup>15</sup>

**.33** The auditor should evaluate management's conclusion about the need to recognize an impairment loss for a decline in the security's fair value below its carrying amount that is other than temporary. In addition, with respect to subsequent events and transactions of the investee occurring after the date of the investee's financial statements but before the date of the investor auditor's report, the auditor should read available interim financial statements of the investee and make appropriate inquiries of the investor to identify subsequent events and transactions that are material to the investor's financial statements. Such events or transactions of the type contemplated in section 560, *Subsequent Events*, paragraphs .05-.06), should be disclosed in the notes to the investor's financial statements and (where applicable) labeled as unaudited information. For the purpose of recording the investor's share of the investee's results of operations, recognition should be given to events or transactions of the type contemplated in section 560.03.

**.34** Evidence relating to material transactions between the entity and the investee should be obtained to evaluate (a) the propriety of the elimination of unrealized profits and losses on transactions between the entity and the investee that is required when the equity method of accounting is used to account for an investment under generally accepted accounting principles and (b) the adequacy of disclosures about material related party transactions.

**.35** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

*Valuation Based on Fair Value.* The auditor should obtain evidence supporting management's assertions about the fair value of derivatives and securities measured or disclosed at fair value. The method for determining fair value may be

---

<sup>15</sup> See section 508, *Reports on Audited Financial Statements*, paragraphs .16-.18.

specified by generally accepted accounting principles and may vary depending on the industry in which the entity operates or the nature of the entity. Such differences may relate to the consideration of price quotations from inactive markets and significant liquidity discounts, control premiums, and commissions and other costs that would be incurred to dispose of the derivative or security. The auditor should determine whether generally accepted accounting principles specify the method to be used to determine the fair value of the entity's derivatives and securities and evaluate whether the determination of fair value is consistent with the specified valuation method. Paragraphs .35 through .46 of this section provide guidance on audit evidence that may be used to support assertions about fair value; that guidance should be considered in the context of specific accounting requirements. If the determination of fair value requires the use of estimates, the auditor should consider the guidance in section 342, *Auditing Accounting Estimates*. In addition, paragraphs 24 through 27 of Auditing Standard No. 14, *Evaluating Audit Results*, describe the auditor's responsibilities for assessing bias in accounting estimates.

**.36** Quoted market prices for derivatives and securities listed on national exchanges or over-the-counter markets are available from sources such as financial publications, the exchanges, the National Association of Securities Dealers Automated Quotations System (NASDAQ), or pricing services based on sources such as those. Quoted market prices obtained from those sources are generally considered to provide sufficient evidence of the fair value of the derivatives and securities.

**.37** For certain other derivatives and securities, quoted market prices may be obtained from broker-dealers who are market makers in them or through the National Quotation Bureau. However, using such a price quote to test valuation assertions may require special knowledge to understand the circumstances in which the quote was developed. For example, quotations published by the National Quotation Bureau may not be based on recent trades and may only be an indication of interest and not an actual price for which a counterparty will purchase or sell the underlying derivative or security.

**.38** If quoted market prices are not available for the derivative or security, estimates of fair value frequently can be obtained from broker-dealers or other third-party sources based on proprietary valuation models or from the entity based on internally or externally developed valuation models (for example, the Black-Scholes option pricing model). The auditor should understand the method used by the broker-dealer or other third-party source in developing the estimate, for example, whether a pricing model or a cash flow projection was used. The auditor may also determine that it is necessary to obtain estimates from more than one pricing source. For example, this may be appropriate if either of the following occurs.

- The pricing source has a relationship with an entity that might impair its objectivity, such as an affiliate or a counterparty involved in selling or structuring the product.
- The valuation is based on assumptions that are highly subjective or particularly sensitive to changes in the underlying circumstances.

**.39** For fair-value estimates obtained from broker-dealers and other third-party sources, the auditor should consider the applicability of the guidance in section 336 or section 324. The auditor's decision about whether such guidance is applicable and which guidance is applicable will depend on the circumstances. The guidance in section 336 may be applicable if the third-party source derives the fair value of the derivative or security by using modeling or similar

techniques. If the entity uses a pricing service to obtain prices of securities and derivatives, the guidance in section 324 may be appropriate.

**.40** If the derivative or security is valued by the entity using a valuation model, the auditor does not function as an appraiser and is not expected to substitute his or her judgment for that of the entity's management.<sup>16</sup> Examples of valuation models include the present value of expected future cash flows, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis.

The auditor should obtain evidence supporting management's assertions about fair value determined using a model by performing procedures such as—

- Assessing the reasonableness and appropriateness of the model. The auditor should determine whether the valuation model is appropriate for the derivative or security to which it is applied and whether the assumptions used are reasonable and appropriately supported. Estimates of expected future cash flows, for example, to determine the fair value of debt securities should be based on reasonable and supportable assumptions. The evaluation of the appropriateness of valuation models and each of the assumptions used in the models may require considerable judgment and knowledge of valuation techniques, market factors that affect value, and actual and expected market conditions, particularly in relation to similar derivatives and securities that are traded. Accordingly, the auditor may consider it necessary to involve a specialist in assessing the model.
- Calculating the value, for example using a model developed by the auditor or by a specialist engaged by the auditor, to develop an independent expectation to corroborate the reasonableness of the value calculated by the entity.
- Comparing the fair value with subsequent or recent transactions.

However, a valuation model should not be used to determine fair value when generally accepted accounting principles require that the fair value of a security be determined using quoted market prices.

**.41** Evaluating evidential matter for assertions about derivatives and securities may require the auditor to use considerable judgment. That may be because the assertions, especially those about valuation, are based on highly subjective assumptions or are particularly sensitive to changes in the underlying circumstances. Valuation assertions may be based on assumptions about the occurrence of future events for which expectations are difficult to develop or on assumptions about conditions expected to exist over a long period; for example, default rates or prepayment rates. Accordingly, competent persons could reach different conclusions about estimates of fair values or estimates of ranges of fair values.

**.42** Considerable judgment may also be required in evaluating evidential matter for assertions based on features of the derivative or security and applicable accounting principles, including underlying criteria such as for hedge accounting, that are extremely complex. For example, determining the fair value of a structured note may require consideration of a variety of features of the

---

<sup>16</sup> Independence Standards Board Interpretation 99-1, *FAS 133 Assistance*, provides guidance to auditors of public companies on services an auditor may provide management to assist with the application of FASB Statement No. 133 that would and would not impair the auditor's independence. Ethics Interpretation 101-3, *Performance of Other Services* [ET section 101.05], provides general guidance to auditors of all entities on the effect of nonattest services on the auditor's independence.

note that react differently to changes in economic conditions. In addition, one or more other derivatives may be designated to hedge changes in cash flows under the note. Evaluating evidential matter to support the fair value of the note, the determination of whether the hedge is highly effective, and the allocation of changes in fair value to earnings and other comprehensive income may require considerable judgment.

**.43** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

In situations requiring considerable judgment, the auditor should consider the guidance in—

- a. Section 342 on obtaining and evaluating sufficient appropriate evidential matter to support significant accounting estimates.
- b. Section 336 on the use of the work of a specialist in performing substantive procedures.

**.44** Negotiable securities, real estate, chattels, or other property is often assigned as collateral for debt securities. If the collateral is an important factor in evaluating the fair value and collectibility of the security, the auditor should obtain evidence regarding the existence, fair value, and transferability of such collateral as well as the investor's rights to the collateral.

**.45** Generally accepted accounting principles may specify how to account for unrealized appreciation and depreciation in the fair value of the entity's derivatives and securities. For example, generally accepted accounting principles require the entity to report a change in the unrealized appreciation or depreciation in the fair value of—

- A derivative that is designated as a fair value hedge in earnings, with disclosure of the ineffective portion of the hedge.
- A derivative that is designated as a cash flow hedge in two components, with the ineffective portion reported in earnings and the effective portion reported in other comprehensive income.
- A derivative that was previously designated as a hedge but is no longer highly effective, or a derivative that is not designated as a hedge, in earnings.
- An available-for-sale security in other comprehensive income.

Generally accepted accounting principles may also require the entity to reclassify amounts from accumulated other comprehensive income to earnings. For example, such reclassifications may be required because a hedged transaction is determined to no longer be probable of occurring, a hedged forecasted transaction affects earnings for the period, or a decline in fair value is determined to be other than temporary.

**.46** The auditor should evaluate management's conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary as discussed in paragraphs .47 and .48 of this section. The auditor should also gather evidential matter to support the amount of unrealized appreciation or depreciation in the fair value of a derivative that is recognized in earnings or other comprehensive income or that is disclosed because of the ineffectiveness of a hedge. That requires an understanding of the methods used to determine whether the hedge is highly effective and to determine the ineffective portion of the hedge.

**.47 Impairment Losses.** Regardless of the valuation method used, generally accepted accounting principles might require recognizing in earnings an

impairment loss for a decline in fair value that is other than temporary. Determinations of whether losses are other than temporary often involve estimating the outcome of future events. Accordingly, judgment is required in determining whether factors exist that indicate that an impairment loss has been incurred at the end of the reporting period. These judgments are based on subjective as well as objective factors, including knowledge and experience about past and current events and assumptions about future events. The following are examples of such factors.

- Fair value is significantly below cost and—
  - The decline is attributable to adverse conditions specifically related to the security or to specific conditions in an industry or in a geographic area.
  - The decline has existed for an extended period of time.
  - Management does not possess both the intent and the ability to hold the security for a period of time sufficient to allow for any anticipated recovery in fair value.
- The security has been downgraded by a rating agency.
- The financial condition of the issuer has deteriorated.
- Dividends have been reduced or eliminated, or scheduled interest payments have not been made.
- The entity recorded losses from the security subsequent to the end of the reporting period.

**.48** The auditor should evaluate (a) whether management has considered relevant information in determining whether factors such as those listed in paragraph .47 exist and (b) management's conclusions about the need to recognize an impairment loss. That evaluation requires the auditor to obtain evidence about such factors that tend to corroborate or conflict with management's conclusions. When the entity has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the entity has appropriately followed generally accepted accounting principles.

### **Presentation and Disclosure**

**.49** Assertions about presentation and disclosure address whether the classification, description, and disclosure of derivatives and securities in the entity's financial statements are in conformity with generally accepted accounting principles. The auditor should evaluate whether the presentation and disclosure of derivatives and securities are in conformity with generally accepted accounting principles. As noted in section 411, *The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles*, paragraph .04, the auditor's opinion as to whether financial statements are presented in conformity with generally accepted accounting principles should be based on the auditor's judgement as to whether—

- a. The accounting principles selected and applied have general acceptance.
- b. The accounting principles are appropriate in the circumstances.
- c. The financial statements, including the related notes, are informative of matters that may affect their use, understanding, and interpretation.

- d. The information presented in the financial statements is classified and summarized in a reasonable manner, that is, neither too detailed nor too condensed.
- e. The financial statements reflect the underlying transactions and events in a manner that presents the financial position, results of operations, and cash flows stated within a range of acceptable limits, that is, limits that are reasonable and practicable to attain in financial statements.

[Title of section 411 amended, effective for reports issued or reissued on or after June 30, 2001, by Statement on Auditing Standards No. 93.]

**.50** For some derivatives and securities, generally accepted accounting principles may prescribe presentation and disclosure requirements. For example—

- Whether changes in the fair value of derivatives used to hedge risks are required to be reported as a component of earnings or other comprehensive income depends on whether they are intended to hedge the risk of changes in the fair value of assets and liabilities or changes in expected future cash flows and on the degree of effectiveness of the hedge.
- Certain securities are required to be classified into categories according to management's intent and ability, such as held-to-maturity.
- Specific information is required to be disclosed about derivatives and securities.

**.51** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In evaluating the adequacy of presentation and disclosure, the auditor should consider the form, arrangement, and content of the financial statements and their notes, including, for example, the terminology used, the amount of detail given, the classification of items in the statements, and the bases of amounts reported. The auditor should compare the presentation and disclosure with the requirements of generally accepted accounting principles. (See paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*.)

## Additional Considerations About Hedging Activities

**.52** To account for a derivative as a hedge, generally accepted accounting principles require management at the inception of the hedge to designate the derivative as a hedge and contemporaneously formally document<sup>17</sup> the hedging relationship, the entity's risk management objective and strategy for undertaking the hedge, and the method of assessing the effectiveness of the hedge. In addition, to qualify for hedge accounting, generally accepted accounting principles require that management have an expectation, both at the inception of the hedge and on an ongoing basis, that the hedging relationship will be highly effective in achieving the hedging strategy.<sup>18</sup>

**.53** The auditor should gather evidential matter to determine whether management complied with the hedge accounting requirements of generally

<sup>17</sup> FASB Statement No. 133 requires formal documentation of prescribed aspects of hedging relationships at the inception of the hedge.

<sup>18</sup> See section 508, *Reports on Audited Financial Statements*, paragraphs .16–.18.

accepted accounting principles, including designation and documentation requirements. In addition, the auditor should gather evidential matter to support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by generally accepted accounting principles.

**.54** When the entity designates a derivative as a fair value hedge, generally accepted accounting principles require that the entity adjust the carrying amount of the hedged item for the change in the hedged item's fair value that is attributable to the hedged risk. The auditor should gather evidential matter supporting the recorded change in the hedged item's fair value that is attributable to the hedged risk. Additionally, the auditor should gather evidential matter to determine whether management has properly applied generally accepted accounting principles to the hedged item.

**.55** For a cash flow hedge of a forecasted transaction, generally accepted accounting principles require management to determine that the forecasted transaction is probable of occurring. Those principles require that the likelihood that the transaction will take place not be based solely on management's intent. Instead, the transaction's probability should be supported by observable facts and the attendant circumstances, such as the following:

- The frequency of similar past transactions
- The financial and operational ability of the entity to carry out the transaction
- The extent of loss that could result if the transaction does not occur
- The likelihood that transactions with substantially different characteristics might be used to achieve the same business purpose

The auditor should evaluate management's determination of whether a forecasted transaction is probable.

## Assertions About Securities Based on Management's Intent and Ability

**.56** Generally accepted accounting principles require that management's intent and ability be considered in valuing certain securities; for example, whether—

- Debt securities are classified as held-to-maturity and reported at their cost depends on management's intent and ability to hold them to their maturity.
- Equity securities are reported using the equity method depends on management's ability to significantly influence the investee.
- Equity securities are classified as trading or available-for-sale depends on management's intent and objectives in investing in the securities.

**.57** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

In evaluating management's intent and ability, the auditor should—

- a. Obtain an understanding of the process used by management to classify securities as trading, available-for-sale, or held-to-maturity.

- b. For an investment accounted for using the equity method, inquire of management as to whether the entity has the ability to exercise significant influence over the operating and financial policies of the investee and evaluate the attendant circumstances that serve as a basis for management's conclusions.
- c. If the entity accounts for the investment contrary to the presumption established by generally accepted accounting principles for use of the equity method, obtain sufficient appropriate evidential matter about whether that presumption has been overcome and whether appropriate disclosure is made regarding the reasons for not accounting for the investment in keeping with that presumption.
- d. Consider whether management's activities corroborate or conflict with its stated intent. For example, the auditor should evaluate an assertion that management intends to hold debt securities to their maturity by examining evidence such as documentation of management's strategies and sales and other historical activities with respect to those securities and similar securities.
- e. Determine whether generally accepted accounting principles require management to document its intentions and specify the content and timeliness of that documentation.<sup>19</sup> The auditor should inspect the documentation and obtain evidential matter about its timeliness. Unlike the formal documentation required for hedging activities, evidential matter supporting the classification of debt and equity securities may be more informal.
- f. Determine whether management's activities, contractual agreements, or the entity's financial condition provide evidence of its ability. Examples follow.
  - (1) The entity's financial position, working capital needs, operating results, debt agreements, guarantees, alternate sources of liquidity, and other relevant contractual obligations, as well as laws and regulations, may provide evidence about an entity's ability to hold debt securities to their maturity.
  - (2) Management's cash flow projections may suggest that it does not have the ability to hold debt securities to their maturity.
  - (3) Management's inability to obtain information from an investee may suggest that it does not have the ability to significantly influence the investee.
  - (4) If the entity asserts that it maintains effective control over securities transferred under a repurchase agreement, the contractual agreement may be such that the entity actually surrendered control over the securities and therefore should account for the transfer as a sale instead of a secured borrowing.

---

<sup>19</sup> FASB Statement No. 115 requires an investor to document the classification of debt and equity securities into one of three categories—held-to-maturity, available-for-sale, or trading—at their acquisition.

## Management Representations

.58 Section 333, *Management Representations*, provides guidance to auditors in obtaining written representations from management. The auditor ordinarily should obtain written representations from management confirming aspects of management's intent and ability that affect assertions about derivatives and securities, such as its intent and ability to hold a debt security until its maturity or to enter into a forecasted transaction for which hedge accounting is applied. In addition, the auditor should consider obtaining written representations from management confirming other aspects of derivatives and securities transactions that affect assertions about them.<sup>20</sup>

## Effective Date

.59 This section is effective for audits of financial statements for fiscal years ending on or after June 30, 2001. Early application is permitted.

---

---

<sup>20</sup> Appendix B of section 333.17 provides illustrative representations about derivatives and securities transactions.

## AU Section 333

# Management Representations

(Supersedes SAS No. 19)

**Source:** SAS No. 85; SAS No. 89; SAS No. 99; Auditing Standard No. 5; Auditing Standard Nos. 8–15; Auditing Standard No. 16.

See section 9333 for interpretations of this section.

Effective for audits of financial statements for periods ending on or after June 30, 1998, unless otherwise indicated.

## Introduction

.01 This section establishes a requirement that the independent auditor obtain written representations from management as a part of an audit of financial statements performed in accordance with generally accepted auditing standards and provides guidance concerning the representations to be obtained.

## Reliance on Management Representations

.02 During an audit, management makes many representations to the auditor, both oral and written, in response to specific inquiries or through the financial statements. Such representations from management are part of the evidential matter the independent auditor obtains, but they are not a substitute for the application of those auditing procedures necessary to afford a reasonable basis for an opinion regarding the financial statements under audit. Written representations from management ordinarily confirm representations explicitly or implicitly given to the auditor, indicate and document the continuing appropriateness of such representations, and reduce the possibility of misunderstanding concerning the matters that are the subject of the representations.<sup>1</sup>

.03 The auditor obtains written representations from management to complement other auditing procedures. In many cases, the auditor applies auditing procedures specifically designed to obtain evidential matter concerning matters that also are the subject of written representations. For example, after the auditor performs the procedures prescribed in section 334, *Related Parties*, even if the results of those procedures indicate that transactions with related parties have been properly disclosed, the auditor should obtain a written representation to document that management has no knowledge of any such transactions that have not been properly disclosed. In some circumstances, evidential matter that can be obtained by the application of auditing procedures other than inquiry is limited; therefore, the auditor obtains written representations to provide additional evidential matter. For example, if an entity plans to discontinue a line of business and the auditor is not able to obtain sufficient information through other auditing procedures to corroborate the plan or intent, the auditor obtains a written representation to provide evidence of management's intent.

---

<sup>1</sup> Section 230, *Due Professional Care in the Performance of Work*, states, "The auditor neither assumes that management is dishonest nor assumes unquestioned honesty. In exercising professional skepticism, the auditor should not be satisfied with less than persuasive evidence because of a belief that management is honest."

**.04** If a representation made by management is contradicted by other audit evidence, the auditor should investigate the circumstances and consider the reliability of the representation made. Based on the circumstances, the auditor should consider whether his or her reliance on management's representations relating to other aspects of the financial statements is appropriate and justified.

## Obtaining Written Representations

**.05** *[The following paragraph is effective for audits of fiscal years ending on or after December 15, 2012. See PCAOB Release 2012-004.]*

Written representations from management should be obtained for all financial statements and periods covered by the auditor's report.<sup>2</sup> For example, if comparative financial statements are reported on, the written representations obtained at the completion of the most recent audit should address all periods being reported on. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. The auditor should provide a copy of the representation letter to the audit committee if management has not already provided the representation letter to the audit committee.

*[The following note is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

Note: When performing an integrated audit of financial statements and internal control over financial reporting, refer to paragraphs 75–77 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for additional required written representations to be obtained from management.

**.06** In connection with an audit of financial statements presented in accordance with generally accepted accounting principles, specific representations should relate to the following matters:<sup>3</sup>

### *Financial Statements*

- a. Management's acknowledgment of its responsibility for the fair presentation in the financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.
- b. Management's belief that the financial statements are fairly presented in conformity with generally accepted accounting principles.

### *Completeness of Information*

- c. Availability of all financial records and related data.
- d. Completeness and availability of all minutes of meetings of stockholders, directors, and committees of directors.

---

<sup>2</sup> An illustrative representation letter from management is contained in appendix A, "Illustrative Management Representation Letter" [paragraph .16].

<sup>3</sup> Specific representations also are applicable to financial statements presented in conformity with a comprehensive basis of accounting other than generally accepted accounting principles. The specific representations to be obtained should be based on the nature and basis of presentation of the financial statements being audited.

- e. Communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
- f. Absence of unrecorded transactions.

*Recognition, Measurement, and Disclosure*

- g. Management's belief that the effects of any uncorrected financial statement misstatements<sup>4</sup> aggregated by the auditor during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.<sup>5</sup> (A summary of such items should be included in or attached to the letter.)<sup>6, 7</sup>
- h. Management's acknowledgment of its responsibility for the design and implementation of programs and controls to prevent and detect fraud.
- i. Knowledge of fraud or suspected fraud affecting the entity involving (1) management, (2) employees who have significant roles in internal control, or (3) others where the fraud could have a material effect on the financial statements.<sup>[8]</sup>
- j. Knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
- k. Plans or intentions that may affect the carrying value or classification of assets or liabilities.
- l. Information concerning related-party transactions and amounts receivable from or payable to related parties.<sup>9</sup>
- m. Guarantees, whether written or oral, under which the entity is contingently liable.

---

<sup>4</sup> Auditing Standard No. 14, *Evaluating Audit Results*, indicates that a misstatement can arise from error or fraud and also discusses the auditor's responsibilities for evaluating accumulated misstatements. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>5</sup> If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [description of reasons]." [Footnote added, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

<sup>6</sup> Paragraph 11 of Auditing Standard No. 14, *Evaluating Audit Results*, states that the auditor may designate an amount below which misstatements need not be accumulated. Similarly, the summary of uncorrected misstatements included in or attached to the representation letter need not include such misstatements. The summary should include sufficient information to provide management with an understanding of the nature, amount, and effect of the uncorrected misstatements. Similar items may be aggregated. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>7</sup> The communication to management of immaterial misstatements aggregated by the auditor does not constitute a communication pursuant to section 317, *Illegal Acts by Clients*, paragraph .17, Section 10A of the Securities Exchange Act of 1934, or section 316, *Consideration of Fraud in a Financial Statement Audit*, paragraphs .79 through .82. The auditor may have additional communication responsibilities pursuant to section 317, Section 10A of the Securities Exchange Act of 1934, or section 316. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>[8]</sup> [Footnote deleted by the issuance of Statement on Auditing Standards No. 99, October 2002.]

<sup>9</sup> See section 334. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

- n. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*.
- o. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.<sup>10</sup>
- p. Unasserted claims or assessments that the entity's lawyer has advised are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies* [AC section C59].<sup>11</sup>
- q. Other liabilities and gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5 [AC section C59].<sup>12</sup>
- r. Satisfactory title to assets, liens or encumbrances on assets, and assets pledged as collateral.
- s. Compliance with aspects of contractual agreements that may affect the financial statements.

#### *Subsequent Events*

- t. Information concerning subsequent events.<sup>13</sup>

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

**.07** The representation letter ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry.<sup>14</sup> Examples of additional representations that may be appropriate are provided in appendix B, "Additional Illustrative Representations" [paragraph .17].

**.08** Management's representations may be limited to matters that are considered either individually or collectively material to the financial statements, provided management and the auditor have reached an understanding on materiality for this purpose. Materiality may be different for different representations. A discussion of materiality may be included explicitly in the

<sup>10</sup> See section 317. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>11</sup> See section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, paragraph .05d. If the entity has not consulted a lawyer regarding litigation, claims, and assessments, the auditor normally would rely on the review of internally available information and obtain a written representation by management regarding the lack of litigation, claims, and assessments; see auditing Interpretation No. 6, "Client Has Not Consulted a Lawyer" (section 9337.15–.17). [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>12</sup> See section 337.05b. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>13</sup> See section 560, *Subsequent Events*, paragraph .12, section 711, *Filings Under Federal Securities Statutes*, paragraph .10, and section 634, *Letters for Underwriters and Certain Other Requesting Parties*, paragraph .45, footnote 29. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>14</sup> Certain AICPA Audit Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

representation letter, in either qualitative or quantitative terms. Materiality considerations would not apply to those representations that are not directly related to amounts included in the financial statements, for example, items (a), (c), (d), and (e) above. In addition, because of the possible effects of fraud on other aspects of the audit, materiality would not apply to item (h) above with respect to management or those employees who have significant roles in internal control.

**.09** *[The following paragraph is effective for audits of fiscal years ending on or after November 15, 2007. See PCAOB Release 2007-005.]*

The written representations should be addressed to the auditor. Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report. [If the auditor "dual dates" his or her report, the auditor should consider whether obtaining additional representations relating to the subsequent event is appropriate. See section 530, *Dating of the Independent Auditor's Report*, paragraph .05]. The letter should be signed by those members of management with overall responsibility for financial and operating matters whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management normally include the chief executive officer and chief financial officer or others with equivalent positions in the entity.

**.10** If current management was not present during all periods covered by the auditor's report, the auditor should nevertheless obtain written representations from current management on all such periods. The specific written representations obtained by the auditor will depend on the circumstances of the engagement and the nature and basis of presentation of the financial statements. As discussed in paragraph .08, management's representations may be limited to matters that are considered either individually or collectively material to the financial statements.

**.11** In certain circumstances, the auditor may want to obtain written representations from other individuals. For example, he or she may want to obtain written representations about the completeness of the minutes of the meetings of stockholders, directors, and committees of directors from the person responsible for keeping such minutes. Also, if the independent auditor performs an audit of the financial statements of a subsidiary but does not audit those of the parent company, he or she may want to obtain representations from management of the parent company concerning matters that may affect the subsidiary, such as related-party transactions or the parent company's intention to provide continuing financial support to the subsidiary.

**.12** There are circumstances in which an auditor should obtain updating representation letters from management. If a predecessor auditor is requested by a former client to reissue (or consent to the reuse of) his or her report on the financial statements of a prior period, and those financial statements are to be presented on a comparative basis with audited financial statements of a subsequent period, the predecessor auditor should obtain an updating representation letter from the management of the former client.<sup>15</sup> Also, when performing subsequent events procedures in connection with filings under the Securities Act of 1933, the auditor should obtain certain written representations.<sup>16</sup> The

---

<sup>15</sup> See section 508, *Reports on Audited Financial Statements*, paragraph .71. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>16</sup> See section 711.10. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

updating management representation letter should state (a) whether any information has come to management's attention that would cause them to believe that any of the previous representations should be modified, and (b) whether any events have occurred subsequent to the balance-sheet date of the latest financial statements reported on by the auditor that would require adjustment to or disclosure in those financial statements.<sup>17</sup>

## Scope Limitations

**.13** Management's refusal to furnish written representations constitutes a limitation on the scope of the audit sufficient to preclude an unqualified opinion and is ordinarily sufficient to cause an auditor to disclaim an opinion or withdraw from the engagement.<sup>18</sup> However, based on the nature of the representations not obtained or the circumstances of the refusal, the auditor may conclude that a qualified opinion is appropriate. Further, the auditor should consider the effects of the refusal on his or her ability to rely on other management representations.

**.14** If the auditor is precluded from performing procedures he or she considers necessary in the circumstances with respect to a matter that is material to the financial statements, even though management has given representations concerning the matter, there is a limitation on the scope of the audit, and the auditor should qualify his or her opinion or disclaim an opinion.

## Effective Date

**.15** This section is effective for audits of financial statements for periods ending on or after June 30, 1998. Earlier application is permitted.

---

<sup>17</sup> An illustrative updating management representation letter is contained in appendix C, "Illustrative Updating Management Representation Letter" [paragraph .18]. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

<sup>18</sup> See section 508.22–.34. [Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

.16

## Appendix A

### Illustrative Management Representation Letter

1. The following letter, which relates to an audit of financial statements prepared in conformity with generally accepted accounting principles, is presented for illustrative purposes only. The introductory paragraph should specify the financial statements and periods covered by the auditor's report, for example, "balance sheets of XYZ Company as of December 31, 19X1 and 19X0, and the related statements of income and retained earnings and cash flows for the years then ended." The written representations to be obtained should be based on the circumstances of the engagement and the nature and basis of presentation of the financial statements being audited. (See appendix B [paragraph .17]).

2. If matters exist that should be disclosed to the auditor, they should be indicated by modifying the related representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ." In appropriate circumstances, item 9 could be modified as follows: "The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities, except for its plans to dispose of segment A, as disclosed in Note X to the financial statements, which are discussed in the minutes of the December 7, 20X1, meeting of the board of directors." Similarly, if management has received a communication regarding an allegation of fraud or suspected fraud, item 8 could be modified as follows: "Except for the allegation discussed in the minutes of the December 7, 20X1, meeting of the board of directors (or disclosed to you at our meeting on October 15, 20X1), we have no knowledge of any allegations of fraud or suspected fraud affecting the company received in communications from employees, former employees, analysts, regulators, short sellers, or others."

3. The qualitative discussion of materiality used in the illustrative letter is adapted from FASB Statement of Financial Accounting Concepts No. 2, *Qualitative Characteristics of Accounting Information*.

4. Certain terms are used in the illustrative letter that are described elsewhere in authoritative literature. Examples are fraud, in section 316, and related parties, in section 334, footnote 1. To avoid misunderstanding concerning the meaning of such terms, the auditor may wish to furnish those definitions to management or request that the definitions be included in the written representations.

5. The illustrative letter assumes that management and the auditor have reached an understanding on the limits of materiality for purposes of the written representations. However, it should be noted that a materiality limit would not apply for certain representations, as explained in paragraph .08 of this section.

6.

[Date]

To [Independent Auditor]

We are providing this letter in connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods]

for the purpose of expressing an opinion as to whether the [*consolidated*] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [*name of entity*] in conformity with accounting principles generally accepted in the United States of America. We confirm that we are responsible for the fair presentation in the [*consolidated*] financial statements of financial position, results of operations, and cash flows in conformity with generally accepted accounting principles.

Certain representations in this letter are described as being limited to matters that are material. Items are considered material, regardless of size, if they involve an omission or misstatement of accounting information that, in the light of surrounding circumstances, makes it probable that the judgment of a reasonable person relying on the information would be changed or influenced by the omission or misstatement.

We confirm, to the best of our knowledge and belief, [*as of (date of auditor's report),*] the following representations made to you during your audit(s).

1. The financial statements referred to above are fairly presented in conformity with accounting principles generally accepted in the United States of America.
2. We have made available to you all—
  - a. Financial records and related data.
  - b. Minutes of the meetings of stockholders, directors, and committees of directors, or summaries of actions of recent meetings for which minutes have not yet been prepared.
3. There have been no communications from regulatory agencies concerning noncompliance with or deficiencies in financial reporting practices.
4. There are no material transactions that have not been properly recorded in the accounting records underlying the financial statements.
5. We believe that the effects of the uncorrected financial statement misstatements summarized in the accompanying schedule are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.<sup>1</sup>
6. We acknowledge our responsibility for the design and implementation of programs and controls to prevent and detect fraud.
7. We have no knowledge of any fraud or suspected fraud affecting the entity involving—
  - a. Management,
  - b. Employees who have significant roles in internal control, or
  - c. Others where the fraud could have a material effect on the financial statements.

---

<sup>1</sup> If management believes that certain of the identified items are not misstatements, management's belief may be acknowledged by adding to the representation, for example, "We do not agree that items XX and XX constitute misstatements because [*description of reasons*]." [Footnote added effective for audits of financial statements for periods beginning on or after December 15, 1999, by Statement on Auditing Standards No. 89.]

8. We have no knowledge of any allegations of fraud or suspected fraud affecting the entity received in communications from employees, former employees, analysts, regulators, short sellers, or others.
9. The company has no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.
10. The following have been properly recorded or disclosed in the financial statements:
  - a. Related-party transactions, including sales, purchases, loans, transfers, leasing arrangements, and guarantees, and amounts receivable from or payable to related parties.
  - b. Guarantees, whether written or oral, under which the company is contingently liable.
  - c. Significant estimates and material concentrations known to management that are required to be disclosed in accordance with the AICPA's Statement of Position 94-6, *Disclosure of Certain Significant Risks and Uncertainties*. [Significant estimates are estimates at the balance sheet date that could change materially within the next year. Concentrations refer to volumes of business, revenues, available sources of supply, or markets or geographic areas for which events could occur that would significantly disrupt normal finances within the next year.]
11. There are no—
  - a. Violations or possible violations of laws or regulations whose effects should be considered for disclosure in the financial statements or as a basis for recording a loss contingency.
  - b. Unasserted claims or assessments that our lawyer has advised us are probable of assertion and must be disclosed in accordance with Financial Accounting Standards Board (FASB) Statement No. 5, *Accounting for Contingencies*.<sup>2</sup>
  - c. Other liabilities or gain or loss contingencies that are required to be accrued or disclosed by FASB Statement No. 5.
12. The company has satisfactory title to all owned assets, and there are no liens or encumbrances on such assets nor has any asset been pledged as collateral.
13. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of noncompliance.

*[Add additional representations that are unique to the entity's business or industry. See paragraph .07 and appendix B [paragraph .17] of this section.]*

---

<sup>2</sup> In the circumstance discussed in footnote 11 of this section, this representation might be worded as follows:

We are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments that are required to be accrued or disclosed in the financial statements in accordance with Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*, and we have not consulted a lawyer concerning litigation, claims, or assessments.

[Footnote renumbered by the issuance of Statement on Auditing Standards No. 89, December 1999.]

To the best of our knowledge and belief, no events have occurred subsequent to the balance-sheet date and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

---

*[Name of Chief Executive Officer and Title]*

---

*[Name of Chief Financial Officer and Title]*

[As amended, effective for audits of financial statements for periods beginning on or after December 15, 1999 by Statement on Auditing Standards No. 89. As amended, effective for audits of financial statements for periods beginning on or after December 15, 2002, by Statement on Auditing Standards No. 99.]

.17

## Appendix B Additional Illustrative Representations

1. As discussed in paragraph .07 of this section, representation letters ordinarily should be tailored to include additional appropriate representations from management relating to matters specific to the entity's business or industry. The auditor also should be aware that certain AICPA Audit Guides recommend that the auditor obtain written representations concerning matters that are unique to a particular industry. The following is a list of additional representations that may be appropriate in certain situations. This list is not intended to be all-inclusive. The auditor also should consider the effects of pronouncements issued subsequent to the issuance of this section.

<i>General</i>	
<i>Condition</i>	<i>Illustrative Example</i>
Unaudited interim information accompanies the financial statements.	The unaudited interim financial information accompanying [ <i>presented in Note X to</i> ] the financial statements for the [ <i>identify all related periods</i> ] has been prepared and presented in conformity with generally accepted accounting principles applicable to interim financial information [ <i>and with Item 302(a) of Regulation S-K</i> ]. The accounting principles used to prepare the unaudited interim financial information are consistent with those used to prepare the audited financial statements.
The impact of a new accounting principle is not known.	We have not completed the process of evaluating the impact that will result from adopting Financial Accounting Standards Board (FASB) Statement No. [XXX, Name], as discussed in Note [X]. The company is therefore unable to disclose the impact that adopting FASB Statement No. [XXX] will have on its financial position and the results of operations when such Statement is adopted.
There is justification for a change in accounting principles.	We believe that [ <i>describe the newly adopted accounting principle</i> ] is preferable to [ <i>describe the former accounting principle</i> ] because [ <i>describe management's justification for the change in accounting principles</i> ].
Financial circumstances are strained, with disclosure of management's intentions and the entity's ability to continue as a going concern.	Note [X] to the financial statements discloses all of the matters of which we are aware that are relevant to the company's ability to continue as a going concern, including significant conditions and events, and management's plans.

<b>General</b>	
<b>Condition</b>	<b>Illustrative Example</b>
The possibility exists that the value of specific significant long-lived assets or certain identifiable intangibles may be impaired.	<p>We have reviewed long-lived assets and certain identifiable intangibles to be held and used for impairment whenever events or changes in circumstances have indicated that the carrying amount of its assets might not be recoverable and have appropriately recorded the adjustment.</p>
The entity engages in transactions with special purpose entities.	<p>We have evaluated all transactions involving special purpose entities to determine that the accounting for such transactions is in accordance with generally accepted accounting principles. Specifically [indicate appropriate accounting principles:</p> <ul style="list-style-type: none"> <li>• Conditions pursuant to paragraph 35 of FASB Statement 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities"</li> <li>• EITF Issue No. 96-16, "Investor's Accounting for an Investee When the Investor Has a Majority of the Voting Interest by the Minority Shareholder or Shareholders Have certain Approval or Veto Rights"</li> <li>• EITF Issue No. 90-15, "Impact of Nonsubstantive Lessors, Residual Value Guarantees, and Other Provisions in Leasing Transactions"</li> <li>• EITF Issue 96-21, "Implementation in Accounting for Leasing Transactions involving Special-Purpose Entities"</li> <li>• EITF Issue 97-1, "Implementation Issues in Accounting for Lease Transactions, including Those involving Special-Purpose Entities"</li> <li>• EITF Issue No. 97-2, "Application of FASB Statement No. 94 and APB Opinion No. 16 to Physician Practice Management [PPM] Entities and Certain Other Entities with Contractual Management Arrangements"</li> <li>• EITF Issue No. 00-4, "Majority Owner's Accounting for a transaction in the Shares of a Consolidated Subsidiary and a Derivative Indexed to the Minority Interest in That Subsidiary."]</li> </ul>

<b>General</b>	
<b>Condition</b>	<b>Illustrative Example</b>
The work of a specialist has been used by the entity.	We agree with the findings of specialists in evaluating the [describe assertion] and have adequately considered the qualifications of the specialist in determining the amounts and disclosures used in the financial statements and underlying accounting records. We did not give or cause any instructions to be given to specialists with respect to the values or amounts derived in an attempt to bias their work, and we are not otherwise aware of any matters that have had an impact on the independence or objectivity of the specialists.

<b>Assets</b>	
<b>Condition</b>	<b>Illustrative Examples</b>
<i>Cash</i> Disclosure is required of compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements.	Arrangements with financial institutions involving compensating balances or other arrangements involving restrictions on cash balances, line of credit, or similar arrangements have been properly disclosed.
<i>Financial Instruments</i> Management intends to and has the ability to hold to maturity debt securities classified as held-to-maturity.	Debt securities that have been classified as held-to-maturity have been so classified due to the company's intent to hold such securities, to maturity and the company's ability to do so. All other debt securities have been classified as available-for-sale or trading.
Management considers the decline in value of debt or equity securities to be temporary.	We consider the decline in value of debt or equity securities classified as either available-for-sale or held-to-maturity to be temporary.
Management has determined the fair value of significant financial instruments that do not have readily determinable market values.	The methods and significant assumptions used to determine fair values of financial instruments are as follows: [describe methods and significant assumptions used to determine fair values of financial instruments]. The methods and significant assumptions used result in a measure of fair value appropriate for financial statement measurement and disclosure purposes.

(continued)

<b>Assets</b>	
<b>Condition</b>	<b>Illustrative Examples</b>
There are financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk.	<p>The following information about financial instruments with off-balance-sheet risk and financial instruments with concentrations of credit risk has been properly disclosed in the financial statements:</p> <ol style="list-style-type: none"> <li>1. The extent, nature, and terms of financial instruments with off-balance-sheet risk</li> <li>2. The amount of credit risk of financial instruments with off-balance-sheet risk and information about the collateral supporting such financial instruments</li> <li>3. Significant concentrations of credit risk arising from all financial instruments and information about the collateral supporting such financial instruments</li> </ol>
<i>Receivables</i> Receivables have been recorded in the financial statements.	Receivables recorded in the financial statements represent valid claims against debtors for sales or other charges arising on or before the balance-sheet date and have been appropriately reduced to their estimated net realizable value.
<i>Inventories</i> Excess or obsolete inventories exist.	Provision has been made to reduce excess or obsolete inventories to their estimated net realizable value.
<i>Investments</i> There are unusual considerations involved in determining the application of equity accounting.	<p><i>[For investments in common stock that are either nonmarketable or of which the entity has a 20 percent or greater ownership interest, select the appropriate representation from the following:]</i></p> <ul style="list-style-type: none"> <li>• The equity method is used to account for the company's investment in the common stock of [investee] because the company has the ability to exercise significant influence over the investee's operating and financial policies.</li> <li>• The cost method is used to account for the company's investment in the common stock of [investee] because the company does not have the ability to exercise significant influence over the investee's operating and financial policies.</li> </ul>

<b>Assets</b>	
<b>Condition</b>	<b>Illustrative Examples</b>
<p><i>Deferred Charges</i> Material expenditures have been deferred.</p>	<p>We believe that all material expenditures that have been deferred to future periods will be recoverable.</p>
<p><i>Deferred Tax Assets</i> A deferred tax asset exists at the balance-sheet date.</p>	<p>The valuation allowance has been determined pursuant to the provisions of FASB Statement No. 109, <i>Accounting for Income Taxes</i>, including the company's estimation of future taxable income, if necessary, and is adequate to reduce the total deferred tax asset to an amount that will more likely than not be realized. [Complete with appropriate wording detailing how the entity determined the valuation allowance against the deferred tax asset.]</p> <p style="text-align: center;">or</p> <p>A valuation allowance against deferred tax assets at the balance-sheet date is not considered necessary because it is more likely than not the deferred tax asset will be fully realized.</p>
<b>Liabilities</b>	
<b>Condition</b>	<b>Illustrative Examples</b>
<p><i>Debt</i> Short-term debt could be refinanced on a long-term basis and management intends to do so.</p>	<p>The company has excluded short-term obligations totaling \$[amount] from current liabilities because it intends to refinance the obligations on a long-term basis. [Complete with appropriate wording detailing how amounts will be refinanced as follows:]</p> <ul style="list-style-type: none"> <li>• The company has issued a long-term obligation [debt security] after the date of the balance sheet but prior to the issuance of the financial statements for the purpose of refinancing the short-term obligations on a long-term basis.</li> <li>• The company has the ability to consummate the refinancing, by using the financing agreement referred to in Note [X] to the financial statements.</li> </ul>
<p>Tax-exempt bonds have been issued.</p>	<p>Tax-exempt bonds issued have retained their tax-exempt status.</p>

(continued)

<b><i>Liabilities</i></b>	
<b><i>Condition</i></b>	<b><i>Illustrative Examples</i></b>
<p><i>Taxes</i> Management intends to reinvest undistributed earnings of a foreign subsidiary.</p>	<p>We intend to reinvest the undistributed earnings of [<i>name of foreign subsidiary</i>].</p>
<p><i>Contingencies</i> Estimates and disclosures have been made of environmental remediation liabilities and related loss contingencies.</p>	<p>Provision has been made for any material loss that is probable from environmental remediation liabilities associated with [<i>name of site</i>]. We believe that such estimate is reasonable based on available information and that the liabilities and related loss contingencies and the expected outcome of uncertainties have been adequately described in the company's financial statements.</p>
<p>Agreements may exist to repurchase assets previously sold.</p>	<p>Agreements to repurchase assets previously sold have been properly disclosed.</p>
<p><i>Pension and Postretirement Benefits</i> An actuary has been used to measure pension liabilities and costs.</p>	<p>We believe that the actuarial assumptions and methods used to measure pension liabilities and costs for financial accounting purposes are appropriate in the circumstances.</p>
<p>There is involvement with a multiemployer plan.</p>	<p>We are unable to determine the possibility of a withdrawal liability in a multiemployer benefit plan.</p> <p style="text-align: center;">or</p> <p>We have determined that there is the possibility of a withdrawal liability in a multiemployer plan in the amount of \$[XX].</p>
<p>Postretirement benefits have been eliminated.</p>	<p>We do not intend to compensate for the elimination of postretirement benefits by granting an increase in pension benefits.</p> <p style="text-align: center;">or</p> <p>We plan to compensate for the elimination of postretirement benefits by granting an increase in pension benefits in the amount of \$[XX].</p>
<p>Employee layoffs that would otherwise lead to a curtailment of a benefit plan are intended to be temporary.</p>	<p>Current employee layoffs are intended to be temporary.</p>

<b><i>Liabilities</i></b>	
<b><i>Condition</i></b>	<b><i>Illustrative Examples</i></b>
Management intends to either continue to make or not make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost, or has expressed a substantive commitment to increase benefit obligations.	<p>We plan to continue to make frequent amendments to its pension or other postretirement benefit plans, which may affect the amortization period of prior service cost.</p> <p style="text-align: center;">or</p> <p>We do not plan to make frequent amendments to its pension or other postretirement benefit plans.</p>

<b><i>Equity</i></b>	
<b><i>Condition</i></b>	<b><i>Illustrative Example</i></b>
There are capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements.	Capital stock repurchase options or agreements or capital stock reserved for options, warrants, conversions, or other requirements have been properly disclosed.

<b><i>Income Statement</i></b>	
<b><i>Condition</i></b>	<b><i>Illustrative Example</i></b>
There may be a loss from sales commitments.	Provisions have been made for losses to be sustained in the fulfillment of or from inability to fulfill any sales commitments.
There may be losses from purchase commitments.	Provisions have been made for losses to be sustained as a result of purchase commitments for inventory quantities in excess of normal requirements or at prices in excess of prevailing market prices.
Nature of the product or industry indicates the possibility of undisclosed sales terms.	We have fully disclosed to you all sales terms, including all rights of return or price adjustments and all warranty provisions.

[Revised, April 2002, to reflect conforming changes necessary due to the issuance of recent guidance on special purpose entity transactions.]

.18

## Appendix C

### Illustrative Updating Management Representation Letter

1. The following letter is presented for illustrative purposes only. It may be used in the circumstances described in paragraph .12 of this section. Management need not repeat all of the representations made in the previous representation letter.

2. If matters exist that should be disclosed to the auditor, they should be indicated by listing them following the representation. For example, if an event subsequent to the date of the balance sheet has been disclosed in the financial statements, the final paragraph could be modified as follows: "To the best of our knowledge and belief, except as discussed in Note X to the financial statements, no events have occurred. . . ."

3.

[Date]

To [Auditor]

In connection with your audit(s) of the [identification of financial statements] of [name of entity] as of [dates] and for the [periods] for the purpose of expressing an opinion as to whether the [consolidated] financial statements present fairly, in all material respects, the financial position, results of operations, and cash flows of [name of entity] in conformity with accounting principles generally accepted in the United States of America, you were previously provided with a representation letter under date of [date of previous representation letter]. No information has come to our attention that would cause us to believe that any of those previous representations should be modified.

To the best of our knowledge and belief, no events have occurred subsequent to [date of latest balance sheet reported on by the auditor] and through the date of this letter that would require adjustment to or disclosure in the aforementioned financial statements.

[Name of Chief Executive Officer and Title]

---

[Name of Chief Financial Officer and Title]

[Revised, October 2000, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 93.]

---

## AU Section 9333

# ***Management Representations: Auditing Interpretations of Section 333***

### **1. Management Representations on Violations and Possible Violations of Laws and Regulations**

**.01 Question**—Section 333, *Management Representations*, lists matters for which the auditor ordinarily obtains written representations from management. One of those matters is: Violations or possible violations of laws or regulations whose effects should be considered for disclosure in financial statements or as a basis for recording a loss contingency.

**.02** Guidance on evaluating the need to disclose litigation, claims, and assessments that may result from possible violations is provided by FASB Statement No. 5, *Accounting for Contingencies* [AC section C59]. Section 317, *Illegal Acts by Clients*, provides guidance on evaluating the materiality of illegal acts. Does the representation regarding "possible violations" include matters beyond those described in FASB Statement No. 5 [AC section C59] and section 317?

**.03 Interpretation**—No. Section 333 did not change the relevant criteria for evaluating the need for disclosure of violations and possible violations of laws or regulations. In requesting the representation on possible violations, the auditor is not asking for management's speculation on all possibilities of legal challenges to its actions.

**.04** The representation concerns matters that have come to management's attention and that are significant enough that they should be considered in determining whether financial statement disclosures are necessary. It recognizes that these are matters of judgment and that the need for disclosure is not always readily apparent.

[Issue Date: March, 1979.]

---

## AU Section 334

### *Related Parties*

(Supersedes Statement on Auditing Standards No. 6, AICPA, *Professional Standards*, vol. 1, AU sec. 335.01–19)\*

Source: SAS No. 45; Auditing Standard Nos. 8–15.

See section 9334 for interpretations of this section.

Effective for periods ended after September 30, 1983, unless otherwise indicated.

.01 This section provides guidance on procedures that should be considered by the auditor when he is performing an audit of financial statements in accordance with generally accepted auditing standards to identify related party relationships and transactions and to satisfy himself concerning the required financial statement accounting and disclosure.<sup>1</sup> The procedures set forth in this section should not be considered all-inclusive. Also, not all of them may be required in every audit.

### Accounting Considerations

.02 FASB Statement No. 57, *Related Party Disclosures* [AC section R36], gives the requirements for related party disclosures. Certain accounting pronouncements prescribe the accounting treatment when related parties are involved; however, established accounting principles ordinarily do not require transactions with related parties to be accounted for on a basis different from that which would be appropriate if the parties were not related. The auditor should view related party transactions within the framework of existing pronouncements, placing primary emphasis on the adequacy of disclosure. In

---

\* This section also withdraws the following auditing interpretations dated March 1976 (AICPA, *Professional Standards*, vol. 1, AU sec. 9335.01-.11):

- Evaluating the Adequacy of Disclosure of Related Party Transactions
- Disclosure of Commonly Controlled Parties
- Definition of "Immediate Family"

<sup>1</sup> Financial Accounting Standards Board Statement No. 57, *Related Party Disclosures*, paragraphs 2 through 4 [AC section R36.102-.104], contains the disclosure requirements for related party relationships and transactions. The glossary of that Statement [AC section R36.406] defines related parties as follows:

Affiliates of the enterprise; entities for which investments are accounted for by the equity method by the enterprise; trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management; principal owners of the enterprise; its management; members of the immediate families of principal owners of the enterprise and its management; and other parties with which the enterprise may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. Another party also is a related party if it can significantly influence the management or operating policies of the transacting parties or if it has an ownership interest in one of the transacting parties and can significantly influence the other to an extent that one or more of the transacting parties might be prevented from fully pursuing its own separate interests. The glossary also gives definitions of the terms "affiliate," "control," "immediate family," "management," and "principal owners" [AC section R36.401-.405]. Paragraph 1 of the FASB Statement [AC section R36.101] gives examples of related party transactions.

addition, the auditor should be aware that the substance of a particular transaction could be significantly different from its form and that financial statements should recognize the substance of particular transactions rather than merely their legal form.<sup>2</sup>

**.03** Transactions that because of their nature may be indicative of the existence of related parties include<sup>3</sup>—

- a. Borrowing or lending on an interest-free basis or at a rate of interest significantly above or below market rates prevailing at the time of the transaction.
- b. Selling real estate at a price that differs significantly from its appraised value.
- c. Exchanging property for similar property in a nonmonetary transaction.
- d. Making loans with no scheduled terms for when or how the funds will be repaid.

## Audit Procedures

**.04** An audit performed in accordance with generally accepted auditing standards cannot be expected to provide assurance that all related party transactions will be discovered. Nevertheless, during the course of his audit, the auditor should be aware of the possible existence of material related party transactions that could affect the financial statements and of common ownership or management control relationships for which FASB Statement No. 57 [AC section R36] requires disclosure even though there are no transactions. Many of the procedures outlined in the following paragraphs are normally performed in an audit in accordance with generally accepted auditing standards, even if the auditor has no reason to suspect that related party transactions or control relationships exist. Other audit procedures set forth in this section are specifically directed to related party transactions.

**.05** In determining the scope of work to be performed with respect to possible transactions with related parties, the auditor should obtain an understanding of management responsibilities and the relationship of each component to the total entity. He should consider controls over management activities, and he should consider the business purpose served by the various components of the entity. Normally, the business structure and style of operating are based on the abilities of management, tax and legal considerations, product diversification, and geographical location. Experience has shown, however, that business structure and operating style are occasionally deliberately designed to obscure related party transactions.

**.06** In the absence of evidence to the contrary, transactions with related parties should not be assumed to be outside the ordinary course of business. The

---

<sup>2</sup> Some pronouncements specify criteria for determining, presenting, and accounting for the substance of certain transactions and events. Examples include (1) presenting consolidated financial statements instead of separate statements of the component legal entities (Accounting Research Bulletin No. 51 [AC section C51]); (2) capitalizing leases (FASB Statement No. 13 [AC section L10]); and (3) imputing an appropriate interest rate when the face amount of a note does not reasonably represent the present value of the consideration given or received in exchange for it (Accounting Principles Board Opinion No. 21 [AC section I69]; FASB Statement No. 94 [AC section C51]). [Footnote revised, June 1993, to reflect conforming changes necessary due to the issuance of Statement of Position 93-3.]

<sup>3</sup> FASB Statement No. 57, paragraph 1 [AC section R36.101], gives other examples of common types of transactions with related parties, and it states that "transactions between related parties are considered to be related party transactions even though they may not be given accounting recognition."

auditor should, however, be aware of the possibility that transactions with related parties may have been motivated solely, or in large measure, by conditions similar to the following:

- a.* Lack of sufficient working capital or credit to continue the business
- b.* An urgent desire for a continued favorable earnings record in the hope of supporting the price of the company's stock
- c.* An overly optimistic earnings forecast
- d.* Dependence on a single or relatively few products, customers, or transactions for the continuing success of the venture
- e.* A declining industry characterized by a large number of business failures
- f.* Excess capacity
- g.* Significant litigation, especially litigation between stockholders and management
- h.* Significant obsolescence dangers because the company is in a high-technology industry

### Determining the Existence of Related Parties

**.07** The auditor should place emphasis on testing material transactions with parties he knows are related to the reporting entity. Certain relationships, such as parent-subsidary or investor-investee, may be clearly evident. Determining the existence of others requires the application of specific audit procedures, which may include the following:

- a.* Evaluate the company's procedures for identifying and properly accounting for related party transactions.
- b.* Request from appropriate management personnel the names of all related parties and inquire whether there were any transactions with these parties during the period.
- c.* Review filings by the reporting entity with the Securities and Exchange Commission and other regulatory agencies for the names of related parties and for other businesses in which officers and directors occupy directorship or management positions.
- d.* Determine the names of all pension and other trusts established for the benefit of employees and the names of their officers and trustees.<sup>4</sup>
- e.* Review stockholder listings of closely held companies to identify principal stockholders.
- f.* Review prior years' working papers for the names of known related parties.
- g.* Inquire of predecessor, principal, or other auditors of related entities concerning their knowledge of existing relationships and the extent of management involvement in material transactions.
- h.* Review material investment transactions during the period under audit to determine whether the nature and extent of investments during the period create related parties.

---

<sup>4</sup> According to FASB Statement No. 57, paragraph 24(f) [AC section R36.406] "trusts for the benefit of employees, such as pension and profit-sharing trusts that are managed by or under the trusteeship of management," are related parties.

## Identifying Transactions With Related Parties

**.08** The following procedures are intended to provide guidance for identifying material transactions with parties known to be related and for identifying material transactions that may be indicative of the existence of previously undetermined relationships:

- a. Provide audit personnel performing segments of the audit or auditing and reporting separately on the accounts of related components of the reporting entity with the names of known related parties so that they may become aware of transactions with such parties during their audits.
- b. Review the minutes of meetings of the board of directors and executive or operating committees for information about material transactions authorized or discussed at their meetings.
- c. Review proxy and other material filed with the Securities and Exchange Commission and comparable data filed with other regulatory agencies for information about material transactions with related parties.
- d. Review conflict-of-interests statements obtained by the company from its management.<sup>5</sup>
- e. Review the extent and nature of business transacted with major customers, suppliers, borrowers, and lenders for indications of previously undisclosed relationships.
- f. Consider whether transactions are occurring, but are not being given accounting recognition, such as receiving or providing accounting, management or other services at no charge or a major stockholder absorbing corporate expenses.
- g. Review accounting records for large, unusual, or nonrecurring transactions or balances, paying particular attention to transactions recognized at or near the end of the reporting period.
- h. Review confirmations of compensating balance arrangements for indications that balances are or were maintained for or by related parties.
- i. Review invoices from law firms that have performed regular or special services for the company for indications of the existence of related parties or related party transactions.
- j. Review confirmations of loans receivable and payable for indications of guarantees. When guarantees are indicated, determine their nature and the relationships, if any, of the guarantors to the reporting entity.

## Examining Identified Related Party Transactions

**.09** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

After identifying related party transactions, the auditor should apply the procedures he considers necessary to obtain satisfaction concerning the purpose,

---

<sup>5</sup> Conflict-of-interests statements are intended to provide the board of directors with information about the existence or nonexistence of relationships between the reporting persons and parties with whom the company transacts business.

nature, and extent of these transactions and their effect on the financial statements. The procedures should be directed toward obtaining and evaluating sufficient appropriate evidential matter and should extend beyond inquiry of management. Procedures that should be considered include the following:

- a.* Obtain an understanding of the business purpose of the transaction.<sup>6</sup>
- b.* Examine invoices, executed copies of agreements, contracts, and other pertinent documents, such as receiving reports and shipping documents.
- c.* Determine whether the transaction has been approved by the board of directors or other appropriate officials.
- d.* Test for reasonableness the compilation of amounts to be disclosed, or considered for disclosure, in the financial statements.
- e.* Arrange for the audits of intercompany account balances to be performed as of concurrent dates, even if the fiscal years differ, and for the examination of specified, important, and representative related party transactions by the auditors for each of the parties, with appropriate exchange of relevant information.
- f.* Inspect or confirm and obtain satisfaction concerning the transferability and value of collateral.

**.10** When necessary to fully understand a particular transaction, the following procedures, which might not otherwise be deemed necessary to comply with generally accepted auditing standards, should be considered.<sup>7</sup>

- a.* Confirm transaction amount and terms, including guarantees and other significant data, with the other party or parties to the transaction.
- b.* Inspect evidence in possession of the other party or parties to the transaction.
- c.* Confirm or discuss significant information with intermediaries, such as banks, guarantors, agents, or attorneys, to obtain a better understanding of the transaction.
- d.* Refer to financial publications, trade journals, credit agencies, and other information sources when there is reason to believe that unfamiliar customers, suppliers, or other business enterprises with which material amounts of business have been transacted may lack substance.
- e.* With respect to material uncollected balances, guarantees, and other obligations, obtain information about the financial capability of the other party or parties to the transaction. Such information may be obtained from audited financial statements, unaudited financial statements, income tax returns, and reports issued by regulatory agencies, taxing authorities, financial publications, or credit agencies. The auditor should decide on the degree of assurance required and the extent to which available information provides such assurance.

---

<sup>6</sup> Until the auditor understands the business sense of material transactions, he cannot complete his audit. If he lacks sufficient specialized knowledge to understand a particular transaction, he should consult with persons who do have the requisite knowledge.

<sup>7</sup> Arrangements for certain procedures should be made or approved in advance by appropriate client officials.

## Disclosure

**.11** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

For each material related party transaction (or aggregation of similar transactions) or common ownership or management control relationship for which FASB Statement No. 57 [AC section R36] requires disclosure, the auditor should consider whether he has obtained sufficient appropriate evidential matter to understand the relationship of the parties and, for related party transactions, the effects of the transaction on the financial statements. He should then evaluate all the information available to him concerning the related party transaction or control relationship and satisfy himself on the basis of his professional judgment that it is adequately disclosed in the financial statements.<sup>8</sup>

**.12** Except for routine transactions, it will generally not be possible to determine whether a particular transaction would have taken place if the parties had not been related, or assuming it would have taken place, what the terms and manner of settlement would have been. Accordingly, it is difficult to substantiate representations that a transaction was consummated on terms equivalent to those that prevail in arm's-length transactions.<sup>9</sup> If such a representation is included in the financial statements and the auditor believes that the representation is unsubstantiated by management, he should express a qualified or adverse opinion because of a departure from generally accepted accounting principles, depending on materiality (see section 508.35 and .36).

---

<sup>8</sup> The disclosure standards are contained in FASB Statement No. 57, paragraphs 2 through 4 [AC section R36.102–104]. Also, see paragraph 31 of Auditing Standard No. 14, *Evaluating Audit Results*. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>9</sup> FASB Statement No. 57, paragraph 3 [AC section R36.103], states that if representations are made about transactions with related parties, the representations "shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated."

## AU Section 9334\*

# ***Related Parties: Auditing Interpretations of Section 334***

### **[3.] Definition of "Immediate Family"**

[.10–.11] [Withdrawn August, 1983, by SAS No. 45.] (See section 334.)

## **4. Exchange of Information Between the Principal and Other Auditor on Related Parties**

**.12 Question**—Section 334, *Related Parties*, paragraphs .04 and .07, states that "during the course of his audit, the auditor should be aware of the possible existence of material related party transactions," and that determining the existence of related party transactions may require the inquiry of the "principal, or other auditors of related entities concerning their knowledge of existing relationships and the extent of management involvement in material transactions." When should that inquiry be made?

**.13 Interpretation**—The principal auditor and the other auditor should each obtain from the other the names of known related parties and the other information referred to above. Ordinarily, that exchange of information should be made at an early stage of the audit.

[Issue Date: April, 1979.]

## **5. Examination of Identified Related Party Transactions with a Component**

**.14 Question**—According to section 334.09, once related party transactions have been identified, "the auditor should apply the procedures he considers necessary to obtain satisfaction concerning the purpose, nature and extent of these transactions and their effect on the financial statements." When there is a principal auditor-other auditor relationship, how may the auditors obtain that satisfaction regarding transactions that may involve not only the components<sup>1</sup> they are auditing, but also, other components?

**.15 Interpretation**—Audit procedures may sometimes have to be applied to records of components being audited by the other. One auditor may arrange

---

\* [Section number changed August, 1983, to correspond to section 334, *Related Parties*.]

<sup>1</sup> For the purpose of this interpretation, the entities whose separate financial statements collectively comprise the consolidated or other financial statements are referred to as components.

to perform those procedures himself, or he may request the other to do so.<sup>2</sup> There may be circumstances when there are unusual or complex related party transactions and an auditor believes that access to relevant portions of the other's work papers is essential to his understanding of the effects of those transactions on the financial statements he is auditing. In those circumstances, access ordinarily should be provided.<sup>3</sup>

[Issue Date: April, 1979.]

## 6. The Nature and Extent of Auditing Procedures for Examining Related Party Transactions

**.16 Question**—Section 334, *Related Parties*, provides general guidance about the types of procedures an auditor might apply to identified related party transactions. How extensive should the auditor's procedures be to examine related party transactions?

**.17 Interpretation**—The auditor's procedures should be sufficient to provide reasonable assurance that related party transactions are adequately disclosed and that identified related party transactions do not contain misstatements that, when aggregated with misstatements in other balances or classes of transactions, could be material to the financial statements taken as a whole. As in examining any other material account balance or class of transactions, the auditor needs to consider audit risk<sup>4</sup> and design and apply appropriate substantive tests to evaluate management's assertions.

**.18** The risk associated with management's assertions about related party transactions is often assessed as higher than for many other types of transactions because of the possibility that the parties to the transaction are motivated by reasons other than those that exist for most business transactions.<sup>5</sup>

**.19** The higher the auditor's assessment of risk regarding related party transactions, the more extensive or effective the audit tests should be. For example, the auditor's tests regarding valuation of a receivable from an entity under common control might be more extensive than for a trade receivable of the same size because the common parent may be motivated to obscure the substance of the transaction. In assessing the risk of the related party transactions the auditor obtains an understanding of the business purpose of the transactions. Until the auditor understands the business sense of material transactions, he cannot complete his audit. If he lacks sufficient specialized knowledge to obtain that understanding for a particular transaction, he should consult with persons who do have the requisite knowledge. In addition, to understand the transaction, or obtain evidence regarding it, the auditor may have to refer to audited or unaudited financial statements of the related party, apply procedures at the related party, or in some cases audit the financial statements of the related party.

**.20 Question**—Section 334, *Related Parties*, paragraph .07, states that specific audit procedures should be applied to determine if related parties exist.

---

<sup>2</sup> In this case, the auditor should follow the guidance in the interpretation titled *Specific Procedures Performed by Other Auditors at the Principal Auditor's Request*, section 9543.01-.03.

<sup>3</sup> There is no intention in this interpretation to modify section 543.12c regarding the principal auditor's consideration of review of the other auditor's workpapers when he decides not to make reference to the other auditor.

<sup>4</sup> Audit risk and its components are described in Auditing Standard No. 8, *Audit Risk*. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>5</sup> See section 334.06.

That paragraph also suggests some specific audit procedures to identify related parties that the auditor should consider. What other audit procedures for determining the existence of related parties should the auditor consider?

**.21 Interpretation**—The auditor should consider obtaining representations from the entity's senior management and its board of directors about whether they or any other related parties engaged in any transactions with the entity during the period.

[Issue Date: May, 1986.]

## **7. Management's and Auditor's Responsibilities With Regard to Related Party Disclosures Prefaced by Terminology Such As "Management Believes That"**

**.22 Question**—Management discloses in its financial statements that a related party transaction was consummated on terms equivalent to those that prevail in arm's length transactions, and prefaces the representation with a phrase such as "Management believes that" or "It is the Company's belief that." Does the use of such terminology change management's responsibility to substantiate the representation?

**.23 Interpretation**—No. FASB Statement No. 57, *Related Party Disclosures*, paragraph 3 [AC section R36.103], states that the representations about a related party transaction "shall not imply that the related party transactions were consummated on terms equivalent to those that prevail in arm's-length transactions unless such representations can be substantiated." A preface to a disclosure such as "Management believes that" or "It is the Company's belief that" does not change management's responsibility to substantiate the representation. Section 334, *Related Parties*, paragraph .12 (section 334.12), indicates that if such a representation is included in the financial statements and the auditor believes that the representation is unsubstantiated by management, he should express a qualified or adverse opinion because of a departure from generally accepted accounting principles, depending on materiality.

[Issue Date: May, 2000.]

## AU Section 336

### *Using the Work of a Specialist*

(Supersedes SAS No. 11)

Source: SAS No. 73; Auditing Standard Nos. 8–15.

See section 9336 for interpretations of this section.

Effective for audits of periods ending on or after December 15, 1994.

### Introduction and Applicability

**.01** The purpose of this section is to provide guidance to the auditor who uses the work of a specialist in performing an audit in accordance with generally accepted auditing standards. For purposes of this section, a specialist is a person (or firm) possessing special skill or knowledge in a particular field other than accounting or auditing.<sup>1</sup>

**.02** Specialists to which this section applies include, but are not limited to, actuaries, appraisers, engineers, environmental consultants, and geologists. This section also applies to attorneys engaged as specialists in situations other than to provide services to a client concerning litigation, claims, or assessments to which section 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments*, applies. For example, attorneys may be engaged by a client or by the auditor as specialists in a variety of other circumstances, including interpreting the provisions of a contractual agreement.

**.03** The guidance in this section is applicable when—

- a. Management engages or employs a specialist and the auditor uses that specialist's work as evidential matter in performing substantive tests to evaluate material financial statement assertions.
- b. Management engages a specialist employed by the auditor's firm to provide advisory services<sup>2</sup> and the auditor uses that specialist's work as evidential matter in performing substantive tests to evaluate material financial statement assertions.
- c. The auditor engages a specialist and uses that specialist's work as evidential matter in performing substantive tests to evaluate material financial statement assertions.

**.04** The guidance provided in this section applies to audits of financial statements prepared in conformity with generally accepted accounting principles (GAAP)<sup>3</sup> and to engagements performed under section 623, *Special Reports*, including a comprehensive basis of accounting other than GAAP.

---

<sup>1</sup> Because income taxes and information technology are specialized areas of accounting and auditing, this section does not apply to situations in which an income tax specialist or information technology specialist participates in the audit. Auditing Standard No. 10, *Supervision of the Audit Engagement*, applies in those situations. [Footnote revised, effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

<sup>2</sup> The auditor should consider the effect, if any, that using the work of a specialist employed by the auditor's firm has on independence.

<sup>3</sup> References in this section to "financial statements" and to "generally accepted accounting principles" include special reports covered under section 623, *Special Reports*.

**.05** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

This section does not apply to situations in which a specialist employed by the auditor's firm participates in the audit. Auditing Standard No. 10, *Supervision of the Audit Engagement*, applies in those situations.

## Decision to Use the Work of a Specialist

**.06** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor's education and experience enable him or her to be knowledgeable about business matters in general, but the auditor is not expected to have the expertise of a person trained for or qualified to engage in the practice of another profession or occupation. During the audit, however, an auditor may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate evidential matter.

**.07** Examples of the types of matters that the auditor may decide require him or her to consider using the work of a specialist include, but are not limited to, the following:

- a. Valuation (for example, special-purpose inventories, high-technology materials or equipment, pharmaceutical products, complex financial instruments, real estate, restricted securities, works of art, and environmental contingencies)
- b. Determination of physical characteristics relating to quantity on hand or condition (for example, quantity or condition of minerals, mineral reserves, or materials stored in stockpiles)
- c. Determination of amounts derived by using specialized techniques or methods (for example, actuarial determinations for employee benefits obligations and disclosures, and determinations for insurance loss reserves<sup>4</sup> )
- d. Interpretation of technical requirements, regulations, or agreements (for example, the potential significance of contracts or other legal documents or legal title to property)

## Qualifications and Work of a Specialist

**.08** The auditor should consider the following to evaluate the professional qualifications of the specialist in determining that the specialist possesses the necessary skill or knowledge in the particular field:

- a. The professional certification, license, or other recognition of the competence of the specialist in his or her field, as appropriate
- b. The reputation and standing of the specialist in the views of peers and others familiar with the specialist's capability or performance
- c. The specialist's experience in the type of work under consideration

---

<sup>4</sup> In the specific situation involving the audit of an insurance entity's loss reserves, an outside loss reserve specialist—that is, one who is not an employee or officer of the insurance entity—should be used. When the auditor has the requisite knowledge and experience, the auditor may serve as the loss reserve specialist. (See Statement of Position 92-4, *Auditing Insurance Entities' Loss Reserves*.)

**.09** The auditor should obtain an understanding of the nature of the work performed or to be performed by the specialist. This understanding should cover the following:

- a. The objectives and scope of the specialist's work
- b. The specialist's relationship to the client (see paragraphs .10 and .11)
- c. The methods or assumptions used
- d. A comparison of the methods or assumptions used with those used in the preceding period
- e. The appropriateness of using the specialist's work for the intended purpose<sup>5</sup>
- f. The form and content of the specialist's findings that will enable the auditor to make the evaluation described in paragraph .12

## Relationship of the Specialist to the Client

**.10** The auditor should evaluate the relationship<sup>6</sup> of the specialist to the client, including circumstances that might impair the specialist's objectivity. Such circumstances include situations in which the client has the ability—through employment, ownership, contractual right, family relationship, or otherwise—to directly or indirectly control or significantly influence the specialist.

**.11** When a specialist does not have a relationship with the client, the specialist's work usually will provide the auditor with greater assurance of reliability. However, the work of a specialist who has a relationship with the client may be acceptable under certain circumstances. If the specialist has a relationship with the client, the auditor should assess the risk that the specialist's objectivity might be impaired. If the auditor believes the relationship might impair the specialist's objectivity, the auditor should perform additional procedures with respect to some or all of the specialist's assumptions, methods, or findings to determine that the findings are not unreasonable or should engage another specialist for that purpose.

## Using the Findings of the Specialist

**.12** The appropriateness and reasonableness of methods and assumptions used and their application are the responsibility of the specialist. The auditor should (a) obtain an understanding of the methods and assumptions used by the specialist, (b) make appropriate tests of data provided to the specialist, taking into account the auditor's assessment of control risk, and (c) evaluate whether the specialist's findings support the related assertions in the financial statements. Ordinarily, the auditor would use the work of the specialist unless the auditor's procedures lead him or her to believe the findings are unreasonable in the circumstances. If the auditor believes the findings are unreasonable, he or she should apply additional procedures, which may include obtaining the opinion of another specialist.

---

<sup>5</sup> In some cases, the auditor may decide it is necessary to contact the specialist to determine that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements.

<sup>6</sup> The term *relationship* includes, but is not limited to, those situations discussed in section 334, *Related Parties*, footnote 1.

## Effect of the Specialist's Work on the Auditor's Report

**.13** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

If the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate evidential matter has been obtained. If there is a material difference between the specialist's findings and the assertions in the financial statements, he or she should apply additional procedures. If after applying any additional procedures that might be appropriate the auditor is unable to resolve the matter, the auditor should obtain the opinion of another specialist, unless it appears to the auditor that the matter cannot be resolved. A matter that has not been resolved ordinarily will cause the auditor to conclude that he or she should qualify the opinion or disclaim an opinion because the inability to obtain sufficient appropriate evidential matter as to an assertion of material significance in the financial statements constitutes a scope limitation. (See section 508, *Reports on Audited Financial Statements*, paragraphs .22 and .23.)

**.14** The auditor may conclude after performing additional procedures, including possibly obtaining the opinion of another specialist, that the assertions in the financial statements are not in conformity with GAAP. In that event, the auditor should express a qualified or adverse opinion. (See section 508.35, .36, and .41.)

## Reference to the Specialist in the Auditor's Report

**.15** Except as discussed in paragraph .16, the auditor should not refer to the work or findings of the specialist. Such a reference might be misunderstood to be a qualification of the auditor's opinion or a division of responsibility, neither of which is intended. Further, there may be an inference that the auditor making such reference performed a more thorough audit than an auditor not making such reference.

**.16** The auditor may, as a result of the report or findings of the specialist, decide to add explanatory language to his or her standard report or depart from an unqualified opinion. Reference to and identification of the specialist may be made in the auditor's report if the auditor believes such reference will facilitate an understanding of the reason for the explanatory paragraph or the departure from the unqualified opinion.

## Effective Date

**.17** This section is effective for audits of periods ending on or after December 15, 1994. Early application of the provisions of this section is encouraged.

---

## AU Section 9336

# ***Using the Work of a Specialist: Auditing Interpretations of Section 336***

Source: Auditing Standard Nos. 8–15.

### **1. The Use of Legal Interpretations As Evidential Matter to Support Management's Assertion That a Transfer of Financial Assets Has Met the Isolation Criterion in Paragraph 9(a) of Financial Accounting Standards Board Statement No. 140**

**.01 Introduction**—Financial Accounting Standards Board (FASB) Statement No. 140,<sup>1</sup> *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, requires that a transferor of financial assets must surrender control over the financial assets to account for the transfer as a sale. Paragraph 9(a) states one of several conditions that must be met to provide evidence of surrender of control:

The transferred assets have been isolated from the transferor—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership.

Paragraph 27 of FASB Statement No. 140 describes in greater detail the evidence required to support management's assertion that transferred financial assets have been isolated:

The nature and extent of supporting evidence required for an assertion in financial statements that transferred financial assets have been isolated—put presumptively beyond the reach of the transferor and its creditors, either by a single transaction or a series of transactions taken as a whole—depend on the facts and circumstances. All available evidence that either supports or questions an assertion shall be considered. That consideration includes making judgments about whether the contract or circumstances permit the transferor to revoke the transfer. It also may include making judgments about the kind of bankruptcy or other receivership into which a transferor or SPE might be placed, whether a transfer of financial assets would likely be deemed a true sale at law, whether the transferor is affiliated with the transferee, and other factors pertinent under applicable law. Derecognition of transferred assets is appropriate only if the available evidence provides reasonable assurance that the transferred assets would be beyond the reach of the powers of a bankruptcy trustee or other receiver for the transferor or any consolidated affiliate of the transferor that is not a special-purpose corporation or other entity designed to make remote the possibility that it would enter bankruptcy or other receivership.

A determination about whether the isolation criterion has been met to support a conclusion regarding surrender of control is largely a matter of law. This aspect of surrender of control, therefore, is assessed primarily from a legal perspective.

---

<sup>1</sup> Financial Accounting Standards Board (FASB) Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, is a replacement of FASB Statement No. 125 and is effective for transfers and servicing of financial assets and extinguishments of liabilities occurring after March 31, 2001, except as provided in paragraphs 19–25 of FASB Statement No. 140 as amended by FASB Technical Bulletin (FTB) No. 01-1, *Effective Date for Certain Financial Institutions of Certain Provisions of Statement 140 Related to the Isolation of Transferred Financial Assets*.

**.02 Effective Date and Applicability**—This interpretation is effective for auditing procedures related to transfers of financial assets that are required to be accounted for under FASB Statement No. 140, as amended by FASB Technical Bulletin (FTB) No. 01-1, *Effective Date for Certain Financial Institutions of Certain Provisions of Statement 140 Related to the Isolation of Transferred Financial Assets*.<sup>2</sup>

**.03 Question**—What should the auditor consider in determining whether to use the work of a legal specialist<sup>3</sup> to obtain persuasive evidence to support management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140?

**.04** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

*Interpretation*—Section 336, *Using the Work of a Specialist*, paragraph .06, states that "during the audit...an auditor may encounter complex or subjective matters potentially material to the financial statements. Such matters may require special skill or knowledge and in the auditor's judgment require using the work of a specialist to obtain appropriate evidential matter."

**.05** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

Use of a legal specialist may not be necessary to obtain appropriate evidential matter to support management's assertion that the isolation criterion is met in certain situations, such as when there is a routine transfer of financial assets that does not result in any continuing involvement by the transferor.<sup>4</sup>

**.06** Many transfers of financial assets involve complex legal structures, continuing involvement by the transferor, or other legal issues that, in the auditor's judgment, make it difficult to determine whether the isolation criterion is met. In these situations, use of a legal specialist usually is necessary. A legal specialist formulating an opinion as to whether a transfer isolates the transferred assets beyond the reach of the transferor and its creditors may consider, among other things, the structure of the transaction taken as a whole, the nature of any continuing involvement, the type of insolvency or other receivership proceedings to which the transferor might become subject, and other factors pertinent under applicable law.

**.07** If a legal opinion is used as evidence to support the accounting conclusion related to multiple transfers under a single structure, and such transfers occur over an extended period of time under that structure, the auditor should evaluate the need for management to obtain periodic updates of that opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may change the applicability of the previous opinion

---

<sup>2</sup> FTB No. 01-1 amends FASB Statement No. 140 to change the effective date for paragraphs 9(a), 27, 28, and 80–84 of FASB Statement No. 140 for transfers of financial assets by certain financial institutions. Paragraphs 6–8 of FTB No. 01-1 also provide additional transition time for transfers by financial institutions to certain master trusts.

<sup>3</sup> Client's internal or external attorney who is knowledgeable about relevant sections of the U.S. Bankruptcy Code and other federal, state, or foreign laws, as applicable.

<sup>4</sup> FASB Emerging Issues Task Force Topic No. D-99, *Questions and Answers Related to Servicing Activities in a Qualifying Special-Purpose Entity under FASB Statement No. 140*, characterizes no continuing involvement with the transferred assets as "no servicing responsibilities, no participation in future cash flows, no recourse obligations other than standard representations and warranties that the financial assets transferred met the delivery requirements under the arrangement, no further involvement of any kind."

If a contractual provision (such as a call or removal of accounts provision) gives the transferor the unilateral ability to require the return of specific financial assets, the auditor should consider the effect of paragraph 9(c) of FASB Statement No. 140.

to such transfers. The auditor also should evaluate the need for management to obtain periodic updates of an opinion to confirm that there have been no subsequent changes in relevant law or applicable regulations that may affect the conclusions reached in the previous opinion in the case of other transfers (see paragraph 55 of FASB Statement No. 140).

**.08** If management's assertion with respect to a new transaction is that the transaction structure is the same as a prior structure for which a legal opinion that complies with this interpretation was used as evidence to support an assertion that the transfer of assets met the isolation criterion, the auditor should evaluate the need for management to obtain an update of that opinion to confirm that there have been no changes in relevant law, applicable regulations, or in the pertinent facts of the transaction that may affect the applicability of the previous opinion to the new transaction.

**.09 Question**—If the auditor determines that the use of a legal specialist is required, what should he or she consider in assessing the adequacy of the legal opinion?

**.10 Interpretation**—In assessing the adequacy of the legal opinion, the auditor should consider whether the legal specialist has experience with relevant matters, including knowledge of the U.S. Bankruptcy Code, and other federal, state, or foreign law, as applicable, as well as knowledge of the transaction upon which management's assertion is based. For transactions that may be affected by provisions of the Federal Deposit Insurance Act, the auditor should consider whether the legal specialist has experience with the rights and powers of receivers, conservators, and liquidating agents under that Act. The auditor should obtain an understanding of the assumptions that are used by the legal specialist, and make appropriate tests of any information that management provides to the legal specialist and upon which the specialist indicates it relied. For example, testing management's information underlying a legal specialist's assumption regarding the adequacy of consideration received may depend on the nature of the transaction and the relationship of the parties. When the legal specialist's opinion has assumed the adequacy of consideration for transfers from a particular legal entity to its wholly owned subsidiary, changes in the subsidiary's capital accounts plus other consideration generally would be sufficient audit evidence as to the adequacy of consideration. In the case of other transfers, such as those that are not to a wholly owned subsidiary of a particular legal entity that is the transferor, obtaining additional audit evidence may be necessary to evaluate management's assertion with regard to the adequacy of consideration upon which the legal specialist relied, because changes in the transferee's capital accounts do not solely benefit the transferring entity.

**.11** *[The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]*

The auditor also should consider the form and content of the documentation that the legal specialist provides and evaluate whether the legal specialist's findings support management's assertions with respect to the isolation criterion. Section 336.13 states that "if the auditor determines that the specialist's findings support the related assertions in the financial statements, he or she reasonably may conclude that sufficient appropriate evidential matter has been obtained." FASB Statement No. 140's requirement regarding reasonable assurance that the transferred assets would be isolated provides the basis for what auditors should consider in evaluating the work of a legal specialist.

**.12** Findings of a legal specialist that relate to the isolation of transferred financial assets are often in the form of a reasoned legal opinion that is restricted to particular facts and circumstances relevant to the specific transaction. The

reasoning of such opinion may rely upon analogy to legal precedents that may not involve facts and circumstances that are comparable to that specific transaction. The auditor also should consider the effect of any limitations or disclaimers of opinion in assessing the adequacy of any legal opinion.

**.13** An example of the conclusions in a legal opinion for an entity that is subject to the U.S. Bankruptcy Code that provides persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in bankruptcy or other receivership, follows:

*"We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become a Debtor, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of the Seller's estate for purposes of [the relevant sections] of the U.S. Bankruptcy Code."*

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist. For example, if a so-called "two-step" structure has been used to achieve isolation, this paragraph usually will be required with respect to the transferee in the first step of such structure (see paragraph .15 and related footnotes for additional guidance on the second step of a two-step structure as described in paragraph 83 of FASB Statement No. 140). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

*"Based upon the assumptions of fact and the discussion set forth above, and on a reasoned analysis of analogous case law, we are of the opinion that in a properly presented and argued case, as a legal matter, in a proceeding under the U.S. Bankruptcy Code,<sup>5</sup> in which the Seller is a Debtor, a court would not grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller in a case involving the insolvency of the Seller under the doctrine of substantive consolidation."*

In the case of a transferor that is not entitled to become a debtor under the U.S. Bankruptcy Code, a legal opinion regarding whether the isolation criterion is met would consider whether isolation is satisfactorily achieved under the insolvency or receivership laws that apply to the transferor.

**.14** Following are two examples of the conclusions in a legal opinion for an entity that is subject to receivership or conservatorship under provisions of the Federal Deposit Insurance Act. The conclusions in these two examples provide persuasive evidence, in the absence of contradictory evidence, to support management's assertion that the transferred financial assets have been put presumptively beyond the reach of the entity and its creditors, even in conservatorship or receivership. Insolvency and receivership laws applicable to depository institutions, and how those laws affect the legal isolation criterion,

---

<sup>5</sup> For an entity subject to additional regulation (e.g., a broker-dealer subject to the Securities Investor Protection Act), the legal opinion also generally should address the effect of such regulation and the policies of the regulators implementing such regulations (e.g., the Securities Investor Protection Corporation).

differ depending upon the nature of the depository institution and its chartering authority. Accordingly, legal opinions addressing the legal isolation criterion may be formulated in different ways to accommodate those differences.<sup>6</sup>

Example 1: "*We believe (or it is our opinion) that in a properly presented and argued case, as a legal matter, in the event the Seller were to become subject to receivership or conservatorship, the transfer of the Financial Assets from the Seller to the Purchaser would be considered to be a sale (or a true sale) of the Financial Assets from the Seller to the Purchaser and not a loan and, accordingly, the Financial Assets and the proceeds thereof transferred to the Purchaser by the Seller in accordance with the Purchase Agreement would not be deemed to be property of, or subject to repudiation, reclamation, recovery, or recharacterization by, the receiver or conservator appointed with respect to the Seller.*"<sup>7</sup>

Example 2: "The Federal Deposit Insurance Corporation (FDIC) has issued a regulation, 'Treatment by the Federal Deposit Insurance Corporation as Conservator or Receiver of Financial Assets Transferred by an Insured Depository Institution in Connection with a Securitization or Participation,' 12 CFR section 360.6 (the Rule). Based on and subject to the discussion, assumptions, and qualifications herein, it is our opinion that:

- A. Following the appointment of the FDIC as the conservator or receiver for the Bank:
  - (i) The Rule will apply to the Transfers,
  - (ii) Under the Rule, the FDIC acting as conservator or receiver for the Bank could not, by exercise of its authority to disaffirm or repudiate contracts under 12 U.S.C. § 1821(e), reclaim or recover the Transferred Assets from the Issuer or recharacterize the Transferred Assets as property of the Bank or of the conservatorship or receivership for the Bank,
  - (iii) Neither the FDIC (acting for itself as a creditor or as representative of the Bank or its shareholders or creditors) nor any creditor of the Bank would have the right, under any bankruptcy or insolvency law applicable in the conservatorship or receivership of the Bank, to avoid the Transfers, to recover the Transferred Assets, or to require the Transferred Assets to be turned over to the FDIC or such creditor, and
  - (iv) There is no other power exercisable by the FDIC as conservator or receiver for the Bank that would permit the FDIC as such conservator or receiver to reclaim or recover the Transferred Assets from the Issuer, or to recharacterize the Transferred

---

<sup>6</sup> For an entity subject to conservatorship or liquidation under the National Credit Union Act, the examples and discussion in this paragraph would be modified to make appropriate references to "liquidation" and "liquidating agent" and additional information relating to rights and regulations of the National Credit Union Administration.

<sup>7</sup> When the opinion indicates that isolation is achieved without reference to a true sale, the opinion also should provide reasonable assurance that the transferred assets are beyond the reach of the transferor and its creditors other than the transferee to the same extent that is provided in example 2, paragraph B.

Assets as property of the Bank or of the conservatorship or receivership for the Bank; provided, however, that we offer no opinion as to whether, in receivership, the FDIC or any creditor of the Bank may take any such actions if the Holders [*holders of beneficial interests in the transferred assets*] receive payment of the principal amount of the Interests and the interest earned thereon (at the contractual yield) through the date the Holders are so paid; and

- B. Prior to the appointment of the FDIC as conservator or receiver for the Bank, the Bank and its other creditors would not have the right to reclaim or recover the Transferred Assets from the Issuer, except by the exercise of a contractual provision [insert appropriate citation] to require the transfer, or return, of the Transferred Assets that exists solely as a result of the contract between the Bank and the Issuer."<sup>8</sup>

The following additional paragraph addressing substantive consolidation applies when the entity to which the assets are sold or transferred (as described in the opinion) is an affiliate of the selling entity and may also apply in other situations as noted by the legal specialist.<sup>9</sup> For example, if a so-called two-step structure has been used to achieve isolation, the following paragraph usually will be required with respect to the transferee in the first step of the structure (see paragraph .15 and related footnotes for additional guidance on the second step of a two-step structure as described in paragraph 83 of FASB Statement No. 140). When the transferor has entered into transactions with an affiliate that could affect the issue of substantive consolidation, the opinion should address the effect of that involvement on the opinion.

"Based upon the assumptions of fact and the discussion set forth above, and on a reasoned analysis of analogous case law, *we are of the opinion that* in a properly presented and argued case, as a legal matter, in a receivership, conservatorship, or liquidation proceeding in respect of the Seller, a court *would not* grant an order consolidating the assets and liabilities of the Purchaser with those of the Seller."

Certain powers to repudiate contracts, recover, reclaim, or recharacterize transferred assets as property of a transferor that are exercisable by the FDIC under the Federal Deposit Insurance Act may, as of the date of the transfer, be limited by a regulation that may be repealed or amended only in respect of transfers occurring on or after the effective date of such repeal or amendment.<sup>10</sup> With respect to the powers of a receiver or conservator that may not be exercised under that regulation, it is acceptable for attorneys to rely upon the effectiveness of the limitation on such powers set forth in the applicable regulation, provided that the attorney states, based on reasonable assumptions, that: (1) the affected transfer of financial assets meets all qualification requirements of the regulation, and (2) the regulation had not, as of the date of the

<sup>8</sup> See the second paragraph of footnote 4.

Paragraph B is not required if the opinion includes both a conclusion, as set forth in example 1, that the transfer constitutes a "true sale" and the conclusions set forth of example 2, paragraph A. It is not necessary to include any provision of example 2 if the opinion is as set forth in example 1.

<sup>9</sup> An additional substantive consolidation opinion is not required if the opinion states that its conclusion includes the inability to recover the transferred financial assets or recharacterize the transfer by application of the doctrine of "substantive consolidation."

<sup>10</sup> The applicable regulation is 12 CFR section 360.6, effective September 11, 2000.

opinion, been amended, repealed, or held inapplicable by a court with jurisdiction with respect to such transfer. The opinion should separately address any powers of repudiation, recovery, reclamation, or recharacterization exercisable by a receiver or conservator notwithstanding that regulation (for example, rights, powers, or remedies regarding transfers specifically excluded from the regulation) in a manner that provides the same level of assurance as would be provided in the case of opinions that conform with requirements of paragraph .13, except that such opinion shall address powers arising under the Federal Deposit Insurance Act. The considerations in the immediately preceding three sentences are adequately addressed either by the example 1 opinion or the example 2 opinion described in this paragraph or by the variations described in the second paragraph of footnote 8 and in footnote 9.

**.15** [The following paragraph is effective for audits of fiscal years beginning on or after December 15, 2010. See PCAOB Release 2010-004.]

A legal letter that includes an inadequate opinion, inappropriate limitations, or a disclaimer of opinion, or that effectively limits the scope of the opinion to facts and circumstances that are not applicable to the transaction, does not provide persuasive evidence to support the entity's assertion that the transferred assets have been put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership. Likewise, a legal letter that includes conclusions that are expressed using some of the following language would not provide persuasive evidence that a transfer of financial assets has met the isolation criterion of FASB Statement No. 140 (see paragraphs .20 and .21 of this interpretation):

- "We are unable to express an opinion..."
- "It is our opinion, based upon limited facts..."
- "We are of the view..." or "it appears..."
- "There is a reasonable basis to conclude that..."
- "In our opinion, the transfer would *either* be a sale *or* a grant of a perfected security interest..."<sup>11</sup>
- "In our opinion, there is a reasonable possibility..."
- "In our opinion, the transfer *should* be considered a sale..."
- "It is our opinion that the company will be able to assert meritorious arguments..."
- "In our opinion, it is more likely than not ..."
- "In our opinion, the transfer would *presumptively* be..."
- "In our opinion, it is probable that..."

Furthermore, conclusions about hypothetical transactions may not be relevant to the transaction that is the subject of management's assertions. Paragraph 6

---

<sup>11</sup> Certain transferors are subject only to receivership (and not to proceedings under the U.S. Bankruptcy Code or the Federal Deposit Insurance Act) under laws that do not allow a receiver to reach assets in which a security interest has been granted. In such circumstances, an opinion that concludes that the transfer would either be a sale or a grant of a security interest that puts the transferred assets beyond the reach of such receiver and other creditors would provide persuasive evidence that the isolation criterion is met. In certain circumstances, a legal specialist may provide an opinion on both steps of a two-step structure. Such language would be acceptable in an opinion for a transfer of assets in the second step of a two-step structure as described in paragraph 83 of FASB Statement No. 140 provided that the opinion on the transfer in the first step is consistent with paragraphs .13 or .14 of this interpretation.

of Auditing Standard No. 15, *Audit Evidence*, states, "[t]o be appropriate, audit evidence must be both relevant and reliable in providing support for the conclusions on which the auditor's opinion is based." Additionally, conclusions about hypothetical transactions may not contemplate all of the facts and circumstances or the provisions in the agreements of the transaction that is the subject of management's assertions, and generally would not provide persuasive evidence.<sup>12</sup>

**.16 Question**—Are legal opinions that restrict the use of the opinion to the client, or to third parties other than the auditor, acceptable audit evidence?

**.17 Interpretation**—No. Footnote 5 to section 336.09 states: "In some cases, the auditor may decide it is necessary to contact the specialist to determine that the specialist is aware that his or her work will be used for evaluating the assertions in the financial statements." Given the importance of the legal opinion to the assertion in this case, and the precision that legal specialists use in drafting such opinions, an auditor should not use as evidence a legal opinion that he or she deems otherwise adequate if the letter restricts use of the findings expressed therein to the client or to third parties other than the auditor. In that event, the auditor should request that the client obtain the legal specialist's written permission for the auditor to use the opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140.

**.18** An example of a letter from a legal specialist to a client that adequately communicates permission for the auditor to use the legal specialist's opinion for the purpose of evaluating management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140 is as follows:

"Notwithstanding any language to the contrary in our opinions of even date with respect to certain bankruptcy issues relating to the above-referenced transaction, you are authorized to make available to your auditors such opinions solely as evidential matter in support of their evaluation of management's assertion that the transfer of the receivables meets the isolation criterion of FASB Statement No. 140, provided a copy of this letter is furnished to them in connection therewith. In authorizing you to make copies of such opinions available to your auditors for such purpose, we are not undertaking or assuming any duty or obligation to your auditors or establishing any lawyer-client relationship with them. Further, we do not undertake or assume any responsibility with respect to financial statements of you or your affiliates."<sup>13</sup>

**.19** A letter from a legal specialist to a client might authorize the client to make copies of the legal opinion available to the auditor to use in his or her evaluation of management's assertion that a transfer of financial assets meets the isolation criterion of FASB Statement No. 140, but then state that the auditor is not authorized to rely thereon. Such "use but not rely on" language, or other language that similarly restricts the auditor's use of the legal specialist's opinion, does not adequately communicate permission for the auditor to use the legal specialist's opinion as evidential matter. The auditor may wish to consult with his or her legal counsel in circumstances where it is not clear that the auditor may use the legal specialist's opinion.

---

<sup>12</sup> For example, a memorandum of law from a legal specialist usually analyzes (and may make conclusions about) a transaction that may be completed subsequently. Such memorandum generally would not provide persuasive evidence unless the conclusions conform with this interpretation and a legal specialist opines that such conclusions apply to a completed transaction that is the subject of management's assertion.

<sup>13</sup> This language may appear in the legal specialist's opinion rather than in a separate letter. In that case, the wording would be modified slightly to indicate the context.

**.20 Question**—If the auditor determines that it is appropriate to use the work of a legal specialist, and either the resulting legal response does not provide persuasive evidence that a transfer of assets has met the isolation criterion, or the legal specialist does not grant permission for the auditor to use a legal opinion that is restricted to the client or to third parties other than the auditor, what other steps might an auditor consider?

**.21 Interpretation**—When other relevant evidential matter exists, the auditor should consider it before reaching a conclusion about the appropriateness of management's accounting for a transfer.<sup>14</sup> However, since the isolation aspect of surrender of control is assessed primarily from a legal perspective, the auditor usually will not be able to obtain persuasive evidence in a form other than a legal opinion. In the absence of persuasive evidence that a transfer has met the isolation criterion, derecognition of the transferred assets is not in conformity with generally accepted accounting principles and the auditor should consider the need to express a qualified or adverse opinion in accordance with section 508, *Reports on Audited Financial Statements*, paragraphs .35 through .60. However, if permission for the auditor to use a legal opinion that he or she deems otherwise adequate is not granted, this would be a scope limitation and the auditor should consider the need to express a qualified opinion or to disclaim an opinion in accordance with section 508.22–.26 and 508.61–.63.

[Issue Date: December, 2001.]

## AU Section 337

# ***Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments<sup>1</sup>***

**Source:** SAS No. 12.

**See section 9337 for interpretations of this section.**

**Issue date, unless otherwise indicated:** January, 1976.

**.01** This section provides guidance on the procedures an independent auditor should consider for identifying litigation, claims, and assessments and for satisfying himself as to the financial accounting and reporting for such matters when he is performing an audit in accordance with generally accepted auditing standards.

### **Accounting Considerations**

**.02** Management is responsible for adopting policies and procedures to identify, evaluate, and account for litigation, claims, and assessments as a basis for the preparation of financial statements in conformity with generally accepted accounting principles.

**.03** The standards of financial accounting and reporting for loss contingencies, including those arising from litigation, claims, and assessments, are set forth in Statement of Financial Accounting Standards No. 5 [AC section C59], *Accounting for Contingencies*.<sup>2</sup>

### **Auditing Considerations**

**.04** With respect to litigation, claims, and assessments, the independent auditor should obtain evidential matter relevant to the following factors:

- a. The existence of a condition, situation, or set of circumstances indicating an uncertainty as to the possible loss to an entity arising from litigation, claims, and assessments.
- b. The period in which the underlying cause for legal action occurred.
- c. The degree of probability of an unfavorable outcome.
- d. The amount or range of potential loss.

### **Audit Procedures**

**.05** Since the events or conditions that should be considered in the financial accounting for and reporting of litigation, claims, and assessments are matters

---

<sup>1</sup> This section supersedes the commentary, "Lawyers' Letters," January 1974 (section 1001), and auditing interpretations of section 560.12 on lawyers' letters, January 1975 (section 9560.01-.26). It amends section 560.12(d) to read as follows: "Inquire of client's legal counsel concerning litigation, claims, and assessments (see section 337)."

<sup>2</sup> Pertinent portions are reprinted in Exhibit I, section 337B. FASB Statement No. 5 [AC section C59], also describes the standards of financial accounting and reporting for gain contingencies. The auditor's procedures with respect to gain contingencies are parallel to those described in this SAS for loss contingencies.

within the direct knowledge and, often, control of management of an entity, management is the primary source of information about such matters. Accordingly, the independent auditor's procedures with respect to litigation, claims, and assessments should include the following:

- a. Inquire of and discuss with management the policies and procedures adopted for identifying, evaluating, and accounting for litigation, claims, and assessments.
- b. Obtain from management a description and evaluation of litigation, claims, and assessments that existed at the date of the balance sheet being reported on, and during the period from the balance sheet date to the date the information is furnished, including an identification of those matters referred to legal counsel, and obtain assurances from management, ordinarily in writing, that they have disclosed all such matters required to be disclosed by Statement of Financial Accounting Standards No. 5 [AC section C59].
- c. Examine documents in the client's possession concerning litigation, claims, and assessments, including correspondence and invoices from lawyers.
- d. Obtain assurance from management, ordinarily in writing, that it has disclosed all unasserted claims that the lawyer has advised them are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5 [AC section C59]. Also the auditor, with the client's permission, should inform the lawyer that the client has given the auditor this assurance. This client representation may be communicated by the client in the inquiry letter or by the auditor in a separate letter.<sup>3</sup>

**.06** An auditor ordinarily does not possess legal skills and, therefore, cannot make legal judgments concerning information coming to his attention. Accordingly, the auditor should request the client's management to send a letter of inquiry to those lawyers with whom management consulted concerning litigation, claims, and assessments.

**.07** The audit normally includes certain other procedures undertaken for different purposes that might also disclose litigation, claims, and assessments. Examples of such procedures are as follows:

- a. Reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited.
- b. Reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents.
- c. Obtaining information concerning guarantees from bank confirmation forms.
- d. Inspecting other documents for possible guarantees by the client.

---

<sup>3</sup> An example of a separate letter is as follows: We are writing to inform you that (name of company) has represented to us that (except as set forth below and excluding any such matters listed in the letter of audit inquiry) there are no unasserted possible claims that you have advised are probable of assertion and must be disclosed in accordance with Statement of Financial Accounting Standards No. 5 [AC section C59] in its financial statements at (balance sheet date) and for the (period) then ended. (List unasserted possible claims, if any.) Such a letter should be signed and sent by the auditor.

## Inquiry of a Client's Lawyer<sup>4</sup>

**.08** A letter of audit inquiry to the client's lawyer is the auditor's primary means of obtaining corroboration of the information furnished by management concerning litigation, claims, and assessments.<sup>5</sup> Evidential matter obtained from the client's inside general counsel or legal department may provide the auditor with the necessary corroboration. However, evidential matter obtained from inside counsel is not a substitute for information outside counsel refuses to furnish.

**.09** The matters that should be covered in a letter of audit inquiry include, but are not limited to, the following:

- a. Identification of the company, including subsidiaries, and the date of the audit.
- b. A list prepared by management (or a request by management that the lawyer prepare a list) that describes and evaluates pending or threatened litigation, claims, and assessments with respect to which the lawyer has been engaged and to which he has devoted substantive attention on behalf of the company in the form of legal consultation or representation.
- c. A list prepared by management that describes and evaluates unasserted claims and assessments that management considers to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome, with respect to which the lawyer has been engaged and to which he has devoted substantive attention on behalf of the company in the form of legal consultation or representation.
- d. As to each matter listed in item *b*, a request that the lawyer either furnish the following information or comment on those matters as to which his views may differ from those stated by management, as appropriate:
  - (1) A description of the nature of the matter, the progress of the case to date, and the action the company intends to take (for example, to contest the matter vigorously or to seek an out-of-court settlement).
  - (2) An evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.
  - (3) With respect to a list prepared by management, an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.
- e. As to each matter listed in item *c*, a request that the lawyer comment on those matters as to which his views concerning the description or evaluation of the matter may differ from those stated by management.

---

<sup>4</sup> An illustrative inquiry letter to legal counsel is contained in the Appendix (section 337A).

<sup>5</sup> It is not intended that the lawyer be requested to undertake a reconsideration of all matters upon which he was consulted during the period under audit for the purpose of determining whether he can form a conclusion regarding the probability of assertion of any possible claim inherent in any of the matters so considered.

- f.* A statement by the client that the client understands that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client should disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5 [AC section C59].
- g.* A request that the lawyer confirm whether the understanding described in item *f* is correct.
- h.* A request that the lawyer specifically identify the nature of and reasons for any limitation on his response.

Inquiry need not be made concerning matters that are not considered material, provided the client and the auditor have reached an understanding on the limits of materiality for this purpose.

**.10** In special circumstances, the auditor may obtain a response concerning matters covered by the audit inquiry letter in a conference, which offers an opportunity for a more detailed discussion and explanation than a written reply. A conference may be appropriate when the evaluation of the need for accounting for or disclosure of litigation, claims, and assessments involves such matters as the evaluation of the effect of legal advice concerning unsettled points of law, the effect of uncorroborated information, or other complex judgments. The auditor should appropriately document conclusions reached concerning the need for accounting for or disclosure of litigation, claims, and assessments.

**.11** In some circumstances, a lawyer may be required by his Code of Professional Responsibility to resign his engagement if his advice concerning financial accounting and reporting for litigation, claims, and assessments is disregarded by the client. When the auditor is aware that a client has changed lawyers or that a lawyer engaged by the client has resigned, the auditor should consider the need for inquiries concerning the reasons the lawyer is no longer associated with the client.

### Limitations on the Scope of a Lawyer's Response<sup>6</sup>

**.12** A lawyer may appropriately limit his response to matters to which he has given substantive attention in the form of legal consultation or representation. Also, a lawyer's response may be limited to matters that are considered individually or collectively material to the financial statements, provided the lawyer and auditor have reached an understanding on the limits of materiality for this purpose. Such limitations are not limitations on the scope of the audit.

**.13** A lawyer's refusal to furnish the information requested in an inquiry letter either in writing or orally (see paragraphs .09 and .10) would be a limitation on the scope of the audit sufficient to preclude an unqualified opinion

---

<sup>6</sup> The American Bar Association has approved a "Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information," which explains the concerns of lawyers and the nature of the limitations an auditor is likely to encounter. That Statement of Policy is reprinted as Exhibit II (section 337C) for the convenience of readers, but is not an integral part of this Statement.

(see section 508.22 and .23).<sup>7</sup> A lawyer's response to such an inquiry and the procedures set forth in paragraph .05 provide the auditor with sufficient evidential matter to satisfy himself concerning the accounting for and reporting of pending and threatened litigation, claims and assessments. The auditor obtains sufficient evidential matter to satisfy himself concerning reporting for those unasserted claims and assessments required to be disclosed in financial statements from the foregoing procedures and the lawyer's specific acknowledgement of his responsibility to his client in respect of disclosure obligations (see paragraph .09g). This approach with respect to unasserted claims and assessments is necessitated by the public interest in protecting the confidentiality of lawyer-client communications.

### Other Limitations on a Lawyer's Response

.14 A lawyer may be unable to respond concerning the likelihood of an unfavorable outcome of litigation, claims, and assessments or the amount or range of potential loss, because of inherent uncertainties. Factors influencing the likelihood of an unfavorable outcome may sometimes not be within a lawyer's competence to judge; historical experience of the entity in similar litigation or the experience of other entities may not be relevant or available; and the amount of the possible loss frequently may vary widely at different stages of litigation. Consequently, a lawyer may not be able to form a conclusion with respect to such matters. In such circumstances, the auditor ordinarily will conclude that the financial statements are affected by an uncertainty concerning the outcome of a future event which is not susceptible of reasonable estimation, and should look to the guidance in section 508.45 through .49 to determine the effect, if any, of the lawyer's response on the auditor's report. [Revised, February 1997, to reflect conforming changes necessary due to the issuance of Statement on Auditing Standards No. 79.]

---

<sup>7</sup> A refusal to respond should be distinguished from an inability to form a conclusion with respect to certain matters of judgment (see paragraph .14). Also, lawyers outside the United States sometimes follow practices at variance with those contemplated by this section to the extent that different procedures from those outlined herein may be necessary. In such circumstances, the auditor should exercise judgment in determining whether alternative procedures are adequate to comply with the requirements of this section.

## AU Section 337A

# Appendix — Illustrative Audit Inquiry Letter to Legal Counsel

Source: SAS No. 12.

Issue date, unless otherwise indicated: January, 1976.

.01 In connection with an audit of our financial statements at (balance sheet date) and for the (period) then ended, management of the Company has prepared, and furnished to our auditors (name and address of auditors), a description and evaluation of certain contingencies, including those set forth below involving matters with respect to which you have been engaged and to which you have devoted substantive attention on behalf of the Company in the form of legal consultation or representation. These contingencies are regarded by management of the Company as material for this purpose (management may indicate a materiality limit if an understanding has been reached with the auditor). Your response should include matters that existed at (balance sheet date) and during the period from that date to the date of your response.

*Pending or Threatened Litigation (excluding unasserted claims)*

[Ordinarily the information would include the following: (1) the nature of the litigation, (2) the progress of the case to date, (3) how management is responding or intends to respond to the litigation (for example, to contest the case vigorously or to seek an out-of-court settlement), and (4) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated and an identification of the omission of any pending or threatened litigation, claims, and assessments or a statement that the list of such matters is complete.

*Unasserted Claims and Assessments (considered by management to be probable of assertion, and that, if asserted, would have at least a reasonable possibility of an unfavorable outcome)*

[Ordinarily management's information would include the following: (1) the nature of the matter, (2) how management intends to respond if the claim is asserted, and (3) an evaluation of the likelihood of an unfavorable outcome and an estimate, if one can be made, of the amount or range of potential loss.] Please furnish to our auditors such explanation, if any, that you consider necessary to supplement the foregoing information, including an explanation of those matters as to which your views may differ from those stated.

We understand that whenever, in the course of performing legal services for us with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, if you have formed a professional conclusion that we should disclose or consider disclosure concerning such possible claim or assessment, as a matter of professional responsibility to us, you will so advise us and will consult with us concerning the question of such disclosure and the applicable requirements of Statement of Financial

Accounting Standards No. 5. Please specifically confirm to our auditors that our understanding is correct.

Please specifically identify the nature of and reasons for any limitation on your response.

[The auditor may request the client to inquire about additional matters, for example, unpaid or unbilled charges or specified information on certain contractually assumed obligations of the company, such as guarantees of indebtedness of others.]

---

## AU Section 337B

# **Exhibit I—Excerpts from Statement of Financial Accounting Standards No. 5: Accounting for Contingencies**

Source: SAS No. 12.

March, 1975.

*The following excerpts are reprinted with the permission of the Financial Accounting Standards Board.*

## Introduction

1. For the purpose of this Statement, a contingency is defined as an existing condition, situation, or set of circumstances involving uncertainty as to possible gain (hereinafter a "gain contingency") or loss<sup>1</sup> (hereinafter a "loss contingency") to an enterprise that will ultimately be resolved when one or more future events occur or fail to occur. Resolution of the uncertainty may confirm the acquisition of an asset or the reduction of a liability or the loss or impairment of an asset or the incurrence of a liability. . . .

3. When a loss contingency exists, the likelihood that the future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. This Statement uses the terms *probable*, *reasonably possible*, and *remote* to identify three areas within that range, as follows:

- a. *Probable*. The future event or events are likely to occur.
- b. *Reasonably possible*. The chance of the future event or events occurring is more than remote but less than likely.
- c. *Remote*. The chance of the future event or events occurring is slight. . . .

## Standards of Financial Accounting and Reporting

### Accrual of Loss Contingencies

8. An estimated loss from a loss contingency (as defined in paragraph 1) shall be accrued by a charge to income<sup>3</sup> if *both* of the following conditions are met:

- a. Information available prior to issuance of the financial statements indicates that it is probable that an asset had been impaired or

---

<sup>1</sup> The term *loss* is used for convenience to include many charges against income that are commonly referred to as *expenses* and others that are commonly referred to as *losses*.

<sup>3</sup> [Superseded, effective for financial statements for fiscal years beginning after October 15, 1977, by FASB Statement No. 16.]

a liability had been incurred at the date of the financial statements.<sup>4</sup> It is implicit in this condition that it must be probable that one or more future events will occur confirming the fact of the loss.

- b. The amount of loss can be reasonably estimated.

## Disclosure of Loss Contingencies

9. Disclosure of the nature of an accrual<sup>5</sup> made pursuant to the provisions of paragraph 8, and in some circumstances the amount accrued, may be necessary for the financial statements not to be misleading.

10. If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, disclosure of the contingency shall be made when there is at least a reasonable possibility that a loss or an additional loss may have been incurred.<sup>6</sup> The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. Disclosure is not required of a loss contingency involving an unasserted claim or assessment when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable.

11. After the date of an enterprise's financial statements but before those financial statements are issued, information may become available indicating that an asset was impaired or a liability was incurred after the date of the financial statements or that there is at least a reasonable possibility that an asset was impaired or a liability was incurred after that date. The information may relate to a loss contingency that existed at the date of the financial statements, e.g., an asset that was not insured at the date of the financial statements. On the other hand, the information may relate to a loss contingency that did not exist at the date of the financial statements, e.g., threat of expropriation of assets after the date of the financial statements or the filing for bankruptcy by an enterprise whose debt was guaranteed after the date of the financial statements. In none of the cases cited in this paragraph was an asset impaired or a liability incurred at the date of the financial statements, and the condition for accrual in paragraph 8(a) is, therefore, not met. Disclosure of those kinds of losses or loss contingencies may be necessary, however, to keep the financial statements from being misleading. If disclosure is deemed necessary, the financial statements shall indicate the nature of the loss or loss contingency and give an estimate of the amount or range of loss or possible loss or state that such an estimate cannot be made. Occasionally, in the case of a loss arising after the date of the financial statements where the amount of asset impairment or liability incurrence

---

<sup>4</sup> *Date of the financial statements* means the end of the most recent accounting period for which financial statements are being presented.

<sup>5</sup> Terminology used shall be descriptive of the nature of the accrual (see paragraphs 57-64 of *Accounting Terminology Bulletin No. 1*, "Review and Resume").

<sup>6</sup> For example, disclosure shall be made of any loss contingency that meets the condition in paragraph 8(a) but that is not accrued because the amount of loss cannot be reasonably estimated (paragraph 8(b)). Disclosure is also required of some loss contingencies that do not meet the condition in paragraph 8(a)—namely, those contingencies for which there is a *reasonable possibility* that a loss may have been incurred even though information may not indicate that it is *probable* that an asset had been impaired or a liability had been incurred at the date of the financial statements.

can be reasonably estimated, disclosure may best be made by supplementing the historical financial statements with pro forma financial data giving effect to the loss as if it had occurred at the date of the financial statements. It may be desirable to present pro forma statements, usually a balance sheet only, in columnar form on the face of the historical financial statements. . . .

### **Litigation, Claims, and Assessments**

33. The following factors, among others, must be considered in determining whether accrual and/or disclosure is required with respect to pending or threatened litigation and actual or possible claims and assessments:

- a. The period in which the underlying cause (i.e., the cause for action) of the pending or threatened litigation or of the actual or possible claim or assessment occurred.
- b. The degree of probability of an unfavorable outcome.
- c. The ability to make a reasonable estimate of the amount of loss.

34. As a condition for accrual of a loss contingency, paragraph 8(a) requires that information available prior to the issuance of financial statements indicate that it is probable that an asset had been impaired or a liability had been incurred at the date of the financial statements. Accordingly, accrual would clearly be inappropriate for litigation, claims, or assessments whose underlying cause is an event or condition occurring after the date of financial statements but before those financial statements are issued, for example, a suit for damages alleged to have been suffered as a result of an accident that occurred after the date of the financial statements. Disclosure may be required, however, by paragraph 11.

35. On the other hand, accrual may be appropriate for litigation, claims, or assessments whose underlying cause is an event occurring on or before the date of an enterprise's financial statements even if the enterprise does not become aware of the existence or possibility of the lawsuit, claim, or assessment until after the date of the financial statements. If those financial statements have not been issued, accrual of a loss related to the litigation, claim, or assessment would be required if the probability of loss is such that the condition in paragraph 8(a) is met and the amount of loss can be reasonably estimated.

36. If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an enterprise's financial statements, the probability of an outcome unfavorable to the enterprise must be assessed to determine whether the condition in paragraph 8(a) is met. Among the factors that should be considered are the nature of the litigation, claim, or assessment, the progress of the case (including progress after the date of the financial statements but before those statements are issued), the opinions or views of legal counsel and other advisers, the experience of the enterprise in similar cases, the experience of other enterprises, and any decision of the enterprise's management as to how the enterprise intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement). The fact that legal counsel is unable to express an opinion that the outcome will be favorable to the enterprise should not necessarily be interpreted to mean that the condition for accrual of a loss in paragraph 8(a) is met.

37. The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition for

accrual in paragraph 8(a) would be met if an unfavorable outcome is determined to be probable. If an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated, accrual would be inappropriate, but disclosure would be required by paragraph 10 of this Statement.

38. With respect to unasserted claims and assessments, an enterprise must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. For example, a catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable; similarly, an investigation of an enterprise by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case. By way of further example, an enterprise may believe there is a possibility that it has infringed on another enterprise's patent rights, but the enterprise owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. If an unfavorable outcome is probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 8. If an unfavorable outcome is probable but the amount of loss cannot be reasonably estimated, accrual would not be appropriate, but disclosure would be required by paragraph 10. If an unfavorable outcome is reasonably possible but not probable, disclosure would be required by paragraph 10.

39. As a condition for accrual of a loss contingency, paragraph 8(b) requires that the amount of loss can be reasonably estimated. In some cases, it may be determined that a loss was incurred because an unfavorable outcome of the litigation, claim, or assessment is probable (thus satisfying the condition in paragraph 8(a)), but the range of possible loss is wide. For example, an enterprise may be litigating an income tax matter. In preparation for the trial, it may determine that, based on recent decisions involving one aspect of the litigation, it is probable that it will have to pay additional taxes of \$2 million. Another aspect of the litigation may, however, be open to considerable interpretation, and depending on the interpretation by the court the enterprise may have to pay taxes of \$8 million over and above the \$2 million. In that case, paragraph 8 requires accrual of the \$2 million if that is considered a reasonable estimate of the loss. Paragraph 10 requires disclosure of the additional exposure to loss if there is a reasonable possibility that additional taxes will be paid. Depending on the circumstances, paragraph 9 may require disclosure of the \$2 million that was accrued.

### ***Exhibit II—American Bar Association Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information***

**Note:** This document, in the form herein set forth, was approved by the Board of Governors of the American Bar Association in December 1975, which official action permitted its release to lawyers and accountants as the standard recommended by the American Bar Association for the lawyer's response to letters of audit inquiry.

**Source:** SAS No. 12.

#### **Preamble**

The public interest in protecting the confidentiality of lawyer-client communications is fundamental. The American legal, political and economic systems depend heavily upon voluntary compliance with the law and upon ready access to a respected body of professionals able to interpret and advise on the law. The expanding complexity of our laws and governmental regulations increases the need for prompt, specific and unhampered lawyer-client communication. The benefits of such communication and early consultation underlie the strict statutory and ethical obligations of the lawyer to preserve the confidences and secrets of the client, as well as the long-recognized testimonial privilege for lawyer-client communication.

Both the Code of Professional Responsibility and the cases applying the evidentiary privilege recognize that the privilege against disclosure can be knowingly and voluntarily waived by the client. It is equally clear that disclosure to a third party may result in loss of the "confidentiality" essential to maintain the privilege. Disclosure to a third party of the lawyer-client communication on a particular subject may also destroy the privilege as to other communications on that subject. Thus, the mere disclosure by the lawyer to the outside auditor, with due client consent, of the substance of communications between the lawyer and client may significantly impair the client's ability in other contexts to maintain the confidentiality of such communications.

Under the circumstances a policy of audit procedure which requires clients to give consent and authorize lawyers to respond to general inquiries and disclose information to auditors concerning matters which have been communicated in confidence is essentially destructive of free and open communication and early consultation between lawyer and client. The institution of such a policy would inevitably discourage management from discussing potential legal problems with counsel for fear that such discussion might become public and precipitate a loss to or possible liability of the business enterprise and its stockholders that might otherwise never materialize.

It is also recognized that our legal, political and economic systems depend to an important extent on public confidence in published financial statements.

To meet this need the accounting profession must adopt and adhere to standards and procedures that will command confidence in the auditing process. It is not, however, believed necessary, or sound public policy, to intrude upon the confidentiality of the lawyer-client relationship in order to command such confidence. On the contrary, the objective of fair disclosure in financial statements is more likely to be better served by maintaining the integrity of the confidential relationship between lawyer and client, thereby strengthening corporate management's confidence in counsel and encouraging its readiness to seek advice of counsel and to act in accordance with counsel's advice.

Consistent with the foregoing public policy considerations, it is believed appropriate to distinguish between, on the one hand, litigation which is pending or which a third party has manifested to the client a present intention to commence and, on the other hand, other contingencies of a legal nature or having legal aspects. As regards the former category, unquestionably the lawyer representing the client in a litigation matter may be the best source for a description of the claim or claims asserted, the client's position (e.g., denial, contest, etc.), and the client's possible exposure in the litigation (to the extent the lawyer is in a position to do so). As to the latter category, it is submitted that, for the reasons set forth above, it is not in the public interest for the lawyer to be required to respond to general inquiries from auditors concerning possible claims.

It is recognized that the disclosure requirements for enterprises subject to the reporting requirements of the Federal securities laws are a major concern of managements and counsel, as well as auditors. It is submitted that compliance therewith is best assured when clients are afforded maximum encouragement, by protecting lawyer-client confidentiality, freely to consult counsel. Likewise, lawyers must be keenly conscious of the importance of their clients being competently advised in these matters.

## Statement of Policy

NOW, THEREFORE, BE IT RESOLVED that it is desirable and in the public interest that this Association adopt the following Statement of Policy regarding the appropriate scope of the lawyer's response to the auditor's request, made by the client at the request of the auditor, for information concerning matters referred to the lawyer during the course of his representation of the client:

- (1) *Client Consent to Response.* The lawyer may properly respond to the auditor's requests for information concerning loss contingencies (the term and concept established by Statement of Financial Accounting Standards No. 5, promulgated by the Financial Accounting Standards Board in March 1975 and discussed in Paragraph 5.1 of the accompanying Commentary), to the extent hereinafter set forth, subject to the following:
  - a. Assuming that the client's initial letter requesting the lawyer to provide information to the auditor is signed by an agent of the client having apparent authority to make such a request, the lawyer may provide to the auditor information requested, without further consent, unless such information discloses a confidence or a secret or requires an evaluation of a claim.
  - b. In the normal case, the initial request letter does not provide the necessary consent to the disclosure of a confidence or secret or to the evaluation of a claim since that consent may only be given after full disclosure to the client of the legal consequences of such action.

- c. Lawyers should bear in mind, in evaluating claims, that an adverse party may assert that any evaluation of potential liability is an admission.
  - d. In securing the client's consent to the disclosure of confidences or secrets, or the evaluation of claims, the lawyer may wish to have a draft of his letter reviewed and approved by the client before releasing it to the auditor; in such cases, additional explanation would in all probability be necessary so that the legal consequences of the consent are fully disclosed to the client.
- (2) *Limitation on Scope of Response.* It is appropriate for the lawyer to set forth in his response, by way of limitation, the scope of his engagement by the client. It is also appropriate for the lawyer to indicate the date as of which information is furnished and to disclaim any undertaking to advise the auditor of changes which may thereafter be brought to the lawyer's attention. *Unless the lawyer's response indicates otherwise, (a) it is properly limited to matters which have been given substantive attention by the lawyer in the form of legal consultation and, where appropriate, legal representation since the beginning of the period or periods being reported upon, and (b) if a law firm or a law department, the auditor may assume that the firm or department has endeavored, to the extent believed necessary by the firm or department, to determine from lawyers currently in the firm or department who have performed services for the client since the beginning of the fiscal period under audit whether such services involved substantive attention in the form of legal consultation concerning those loss contingencies referred to in Paragraph 5(a) below but, beyond that, no review has been made of any of the client's transactions or other matters for the purpose of identifying loss contingencies to be described in the response.\**
  - (3) *Response may be Limited to Material Items.* In response to an auditor's request for disclosure of loss contingencies of a client, it is appropriate for the lawyer's response to indicate that the response is limited to items which are considered individually or collectively material to the presentation of the client's financial statements.
  - (4) *Limited Responses.* Where the lawyer is limiting his response in accordance with the Statement of Policy, his response should so indicate (see Paragraph 8). If in any other respect the lawyer is not undertaking to respond to or comment on particular aspects of the inquiry when responding to the auditor, he should consider advising the auditor that his response is limited, in order to avoid any inference that the lawyer has responded to all aspects; otherwise, he may be assuming a responsibility which he does not intend.
  - (5) *Loss Contingencies.* When properly requested by the client, it is appropriate for the lawyer to furnish to the auditor information concerning the following matters if the lawyer has been engaged by the client to represent or advise the client professionally with

---

\* As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

respect thereto and he has devoted substantive attention to them in the form of legal representation or consultation:

- a. *overtly threatened or pending litigation*, whether or not specified by the client;
- b. *a contractually assumed obligation* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor;
- c. *an unasserted possible claim or assessment* which the client has specifically identified and upon which the client has specifically requested, in the inquiry letter or a supplement thereto, comment to the auditor.

With respect to clause (a), overtly threatened litigation means that a potential claimant has manifested to the client an awareness of and present intention to assert a possible claim or assessment unless the likelihood of litigation (or of settlement when litigation would normally be avoided) is considered remote. With respect to clause (c), where there has been no manifestation by a potential claimant of an awareness of and present intention to assert a possible claim or assessment, consistent with the considerations and concerns outlined in the Preamble and Paragraph 1 hereof, the client should request the lawyer to furnish information to the auditor only if the client has determined that it is probable that a possible claim will be asserted, that there is a reasonable possibility that the outcome (assuming such assertion) will be unfavorable, and that the resulting liability would be material to the financial condition of the client. Examples of such situations might (depending in each case upon the particular circumstances) include the following: (i) a catastrophe, accident or other similar physical occurrence in which the client's involvement is open and notorious, or (ii) an investigation by a government agency where enforcement proceedings have been instituted or where the likelihood that they will not be instituted is remote, under circumstances where assertion of one or more private claims for redress would normally be expected, or (iii) a public disclosure by the client acknowledging (and thus focusing attention upon) the existence of one or more probable claims arising out of an event or circumstance. In assessing whether or not the assertion of a possible claim is probable, it is expected that the client would normally employ, by reason of the inherent uncertainties involved and insufficiency of available data, concepts parallel to those used by the lawyer (discussed below) in assessing whether or not an unfavorable outcome is probable; thus, assertion of a possible claim would be considered probable only when the prospects of its being asserted seem reasonably certain (i.e., supported by extrinsic evidence strong enough to establish a presumption that it will happen) and the prospects of nonassertion seem slight.

It would not be appropriate, however, for the lawyer to be requested to furnish information in response to an inquiry letter or supplement thereto if it appears that (a) the client has been required to specify unasserted possible claims without regard to the standard suggested in the preceding paragraph, or (b) the client has been required to specify all or substantially all unasserted possible claims as to which legal advice may have been obtained,

since, in either case, such a request would be in substance a general inquiry and would be inconsistent with the intent of this Statement of Policy.

The information that lawyers may properly give to the auditor concerning the foregoing matters would include (to the extent appropriate) an identification of the proceedings or matter, the stage of proceedings, the claim(s) asserted, and the position taken by the client.

In view of the inherent uncertainties, the lawyer should normally refrain from expressing judgments as to outcome except in those relatively few clear cases where it appears to the lawyer that an unfavorable outcome is either "probable" or "remote"; for purposes of any such judgment it is appropriate to use the following meanings:

- (i) *probable*—an unfavorable outcome for the client is probable if the prospects of the claimant not succeeding are judged to be extremely doubtful and the prospects for success by the client in its defense are judged to be slight.
- (ii) *remote*—an unfavorable outcome is remote if the prospects for the client not succeeding in its defense are judged to be extremely doubtful and the prospects of success by the claimant are judged to be slight.

If, in the opinion of the lawyer, considerations within the province of his professional judgment bear on a particular loss contingency to the degree necessary to make an informed judgment, he may in appropriate circumstances communicate to the auditor his view that an unfavorable outcome is "probable" or "remote," applying the above meanings. No inference should be drawn, from the absence of such a judgment, that the client will not prevail.

The lawyer also may be asked to estimate, in dollar terms, the potential amount of loss or range of loss in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the amount or range of potential loss will normally be as inherently impossible to ascertain, with any degree of certainty, as the outcome of the litigation. Therefore, it is appropriate for the lawyer to provide an estimate of the amount or range of potential loss (if the outcome should be unfavorable) only if he believes that the probability of inaccuracy of the estimate of the amount or range of potential loss is slight.

The considerations bearing upon the difficulty in estimating loss (or range of loss) where pending litigation is concerned are obviously even more compelling in the case of unasserted possible claims. In most cases, the lawyer will not be able to provide any such estimate to the auditor.

As indicated in Paragraph 4 hereof, the auditor may assume that all loss contingencies specified by the client in the manner specified in clauses (b) and (c) above have received comment in the response, unless otherwise therein indicated. The lawyer should not be asked, nor need the lawyer undertake, to furnish information to the auditor concerning loss contingencies except as contemplated by this Paragraph 5.

- (6) *Lawyer's Professional Responsibility.* Independent of the scope of his response to the auditor's request for information, the lawyer,

depending upon the nature of the matters as to which he is engaged, may have as part of his professional responsibility to his client an obligation to advise the client concerning the need for or advisability of public disclosure of a wide range of events and circumstances. The lawyer has an obligation not knowingly to participate in any violation by the client of the disclosure requirements of the securities laws. In appropriate circumstances, the lawyer also may be required under the Code of Professional Responsibility to resign his engagement if his advice concerning disclosures is disregarded by the client. The auditor may properly assume that whenever, in the course of performing legal services for the client with respect to a matter recognized to involve an unasserted possible claim or assessment which may call for financial statement disclosure, the lawyer has formed a professional conclusion that the client must disclose or consider disclosure concerning such possible claim or assessment, the lawyer, as a matter of professional responsibility to the client, will so advise the client and will consult with the client concerning the question of such disclosure and the applicable requirements<sup>†</sup> of FAS 5.

- (7) *Limitation on Use of Response.* Unless otherwise stated in the lawyer's response, it shall be solely for the auditor's information in connection with his audit of the financial condition of the client and is not to be quoted in whole or in part or otherwise referred to in any financial statements of the client or related documents, nor is it to be filed with any governmental agency or other person, without the lawyer's prior written consent.<sup>‡</sup> Notwithstanding such limitation, the response can properly be furnished to others in compliance with court process or when necessary in order to defend the auditor against a challenge of the audit by the client or a regulatory agency, provided that the lawyer is given written notice of the circumstances at least twenty days before the response is so to be furnished to others, or as long in advance as possible if the situation does not permit such period of notice.<sup>‡</sup>
- (8) *General.* This Statement of Policy, together with the accompanying Commentary (which is an integral part hereof), has been developed for the general guidance of the legal profession. In a particular case, the lawyer may elect to supplement or modify the approach hereby set forth. If desired, this Statement of Policy may be incorporated by reference in the lawyer's response by the following statement: "This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any 'loss contingencies' is qualified

---

<sup>†</sup> Under FAS 5, when there has been no manifestation by a potential claimant of an awareness of a possible claim or assessment, disclosure of an unasserted possible claim is required only if the enterprise concludes that (i) it is probable that a claim will be asserted, (ii) there is a reasonable possibility, if the claim is in fact asserted, that the outcome will be unfavorable, and (iii) the liability resulting from such unfavorable outcome would be material to its financial condition.

<sup>‡</sup> As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

<sup>‡</sup> As contemplated by Paragraph 8 of this Statement of Policy, this sentence is intended to be the subject of incorporation by reference as therein provided.

in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement)."

*The accompanying Commentary is an integral part of this Statement of Policy.*

## Commentary

### Paragraph 1 (Client Consent to Response)

In responding to any aspect of an auditor's inquiry letter, the lawyer must be guided by his ethical obligations as set forth in the Code of Professional Responsibility. Under Canon 4 of the Code of Professional Responsibility a lawyer is enjoined to preserve the client's confidences (defined as information protected by the attorney-client privilege under applicable law) and the client's secrets (defined as other information gained in the professional relationship that the client has requested be held inviolate or the disclosure of which would be embarrassing or would be likely to be detrimental to the client). The observance of this ethical obligation, in the context of public policy, ". . . not only facilitates the full development of facts essential to proper representation of the client but also encourages laymen to seek early legal assistance." (Ethical Consideration 4-1).

The lawyer's ethical obligation therefore includes a much broader range of information than that protected by the attorney-client privilege. As stated in Ethical Consideration 4-4: "The attorney-client privilege is more limited than the ethical obligation of a lawyer to guard the confidences and secrets of his client. This ethical precept, unlike the evidentiary privilege, exists without regard to the nature or source of information or the fact that others share the knowledge."

In recognition of this ethical obligation, the lawyer should be careful to disclose fully to his client any confidence, secret or evaluation that is to be revealed to another, including the client's auditor, and to satisfy himself that the officer or agent of a corporate client consenting to the disclosure understands the legal consequences thereof and has authority to provide the required consent.

The law in the area of attorney-client privilege and the impact of statements made in letters to auditors upon that privilege has not yet been developed. Based upon cases treating the attorney-client privilege in other contexts, however, certain generalizations can be made with respect to the possible impact of statements in letters to auditors.

It is now generally accepted that a corporation may claim the attorney-client privilege. Whether the privilege extends beyond the control group of the corporation (a concept found in the existing decisional authority), and if so, how far, is yet unresolved.

If a client discloses to a third party a part of any privileged communication he has made to his attorney, there may have been a waiver as to the whole communication; further, it has been suggested that giving accountants *access* to privileged statements made to attorneys may waive any privilege as to those statements. Any disclosure of privileged communications relating to a particular subject matter may have the effect of waiving the privilege on other communications with respect to the same subject matter.

To the extent that the lawyer's knowledge of unasserted possible claims is obtained by means of confidential communications from the client, any disclosure thereof might constitute a waiver as fully as if the communication related to pending claims.

A further difficulty arises with respect to requests for evaluation of either pending or unasserted possible claims. It might be argued that any evaluation of a claim, to the extent based upon a confidential communication with the client, waives any privilege with respect to that claim.

Another danger inherent in a lawyer's placing a value on a claim, or estimating the likely result, is that such a statement might be treated as an admission or might be otherwise prejudicial to the client.

The Statement of Policy has been prepared in the expectation that judicial development of the law in the foregoing areas will be such that useful communication between lawyers and auditors in the manner envisaged in the Statement will not prove prejudicial to clients engaged in or threatened with adversary proceedings. If developments occur contrary to this expectation, appropriate review and revision of the Statement of Policy may be necessary.

## Paragraph 2 (Limitation on Scope of Response)

In furnishing information to an auditor, the lawyer can properly limit himself to loss contingencies which he is handling on a substantive basis for the client in the form of legal consultation (advice and other attention to matters not in litigation by the lawyer in his professional capacity) or legal representation (counsel of record or other direct professional responsibility for a matter in litigation). Some auditors' inquiries go further and ask for information on matters of which the lawyer "has knowledge." Lawyers are concerned that such a broad request may be deemed to include information coming from a variety of sources including social contact and thirdparty contacts as well as professional engagement and that the lawyer might be criticized or subjected to liability if some of this information is forgotten at the time of the auditor's request.

It is also believed appropriate to recognize that the lawyer will not necessarily have been authorized to investigate, or have investigated, all legal problems of the client, even when on notice of some facts which might conceivably constitute a legal problem upon exploration and development. Thus, consideration in the form of preliminary or passing advice, or regarding an incomplete or hypothetical state of facts, or where the lawyer has not been requested to give studied attention to the matter in question, would not come within the concept of "substantive attention" and would therefore be excluded. Similarly excluded are matters which may have been mentioned by the client but which are not actually being handled by the lawyer. Paragraph 2 undertakes to deal with these concerns.

Paragraph 2 is also intended to recognize the principle that the appropriate lawyer to respond as to a particular loss contingency is the lawyer having charge of the matter for the client (e.g., the lawyer representing the client in a litigation matter and/or the lawyer having overall charge and supervision of the matter), and that the lawyer not having that kind of role with respect to the matter should not be expected to respond merely because of having become aware of its existence in a general or incidental way.

The internal procedures to be followed by a law firm or law department may vary based on factors such as the scope of the lawyer's engagement and the complexity and magnitude of the client's affairs. Such procedures could, but need not, include use of a docket system to record litigation, consultation with lawyers in the firm or department having principal responsibility for the client's affairs or other procedures which, in light of the cost to the client, are not disproportionate to the anticipated benefit to be derived. Although these procedures may not necessarily identify all matters relevant to the response, the

evolution and application of the lawyer's customary procedures should constitute a reasonable basis for the lawyer's response.

As the lawyer's response is limited to matters involving his professional engagement as counsel, such response should not include information concerning the client which the lawyer receives in another role. In particular, a lawyer who is also a director or officer of the client would not include information which he received as a director or officer unless the information was also received (or, absent the dual role, would in the normal course be received) in his capacity as legal counsel in the context of his professional engagement. Where the auditor's request for information is addressed to a law firm as a firm, the law firm may properly assume that its response is not expected to include any information which may have been communicated to the particular individual by reason of his serving in the capacity of director or officer of the client. The question of the individual's duty, in his role as a director or officer, is not here addressed.

### **Paragraph 3 (Response May Cover only Material Items in Certain Cases)**

Paragraph 3 makes it clear that the lawyer may optionally limit his responses to those items which are individually or collectively material to the auditor's inquiry. If the lawyer takes responsibility for making a determination that a matter is not material for the purposes of his response to the audit inquiry, he should make it clear that his response is so limited. The auditor, in such circumstance, should properly be entitled to rely upon the lawyer's response as providing him with the necessary corroboration. It should be emphasized that the employment of inside general counsel by the client should not detract from the acceptability of his response since inside general counsel is as fully bound by the professional obligations and responsibilities contained in the Code of Professional Responsibility as outside counsel. If the audit inquiry sets forth a definition of materiality but the lawyer utilizes a different test of materiality, he should specifically so state. The lawyer may wish to reach an understanding with the auditor concerning the test of materiality to be used in his response, but he need not do so if he assumes responsibility for the criteria used in making materiality determinations. Any such understanding with the auditor should be referred to or set forth in the lawyer's response. In this connection, it is assumed that the test of materiality so agreed upon would not be so low in amount as to result in a disservice to the client and an unreasonable burden on counsel.

### **Paragraph 4 (Limited Responses)**

The Statement of Policy is designed to recognize the obligation of the auditor to complete the procedures considered necessary to satisfy himself as to the fair presentation of the company's financial condition and results, in order to render a report which includes an opinion not qualified because of a limitation on the scope of the audit. In this connection, reference is made to SEC Accounting Series Release No. 90 [Financial Reporting Release No. 1, section 607.01(b)], in which it is stated:

"A 'subject to' or 'except for' opinion paragraph in which these phrases refer to the scope of the audit, indicating that the accountant has not been able to satisfy himself on some significant element in the financial statements, is not acceptable in certificates filed with the Commission in connection with the public offering of securities. The 'subject to' qualification is appropriate when the reference is to a middle paragraph or to footnotes explaining the status of matters which cannot be resolved at statement date."

## Paragraph 5 (Loss Contingencies)

Paragraph 5 of the Statement of Policy summarizes the categories of "loss contingencies" about which the lawyer may furnish information to the auditor. The term loss contingencies and the categories relate to concepts of accounting accrual and disclosure specified for the accounting profession in Statement of Financial Accounting Standards No. 5 ("FAS 5") issued by the Financial Accounting Standards Board in March, 1975.

### 5.1 Accounting Requirements

To understand the significance of the auditor's inquiry and the implications of any response the lawyer may give, the lawyer should be aware of the following accounting concepts and requirements set out in FAS 5:<sup>11</sup>

- (a) A "loss contingency" is an existing condition, situation or set of circumstances involving uncertainty as to possible loss to an enterprise that will ultimately be resolved when one or more events occur or fail to occur. Resolutions of the uncertainty may confirm the loss or impairment of an asset or the incurrence of a liability.

(Para. 1)

- (b) When a "loss contingency" exists, the likelihood that a future event or events will confirm the loss or impairment of an asset or the incurrence of a liability can range from probable to remote. There are three areas within that range, defined as follows:
  - (i) *Probable*—"The future event or events are likely to occur."
  - (ii) *Reasonably possible*—"The chance of the future event or events occurring is more than remote but less than likely."
  - (iii) *Remote*—"The chance of the future event or events occurring is slight."

(Para. 3)

- (c) *Accrual* in a client's financial statements by a charge to income of the period will be required if *both* the following conditions are met:
  - (i) "Information available prior to issuance of the financial statements indicates that it is *probable* that an asset had been impaired or a liability had been incurred at the date of the financial statements. It is implicit in this condition that it must be *probable* that one or more future events will occur confirming the fact of the loss." (emphasis added; footnote omitted)
  - (ii) "The amount of loss can be reasonably estimated."

(Para. 8)

- (d) *If there is no accrual* of the loss contingency in the client's financial statements because one of the two conditions outlined in (c) above are not met, *disclosure* may be required as provided in the following:
 

"If no accrual is made for a loss contingency because one or both of the conditions in paragraph 8 are not met, or if an exposure to loss exists in excess of the amount accrued pursuant to the provisions of paragraph 8, *disclosure* of

---

<sup>11</sup> Citations are to paragraph numbers of FAS 5.

the contingency *shall be made when there is at least a reasonable possibility* that a loss or an additional loss may have been incurred. *The disclosure shall indicate the nature of the contingency and shall give an estimate of the possible loss or range of loss or state that such an estimate cannot be made. Disclosure is not required of a loss contingency involving an unasserted claim or assessment when there has been no manifestation by potential claimant of an awareness of a possible claim or assessment unless it is considered probable that a claim will be asserted and there is a reasonable possibility that the outcome will be unfavorable.*" (emphasis added; footnote omitted)

(Para. 10)

- (e) The accounting requirements recognize or specify that (i) the opinions or views of counsel are not the sole source of evidential matter in making determinations about the accounting recognition or treatment to be given to litigation, and (ii) the fact that the lawyer is notable to express an opinion that the outcome will be favorable does not necessarily require an accrual of a loss. Paragraphs 36 and 37 of FAS 5 state as follows:

"If the underlying cause of the litigation, claim, or assessment is an event occurring before the date of an enterprise's financial statements, the probability of an outcome unfavorable to the enterprise must be assessed to determine whether the condition in paragraph 8(a) is met. Among the factors that should be considered are the nature of the litigation, claim, or assessment, the progress of the case (including progress after the date of the financial statements but before those statements are issued), the opinions or views of legal counsel and other advisers, the experience of the enterprise in similar cases, the experience of other enterprises, and any decision of the enterprise's management as to how the enterprise intends to respond to the lawsuit, claim, or assessment (for example, a decision to contest the case vigorously or a decision to seek an out-of-court settlement). The fact that legal counsel is unable to express an opinion that the outcome will be favorable to the enterprise should not necessarily be interpreted to mean that the condition for accrual of a loss in paragraph 8(a) is met.

"The filing of a suit or formal assertion of a claim or assessment does not automatically indicate that accrual of a loss may be appropriate. The degree of probability of an unfavorable outcome must be assessed. The condition for accrual in paragraph 8(a) would be met if an unfavorable outcome is determined to be probable. If an unfavorable outcome is determined to be reasonably possible but not probable, or if the amount of loss cannot be reasonably estimated, accrual would be inappropriate, but disclosure would be required by paragraph 10 of this Statement."

- (f) Paragraph 38 of FAS 5 focuses on certain examples concerning the determination by the enterprise whether an assertion of an unasserted possible claim may be considered probable:

"With respect to unasserted claims and assessments, an enterprise must determine the degree of probability that a suit may be filed or a claim or assessment may be asserted and the possibility of an unfavorable outcome. For example, a catastrophe, accident, or other similar physical occurrence predictably engenders claims for redress, and in such circumstances their assertion may be probable; similarly, an investigation of an enterprise by a governmental agency, if enforcement proceedings have been or are likely to be instituted, is often followed by private claims for redress, and the probability of their assertion and the possibility of loss should be considered in each case. By way of further example, an enterprise may believe there is a possibility that it has infringed on another enterprise's patent rights, but the enterprise owning the patent rights has not indicated an intention to take any action and has not even indicated an awareness of the possible infringement. In that case, a judgment must first be made as to whether the assertion of a claim is probable. If the judgment is that assertion is not probable, no accrual or disclosure would be required. On the other hand, if the judgment is that assertion is probable, then a second judgment must be made as to the degree of probability of an unfavorable outcome. If an unfavorable outcome is probable and the amount of loss can be reasonably estimated, accrual of a loss is required by paragraph 8. If an unfavorable outcome is probable but the amount of loss cannot be reasonably estimated, accrual would not be appropriate, but disclosure would be required by paragraph 10. If an unfavorable outcome is reasonably possible but not probable, disclosure would be required by paragraph 10."

For a more complete presentation of FAS 5, reference is made to Exhibit I, section 337B, in which are set forth excerpts selected by the AICPA as relevant to a Statement on Auditing Standards, issued by its Auditing Standards Executive Committee, captioned "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments."

### *5.2 Lawyer's Response*

Concepts of probability inherent in the usage of terms like "probable" or "reasonably possible" or "remote" mean different things in different contexts. Generally, the outcome of, or the loss which may result from, litigation cannot be assessed in any way that is comparable to a statistically or empirically determined concept of "probability" that may be applicable when determining such matters as reserves for warranty obligations or accounts receivable or loan losses when there is a large number of transactions and a substantial body of known historical experience for the enterprise or comparable enterprises. While lawyers are accustomed to counseling clients during the progress of litigation as to the possible amount required for settlement purposes, the estimated risks of the proceedings at particular times and the possible application or establishment of points of law that may be relevant, such advice to the client is not possible at many stages of the litigation and may change dramatically depending upon the development of the proceedings. Lawyers do not generally quantify for clients the "odds" in numerical terms; if they do, the quantification is generally only undertaken in an effort to make meaningful, for limited purposes, a whole host of judgmental factors applicable at a particular time, without any intention to

depict "probability" in any statistical, scientific or empirically-grounded sense. Thus, for example, statements that litigation is being defended vigorously and that the client has meritorious defenses do not, and do not purport to, make a statement about the probability of outcome in any measurable sense.

Likewise, the "amount" of loss—that is, the total of costs and damages that ultimately might be assessed against a client—will, in most litigation, be a subject of wide possible variance at most stages; it is the rare case where the amount is precise and where the question is whether the client against which claim is made is liable either for all of it or none of it.

In light of the foregoing considerations, it must be concluded that, as a general rule, it should not be anticipated that meaningful quantifications of "probability" of outcome or amount of damages can be given by lawyers in assessing litigation. To provide content to the definitions set forth in Paragraph 5 of the Statement of Policy, this Commentary amplifies the meanings of the terms under discussion, as follows:

*"probable"*—An unfavorable outcome is normally "probable" if, but only if, investigation, preparation (including development of the factual data and legal research) and progress of the matter have reached a stage where a judgment can be made, taking all relevant factors into account which may affect the outcome, that it is extremely doubtful that the client will prevail.

*"remote"*—The prospect for an unfavorable outcome appears, at the time, to be slight; i.e., it is extremely doubtful that the client will not prevail. Normally, this would entail the ability to make an unqualified judgment, taking into account all relevant factors which may affect the outcome, that the client may confidently expect to prevail on a motion for summary judgment on all issues due to the clarity of the facts and the law.

In other words, for purposes of the lawyer's response to the request to advise auditors about litigation, an unfavorable outcome will be "probable" only if the chances of the client prevailing appear slight and of the claimant losing appear extremely doubtful; it will be "remote" when the client's chances of losing appear slight and of not winning appear extremely doubtful. It is, therefore, to be anticipated that, in most situations, an unfavorable outcome will be neither "probable" nor "remote" as defined in the Statement of Policy.

The discussion above about the very limited basis for furnishing judgments about the outcome of litigation applies with even more force to a judgment concerning whether or not the assertion of a claim not yet asserted is "probable." That judgment will infrequently be one within the professional competence of lawyers and therefore the lawyer should not undertake such assessment except where such judgment may become meaningful because of the presence of special circumstances, such as catastrophes, investigations and previous public disclosure as cited in Paragraph 5 of the Statement of Policy, or similar extrinsic evidence relevant to such assessment. Moreover, it is unlikely, absent relevant extrinsic evidence, that the client or anyone else will be in a position to make an informed judgment that assertion of a possible claim is "probable" as opposed to "reasonably possible" (in which event disclosure is not required). In light of the legitimate concern that the public interest would not be well served by resolving uncertainties in a way that invites the assertion of claims or otherwise causes unnecessary harm to the client and its stockholders, a decision to treat an unasserted claim as "probable" of assertion should be based only upon compelling judgment.

Consistent with these limitations believed appropriate for the lawyer, he should not represent to the auditor, nor should any inference from his response be drawn, that the unasserted possible claims identified by the client (as

contemplated by Paragraph 5(c) of the Statement of Policy) represent all such claims of which the lawyer may be aware or that he necessarily concurs in his client's determination of which unasserted possible claims warrant specification by the client; within proper limits, this determination is one which the client is entitled to make—and should make—and it would be inconsistent with his professional obligations for the lawyer to volunteer information arising from his confidential relationship with his client.

As indicated in Paragraph 5, the lawyer also may be asked to estimate the potential loss (or range) in the event that an unfavorable outcome is not viewed to be "remote." In such a case, the lawyer would provide an estimate only if he believes that the probability of inaccuracy of the estimate of the range or amount is slight. What is meant here is that the estimate of amount of loss presents the same difficulty as assessment of outcome and that the same formulation of "probability" should be used with respect to the determination of estimated loss amounts as should be used with respect to estimating the outcome of the matter.

In special circumstances, with the proper consent of the client, the lawyer may be better able to provide the auditor with information concerning loss contingencies through conferences where there is opportunity for more detailed discussion and interchange. However, the principles set forth in the Statement of Policy and this Commentary are fully applicable to such conferences.

Subsumed throughout this discussion is the ongoing responsibility of the lawyer to assist his client, at the client's request, in complying with the requirements of FAS 5 to the extent such assistance falls within his professional competence. This will continue to involve, to the extent appropriate, privileged discussions with the client to provide a better basis on which the client can make accrual and disclosure determinations in respect of its financial statements.

In addition to the considerations discussed above with respect to the making of any judgment or estimate by the lawyer in his response to the auditor, including with respect to a matter specifically identified by the client, the lawyer should also bear in mind the risk that the furnishing of such a judgment or estimate to any one other than the client might constitute an admission or be otherwise prejudicial to the client's position in its defense against such litigation or claim (see Paragraph 1 of the Statement of Policy and of this Commentary).

## **Paragraph 6 (Lawyer's Professional Responsibility)**

The client must satisfy whatever duties it has relative to timely disclosure, including appropriate disclosure concerning material loss contingencies, and, to the extent such matters are given substantive attention in the form of legal consultation, the lawyer, when his engagement is to advise his client concerning a disclosure obligation, has a responsibility to advise his client concerning its obligations in this regard. Although lawyers who normally confine themselves to a legal specialty such as tax, antitrust, patent or admiralty law, unlike lawyers consulted about SEC or general corporate matters, would not be expected to advise generally concerning the client's disclosure obligations in respect of a matter on which the lawyer is working, the legal specialist should counsel his client with respect to the client's obligations under FAS 5 to the extent contemplated herein. Without regard to legal specialty, the lawyer should be mindful of his professional responsibility to the client described in Paragraph 6 of the Statement of Policy concerning disclosure.

The lawyer's responsibilities with respect to his client's disclosure obligations have been a subject of considerable discussion and there may be, in due course, clarification and further guidance in this regard. In any event, where in the

lawyer's view it is clear that (i) the matter is of material importance and seriousness, and (ii) there can be no reasonable doubt that its non-disclosure in the client's financial statements would be a violation of law giving rise to material claims, rejection by the client of his advice to call the matter to the attention of the auditor would almost certainly require the lawyer's withdrawal from employment in accordance with the Code of Professional Responsibility. (See, e.g., Disciplinary Rule 7-102 (A)(3) and (7), and Disciplinary Rule 2-110 (B)(2).) Withdrawal under such circumstances is obviously undesirable and might present serious problems for the client. Accordingly, in the context of financial accounting and reporting for loss contingencies arising from unasserted claims, the standards for which are contained in FAS 5, clients should be urged to disclose to the auditor information concerning an unasserted possible claim or assessment (not otherwise specifically identified by the client) where in the course of the services performed for the client it has become clear to the lawyer that (i) the client has no reasonable basis to conclude that assertion of the claim is not probable (employing the concepts hereby enunciated) and (ii) given the probability of assertion, disclosure of the loss contingency in the client's financial statements is beyond reasonable dispute required.

### **Paragraph 7 (Limitation on Use of Response)**

Some inquiry letters make specific reference to, and one might infer from others, an intention to quote verbatim or include the substance of the lawyer's reply in footnotes to the client's financial statements. Because the client's prospects in pending litigation may shift as a result of interim developments, and because the lawyer should have an opportunity, if quotation is to be made, to review the footnote in full, it would seem prudent to limit the use of the lawyer's reply letter. Paragraph 7 sets out such a limitation.

Paragraph 7 also recognizes that it may be in the client's interest to protect information contained in the lawyer's response to the auditor, if and to the extent possible, against unnecessary further disclosure or use beyond its intended purpose of informing the auditor. For example, the response may contain information which could prejudice efforts to negotiate a favorable settlement of a pending litigation described in the response. The requirement of consent to further disclosure, or of reasonable advance notice where disclosure may be required by court process or necessary in defense of the audit, is designed to give the lawyer an opportunity to consult with the client as to whether consent should be refused or limited or, in the case of legal process or the auditor's defense of the audit, as to whether steps can and should be taken to challenge the necessity of further disclosure or to seek protective measures in connection therewith. It is believed that the suggested standard of twenty days advance notice would normally be a minimum reasonable time for this purpose.

### **Paragraph 8 (General)**

It is reasonable to assume that the Statement of Policy will receive wide distribution and will be readily available to the accounting profession. Specifically, the Statement of Policy has been reprinted as Exhibit II to the Statement on Auditing Standards, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments," issued by the Auditing Standards Executive Committee of the American Institute of Certified Public Accountants. Accordingly, the mechanic for its incorporation by reference will facilitate lawyer-auditor communication. The incorporation is intended to include not only limitations, such as those provided by Paragraphs 2 and 7 of the Statement of Policy, but also the explanatory material set forth in this Commentary.

## Annex A

[Illustrative forms of letters for full response by outside practitioner or law firm and inside general counsel to the auditor's inquiry letter. These illustrative forms, which are not part of the Statement of Policy, have been prepared by the Committee on Audit Inquiry Responses solely in order to assist those who may wish to have, for reference purposes, a form of response which incorporates the principles of the Statement of Policy and accompanying Commentary. Other forms of response letters will be appropriate depending on the circumstances.]

*Illustrative form of letter for use by outside practitioner or law firm:*

[Name and Address of Accounting Firm]

Re: [Name of Client] [and Subsidiaries]

Dear Sirs:

By letter date *[insert date of request]* Mr. *[insert name and title of officer signing request]* of *[insert name of client]* [(the "Company") or (together with its subsidiaries, the "Company")] has requested us to furnish you with certain information in connection with your examination of the accounts of the Company as at *[insert fiscal year-end]*.

[Insert description of the scope of the lawyer's engagement; the following are sample descriptions:]

While this firm represents the Company on a regular basis, our engagement has been limited to specific matters as to which we were consulted by the Company.

[or]

We call your attention to the fact that this firm has during the past year represented the Company only in connection with certain *[Federal income tax matters]* *[litigation]* *[real estate transactions]* *[describe other specific matters, as appropriate]* and has not been engaged for any other purpose.

Subject to the foregoing and to the last paragraph of this letter, we advise you that since *[insert date of beginning of fiscal period under audit]* we have not been engaged to give substantive attention to, or represent the Company in connection with, *[material]*<sup>†</sup> loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[Describe litigation and claims which fit the foregoing criteria.]

[If the inquiry letter requests information concerning specified unasserted possible claims or assessments and/or contractually assumed obligations:]

With respect to the matters specifically identified in the Company's letter and upon which comment has been specifically requested, as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, we advise you, subject to the last paragraph of this letter, as follows:

[Insert information as appropriate]

The information set forth herein is [as of the date of this letter] [as of *[insert date]*], the date on which we commenced our internal review procedures for purposes of preparing this response], except as otherwise noted, and we disclaim any undertaking to advise you of changes which thereafter may be brought to our attention.

---

<sup>†</sup> **Note:** See Paragraph 3 of the Statement of Policy and the accompanying Commentary for guidance where the response is limited to material items.

[Insert information with respect to outstanding bills for services and disbursements.]

This response is limited by, and in accordance with, the ABA Statement of Policy Regarding Lawyers' Responses to Auditors' Requests for Information (December 1975); without limiting the generality of the foregoing, the limitations set forth in such Statement on the scope and use of this response (Paragraphs 2 and 7) are specifically incorporated herein by reference, and any description herein of any "loss contingencies" is qualified in its entirety by Paragraph 5 of the Statement and the accompanying Commentary (which is an integral part of the Statement). Consistent with the last sentence of Paragraph 6 of the ABA Statement of Policy and pursuant to the Company's request, this will confirm as correct the Company's understanding as set forth in its audit inquiry letter to us that whenever, in the course of performing legal services for the Company with respect to a matter recognized to involve an unasserted possible claim or assessment that may call for financial statement disclosure, we have formed a professional conclusion that the Company must disclose or consider disclosure concerning such possible claim or assessment, we, as a matter of professional responsibility to the Company, will so advise the Company and will consult with the Company concerning the question of such disclosure and the applicable requirements of Statement of Financial Accounting Standards No. 5. [Describe any other or additional limitation as indicated by Paragraph 4 of the Statement]

Very truly yours,

*Illustrative form of letter for use by inside general counsel:*

[Name and Address of Accounting Firm]

Re: [Name of Company] [and Subsidiaries]

Dear Sirs:

As General Counsel\*\* of [insert name of client] [(the "Company")] [(together with its subsidiaries, the "Company")], I advise you as follows in connection with your examination of the accounts of the Company as at [insert fiscal year-end].

I call your attention to the fact that as General Counsel\*\* for the Company I have general supervision of the Company's legal affairs. [If the general legal supervisory responsibilities of the person signing the letter are limited, set forth here a clear description of those legal matters over which such person exercises general supervision, indicating exceptions to such supervision and situations where primary reliance should be placed on other sources.] In such capacity, I have reviewed litigation and claims threatened or asserted involving the Company and have consulted with outside legal counsel with respect thereto where I have deemed appropriate.

Subject to the foregoing and to the last paragraph of this letter, I advise you that since [insert date of beginning of fiscal period under audit] neither I, nor any of the lawyers over whom I exercise general legal supervision, have given substantive attention to, or represented the Company in connection with, [material]\*\* loss contingencies coming within the scope of clause (a) of Paragraph 5 of the Statement of Policy referred to in the last paragraph of this letter, except as follows:

[Describe litigation and claims which fit the foregoing criteria.]

---

\*\* It may be appropriate in some cases for the response to be given by inside counsel other than inside general counsel in which event this letter should be appropriately modified.

†† **Note:** See Paragraph 3 of the Statement of Policy and the accompanying Commentary for guidance where the response is limited to material items.

[If information concerning specified unasserted possible claims or assessments and/or contractually assumed obligations is to be supplied:]

With respect to matters which have been specifically identified as contemplated by clauses (b) or (c) of Paragraph 5 of the ABA Statement of Policy, I advise you, subject to the last paragraph of this letter, as follows:

[Insert information as appropriate]

The information set forth herein is [as of the date of this letter] as of [*insert date*], the date on which we commenced our internal review procedures for purposes of preparing this response], except as otherwise noted, and I disclaim any undertaking to advise you of changes which thereafter may be brought to my attention or to the attention of the lawyers over whom I exercise general legal supervision.
