

# POSTILLA

Published from 1950 to 2004, the short papers of the *Postilla* series reported on original research by the Yale Peabody Museum of Natural History's curators, staff, and research associates, and their colleagues, in the natural science disciplines represented by the collections of the Museum's curatorial divisions.

The *Postilla* series, which ceased publication with Number 232 (2004), was incorporated into the journal *Bulletin of the Peabody Museum of Natural History*, available from BioOne Complete at <https://bioone.org/>.

Yale Peabody Museum scholarly publications are archived through EliScholar, a digital platform for scholarly publishing provided by Yale University Library at <https://elischolar.library.yale.edu/>.

Published at irregular but frequent intervals since 1950, *Postilla* presents short papers based on original scientific research by Yale Peabody Museum staff and research associates, and their colleagues, in the natural science disciplines represented by the collections of the Yale Peabody Museum's curatorial divisions.

All manuscript submissions are sent out for external peer review by one or more referees, as well as being reviewed internally at the Peabody Museum by the Executive Editor in consultation with the Curatorial Editor-in-Chief and one or more members of the appropriate curatorial division. Interested authors should contact the Executive Editor at the address below before submitting manuscripts.

Other titles published by the Yale Peabody Museum are the *Bulletin of the Peabody Museum of Natural History* and the *Yale University Publications in Anthropology*. A complete list of titles, availability and ordering information as well as submission guidelines for contributors can be obtained from the Yale Peabody Museum website at <http://www.peabody.yale.edu/publications/> or requested from the Publications Office at the address below.

**A Type Catalog of Fossil Invertebrates  
(Mollusca: Actinoceratoidea,  
Bactritoidea, Endoceratoidea and  
Nautiloidea) in the Yale Peabody Museum**

**Russell D. White and Laura K. Skorina**

*(Received 9 June 1998)*

**Abstract**

Type material for 220 nominal species of fossil actinoceratoids, bactritoids, endoceratoids and nautiloids are in the Invertebrate Paleontology Collections of Yale University's Peabody Museum of Natural History. Primary types for 158 nominal species include 133 holotypes, 64 syntypes (representing 18 nominal species), one lectotype and two neotypes. Secondary types for 22 nominal species include 90 paratypes. Tertiary types of 98 nominal species include 159 hypotypes. Most types are from Coahuila (Mexico), Newfoundland, New York State and Quebec and have been described by R.H. Flower, A.F. Foerste, J. Hall and A.K. Miller.

**Key Words**

Type Catalog, Actinoceratoidea, Bactritoidea, Endoceratoidea, Nautiloidea, Yale Peabody Museum, Coahuila (Mexico), Newfoundland, New York State, Quebec, R.H. Flower, A.F. Foerste, J. Hall, A.K. Miller.

**Introduction**

This catalog lists all known fossil actinoceratoids, bactritoids, endoceratoids and nautiloid types in the Invertebrate Paleontology Collections housed in Yale University's Peabody Museum of Natural History. This is the tenth in a series of type catalogs of fossil invertebrates and is a product of an ongoing computerization project to improve the accessibility of the type collections.

Fourteen type specimens are missing and cannot be located. The collections have been thoroughly searched by the curatorial staff in the 1960s and 1990s and it is believed that these specimens are permanently lost. Missing specimens are indicated with a footnote, and any information on their whereabouts would be greatly appreciated.

**Organization**

Specimens are listed under the originally described binomen; genera and species within genera are indexed alphabetically. Each entry includes the catalog number used by the Division of Invertebrate Paleontology prefixed with the abbreviation YPM and the type status of the original designation, followed by all known references to that name. Any subsequent designations are listed under the original designation and are cross-referenced in the body of the text. Locality descriptions follow each entry or set of entries for each binomen. Errors and inconsistencies are footnoted at the bottom of each binomen.

The type designations used are holotype, syntype, lectotype and neotype for name bearers; paratype for secondary types; hypotype is used for all tertiary types. Name bearers and secondary types are defined as used in the *International Code of Zoological Nomenclature* (ICZN 1985). Tertiary types or hypotypes are treated here as any specimens used in an original species description but not explicitly designated primary or secondary types, any described, figured or measured specimen used in a publication to augment the knowledge of a previously defined species, or any referenced specimen that cannot be placed unequivocally in a known species (e.g., *Armenoceras* sp.).

Locality descriptions follow each entry or set of entries with identical locality data. The locality information includes the stratigraphy, geography, collector and date. Stratigraphy has been standardized using *Stratigraphic Nomenclature Databases for the United States, its Possessions and Territories* (MacLachlan et al. 1992).

HYPOTYPE YPM 3840

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.284.

Ordovician, English Head Fm, English Head zone 4. Carleton Point, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1909.

***Spyroceras anticostiense* Foerste**

HOLOTYPE YPM 20502

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.277, pl.37, f.4.<sup>a</sup>

Late Ordovician, English Head Fm, English Head zone 2. Reef at North Cliff, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1919.

<sup>a</sup>Cited as No. 26, Twenhofel Collection.***Spyroceras chaleurensense* Foerste**

HOLOTYPE YPM 12761

Foerste, A.F. 1936a. Bull. Denison Univ. Sci. Lab. v.31, p.42, pl.6, f.5a,5b.

Northrop, S.A. 1939. Geol. Soc. Am. Spec. Pap. 21, p.221.

Middle Silurian, Niagaran, West Point Fm. Along crest of ridge, Reddish Point, Quebec, Canada. Collector: Northrop, S.A., 1927.

***Spyroceras chicottense* Foerste**

HOLOTYPE YPM 20504

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.276, pl.34, f.4.<sup>a</sup>

Early Silurian, Chicotte Fm, Chicotte zone 2. Southwest Point, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1919.

<sup>a</sup>Cited as No. 29, Twenhofel Collection.

***Spyroceras crocus* (Billings)**

HYPOTYPE YPM 3834

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.278.

Ordovician, English Head Fm, English Head zone 4. Carleton Point, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1909.

***Spyroceras ferum* (Billings)**

HYPOTYPE YPM 20518

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.278.<sup>a</sup>

Late Ordovician, Vaureal Fm, Vaureal zone 4. Battery Point, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1919.

<sup>a</sup>Cited as No. 30, Twenhofel Collection.

***Spyroceras magnosiphonatum* Foerste**

SYNTYPE YPM 20521

Foerste, A.F. 1938. Geol. Soc. Am. Spec. Pap. 11, p.95, pl.19, f.2.<sup>a</sup>

Middle Ordovician, Mingan Fm. Ammonite and Clearwater Points, E of Sea Cow Island, Mingan Islands area, Gulf of St. Lawrence, Quebec, Canada. Collector: Twenhofel, W.H.

<sup>a</sup>Cited as Twenhofel Collection.

***Spyroceras maro* (Billings)**

HYPOTYPE YPM 20489

Foerste, A.F. 1938. Geol. Soc. Am. Spec. Pap. 11, p.93, pl.18, f.4.<sup>a</sup>

Middle Ordovician, Mingan Fm. Clearwater Point, E of Sea Cow Island, Mingan Islands area, Gulf of St. Lawrence, Quebec, Canada. Collector: Twenhofel, W.H.

HYPOTYPE YPM 35904

Foerste, A.F. 1938. Geol. Soc. Am. Spec. Pap. 11, p.93.<sup>a</sup>

HYPOTYPE YPM 75583

Foerste, A.F. 1938. Geol. Soc. Am. Spec. Pap. 11, p.93, pl.20, f.10.

Middle Ordovician, Mingan Fm. 50 to 75 ft above base of formation, Mingan Island, Gulf of St. Lawrence, Quebec, Canada. Collector: Twenhofel, W.H.

<sup>a</sup>Cited as Twenhofel Collection.

***Spyroceras microcancellatum* Foerste**

HOLOTYPE YPM 20479

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.275, pl.31, f.3.<sup>a</sup>

Late Ordovician, Ellis Bay Fm, Ellis Bay zone 1. Junction Cliff, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1919.

<sup>a</sup>Cited as No. 28, Twenhofel Collection.

***Spyroceras microlineatum* Foerste**

HOLOTYPE YPM 3835

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.274.

Late Ordovician, Vaureal Fm, Vaureal zone 3. Cape Henry, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1909.

***Spyroceras northropi* Foerste**

HOLOTYPE YPM 12772

Foerste, A.F. 1936a. Bull. Denison Univ. Sci. Lab. v.31, p.43, pl.6, f.1.

Middle Silurian, Niagaran, Indian Point Fm. Eastern portion (higher in section), shore at Indian Point, Quebec, Canada. Collector: Northrop, S.A., 1927.

***Spyroceras* sp.**

HYPOTYPE YPM 12701

Foerste, A.F. 1936a. Bull. Denison Univ. Sci. Lab. v.31, p.40, pl.6, f.4.<sup>a</sup>

Late Permian, San Andres Limestone. W side of the Penasco River Valley, about 52 mi W of Artesia, on new highway between Artesia and Elk, on the way to Cloudcroft, SE corner sec12T16SR16E, Otero Co., New Mexico, USA. Collector: Baker, R.F.

<sup>a</sup>This is a lot of four fragments.

**undet. *Nautiloidea***

HYPOTYPE YPM 28505

Pannella, G. 1972. Astro. Sp. Sci. v.16, tbl.1.

Early Silurian, Arisaig Grp, Ross Brook Upper Mbr. Dark gray silty mudstone, fall block, 1273-1280 ft above base of Arisaig Grp section, exposed in first prominent seaward projecting cliff W of the mouth of Arisaig Brook along Northumberland Strait shore, Arisaig [datum: 1025 ft for contact of bottom of Ross Brook Upper Mbr with underlying Ross Brook Middle Mbr], Antigonish Co., Nova Scotia, Canada. Collector: Bambach, R.K., 1964 to 1965.

***Uranoceras* (?) sp.**

HYPOTYPE YPM 3862

Foerste, A.F. 1928a. Mem. Can. Geol. Surv. n.154, p.287.

Late Ordovician, Ellis Bay Fm. Raven's West, Anticosti Island, Quebec, Canada. Collector: Twenhofel, W.H., 1909.

***Williamsoceras adnatum* Flower**

PARATYPE YPM 26505

Flower, R.H. 1968. New Mexico Bur. Mines Min. Res. Mem. n.19, pt.2, p.28, pl.19, f.5.

Ordovician, Garden City Fm. 1405 ft above base of Garden City near contact with Swan Peak, most easterly prominent dip slope of Garden City, about 100 ft above road vertically, N side of Green Canyon, 0.3 mi E of Ross locality 46.1A, and about 6384 ft E of Canyon mouth, and about 2.5 mi E of North Logan Logan Quad., N NE sec19T12NR2E, Cache Co., Utah, USA. Collector: Ross, R.J., Jr., 7/1947.

***Winnipegoceras* aff. *W. laticurvatum* (Whiteaves)**

See *Winnipegoceras* sp.

***Winnipegoceras* sp.**

HYPOTYPE YPM 25801

Crickmay, G.W. 1932. Am. J. Sci. v.24, n.143, p.379.<sup>a</sup>

=*Winnipegoceras* aff. *W. laticurvatum* (Whiteaves). HYPOTYPE. Miller, A.K. and W.M. Furnish. 1937. J. Paleont. v.11, n.7, p.551, pl.69, f.1.

Ordovician, Matapedia Series. Dark calcareous phyllite of Matapedia, E shore of Restigouche River, 5 mi upstream from Matapedia Village, Quebec, Canada. Collector: Crickmay, G.W. and Cooper, G.A., 7/29/1929.

<sup>a</sup>Crickmay (1932) reports the locality as "3 miles upstream," but the field label says "5 miles upstream."

---

***Wutinoceras geronticum* Flower**

HOLOTYPE YPM 28354

Flower, R.H. 1976. New Mexico Bur. Mines Min. Res. Mem. n.28, pt.1, p.10, pl.5, f.1.<sup>a</sup>

Middle Ordovician, Table Head Grp. Division 10 or K, lower Table Head, lower Chazy, NE side of Table Head, western Newfoundland, Canada. Collector: Schuchert, C. and Twenhofel, W.H., 8/6/1910.

<sup>a</sup>Not pl.3, f.13, which is actually a paratype of *Wutinoceras giganteum*.

***Wutinoceras giganteum* Flower**

HOLOTYPE YPM 28351

Flower, R.H. 1976. New Mexico Bur. Mines Min. Res. Mem. n.28, pt.1, p.10, pl.2, f.4, pl.3, f.12, pl.5, f.6.

Middle Ordovician, Table Head Grp. Division 10 or K, lower Table Head, lower Chazy, NE side of Table Head, western Newfoundland, Canada. Collector: Schuchert, C. and Twenhofel, W.H., 8/6/1910.

PARATYPE YPM 28352

Flower, R.H. 1976. New Mexico Bur. Mines Min. Res. Mem. n.28, pt.1, p.10, pl.3, f.13, pl.4, f.1,2.<sup>a</sup>

Middle Ordovician, Table Head Grp. Top of zone 10 of Logan's section, a little below the sponge bed, lower Table Head, lower Chazy, from lighthouse eastward along shore, Point Riche, western Newfoundland, Canada. Collector: Schuchert, C. and Twenhofel, W.H., 8/1/1910.

<sup>a</sup>Pl.3, f.13 is not the holotype of *Wutinoceras geronticum* as stated in the explanation; it is actually YPM 28352, a paratype of *Wutinoceras giganteum*.
