Acknowledgments

The Accelerating Impacts of CGIAR Climate Research for Africa (AICCRA) project is supported by a grant from the International Development Association (IDA) of the World Bank. IDA helps the world's poorest countries by providing grants and low to zero-interest loans for projects and programs that boost economic growth, reduce poverty, and improve poor people's lives. IDA is one of the largest sources of assistance for the world's 76 poorest countries, 39 of which are in Africa. Annual IDA commitments have averaged about \$21 billion over circa 2017-2020, with approximately 61 percent going to Africa.

About the authors

Berhanu Belay is a Consultant at the International Center for Agricultural Research in the Dry Areas (ICARDA).

Tesfaye Getachew is Research Management Coordinator at the International Center for Agricultural Research in the Dry Areas (ICARDA).

Aynalem Haile is a Principal Scientist in small ruminant breeding at the International Center for Agricultural Research in the Dry Areas (ICARDA).

Investment by Ethiopian Government Universities to Run Community-based Breeding Programs (CBBPs) in Nearby Villages as part of their Outreach Program

Introduction

CBBP is a proven innovation that has been tested over the years through the engagement of multiple stakeholders. However, the pilots have not scaled to the extent they wished. The actors of CBBP were research institutes, extension and NGOs. To bring about impact at scale, various partners need to join hands to disseminate the innovation to a wider area and reach more beneficiaries. Engaging multiple stakeholders having a shared mandate is important to scale up the proven technology. Universities, although they have a tremendous role in scaling of innovations as part of their outreach program, their involvement was minimal. Initiating CBBPs in nearby villages ensures the synergy of research, education and community service of the Universities. With this rationale, we undertook awareness creation at different levels of the University staff and we were able to convince them to allocate resources to benefit from CBBP to synergize the triple mandates of the Universities. The Universities have, therefore, allocated a budget by considering CBBP as a flagship project covering over five years. The budget allocation passed through a rigorous review process under the community services program. The budget allocation is meant for enumerator contractual payments, material purchases to run baseline information, medicaments, supervision cost and capacity building at each stage. There is a consistent increase of participating universities in running CBBP, and benefiting from the experience. As a result, more than 16 Universities have allocated a budget (40,337,656 Birr (706,108 USD)) to run 42 CBBPs.

Objectives

- Mobilize resources to support CBBP villages in the proximity of Universities

Procedures

- Create demand and awareness of the University in consultation with professionals
- Proposal development, including the budget and getting it approved by the concerned university officials
- Kick-off workshop to initiate CBBP under the supervision of Universities
- Field implementation of the CBBPs and follow-up of the CBBP activities by engaging professionals

Output

- 16 Universities have allocated 40,337,656 Birr (706,108 USD) to run CBBPs in 42 Villages

Evidence

- Letters from 16 universities are included below.

To: International Center for Agricultural Research in the Dry Areas (ICARDA)

Addis Ababa, Ethiopia

Subject: To announce allocated budget for Community Based Breeding Program (CBBP)

As indicated on the subject, Haramaya University is working in collaboration with the International Center for Agricultural Research in the Dry Areas (ICARDA) on the Hararghe Highland Goat community-based breeding program for genetic improvement. For this work, Haramaya University has recruited two enumerators (data collectors) on a yearly contractual basis with a monthly salary of 3958 birr each. Besides, the University vice President for Academic Affairs Office has occasionally been supporting the focal person and data collectors through paying per diem and purchasing necessary inputs. These pays an amount to over 50,000 per quarter. In the future, the program is planned to be accommodated under the University research system.

Sincerely yours,

Prof. Mengistu Urge Leta (PhD)
Vice President
for Academic Affairs

Assosa University

Subject: Acceptance letter

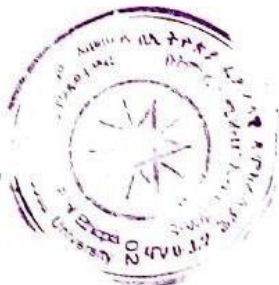

I am delighted to notify you that your research proposal entitled with "Establishing Community Based Goat Breeding Program in Hambasi District of Benishangul Gumuz Regional State, Ethiopia" is accepted by the Research and Community Service Standing Committee (RCSSC) of the University [signed minute on 4, December, 2021]. The university will cover all the required costs including personal cost, transportation and material cost for the research work. The total amount budgets approved for this research work for five consecutive year is 2,500,000 ETB (Two million five hundred thousand birr). The budget will be released once the necessary requirements are fulfilled. With this letter the Research Directorate and College of Agriculture and Natural Resource are ordered to manage the release of budget according to the rule and the regulation of the university.

Once again thank you very much your participation and contributions!

Sincerely yours,

ሀይማኖት ዲሳሳ ማሪ (ዶ.ር.)
Haimanot Disassa Maru (Dr.)

Subject: Letter of Award

It is to be recalled that in response to a call for proposal by our University, you have submitted a proposal entitled **“Establishing Community-Based Breeding Program and Nucleus Breeding of South Omo Highland Sheep for Genetic Conservation and Improvement in the case of North Aari Woreda**, by you and other team members (Co-I). The proposal has been subjected to a rigorous evaluation by panel of reviewers and recommended for funding.

Thus, I am pleased to inform you that the Office of Vice President for Research and Community Services has provisionally approved the same for the period of 3 year. The total project grant award for the period is 498,026 birr (four hundred ninty eight thousand, twenty six birr only).

This is also to request you to sign the research grant award contract agreement with RDO. We wish you success in your research and look forward to receiving outputs of the project.

NB: Both the PI and Co-I’s are expected to carry out original research free of plagiarism; and/or render community service with a measurable impact on the lives of the people. The Office of the VPRCS will make a regular follow-up of the activities in the course of time.

With Regards,
