Description/Goals:

At the top of structure 10 there is a looters pit and a place where a fire was. There are also two tree stumps ~~not to~~ lining themselves next to my trench. All these factors may contribute to certain descriptions such as root interference and modern influences, ~~there are~~

We are excavating structure 10 to compare the architectural basal dimensions with other structures in this site and in other sites. We would also like to discover the function of this structure, whether the functions have changed over ~~time~~ time and the different phases of construction. The orientation of this trench is 210°, N-S.

Str 10

Description/Goals:

At the summit of structure 10 there is evidence of modern disturbances such as looters pit and carbon from a fire. There a few tree stumps near this trench but all meter or more away. All these factors contribute to discrepancies that I may encounter.

02/50 is an axial trench laid out W-E at an angle of 120 degrees on Structure 10. It is 1m wide by 13m long. 02/50 is intended to contribute to knowledge of the size of Structure 10. I hope by revealing the plaza floor, wall(s) and/or terrace(s) we can learn more about the function of this ceremonial structure, how it relates to other nearby structures, and the site as a whole.
