

WHAT IS HAPPENING TO THE BANANAS?

## 

## DISINFECT TOOLS!

AFTER CUTTING ALL SICK
PLANTS WASH TOOL WITH
SOAP AND COLD WATER, RINSE
ONCE WITH CLEAN WATER AND
DRY, TO DISINFECT

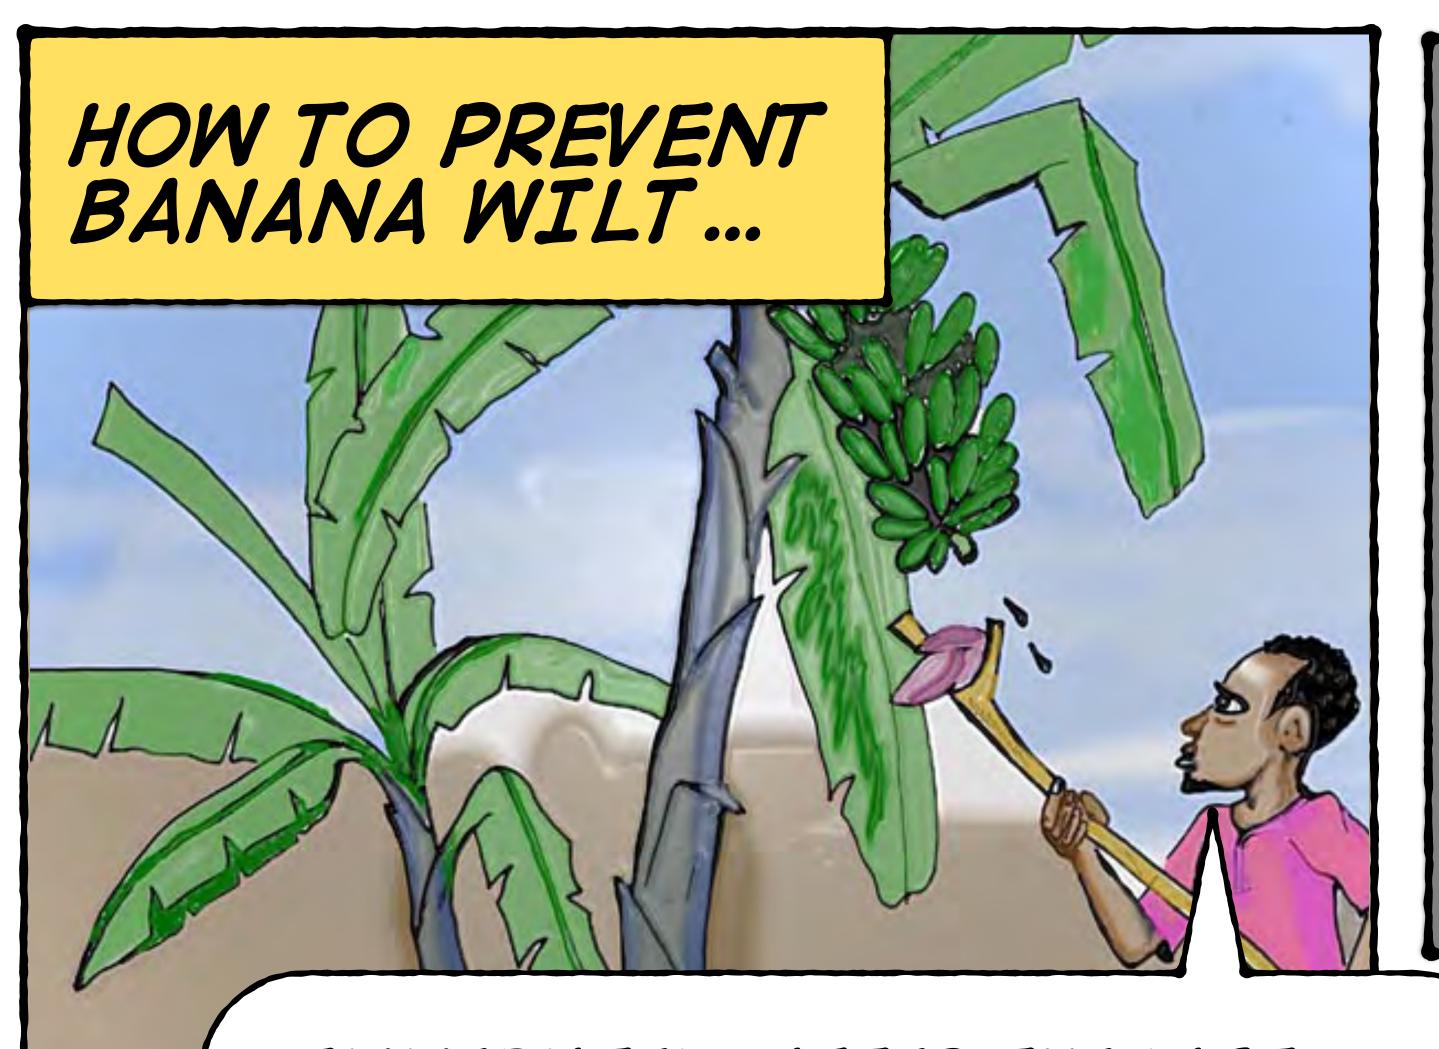

DO NOT

REMOVE ANY
HEALTHY LEAVES
OR SUCKERS FOR
4 MONTHS!

MACHETE IN FIRE.

REMEMBER TO INSPECT YOUR BANANA PLANTS WEEKLY FOR BANANA WILT SYMPTOMS!

IMMEDIATELY AFTER THE LAST HAND OF BANANAS HAS FORMED, BREAK OFF THE FLOWER USING A FORKED STICK.

If you have any questions pls contact the following One CGIAR **Plant Health Initiative** Scientists:

Guy Blomme, G.Blomme@cgiar.org or Walter Ocimati, W.Ocimati@cgiar.org
