1a. edició – desembre de 2022

## Sumari

<i>Abast de l'estudi</i>	2
<i>Metodologia</i>	3
1. <i>Gràfics i dades d'articles publicats</i>	5
1.1. <i>Gràfics i dades d'articles publicats per universitats</i>	5
1.2. <i>Gràfics i taula comparatius de quantitat de publicació científica</i>	11
1.2.1 <i>Gràfic UPC vs. UPM i UPV 2012-2021</i>	11
1.2.2. <i>Gràfics i taula globals 2012-2021</i>	11
2. <i>Gràfics i dades de citacions rebudes</i>	14
2.1. <i>Gràfics i dades de citacions rebudes per universitats</i>	14
2.2. <i>Gràfics i taula comparatius de les citacions a la publicació científica</i>	20
2.3. <i>Gràfics i taula comparatius de la mitjana de citacions rebudes</i>	23
3. <i>Gràfic i taula comparatius de l'índex H</i>	26
3.1. <i>Gràfics i dades de citacions rebudes per universitats</i>	26
3.2. <i>Gràfics i taula globals de l'índex H 2012-2021</i>	26
4. <i>Articles més citats 2012-2021</i>	29
4.1. <i>UPC - Universitat Politècnica de Catalunya</i>	29
4.1.1. <i>Escola de Camins</i>	32
5. <i>Revistes on més publiquen els professors</i>	52
5.1. <i>Taules de revistes amb major nombre d'articles per a cada universitat</i>	52
5.2. <i>Taula de coincidències de les revistes amb major presència en les llistes de publicacions amb més articles</i>	70
5.3. <i>Taula unificada de revistes amb major presència en les llistes de publicacions amb més articles</i>	71
6. <i>Conclusions</i>	72
7. <i>Annex 1</i>	76
8. <i>Annex 2</i>	87
8.1. <i>Dades bibliomètriques de la producció del PDI de l'Escola de Camins considerant totes les WoS categories</i>	87
8.2. <i>PDI de l'Escola de Camins amb Índex H de Web of Science igual o superior a 30</i>	92

## Abast de l'estudi

### 1. Abast temàtic

L'informe es centra en la publicació científica especialitzada en l'àmbit temàtic propi de l'Escola de Camins: l'enginyeria civil.

### 2. Abast geogràfic

Es comparen indicadors bibliomètrics de la UPC i l'Escola de Camins, amb els d'altres universitats internacionals amb activitat de recerca notable en l'àrea de l'enginyeria civil. Les universitats seleccionades són universitats europees, dels Estats Units i Llatinoamèrica escollides per la seva presència a diferents xarxes i rànquings internacionals, així com les altres dues universitats estatals amb més presència en l'àmbit de la recerca en enginyeria civil: la Universidad Politécnica de Madrid (UPM) i la Universitat Politècnica de València (UPV).

Aquesta selecció ha estat definida per la pròpia Escola en funció de la voluntat de l'Escola de Camins de comparar-se amb institucions de primera línia a nivell internacional.

### 3. Abast documental

Des del punt de vista de la tipologia documental, només s'ha treballat amb informació referent a articles publicats a revistes, deixant de banda comunicacions a congressos o altres tipologies pròpies de la publicació científica<sup>1</sup>.

### 4. Abast cronològic

Les referències analitzades corresponen a articles publicats entre l'1 de gener de 2012 i el 31 de desembre de 2021.

## Fonts d'informació

Les dades a partir de les quals s'ha elaborat l'estudi s'han extret de les bases de dades de [Clarivate Analytics: Web of Science Core Collection](#) (WoS) i [Journal Citation Reports](#) (JCR), abastament usades com a eina d'anàlisi bibliomètrica dins del món acadèmic.

---

<sup>1</sup> La base de dades Web of Science ja permet realitzar estudis de citacions de congressos, però les dades només es remunten a l'any 1990, a diferència de les dades referents a revistes que arrenquen el 1900.

## Metodologia

### 1. Recuperació dels articles de les especialitats de enginyeria civil

L'Enginyeria civil, tal i com la defineixen les eines de referència consultades, és una branca de l'enginyeria que aplica els coneixements de diferents àmbits del saber (matemàtiques, física, geologia, química, etc.) a temes tant diversos com les estructures, l'energia, la construcció, els transports, la hidrologia o el medi ambient. La recuperació de revistes i articles al Web of Science (WoS), per tant, es fa molt difícil ja que caldria considerar desenes d'epígrafs diferents.

Per aconseguir el llistat definitiu de títols, l'Escola de Camins va escollir 7 *Subject Categories* que són del seu interès analitzar: *Construction & Building Technology, Engineering, Civil, Engineering, Geological; Engineering, Multidisciplinary, Transportation, Transportation Science & Technology i Water Resources*. Finalment doncs, s'han executat cerques a WoS dels articles publicats a totes les revistes de les categories seleccionades, tot aplicant els límits cronològics i documentals descrits anteriorment. Com a resultat, s'han obtingut referències dels articles publicats a 388 revistes<sup>2</sup> –v. Annex 1- en les especialitats pròpies de l'Escola de Camins, durant el període en el que se centra l'estudi.

Com es veurà, el 56,04% de les publicacions UPC a les revistes finalment triades corresponen a l'Escola, de manera que es poden considerar representatives de l'enginyeria civil.

### 2. Recuperació dels articles publicats amb autoria de cada universitat

Una de les principals dificultats en l'elaboració d'estudis bibliomètrics prenent com a base WoS, és la manca generalitzada de normalització als noms d'autors i institucions. A diferència de les edicions anteriors, en aquest edició hem fet servir el nom que apareixia a l'índex *Organizations-Enhanced*. No hi ha variacions significatives respecte a la cerca pel nom + variants

Un cop executades les cerques, els resultats obtinguts s'han combinat amb els aconseguits en la cerca per títols de revista, que es descriu a l'apartat anterior. Com a resultat s'ha obtingut un llistat d'articles publicats en revistes de les especialitats JCR abans detallades, escrits per autors membres de cadascuna de les universitats contemplades a l'estudi.

### 3. Recuperació dels articles publicats amb autoria vinculada a l'Escola de Camins

Un cop recuperats els articles amb autoria UPC, l'obtenció dels articles amb PDI vinculat a l'Escola de Camins s'ha realitzat afegint una nova variable a la cerca: els noms dels autors i autores vinculats a l'Escola durant el període d'estudi; cada persona s'ha buscat de forma individual a WoS per tal de trobar totes les variants possibles del seu nom. La cerca inclou 319 membres del PDI, actius durant el període 2012-2021, a partir de la relació de persones facilitades per l'Escola.

Cal remarcar que la manca de normalització en els noms dels autors pot haver exclòs de l'equació de cerca formes alternatives, no indexades per WoS.

---

<sup>2</sup> La llista de revistes ha estat actualitzada respecte als títols analitzats en les anteriors edicions de l'estudi.

#### **4. Anàlisi de citacions rebudes**

Les citacions rebudes constitueixen un indicador usat de forma comuna tant als estudis bibliomètrics com en la mesura de l'impacte de l'activitat de recerca.

Les dades s'han extret directament de WoS, fent servir la utilitat *Analyze Results*, que elabora rànquings d'autors amb més quantitat de publicació, títols de revista on més es publica, etc., i la utilitat *Citation Report*, que genera un recompte de citacions en dos gràfics: un per a la quantitat d'articles publicats per any, i un per al nombre de vegades que aquests articles han estat citats.

Al costat de les dades corresponents al nombre de cites rebudes per cada institució, s'inclou l'índex  $H^3$  de tot el conjunt d'articles publicats durant el període estudiat. Es proporcionen també els índex H del primer i de l'últim any d'aquest període.

#### **5. Articles més citats de cada universitat i revistes on més publiquen**

Les dades recollides en aquests dos apartats han estat extretes de WoS a través de la utilitat *Analyze Results*.

---

<sup>3</sup> L'índex H és un indicador creat per Jorge Hirsch, de la Universitat de Califòrnia - San Diego determina el balanç entre les publicacions d'un científic o institució i la quantitat de citacions que aquestes publicacions reben.

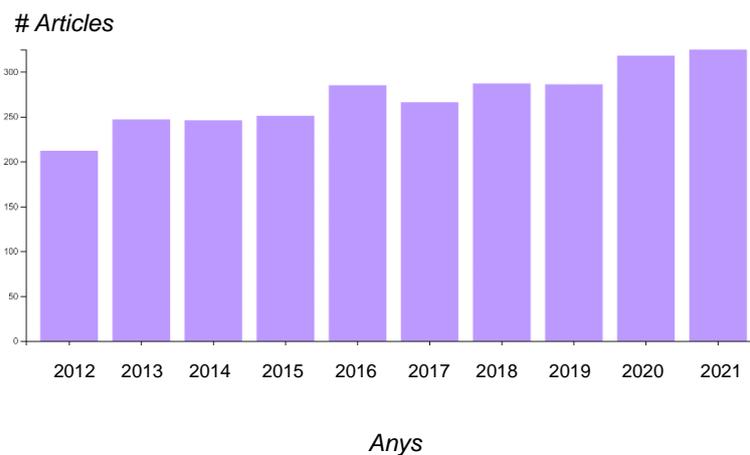

## 1. Gràfics i dades d'articles publicats

Es recull a continuació el nombre d'articles publicats per cada institució en els 7 àmbits temàtics analitzats entre 2012 i 2021, en total i any a any, així com un gràfic comparatiu d'aquesta dada a nivell de totes les institucions.

### 1.1. Gràfics i dades d'articles publicats per universitats<sup>4</sup>

#### 1.1.1. UPC - Universitat Politècnica de Catalunya

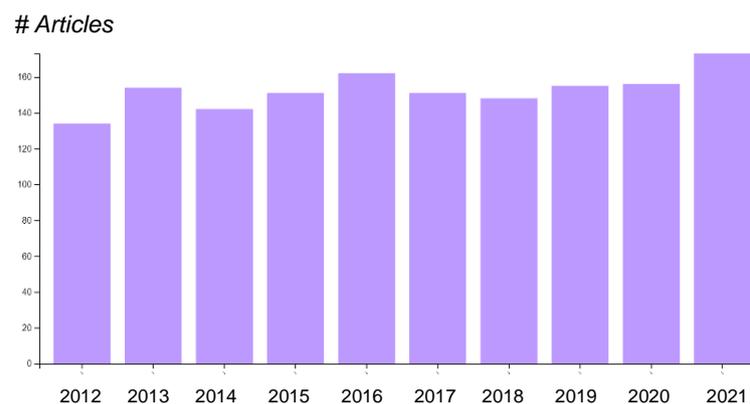

Total d'articles publicats: **2723**

Any	# Articles
2021	325
2020	318
2019	286
2018	287
2017	266
2016	285
2015	251
2014	246
2013	247
2012	212
<b>Total</b>	<b>2723</b>

#### 1.1.1.1. Escola de Camins

Total d'articles publicats: **1526**

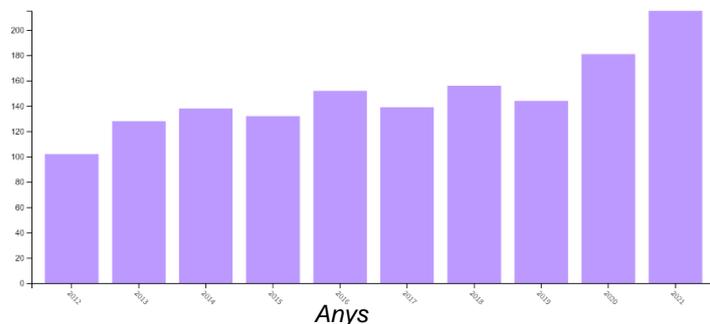

Any	# Articles
2021	173
2020	156
2019	155
2018	148
2017	151
2016	162
2015	151
2014	142
2013	154
2012	134
<b>Total</b>	<b>1526</b>

<sup>4</sup> Bases de dades consultades durant el mes d'octubre de 2022.

### 1.1.2. EPFL – École Polytechnique Fédérale de Lausanne

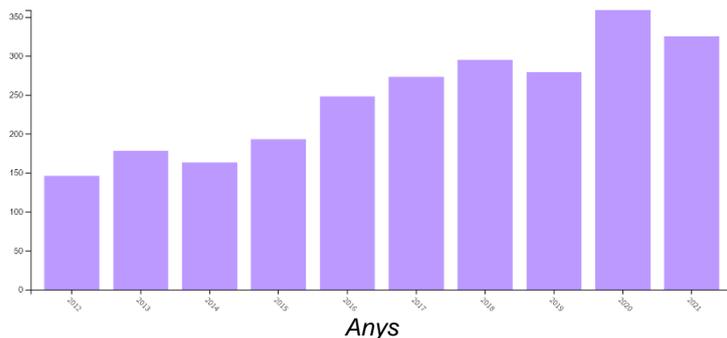

# Articles

Total d'articles publicats:  
1487

### 1.1.3. Imperial College London

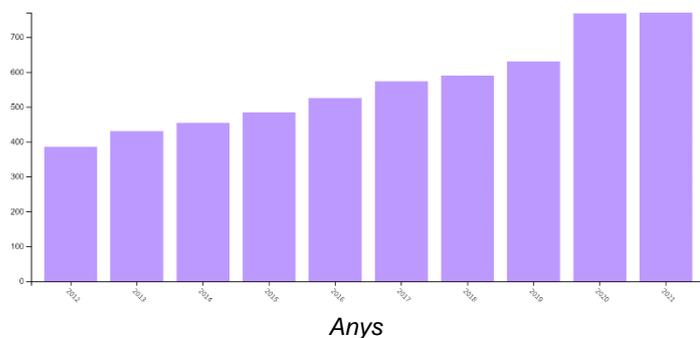

# Articles

Total d'articles publicats: 2459

### 1.1.4. TUDelft - Technische Universiteit Delft

# Articles

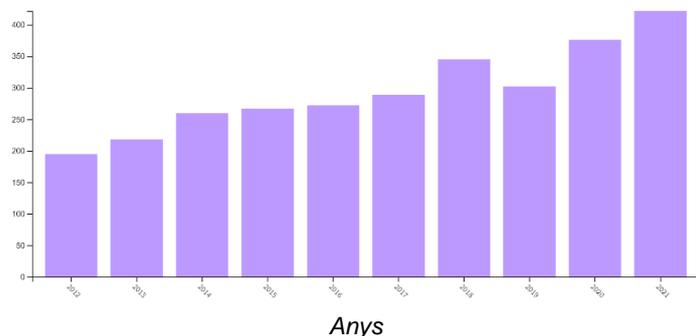

Total d'articles publicats: 5609

### 1.1.5. ETHZ – Swiss Federal Institute of Technology Zurich

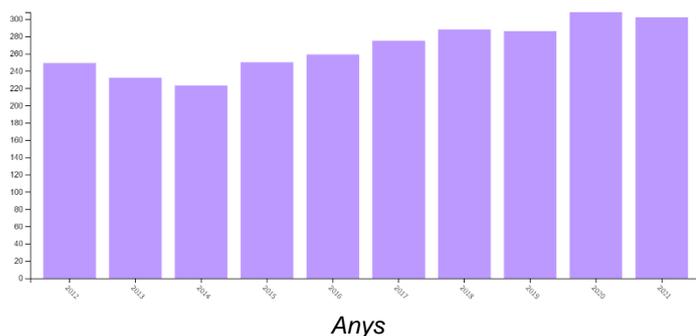

# Articles

Total d'articles publicats: 2946

### 1.1.6. École des Ponts ParisTech – (ENPC / LCPC / IFSSTAR / Univ Gustave-Eiffel –/ Laboratoire Central des Ponts et Chaussées / Institut français des sciences et technologies des transports, de l'aménagement et des réseaux / Université Gustave-Eiffel)<sup>5</sup>

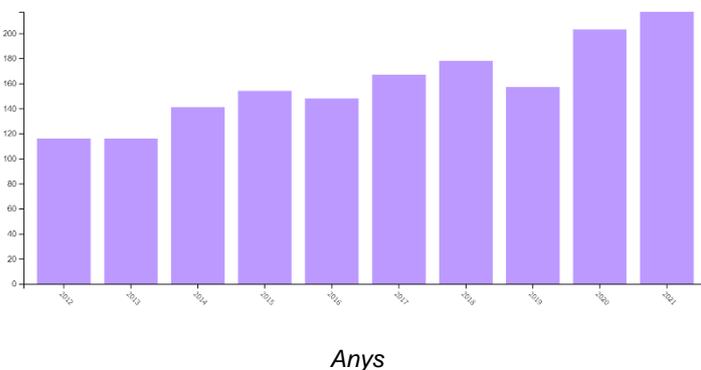

# Articles

Total d'articles publicats: 2673

### 1.1.7. Stanford University

# Articles

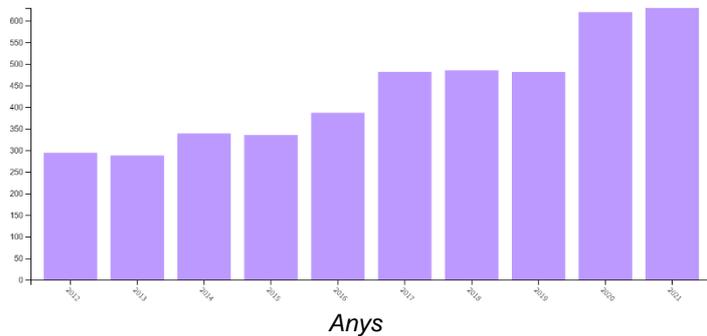

Total d'articles publicats: 1547

<sup>5</sup>.- S'ha fet una cerca conjunta agrupant els principals centres de recerca francesos en l'àmbit de l'enginyeria civil. El nom *École des Ponts ParisTech* correspon a l'*École Nationale des Ponts et Chaussées* que ha canviat de nom recentment. L'IFSSTAR és el nom que rep l'antic *Laboratoire central des ponts et chaussées (LCPC)* des de l'any 2011 fins a la seva dissolució en 2020 i posterior integració a la *Université Gustave-Eiffel*.

### 1.1.8. TAMU – Texas A&M University

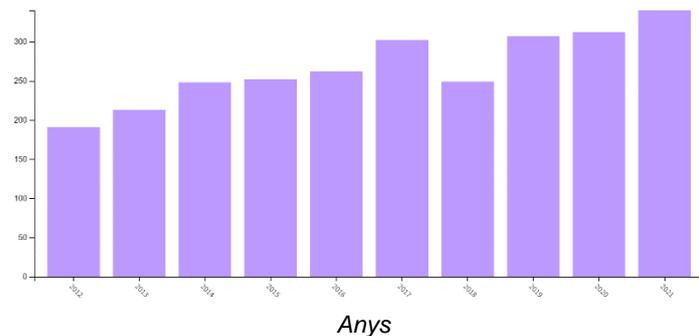

# Articles

Total d'articles publicats: 4340

### 1.1.9. University of Illinois Urbana-Champaign

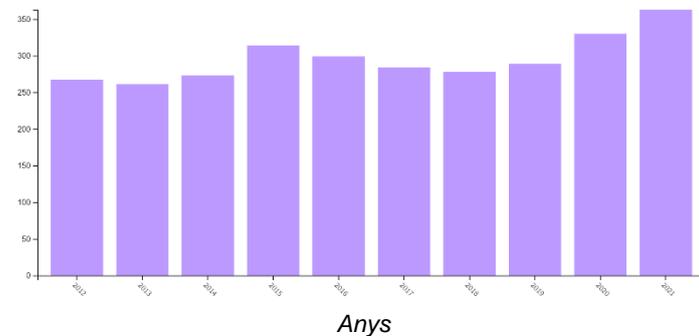

# Articles

Total d'articles publicats: 2676

### 1.1.10. University of California Berkeley

# Articles

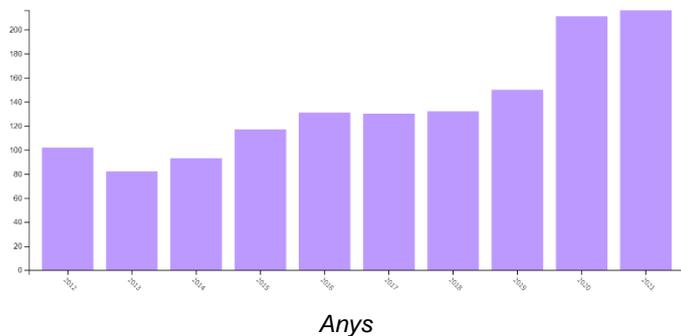

Total d'articles publicats: 2958

### 1.1.11. UNAM - Universidad Nacional Autónoma de México

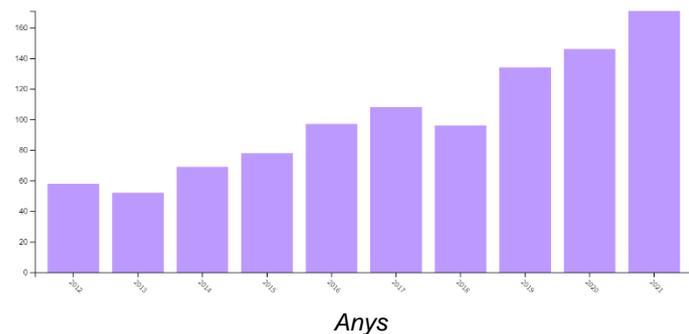

# Articles

Total d'articles publicats:  
1364

### 1.1.12. UFRJ – Universidade Federal do Rio de Janeiro

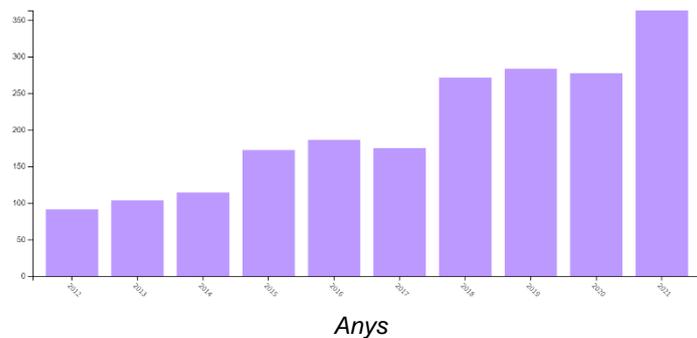

# Articles

Total d'articles publicats: 1009

### 1.1.13. USP - Universidade de São Paulo

# Articles

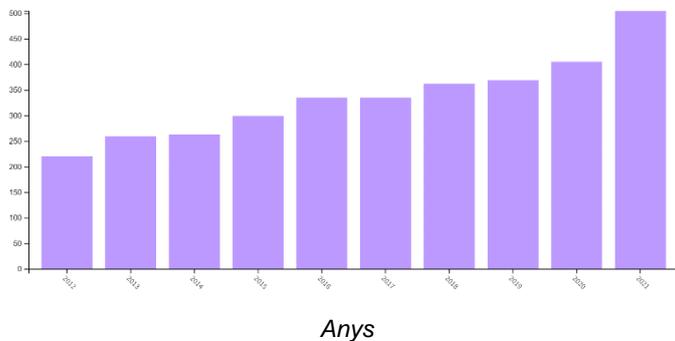

Total d'articles publicats: 2035

### 1.1.14.ULisboa – Universidade de Lisboa / Universidade Técnica de Lisboa<sup>6</sup>

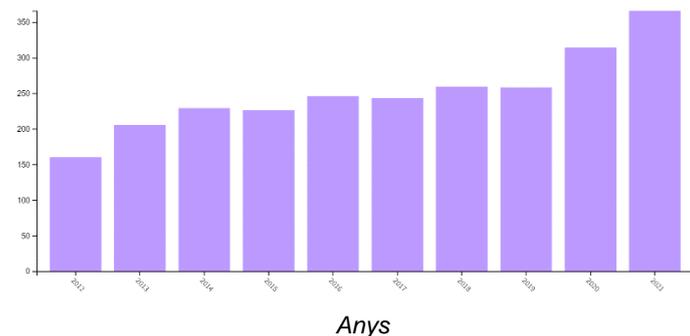

# Articles

Total d'articles publicats:  
3351

### 1.1.15.UPM - Universidad Politécnica de Madrid

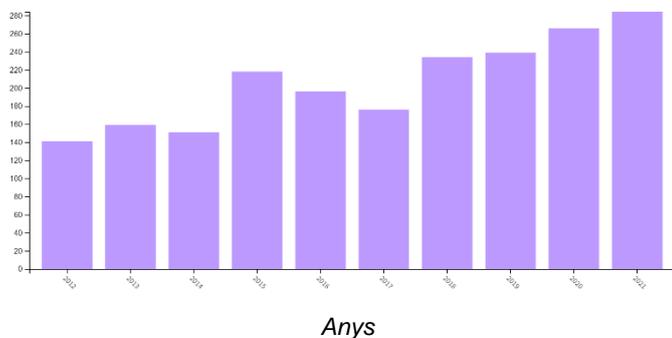

# Articles

Total d'articles publicats: 2506

### 1.1.16.UPV - Universitat Politècnica de València

# Articles

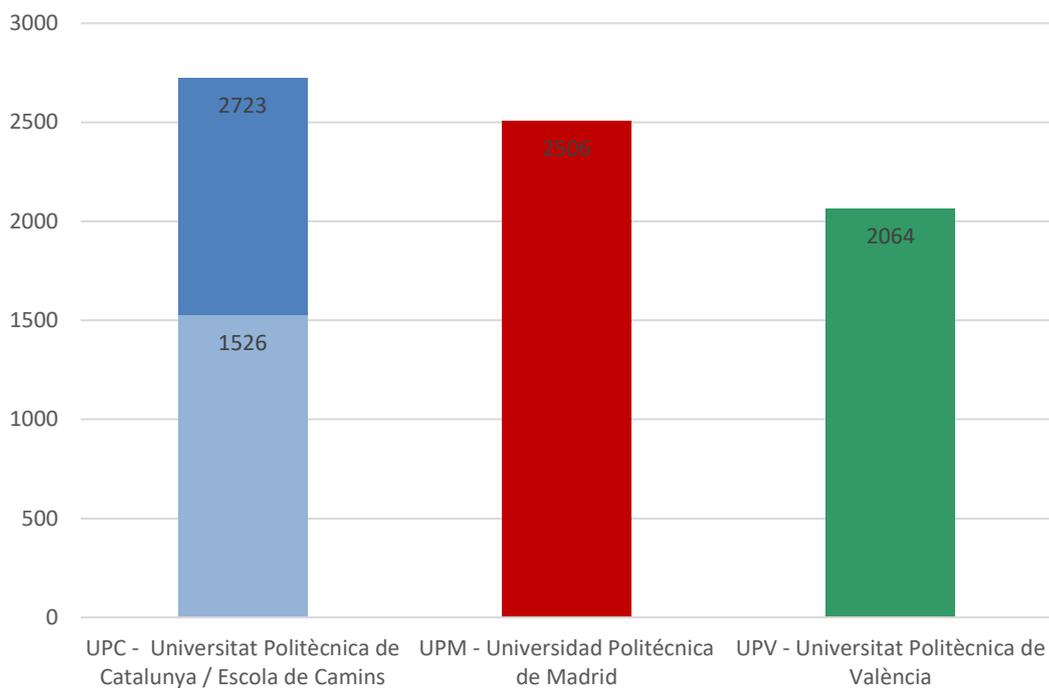

Total d'articles publicats: 2064

<sup>6</sup> Al 2013 la Universidade Técnica de Lisboa s'integra a la Universidade de Lisboa. La cerca s'ha fet considerant els noms de les dues entitats i també la del Instituto Superior Técnico.

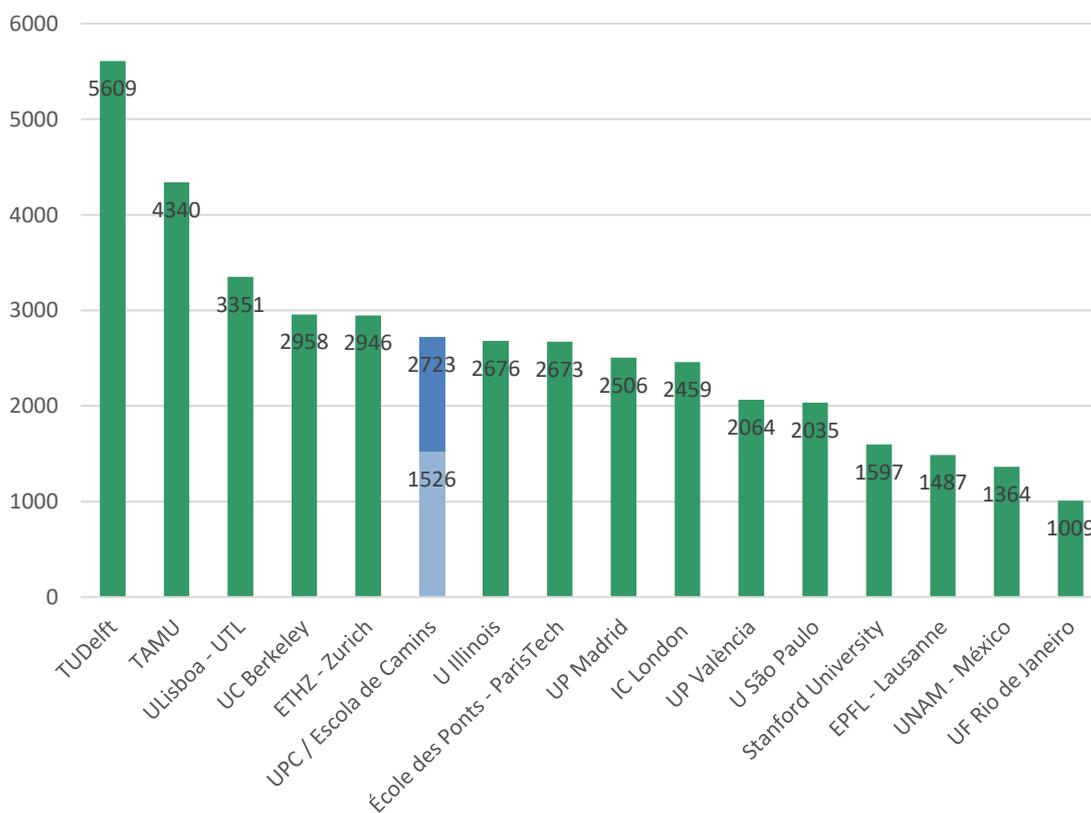

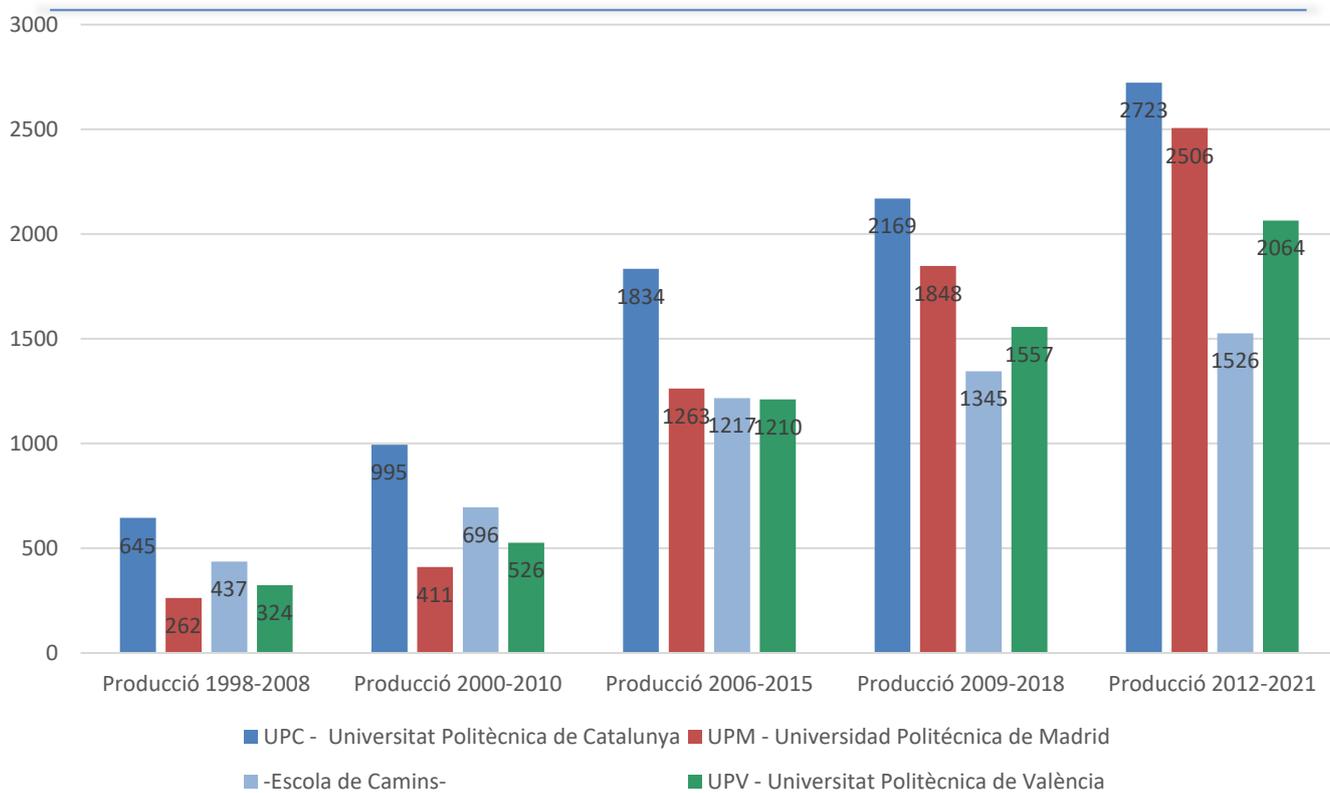

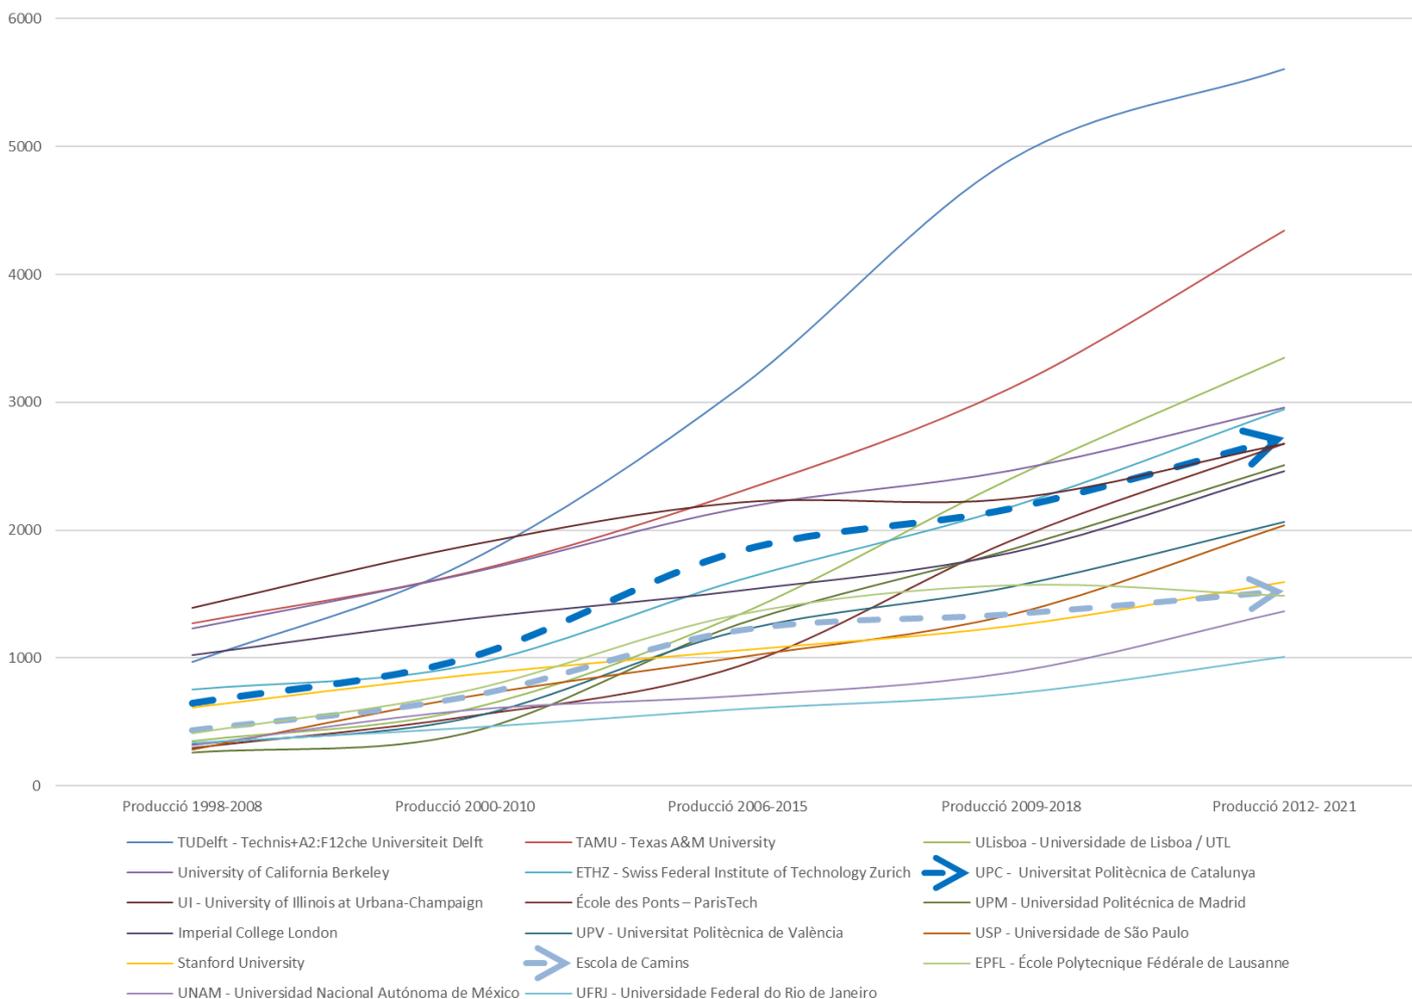

## 1.2. Gràfics i taula comparatius de quantitat de publicació científica

## 2. Gràfics i dades de citacions rebudes

Es detalla aquí el nombre de referències rebudes pels articles publicats per cada institució entre 2012 i 2021, així com altres dades d'interès -mitjana de citacions per ítem i índex H-. També s'inclou el gràfic comparatiu d'aquestes dades a nivell de totes les institucions i la comparació d'àmbit estatal UPC vs. UPM i UPV.

### 2.1. Gràfics i dades de citacions rebudes per universitats<sup>7</sup>

#### 2.1.1. UPC - Universitat Politècnica de Catalunya

# Citacions

Total d'articles publicats: 2723

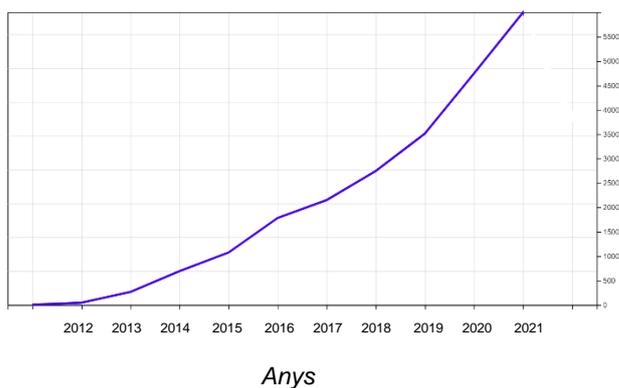

Quantitat de citacions rebudes:  
42988

Mitjana de citacions per ítem<sup>8</sup>:  
15,79

Índex H període 2012-2021: 70

#### 2.1.1.1. Escola de Camins

# Citacions

Total d'articles publicats: 1526

Quantitat de citacions rebudes:  
26788

Mitjana de citacions per ítem:  
17,55

Índex H període 2012-2021: 62

<sup>7</sup> Bases de dades consultades durant el mes de novembre de 2019. S'inclouen, per tant, les cites rebudes pels articles durant part del 2022.

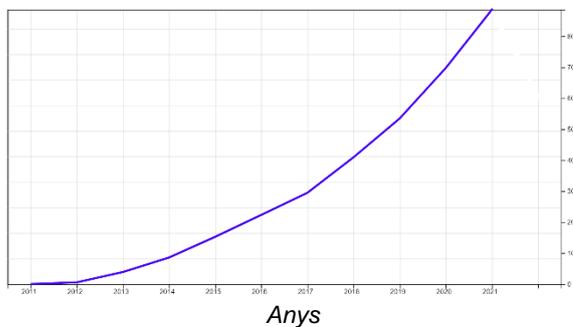

<sup>8</sup> La mitjana de citacions de la UPC s'ha obtingut obviant els articles i citacions corresponents a l'Escola de Camins.

0

## 2.1.2. EPFL – École Polytechnique Fédérale de Lausanne

# Citacions

Total d'articles publicats: 1487

#### 4. Articles més citats 2012-2021<sup>11</sup>

Institució a institució, es detalla a continuació la llista dels 10 articles més referenciats durant el període de temps que abasta l'informe. Per a la UPC es recullen els 20 primers articles indexats al WoS.

##### 4.1. UPC - Universitat Politècnica de Catalunya

Es destaquen en negreta aquells articles amb un o més autors amb assignació a l'Escola de Camins. S'observa que, dels 20 títols recollits, 14 pertanyen a aquesta categoria. Això representa un 70% del total dels articles esmentats.

Tot i així, cal aclarir que algun dels professors marcats com a Escola de Camins no estan actualment assignats a l'Escola –en aquest cas, també s'usa la negreta perquè quan es van publicar els articles recollits sí que ho estaven–.

#### 4.1.1. Escola de Camins

Es mostren els articles publicats al període 2012-2021, amb més de 75 citacions<sup>12</sup> dels professors vinculats a l'Escola de Camins, indexats a Web of Science sota les categories considerades a l'estudi. Els autors de l'Escola es destaquen en negreta.

A l'annex 2 es pot consultar la llista dels articles amb més de 75 citacions dels professors de l'Escola, independentment de la les categories WoS sota les quals estiguin indexats

## 5. Revistes on més publiquen els professors

Les següents taules mostren, universitat a universitat, els títols de les revistes, indexades al *Web of Science*, on més publiquen els professors<sup>13</sup>.

Per a cada institució es donen els 25 títols de revista on més publiquen els autors, excepte per a la UPC on es detallen els 50 títols de revista on més es publica.

S'acaba l'apartat amb la llista de les revistes que apareixen 10 o més vegades en aquestes taules i amb la llista unificada dels 25 títols de revista en els quals s'han publicat més articles sumant el conjunt de les universitats.

### 5.1. Taules de revistes amb major nombre d'articles per a cada universitat

#### 5.1.1. UPC - Universitat Politècnica de Catalunya

Revista	# Articles	% sobre el total (2723)
CONSTRUCTION AND BUILDING MATERIALS	159	5,89%
COMPUTER METHODS IN APPLIED MECHANICS AND ENGINEERING	132	4,84%
APPLIED SCIENCES BASEL	110	4,04%
ENGINEERING STRUCTURES	84	3,08%
INTERNATIONAL JOURNAL FOR NUMERICAL METHODS IN ENGINEERING	83	3,04%
WATER	53	1,94%
REVISTA INTERNACIONAL DE METODOS NUMERICOS PARA CALCULO Y DISENO EN INGENIERIA	47	1,72%
JOURNAL OF HYDROLOGY	46	1,68%
ENERGY AND BUILDINGS	41	1,50%
WATER RESOURCES RESEARCH	38	1,39%
JOURNAL OF THE FRANKLIN INSTITUTE ENGINEERING AND APPLIED MATHEMATICS	36	1,32%
IEEE TRANSACTIONS ON VEHICULAR TECHNOLOGY	35	1,28%
DESALINATION AND WATER TREATMENT	34	1,24%

<sup>13</sup>. - Bases de dades consultades durant l'octubre de 2022.

Revista	# Articles	% sobre el total (2723)
INTERNATIONAL JOURNAL OF ENGINEERING EDUCATION	34	1,24%
INFORMES DE LA CONSTRUCCION	31	1,13%
COMPUTERS AND GEOTECHNICS	30	1,10%
ENGINEERING GEOLOGY	29	1,06%

## 6. Conclusions

### ***Sobre les institucions***

- Les institucions que s'analitzen en el present estudi són les mateixes que en edicions anteriors del mateix informe i que abastaven els períodes 1998-2008<sup>14</sup>, 2000-2010<sup>15</sup>, 2006-2015<sup>16</sup> i 2009-2021<sup>17</sup>. Com en aquells casos, no ha estat possible discriminar per a cada una de les universitats el pes específic que ocupa l'enginyeria civil dins el conjunt global de les institucions.
- La impossibilitat de comparar de manera fiable i uniforme les estructures orgàniques -i la quantitat de professors de cadascuna d'aquestes estructures- de les universitats analitzades ha impedit que es poguessin portar a terme comparacions complementàries d'interès, principalment relatives a la productivitat de les universitats/professors i a la ràtio de citacions per professor de cadascuna de les institucions.
- L'École Nationale des Ponts et Chaussées ha passat durant els últims anys per diverses conformacions administratives i de vinculació amb altres institucions. D'altra banda el Laboratoire Central des Ponts et Chaussées vinculat al l'organisme estatal Centre Nationale de la Recherche Scientifique (CNRS), i dissolt per s'ha integrar-se a la Université Gustave-Eiffel Per aquest motiu, i tenint en compte el període cronològic del present estudi ens hem estimat realitzar una cerca amplia que recuperi tota la producció de les institucions, a partir dels seus noms. La denominació simplificada dins d'aquest informe és la de École des Ponts - Paris Tech.

### ***Sobre la base documental utilitzada per a l'estudi***

- La metodologia utilitzada, anàlisi de les revistes indexades sota les categories més vinculades a l'enginyeria civil, no permet considerar aquest estudi com un informe exhaustiu però sí obtenir una visió suficientment indicativa de la recerca en enginyeria civil a la UPC i a l'Escola de Camins en els àmbits analitzats.
- Sobre les set categories escollides i esmentades en el l'apartat introductori dedicat a la metodologia, l'estudi ofereix també una visió comparativa amb les institucions amb les quals l'Escola de Camins li ha interessat comparar-se.

### ***Publicació d'articles***

- Les universitats amb estudis en enginyeria civil que, en el període abastat, han tingut una major producció científica a les categories estudiades són: TU Delft amb 5609, Texas A&M University amb 4340 i ULisboa amb 3351.
- La UPC, incloent-hi l'Escola de Camins, ocupa la posició número 6 en aquest rànquing (2723 documents), guanyant 1 posició respecte l'estudi anterior, i l'Escola de Camins per sí mateixa ocupa la posició número 14 en aquest rànquing (1526 documents), baixant una posició respecte l'estudi anterior.
- El personal docent i investigador vinculat a l'Escola de Camins concentra el 56,04% de l'autoria en la publicació a la UPC en les àrees estudiades. Per tant, la dinàmica

<sup>14</sup>.- Es pot consultar l'edició 1998-2008 a: <http://hdl.handle.net/2117/12549>

<sup>15</sup>.- Es pot consultar l'edició 2000-2010 a: <http://hdl.handle.net/2117/20017>

<sup>16</sup>.- Es pot consultar l'edició 2006-2015 a: <http://hdl.handle.net/2117/96620>

<sup>17</sup>.- Es pot consultar l'edició 2009-2018 a: <http://hdl.handle.net/2117/174947>

de publicació del conjunt de professors vinculat a l'Escola és determinant per a la dinàmica global de la UPC.

- Del conjunt d'universitats politècniques de l'Estat espanyol, la UPC és la que presenta un major nombre de publicacions –un 31,9% superior a la UPV i un 8,6% superior a la UPM-.
- L'Escola de Camins per sí sola ha publicat, per a les revistes i el període estudiat en aquest informe, un nombre d'articles proper al publicat pel conjunt de la UPV (un 73,9%).
- Des d'un punt de vista geogràfic, de les 4 universitats dels Estats Units estudiades, 2 se situen en els 5 primers llocs quant a producció d'articles. La TU Delft se situa en primer lloc i la Universidade de Lisboa en tercer lloc (pujant des del tercer lloc que ocupava durant el període 2009-2018), mentre que la resta d'universitats europees estudiades es troben a la zona mitja del rànquing. En l'àmbit llatinoamericà, la primera universitat és la Universidade de São Paulo que ocupa el 12è. lloc, pujant una posició respecte el període analitzat per l'estudi anterior.
- En general la gràfica de tendència mostra una evolució positiva pel que fa a la quantitat d'articles publicats durant els anys 2012-2021, tot i que hi podrien haver 2 patrons diferenciats:
  - 4 de les 16 universitats estudiades:
    - Technische Universiteit Delft
    - Texas A&M University
    - Universidade Técnica de Lisboa
    - École Nationale des Ponts et Chaussées / Laboratoire Central des Ponts et Chaussées / IFSSTAR

mostren una tendència pronunciadament ascendent, especialment accentuada des de l'any 2000.

l'École Polytechnique Fédérale de Laussane ha anat baixant posicions progressivament des de 2006 pel que fa a la producció.

La resta d'universitats, on s'inclouen la UPC i l'Escola de Camins, mostren una tendència ascendent estable des del 1998 fins el 2021.

### **Citacions rebudes**

- L'increment del total de les citacions rebudes és constant en totes les universitats estudiades durant el període 2012-2021. Això també és vàlid tant per a la UPC que es manté al 9è lloc del rànquing general com per a l'Escola de Camins, tot i que en aquest cas baixa 2 posicions respecte l'anterior estudi, ocupant el 12è lloc .
- Les universitats que han rebut més citacions són: TU Delft amb 112808 citacions, University of California Berkeley amb 70980 citacions, i la Texas A&M University amb 69695.
- Els cinc primers llocs del rànquing estan ocupats per 3 universitats europees -TU Delft, l'École Polytechnique Fédérale de Laussane i Universidade de Lisboa- i 2 dels Estats Units -University of California Berkeley i Texas A&M University-.
- El gran nombre de citacions, juntament amb una producció en descens fa que l'École Polytechnique Fédérale de Laussane, passi a ser la institució amb la mitjana de citacions més alta

- Destaca de nou l'evolució positiva de la Universidade de Lisboa (anteriorment Universidade Tecnica de Lisboa) que ha incrementat en un 70% el nombre de citacions rebudes respecte l'estudi anterior, passant de 35513 a 600548 citacions.
- Els professors vinculats a l'Escola de Camins reben el 62% del total de citacions de la UPC durant el període analitzat. De la mateixa manera que amb la quantitat de publicacions, la dinàmica de citacions rebudes pels articles vinculats a l'ETSECCPB és determinant per a la dinàmica global de la UPC.
- Les citacions totals rebudes continuen pujant tant en general com en el cas de la UPC i l'Escola de Camins. És notable el creixement el nombre de citacions de la UPM, que supera a la UPV per primer cop.
- Els articles publicats per l'Escola de Camins reben una mitjana de 17,55 citacions per article. Això situa l'Escola en la desena mitjana més alta de les universitats estudiades si la considerem aïlladament. La UPC se situa en el seu conjunt en la dotzena posició d'aquest rànquing -15,79 citacions per article-.
- La UPC és la universitat de l'Estat amb més citacions durant el període estudiat –un 30,67% superior a la UPM i un 58,18% més que la UPV-.
- L'Escola de Camins per si sola ha rebut menys citacions que la UPV i la UPM, concretament, un 1,4 i un 10,1% menys respectivament.
- La mitjana de citacions rebudes per article corresponent a documents amb autors vinculats a la UPC durant el període analitzat és el més alt de l'Estat, superant a la de la UPV en 2,62 punts, i a la UPM en 3,9. Si comparem l'Escola de Camins amb la resta d'universitats estatals, el resultat són encara més contrastats donat que la diferència entre l'Escola i la UPV és de 4,38 punts i amb la UPM de 5,66 punts.
- Les universitats amb un índex H més alt sobre el conjunt d'articles estudiats són: TU Delft (112), University of California Berkeley (101), École Polytechnique Fédérale de Laussane (87) i Swiss Federal Institute of Technology Zurich (98).
- L'Escola de Camins té un índex H 62, la qual cosa significa que la majoria dels articles -excepte 8- que contribueixen a l'índex H de la UPC (70), tenen com a autors professors l'Escola.
- La UPC és la universitat de l'Estat estudiada amb un índex H més alt: 72, per 62 de la UPM i 49 de la UPV.

### **Autors i articles**

- L'article que ha rebut més citacions del conjunt de les 16 universitats està signat per investigadors del Imperial College London. El seu títol és *Pore-scale imaging and modelling*, està signat per M.J. Blunt entre d'altres i publicat l'any 2013 a la revista *Advances in water resources*. Durant el període estudiat ha rebut 1054 citacions.
- El segon i el tercer lloc del rànquing de citacions l'ocupen respectivament articles signats per investigadors de la TU Delft -1024 citacions- i, en tercer lloc, Texas A&M University -798 citacions-.
- L'article més citat tant pel que fa a la UPC com a l'Escola de Camins és *Recommendations for the quantitative analysis of landslide risk*, amb 566 citacions i es va publicar a la revista *Bulletin of engineering geology and the*. Està signat, entre d'altres, pels professors de l'Escola de Camins Jordi Corominas i Olga Mavrouli

## Revistes

- No hi ha cap títol que estigui present en totes les taules de les revistes on més publiquen les 16 universitats analitzades. Les que apareixen amb més freqüència són: *Engineering Structures* -16 vegades-, *Construction and Building Materials* -15 vegades-, *Applied Science Basel* -14 vegades- i *Journal of Hydrology*, *Computer Methods in Applied Mechanics* i *Water* -12 vegades cadascuna–.
- Les tres revistes on més publiquen els professors del conjunt de les universitats analitzades són: *Construction and Building Materials* -1443 articles-, *Transportation research record* -1155 articles- i *Applied Science Basel* -975 articles-
- Entre les estudiades, *Construction and building materials* és la revista preferida pels autors de la UPC / Escola de Camins a l'hora de publicar: 159 articles –el 5,86% del total- s'han publicat allí. *Computer Methods in Applied Mechanics and Engineering* -132 articles-, *Applied Sciences Basel* -110 articles-, *Engineering structures* -84 articles- *International Journal for Numerical Methods in Engineering* -83 articles, i *Water*– 53 articles-, són altres títols de revistes pels quals els autors UPC / Escola de Camins mostren preferència a l'hora de publicar. En setè lloc, amb 47 articles publicats, es situa la *Revista Internacional de Métodos Numéricos para Cálculo y Diseño en Ingeniería (RIMNI)* publicada pel CIMNE.

## Continuïtat de l'estudi

Aquest informe ofereix informació rellevant per als objectius previstos inicialment. Per aquest motiu la BRGF i la Federació “UPC-Camins-BarcelonaTech”<sup>18</sup> tenen la intenció de repetir-lo regularment com a observatori de la publicació científica directament lligada a l'Escola i al Departament d'Enginyeria Civil i Ambiental i, per extensió, a l'enginyeria civil en l'entorn UPC.

Així mateix, aquest estudi representa una plataforma per al desenvolupament d'estudis bibliomètrics més detallats en els camps d'interès de la Federació.

---

<sup>18</sup> La Federació “UPC-Camins-BarcelonaTech” és un ens format per l'Escola de Camins i el Departament d'Enginyeria Civil i Ambiental de la UPC

## 8. Annex 2

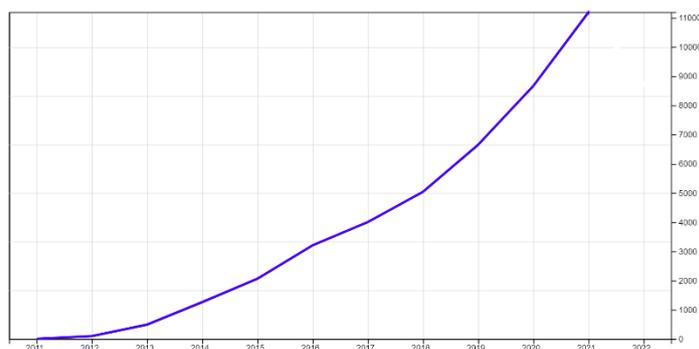

### 8.1. Dades bibliomètriques de la producció del PDI de l'Escola de Camins considerant totes les WoS categories

Gran part del professorat de l'Escola publica no només en revistes indexades sota les categories de Web of Science considerades a l'estudi comparatiu. També ho fa a revistes indexades sota altres categories de Web of Science. Aquesta producció tanmateix, és indicativa de la diversitat de la recerca a l'Escola. A títol informatiu, es mostren les principals dades bibliomètriques del conjunt d'articles publicats a partir de la cerca feta sobre la producció dels 319 membres actius del PDI de l'Escola de Camins, en el període 2012-2021; així com la taula següent amb la llista dels articles que han rebut com a mínim 100 citacions, independentment de la revista on han aparegut. Els autors de l'Escola es destaquen en negra.

Producció 2012-2021

Any	# Articles
2021	336
2020	323
2019	294
2018	291
2017	290
2016	288
2015	272
2014	271
2013	264
2012	228
<b>Total</b>	<b>2857</b>

Citacions 2012-2021

- Total d'articles publicats: 2857 (1526 recollits en l'apartat *Gràfics i dades d'articles publicats*)
- Quantitat de citacions rebudes: 51519 (26788 recollits en l'apartat *Gràfics i dades de citacions rebudes*)
- Mitjana de citacions per ítem: 18,03 (17,55 en l'apartat *Gràfics i dades de citacions rebudes*)
- Índex H període 2012-2021: 78 (62 en l'apartat *Gràfic i taula comparatius de l'índex H*)
