## Author Correction: Identification of fungal lignocellulose-degrading biocatalysts secreted by *Phanerochaete chrysosporium* via activity-based protein profiling

Christian Schmerling, Leonard Sewald , Geronimo Heilmann , Frederick Witfeld, Dominik Begerow , Kenneth Jensen , Christopher Bräsen, Farnusch Kaschani , Herman S. Overkleeft, Bettina Siebers  & Markus Kaiser 

Correction to: *Communications Biology* <https://doi.org/10.1038/s42003-022-04141-x>, published online 16 November 2022.

In the original version of the Article, an incorrect additional description of panel b in Figure 1 was included. The following sentence has now been removed:

**b** Lignocellulose is a complex and recalcitrant polymer built up from cellulose, xylan (hemicellulose), and lignin. Its degradation requires the synergistic action of various different enzymes.
