**School Respect**  
**Natalia Porter**  
**3rd Grade**  
**Ms. Michel**

Showing respect in school is important because it can get you in trouble if you show disrespect in school. Disrespect in school looks like a student throwing books or writing on stuff that's the school's property. If you're a student who gets in trouble a lot, that can make the teacher want to quit her or his job. If you throw books around and mess up the school the school has to shut down and re-clean the school and it will be way harder to earn money to open the school back up.

One solution to solve disrespect in school is to have more activities and more sports. It can distract the kids from doing something bad. A game like football can help them get their anger out and not get their anger out by throwing books or writing on school property. That will make schools more peaceful.

Another solution is to respect all teachers because you never know when someone will see you being a good person in your classroom. As a student I will remind people to do the right thing because the teacher will be less stressed. I am a good person. Doing the right thing will help kids get a better education. They can pay better attention. That will make them succeed in life.

**Littering**  
**Daeshawn Miller**  
**3rd Grade**  
**Ms. Tegg**

**One issue in the world is littering. People litter all over the world. People litter when it is not wanted because if you litter in the ocean sea creatures can DIE. When you litter on the street it is not good either because stray dogs and cats are hungry. When they get hungry they have to eat human food trash and get sick. If they get sick they might die.**

**One way to stop littering is to recycle, reduce and reuse. so if you go to a campsite and you see trash you can recycle. If you see a glass jar you can reuse it. If you have a paper towel you can reduce it just by using one. This will give the world more things to use and cut down on waste.**

**The last thing you can do to prevent littering is picking up trash and making more trash cans. You can give your local thrift store things that they can resell instead of making trash. You can pick up trash that comes on the beach or tell the garbage truck to come on Monday and Tuesday. You can pick up trash when the garbage truck drops trash and put it in the garbage can and recycle reuse reduce. We can hold the garbage until you see a trash can. When we do these things we are making the world a better place to prevent littering. The world will be much cleaner.**

*Help the Homeless*

*Deanny Rodriguez*

*3rd Grade*

*Ms. Tegg*

An issue I really want to help is homeless pets and people. This issue is really important because some kids and adults, even families, are living on the streets because sometimes they might be fired from their job. Also they might be behind on rent and the owner of that house might be tired of not getting rent money or the electric bill. It's really bad and we need to help because some people die because they haven't eaten in a long time. They can get sick from how cold it is in the winter.

One day I saw a homeless puppy so I opened the gate to let the puppy in. My next door neighbors had a dog and had dog food. By that time we figured out it was her. Her name was Snowball. It had a number on her collar so we kept calling it but the owner did not pick up. Snowball's owner called my number and we told her to come. The next day she got Snowball back. If you ever find a missing dog, look on its collar and see its name and number. If there is not a number on the collar, call a local shelter.

One way to help homeless people is to give them money. They need money for certain reasons. They need to get new clothes because the clothes they have on might be ripped up. Another reason to donate money is so that the family or person can stay at a hotel for 2 or 3 nights. If you want you could be friends with them and family or could meet up every day. Next you can visit them or they can visit you.

**How to Save Resources**  
**Geovanna Nunes de Aquino**  
**3rd Grade**  
**Ms. Tegg**

Wasting resources is bad because in the future people may not have food, water, and paper. People kill trees to give us paper. And water and food are so important for our life. However, we may use a lot of food, water and paper. All the resources are limited.

A way to save water is to not leave the sink open. The other way to save water is not to get a cup of water and throw it away. Another way to save water is not to stay in the shower for too long. We can also ask factories to reduce the pollution to water. Then we will have water for the world.

A way to save paper is to use both sides of the paper. We can use more electronic resources instead of paper. The way to save food is not to order too much food in the restaurant because you will not eat everything. Another way is to share food with your friends if you can not eat them all so you don't need to throw them out. This will make sure we have enough food for everyone.

**How to Stop Littering**  
**Gaoussou Dicko**  
**3rd Grade**  
**Ms. Tegg**

One issue I would like to improve is littering. This is an issue because this damages our environment. This issue is really important because when it is in the water it can kill living things and living things on surface

One way we can help is by making more garbage cans. If we continue to do this our environment will be healthy. This even helps animals to NOT choke on garbage. We can recycle trash so we can give the trash to recycling centers. Or if you see garbage on the floor, pick it up.

Another way we can save the environment is we can make signs that say NO LITTERING. We can make a lot of signs so people can put garbage in the garbage cans. We can teach people to stop littering. We can make classes to teach people all about littering and the environment.

**Littering**  
**Jaelah Pearson**  
**3rd Grade**  
**Ms. Tegg**

One issue I would like to fix is littering on floors because littering is a bad thing. That's why we have so much food and drinks on the floor. People think that littering is a good thing but it's not ok. Some people think that littering is a good thing because other people put trash on the floor. Our city is going to look bad because people put trash on the ground and some pets poop on the ground.

Let's fix this problem. What I would do is pick up the trash and put it in the garbage. That's where it belongs. Or I will pick up the food first and then I will pick up the drinks last so you don't have to pick up all the trash at the same time because it's going to take a long time.

We can fix the problem with a second solution. If you have water that's empty, put it in the recycle bin. If you have a half full of juice don't throw it because it's going to splash people and their clothes are gonna get dirty. Cleaning up the trash that's on the ground in 7 days helps the future.

*Stop Smoking*

*Layla Lucas*

*3rd Grade*

*Ms. Tegg*

In Newark when you look around you will see people on the ground smoking. Smoking is bad for the environment and it is bad for your body and your lungs. Your lungs will close up and you can not breathe.

A way to help smoking go away is that cigarettes should be banned from all stores. It will be banned from all stores. If it was banned from stores, people cannot buy it. They will not be able to smoke.

People should not be smoking in the neighborhood. They should be healthy and eat vegetables. So they should stop smoking and be healthy.

If we see people smoking on the ground that is bad smoking. Smoking is bad to the environment because the oxygen will smell like smoke.
