It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Table of Contents

1	General introduction	9
2	Efficient transduction of simian cells by HIV-1-based lentiviral vectors that contain mutations in the capsid protein <i>Mol Ther 2007;15:930-937</i>	37
3	Interaction of Cyclophilin A and Trim5 α with the HIV-1 capsid <i>Submitted for publication</i>	61
4	The effect of Trim5 polymorphisms on the clinical course of HIV-1 infection <i>PLoS Pathog 2008;4(2):e18</i>	77
5	Polymorphisms in the regulatory region of the cyclophilin A gene influence the susceptibility for HIV-1 infection <i>PLoS ONE 2008;3(12):e3975</i>	101
6	The effect of type I interferons on HIV-1 replication in monocyte derived macrophages <i>Submitted for publication</i>	119
7	General discussion	139
	Summary	155
	Samenvatting	161
	Nawoord	167
