Epiretinal membranes and neural plasticity of the retina

Oberstein, S.Y.L.

Publication date
2009

[Link to publication](#)

Citation for published version (APA):

Oberstein, S. Y. L. (2009). *Epiretinal membranes and neural plasticity of the retina*. [Thesis, fully internal, Universiteit van Amsterdam].

General rights

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

CONTENTS

CHAPTER 1	General Introduction	p 11
CHAPTER 2	Heavy trypan blue staining of epiretinal membranes: an alternative to infracyanine green <i>Br J Ophthalmol. 2007; 91(7):955-7.</i>	p 25
CHAPTER 3	Use of heavy trypan blue in macular hole surgery <i>Submitted for publication</i>	p 35
CHAPTER 4	Cell proliferation in epiretinal membranes: characterization of cell types and correlation with disease condition and duration <i>Accepted for publication in Molecular Vision</i>	p 49
CHAPTER 5	Identification of ganglion cell neurites in human sub- and epiretinal membranes <i>Br J Ophthalmol. 2007; 91(9):1234-8.</i>	p 69
CHAPTER 6	Ganglion cell neurites in human idiopathic epiretinal membranes <i>Br J Ophthalmol. 2008; 92(7):981-5.</i>	p 85
CHAPTER 7	Evidence for melanopsin, calretinin, rodopsin and neurofilament containing neurites in epiretinal membranes <i>Submitted for publication</i>	p 99
CHAPTER 8	Review - Neural plasticity of the stressed retina and the crucial role of glia and microglia <i>In preparation</i>	p 121
SUMMARY & CONCLUSIONS		p 171
SAMENVATTING		p 179
ACKNOWLEDGEMENTS		p 185
CURRICULUM VITAE		p 191
