Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Preface	xi
1 String theory	1
1.1 Motivations for supersymmetric string theory	1
1.2 Bosonic string theory	7
1.2.1 BRST quantisation of Polyakov action	14
1.2.2 Open strings	25
1.2.3 Curved backgrounds	28
1.3 RNS formalism and its limitations	31
1.3.1 Tree-level	32
1.3.2 Higher genus and limitations of RNS	41
2 Pure spinor formalism	45
2.1 Minimal pure spinor formalism	46
2.1.1 Spectrum	48
2.1.2 Tree-level prescription	49
2.1.3 One and higher-loop prescription	52
2.1.4 Decoupling of Q_S exact states and PCO positions	55
2.2 Non-minimal pure spinor formalism	56
2.3 Results from the pure spinor formalism	59
3 Basic techniques	63
3.1 Invariant tensors	63
3.2 Clifford algebra and pure spinors	65
3.2.1 The $SU(N)$ subgroup of $SO(2N)$	66
3.2.2 Charge conservation and tensor products	70
3.2.3 Dynkin labels and gamma matrix traceless tensors	71
3.2.4 Explicit expression for gamma matrices	72
3.2.5 Pure spinors	73
3.3 Pure spinor Lorentz generators	73

3.3.1	Lorentz current OPE's with unconstrained spinors	74
3.3.2	Gauge fixing w_α invariance	75
3.3.3	Currents containing pure spinors	77
3.4	Lorentz invariant measures	80
3.4.1	Measure for the zero modes of λ	80
3.4.2	Measure for the zero modes of N^{mn}	80
3.5	Gamma matrix traceless projectors	81
3.5.1	Arbitrary rank	82
3.6	Chain of operators for b ghost	83
4	BRST quantisation of the pure spinor superstring	85
4.1	Coupling to 2d gravity	86
4.1.1	Topological gravity and Q_S invariance	88
4.2	Adding vertex operators	89
4.3	BRST quantisation	91
4.3.1	Summary	94
4.4	Pure spinor measure	94
4.4.1	Minimal formulation	97
4.4.2	Non-minimal formulation	99
4.5	Ghost contribution	101
4.6	Replacing worldsheet fields by zero modes	102
5	Decoupling of unphysical states	105
5.1	Tree level	106
5.1.1	No C integration	107
5.1.2	Including C integration	109
5.1.3	Global issues	114
5.2	One loop	114
5.2.1	No B integration	114
5.2.2	Including B integration	122
5.2.3	Non-vanishing of the trace of (ϵTR)	124
5.3	No-go theorem for Q_S closed, Lorentz invariant PCOs	126
5.4	Proof of decoupling of unphysical states	130
5.4.1	Tree-level amplitudes	130
5.4.2	Higher-loop amplitudes	133
5.5	Origin of the problems	137
5.5.1	Minimal formalism	137
5.5.2	Non-minimal formalism	138
5.5.3	Toy example	139
5.5.4	Singular gauge and possible resolution	141

6	Discussion and conclusion	143
A	Detailed computations of I_k	147
A.1	Coefficients in λ integrals	147
A.1.1	Proof of equations (A.5) and (A.6)	148
A.2	Computing the I_k 's	150
	Bibliography	155
	Samenvatting	161
	Acknowledgments	167
