Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Introduction	1
1 Background	3
1-1 The carbon family	4
1-1.1 Graphite	5
1-1.2 Nanotubes	6
1-1.3 C ₄₆ carbon clathrate	7
1-2 Theory	9
1-2.1 A reminder of thermodynamics and statistical mechanics	9
1-3 Simulation methods	10
1-3.1 Markov-chain Monte Carlo	10
1-3.2 Classical molecular dynamics	11
1-3.3 Car-Parrinello molecular dynamics	13
1-3.4 The LCBOPII semi-empirical potential	14
1-4 References	18
2 The equation of state of graphite	21
2-1 Introduction	22
2-2 Methods and models	22
2-3 Comparison with experiments	23
2-4 High-temperature equation of state	26
2-5 Conclusions	28
2-6 References	31
3 The melting of graphite	33
3-1 Introduction	34
3-2 Methods	34
3-2.1 Models and simulation methods	34
3-2.2 Thermodynamic integration	35
3-2.3 The multi-reference method	37
3-2.4 Coexistence	41
3-3 Results	43
3-3.1 Melting temperature at 2 GPa	43
3-3.2 Melting line	44

3-3.3	Low-density liquid carbon	46
3-4	Conclusions	50
3-5	References	53
4	On the graphitization of SWCNT bundles	57
4-1	Introduction	58
4-2	Low temperature regime	59
4-2.1	Review of low-temperature high-pressure SWCNT bundles	59
4-2.2	Low-temperature results	62
4-3	High-temperature regime	65
4-3.1	Review of high-temperature transformations in SWCNT bundles	65
4-3.2	High-temperature results	68
4-4	Summary and discussion	77
4-5	Conclusion	78
4-6	References	80
5	On the stability of DWCNT bundles and foams	85
5-1	Introduction	86
5-2	Methods and models	87
5-3	Ambient temperature results	87
5-4	High-temperature stability	89
5-5	On nano foams and their mechanical properties	95
5-6	Conclusions	97
5-7	References	99
6	Carbon clathrate at high temperature	103
6-1	Introduction	104
6-2	Methods and models	105
6-3	C ₄₆ at zero temperature	107
6-3.1	Structural properties	107
6-3.2	Bulk Modulus	110
6-4	High temperature high-pressure results	110
6-5	Conclusions	116
6-6	References	117
	Summary	119
	Samenvatting	123
	Acknowledgments	127
