Citation for published version (APA):

Angermayr, S. A. (2014). *Synthetic biology of cyanobacterial cell factories*. [Thesis, fully internal, Universiteit van Amsterdam].

General rights

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Table of contents

1	General introduction	7
2	Engineering a cyanobacterial cell factory for production of lactic acid	31
3	On the use of metabolic control analysis in the optimization of cyanobacterial biosolar cell factories	47
4	Exploring metabolic engineering design principles for the photosynthetic production of lactic acid by <i>Synechocystis</i> sp. PCC 6803	59
5	Carbon sink removal: Increased photosynthetic production of lactic acid by <i>Synechocystis</i> sp. PCC 6803 in a glycogen storage mutant	81
6	Chirality matters: Synthesis and consumption of the D-enantiomer of lactic acid with <i>Synechocystis</i> sp. PCC 6803	87
7	Intermezzo: The variety of excreted products and synthetic biology targets in the intracellular metabolism of metabolically engineered cyanobacteria.....	101
8	Synthesis of 2,3-butanediol by <i>Synechocystis</i> sp. PCC 6803 via heterologous expression of a catabolic pathway from lactic acid- and enterobacteria.....	111
9	Microdroplet-based assay and sorting of lactate secreting cyanobacteria	129
10	Dynamics of the physiology, metabolome and proteome during the circadian cycle of <i>Synechocystis</i> sp. PCC 6803 under culturing conditions relevant for mass culturing	143
11	General discussion	163
	References.....	177
	Summary/Samenvatting.....	193
	Publications.....	201
	Acknowledgements.....	203
