It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Chapter 1	Introduction	7
Chapter 2	MeCP2 revisited: chromatin decondensation and the displacement of HP1 γ without transcriptional activation	15
Chapter 3	Truncated HP1 lacking a functional chromodomain induces heterochromatinization upon <i>in vivo</i> targeting	33
Chapter 4	Pericentromeric heterochromatin domains are maintained without accumulation of HP1	45
Chapter 5	A cell system to analyze epigenetic gene regulation	61
Chapter 6	Towards hierarchical eukaryotic gene network representations: a perspective	73
Bibliography		84
Summary		94
Samenvatting voor iedereen		96
