TABLE OF CONTENTS

| | |
|--|-----|
| Chapter 1 | |
| General introduction and outline of this thesis | 9 |
| Chapter 2 | |
| Plasma fractalkine is a sustained marker of disease severity and outcome in sepsis patients | 19 |
| Chapter 3 | |
| Chronic antiplatelet therapy is not associated with alterations in the presentation, outcome, or host response biomarkers during sepsis: a propensity-matched analysis | 39 |
| Chapter 4 | |
| Prior use of calcium channel blockers is associated with decreased mortality in critically ill patients with sepsis; a prospective observational study | 59 |
| Chapter 5 | |
| The host response in critically ill sepsis patients on statin therapy | 79 |
| Chapter 6 | |
| Risk factors, host response and outcome of hypothermic sepsis | 101 |
| Chapter 7 | |
| Impact of HIV infection on the presentation, outcome and host response in patients admitted to the Intensive Care Unit with sepsis; a case control study | 121 |
| Chapter 8 | |
| Reduced responsiveness of blood leukocytes to lipopolysaccharide does not predict nosocomial infections in critically ill patients | 141 |
| Chapter 9 | |
| The host response in sepsis patients developing intensive care unit-acquired secondary infections | 153 |
| Chapter 10 | |
| Summary and general discussion | 185 |
| Chapter 11 | |
| Nederlandse samenvatting | 195 |
| List of contributing authors | 202 |
| List of publications | 204 |
| Portfolio | 206 |
| Dankwoord | 208 |
