Acknowledgements

This PhD experience taught me about the fascinating world of epigenetics that leave me astounded and the scientific thinking but also a lot about human behaviour. Everyday I get to explore the sensation of climbing a mountain with the excitement and the frustrations, sometimes I was terrible failing and fighting but there has been day in which I reach the summit of the mountain with all the passion that belongs to me since always. Through this overwhelming experience I reach an important life landmark. Different are the people and friend met along the way, which made my climbing softer and to which I would like to express all my gratitude.

First at all I would like to thank my supervisor Valérie for giving me the possibility to be part of an amazing ITN network, for all the shared scientific knowledge and for the efforts to get to the point. Of course also for “ses pâtisseries et vin françaises”. Merci beaucoup pour tout!!

Paul Frasz, for giving me the opportunity to continue and finish the PhD, guesting me in the lab and for the scientific and writing advises. Ronald Koes, for taking care of the UvA bureaucracy and the doctorate regulations and for giving me, with Paul, the possibility to experience the very nice and stimulating UvA working environment.

Phillippe Andrey, for the pure moments of learning during the maths/physics/stat meetings, I really enjoyed.

All the bright group leader of the EpiTRAITS network for the discussions that have made the fellows grow day by day. A particular thanks goes to Maike Stam to having led in an excellent way the groups, together with Helen Bergman.

Ortrun Mittelsten Scheid, my amazing mentor for her support during this year and for the fruitful discussion.

All my EpiTRAITS friends, it was such a great time (scientific and social life) with you all. Till my BIG friend, that read my very first draft of chapter 1 and that shared with me his wide scientific knowledge. Suraj my favourite kind indian Prince, that make me know his country. Blaise, for the reading of chapter 5 and pour toute le “force et courage” give to me. Dorota, the sweet blondy girl that shared with me all the room during the meeting and that was making the

busy-meeting days more relaxing with her songs. Pawel, for his spirit of humor even in the most frustrating moments. Javi, my foreigners support (we shared so much together). Dimitrios, for his “Thanks Marie”. Ruri, for her kindness. Jean-Louisi and Johan, the French “combriccola”.

My little INRA-Italian family: Enrico, Elisa, Federica, Dario, Giorgiana per il supporto quotidiano, senza di voi non sarei sopravvissuta. Un grazie speciale va a Enrico e Elisa per le spontanee discussioni scientifiche fatte insieme.

Julien, Corinne, Luc, Trang pour le dejeuner a la canteen ensemble et pour tout le colere et rires que nous avons partagé.

Aude e Beatriz for the funny and relaxing time spent together.

Noemi, Giacomo e la piccolo patata Ginevra che sono stati un po come la mia famiglia Parigina.

Loeiza, Vincent, Matthieu e il loft di Gentilly qui a été ma deuxième maison à Paris.

Blaise, Giulia e la bella Matilde per essermi stati vicini nel periodo Olandese.

All the very nice people meet at Uva: Ruy, Rachid, Manon, Marc and Anouk that integrate me very fast on the university environment.

Martino, il mio uomo del Norde che mi dona amore quotidiano e con cui é impossibile annoirarsi, che ha contribuito alla rilettura di questi tesi e alla sua parte grafica.

La mia FAMIGLIA mamma, papa, Luigi che mi é stata sempre vicina e che con i loro sacrifici ha permesso arrivassi a questo traguardo, il loro supporto é stato immensamente grande. Grazie Mille!!

Grazie, merci, dank u wel, thank you to all the people that left on me a positive mark and that give me awesome support when needed it!
