An exploration from correlation to causation

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus

prof. dr. ir. K.I.J. Maex

ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Aula der Universiteit
op woensdag 25 april 2018, te 11:00 uur

door Vanessa Catherine Harris

geboren te Walnut Creek, Verenigde Staten van Amerika

PROMOTIECOMMISSIE:

Promotor(es):

Prof. dr. W.J. Wiersinga AMC-UvA
Prof. dr. M. Boele van Hensbroek AMC-UvA

Copromotor(es):

Prof. dr. T. van der Poll AMC-UvA
Prof. dr. C. Giaquinto Università degli studi di Padova

Overige leden:

Prof. dr. J.M. Prins AMC-UvA
Prof. dr. H.L. Zaaijer AMC-UvA
Prof. dr. F.G.J. Cobelens AMC-UvA
Prof. dr. A.M. Tutu-van Furth Vrije Universiteit Amsterdam
dr. U.D. Parashar CDC, Division of Viral Diseases
dr. P.C.J.L. Bruijning-Verhagen Universitair Medisch Centrum Utrecht

Faculteit der Geneeskunde

TABLE OF CONTENTS

Part I	Background	7
Chapter One:	General Introduction	9
Chapter Two:	The intestinal microbiome in infectious diseases: the clinical relevance of a rapidly emerging field	31
Part II	Correlating microbiome composition and rotavirus vaccine immunogenicity	55
Chapter Three:	Rotavirus vaccine response correlates with infant gut microbiota composition in Pakistan	57
Chapter Four:	Significant correlation between the infant gut microbiome and rotavirus vaccine response in rural Ghana	79
Chapter Five:	Trans-kingdom viral, bacterial, and fungal microbiome dynamics correlate with rotavirus vaccine immunogenicity in young infants in rural Ghana	101
Part III	From correlation to causation	127
Chapter Six:	Microbiome composition correlates with rotavirus immunogenicity in a novel rotavirus mouse model	129
Chapter Seven:	Prospective modulation of the gut microbiome boosts rotavirus vaccine immunogenicity in a randomized controlled trial	153
Part IV	From causation to intervention	187
Chapter Eight:	Summary	189
Chapter Nine:	Discussion and Future Directions	197
Addendum		209
