TABLE OF CONTENTS

Chapter 1	General introduction and overview	9
Chapter 2	Current and future burden of venous thrombosis: not simply predictable	19

PART I: SEX-SPECIFIC MECHANISMS

Chapter 3	Epidemiology of venous thromboembolism: the influence of sex and site	49
Chapter 4	Sex-specific differences in the presenting location of a first venous thromboembolism	75
Chapter 5	Sex-specific differences in the distal versus proximal presenting location of acute deep vein thrombosis	93
Chapter 6	Effect of gender affirming hormone use on coagulation profiles in transmen and transwomen	111
Chapter 7	Endogenous sex hormones and risk of venous thromboembolism in young women	131

PART II: WOMEN-SPECIFIC MODELS FOR RISK ASSESSMENT

Chapter 8	Hypertensive complications of pregnancy and risk of venous thromboembolism	153
Chapter 9	Cardiovascular risk prediction models for women in the general population: a systematic review	173

PART III: WOMEN-SPECIFIC MANAGEMENT

Chapter 10	Abnormal vaginal bleeding in women with venous thromboembolism treated with apixaban or warfarin	199
------------	--	-----

Chapter 11	Abnormal vaginal bleeding in women of reproductive age treated with edoxaban or warfarin for venous thromboembolism: a post hoc analysis of the Hokusai-VTE study	217
Chapter 12	Aspirin or heparin or both for improving pregnancy outcomes in women with persistent antiphospholipid antibodies and recurrent pregnancy loss	239
Chapter 13	Summary and perspectives	293
