The published lifetimes given in the third column of Table 1 for the 2_2^+ , 2_3^+ , and 2_4^+ states are incorrectly given as 1.9(1) ps, 0.23(2) ps, and 0.54(4) ps, respectively. The correct lifetimes for the 2_2^+ , 2_3^+ , and 2_4^+ states are 1.27(6) ps, 0.124(7) ps, and 0.25(1) ps, respectively, as one can verify from the given $B(E2)$ and $B(M1)$ values that were directly deduced from the measured Coulomb excitation yields.

Acknowledgement

We would like to thank Dr. Filip G. Kondev for pointing out the discrepancy between the published lifetimes and transition strengths.
