***The books of this series are submitted to SCOPUS, Google Scholar and Springer-link***

Forensic and Medical Bioinformatics (FMB) series is a platform to bring interdisciplinary Technology driven Discovery and Disruptive content useful for Industry professionals, Researchers and Academicians and Advance Research students. We solicit contributions related to novel Research and innovation, Theory, applications, their technical elements and practical approaches related to

- Bio inspired technologies and Engineering in Biotechnology and Medical Sciences, Translational engineering
- Machine Learning and Artificial Intelligence in Health, Bioinformatics and Computational Biology
- Biosensors, Circuit and Systems Bio engineering, Communication technologies, Therapeutic systems and technologies, Biorobotics, Biomedical Signal Processing, BioMEMS, Neuro engineering, Biomedical circuits and systems
- Forensic Science and related laws, Case Studies and Scientific aids to investigation, Cyber Security, Bio Image Processing and Security
