This handbook was created in cooperation with the University of Memphis:

COLLEGE OF EDUCATION
DEPARTMENT OF ENGLISH
DEPARTMENT OF MATHEMATICAL SCIENCES
UNIVERSITY LIBRARIES
OFFICE OF THE PROVOST & ACADEMIC AFFAIRS
DR. KAREN WEDDLE-WEST, VICE PRESIDENT OF STUDENT ACADEMIC SUCCESS

with special appreciation for Katie Moynihan, former library assistant for Research & Instructional Services at McWherter Library.

Principal Investigators & Contributors

BEVERLY CROSS

PRINCIPAL INVESTIGATOR

Dr. Cross serves as the Lillian and Morrie Moss Chair of Excellence in Urban Education at the University of Memphis. In this role, she provides leadership in the College of Education's mission to enhance educational success for urban learners.

LADRICA MENSON-FURR

CO-PRINCIPAL INVESTIGATOR

Dr. Menson-Furr is an Associate Professor of English and African American Studies. She is also the Assistant Dean of the College of Arts & Sciences, serving in an advisory capacity and assisting the Dean with all matters pertaining to the administration of the College.

E. OLÚŞĒGUN GEORGE

CO-PRINCIPAL INVESTIGATOR

Dr. George is a Full Professor of Mathematics at The University of Memphis. His interests lie in modeling and analysis of clustered data, Bayesian procedures in bioinformatics and meta-analysis.

JOHN EVANS

CO- PRINCIPAL INVESTIGATOR

Dr. Evans is the Executive Director and Associate Dean of University Libraries. He represents the Libraries on campus, in the community, and on the state and national levels and oversees strategic planning, budgeting, and faculty and staff recruitment.

MEREDITH BOULDEN

PROJECT MANAGER

Dr. Boulden is an experienced Writing Consultant and English Instructor with a demonstrated history of working in higher education. With additional experience in Library Research & Instruction, she brings an interdisciplinary approach to her work via her experience in college instruction and literary and composition studies.

LINDA PAYNE

GRADUATE ASSISTANT

Linda works to improve the experiences of end users in order to better meet objectives, facilitate learning, and improve performance. Her career experience is in writing and digital content design; user experience and usability testing; project management; and instructional design. She is currently focused on completing her Ed.D. in Instructional Design & Technology.

CARL HESS

FIRST YEAR EXPERIENCE LIBRARIAN

Carl works to improve library outreach and services for first-year and first-generation undergraduate students at the UofM. He teaches how to find, evaluate, cite, and keep track of research sources. His research interests include collaboration between academic libraries and other units, outreach programs, Open Educational Resources (OER), and information literacy instruction.

Preface

1. TENNESSEE TEXTBOOK AFFORDABILITY FOR STUDENT SUCCESS TASKFORCE

In Spring 2020, the Tennessee Higher Education Commission (THEC) convened the Tennessee Textbook Affordability for Student Success Taskforce, a coalition of teaching faculty, students, librarians, and administrators from various universities and community colleges across the state, to address equity in college classrooms by lowering the costs of course textbooks and learning materials.

Since its inception, the Taskforce has hosted Tennessee's Open Education Week, including seminars about the implementation of OER at various institutions of higher learning through Tennessee and workshops about the overlap between DEI and textbook affordability.

2. OPEN EDUCATIONAL RESOURCES (OER) GRANT PROJECT

The Taskforce also started the Open Educational Resources (OER) Grant Project, which awards funds to OER research and implementation teams across the state. In January 2021, the UofM received one such grant based on our status as a locally governed state institution and our intentions to use open educational resources to support access, diversity and equity initiatives. The \$100,000 grant has been used at the UofM to help implement OER initiatives in the following three areas:

1. Initiatives connected to the larger campus effort for eradicating racism and promoting social justice.
2. Support for faculty development provided by University Libraries on use of OER.
3. The pilot of initiatives in MATH1530, MATH1710C, ENGL2201 and ENGL2202.

3. IMPLEMENTATION OF OER MATERIALS AT THE UNIVERSITY OF MEMPHIS

The information here is intended to provide all teaching staff of the University of Memphis a basic understanding of Open Educational Resources. With this information and the available tools and training, faculty and instructors will move from the basics of OER concepts to the discovery and implementation of OER materials into their courses.

Implications of OER

Definition of OER

UNESCO defines Open Educational Resources (OER) as “teaching, learning and research materials in any medium – digital or otherwise – that reside in the public domain or have been released under an open license that permits no-cost access, use, adaptation and redistribution by others with no or limited restrictions.”

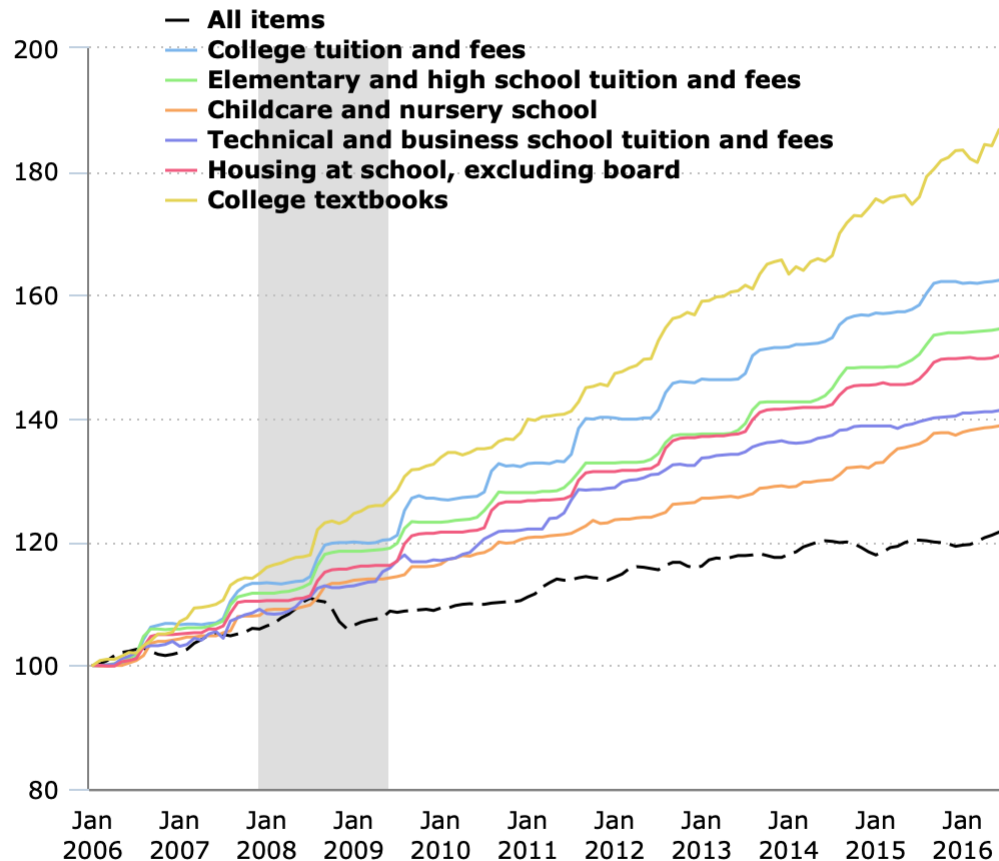

Key to this definition is that OER are educational materials ("teaching, learning, and research materials") that are free ("no-cost") for anyone to use and change ("access, use, adaptation and redistribution by others with no or limited restrictions"), which can be done because they are made open ("reside in the public domain or have been released under an open license").

Why use OER?

Consumer price indexes for tuition and school-related items, not seasonally adjusted, January 2006–July 2016

January 2006=100

Shaded area represents recession, as determined by the National Bureau of Economic Research.

According to the U.S. Bureau of Labor Statistics, inflation has impacted the average cost of college textbooks even more than tuition itself. When compared to the costs for other standard living expenses, the differences in rising costs is that much more striking.

Compared to the 200 goods followed by the national Consumer Price Index, which tracks inflation costs, the average cost of textbooks has increased by 812% since 1978. In comparison, medical expenses have increased by 575% over the same period of time, and new homes cost 325% more (bls.org).

Affordability and equity are core tenets of OER. By incorporating OER and other affordable materials into their curriculum, you can reduce the costs of course materials, making higher education more accessible to a wider array of students.

Diversity, Equity & Inclusion in Open Education

In July 2020, The Chronicle of Higher Education reported a clarion call from students to “Diversify the Curriculum.” At the same time, scholarship regarding diversifying the curriculum has moved away from suggestions of “tag on” content or “add-on” courses, to reviewing and transforming existing curriculum, essentially broadening the knowledge base for students and instructors alike.

Within the context of Open Education, diversifying the curriculum goes “beyond naming [diverse materials and academic experts] and explicitly binds equity outcomes to OER” (DOERS3, 2021). That is, rather than simply being pieces of OER initiatives, diversity, equity and inclusion are fundamental to Open Education. In fact, OER has been cited as one means of "dismantl[ing] the structural barriers that students face in our institutions" of higher education (ATD, 2022).

That said, the consideration of diversity, equity and inclusion in OER is two-fold, first in terms of the curriculum itself and then in regard to student outcomes. On the one hand, using OER in the classroom affords faculty the opportunity to explore academic materials outside of their respective departments’ traditional textbooks. Moreover, OER are remarkably flexible: faculty can update their chosen materials for their individual class environments and can also adjust these materials to better suit their students’ needs between semesters or even during any given course.

OER also have the potential to improve student outcomes and close equity gaps in higher education. When course materials such as OER are affordable, high quality, easily accessible, and inclusive, case studies have shown that college students, and “especially the most under-represented students,” benefit academically (OER Blueprint, 2021). The following slides expand on the many academic and financial benefits of OER for college students.

Pell Grant Eligible Students

In OER case studies by the University of Georgia (UGA) (2013) and the Achieving the Dream (ATD) community college study (2018), researchers used Pell Grant eligibility to measure the impact of using OER in high-enrollment general education courses.

UGA reported an increase in Pell-eligible students earning As and Bs and a significant decrease in Ds, Fs, and course withdrawals when OER were available. Likewise, forty-eight percent of the Pell-eligible participants in the ATD study self-reported that that OER made a profound impact on their ability to afford college.

At UofM, forty-seven percent of our undergraduate students are Pell Grant eligible. This indicates that, in many cases, students' expected household income is insufficient to pay for the entire costs of their college education. Based on the research, no-cost course material alternatives such as OER can keep education affordable for all our students.

**Pell Grant Status of
Degree Seeking Undergraduates
Fall 2021**

First Generation Students

First generation students are those individuals attending college whose parents do not have an undergraduate degree. Today, the majority of undergraduates are non-traditional students who hold full-time jobs, are over the age of 25, and/or are first-generation college students (Hutson et al., 2022).

Most first generation students are from low-income and minority backgrounds and face distinct challenges in completing their degrees (Hutson et al. 2022). For example, these students have a higher likelihood of carrying student debt - and more of it - than their "continuing generation" peers (Nusbaum et al., 2018).

Alleviating the cost of course materials for first generation students at UofM will make a profound impact on the student body, as thirty-three percent of our undergraduates are first generation college attendees.

**First Generation Status of Degree Seeking Undergraduates
Fall 2021**

● First Generation ● Not First Generation

Student Success with OER

Course Grades

- Course grades remains the same or improves from semester to semester for students who use OER (Nusbaum et al. 2018)
- The benefits of OER are not limited to full-time students. At the University of Georgia, the implementation of OER in introductory undergraduate courses resulted in a 53% increase in average course grades and a 30% decrease in failing grades for part-time students (Colvard et al., 2018)

Student Retention

- In 6 of 11 community colleges of one OER study, students in OER courses registered for "significantly more course credits than those who had not taken any OER course" (SRI International, 2020)

Student GPA

- In a 2020 study, students who used OER in at least one of their college courses maintained their GPAs, even when registering for additional course credits (SRI International, 2020)

Tuition Affordability

- Data from an OER community college case study indicate that "48 percent of Pell Grant recipients and 52 percent of under-represented minorities" self-reported that using OER made a significant, positive impact on their ability to afford tuition (Ashford 2018)
- 41% of all other students agreed that OER positively contributed to their ability to pay for tuition (Ashford, 2018)

Understanding OER

OER Permissions

The 5 R's

As the UNESCO definition of OER states, when using an OER you should have permission to access, use, adapt and redistribute it.

The 5 Rs of OER define the types of permissions you should have when working with OER and that you should give to others if you create your own OER. These permissions are usually granted through Creative Commons open licenses, which will be introduced later in this guide.

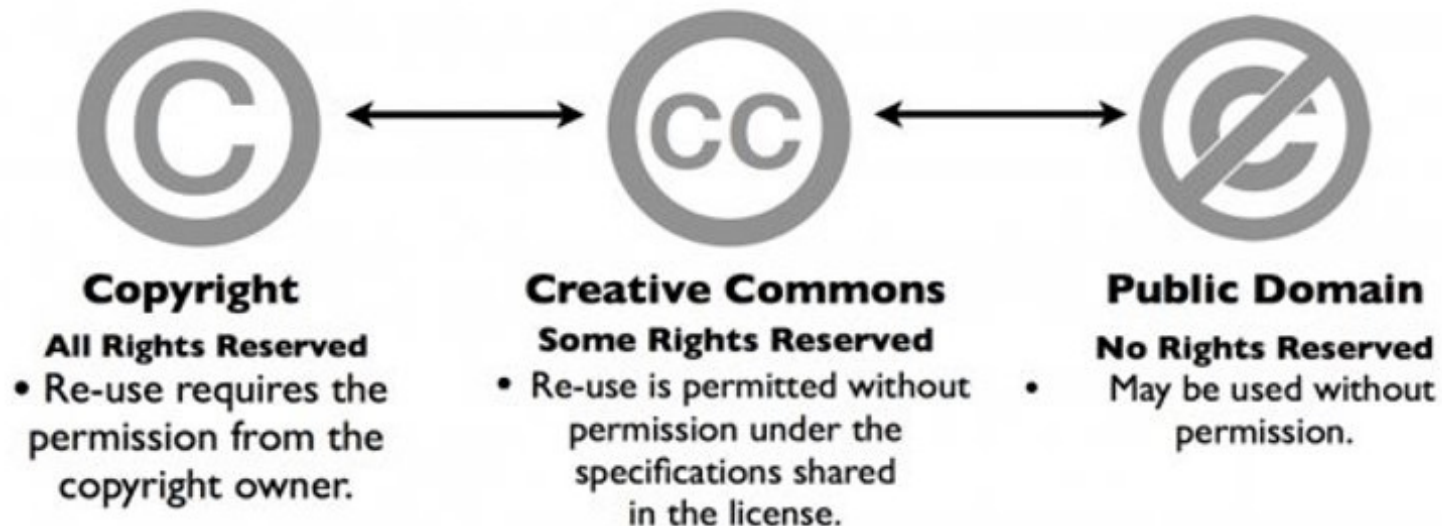

Image by BCOER Librarians from BCcampus (CC BY 4.0).

Options for Course Materials

The chart below indicates the level of freedom that users have to reuse educational materials based on whether they fall in the public domain, open education or copyright.

the spectrum of rights

"The spectrum of rights" by Michelle Pacansky-Brock is used under CC BY-NC 2.0 license

Creative Commons Licenses

Used with permission under the Creative Commons
Trademark Policy (2022)

Creative Commons (CC) licenses are at the very core of Open Educational Resources (OER). The benefits of OER are that you can use them in any way set forth by the 5Rs (retain, reuse, revise, remix, and redistribute).

On the other hand, normal copyright protections do not allow for the sort of sharing and adaption that is intrinsic to OER, as they require you to actively seek permissions from the copyright owner to use or revise their materials. As such, OER are either shared with an open license such as Creative Commons or are part of the public domain.

By applying a CC license, creators allow their work to be used by others according to the 5Rs, and users know that as long as they follow the conditions of the license, they have perpetual permission to use the work. Keep in mind, though, that all OER with Creative Commons licenses require attribution to the original creator, unlike public domain works.

Creative Commons Licenses

The chart displays the following Creative Commons license types and their permissions/restrictions:

License	Copy & Publish	Attribution Required	Commercial Use	Modify & Adapt	Change License
Public Domain	✓	✗	✓	✓	✓
BY Attribution	✓	✓	✓	✓	✓
BY-SA Attribution ShareAlike	✓	✓	✓	✓	✗
BY-ND Attribution NoDerivs	✓	✓	✓	✗	✓
BY-NC Attribution NonCommercial	✓	✓	✗	✓	✓
BY-NC-SA Attribution NonComm ShareAlike	✓	✓	✗	✓	✗
BY-NC-ND Attribution NonComm NoDerivs	✓	✓	✗	✗	✓

"Creative Commons Licenses" by GW Libraries is used under a CC BY 4.0 license.

Creative Commons licenses are coded by the degrees of flexibility they offer to users. All CC licenses are built out of the following four elements:

- BY Attribution:** you can only use the work if the creator is credited.
- NC Non-Commercial:** you cannot use the work for commercial purposes.
- ND No Derivatives:** you cannot change or adapt the work.
- SA Share Alike:** you can make changes or adaptations, but the new version must be shared under the same license or a compatible license.

To fully be compliant with the 5Rs, an OER's license cannot include the ND No Derivatives element because it prevents revising and remixing of the original material(s).

The chart above shows the permissions and restrictions associated with each Creative Commons license as well as public domain works.

DISCOVERING OER

Locating Affordable Course Materials

There are many ways to find OER. Sites that host the OER are generally called repositories. Many will have some sort of review or acceptance process to determine what gets included. There are also specialized search engines that look through multiple OER repositories.

- OER Repositories: Much like library databases, OER repositories consist of thousands of resources that are available for free to instructors and students. Some of these repositories are hosted by independent educational organizations, while others are compilations of course materials from a particular university or based on a specific educational medium like audio or visual aids. Depending on the repository you choose, you may encounter differences in the following characteristics:
 - whether OER is validated by peer review or crowdsourced reviews
 - whether a user name and password are required to access the materials
 - which disciplines are covered within the repository
 - what OER formats are available (Word, PDF, HTML, etc.)
 - what types of materials are on hand (textbooks, syllabi, course assignments, practice exercises, etc.)
- Multimedia & Interactive Tools: Not all of these materials are strictly OER; instead, many are part of the public domain. Nonetheless, these websites can contribute free/affordable, quality course materials for college students. These include the following:
 - Videos, images, and other visual content
 - Audio recordings
 - Interactive STEM exercises
 - Massive Open Online Course (MOOC): entire OER courses that have been curated by other experts in your field

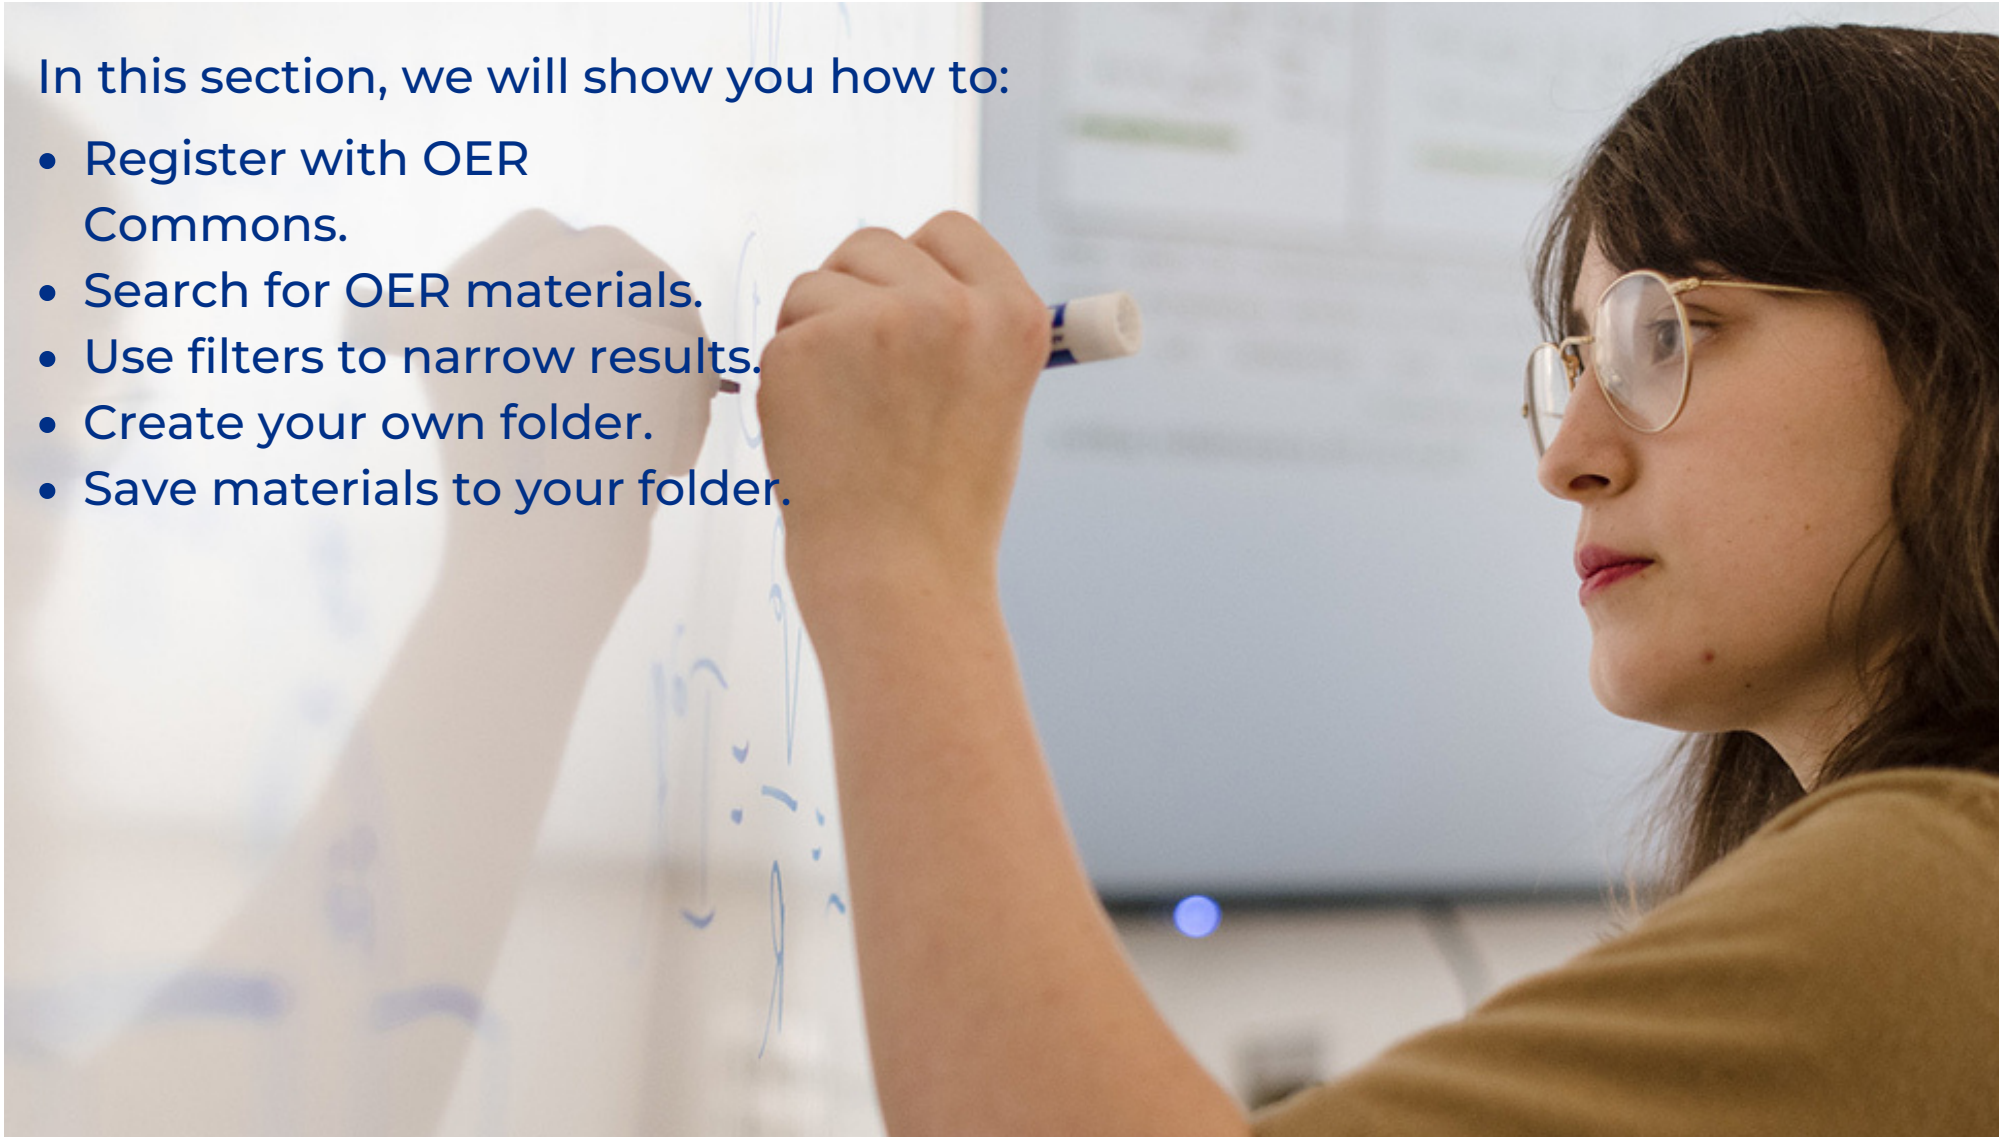

**Quickstart Guides
to
OER Commons & Canvas Commons**

Using OER Commons

Objectives

In this section, we will show you how to:

- Register with OER Commons.
- Search for OER materials.
- Use filters to narrow results.
- Create your own folder.
- Save materials to your folder.

Registering for OER Commons

Step 1. Go to oercommons.org.

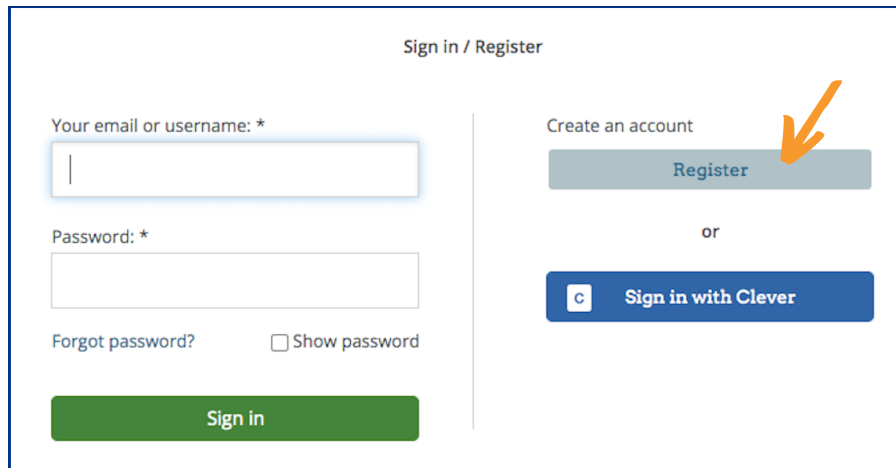

Step 2. Click Sign In/Register.

The screenshot shows the OER Commons website homepage. At the top, there is a navigation bar with the OER Commons logo on the left and several menu items: Discover, Hubs, Groups, Our Services, Add OER, a search icon, and Sign In/Register. An orange arrow points to the Sign In/Register link. Below the navigation bar is a large hero section with the text "Explore. Create. Collaborate." and a sub-headline: "OER Commons is a public digital library of open educational resources. Explore, create, and collaborate with educators around the world to improve curriculum." Below this is a search bar with a text input field containing "What are you looking for?", a search icon, and three dropdown menus for "Subject", "Education Level", and "Standard". A green "Search" button is to the right of the dropdowns. Below the search bar is a link: "Fine tune your search with our advanced search." At the bottom of the page, there is a section titled "Support a vibrant, educator-focused Commons" with a paragraph of text: "The tens of thousands of open resources on OER Commons are free - and they will be forever - but building communities to support them, developing new collections, and creating infrastructure to grow the open community isn't. Grassroots donations from people like you can help us transform teaching and learning." Below this text are two buttons: "Make a Donation Today!" with a "Donate" button (containing a heart icon) and a "Help" button (containing a question mark icon).

Registering for OER Commons

Step 3. Click **Register** or sign in with your credentials if you are already registered.

Sign in / Register

Your email or username: *

Register

Registering for OER Commons

Step 5. You should receive a confirmation message as shown.

The screenshot shows the OER Commons website header with the logo and navigation menu. The main content area displays a welcome message and a confirmation email notification.

WELCOME TO OER COMMONS
OPEN EDUCATIONAL RESOURCES

Discover ▾ Hubs ▾ Groups ▾ Our Services ▾ **Add OER** 🔍 Sign In/Register

Welcome to OER Commons
A confirmation email was sent to you.

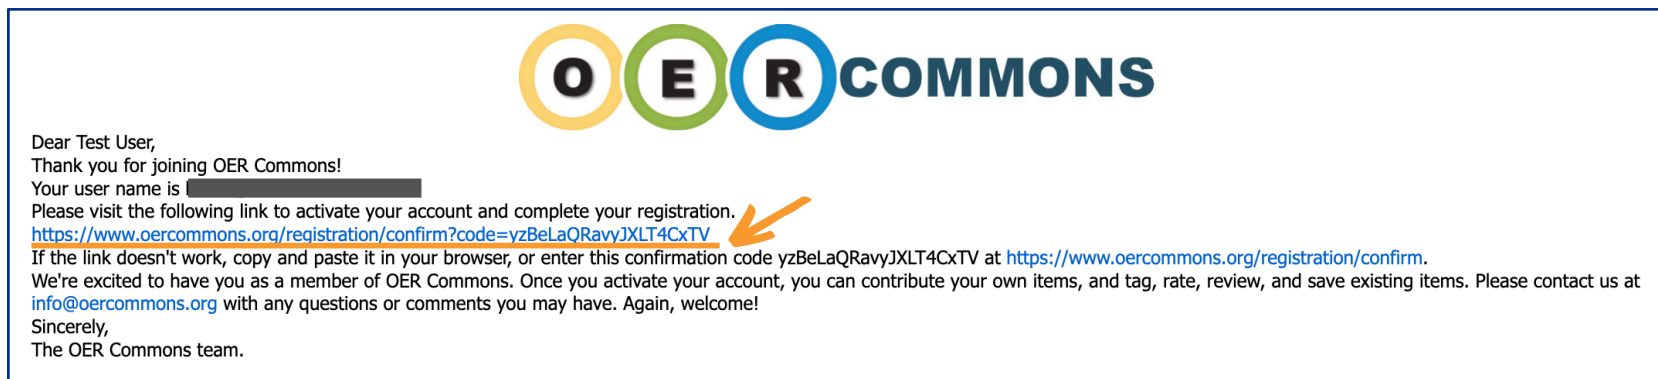

Welcome to OER Commons, a place for you to find and share open educational resources.

ISKME created OER Commons to provide support for and build a knowledge base around the use and reuse of open educational resources (OER).

Learn more about [OER Commons](#), [browse content](#), or [contribute](#) your own content to OER Commons.

Thank you for registering for OER Commons!

Step 6. Check for the confirmation email from OER Commons, and click the link provided.

The screenshot shows an email from OER Commons with a confirmation link and a confirmation code. An orange arrow points to the link.

OER COMMONS

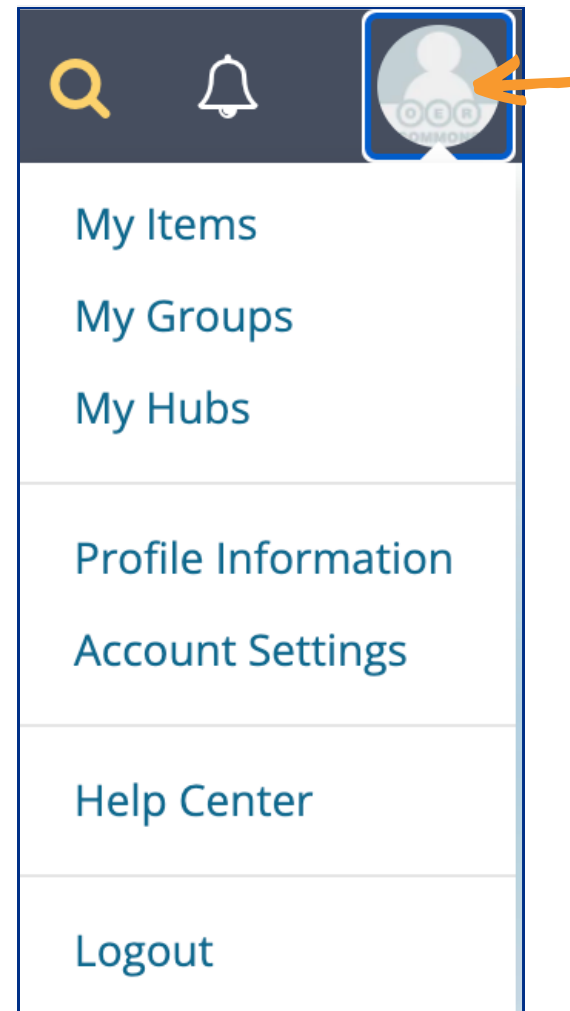

Dear Test User,
Thank you for joining OER Commons!
Your user name is [REDACTED]
Please visit the following link to activate your account and complete your registration.
<https://www.oercommons.org/registration/confirm?code=yzBeLaQRavyJXLT4CxTV>
If the link doesn't work, copy and paste it in your browser, or enter this confirmation code yzBeLaQRavyJXLT4CxTV at <https://www.oercommons.org/registration/confirm>.
We're excited to have you as a member of OER Commons. Once you activate your account, you can contribute your own items, and tag, rate, review, and save existing items. Please contact us at info@oercommons.org with any questions or comments you may have. Again, welcome!
Sincerely,
The OER Commons team.

Registering for OER Commons

You should now be registered!

If registered properly, you will see an OER placeholder image (or your profile image if uploaded) in the upper-right corner.

Click this image to see a drop-down menu of options for managing your OER materials, profile information, and more.

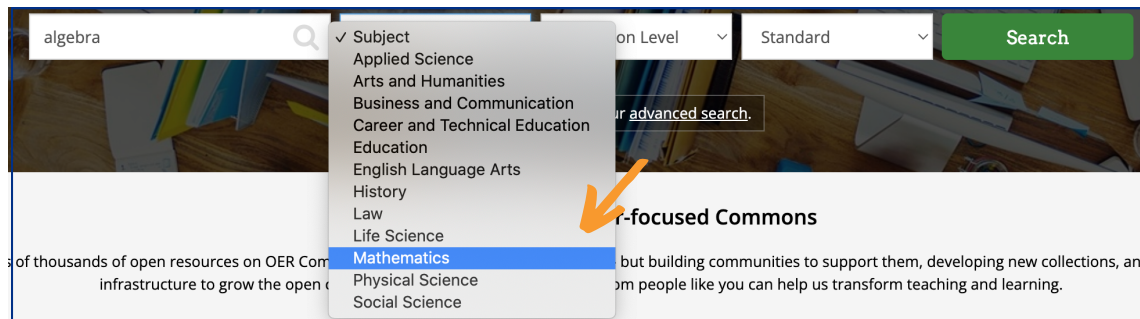

Searching for OER Materials

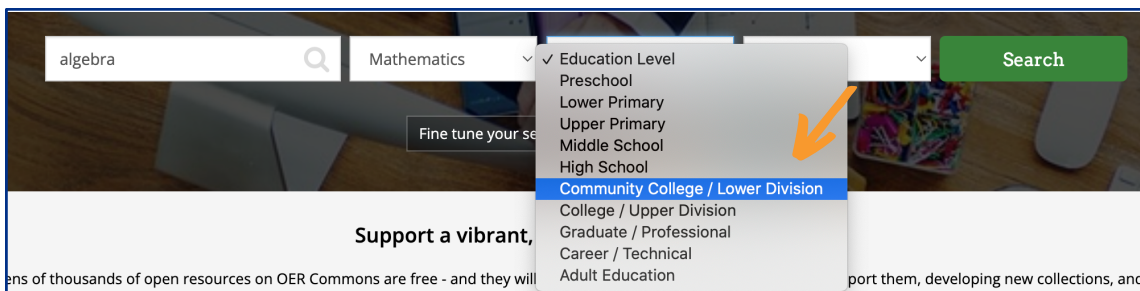

Step 1. Let's try this together. In the "What are you looking for?" search field, type the word **algebra**.

Step 2. Click the "Subject" drop-down menu and select **Mathematics**.

Step 3. Click the "Subject" drop-down menu and select **Community College / Lower Division**.

 **Tiger Tip:**
Community College /
Lower Division usually
returns the most results.

Searching for Materials in OER Commons

Step 4. We don't need any specific standards, so you can leave that field as "Standard" and click **Search**.

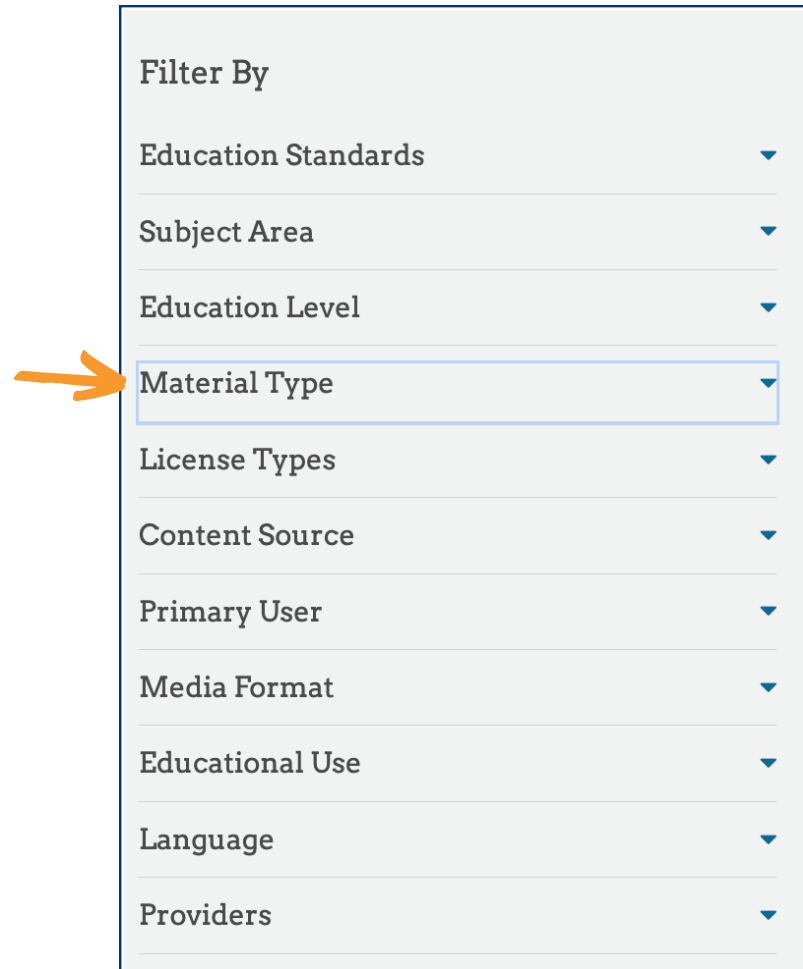

Step 5. You should see a page that looks like this at the top. Take a moment to explore this page online, especially the filters on the left.

A screenshot of the OER Commons search results page. The search bar at the top contains 'algebra' and a green 'Search' button. To the right of the search bar is a link for 'Advanced Search'. Below the search bar, the text '294 Results' is displayed. On the left side, there is a 'Filter By' section with two expandable categories: 'Education Standards' and 'Subject Area'. The 'Subject Area' category is expanded, showing a list of subjects: Applied Science, Business and Communication, Career and Technical Education, and Education. On the right side, there are controls for 'Per page' (set to 20), 'Sort By' (set to Relevance), and 'View' (set to list view). Below these controls, the 'Selected filters' section shows 'Community College / Lower Division' and 'Mathematics'. The first search result is 'Elementary Algebra', which has a rating of four stars and a description: 'It is essential to lay a solid foundation in mathematics if a ... More'. Below the description, the subject is listed as 'Algebra', the material type as 'Textbook', the provider as 'The Saylor Foundation', the provider set as 'Saylor Textbooks', and the author as 'John Redden'.

Filtering Your Search Results in OER Commons

Step 1. OER Commons allows you to filter your search based on different criteria. For example, you can filter by "Material Type."

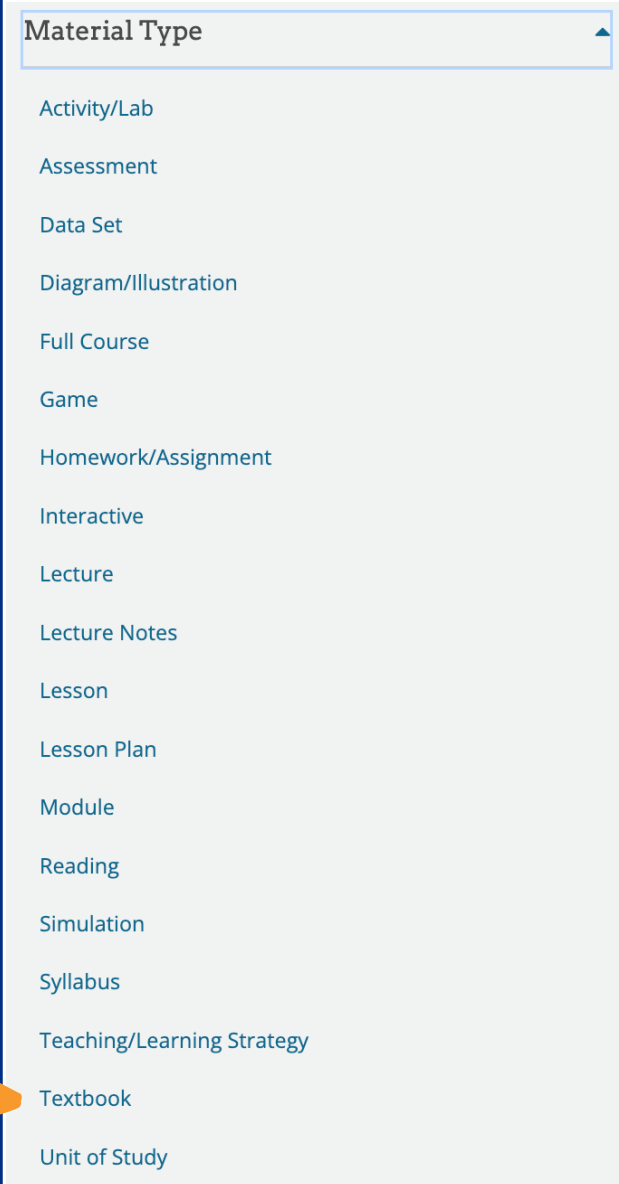

Let's try that now. Click **Material Type**.

Filtering Your Search Results in OER Commons

Step 2. As shown here, this will open a list of material types from which you can choose to filter your results.

For practice, click **Textbook**.

A screenshot of a dropdown menu titled "Material Type" with a list of options. An orange arrow points to the "Textbook" option.

- Material Type
- Activity/Lab
- Assessment
- Data Set
- Diagram/Illustration
- Full Course
- Game
- Homework/Assignment

- Lecture Notes
- Lesson
- Lesson Plan
- Module
- Reading
- Simulation
- Syllabus
- Teaching/Learning Strategy
- Textbook**
- Unit of Study

Filtering Your Search Results in OER Commons

Step 3. Notice how the results have narrowed further to show community college / lower division math textbooks. Take some time to familiarize yourself with the other filters, especially those you might use often.

The screenshot shows the OER Commons search interface. On the left is a 'Filter By' sidebar with categories: Education Standards, Subject Area, Education Level, Material Type, License Types, and Content Source. Under 'Material Type', 'Textbook' is selected. The main area shows search results for 'algebra (80)'. At the top, there are controls for 'Per page' (20), 'Sort By' (Relevance), and 'View' (list icon). Below this, 'Selected filters' are listed: 'Community College / Lower Division', 'Mathematics', and 'Textbook'. Three search results are visible: 'Elementary Algebra' (5-star rating), 'Linear Algebra with Applications' (4-star rating), and 'Introductory Algebra' (4-star rating). Each result has a checkbox to its left.

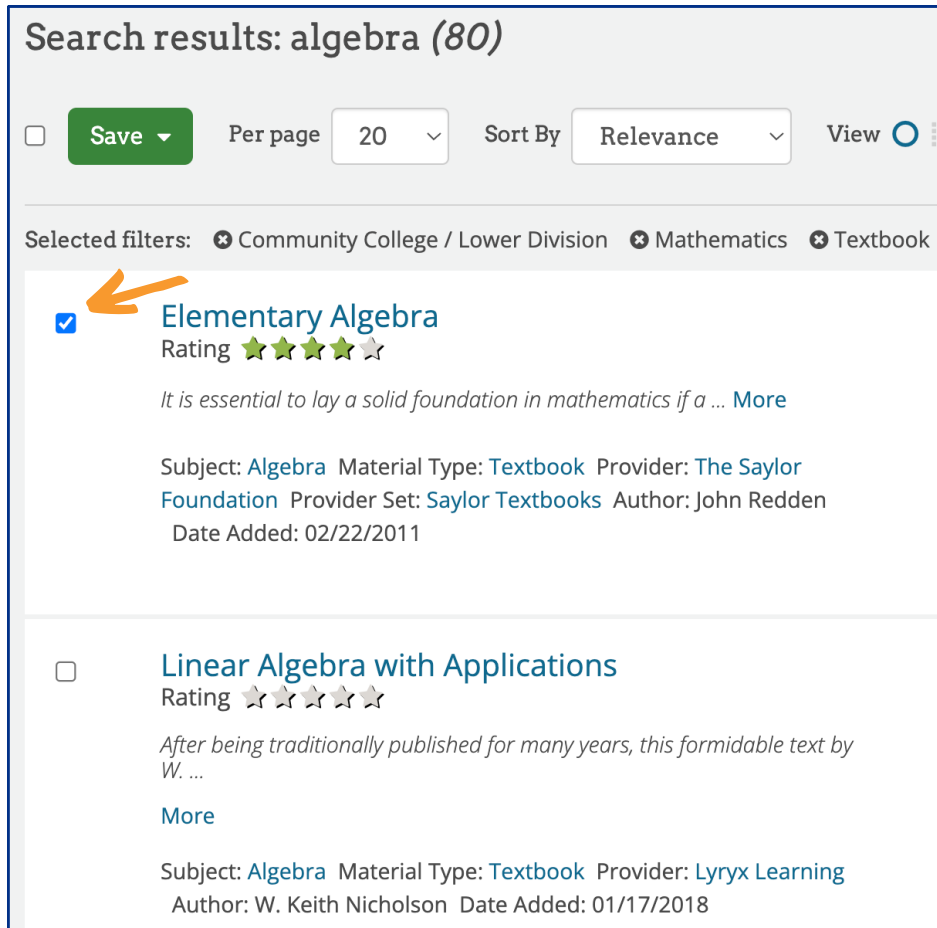

Tiger Tip:

You can easily remove any filters you've added by clicking the circled "x" to the left of each filter.

Saving Materials in OER Commons

Step 1. To save OER materials to a folder, click the checkbox next to the item and click **Save**.

Search results: algebra (80)

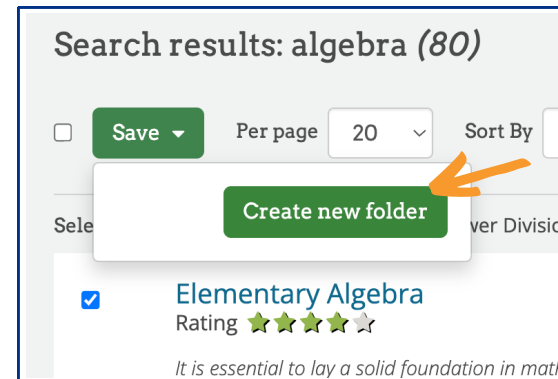

Save Per page 20 Sort By Relevance View

Selected filters: Community College / Lower Division Mathematics Textbook

Elementary Algebra
Rating ★★★★★
It is essential to lay a solid foundation in mathematics if a ... More

Enter folder name

Test Folder

Move folder to

My Items

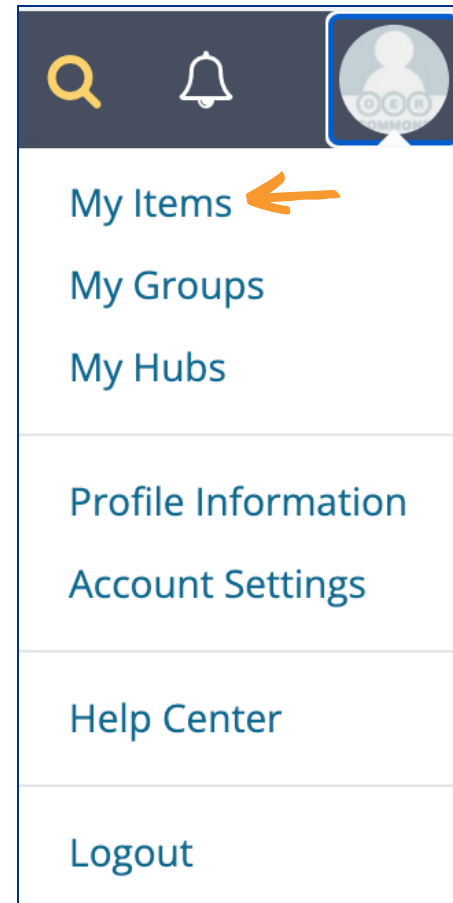

Cancel **Create & Save**

Locating Your Saved Materials in OER Commons

Step 1. To find the folder you just created, click your profile image (or OER placeholder image).

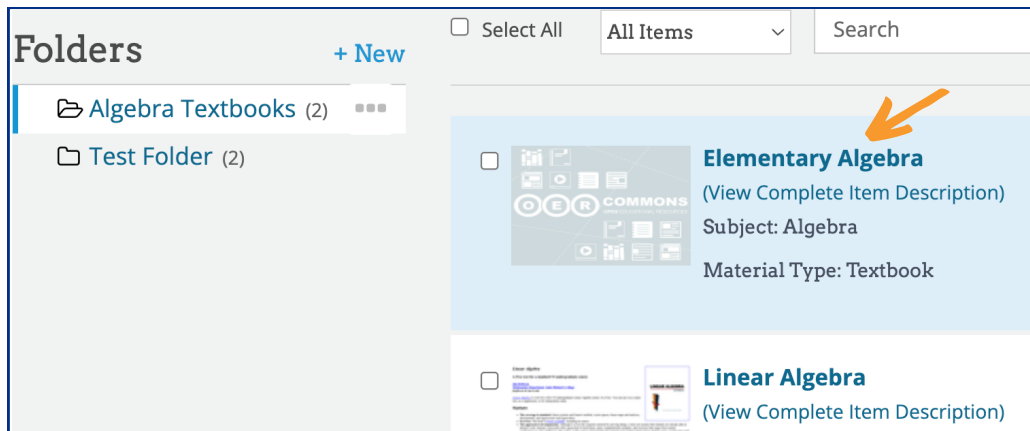

Step 2. Select My Items.

 **Tiger Tip:**
Create a Group to
share materials
among colleagues.

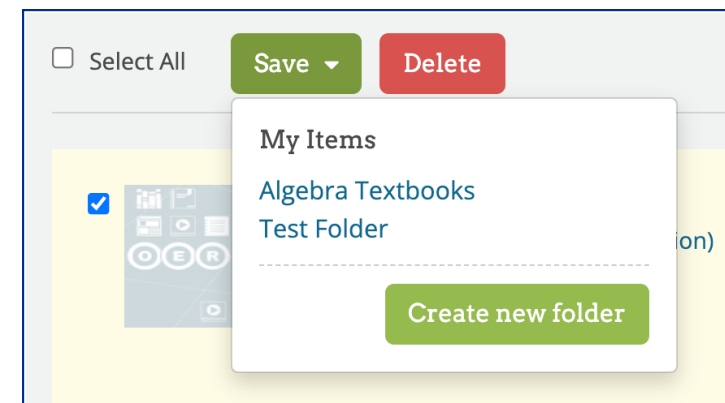

Locating Your Saved Materials in OER Commons

Step 3. The algebra textbook can be found in the Test Folder.

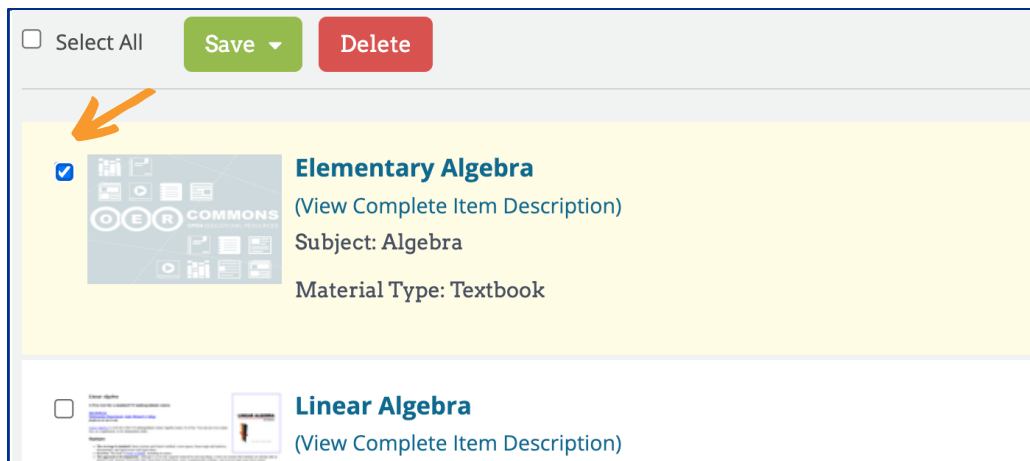

Step 4. From here, you can:

- Delete the textbook from the current folder.
- Save/copy the textbook to a to a different folder.
- Create a new folder.

Step 4. Click the checkbox next to your textbook to select it.

Using Canvas Commons

Objectives

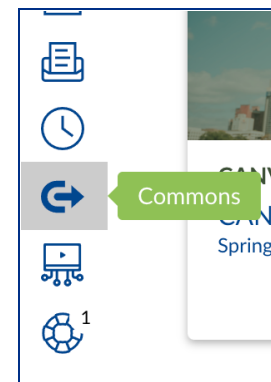

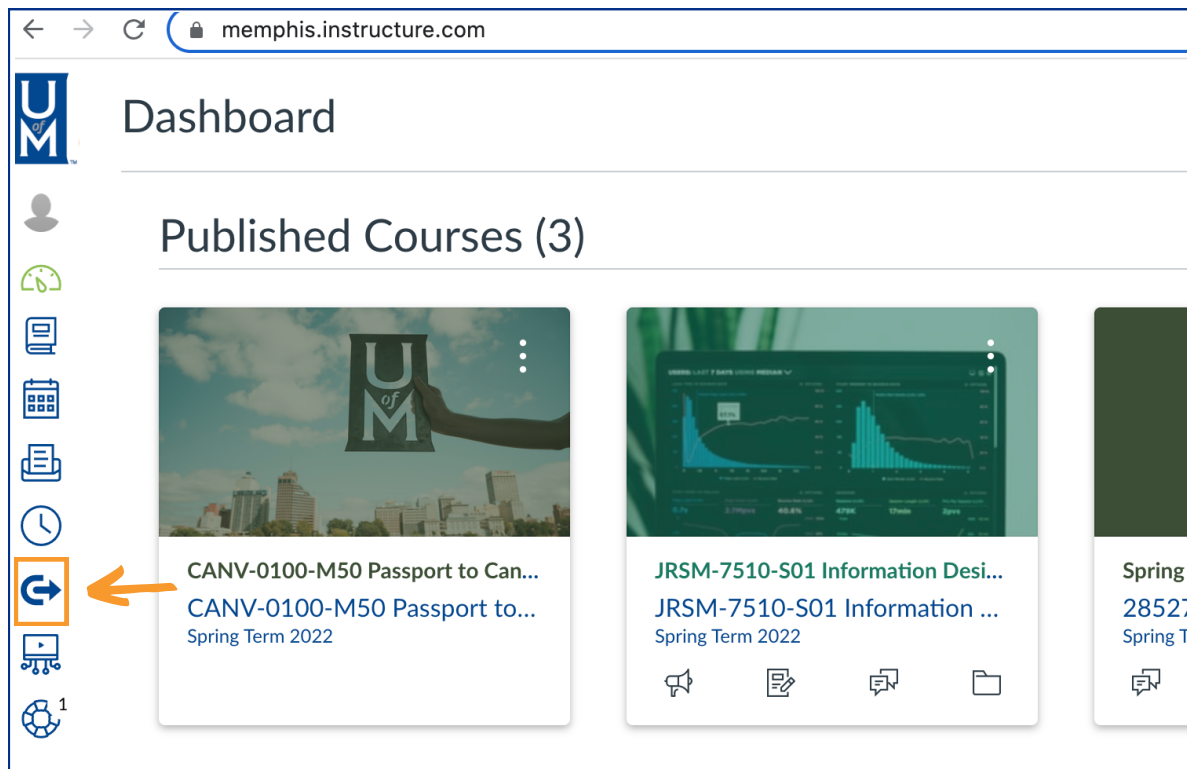

In this section, we will show you how to:

- Access Canvas Commons.
- Search for OER materials.
- Use filters to narrow results.
- View and save OER materials.

Searching for OER Materials in Canvas Commons

Step 1. Go to your Canvas Dashboard and click the Commons icon.

 **Tiger Tip:**
Hover over the icons on your dashboard to see their text labels.

Searching for OER Materials in Canvas Commons

Step 2. Let's look for an English undergraduate course. Type **English Composition** in the search field.

The screenshot shows the Canvas Commons search interface. A search bar at the top contains the text "English Composition" with a magnifying glass icon to its right. An orange arrow points to the search bar. To the right of the search bar are two buttons: "Most Relevant" with a dropdown arrow and "Filter" with a funnel icon. Below the search bar, it says "227 results". On the left side of the interface is a vertical sidebar with various icons: a person, a clock, a document, a calendar, a printer, a clock, a refresh arrow, a monitor, and a gear with a "1" next to it. The main area displays three course cards. Each card has a header image, a blue circular icon with a book, the word "COURSE" in blue, the course title, the level, the instructor's name, and download/star counts.

Course Title	Level	Instructor	Downloads	Stars
English Composition	Undergraduate	Healthcare Career College	69	14
English Composition I	Undergraduate	Nicole Chapman	205	47
English Composition I	11 - Graduate	Stephanie Gregg	60	21

Searching for OER Materials in Canvas Commons

Step 3. Next, you can choose how you'd like to sort your results. For practice, click to open the drop-down menu, then select **Most Relevant**.

The screenshot displays the Canvas Commons search interface. At the top, there is a navigation bar with the 'U of M' logo, 'Commons', and tabs for 'Search', 'Shared', 'Imported', 'Updates (0)', and 'Favorites'. A 'Guides' link is also present. Below the navigation bar, a search bar contains the text 'English Composition' and a magnifying glass icon. To the right of the search bar is a 'Filter' button with a funnel icon. A dropdown menu is open, showing sorting options: 'Most Relevant' (highlighted with an orange arrow), 'Latest', 'Most Favorited', and 'Most Downloaded'. Below the search bar, it indicates '227 results'. Three course cards are visible, each with a book icon, a title, level, author, and download/favorite counts.

Course Title	Level	Author	Downloads	Favorites
English Composition	Undergraduate	Healthcare Career College	69	14
English Composition I	Undergraduate	Nicole Chapman	205	47
English Composition I	11 - Graduate	Stephanie Gregg	60	21

Filtering Your Search Results in Canvas Commons

Step 1. To see all the options for filtering your results, click **Filter**.

The screenshot shows the Canvas Commons search interface. At the top, there is a navigation bar with the following items: Commons, Search, Shared, Imported, Updates (0), Favorites, and Guides. Below the navigation bar, there is a search bar containing the text "English Composition" and a search icon. To the right of the search bar is a dropdown menu set to "Most Relevant" and a "Filter" button with a funnel icon. An orange arrow points to the "Filter" button. Below the search bar, it says "227 results". There are three course cards displayed. Each card has a cover image, a course icon, the course name, level, instructor, and download/favorite counts.

Course Name	Level	Instructor	Downloads	Favorites

Filtering Your Search Results in Canvas Commons

Step 3. As you can see below, our results have changed, and the filter options we chose are listed. Click **First Year Composition** to view that course.

The screenshot displays the Canvas Commons search interface. At the top left is the University of Missouri logo. The main navigation bar includes 'Commons', 'Search', 'Shared', 'Imported', 'Updates (0)', 'Favorites', and 'Guides'. The search bar contains 'English Composition' and a search icon. To the right of the search bar are dropdown menus for 'Most Relevant' and a 'Filter' button. Below the search bar, it indicates '3 results' and shows three active filters: 'Undergraduate', 'Open Textbooks', and 'Courses'. Three search results are displayed as cards. The first card, 'First-Year Composition' by Matthew, is highlighted with a yellow background and an orange arrow pointing to its title. The second card, 'Zero Textbook Costs' by Christopher Rini, is highlighted with an orange border. The third card, 'High-Intermediate Academic Grammar for ESL Students' by Rebecca Al Haider, is not highlighted. Each card shows the course title, level, author, and download/star counts.

Course Title	Level	Author	Downloads	Stars

Saving OER Materials in Canvas Commons

Step 1. Here, you can view the course, import it into one of your Canvas courses, download it, add it to your favorites, or copy a link to it. Let's practice one of these. Click **Add to Favorites**.

The screenshot shows the Canvas Commons interface for a course titled "First-Year Composition". The interface includes a navigation sidebar on the left with icons for user profile, search, shared, imported, updates, favorites, and guides. The main content area displays the course title, a "Back to Search" button, and statistics: 82 Favorites, 116 Downloads, and a date of 6/11/20. The course is licensed under Attribution-ShareAlike. Below the course title, there are tabs for "Preview", "Details", and "Version notes". The "Preview" tab is active, showing a list of "Notes for Instructors" with a green checkmark next to "How to Use This (Suggestions)". Below this, there is a section for "Module 0: Course Tutorial" with a sub-section for "Introductions". Under "Introductions", there are two items: "Introduce Yourself!" with a green checkmark, and "Introductory Videos" with a green checkmark and "10 points". On the right side of the interface, there is a yellow image of a group of people. Below the image, there is a blue "Import/Download" button, a text description "30.36 MB - IMS Common Cartridge File (.imsc)", and two buttons: "Add to Favorites" (highlighted with a red arrow) and "Copy Resource Link".

Saving OER Materials in Canvas Commons

Step 2. As you can see below, the course has been added to the "Favorites" page.

Search Shared Imported Updates (0) **Favorites**

name, institution or tag

↓ 116 ☆ 83

 **Tiger Tip:**
You can tell which page is active by the treatment of the menu bar links. Here, Favorites is black and underlined, because that's the page we're on now.

Saving OER Materials in Canvas Commons

Step 3. If you want to remove materials from your Favorites page, simply click **Remove from Favorites**.

The screenshot shows the Canvas Commons interface for a course titled "First-Year Composition". The page includes a navigation menu on the left with icons for user profile, search, shared, imported, updates, favorites, and guides. The main content area shows the course title, a "Back to Favorites" button, and statistics: 83 Favorites, 116 Downloads, and a date of 6/11/20. The course is licensed under Attribution ShareAlike. Below the course title are tabs for "Preview", "Details", and "Version notes". A "Notes for Instructors" section is visible, containing a document icon and the text "How to Use This (Suggestions)". To the right of this section is a green checkmark icon with an orange arrow pointing to the "Remove from Favorites" button. Below the "Remove from Favorites" button is a "Copy Resource Link" button. A file card for "30.36 MB - IMS Common Cartridge File (.imsc)" is also visible, with an "Import/Download" button above it. The file card features a yellow background with a green line-art illustration of people.

Conclusion. Now that you are familiar with how to navigate OER Commons and Canvas Commons, you can explore the suggestions on the following page for multimedia OER and public domain materials.

Multimedia Resources

YouTube

www.youtube.com

To filter your search results in YouTube to those videos with Creative Commons licenses, follow these steps:

- On your results page, click on the "Filters" tab just to the bottom left of the search bar.
- In the menu that appears, click on "Creative Commons" under the "Features" column.
- To make certain your chosen video is appropriately licensed, go to the video's page and check for the license in the notes section under the video.

Creative Commons

creativecommons.org

If you need OER audio or images, follow these directions:

- From the Creative Commons homepage, click on the "Search for CC Images" link just to the right of the magnifying glass.
- You will be redirected to WordPress.org, Creative Commons's new hosting site for audio and visual OER.
- Enter your keywords into the search bar.
- From there, you can filter your results by CC license, file type, and even aspect ratio.

Google

www.google.com

For access to Google content with Creative Commons licenses, use the following steps to conduct an advanced search:

- On the bottom right of the Google homepage, click "Settings."
- In the pop up menu that appears, click "Advanced Search."
- Once the Advanced Search page loads, scroll down to the "usage rights" line.
- From there, choose the appropriate filter for the type of results you need, primarily whether you intend to modify the content of the OER you find or if you simply want to use it.

Desmos

www.desmos.com

For faculty whose students need access to calculators & math exercises, Desmos offers free access to:

- accessible online graphing & scientific calculators (under the "Math Tools" dropdown menu at the top of the page)
- course landing pages for faculty & students
- practice exercises
- lesson assessments

Once you have registered for your free account, you can browse for course materials and assessments.

Additional Recommended OER

TBR & UofM OER Collaborations

MERLOT

MERLOT is a well-known OER repository similar to OER Commons.

For a guide to more information about the TBR MERLOT members and materials, use the QR code or URL posted below.

<https://bit.ly/39Imq6l>

OER LISTSERV

The Tennessee Board of Regents hosts an OER listserv for ongoing OER conversations across the state of Tennessee, please contact Ryan Korstange at ryan.korstange@tn.gov to be added to the OER listserv.

OER Commons

For the UofM's OER Commons homepage, focus your mobile camera lens on the QR code below and tap on the banner that appears to access the online OER Guide. Use the QR code or URL posted below or copy and paste the URL into your browser.

<https://bit.ly/3HFle0H>

Reflections on OER

Reflection is a powerful reminder of the knowledge and skills we have acquired during the learning process. In the black spaces below, take the time to reflect on the prompts and record your answers.

Write out your observations about the benefits of using OER in your courses.

Consider potential hurdles you may encounter in searching for OER and who you can ask for help.

Write down the name(s) of any OER you found that is/are usable in classes you teach.

Incorporating OER

Building Your OER Course

Congratulations! You have already learned how to locate, filter, and save your OER in both OER Commons and Canvas Commons. Now that you have selected your course materials, you must be wondering how to deliver OER to your students.

To access an outstanding compilation of step-by-step guides and videos that will teach you how to build OER into your Canvas course shell(s), please focus your mobile camera lens on each QR code below and tap on the banner that appears to open the webpage where Canvas help is located. You may also access the same information by copying and pasting the URL at the bottom of the page into your browser if you are reading this document online.

If you need continued assistance with designing an OER course or incorporating OER into your Canvas course shell, please contact UM3D at UM3D@memphis.edu.

First Day of Class

Once you've chosen to use OER in your course, it is also a good idea to inform your students about your decision. While they will certainly appreciate free course materials, they will also need to know where and how to access them. Furthermore, by assuring your students that you have carefully evaluated the selected materials, you will assure them that their reduced costs do not equate a loss of quality in course instruction.

For the first day of class, consider covering the benefits of using OER with your students, whether on a slide deck if teaching in person or an embedded introductory video if teaching online. The QR code on the previous page will direct you to the webpage where a sample "First Day of Class PowerPoint" presentation is hosted under the heading "Introducing Your Students to OER."

Day One Access – download OER for free TODAY

Read anytime, anywhere, from any device, on- or off-line

Print what you want, whenever you want, if you want

Content specific to the learning outcomes of our course

Ongoing access to OER, even after the course is over

Evaluating OER

Evaluation Criteria

When considering the adoption of OER into college classrooms, faculty, instructors, and teaching assistants first need to consider various factors about the materials that could impact student usage. Providing free materials without first evaluating their content would undermine the very purpose of OER, which is to provide quality, accessible, and inclusive course materials for all students.

Quality

The quality of OER is "inextricably bound" to student equity ("Equity Blueprint"). As such, accuracy and quality should impact your decision to integrate a particular OER into your course. Often, faculty resist using OER because of the theoretical lack of academic rigor applied to its creation, but many OER repositories have some form of quality control. This usually falls comes in one of two forms:

- Peer Review
- Crowdsourcing

Additionally, the relevance of OER to the course content is indisputable. That said, before latching onto a particular resource, make sure that it covers your course objectives. Don't waste your or your students' time listing an OER in your syllabus that you haven't fully explored to make sure it matches your course content.

Evaluation Criteria

Accessibility

In terms of accessibility, instructors should remember to keep the following details in mind:

- If the OER you've chosen requires users to open an account to the repository where it is housed, you need to inform your students and lead them through the process of setting up their accounts and accessing the material(s).
- As the COVID-19 pandemic has reminded teachers across the globe, not all students have access to high speed internet. Try to balance your use of large files or multimedia that requires broadband internet with html links and smaller files.
- Lastly, teaching faculty need to keep considerations for students with disabilities at the forefront of their curriculum choices. For those who require additional assistance with accessibility standards, the UofM Disability Resources for Students office is available for consultation; they have also added videos to their website that demonstrate how faculty can access the DRS portal for their students who are registered with the office.

Evaluation Criteria

Inclusivity

As standards for OER, the tenets of quality, accessibility, and inclusivity intersect. For example, the implementation of high quality OER contributes to student equity by giving all students access to the same excellent, affordable course materials. Highly accessible OER likewise ensures these materials are available to students regardless of factors such as language fluency, literacy, disability, access to the internet and other technologies, or even learning styles.

The very nature of OER is such that educational materials are, first, available to the widest possible array of students and, second, that they are reusable and remixable, thereby affording that many more students access to a quality, affordable education. The freedoms implicit to OER grant you permission to adapt OER for your courses, whether by adjusting the content to better align with the cultural environment of your students, translating the materials on your students' behalf, or altering the materials for broader accessibility. This learner-centered approach to OER not only promotes the tenets of Open Education in general, it also ensures that faculty are “teaching students – not [just] content” (DOERS3, 2021).

OER Rubrics

Dozens of OER rubrics are readily available to you on the web. They vary widely in terms of length and criteria, but most primarily focus on educational quality and/or accessibility standards. While it would be impossible to provide a comprehensive overview of each rubric here, the University Libraries' OER Guide includes a thorough explanation of the many criteria faculty may need to consider prior to incorporating OER into their courses. The QR codes below will direct you to pages of the guide where some of the OER rubrics are loosely organized by quality and accessibility. Please focus your mobile camera lens on each QR code and tap on the banner that appears to open these pages individually. You may also copy and paste the URLs at the bottom of the page into your browser if you are accessing this document online.

Email: UM3D@memphis.edu
Phone: 901.678.2935

Carl is passionate about first-year and first-generation student experiences and needs. As such, he has become University Libraries' OER specialist, particularly in regard to locating and evaluating OER.

Please contact Carl via email to set up an appointment to meet with him via Zoom, Microsoft Teams, a telephone call, or in-person.

Jessica is responsible for University Libraries' digital Research & Instructional content.

With a background in teaching high school special education students, Jessica is also familiar with educational accessibility standards and can help faculty deliver OER through a variety of mediums that will improve the overall accessibility of their courses.

As the resident Instructional Design and Technology experts on campus, the staff members of UM3D are prepared to assist faculty with any of your Canvas or Canvas Commons needs.

UM3D staffers are available via virtual consultations. Please write to their collective email listed above or make an appointment from the following link:
