A corrigendum on

[Toward a possible trauma subtype of functional neurological disorder: impact on symptom severity and physical health](#)

by Paredes-Echeverri, S., Guthrie, A. J., and Perez, D. L. (2022). *Front. Psychiatry* 13:1040911. doi: 10.3389/fpsy.2022.1040911

In the published article, there was an error in [Table 2](#) as published. The count of FND-PTSD_low is 43 and not 45. The corrected [Table 2](#) and its caption “Symptom severity and physical health scores in functional neurological disorder stratified by trauma subtypes” appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

TABLE 2 Symptom severity and physical health scores in functional neurological disorder stratified by trauma subtypes.

	FND-PTSD_high (N = 33)		FND-PTSD_low (N = 43)		p-value	FND-Abuse_high (N = 46)		FND-Abuse_low (N = 32)		p-value	FND-Neglect_high (N = 33)		FND-Neglect_low (N = 45)		p-value
	Mean	SD	Mean	SD		Mean	SD	Mean	SD		Mean	SD	Mean	SD	
SDQ-20	39.1	10.8	28.6	7.5	<0.001*	35.8	11.2	28.9	7.7	0.001*	35.0	11.7	31.5	9.1	0.133
PHQ-15	16.0	4.3	11.8	4.6	<0.001*	15.2	4.8	11.3	4.3	<0.001*	14.2	4.9	13.2	5.0	0.390
SOMS:CD	12.4	7.0	6.3	5.5	<0.001*	9.9	7.4	7.2	5.9	0.147	8.2	7.2	9.2	6.7	0.417
SF36-PH	37.7	19.5	52.9	21.6	0.002*	42.4	21.4	52.2	21.7	0.051	45.3	21.8	47.2	22.2	0.708

The symptom severity measures are SDQ-20, PHQ-15, and SOMS:CD; physical health is measured with the SF36 physical component score. P-values with an asterisk (*) are statistically significant after Bonferroni correction. FND, Functional Neurological Disorder; PHQ-15, Participant Health Questionnaire; SD, Standard Deviation; SDQ-20, Somatoform Dissociation Questionnaire; SF36-PH, Short Form Health Survey-36 physical health component score; SOMS:CD, Screening for Somatoform Symptoms-Conversion Disorder Subscale.
