Multi-Residue Analysis of Growth Promoters in Food-Producing Animals

**SPE-HPLC and Ion Mobility Spectrometry of
Anabolics and β -Agonists in Calf Urine**

RIJKSUNIVERSITEIT GRONINGEN

**Multi-Residue Analysis of Growth Promoters in
Food-Producing Animals**

**SPE-HPLC and Ion Mobility Spectrometry of
Anabolics and β -Agonists in Calf Urine**

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. D.F.J. Bosscher,
in het openbaar te verdedigen op
vrijdag 11 september 1998
om 13.15 uur

door

Anneke Koole

geboren op 23 maart 1970
te Delft

Promotor: Prof. dr. R.A. de Zeeuw

Co-promotor: Dr. J.P. Franke

En God zeide: Dat de aarde voortbrengt levende wezens naar hun aard, vee en kruipend gedierte en wild gedierte naar hun aard; en het was also. En God maakte het wild gedierte naar zijn aard en het vee naar zijn aard en alles wat op de aardbodem kruipt naar zijn aard. En God zag dat het goed was.

En God zeide: Laat Ons mensen maken naar ons beeld, als onze gelijkenis, opdat zij heersen over de vissen der zee en over het gevogelte des hemels en over het vee en over de gehele aarde en over al het kruipend gedierte, dat op de aarde kruipt.

(Genesis 1: 24-26)

CONTENTS

Chapter 1 Introduction

1	Introduction	1
1.1	History and Legislation	3
1.2.1	Anabolic Steroids and Related Substances	11
1.2.2	Beta-Agonists	29
1.2.3	Other Ways to Promote Growth	45
1.3	Systematic Qualitative Analysis	51
1.4	Aims, Scope and Overview of Thesis	53

Chapter 2 Anabolic Steroids and Related Substances

2.1	Multi-Residue Analysis of Anabolic Steroids and Related Substances using High Performance Liquid Chromatography with Diode Array Detection	55
2.2	Solid Phase Extraction for Multi-Residue Analysis of Anabolic Steroids and Related Substances from Calf Urine Using C18 and Alumina Columns	79

Chapter 3 Beta-Agonists

3.1.1	Introduction to Ion Mobility Spectrometry	105
3.1.2	Reproducibility Problems in Ion Mobility Spectrometry, as Encountered in the Analysis of Clenbuterol	115
3.1.3	Hair Analysis by Ion Mobility Spectrometry	125
3.1.4	Dramatic Signal Reduction in Ion Mobility Spectrometry by Residues of Solvents	139
3.2	Solid Phase Extraction of Clenbuterol from Human and Calf Urine Using Empore TM Extraction Disks	153
3.3	Solid Phase Extraction of Clenbuterol from Human and Bovine Urine Using Mixed Mode Columns	169
3.4	Multi-Residue Analysis of β_2 -Agonists from Human and Calf Urine Using Extrelut-IAC-SPE Extraction and HPLC-ECD Detection	187

Chapter 4 General Discussion

4.1	Overview of Methods Developed in the AIR-Project	203
4.2	Discussion of the Multi-Residue Analysis System	207

Appendices

1	Overview of Relevant Substances	217
2	Glossary of Terminology for Bovine Animals	229
3	Abbreviations	231
	Samenvatting	235
	Dankwoord	241
