Knowledge Exchange

Teachers engaging with research

- The sector is geared towards developing a **research-rich** and **self-improving** educational system predicated on the capacity for teachers to engage with research
- ... starts with **initial teacher trainees** and their mentors
- Continues with Early Career Teachers (ECTs) and their mentors
- Professional development
- School improvement

FIGURE 1:
EVIDENCE-INFORMED PRACTICE

Figure adapted from Scutt C (2018)

International initial teacher training

- 25,000 schools in total in the UK → half a million teachers → 9 million pupils
- Over 13,180 English-medium international schools → 571,228 teaching staff → 5.8 million pupils
- Around 6481 British-oriented international schools → 282,600 staff → 2.9 million pupils

PGCE → four modules → 120 credits

Contexts

Ethical approval

Doing no harm

Insider research

Anonymity

Criticality

-
- Adhering to **ethical approval** → not interviewing pupils (or parents!)
 - Doing **no harm** e.g. when and when **not** to observe
 - The role of the **insider-researcher**, and/or participant observer status
 - **Anonymity** – the ethical use of collected material, photos, video
 - **Criticality**, not criticism – use the literature for debate

Aligning research ethics with professional responsibility

- Linking to the wider duty of care
- School policies
- Local and regional policies
- Teachers' standards
- Part Two: Personal and professional conduct

Work in progress / challenges

- Dialogic assessment and wider discussions show that trainees **understand** but may lack the ability to **write** about ethics in an informed way
- Currently reviewing the way ethics is **written** about by trainee teachers to link it more closely to professional practice
