# E-Learning Resources

- USU Libraries -

Instructional Videos

Instructional videos are highly effective educational tools that can be used for a wide variety of concepts and demonstrations. Videos are a great way to engage a large number of students while providing specific and valuable information. Videos can be imbedded into your Canvas course as well. Check out the library's YouTube page at youtube.com/usulibraries to discover helpful instructional videos for your classes!

Tutorials

Niche Academy Tutorials are a helpful and seamless tool that can be imbedded within your Canvas course for points. These tutorials are great for providing step-by-step instructions on how to navigate a research database or library resource. Check out the library's tutorial page at my.nicheacademy.com/usulibrarytutorials to discover our various tutorials! Please reach out to your liaison librarian if you would like an imbedded tutorial.

Research Guides

The library's research guides are great tools that allow for easy navigation and instruction on specific subjects, topics, and library services. Research guides can be created for a specific course, or for general subject areas. They can also be imbedded in Canvas Modules to support your instruction! Check out the library's research guides at libguides.usu.edu/.

Canvas Modules

The library has a created a wide variety of Canvas modules to support your instruction, especially research instruction! Our modules include citing sources, research concepts, avoiding plagiarism, and so much more! We can also create custom modules depending on your instructional needs. Please reach out to your liaison librarian if you're interested in one of our modules, or check out library.usu.edu/instruct/research-concepts.

If you have questions about these platforms or imbedding them in your course, please contact your liaison librarian or niki.fullmer@usu.edu
