About Evidence-Based Practice for Public Health

Evidence-based practice for public health involves using the best available evidence to make informed public health practice decisions. This website provides free online access to evidence-based public health (EBPH) resources, [knowledge domains of public health](#), and public health [journals](#) and [databases](#). The resources are arranged along a pathway of evidence to allow public health practitioners to easily find and use the best evidence to develop and implement effective interventions, programs, and policies.

[About](#)

The Pathway to Evidence-Based Resources

Evidence-Based Guidelines

Evidence-based guidelines based on a systematic review of the research literature. The guidelines provide summaries of evidence and recommendations for practice from government agencies, professional organizations, and convening expert panels.

Systematic Reviews

Systematic reviews and meta-analyses of the literature that use specific methods and criteria to locate, appraise, and synthesize the evidence from research studies. The reviews uncover the strengths and weaknesses of the evidence and identify gaps in current research.

Pre-Formulated and Filtered Searches of Published Studies

Specialized searches of PubMed/MEDLINE on specific public health topics or limited to studies that correspond to a specific research category.

Best Practices

Public health programs, interventions, and policies that through experience have been evaluated, shown to be successful, and have the potential to be adapted and transformed by others working in the same field.

The Path

What is the Community Guide?

The Guide to Community Preventive Services is a free resource to help you choose programs and policies to improve health and prevent disease in your community. Systematic reviews are used to answer these questions:

- Which program and policy interventions have been proven effective?
- Are there effective interventions that are right for my community?
- What might effective interventions cost; what is the likely return on investment?

More than 200 interventions have been reviewed and the [Task Force on Community Preventive Services](#) has issued [recommendations](#) for their use. Learn more about the guide, our [systematic review methods](#), and the [Community Guide team](#).

All Community Guide Topics

- Adolescent Health
- Alcohol
- Asthma
- Birth Defects
- Cancer
- Diabetes
- HIV/AIDS, STIs & Pregnancy
- Nutrition
- Obesity
- Oral Health
- Physical Activity
- Social Environment
- Tobacco

Welcome!

health-evidence.ca aims to support evidence-informed decision making in public health by providing current research evidence in a searchable online registry. Findings of a [research project](#) funded by the [Canadian Institutes of Health Research](#), demonstrated a need for a reliable source of review evidence that public health practitioners and decision-makers could easily access and employ.

The [health-evidence.ca](#) team regularly searches for, screens, and rates systematic and narrative reviews, and meta-analyses from a variety of

others working in the same field.

Pathway to Evidence-Based Resources

The image shows a screenshot of the NACCHO website. At the top, a banner reads "Helping you find and use the best evidence" and "Evidence-Based Practice for Public Health". Below this is a navigation menu with links for Home, Evidence-Based Resources, Public Health Journals, Public Health Databases, and About. The main content area is titled "The Pathway to Evidence-Based Resources" and features a large blue arrow pointing downwards. A red arrow points from the bottom of this blue arrow to the "Best Evidence" section. The "Best Evidence" section is highlighted and contains a link to the "Model Practice Database".
