UMass Medical School's digital archive & publishing system for research & scholarship

Exposure

Poster with 6,900+ downloads!

"Without the tremendous response of our tiny pilot study, we would not have undertaken such a risk in forging forward with our current study. We greatly appreciate the exposure eScholarship@UMMS has provided for us in pursuing this groundbreaking and important research."
 -- Barbara Olendzki, RD, MPH, LDN, Assistant Professor of Medicine

- Deposit your papers, posters, presentations, & data ... to **disseminate** to a wider audience
- ... to gain more **exposure** to your work or ideas
- ... to **facilitate** research
- ... to receive **usage** statistics
- ... it's **easy** for faculty, students, & staff to participate!

International reach

Departmental collections

Founded in 2001, the [Department of Neurobiology](#) at the University of Massachusetts Medical School has evolved into a unique and integrated hub of investigators addressing fundamental problems in neurobiology, from single molecules to behavior, primarily using invertebrate model organisms. Combining cell biological, physiological and behavioral analyses with a critical interventionist angle afforded by cutting-edge genetic approaches, the Department aims to understand the complexity of brain development and function. This collection showcases journal articles and other publications and presentations written by faculty and researchers of the Department of Neurobiology.

Open Access

- is defined as free, immediate, unrestricted online access to scientific and scholarly research.
- There are 2 primary roads to open access:
 - publishing in open access journals, and
 - posting in open archives or repositories such as [eScholarship@UMMS](#)

Grant support

The University of Massachusetts Center for Clinical and Translational Science (UMCCTS) was founded in 2006 to enhance clinical and translational research across the five University of Massachusetts campuses (Amherst, Boston, Lowell, Northampton, and Worcester), UMass Memorial Health Care and Baystate Medical Center. UMCCTS is supported by the CTSA, a National Institutes of Health (NIH) Clinical and Translational Science Award (CTSA) in 2010, and its successful renewal in 2015. UMCCTS is committed to collaborating to transform the conduct of clinical and translational research for our patients and communities, foundations, federal agencies, industry, biotechnology and pharmaceutical companies, and members of the venture capital and philanthropic communities. Our goals are to accelerate basic discoveries and develop and support the next generation in clinical and translational research.
