*JMASM* is an independent print and electronic journal (http://tbf.coe.wayne.edu/jmasm), publishing (1) new statistical tests or procedures, or the comparison of existing statistical tests or procedures, using computer-intensive Monte Carlo, bootstrap, jackknife, or resampling methods, (2) the study of nonparametric, robust, permutation, exact, and approximate randomization methods, and (3) applications of computer programming, preferably in Fortran (all other programming environments are welcome), related to statistical algorithms, pseudo-random number generators, simulation techniques, and self-contained executable code to carry out new or interesting statistical methods.

# The easy way to find open access journals

DOAJ DIRECTORY OF OPEN ACCESS JOURNALS

www.doaj.org

The Directory of Open Access Journals covers free, full text, quality controlled scientific and scholarly journals. It aims to cover all subjects and languages.

## Aims

- Increase visibility of open access journals
- Simplify use
- Promote increased usage leading to higher impact

## Scope

The Directory aims to be comprehensive and cover all open access scientific and scholarly journals that use a quality control system to guarantee the content. All subject areas and languages will be covered.

## In DOAJ browse by subject

Agriculture and Food Sciences
Biology and Life Sciences
Chemistry
General Works
History and Archaeology
Law and Political Science
Philosophy and Religion
Social Sciences
Arts and Architecture
