*JMASM* (ISSN 1538–9472, <http://digitalcommons.wayne.edu/jmasm>) is an independent, open access electronic journal, published biannually in May and November by JMASM Inc. (PO Box 48023, Oak Park, MI, 48237) in collaboration with the Wayne State University Library System. *JMASM* seeks to publish (1) new statistical tests or procedures, or the comparison of existing statistical tests or procedures, using computer-intensive Monte Carlo, bootstrap, jackknife, or resampling methods, (2) the study of nonparametric, robust, permutation, exact, and approximate randomization methods, and (3) applications of computer programming, preferably in Fortran (all other programming environments are welcome), related to statistical algorithms, pseudo- random number generators, simulation techniques, and self-contained executable code to carry out new or interesting statistical methods.

Journal correspondence (other than manuscript submissions) and requests for advertising may be forwarded to [ea@jmasm.com](mailto:ea@jmasm.com). See back matter for instructions for authors.

## Journal of Modern Applied Statistical Methods

Vol. 15, No. 1

✧ May 2016 ✧

### Table of Contents

#### *Invited Articles*

---

2 – 11	J. R. <b>LEVIN</b> R. C. <b>SERLIN</b>	The Composite Hypothesis Contrast Procedure: A Novel Sequential Multiple-Comparison Approach
12 – 31	R. R. <b>WILCOX</b>	ANCOVA: A Global Test Based On A Robust Measure of Location or Quantiles When There Is Curvature
32 – 61	H. J. <b>KESELMAN</b> A. R. <b>OTHMAN</b> R. R. <b>WILCOX</b>	Generalized Linear Model Analyses For Treatment Group Equality When Data Are Non-Normal
62 – 77	R. R. <b>WILCOX</b>	Comparisons of Two Quantile Regression Smoothers

#### *Regular Articles*

---

78 – 99	J. <b>FEYS</b>	New Nonparametric Rank Tests for Interactions In Factorial Designs with Repeated Measures
100 – 122	G. L. <b>BAIRD</b> L. L. <b>HARLOW</b>	Does One Size Fit All? A Case for Context- Driven Null Hypothesis Statistical Testing
123 – 140	C. H. <b>HOLLAND</b> T. <b>HOLLAND</b>	A Two and More Independent Factor Form of the Wilcoxon-Mann-Witney Test, Extendable to Other Permutation-Based Tests

141 – 159	<b>D. T. NGUYEN</b> <b>E. S. KIM</b> <b>P. RODRIGUEZ DE GIL</b> <b>A. KELLERMAN</b> <b>Y. -H. CHEN</b> <b>J. D. KROMREY</b> <b>A. BELLARA</b>	Parametric Tests for Two Population Means under Normal and Non-Normal Distributions
160 – 192	<b>M. DESAI</b> <b>A. A. MITANI</b> <b>S. W. BRYSON</b> <b>T. ROBINSON</b>	Multiple Imputation When Rate of Change is the Outcome of Interest
193 – 205	<b>R. ARUNACHALAM</b> <b>M. SIVASUBRAMANIAN</b> <b>D. K. GHOSH</b>	Construction of Pair-wise Balanced Design
206 – 238	<b>B. M. GOLAM KIBRIA</b> <b>S. BANIK</b>	Some Ridge Regression Estimators and Their Performances
239 – 254	<b>R. ARUNACHALAM</b> <b>M. SIVASUBRAMANIAN</b> <b>D. K. GHOSH</b>	Construction of Efficiency-Balanced Design Using Factorial Design
255 – 275	<b>R. D. SZCZESNIAK</b> <b>D. LI</b> <b>R. S. AMIN</b>	Semiparametric Mixed Models for Nested Repeated Measures Applied to Ambulatory Blood Pressure Monitoring Data
276 – 298	<b>L. C. MCCANDLESS</b> <b>M. L. PATTERSON</b> <b>L. B. CURRIE</b> <b>A. MONIRUZZZAMAN</b> <b>J. M. SOMERS</b>	Bayesian Estimation of the Size of a Street-Dwelling Homeless Population
299 – 315	<b>N. KOCK</b>	Non-Normality Propagation Among Latent Variables & Indicators in PLS-SEM Simulations
316 – 331	<b>M. AHSANULLAH</b> <b>M. SHAKIL</b> <b>B. M. GOLAM KIBRIA</b>	Characterizations of Continuous Distributions by Truncated Moment
332 – 357	<b>G. L. BAIRD</b> <b>S. L. BIEBER</b>	The Goldilocks Dilemma: Impacts of Multicollinearity—A Comparison of Simple Linear Regression, Multiple Regression, and Ordered Variable Regression Models

358 – 372	<b>R. SINGH</b> <b>H. K. VERMA.</b> <b>P. SHARMA</b>	Estimation of Population Mean Using Exponential Type Imputation Technique for Missing Observations
373 – 388	<b>R. LIU</b> <b>D. WU</b> <b>X. ZHANG</b> <b>S. KIM</b>	Compound Identification Using Penalized Linear Regression on Metabolomics
389 – 416	<b>B. LEBEAU</b>	Impact of Serial Correlation Misspecification with the Linear Mixed Model
417 – 451	<b>V. ARYADOUST</b> <b>Z. SHAHSAVAR</b>	Validity of the Persian Blog Attitude Questionnaire: An Evidence-Based Approach
452 – 471	<b>H. LIAO</b> <b>Y. LI</b> <b>G. BROOKS</b>	Outlier Impact and Accommodation Methods: Multiple Comparisons of Type I Error Rates
472 – 487	<b>C. O. OZGUR</b>	Z and t Distributions in Hypothesis Testing: Unequal Division of Type I Risk
488 – 510	<b>M. A. W. MAHMOUD</b> <b>R. M. EL-SAGHEER</b> <b>A. A. SOLIMAN</b> <b>A. H. ABD ELLAH</b>	Bayesian Estimation of $P[Y < X]$ Based on Record Values from the Lomax Distribution and MCMC Technique
511 – 538	<b>B. F. FRENCH</b> <b>H. FINCH</b>	Factorial Invariance Testing under Different Levels of Partial Loading Invariance within a Multiple Group Confirmatory Factor Analysis Model
539 – 569	<b>J. R. HARRING</b> <b>J. LIU</b>	A Comparison of Estimation Methods for Nonlinear Mixed Effects Models Under Model Misspecification and Data Sparseness: A Simulation Study
570 – 583	<b>G. O. KORTER</b>	A Spatial Analytical Framework For Examining Road Traffic Crashes
584 – 599	<b>S. LIPOVETSKY</b>	Generalized Singular Value Decomposition With Additive Components

600 – 615	<b>R. SINGH</b> <b>S. B. GUPTA</b> <b>S. MALIK</b>	Almost Unbiased Estimator Using Known Value of Population Parameter(s) in Sample Surveys
616 – 634	<b>S. DEVIKA</b> <b>S. GEORGE</b> <b>L. JEYASEELAN</b>	Application of Esscher Transformed Laplace Distribution in Microarray Gene Expression Data
635 – 669	<b>T. A. TARRAY</b> <b>H. P. SINGH</b>	New Procedures of Estimating Proportion and Sensitivity Using Randomized Response in a Dichotomous Finite Population
670 – 689	<b>T. S. KAMBLE</b> <b>D. N. KASHID</b>	Variable Selection in Regression Using Multilayer Feedforward Network
690 – 710	<b>S. ARUMAIRAJAN</b> <b>P. WIJEKON</b>	Principal Component Preliminary Test Estimator In The Linear Regression Model
711 – 737	<b>O. S. YAYA</b> <b>O. I. SHITTU</b>	Symmetric Variants of Logistic Smooth Transition Autoregressive Models: Monte Carlo Evidences
738 – 751	<b>Y. ASAR</b>	Liu-Type Logistic Estimators With Optimal Shrinkage Parameter
752 – 773	<b>H. DUZAN</b> <b>N. S. B. M. SHARIFF</b>	Solution to the Multicollinearity Problem By Adding Some Constant to the Diagonal
774 – 788	<b>S. SEN</b> <b>S. S. MAITI</b> <b>N. CHANDRA</b>	The xgamma Distribution: Statistical Properties and Application
789 – 801	<b>D. A. A. G. SINGH</b> <b>E. J. LEAVLINE</b>	Model-Based Outlier Detection System With Statistical Preprocessing
802 – 824	<b>E. J. LEAVLINE</b> <b>S. SUTHA</b>	Analysis and Modeling of Statistical Properties Of FMDFB Subband Coefficients
825 – 835	<b>C. A. VALLABADOS</b> <b>S. A. ARUMUGAM</b>	An Evaluation of Pareto, Lognormal and PPS Distributions: The Size Distribution of Cities In Kerala, India

### *Algorithms and Code*

---

836 – 847	<b>J. KORAN</b> <b>T. C. HEADRICK</b>	A Percentile-Based Power Method in SAS: Simulating Multivariate Non-Normal Continuous Distributions
848 – 854	<b>D. A. WALKER</b> <b>T. J. SMITH</b>	Nine Pseudo $R^2$ Indices For Binary Logistic Regression Models
855 – 867	<b>W. M. AMIR</b> <b>M. SHAFIQ</b> <b>K. MOKHTAR</b> <b>N. A. ALENG</b> <b>H. A. RAHIM</b> <b>Z. ALI</b>	Simple Response Surface Methodology Using RSREG (SAS)
868 – 883	<b>D. A. WALKER</b>	Confidence Intervals for Kendall’s Tau With Small Samples
884 – 892	<b>W. M. AMIR</b> <b>M. SHAFIQ</b> <b>H. A. RAHIM</b> <b>P. LIZA</b> <b>A. ALENG</b> <b>Z. ABDULLAH</b>	Algorithm for Combining Robust and Bootstrap In Multiple Linear Model Regression (SAS)
893 – 913	<b>S. SUNDARAM</b> <b>D. S. PARTHASARATHY</b>	Determination of Optimal Tightened Normal Tightened Plan Using a Genetic Algorithm
