FOR LIBRARY

Source: <http://www.uri.edu/webstats/library/>

Use General Summary section:
"Successful Requests for Pages" and
"Distinct Hosts Served"

FOR URI.EDU

Source: <http://www.uri.edu/webstats/>

Use General Summary section:
"Successful Requests for Pages" and
"Distinct Hosts Served"

Includes all files within the directory (pages).

Successful request for pages (visits) count Web pages. If a user goes to a page with 5 graphics, it counts as 1 visit or 6 requests (graphics + text) depending on your point of view. It is usually more meaningful to consider page counts (visits) rather than requests unless you are interested in server load or all file types transmitted.

Distinct hosts served refers to the number of different computers with unique IP addresses that have accessed the site.

NOTE: "Visits" is the number that ACRL has requested in the past.

Successful requests or hits count all types of files, including html, gif, jpg, pdf, form, and etc.

To find Total requests uri.edu, use "Successful Requests" under "General Summary" at top of page.

To find Total requests /library/, use "Directory Report," which includes total file requests from all subdirectories.

Use the "Directory Report" to determine library site's rank. When counting library site's rank, exclude [root directory].

Note: when a directory is listed above, rather than a page (e.g. /special_collections/), the number given represents the number of hits to the top-level page ONLY, NOT the cumulative hits to all the files within that directory.

Source: <http://www.uri.edu/wwwstat/departments.html>

Note: Use "Total Transfers by URL/Archive Section." Note that this contains requests for the specific file only (e.g. the index file in the case of a directory), NOT for all files in that directory.

Scan the /library/ section for any .html / .htm pages with >200 hits in *most months*. (Do not gather other file types, e.g. .gif, .jpg, or .php.) Alphabetize the pages
