Note: when a directory is listed above, rather than a page (e.g. /special_collections/), the number given represents the number of hits to the top-level page ONLY, NOT the cumulative hits to all the files within that directory.

Source: <http://www.uri.edu/wwwstat/>

Use "Total Transfers by URL/Archive Section." Note that this contains requests for the specific file only (e.g. the index file in the case of a directory), NOT for all files in that directory. Thus, we are able to provide total number of hits to the library home page, but not the entire site. (While that information exists on the ITS web site above, it is not in a format allowing for easily compilation, e.g. it is not able to be pasted into Excel. To add up all the hits to every library page would be too time-consuming.

Scan the /library/ section for any .html / .htm pages with >200 hits in *most months*. (Do not gather other file types, e.g. .gif, .jpg, or .php.) Alphabetize the pages listed.
