Transform the teaching and learning experience

Elluminate Live! is built specifically for live, multi-media, many-to many collaboration. Whether you have two students—or two hundred—Elluminate Live! enables world-class communication, collaboration, and education that transforms teaching and learning.

Elluminate Live! ensures that all students are in sync, regardless of computer platform or Internet connection speed. Enjoy real-time, online collaboration tools like full-duplex audio, chat, high-resolution webcam, synchronized notes, application sharing, file transfer, interactive whiteboards, and breakout rooms. ESP (Elluminate Sensory Perception) moderator tools make it easy for instructors to create content, conduct presentations, and track and control participation more effectively. Elluminate Live! Is built into Blackboard under the Course Tools section of the Control Panel.

Instructors ...

Bridge the gap between text-based asynchronous distance learning and the face-to-face interaction of a physical classroom. Elluminate Live! is an intuitive, instructor-led environment that delivers real-time, interactive education and encourages real learning and collaboration.

- Some of the many uses:
    - Lectures
    - Presentations
    - Small group discussions
    - Debates
    - Workshops
    - Conferences
    - Seminars
    - Remote guest speakers
    - Office hours
    - Mentoring
    - Tutoring
    - Collaborative research projects

Administrators ...

Enhance learning opportunities for existing students and reach new ones. Leverage limited resources, provide professional development, and facilitate multi-campus meetings and inter-institutional research projects—without costly travel or telephone/video conferencing.
