Table S2. Example conditions showing the most common Read codes found across the three patient groups.

Most common endocrine disorder Read code terms			
	DS	Controls	ID
1	Hyperthyroidism	Polycystic ovaries	Polycystic ovaries
2	Thyrotoxicosis	Thyrotoxicosis	Polycystic ovarian syndrome
3	Disorders of thyroid gland	Hyperthyroidism	Hyperprolactinaemia
4	H/O: thyroid disorder	Simple goitre	Precocious puberty
5	Polycystic ovaries	Polycystic ovarian syndrome	Hyperthyroidism
6	Premature menopause NOS	Premature menopause NOS	Thyrotoxicosis
7	Simple goitre	Endocrine, nutritional, metabolic and immunity disorders	Delayed puberty NEC
8	Endocrine, nutritional, metabolic and immunity disorders	Disorders of thyroid gland	Endocrine, nutritional, metabolic and immunity disorders
9	Graves' disease	Hyperprolactinaemia	Isolated deficiency of growth hormone
10	Thyroiditis	Thyroid cyst	Simple goitre
Most common hypothyroidism Read code terms			
1	Hypothyroidism	Hypothyroidism	Hypothyroidism
2	Acquired hypothyroidism	Acquired hypothyroidism	Acquired hypothyroidism
3	Hypothyroidism NOS	Thyroid deficiency	Hypothyroidism NOS
4	Thyroid deficiency	Hypothyroidism NOS	Thyroid deficiency
5	Myxoedema	Myxoedema	Congenital hypothyroidism
6	Congenital hypothyroidism	Subclinical hypothyroidism	Subclinical hypothyroidism
7	H/O: hypothyroidism	H/O: hypothyroidism	Myxoedema
8	Hypothyroidism monitoring first letter	Hypothyroidism monitoring first letter	H/O: hypothyroidism
9	Subclinical hypothyroidism	Other acquired hypothyroidism	Hypothyroidism monitoring first letter
10	Other acquired hypothyroidism	Congenital hypothyroidism	Other acquired hypothyroidism
Most common epilepsy Read code terms			

1	Epilepsy	Epilepsy	Epilepsy
2	[D]Seizure NOS	[D]Convulsions, febrile	[D]Seizure NOS
3	[D]Convulsions	[D]Convulsions	[D]Convulsions
4	Had a fit	[D]Seizure NOS	[D]Convulsions, febrile
5	O/E - a seizure	Febrile convulsion	Febrile convulsion
6	Fit - had one, symptom	O/E - febrile convulsion	Absence seizure
7	Absence seizure	H/O: febrile convulsions	H/O: epilepsy
8	Infantile spasms	Convulsion - symptom	H/O: febrile convulsions
9	Grand mal (major) epilepsy	Had a fit	Grand mal (major) epilepsy
10	Grand mal seizure	Grand mal (major) epilepsy	O/E - febrile convulsion
	Most common ear disorder read terms		
1	Hearing loss	Otitis media NOS	Otitis media NOS
2	Wax in ear	Earache symptoms	Earache symptoms
3	Syringe ear to remove wax	Syringe ear to remove wax	Syringe ear to remove wax
4	Otitis media NOS	Ear pain	Infective otitis externa
5	Hearing difficulty	Wax in ear	Ear pain
6	Myringotomy and insertion of short term grommet	Otalgia	Wax in ear
7	Otitis externa NOS	Infective otitis externa	Hearing loss
8	Infective otitis externa	Otitis externa NOS	Nonsuppurative otitis media + eustachian tube disorders
9	Myringotomy	Nonsuppurative otitis media + eustachian tube disorders	Otalgia
10	Glue ear	Acute non suppurative otitis media	Suppurative and unspecified otitis media

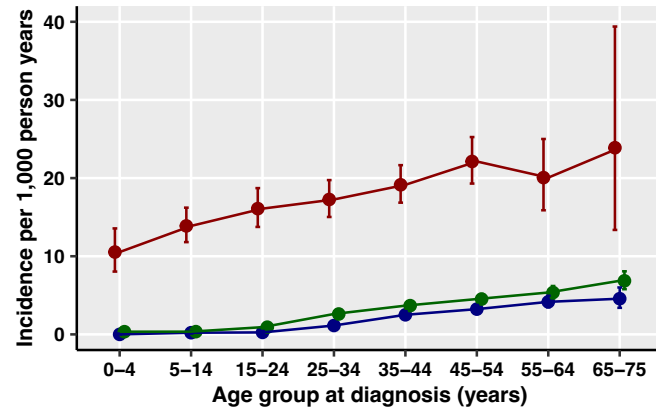

Figure S3. Grouping of comorbidities based on their incident rates across the lifespan for people with DS (red), ID (green) and general population controls (blue).

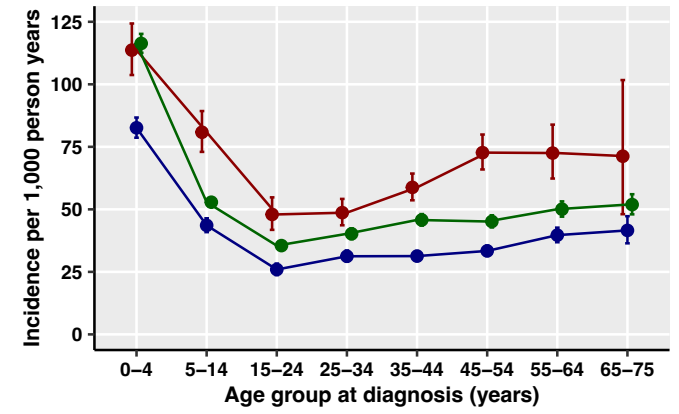

Life-long risk

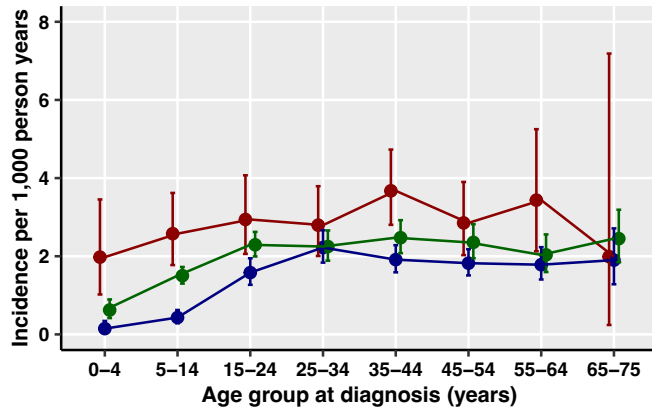

Hypothyroidism

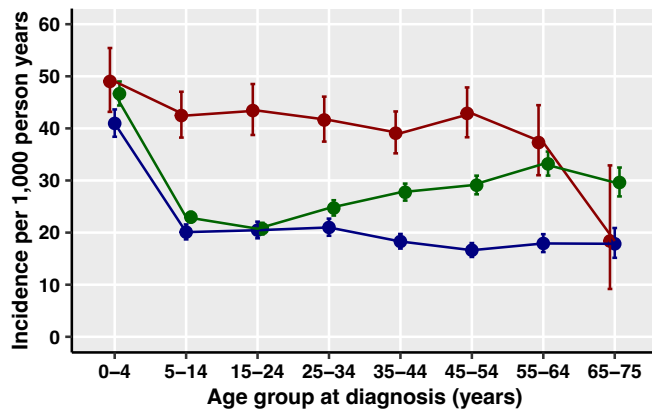

Ear disorder

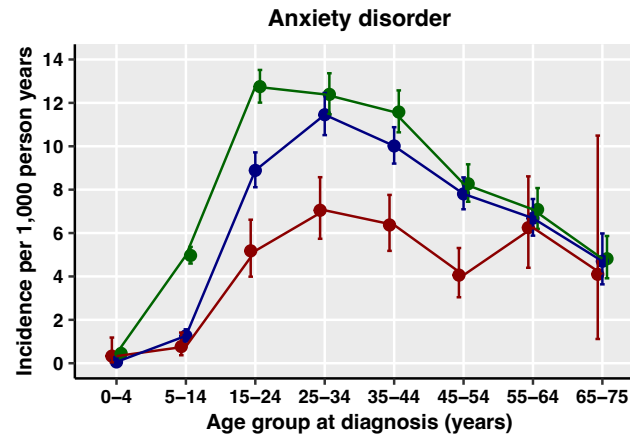

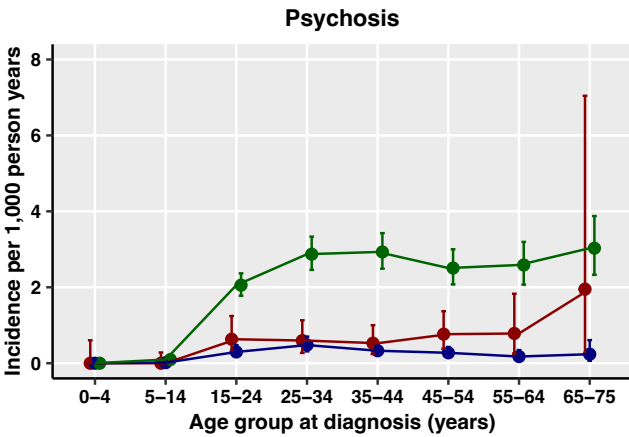

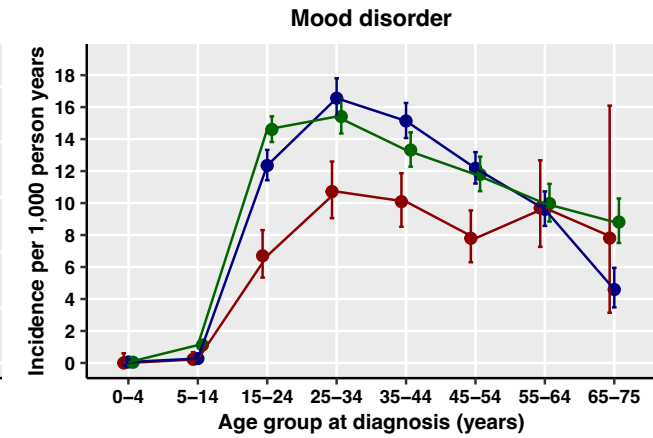

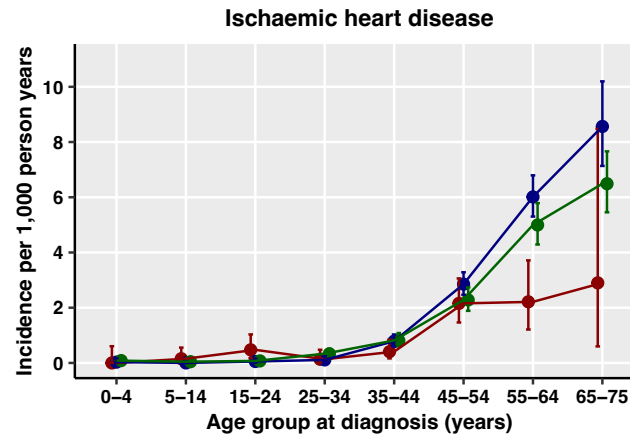

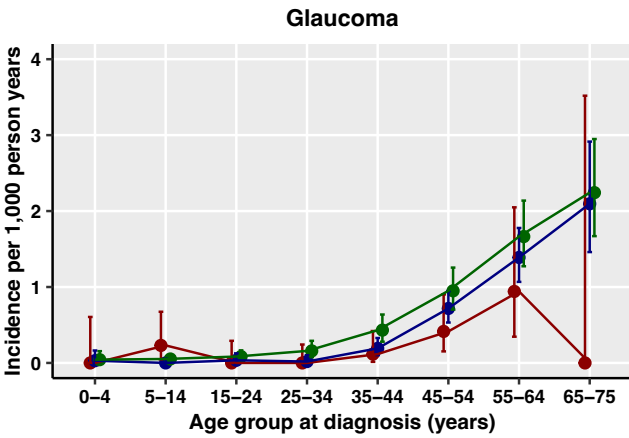

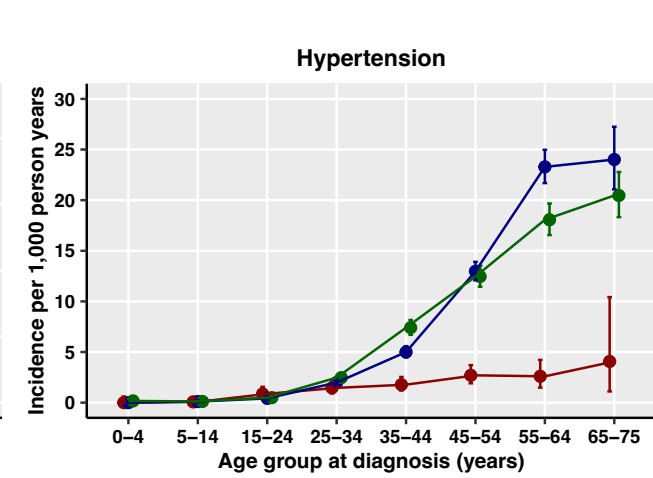

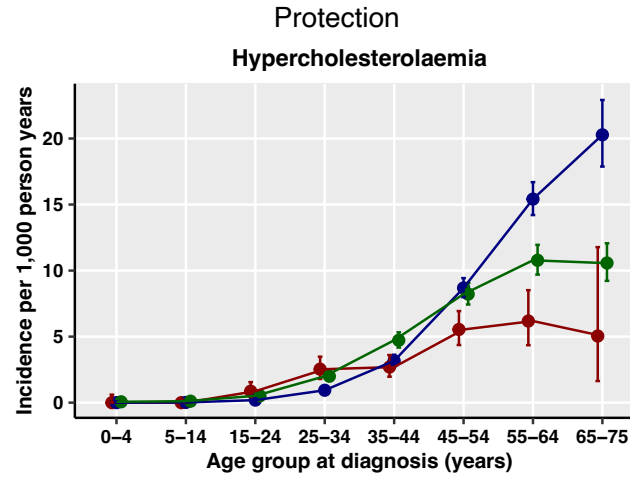

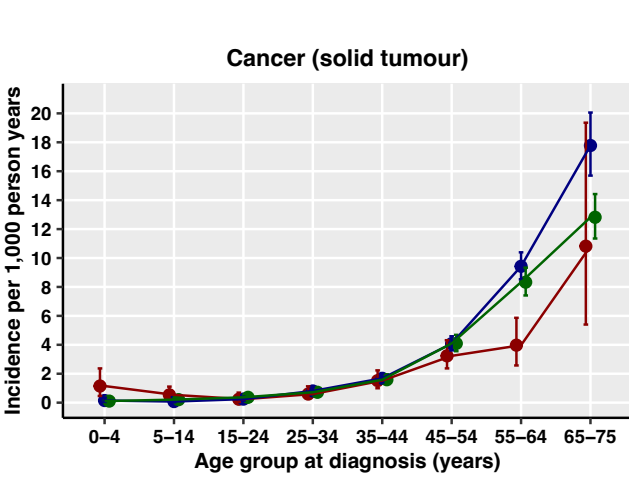

Endocrine disorder

Peripheral autoimmune condition

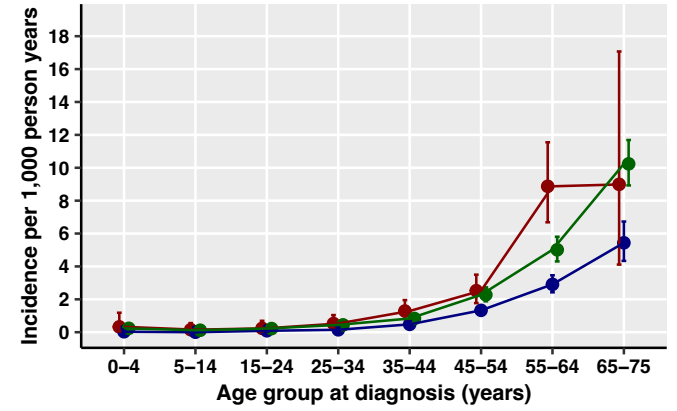

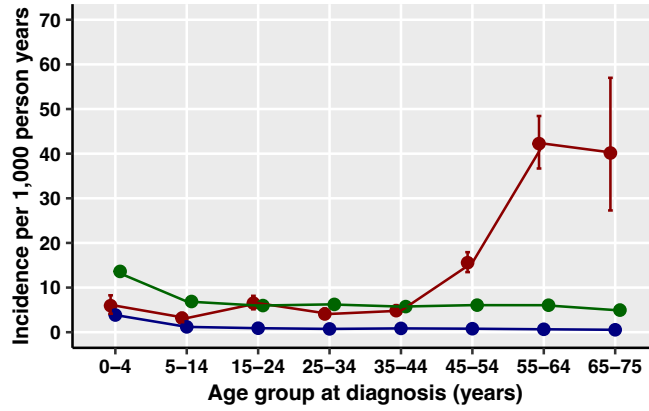

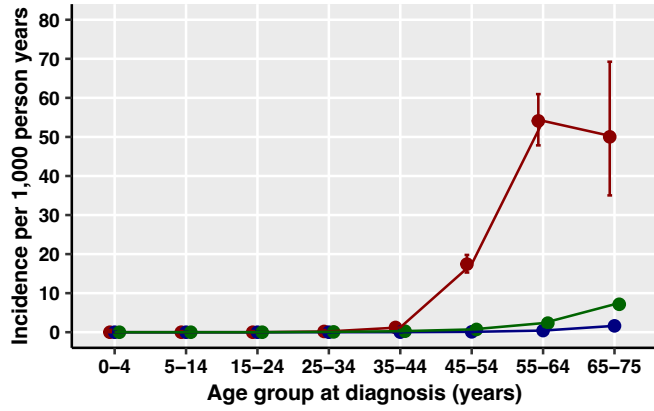

Alzheimer's disease/amyloid related

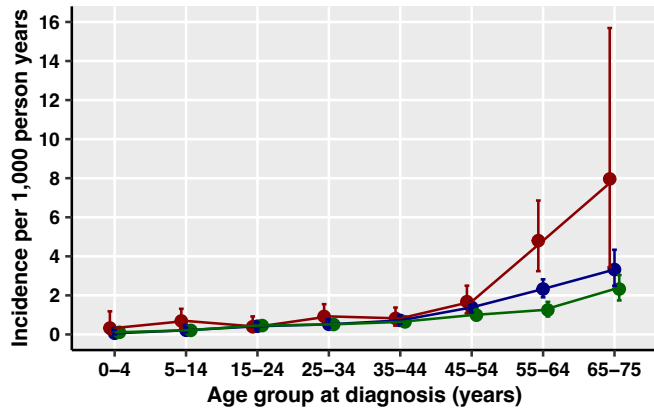

Epilepsy/seizures

Stroke/Cerebrovascular disease

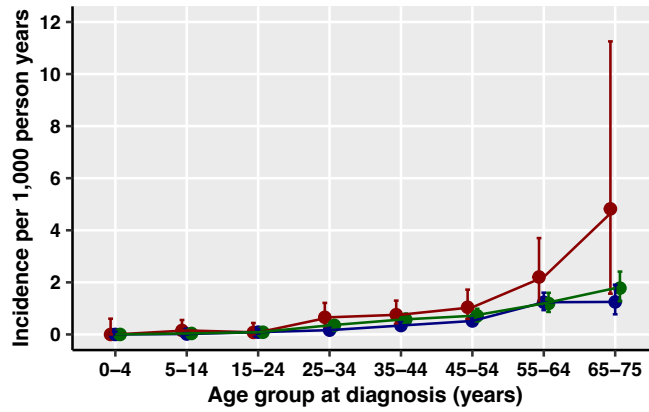

Dementia

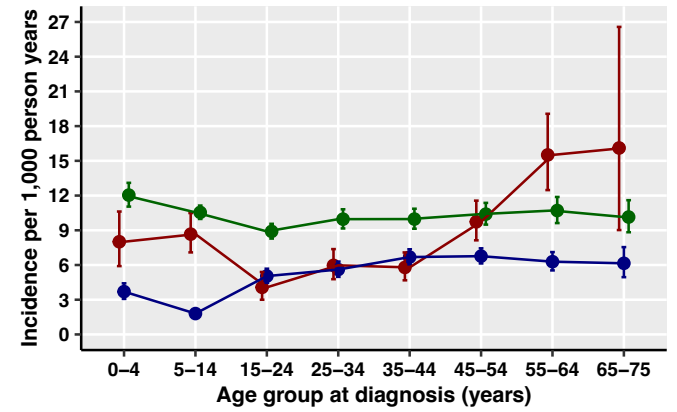

Peripheral vascular disease

Thrombosis

Sleep disorder not including OSA

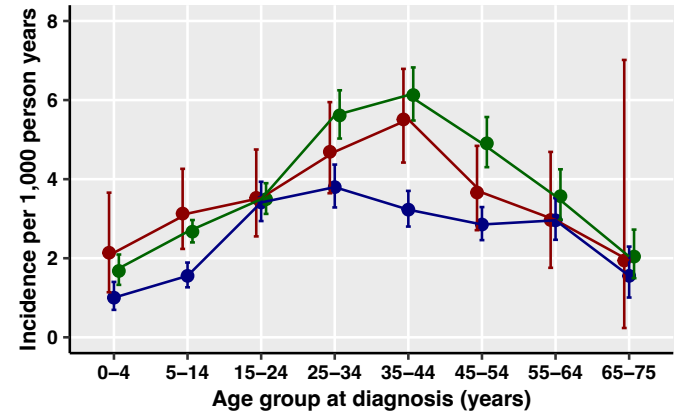

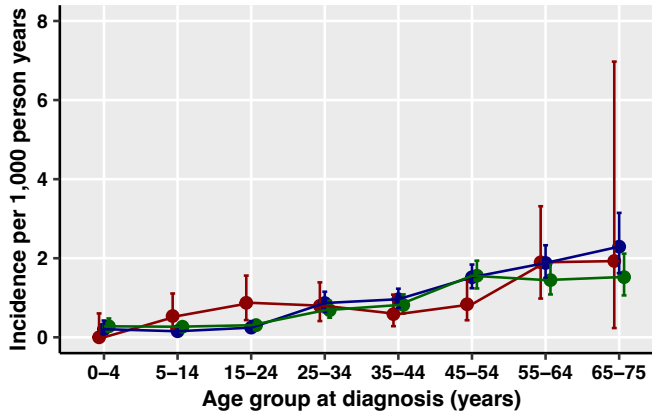

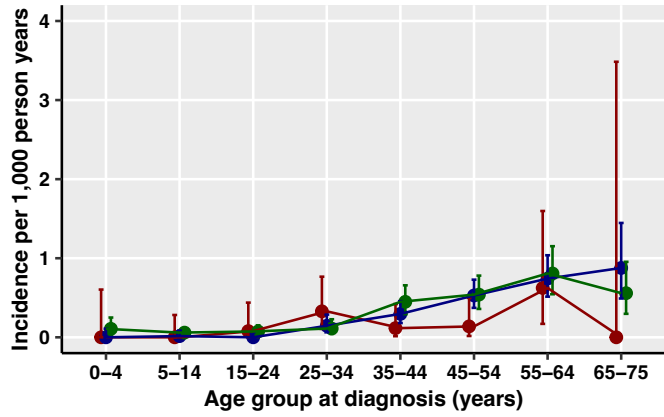

Other conditions

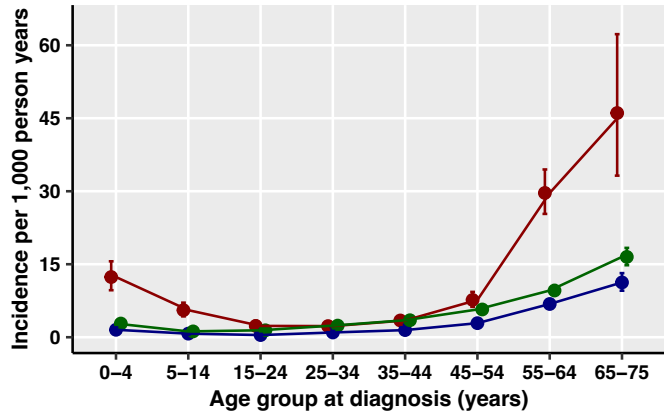

Systemic autoimmune condition

Dental inflammation

Liver disease

Chronic respiratory disease

Constipation

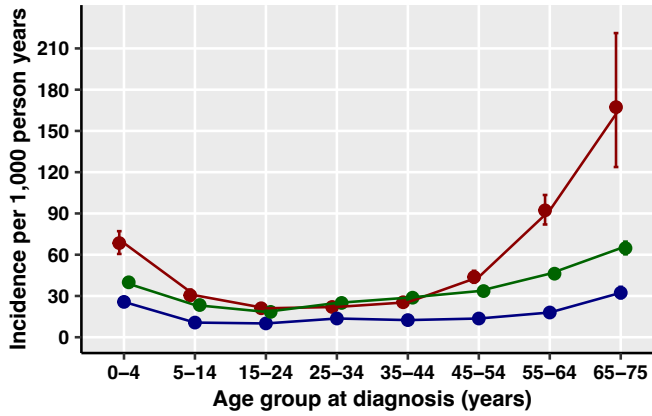

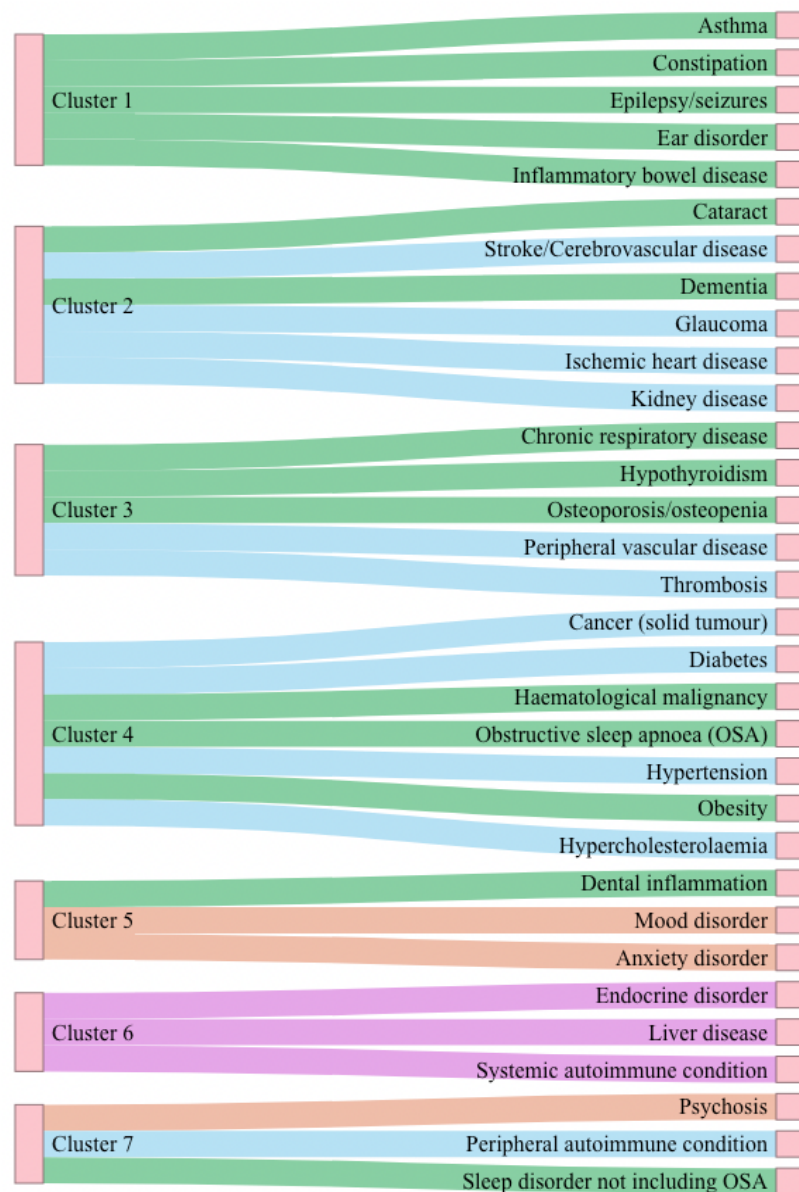

Table S4. Results of the Poisson regression models between people with DS compared to those with ID. Incidence rate ratios were adjusted for each of the diagnoses shown.

Diagnosis	IRR	Lower 95% CI	Upper 95% CI	p-value
Dementia	16.60	14.23	19.37	<0.0001
Hypothyroidism	7.22	6.62	7.88	<0.0001
Obstructive sleep apnoea (OSA)	4.45	3.72	5.31	<0.0001
Haematological malignancy	3.44	2.58	4.59	<0.0001
Cataract	3.14	2.75	3.57	<0.0001
Chronic respiratory disease	2.25	2.04	2.49	<0.0001
Peripheral vascular disease	2.01	1.60	2.53	<0.0001
Kidney disease	1.91	1.68	2.17	<0.0001
Thrombosis	1.58	1.17	2.13	0.003
Peripheral autoimmune condition	1.50	1.43	1.57	<0.0001
Inflammatory bowel disease	1.42	1.28	1.56	<0.0001
Epilepsy/seizures	1.39	1.28	1.52	<0.0001
Stroke/Cerebrovascular disease	1.38	1.14	1.67	0.001
Ear disorder	1.34	1.28	1.40	<0.0001
Constipation	1.25	1.19	1.32	<0.0001
Endocrine disorder	1.18	1.02	1.36	0.03
Systemic autoimmune condition	0.99	0.76	1.30	0.96
Obesity	0.96	0.87	1.06	0.40
Dental inflammation	0.88	0.78	0.99	0.03
Osteoporosis/osteopenia	0.85	0.71	1.02	0.08
Asthma	0.82	0.73	0.91	0.0001
Cancer (solid tumour)	0.78	0.65	0.93	0.007
Ischemic heart disease	0.78	0.60	1.02	0.07
Sleep disorder not including OSA	0.74	0.68	0.80	<0.0001
Hypercholesterolaemia	0.69	0.60	0.80	<0.0001
Diabetes	0.59	0.52	0.66	<0.0001
Liver disease	0.58	0.33	1.02	0.06
Mood disorder	0.55	0.50	0.60	<0.0001
Glaucoma	0.47	0.29	0.78	0.003
Anxiety disorder	0.43	0.38	0.48	<0.0001
Hypertension	0.26	0.22	0.32	<0.0001
Psychosis	0.23	0.17	0.31	<0.0001

Figure S5. Hierarchical clustering of health conditions in the general population.

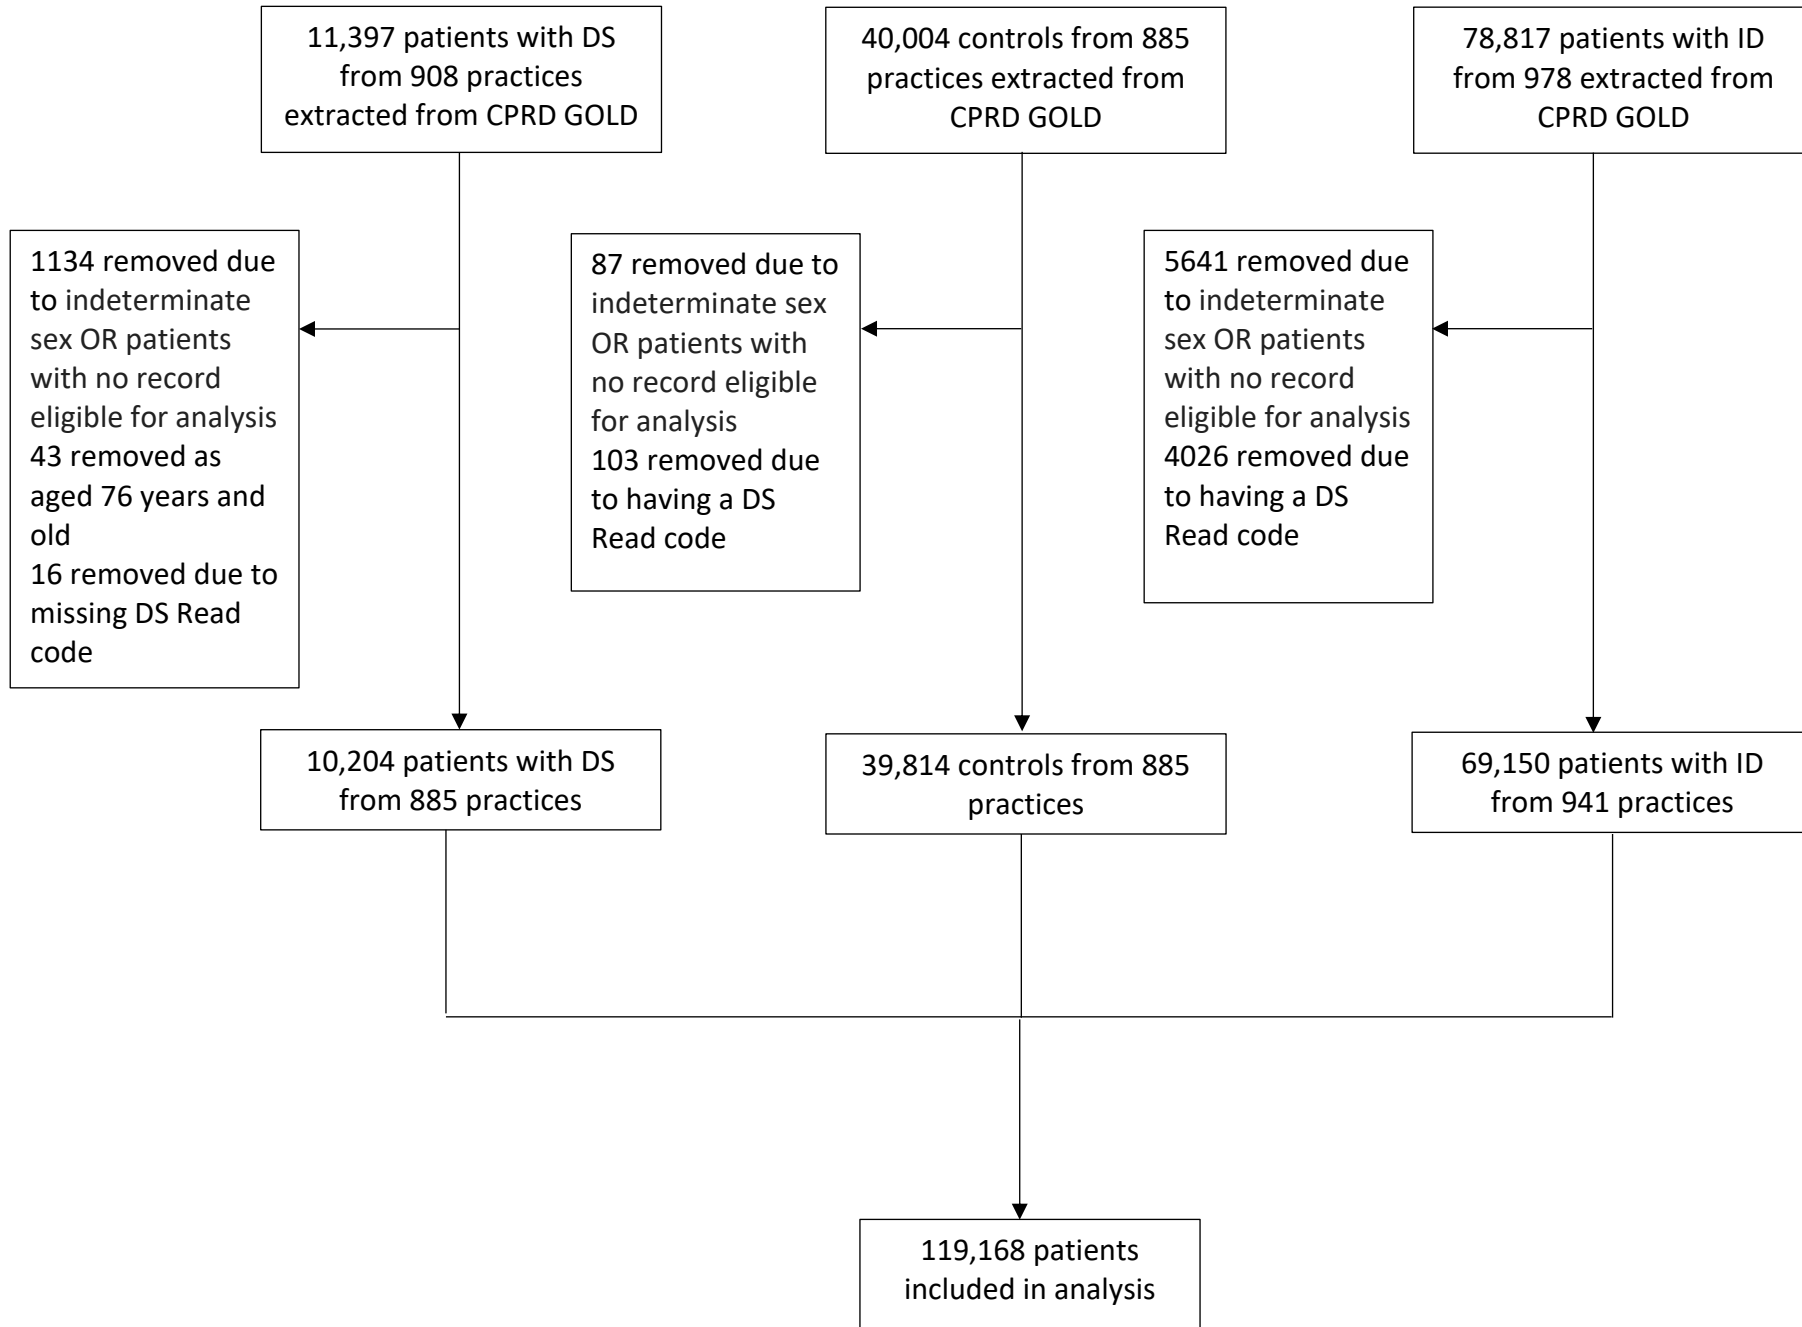

The general population clusters were colour coded based on the clustering of health conditions in the DS sample to illustrate how clusters of conditions were similar and different between people DS and the general population.

Box S6. Comprehensive assessment for people with DS across the lifespan

Age group	Assessment
Infancy	HbA1c/glucose monitoring
	OSA screening
	Bowel monitoring
	Haematological monitoring
Childhood and adolescence	HbA1c/glucose monitoring
	Weight/BMI checks
	OSA screening
	Mood and anxiety assessment
	Hearing and vision checks
Early adulthood (before age 30)	HbA1c/glucose monitoring
	Cardiovascular risk management
	Mood and anxiety assessment
	Hearing and vision checks
Later adulthood	Cognitive health checks
	Seizure surveillance
	Cardiovascular risk management
	Kidney function surveillance
	Bowel monitoring (constipation)
	OSA assessment
	Other sleep disorders assessment
	Respiratory surveillance
	Hearing and vision checks
Throughout life	Thyroid screening
	Endocrine disorder assessment
	Autoimmune surveillance
	Dental checks and oral health guidance

Flowchart of patients

Analysis plan – Multiple morbidity across the lifespan in people with Down syndrome

This analysis plan relates to CPRD protocol 20-048R, and covers the first objective for analysis in the protocol: which was to explore the relationships between CV risk factors including BMI and obesity, blood pressure, total cholesterol and smoking with other common comorbidities typically associated with DS, including congenital heart disease, severity of ID, hypothyroidism, diabetes, sleeping disorders, gastrointestinal diseases, chronic inflammation, psychiatric diagnoses (depression and anxiety) and epilepsy, as well as socio-economic profiles (using the Index of multiple deprivation), in comparison with age and sex matched controls within age groups.

To meet this objective, we had three aims: firstly, to examine age-related trajectories of new onset of health conditions in Down syndrome (DS) across the lifespan compared to general population controls and other forms of intellectual disability (ID) (aim 1a); then to examine risk of new onset of health conditions in Down syndrome (DS) across the lifespan compared to general population controls and other forms of intellectual disability (ID) (aim 1b); and finally, to examine how health conditions might group together in people with DS compared to the general population and other people with ID.

Data and variables:

1. Dataset - CPRD GOLD data from 1990-2020 (July 2020 release).
2. Identify populations of interest: All patients ever diagnosed with DS will be identified using Read codes for DS or Trisomy 21. All patients with an ID diagnosis but without DS will be included using Read codes from CPRD GOLD.
3. Generate diagnostic categories: Read codes for each morbidity will be created using the CPRD Read code browser and codes will be generated by two members of the study team and reviewed by other members/experts in the specific field for the condition if expertise required is required/consensus is not met. Conditions included: congenital heart disease, dementia, hypothyroidism, epilepsy, obstructive sleep apnoea (OSA), haematological malignancy, cancer (solid tumour), chronic respiratory disease excluding asthma (including chronic obstructive pulmonary disease, pneumonia and cystic fibrosis), asthma, obesity, cataract, glaucoma, peripheral vascular disease (PVD), thrombosis, ischemic heart disease (IHD), stroke/cerebrovascular disease (CVD), diabetes (both type 1 and type 2), kidney disease, hypertension, hypercholesterolaemia, osteoporosis/osteopenia, inflammatory bowel disease (IBD), ear disorders, constipation, endocrine disorders, systemic autoimmune conditions, peripheral autoimmune conditions, dental inflammation, sleep disorder not including OSA, liver disease, mood disorder, anxiety, and psychosis.

Primary aim 1a: Examine age-related trajectories of new onset of health conditions in Down syndrome (DS) across the lifespan compared to general population controls and other forms of intellectual disability (ID).

Planned analysis:

- Calculate new onset of conditions using incidence rates per 1,000 person-years (with 95% confidence intervals from the Poisson distribution)
- Group incidence by age group (0-75 years old)
- Plot age groups for each condition for patient group
- Arrange conditions by age-related patterns of onset
- DS will be the baseline group

Primary aim 1b: Examine risk of new onset of health conditions in Down syndrome (DS) across the lifespan compared to general population controls and other forms of intellectual disability (ID).

Planned analysis:

- Poisson regression models
- Incidence rate ratios will be calculated in people with DS and controls and people with DS and people with ID for each health conditions
- Covariates: patient group, age, age-squared, sex, calendar year, calendar year-squared

Primary aim 1c: Examine how health conditions might group together in people with DS compared to the general population and other people with ID.

Planned analysis:

- Prevalence health conditions between 2015 to 2020
- Multiple correspondence analysis (MCA) to extract principal dimensions
- scree plot to select number of dimensions
- Agglomerative hierarchical clustering with Ward's minimum variance method
- Silhouette plot method for final number of clusters
- Individual analysis for each patient group

Alternative options if models and the approach above does not work/converge:

- Incidence rate for whole sample
- Prevalence of over 18-year-old patients only
- Gower method to create distance matrix and PAM clustering

Data Management Plan

Data Management Policy & Procedures

<https://www.kcl.ac.uk/governancezone/assets/research/research- data-management-policy.pdf>

Managing, storing and curating data.

All data will be processed, cleaned and prepared for analysis by the research team following established standard operating procedures (SOPs). All data will be processed and stored on the secure King's College London (KCL) network, which is scalable, secure and backed-up routinely. Data will be password protected and access restricted to only the research team. Data will be backed-up on secure networks and only accessible by the research team. Source data from CPRD will never be altered in any way. Finally, all data will be managed in accordance with KCL's Research Data Management Policy:

<https://www.kcl.ac.uk/governancezone/assets/research/research-data-management-policy.pdf>

Metadata standards and data documentation

CPRD provides detailed metadata and data documentation for researchers to use to process data once approval has been gained:

<https://cprd.com/sites/default/files/2022-02/CPRD%20GOLD%20Full%20Data%20Specification%20v2.5.pdf>

Documentation of analyses and code lists created from this project will be provided to interested researchers.

Data preservation strategy and standards

A requirement for individual researchers who receive CPRD data is to only hold this anonymised patient data for 12 months, or subject to approval, for a longer defined period. After this time, researchers must destroy the anonymised data provided by CPRD, but they are permitted to retain the processed analysis dataset in line with King's College London's data retention policies for research audit purposes. KCL will ensure good scientific practice with respect to data standards and metadata, whereby data will be archived and retained for a minimum of 10 years after the project's completion. Approval for sharing processed analysis dataset will also have to be approved by CPRD.

Formal information/data security standards

King's College London is ISO compliant: BS ISO 15489-2016. King's College London is also a registered data controller under UK GDPR, the registration number is: Z7915194

Main risks to data security

Data security is a high priority for CPRD. For example, CPRD never receives patient-identifiable data from GP practices or from NHS Digital services or from any other source therefore researchers never have access to patient-identifiable data. Linked data provided by CPRD are not patient-identifiable data as data linkage is done by an approved third party and CPRD never receives this information. All data received from CPRD will be password protected and access limited to the study team.

Discovery by potential users of the research data

This study will be listed on the CPRD approved studies webpage on their website, which will tell researchers about the study. Researchers interested in conducting a similar study will be able to contact CPRD to discuss the application process and approvals needed to access the data (<https://cprd.com/data-access>). The policy on data sharing will be published with the dissemination of the research findings in academic journals and at conferences.

Governance of access

Requests by researchers to access the data are reviewed via the CPRD Research Data Governance (RDG) Process to ensure that the proposed research is of benefit to patients and public health. Researchers must adhere to robust terms and conditions governing how the anonymised data is used. All requests from researchers to gain access to linked data must be approved via the CPRD RDG Process as well.

The study team's exclusive use of the data

CPRD data can be requested by any researcher holding a valid licence and granted approval from the CPRD RDG Process. The study team will not have exclusive use of the data.

Restrictions or delays to sharing, with planned actions to limit such restrictions

This project's policy on data sharing is determined by the terms of use given by CPRD.

Regulation of responsibilities of users

The full CPRD data access policy is available online and provides information on data sharing for prospective researchers. In brief, researchers must hold a licence from CPRD and then have their study approved before access is granted:

<https://cprd.com/sites/default/files/2022-02/CPRD%20Research%20Data%20Governance%20Operating%20Framework.pdf>
