Alcohol incorporation as a tool for efficient lignin extraction and utilization

Douwe Sjirk Zijlstra

**university of
groningen**

The work described in this thesis was carried out at the Department of Chemical Engineering, Engineering and Technology Institute Groningen (ENTEG), Faculty of Science and Engineering at the University of Groningen, the Netherlands.

Cover design: Simone van der Kooi

Thesis printed by:

Ipskamp Printing B. V., The Netherlands

university of
groningen

Alcohol incorporation as a tool for efficient lignin extraction and utilization

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 23 June 2023 at 09:00 hours

by

Douwe Sjirk Zijlstra

born on 22 January 1989
in Wânswert, the Netherlands

Supervisors

Prof. P.J. Deuss
Prof. H.J. Heeres

Assessment Committee

Prof. C. Crestini
Prof. J. Luterbacher
Prof. F. Picchioni

Table of contents

Chapter 1	1
Recent developments in the valorization of lignocellulosic biomass – Unlocking the potential of lignin	
1.1 Introduction	2
1.2 Structure of lignocellulosic biomass	3
1.3 Biomass fractionation	6
1.4 Lignin analysis	8
1.5 Lignin chemistry during fractionation	12
1.6 Lignin first strategies	14
1.6.1 In situ fractionation and depolymerization	15
1.6.2 Mild fractionation and lignin isolation	17
1.7 Flow-through extractions	23
1.8 Thesis outline	25
1.9 References	27
1.10 Supporting information	32
Chapter 2	35
Extraction of lignin with high β-O-4 content by mild ethanol extraction and its effect on the depolymerization yield	
2.1 Introduction	36
2.2 Materials and Methods	38
2.2.1 Materials	38
2.2.2 Feedstock pretreatment	38
2.2.3 Lignin extraction methods	38
2.2.4 De-alkoxylation of lignin	39
2.2.5 Lignin depolymerization	39
2.2.6 Lignin analysis	40
2.3 Results and Discussion	41
2.4 Conclusion	51
2.5 References	51
Chapter 3	55
Mild organosolv lignin extraction with alcohols; The importance of benzylic alkoxylation	
3.1 Introduction	56
3.2 Materials and Methods	59
3.2.1 Materials	59
3.2.2 Feedstock preparation	59
3.2.3 Organosolv extractions	59
3.2.4 Yield correction and alcohol incorporation	60
3.2.5 Model compound studies	61
3.2.6 Analysis	62
3.3 Results and Discussion	63
3.4 Conclusion	76
3.5 References	77
3.6 Supporting information	79

Chapter 4

93

Mild and green organosolv extractions for the isolation of α -alkoxylation β -O-4 lignin

4.1	Introduction.....	94
4.2	Experimental section.....	96
4.3	Results and Discussion.....	97
4.4	Conclusion	108
4.5	References	108
4.6	Supporting Information	111

Chapter 5

119

Efficient mild organosolv lignin extraction in a flow-through setup yielding lignin with high β -O-4 content

5.1	Introduction.....	120
5.2	Materials and Methods.....	123
5.2.1	Materials	123
5.2.2	Flow-through organosolv extraction	123
5.2.3	Batch organosolv extraction	124
5.2.4	2D HSQC NMR spectroscopy	124
5.2.5	Biomass analysis	124
5.3	Results and Discussion.....	125
5.4	Conclusions	133
5.5	References	133
5.6	Supporting Information	135

Chapter 6

139

Highly efficient semicontinuous extraction and in-line purification of high β -O-4 butanosolv lignin

6.1	Introduction.....	140
6.2	Materials and Methods.....	143
6.2.1	Materials	143
6.2.2	Experimental procedures	143
6.2.3	Analysis.....	145
6.3	Results and Discussion.....	146
6.4	Conclusion	155
6.5	References	156
6.6	Supporting Information	160

Chapter 7 165

Applications of α -alkoxylated lignin: Decarbonylation studies on the alkoxylated β -O-4 motif

7.1	Introduction	166
7.2	Experimental procedures	168
7.3	Results and Discussion.....	170
7.3.1	Sequential catalytic modification of the α -alkoxylated β -O-4 motif to facilitate C-O bond cleavage by Ruthenium-Xantphos catalyzed hydrogen transfer	170
7.3.2	Combined lignin defunctionalization and synthesis gas formation by acceptorless dehydrogenative decarbonylation	177
7.4	Conclusion	181
7.5	References	182
7.6	Supporting Information.....	184

Chapter 8 189

Applications of α -alkoxylated lignin: Development of amphiphilic copolymers using modified butanosolv lignin

8.1	Introduction	190
8.2	Experimental procedures.....	191
8.3	Results and Discussion.....	192
8.4	Conclusion	199
8.5	References	200
8.6	Supporting Information.....	201

Chapter 9 205

Summary and Outlook

9.1	Aim and Scope	206
9.2	Summary.....	207
9.3	Outlook	212
9.4	Doel en Strekking	216
9.5	Samenvatting.....	217
9.6	List of Publications	222

Acknowledgements 223
