Joint ISPRS Commission III / IV Workshop

3D Reconstruction and Modelling of Topographic Objects

Editors

E. P. Baltsavias, W. Eckstein, E. Gülch, M. Hahn, D. Stallmann, K. Tempfli, R. Welch

17 - 19 September 1997
Stuttgart, Germany

UB/TIB Hannover 89
121 271 625

Organising ISPRS Working Groups

WG III/4 - Image Understanding/Object Recognition

WG IV/2 - Digital Terrain Models, Orthoimages and 3D GIS

Intercommission WG IV/III.2 - Integration of Image Analysis and GIS

Cooperating Organisations

International Society for Photogrammetry and Remote Sensing (ISPRS)

German Society for Photogrammetry and Remote Sensing (DGPF)

Institute of Photogrammetry, University of Stuttgart

CONTENTS

Preface	iii
 Technical Session 1: Fusion of Multiple Data Sources	
• Digital Terrain Models - New Techniques, Demands, Concepts Friedrich Ackermann (University of Stuttgart).....	1
• Geometric Correction of Hyperspectral Scanner Data with Simultaneously Acquired Stereo Data Norbert Reulke, Ralf Reulke (DLR, Berlin), Michael Schaeppman, Daniel Schläpfer (University of Zurich), Peter Strobl, Andreas Mueller (DLR, Wessling)	9
• Multi-Source Snow Cover Monitoring in the Swiss Alps Jens Piesbergen, Harold Haefner (University of Zurich)	15
• Detecting and Identifying Topographic Objects in Imaging Laser Altimeter Data Christoph Hug, Aloysius Wehr (University of Stuttgart).....	19
 Technical Session 2: Use of Laser Scanners and Digital Surface Models for Building Reconstruction	
• Extracting Buildings from Digital Surface Models Ansgar Brunn, Uwe Weidner (University of Bonn).....	27
• Automated Registration of Ground-Based Laser Range Images for Reconstructing Urban 3D Object Huijing Zhao, Ryosuke Shibasaki (University of Tokyo).....	35
• Building Detection by Fusing Airborne Laser-Altimeter DEMs and 2D Digital Maps Mathias J.P.M. Lemmens, Heidi Deijkers (Delft University of Technology), Pierre A.M. Looman (Geodan Geodesie, Amsterdam).....	42
 Technical Session 3: Plans and Activities of National Mapping Agencies and Related Research Projects	
• Capturing and Maintaining GIS Data Sets Using Digital Imagery: Experience and Future Requirements of National Mapping Agencies Alain Dupéret (IGN, Paris), Christoph Eidenbenz (Swiss Federal Office of Topography, Bern), David Holland, Keith Murray (Ordnance Survey, Southampton)	51
• Raster-Based Methods to Extract Structured Information from Scanned Topographic Maps Steffen Frischknecht, Alessandro Carosio (ETH, Zurich).....	63
• Generation of 3D City Models from Digital Surface Models and 2D GIS Norbert Haala, Claus Brenner, Karl-Heinrich Anders (University of Stuttgart)	68
 Technical Session 4: 3D Reconstruction of Buildings and Other Topographic Objects from Aerial Imagery	
• 3D Reconstruction of Topographic Objects at the University of Massachusetts Howard Schultz, Christopher O. Jaynes, Mauricio Marengoni, Anthony Schwickerath, Frank R. Stolle, Xiaoguang Wang, Allen R. Hanson, Edward M. Riseman (University of Massachusetts, Amherst, Ma)	77
• 3D Reconstruction of House Roofs from Multiple Aerial Images of Urban Areas Marcel Hendrickx, Jan Vandekerckhove, David Frère, Theo Moons, Luc Van Gool (Catholic University Leuven).....	88
• Automated Shack Reconstruction Using Integration of Cues in Object Space Emmanuel P. Baltsavias (ETH, Zurich), Scott O. Mason (University of Cape Town).....	96

Technical Session 5: Matching and Surface Reconstruction for Building Extraction

- **A Step Towards Stereo Reconstruction of Urban Aerial Images**
Michel Roux, Henri Maître, Stéphane Girard (ENST, Paris)..... 107
- **Spatially Constrained Building Extraction Using Edge Finding and Model Fitting**
Jussi Lammi (ESPA Systems, Espoo)..... 115
- **Designing an Object-Oriented Matching Tool**
Hardo Müller (University of Bonn)..... 120

Technical Session 6: Map and Knowledge Based Building Reconstruction

- **Building Reconstruction Using Different Views and Context Knowledge**
Uwe Stilla, Roland Geibel, K. Jurkiewicz (FGAN-FIM, Ettlingen) 129
- **Reducing Complexity of 3D Object Reconstruction due to Symmetry of Model Knowledge**
Roman Englert (University of Bonn) 137
- **Interactive 3D Extension of 2D Map Data Using Mono Images**
Peter Axelsson (KTH, Stockholm) 145

Technical Session 7: Quality and Sensitivity Issues of Object Reconstruction Methods

- **Evaluation of Automatic Road Extraction**
Christian Heipke, Helmut Mayer, Christian Wiedemann (TU Munich), Olivier Jamet (IGN, Paris)..... 151
- **Modeling the Influence of JPEG Compression on DTM Accuracy**
Rob Reeves (Queensland University of Technology, Brisbane), Michael Hahn (University of Stuttgart) 161
- **Modelbased Recognition and Parameter Estimation of Buildings from Multi-View Aerial Imagery Using Multi-Segmentation**
Luuk Spreeuwiers (University of Twente, Enschede), Klamer Schutte (TNO, The Hague), Zweitze Houkes (University of Twente, Enschede)..... 169

Technical Session 8, 9: 3D Modelling, Visualisation and Systems

- **SAPHIR 3D: A System for 3D Site Model Acquisition**
Issam Tannous, Stéphane Gobert, Thierry Laurençot, Philippe Vorms (Thomson-CSF/Syseca, Malakoff) . 175
- **Integration Concept for Interactive Modeling, Computer Vision and Sensor Fusion for Scene Reconstruction in Difficult Environments**
Holger Lange (Computing Devices Canada, Ottawa)..... 181
- **Topologic Models for Geometric Reconstruction**
Mathieu Koehl (ENSAI, Strasbourg) 189
- **Development of the ArcView 3D Analyst Extension**
Morakot Pilouk, Dragan Petrovic, Clayton Crawford, Christoph Graf (ESRI, Redlands, Ca) 196
- **Interfacing Multimedia with GIS for Database Visualization**
Roy Welch, Marguerite Remillard (University of Georgia, Athens, Ga) *Abstract*..... 203
- **3D-Urban GIS - Digital City Models for Planning Purposes**
Constantin Boytscheff (University of Stuttgart), Sigrid Bartel, Ralf Bill (University of Rostock), Alexander Koeninger (University of Stuttgart) *No paper*.....
