

MUNICIPAL LIABILITY UNDER SUPERFUND — A LEGISLATIVE RESPONSE

*Honorable Robert G. Torricelli**

I. The Superfund Threat to Cities

For many years following the enactment of The Comprehensive Environmental Response, Cleanup and Liability Act of 1980 (CERCLA),¹ otherwise known as Superfund,² municipalities have “stood on the sidelines” while industry, environmental groups and federal and state governments have debated over cleanup liability.³ Although some twenty percent of the roughly

* United States Congressman, 9th Congressional District of New Jersey. B.A., Rutgers College (1973); LL.B., Rutgers School of Law (1976); M.P.A., Harvard University, (1980). Mr. Torricelli (D-Englewood, New Jersey) was born on August 26, 1951 in Paterson, New Jersey. From 1975 to 1977 Mr. Torricelli served as deputy legislative counsel to New Jersey Governor Brendan Byrne. From 1978 to 1981 he served as counsel to United States Vice President Walter F. Mondale. Mr. Torricelli was elected to Congress in 1982 to serve New Jersey's 9th Congressional District. He has been re-elected in 1984, 1986 and 1988. Mr. Torricelli is a member of the Committee on Foreign Affairs where he serves as Chairman of the Subcommittee on Western Hemispheric Affairs. Mr. Torricelli also serves on the Committee on Science, Space and Technology.

¹ P.L. No. 96-510, 94 Stat. 2767, 42 U.S.C. §§ 9601-9675 (1988).

² The Superfund is a legislative mechanism for the creation of a public trust fund for the cleanup of toxic waste sites, 26 U.S.C. § 9507 and a scheme to apportion liability and encourage private parties to cleanup these sites. 42 U.S.C. §§ 9606, 9607. See Molly A. Meegan, Comment, *Municipal Liability for Household Hazardous Waste: An Analysis of the Superfund Statute and Its Policy Implications*, 79 GEO. L.J. 1783, 1785 n.15 (1991); Rena I. Steinzor, *Local Government and Superfund: Who Will Pay the Tab?*, 22 URB. LAW. 84-85 (1990) [hereinafter Steinzor, *Who Will Pay the Tab?*].

³ See Steinzor, *Who Will Pay the Tab?*, *supra* note 2, at 79-80. CERCLA imposes liability on four categories of “potentially responsible parties” (PRPs):

- (1) the owner and operator of a vessel or a facility,
- (2) any person who at the time of disposal of any hazardous substance owned or operated any facility at which such hazardous substances were disposed of,
- (3) any person who by contract, agreement, or otherwise arranged for disposal or treatment, or arranged with a transporter for transport for disposal or treatment, of hazardous substances owned or possessed by such person, by any treatment, of hazardous substances owned or possessed by such person, by any other party or entity, at any facility or

1,200 sites on the Superfund's National Priorities List (NPL)⁴ were labeled as "municipal landfills,"⁵ municipal organizations have not, until recently, become deeply concerned about Superfund policy.⁶

The attitude of municipalities changed dramatically following the 1989 release of the Environmental Protection Agency's (EPA) Interim Municipal Settlement Policy⁷ and the subsequent filing of a series of third-party "contribution" lawsuits seeking hundreds of millions of dollars in damages from small and medium-sized cities throughout the country.⁸

incineration vessel owned or operated by another party or entity and containing such hazardous substances, and

(4) any person who accepts or accepted any hazardous substances for transport to disposal or treatment facilities, incineration vessels or sites selected by such person, from which there is a release, or a threatened release which cause the incurrence of response costs, of a hazardous substance . . .

42 U.S.C. § 9607(a)(1)-(4).

CERCLA defines a person as "an individual, firm, corporation, association, partnership, consortium, joint venture, commercial entity, United States Government, State, *municipality*, commission, *political subdivision of a State*, or any interstate body." *Id.* at § 9601(21) (emphasis added). Such persons can be held "strictly, jointly, and severally liable for the costs of cleanup whether such costs are incurred by the federal government, state governments, or private parties. They are also liable for damages to natural resources and the costs of any health assessment or health effects study carried out under [CERCLA]." Steinzor, *Who Will Pay the Tab?*, *supra* note 2, at 79-80 (footnote omitted). See *id.* at 88 nn.29-30 for citations to lower court opinions which construed CERCLA's liability provisions to corporate defendants.

⁴ *Id.* at 79-80 citing 54 Fed. Reg. 33,846 (1989). NPL sites are selected from approximately 33,000 sites which are on file with the EPA. These sites are usually furnished by past or present owners, or state environmental protection agencies. *Our Nation's Transportation and Care Infrastructure: Hearings Before the House Comm. on Public Works and Transportation*, 102d Cong., 1st Sess. 757 (1991) (prepared statement of William K. Reilly, Administrator, U.S. Environmental Protection Agency).

⁵ The EPA defines a municipal landfill as "any landfill, whether publicly or privately owned, that has received municipal solid waste (MSW) for disposal. SUPERFUND PROGRAM; INTERIM MUNICIPAL SETTLEMENT POLICY, 54 Fed. Reg. 51,071, 51,074 (1989).

⁶ Steinzor, *Who Will Pay the Tab?*, *supra* note 2, at 79-80.

⁷ 54 Fed. Reg. 51,071 (1989). See *supra* note 12 and accompanying text for a discussion of the EPA's Interim Municipal Settlement Policy.

⁸ Private party PRPs have filed third-party suits against municipalities in at least eight states and threaten to file many more. See Rena I. Steinzor & Matthew F. Lintner, *Should Taxpayers Pay the Cost of Superfund?*, 22 *Env'tl. L. Rep.* (Env'tl. L. Inst.) 10089, 10090 n.8 (Feb. 1992) (citing *United States v. Kramer*, 770 F. Supp. 954 (D.N.J. 1991); 757 F. Supp. 397 (D.N.J. 1991); *B.F. Goodrich Co. v. Murtha*, 754 F. Supp. 960 (D. Conn. 1991), *appeal docketed*, 91-7450 (2d Cir. May 8, 1991); *Trans-*

In 1986, Superfund was amended by the Superfund Amendment and Reauthorization Act (SARA).⁹ One of the provisions the amendment added to the Superfund program explicitly allowed private parties sued by the state or federal government to sue other parties for contribution.¹⁰ The impetus of the provision was to allow responsible parties to spread costs amongst themselves and thereby achieve a more rational distribution of costs. Now this provision is being turned on its head, and private party suits in some cases are leading to the possibility of an irrational cost distribution.¹¹ This problem began just a few years ago with the issuance by the EPA of a policy addressing Superfund sites involving municipalities.

II. EPA's Interim Municipal Settlement Policy

The Interim Municipal Settlement Policy¹² set the guidelines

portation Leasing Co. v. California, 21 *Envtl. L. Rep.* (*Envtl. L. Inst.*) 20777 (C.D. Cal. Dec. 5, 1990); *Anderson v. Minnetonka*, No. CV 3-90-312 (D. Minn., Apr. 24, 1991); *New Jersey Dep't of Env'tl. Protection v. Almo Anti-Pollution Servs. Corp.*, No. 89-4380 (JFG) (D.N.J. Nov. 20, 1990) (third-party complaint filed); *United States v. Charles George Trucking*, No. 85-2463-WD (D. Mass. Feb. 12, 1990) (third-party complaint filed); *United States v. Superior Tube Co.*, No. 89-7421 (E.D. Pa. Dec. 22, 1989) (third-party complaint filed); *New Jersey Dep't of Env'tl. Protection v. Gloucester Evntl. Mgmt. Servs.*, No. 84-0152 (SSB) (D.N.J. Apr. 14, 1988) (third-party complaint filed).

⁹ Pub. L. No. 99-499, 100 Stat. 1615 (1986).

¹⁰ 42 U.S.C. § 9613(f). Courts had implied a right of contribution before this amendment explicitly granted the right. See *United States v. Conservation Chem. Co.*, 619 F. Supp. 162, 226 (D. Mo. 1985).

¹¹ See *supra* note 8 for a list of third-party suits filed against municipalities.

¹² 54 Fed. Reg. 51,071 (1989). The EPA published this statement on December 12, 1989 and has received comments from interested parties. The EPA, however, has not responded to these comments publicly or issued a policy statement in final form.

The EPA's policy statement reduced the risk of federal prosecution for MSW but did nothing to deter or limit industry polluters from bringing suits against municipalities. Under CERCLA, if the government finds that a party is a PRP (including a municipality) at a Superfund site it has two options. The EPA can choose to use Superfund monies to cleanup the site, provided such monies are available. The EPA can then enforce CERCLA's liability provisions to recover the funds. 42 U.S.C. § 9607. The EPA can also choose to issue an order against a group of PRPs to conduct the cleanup. *Id.* at § 9606. See *Rena I. Steinzor & Matthew F. Lintner, Local Government and Superfund, 1992 Update: Who is Paying the Tab?*, *URB. LAW.* (forthcoming 1992)(manuscript at 4). The EPA stated in its Interim Municipal Settlement Policy that it would not routinely prosecute local governments for the generation or transportation of MSW. 54 Fed. Reg. 51,072.

for how the federal government would exercise prosecutorial discretion at sites involving MSW or sewage sludge.¹³ The policy stated that EPA will generally not sue local governments or any other party, where the party's only connection to the site is the generation or transportation of MSW or sewage sludge.¹⁴

The interim policy, however, did nothing to bar private corporations identified by the EPA as responsible for the costs of cleaning up Superfund sites from filing suits against other parties.¹⁵ In fact, the EPA underestimated the extent to which corporate PRPs would take advantage of their ability to initiate third-party lawsuits.

Critics of the interim policy cite the EPA's lack of protection for third parties, especially municipalities, and its failure to exempt MSW from Superfund liability as partially responsible for the escalation of third party suits aimed at private businesses and municipalities.

By failing to totally exclude MSW from CERCLA liability, the interim policy has implicitly, if not explicitly, determined that MSW containing solely household hazardous wastes is a CERCLA hazardous substance. It is this aspect of the interim policy that . . . will have potentially disastrous implications for present solid waste disposal as well as for CERCLA and state settlements and cost recovery actions.¹⁶

III. *Municipal Liability Under CERCLA*

CERCLA provides a very broad definition of those responsi-

¹³ The EPA defines MSW as waste that is generated primarily by households. The composition of such waste varies considerably depending on the site, however, MSW is "generally composed of large volumes of non-hazardous substances (e.g., yard waste, food waste, glass, and aluminum) and may contain small quantities of household hazardous wastes (e.g., pesticides and solvents) as well as small quantity generator wastes." 54 Fed. Reg. at 51,074 (emphasis in original).

¹⁴ See 54 Fed. Reg. 51,071, 51,074 (1989). Municipalities can be subject to liability under an EPA cost recovery action if it is found that a municipality collected and delivered waste that includes industrial or commercial hazardous materials to a site. *Id.* at 51,074.

¹⁵ 54 Fed. Reg. 51,706. The EPA states that "[n]othing in this interim policy affects the rights of any party in seeking contribution from another party." *Id.*

¹⁶ January 10, 1991 letter from Judith Yaskin, State of New Jersey, Department of Environmental Protection, to Don R. Clay, Assistant Administrator, Office of Solid Waste and Emergency Response, United States Environmental Protection Agency, page 1.

ble parties who may be defendants in a private party cost recovery action.¹⁷ Clearly, municipalities could fall into any one or all of these categories. Yet, liability for the generation or transportation of municipal solid waste or sewage sludge is becoming the most threatening type of exposure for municipalities.¹⁸ Corporations have taken to aggressively pursuing state and local governments and private parties under CERCLA to help recover the costs of cleanup for sites where municipalities have either transported or disposed MSW.¹⁹

The *Wall Street Journal* reported last year that a pizzeria in Utica, New York had a lawsuit filed against it by Special Metals Corporation and Chesebrough-Ponds's USA Co.²⁰ According to the *Journal* story, the two corporations were charged with violating federal anti-pollution statutes and had agreed to a \$9 million cleanup effort of a New York landfill.²¹ Municipalities have been targeted in many similar suits. In New Jersey alone, more than 95 local governments have been sued or threatened with a suit by private parties charged with cleaning up Superfund sites.²² And, to add insult to injury, many of these towns find themselves the targets of multiple third-party suits.²³

¹⁷ 42 U.S.C. § 9607(a)(1)-(4)(1988). See note 3 *supra* for the text of Section 9607(a)(1)-(4).

¹⁸ Rena I. Steinzor & Matthew F. Lintner, *Coming Soon to a Town near You — Municipal Liability Under CERCLA*, 6 TOXICS L. REP. 564, 565 (1991).

¹⁹ See *supra* note 8 for list of pending third party suits. Rena Steinzor, in a recent article, described the plight of the corporation stung by Superfund liability:

Until recently, the brunt of Superfund's heavy liability has been born by the manufacturing sector, especially oil and chemical industries, which have contributed a large portion of the toxic wastes now causing problems at Superfund sites. As these corporations suffer growing economic stress, they have begun to search for fellow 'deep pockets' to help shoulder multi-billion dollar cleanup costs. The insurance industry was the first, logical target of such efforts. Local governments are clearly next in line.

Steinzor, *Who Will Pay the Tab?*, *supra* note 2, at 80, 82 (1990).

²⁰ Robert Tomsho, *Pollution Ploy, Big Corporations Hit by Superfund Cases Find Way to Share Bill*, WALL STREET J., Apr. 2, 1991, at 1. The corporations also sued "hundreds of Utica-area towns, school districts and small business owners." *Id.*

²² *Superfund Issues Facing Municipalities: Hearing Before the Subcomm. on Superfund, Ocean and Water Protection of the Senate Comm. on Environment and Public Works*, 102d Cong., 1st Sess. 74 (1991) (prepared statement of the Honorable Dale Taylor, Mayor of Wenonah, N.J.).

²³ *Id.*

In one instance, 29 cities are being sued by 64 major corporations alleging that they are liable for the cleanup of the 200-acre Operating Industries Superfund site in Monterey Park, California.²⁴ According to the city manager of one of these cities, the total cleanup costs of this site could reach between \$650 and \$800 million.²⁵ The cities named, he was told, should be expected to foot up to 90 percent of this bill.²⁶

It does not seem to matter that MSW is of very low toxicity,²⁷ municipalities are fair game under CERCLA, and corporations seeking help in paying for cleanup costs, or simply stalling for time, will continue to file suits.²⁸ Case law points to the undeniable fact that

[m]unicipalities have become the latest victims of the inexorable extension of CERCLA liability to government entities. Three recent decisions addressed municipal liability, and refused to find that Congress had intended to treat local governments any differently from other persons merely because their nexus to a CERCLA cleanup site was through disposal of municipal solid waste.²⁹

²⁷ Studies indicate that hazardous substances constitute less than one half of one percent contained in household garbage. Kinman & Nutini, *Household Hazardous Waste in the Sanitary Landfill*, 11 CHEM. TIMES AND TRENDS 23, 24 (1988).

²⁸ Rena I. Steinzor & Matthew F. Lintner, *Should Taxpayers Pay the Cost of Superfund*, 22 *Envtl. L. Rep. (Envtl. L. Inst.)* 10089 (Feb. 1992). See also Kyle E. McSlarrow, et al., *A Decade of Superfund Litigation: CERCLA Case Law From 1981-1991*, 21 *Envtl. L. Rep. (Envtl. L. Inst.)* 10,037, 10,368 (July 1991). The authors provide an in-depth survey of litigation which was spawned after the adoption of the Superfund legislation. They observed that:

[I]n the imposition of liability, CERCLA shows mercy for no one, not even state, federal and municipal governments. The application of CERCLA liability to governments is logically inescapable, given the text of the statute and the judicial gloss that increasingly ensnares those with even the most attenuated connection to a contaminated site.

IV. The Cost to Cities

The tremendous cost of these suits can easily bring municipal governments to their knees. Many cities can neither afford to pay the cleanup costs for which they are being sued, or the costs of the endless litigation involved in many Superfund proceedings. In testimony before a Senate subcommittee, a member of the city council of Alhambra, California said that:

Local governments, small businesses and others find themselves in a horrific 'Catch 22' when they receive notice of such lawsuits. If they cannot afford, or do not think it is right, to settle such claims, they must spend millions to defend themselves and pray that somewhere down the line a judge will put an end to this madness. The price paid in the interim is extreme . . . [O]ne of the cities in our group — Bell, California — had no alternative but to lay off two policemen in order to meet its share of our joint defense costs, and I am certain that these normally hidden, but devastating, social costs are being duplicated in targeted communities throughout the country.³⁰

V. A Solution — The Toxic Cleanup Equity and Acceleration Act

The only clear way around these difficulties is to protect municipalities from the capricious filing of third-party suits. The EPA cannot deal with the problem through a simple rule making proceeding. The Superfund law has to be changed by Congress. I have introduced legislation, The Toxic Cleanup Equity and Acceleration Act of 1991³¹ to protect citizens, municipalities and other generators and transporters of MSW and sewage sludge from lawsuits equating these substances with industrial hazardous wastes. While it protects these parties, the Act will still maintain the basic Superfund philosophy of requiring the polluter to pay for the cost of cleaning up the nation's old toxic waste sites.

A. Section 4 — Preventing Third-Party Lawsuits

Section 4 of the bill modifies CERCLA to prevent third-party

³⁰ *Superfund Issues Facing Municipalities: Hearing Before the Subcomm. on Superfund, Ocean and Water Protection of the Senate Comm. on Environment and Public Works*, 102d Cong., 1st Sess. 3 (July 29, 1991) (prepared statement of Boyd C. Condie, Council Member, Alhambra, Ca.)

³¹ H.R. 3026, 102d Cong., 1st Sess. (1991). (The full text of H.R. 3026 is set out in the appendix to this article).

contribution suits against municipalities or other persons if their only actions were related to the generation or transportation of MSW or sewage sludge.³² As used in the bill, "generation" or "generators" is meant to refer to actions or persons described by section 107(a)(3) of CERCLA and may include arranging for the transportation, treatment, or disposal of hazardous substances.³³ "Transportation" or "transporters" is meant to refer to actions or persons described by section 107(a)(4).³⁴ If municipalities owned or operated a facility, or generated or transported waste materials that do not meet the definitions of MSW and sewage sludge, the block on third-party suites does not apply.³⁵

Section 4 of the bill also codifies EPA's Interim Municipal Settlement Policy.³⁶ The bill states that the President must not sue municipalities or other persons who merely generated or transported MSW or sewage sludge, unless "truly exceptional circumstances" exist.³⁷ These circumstances exist when the President has reliable evidence from a particular site that hazardous substances have been released that are not ordinarily found in MSW or sewage sludge *and* that those substances have come from commercial, institutional, or industrial processes, not households.³⁸ Truly exceptional circumstances also exist when the toxicity and volume of waste from commercial, institutional and industrial sources is insignificant compared with the toxicity and volume of the MSW or sewage sludge, or when absent all the hazardous substances from commercial, institutional and industrial sources, the hazardous substances from municipal solid waste or sewage sludge would be a significant cause of the contamination requiring the cleanup. When non-household trash at a site is alleged to be similar to ordinary household garbage, the President may require that the generators or transporters of the trash bear the burden of proving that similarity.³⁹

The section identifies two specific situations that can never

³² *Id.* at § 4. See *id.* at § 3 for definition of MSW.

³³ *Id.* at § 4.

³⁴ 42 U.S.C. § 9607 (1988). See *supra* note 3 for text of section 9607.

³⁷ H.R. 3026 at § 4.

³⁸ *Id.*

³⁹ *Id.*

amount to truly exceptional circumstances. First, when MSW or sewage sludge have been contaminated with hazardous substances at a waste transfer station, the generator or transporter of the original MSW or sewage sludge is not held responsible for the subsequent contamination (unless the generator or transporter also owned or operated the waste transfer station).⁴⁰ Second, when sewage sludge has been approved by the President for "beneficial reuse" such as fertilizer, or would have so qualified at the time of disposal, that sludge cannot be the basis for the President bringing a lawsuit under Superfund. Finally, Section 4 of the bill states that municipalities will not be liable under Superfund for exercising its regulatory power when it owns a public right-of-way, such as a road or sewage pipeline, over which hazardous substances are transported.⁴¹

B. Section 5 — Settlement Opportunities

Section 5 of the Bill creates a special settlement opportunity for municipal generators and transporters of MSW and sewage sludge.⁴² When a municipality is noticed by any person that it may be sued for generating or transporting MSW or sewage sludge, the Bill permits the municipality to request the President to enter into a settlement for all or part of the municipality's potential liability. The section requires that the settlement must be reached within 120 days, unless specific conditions are met.⁴³

Once the municipality requests a settlement, a moratorium on administrative or judicial action against the municipality begins, and it continues until a negotiated settlement is reached or until the President publishes an explanation of why a settlement cannot be reached. A municipality may ask a federal district court to review the President's decision denying the request for settlement.⁴⁴

This section provides for three acceptable reasons for failing to settle: 1. the municipality refuses to pay according to specific

⁴⁰ *Id.*

⁴¹ *Id.* A public-right-of-way includes, "roads, streets, or other public transportation routes, and pipelines used as a conduit for sewage or other liquid or semiliquid discharges." *Id.*

⁴² H.R. 3026, 102d Cong., 1st Sess. § 5 (1991).

⁴³ *Id.*

⁴⁴ *Id.*

cost allocation criteria, 2. the municipality refuses to agree to settlement terms routinely required by the President in settlements with parties who bear insignificant responsibility for sites, or 3. there is insufficient information to allocate costs.⁴⁵ If the President believes there is insufficient information, the moratorium is extended until enough information is obtained, but a completed remedial investigation/feasibility study (RI/FS) is deemed to provide sufficient information, at least for the portion of the site studies in the RI/FS. Also, if the President has settled with another party (other than a *de minimis*⁴⁶ party), it is presumed that he has enough information to settle with the municipality regarding matters addressed in the prior settlement.⁴⁷

Section 5 requires a municipality to pay for costs based on the portion of its MSW or sewage sludge that consists of hazardous substances, not on the total volume of the waste. MSW and sewage sludge are presumed to contain no more than one-half of one percent of hazardous substances unless the President obtains reliable site-specific evidence to the contrary.⁴⁸

This section also requires the President to limit the amount a municipality must pay if payments would force a municipality to dissolve, to declare bankruptcy, or to default on its debt obligations. A municipality can settle under this section even if it may face other liability for acts unrelated to its role as generator or transporter of MSW or sewage sludge (although the settlement can ignore such other liability).⁴⁹

The bill makes clear that the settlement, which can take the form of a consent decree or an administrative order, must include both a promise from the President (unless contrary to the public interest) not to sue the municipality again and protection from contribution suits or other claims under Superfund for matters addressed in the settlement. Under this section, the President cannot reserve any rights for further relief that he does not

⁴⁵ *Id.*

⁴⁶ The EPA can enter settlements with so-called "de minimis" parties when that party has contributed a low volume of toxic waste. See 42 U.S.C. § 9622(g). The provision is not available to cities contributing MSW since in such cases the volume is relatively high.

⁴⁷ H.R. 3026 at § 5.

⁴⁸ *Id.*

⁴⁹ *Id.*

ordinarily reserve in settlements with parties who bear insignificant responsibility for sites. The President also cannot ask a municipality to indemnify the United States or require a municipality to violate laws about meeting its fiscal obligations. Finally, the President must encourage municipalities to contribute services instead of money and to make delayed payments or payments over time.⁵⁰

C. *Section 6 — Preliminary Allocation of Responsibility*

This section provides that, at the request of a municipality, the President must prepare a non-binding preliminary allocation of responsibility, unless doing so would be contrary to the public interest. In such allocations, the volume of MSW and sewage sludge must refer to the portion of its MSW or sludge that consists of hazardous substances not on the total volume of the waste.⁵¹

D. *Section 7 — Retroactive Nature of The Act*

Section 7 of the Bill provides that the Act applies to all administrative or judicial actions that began before the effective date of the Act, unless a final court judgment has been rendered or a court-approved settlement agreement has been reached.⁵²

VI. *Conclusion*

At a time when the costs of government are increasingly felt at a local level, neither these governments, nor the taxpayers that support them, should feel threatened by Superfund. Congress never intended the law to financially cripple local government, nor was it constructed to provide convenient scapegoats for corporate polluters.

The H.R. 3026 addresses the concerns of municipalities while not absolving them of responsibility if they have, indeed, substantially contributed to the pollution of a Superfund site. This law does what no administrative measure can do. It corrects a serious oversight in the Superfund law while protecting the powerful principle that the "polluter pays."

102D CONGRESS
1ST SESSION

H. R. 3026

To amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to protect citizens, municipalities, and other generators and transporters of municipal solid waste and sewage sludge from lawsuits equating these substances with industrial hazardous wastes.

IN THE HOUSE OF REPRESENTATIVES

JULY 24, 1991

Mr. TORRICELLI (for himself, Mr. DREIER of California, Mr. ATKINS, Mr. GALLO, Mr. HUNTER, Mr. MARTINEZ, Mr. MOORHEAD, Mr. SHAYS, Mr. SKAGGS, Mr. TORRES, and Mr. WELDON) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to protect citizens, municipalities, and other generators and transporters of municipal solid waste and sewage sludge from lawsuits equating these substances with industrial hazardous wastes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the "Toxic Cleanup Equity
5 and Acceleration Act of 1991".

1 **SEC. 2. FINDINGS.**

2 Consistent with the policies under the Comprehensive
3 Environmental Response, Compensation, and Liability Act
4 of 1980 (Superfund) (42 U.S.C. 9601 et seq.), the Con-
5 gress finds that—

6 (1) there is a need for a reaffirmation of the
7 policies that are the basis for Superfund, the Na-
8 tion's toxic waste cleanup program, including the
9 principle that the polluter should pay for cleanup;

10 (2) the Congress did not intend to hold municipi-
11 palities or individual citizens strictly, jointly and sev-
12 erally liable under Superfund for the generation or
13 transportation of municipal solid waste and sewage
14 sludge;

15 (3) studies demonstrate that the proportion of
16 hazardous substances found in municipal solid waste
17 from households generally averages less than 0.5
18 percent;

19 (4) cities that have received awards from the
20 Environmental Protection Agency for the beneficial
21 reuse of sewage sludge have been sued under
22 Superfund because such sewage sludge was present
23 at Superfund sites;

24 (5) third-party contribution suits based on the
25 generation or transportation of municipal solid waste

3

1 and sewage sludge distort the intent of Superfund
2 and delay cleanup; and

3 (6) it is imperative that spurious litigation be
4 eliminated so that the cleanup program is not de-
5 layed and precious resources are not diverted from
6 remedial actions.

7 **SEC. 3. ADDITIONAL DEFINITIONS.**

8 Section 101 of the Comprehensive Environmental Re-
9 sponse, Compensation, and Liability Act of 1980 is
10 amended by adding the following new paragraphs at the
11 end thereof:

12 “(39) The term ‘municipal solid waste’ means
13 all waste materials generated by households, includ-
14 ing single and multiple residences, hotels and motels,
15 and office buildings. The term also includes trash
16 generated by commercial, institutional, and industri-
17 al sources when the general composition and toxicity
18 of such materials are similar to waste normally gen-
19 erated by households, or when such waste materials,
20 regardless of when generated, would be considered
21 conditionally exempt generator waste under section
22 3001(d) of the Solid Waste Disposal Act because it
23 was generated in a total quantity of 100 kilograms
24 or less during a calendar month. The term ‘muni-
25 cipal solid waste’ includes all constituent components

4

1 of municipal solid waste, including constituent com-
2 ponents that may be deemed hazardous substances
3 under this Act when they exist apart from municipal
4 solid waste. Examples of municipal solid waste in-
5 clude food and yard waste, paper, clothing, appli-
6 ances, consumer product packaging, disposable dia-
7 pers, office supplies, cosmetics, glass and metal food
8 containers, and household hazardous waste (such as
9 painting, cleaning, gardening, and automotive sup-
10 plies). The term 'municipal solid waste' does not in-
11 clude combustion ash generated by resource recovery
12 facilities or municipal incinerators.

13 “(40) The term 'sewage sludge' refers to any
14 solid, semisolid, or liquid residue removed during the
15 treatment of municipal waste water, domestic sew-
16 age, or other waste waters at or by a publicly owned
17 treatment works subject to the limitations of section
18 113(m).

19 “(41) The term 'municipality' means any politi-
20 cal subdivision of a State and may include cities,
21 counties, towns, townships, boroughs, parishes,
22 school districts, sanitation districts, water districts,
23 and other local governmental entities. The term also
24 includes any natural person acting in his official ca-

1 pacity as an official, employee, or agent of a municipi-
2 pality.”.

3 **SEC. 4. THIRD-PARTY SUITS FOR MUNICIPAL SOLID WASTE**
4 **OR SEWAGE SLUDGE.**

5 Section 113 of the Comprehensive Environmental Re-
6 sponse, Compensation, and Liability Act of 1980 is
7 amended by adding the following new subsections at the
8 end thereof:

9 “(l) CONTRIBUTION ACTIONS FOR MUNICIPAL SOLID
10 WASTE AND SEWAGE SLUDGE.—No municipality or other
11 person shall be liable to any person other than the United
12 States for claims of contribution under this section or for
13 other response costs or damages under this Act for acts
14 or omissions related to the generation, transportation, or
15 arrangement for the transportation, treatment, or disposal
16 of municipal solid waste or sewage sludge unless such acts
17 or omissions provide a basis for liability under sections
18 107(a)(1) or 107(a)(2) of this Act.

19 “(m) ACTIONS BY THE PRESIDENT FOR MUNICIPAL
20 SOLID WASTE AND SEWAGE SLUDGE.—In the absence of
21 truly exceptional circumstances, the President shall not
22 initiate or maintain an action against any municipality or
23 other person under this Act for acts or omissions related
24 to the generation, transportation, or arrangement for the
25 transportation, treatment, or disposal of municipal solid

6

1 waste or sewage sludge unless such acts or omissions pro-
2 vide a basis for liability under sections 107(a)(1) or
3 107(a)(2) of this Act. For the purpose of this subsection,
4 truly exceptional circumstances shall exist only—

5 “(1) where the President obtains reliable, site-
6 specific evidence that—

7 “(A) the release or threatened release of
8 hazardous substances on which liability is based
9 are not those ordinarily found in municipal
10 solid waste or sewage sludge; and

11 “(B) the hazardous substances were de-
12 rived from a commercial, institutional, or indus-
13 trial process or activity; or

14 “(2)(A) the total contribution to the site of
15 commercial, institutional, and industrial hazardous
16 substances is insignificant in terms of both volume
17 and toxicity when compared to the volume and toxic-
18 ity of the municipal solid waste and sewage sludge,
19 or

20 “(B) absent the total contribution to the facility
21 of commercial, institutional, and industrial hazard-
22 ous substances, the contribution of hazardous sub-
23 stances from municipal solid waste and sewage
24 sludge would be a significant cause of the release or

1 threatened release of hazardous substances that re-
2 sults or will result in the response action.

3 When the release or threatened release involves trash from
4 commercial, institutional, or industrial sources, the Presi-
5 dent may require that persons who generated, transported,
6 or arranged for the transportation, treatment, or disposal
7 of such materials provide reliable, site-specific evidence
8 that the general composition and toxicity of the trash are
9 similar to those of waste normally generated by house-
10 holds. When municipal solid waste or sewage sludge has
11 been combined or mixed with hazardous substances at a
12 waste transfer station, such combination or mixing shall
13 not constitute truly exceptional circumstances under this
14 subsection warranting action against the municipality or
15 other person that generated, transported, or arranged for
16 the transportation, treatment, or disposal of such municipi-
17 pal solid waste or sewage sludge, unless the municipality
18 or other person also owned or operated the waste transfer
19 station. When sewage sludge has been approved by the
20 President for beneficial reuse or other equivalent use, or
21 would have qualified for beneficial reuse or other equiva-
22 lent use at the time of disposal, the release or threatened
23 release of such sewage sludge shall not constitute truly
24 exceptional circumstances under this subsection.

8

1 “(n) PUBLIC RIGHT-OF-WAY.—In no event shall a
2 municipality incur liability under this Act for the act of
3 owning or maintaining a public right-of-way over which
4 hazardous substances are transported.

5 For the purposes of this subsection, ‘public right-of-way’
6 shall include roads, streets, or other public transportation
7 routes, and pipelines used as a conduit for sewage or other
8 liquid or semiliquid discharges.”.

9 **SEC. 5. SETTLEMENTS.**

10 Section 122 of the Comprehensive Environmental Re-
11 sponse, Compensation, and Liability Act of 1980 is
12 amended by adding the following new subsection at the
13 end thereof:

14 “(n) SETTLEMENTS FOR MUNICIPAL GENERATORS
15 AND TRANSPORTERS OF MUNICIPAL SOLID WASTE OR
16 SEWAGE SLUDGE.—

17 “(1) APPLICABLE ACTIONS.—This subsection
18 applies whenever an administrative or judicial action
19 is brought, or notice is given by any person that an
20 action may be brought, against a municipality under
21 this Act for acts or omissions related to the genera-
22 tion, transportation, or arrangement for the trans-
23 portation, treatment, or disposal of municipal solid
24 waste or sewage sludge unless such acts or omissions

9

1 provide a basis for liability under section 107(a)(1)
2 or 107(a)(2) of this Act.

3 “(2) TIMING OF SETTLEMENTS.—For applica-
4 ble actions under this subsection, a municipality may
5 request that the President enter into a settlement
6 under this section. The request may seek to settle a
7 municipality’s potential liability for all or part of the
8 response costs or damages to natural resources. Not-
9 withstanding any other deadlines under this Act, the
10 President shall make every effort to reach a final
11 settlement with the municipality within 120 days
12 after receiving such request.

13 “(3) FAILURE TO REACH SETTLEMENT; MORA-
14 TORIUM.—If the President does not reach a settle-
15 ment with the municipality within the 120-day peri-
16 od defined in paragraph (2) of this subsection, the
17 period shall be extended for negotiations to continue
18 until a settlement is reached, or until the President
19 has published in the Federal Register an explanation
20 of why a settlement cannot be reached. During the
21 moratorium which commences when a municipality
22 requests a settlement under this subsection and ter-
23 minates when a settlement has been reached or when
24 the President has published notice explaining why a
25 settlement cannot be reached, no administrative or

10

1 judicial action may be commenced or pursued
2 against the municipality in any applicable action as
3 defined by this subsection. Permissible reasons for
4 failing to reach a settlement under this subsection
5 shall be limited to one or more of the following:

6 “(A) The settlement offer from the municipi-
7 pality does not meet the cost allocation criteria
8 specified in this subsection.

9 “(B) The municipality refuses to agree to
10 settlement terms routinely required in consent
11 decrees under subsection (g) of this section.

12 “(C) Insufficient information exists to per-
13 mit a cost allocation.

14 If the President invokes subparagraph (C) as the
15 reason why a settlement cannot be reached, the mor-
16 atorium on initiating or pursuing action in applica-
17 ble actions under this subsection shall be extended
18 until sufficient information is acquired. The comple-
19 tion of a remedial investigation/feasibility study for
20 the portion of the response action or the completion
21 of an assessment of damages that is the subject of
22 the municipality’s request for settlement shall be
23 deemed to provide sufficient information to reach a
24 settlement for such portion or damages under this
25 subsection. If the President has completed a settle-

11

1 ment with a party other than the municipality re-
2 questing a settlement, such settlement creates a re-
3 buttable presumption that the President cannot in-
4 voke subparagraph (C) as a reason for failing to
5 reach a settlement with the municipality concerning
6 matters addressed in the other party's settlement,
7 unless the other settlement was reached pursuant to
8 subsection (g) of this section.

9 “(4) EXPEDITED FINAL SETTLEMENT.—Settle-
10 ments under this subsection shall—

11 “(A) require the municipality to pay for
12 costs based on the quantity of hazardous con-
13 stituents within municipal solid waste and sew-
14 age sludge, not the overall quantity of municipi-
15 pal solid waste and sewage sludge, but municipi-
16 pal solid waste and sewage sludge shall not be
17 deemed to contain more than one-half of one
18 percent (0.5%) constituent hazardous sub-
19 stances unless the President obtains reliable
20 site-specific evidence to the contrary during the
21 moratorium period defined above in paragraph
22 (3);

23 “(B) limit a municipality's payments if
24 such payments would force a municipality to

12

1 dissolve, to declare bankruptcy, or to default on
2 its debt obligations; and

3 “(C) be reached even in the event that a
4 municipality may be liable for response costs or
5 damages in actions other than applicable ac-
6 tions under this subsection, although the Presi-
7 dent may elect to exclude liability, costs, or
8 damages not covered by this subsection from
9 settlements under this subsection.

10 “(5) COVENANT NOT TO SUE.—The President
11 shall provide a covenant not to sue with respect to
12 the facility concerned to any municipality which has
13 entered into a settlement under this subsection un-
14 less such a covenant would be inconsistent with the
15 public interest as determined under subsection (f) of
16 this section.

17 “(6) CONSENT DECREE OR ADMINISTRATIVE
18 ORDER.—A settlement under this subsection shall be
19 entered as a consent decree or embodied in an ad-
20 ministrative order as described in subsection (g)(4)
21 of this section.

22 “(7) EFFECT OF AGREEMENT.—A municipality
23 that has resolved its liability to the United States
24 under this subsection shall not be liable for claims
25 of contribution or for other response costs or dam-

1 ages under this Act regarding matters addressed in
2 the settlement. Such settlement does not discharge
3 any of the other potentially responsible parties un-
4 less its terms so provide, but it reduces the potential
5 liability of the others by the amount of the settle-
6 ment.

7 “(8) SETTLEMENT PROVISIONS.—When reach-
8 ing settlements under this subsection, the
9 President—

10 “(A) shall not reserve any rights to seek
11 further relief from a settling municipality which
12 the President does not routinely reserve in
13 other settlements under subsection (g);

14 “(B) shall not seek to have a municipality
15 provide indemnification to the United States;

16 “(C) shall not require a municipality to act
17 or fail to act in contravention of legal require-
18 ments that are of general applicability and were
19 adopted by formal means concerning the as-
20 sumption and maintenance of municipal fiscal
21 obligations; and

22 “(D) shall encourage municipalities to
23 enter into settlements that allow them to con-
24 tribute services in lieu of money, to make de-
25 layed payments, or to make payments over

14

1 time, through an annuity or other financing de-
2 vice.

3 “(9) JUDICIAL REVIEW.—Review of the Presi-
4 dent’s action in denying a municipality’s request for
5 settlement under this subsection may be had by any
6 interested municipality in the United States district
7 courts in accordance with section 113(b) of this Act.
8 Any such application for review shall be made within
9 90 days from the date the President publishes an ex-
10 planation of why a settlement cannot be reached.”.

11 **SEC. 6. PRELIMINARY ALLOCATION OF RESPONSIBILITY.**

12 (a) MUNICIPAL SOLID WASTE AND SEWAGE
13 SLUDGE.—Section 122(e)(3)(A) of the Comprehensive
14 Environmental Response, Compensation, and Liability Act
15 of 1980 is amended by inserting the following sentence
16 between the second and third sentences: “Under these
17 guidelines, the volume of municipal solid waste and sewage
18 sludge shall refer to the quantity of hazardous constitu-
19 ents within municipal solid waste and sewage sludge, not
20 the overall quantity of municipal solid waste and sewage
21 sludge.”.

22 (b) REQUEST BY MUNICIPALITIES.—Section
23 122(e)(3) of the Comprehensive Environmental Response,
24 Compensation, and Liability Act of 1980 is amended by
25 adding the following new subparagraph at the end thereof:

1 “(F) REQUEST BY MUNICIPALITIES.—If a
2 municipality requests the President to prepare
3 a nonbinding preliminary allocation of responsi-
4 bility, the President shall provide such an allo-
5 cation unless he provides a written explanation
6 of why such an allocation would be contrary to
7 the public interest.”.

8 **SEC. 7. RETROACTIVITY.**

9 The amendments made by this Act shall apply to
10 each municipality and other person against whom admin-
11 istrative or judicial action has been commenced before the
12 effective date of this Act, unless a final court judgment
13 has been rendered against such municipality or other per-
14 son or final court approval of a settlement agreement in-
15 cluding such municipality or other person as a party has
16 been granted. If a final court judgment has been rendered
17 or court-approved settlement agreement has been reached
18 that does not resolve all contested issues, such amend-
19 ments shall apply to all contested issues not expressly re-
20 solved by such court judgment or settlement agreement.
