Teamwork! A Metric to Adjust Individual Scores on a Team Project Emily Faulconer

- 1. Collect graded self- and team assessments. (Fillable form with team evaluation rubric – covers mostly collaborative learning skills, but also learning outcome mastery)
- 2. Input individual team member rubric values into spreadsheet.
- 3. Adjust individual grades accordingly, with feedback. Score modifier = Individual Average / Team Average

	Average	Score	Initial	Adjusted
	Average	Modifier	Grade	Grade
Student A	20.80	1.0410	83	86.41
Student B	20.80	1.0410	83	86.41
Student C	20.80	1.0410	83	86.41
Student D	20.80	1.0410	83	86.41
Student E	16.70	0.8358	83 🤇	69.37
Team Average	19.98			

What The Literature Says: Use of Teamwork

- Teamwork skills improve over time when taught & assessed
- Student Concerns:
 - "free-riders" / "social loafers"
 - team conflict

What students fear is not usually the hurdle

- change in project/plan
- managing other course deadlines
- role allocation / leadership
- Most students report a positive experience
- Peer assessment improves cooperation, engagement in the course, and experiences

The Metric

Anecdotal Observations:

- Rating consistency across team
- Tend to rate themselves lower

Student grades "bumped" because they picked up the slack

Student grade reduced because of team evaluation

Math, Science, & Technology Department Embry-Riddle Aeronautical University

- Formative and Summative
- Varied student attitudes
- Fair
 - Individualized
 - Accurate
