Peer-Led Team Learning (PLTL) Strategies

An NSF Project with the COA

Dr. Monica Surrency
Dr. Kimberly Luthi
Dr. John Keith Wilson
Dr. David Harvie

PLTL Overview

Peer-Leader Training Course

- Train Peer-Leaders on difference between mentor/tutor and Peer Leader
- Focuses on leadership skills
- Provides technology resources tutorial
- Provided suggested teaching and learning strategies for PLTL activities

Overview of Teaching Strategies

Think-Pair-Share

3-Step Interview

Round-Robin Brainstorming

Gallery Walk

**Muddiest Point/
Minute paper**

**Categorizing
Grid/Memory
Matrix**

Think-**Pair**-Share

Think–Pair–Share

Overview

- Prompt students w/challenge or question
- Provide time to reflect and think
- Pair classmates to discuss w/partner
- Reconvene as group and share

Suggested Tools

- Group Discussions in Canvas
- Various collaboration tools
 - ❖ Teams, text, chat tools, etc.
- Canvas Studio

Other Ideas?

3-Step Interview

3-Step Interview

Overview

- Faculty creates list of interview questions relating to course topic
- Organize students into pairs
- Students interview each other
- Students reconvene with all classmates
- Students Present what they learned from each other

Suggested Tools

- Announcement
- Class/Group Discussions in Canvas
- Various collaboration tools
 - ❖ Teams, text, chat tools, etc.
- Canvas Studio

Other Ideas?

Round-Robin Brainstorming

Round-Robin Brainstorming

Overview

- Structured brainstorming activity with equal contribution
- Each student posts their idea or solution to the prompt, then 'passes' to the next student to add their additional ideas
 - Instead of a physical table, utilize whiteboard tools to organize the brainstorming notes
- Reconvene and discuss collective ideas to create final concept/solution as a whole.

Suggested Tools

- Padlet or whiteboard tool
 - ❖ Suggest using columns to organize each contribution.
 - ❖ **Sample:**
 - ❖ [Example Round-Robin set up using Padlet](#)
 - ❖ [The Round Robin brainstorming technique & template \(Concept board\)](#)
 - ❖ [Round Robin template \(Mural\)](#)
- Table in a document or spreadsheet
- Group Discussion in Canvas
- Canvas Studio

Round-Robin Brainstorming Sample Timeline

Sample Asynchronous Timeline

Day	Activity
Day 1	Peer Leader <ul style="list-style-type: none">- Set up groups.- Post the initial discussion with instructions, group member assignments, links, and challenge problem.
Day 2	Students <ul style="list-style-type: none">- Post their initial post in the appropriate assigned column on the virtual board.
Day 3	Students <ul style="list-style-type: none">- Post their second post in the next column on the virtual board.
Day 4	Students <ul style="list-style-type: none">- Post their third post in the next column on the virtual board.
Day 5	Students <ul style="list-style-type: none">- Post to the discussion pros and cons of the ideas (what might work or fail).
Day 6	Students <ul style="list-style-type: none">- Discuss the ideas and narrow down the final collective solution.
Day 7	Students <ul style="list-style-type: none">- Reflect on the activity and any further discussion on the final collective solution.

Other Ideas?

Gallery Walk

Gallery Walk

Overview

- Similar to a conference poster session or museum gallery
 - ❖ Students examine challenges
 - ❖ Collaborate to answer prompts at each exhibit
 - ❖ Post solution for next group to build upon
- Groups rotate from one exhibit in the gallery to the next and build upon prior contributions
- Reconvene to discuss ideas and responses

Suggested Tools

- Padlet or whiteboard tool
- Group Discussion in Canvas
- Canvas Studio

Gallery Walk

Sample Asynchronous Timeline

Day	Activity
Day 1	Instructor <ul style="list-style-type: none">- Set up groups.- Post the initial discussion with instructions, group member assignments, and link(s) to the prompts in the virtual gallery.
Day 2	Student Groups <ul style="list-style-type: none">- Designate a group member to be the leader (the one responsible for posting in the gallery area).- Collaborate in their dedicated group discussion (if they wish to use other communication tools, that is fine) to think about and come up with their response to the first prompt.
Day 3	Student Groups <ul style="list-style-type: none">- Once the group comes to a consensus, the leader will post the response in the first appropriate gallery area prompt on behalf of the group. Be sure they include the names of contributing group members.- Collaborate in their dedicated group discussion (if they wish to use other communication tools, that is fine) to think about and come up with their response to the second prompt.
Day 4	Student Groups <ul style="list-style-type: none">- Once the group comes to a consensus, the leader will post the response in the second appropriate gallery area prompt on behalf of the group. Be sure they include the names of contributing group members.- Collaborate in their dedicated group discussion (if they wish to use other communication tools, that is fine) to think about and come up with their response to the third prompt.
Day 5	Students Groups <ul style="list-style-type: none">- Once the group comes to a consensus, the leader will post the response in the third appropriate gallery area prompt on behalf of the group. Be sure they include the names of contributing group members.
Day 6	Students (all) <ul style="list-style-type: none">- Revisit the gallery area prompts and discuss the different responses and additional thoughts with each other.
Day 7	Students (all) <ul style="list-style-type: none">- Reflect on the activity and post any further discussion thoughts.

Other Ideas?

Muddiest Point/ Minute Paper

Muddiest Point/Minute Paper

Overview

- Prompt students to reflect on challenges (aka 'muddiest point') or reflect on their learning and areas of improvement.
- Reflection posted in private (paper) or shared with classmates (discussion).
- Challenges identified and addressed to individuals or group of students

Suggested Tools

- Group/class discussions in Canvas
- Canvas Studio (for video recording)

Other Ideas?

Categorizing Grid/ Memory Matrix

Categorizing Grid/ Memory Matrix

Overview

- Both activities use a table or grid for students to fill in the information
- Categorizing Grid:
 - ❖ Provide students with categories and items (terms, images, equations, etc.)
 - ❖ Students sort items into appropriate categories and share results
- Memory Matrix
 - ❖ Provide students a matrix with row and column headings
 - ❖ Students fill in blank cells for the rows and columns

Suggested Tools

- Microsoft Word
- Microsoft Excel
- OneDrive (for sharing/collaboration)
- Whiteboard tool
- Canvas Discussion
 - ❖ Enable 'Post First' feature

Other Ideas?

Thank you!
