

INTRO/ABSTRACT

Do you know KSU is a mobile quiz app developed in Android Studio by Christian Meliezer, Erick Kamau, and Joshua Meder. The app tests your knowledge on all things KSU related, including notable places, people, and courses associated with the university.

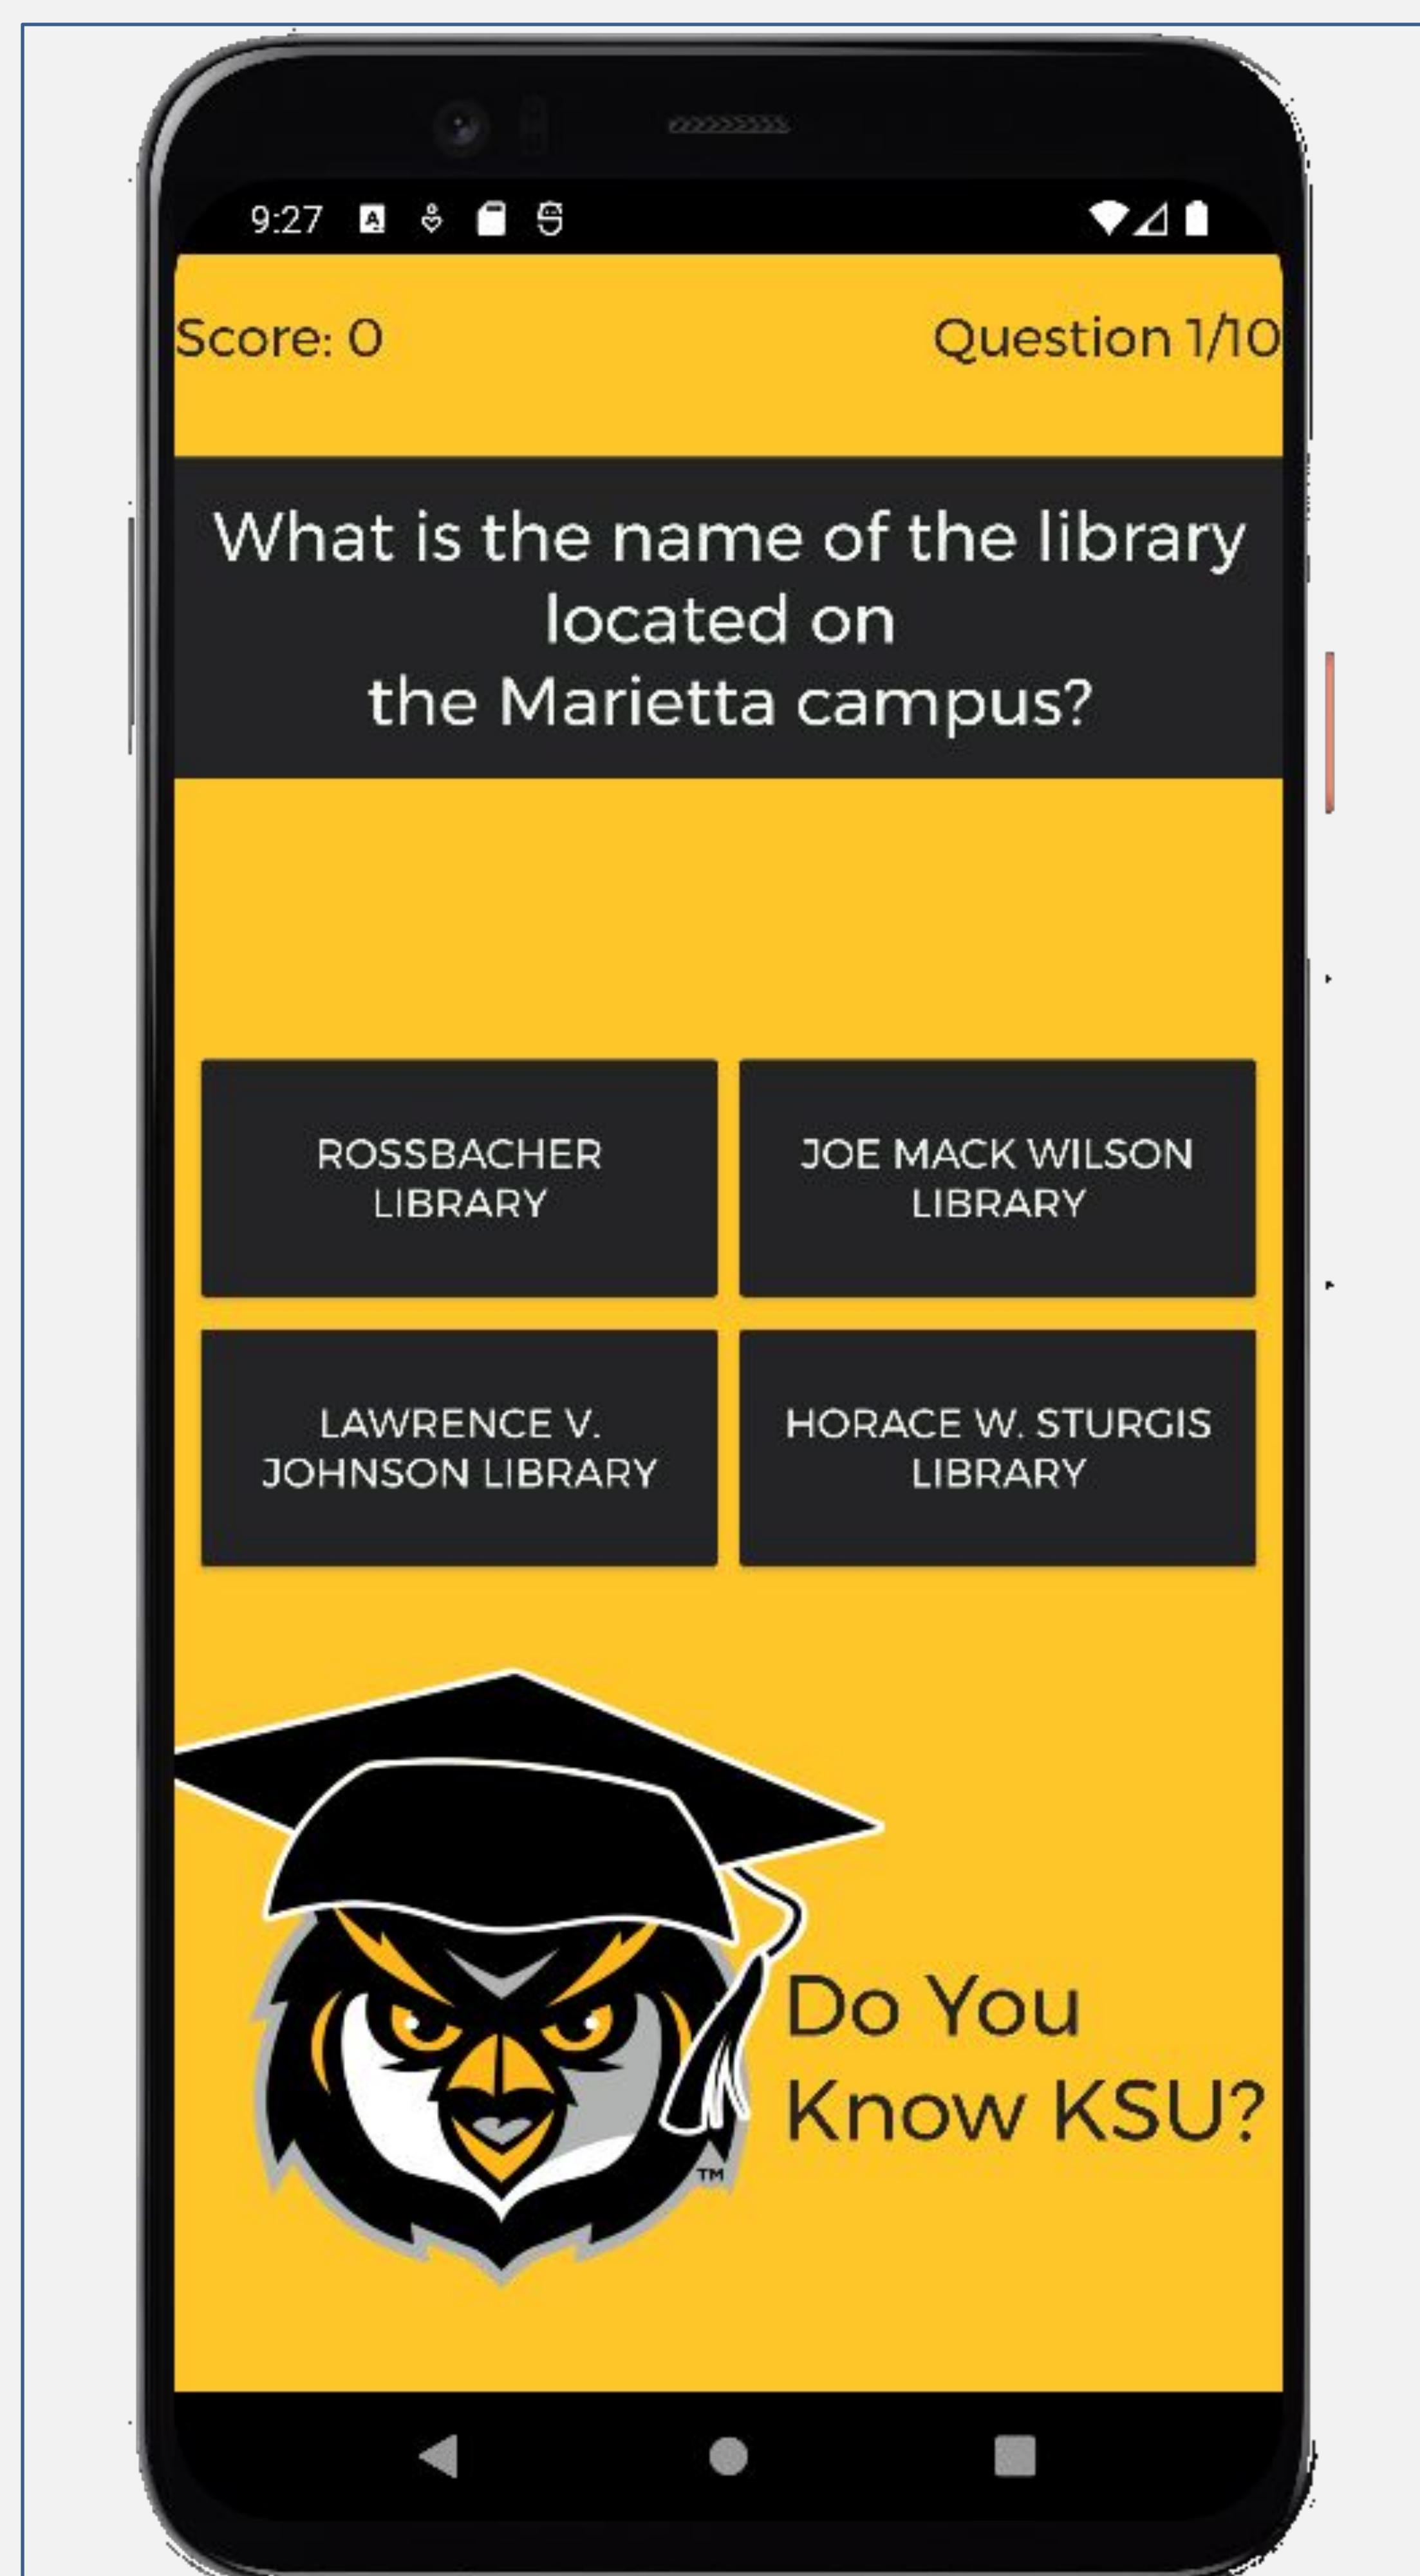

METHODS

Do you know KSU is a full stack application that uses AWS Amplify for API and Database services. Users will answer 10 random questions regarding the university, and be given a score at the end that represents how well they did.

Do you know KSU was coded in Kotlin and stores questions in DynamoDB.

RESULTS

Do you know KSU acts as an engaging medium by which students, faculty, and interested parties alike can learn about KSU's notable courses, people, and history.

“Do you know KSU?” is a KSU themed quiz app. Users answer 10 questions about all things KSU related and receive a score at the end.
