The authors regret that:

1) at the beginning of page 274 the correct first line and Eq. (34) are: obtaining, thanks to the use of Eq. (31) and to the definition $\Delta \Sigma_2 = \Sigma_2^R(p) - \Sigma_2^L(p)$,

$$Z_m = Z_\psi \left(1 + \frac{g_0^2}{16\pi^2} C_F \Delta \Sigma_2 \right). \tag{34}$$

2) at page 278 the correct first equation (48) is

$$Z_m = 1 - \frac{g_0^2}{16\pi^2} C_F \left(\Delta \Sigma_1 - \Delta \Sigma_2 \right).$$

The authors would like to apologise for any inconvenience caused.
