Corrigendum

Corrigendum to "A fatal case of COVID-19 due to metabolic acidosis following dysregulate inflammatory response (cytokine storm)" [ID Cases 21 (2020) e00829]

Shabnam Chettri^a, Faryal Khamis^{a,*}, Nenad Pandak^a, Huda Al Khalili^b, Elias Said^c, Eskild Petersen^d

^a Department of Infectious Diseases, Royal Hospital, Muscat, Oman

^b Department of Anaesthesia, Royal Hospital, Muscat, Oman

^c Department of Microbiology, Sultan Qaboos University, Muscat, Oman

^d Directorate General of Disease Surveillance and Control, Ministry of Health, Muscat, Oman

The authors regret the unintentional error made in the above-mentioned case report; in Case report paragraph 4 line 6 and 7: "suggestive of metabolic acidosis with increased anion gap of 53 mEq/L normal range 8-16mEq/L" has been changed to "suggestive of metabolic acidosis with normal anion gap of 9mEq/L (normal range 8-16mEq/L").

The authors would like to apologise for any inconvenience caused.
