

Updates on the INFN Open Access Repository

R. Barbera, S. Bianco, M. Fargetta, M. Maggi, D. Menasce,
L. Patrizii, *R. Rotondo*

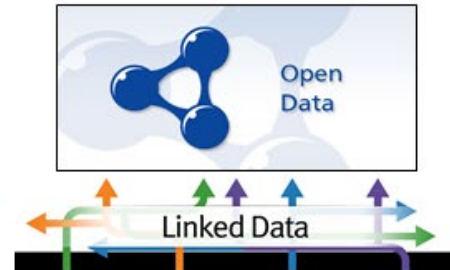

Workshop CCR, 5 giugno 2019

Outline

- ▶ INFN signs Plan S
- ▶ What's Plan S and why it's important
- ▶ How OAR fits Plan S
- ▶ OAR Evolution
- ▶ CDR, validation, future activities

Open... to be “FAIR”

OPEN  **ACCESS**

INFN towards Plan S adoption

Plan S

Plan S is an initiative for Open Access publishing that was launched in September 2018. The plan is supported by cOAlition S, an international consortium of research funders. Plan S requires that, from 2021, scientific publications that result from research funded by public grants must be published in compliant Open Access journals or platforms.

Source: <https://www.coalition-s.org/>

Principles overview

- ▶ Funders will not support publishing on journal with double-dipping plan
- ▶ Commit to create new compliant journal if not available
- ▶ Direct publishing on Open Access Archive with no embargo
- ▶ Authors keep copyright
- ▶ Article Processing Costs (APC) must be commensurate to service delivery
- ▶ Detailed list of 10 principles available at:
<https://www.coalition-s.org/principles-and-implementation/>

Plan S Three way implementations

- ▶ **Gold OA:** authors publish on Open Access journals or Open Access platforms with CC By Licence
 - ▶ Publisher Plan S compliant
- ▶ **Green OA: Authors Accepted Manuscript (AAM) or Version of Record available with CC BY license on a repository Plan S compliant**
- ▶ **Temporary hybrid:** authors publish with CC BY license on closed journal supporting transaction agreement
 - ▶ Journal agrees to migrate to Open Access according to a specific timeline

The Knowledge Workflow

Requirements for an INFN Open Access Repository

- ▶ Compliant with Plan S
- ▶ Support widely adopted protocols
- ▶ Store all kinds of digital assets
- ▶ Automatically harvest and store INFN-authored documents from other repositories
- ▶ Support the management during the periodic national research assessments (VQR)
- ▶ Increase the visibility of both INFN research and researchers
- ▶ Compliant with EOSC guidelines

Digital Asset Management Systems

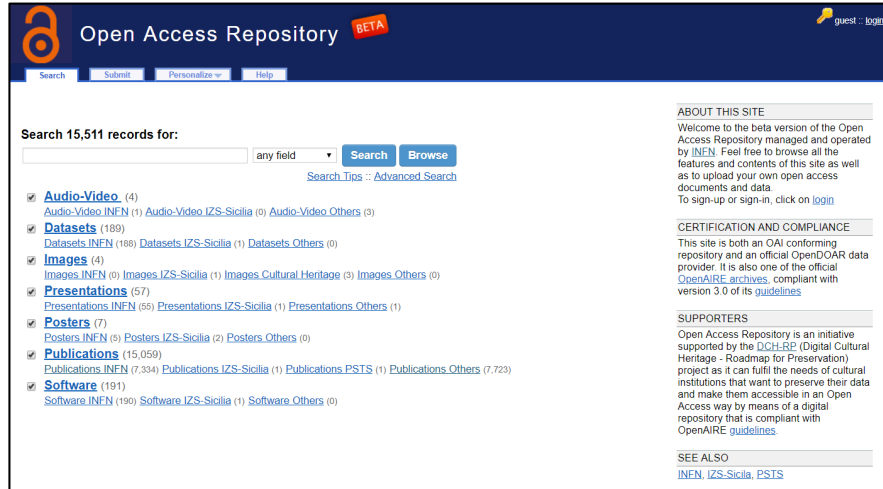

Source: OpenDOAR

Why Invenio?

- ▶ Open source
- ▶ Deployable on a local infrastructure (i.e., not a hosted service)
- ▶ Compliant with main standards, such as DCMI, Marc21 and OAI-PMH
- ▶ Large community
 - ▶ Co-developed by a large international collaboration comprising institutes such as CERN, DESY, EPFL, FNAL, SLAC and used as institutional DAMS by tens of scientific institutions worldwide
- ▶ Active development
- ▶ Scalability
 - ▶ the CERN Document Server operates and manages since 2002 more than 0.6 million records in high-energy physics, covering articles, books, journals, photos, videos, and more
 - ▶ Zenodo currently hosts about 1 million records belonging to various disciplines

The (pilot of the) INFN Open Access Repository

The screenshot shows the Open Access Repository website. At the top, there is a navigation bar with a search bar, a 'Submit' button, and a 'Personalize' dropdown menu. Below the navigation bar, there is a search results section for '15,511 records for:'. The search results are categorized by type: Audio-Video (4), Datasets (189), Images (4), Presentations (57), Posters (7), Publications (15,059), and Software (191). Each category has a sub-link for 'INFN' and 'Others'. On the right side, there is an 'ABOUT THIS SITE' section with a welcome message and a 'CERTIFICATION AND COMPLIANCE' section mentioning OpenDOAR and OpenAIRE. There is also a 'SUPPORTERS' section and a 'SEE ALSO' section with links to INFN, IZS-Sicilia, and PSTS.

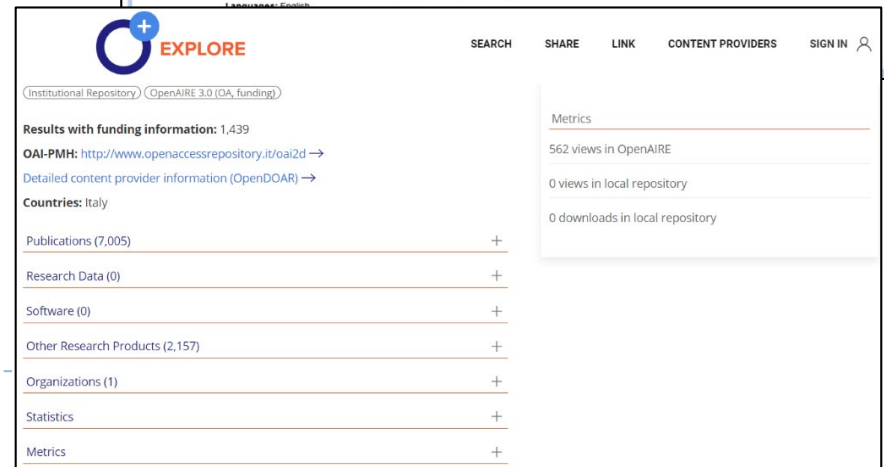

- ▶ Developed at Catania since 2014
- ▶ Intended to be a single entry point for the deposit of research outputs and other digital assets
- ▶ Uses standard to exchange metadata with other oar

The screenshot shows the 'Registration Record' page. It features a table with the following data:

element name	element value
Base URL	http://www.openaccessrepository.it/oai2d
Repository Name	Open Access Repository
Protocol Version	2.0
Email	librarian@openaccessrepository.it
Registration Date	2014-05-06T10:47:29Z
Date Last Validated	Tue May 6 10:47:29 2014
OAI Repository ID	www.openaccessrepository.it

Below the table, there is a message: 'If you are the maintainer of this repository, you may update the information recorded to match new information exposed via the Identify response by running the validation/registration script.' There is also a link to the 'OpenDOAR' directory and a 'Search or Browse for Repositories' section.

The screenshot shows the search results page for the Open Access Repository. The search results are for the repository 'Open Access Repository' with the URL 'http://www.openaccessrepository.it/oai2d'. The results show 1,439 results with funding information. The search results are categorized by type: Publications (7,005), Research Data (0), Software (0), Other Research Products (2,157), Organizations (1), Statistics, and Metrics. The metrics section shows 562 views in OpenAIRE, 0 views in local repository, and 0 downloads in local repository.

History

- ▶ Since first OAR version (2014):
- ▶ Invenio 1 has reached its end of life and will not receive any further updates
- ▶ Invenio 2, which was a transitional release never made widely public
- ▶ Zenodo was officially launched
- ▶ Invenio v3.0 was officially released (on June 2018)
- ▶ Zenodo developers have recently released their code on GitHub, including the GUI

Evolution to new OAR

- ▶ Migrate from Invenio 1 to Zenodo (based on Invenio 3)
- ▶ Customise the Zenodo GUI to fit the look and feel of the INFN OAR
- ▶ Integration with INFN-AAI
 - ▶ SAML based authentication
- ▶ Re-engineering of backend architecture into micro-services
 - ▶ Kubernetes
 - ▶ CI/CD
- ▶ First deployed at the end of 2018
- ▶ Open for use since end of March 2019

Improvements

- ▶ Adoption of leading-edge technologies in the domain of digital repositories
- ▶ Include access control for digital assets
 - ▶ open access, embargoed, restricted and closed
- ▶ Exploit Zenodo “communities” to aggregate contents
 - ▶ INFN division, Scientific Committees, projects, initiatives, etc.
- ▶ DOI versioning
- ▶ Open to non-INFN users (thanks to the concept of «Communities»)

The new INFN Open Access Repository

The screenshot displays the INFN Open Access Repository (OAR) website. The header features the INFN OAR logo, a search bar, and navigation links for 'Upload' and 'Communities'. A user profile for 'roberto.barbera@ct.infn.it' is visible in the top right.

INFN Open Access Repository at a glance

- Research. Shared.** – all research outputs from across all domains of INFN research are welcome!
- Findable. Citeable. Discoverable.** – each upload gets a Digital Object Identifier (DOI) to make it easily and uniquely citeable. You can (automatically) link your research outputs to your ORCID profile.
- Communities** – create and curate your own community for a workshop, project, Division, Laboratory, service, journal, etc. into which you can accept or reject uploads.
- Funding** – you can associate an upload to the grant that has funded the work.
- Flexible licensing** – you can choose among several licenses. You can also upload closed or embargoed research outputs.

Log in with your organization

The image shows a login interface for the INFN Open Access Repository (OAR). At the top, the logo features the text "INFN OAR" with "Open Access Repository" below it. The main heading is "Log in". There are three social login options: "Log in with your organization" (with a red triangle icon), "Log in with GitHub" (with a GitHub logo icon), and "Log in with ORCID" (with an ORCID logo icon). Below these is a separator "— OR —". The standard login fields include "Email Address" (with a user icon) and "Password" (with a lock icon). A blue "Log In" button with a right-pointing arrow is at the bottom.

Upload form – Funders

Access right *

- Open Access
- Embargoed Access
- Restricted Access
- Closed Access

Required. (Open access uploads have considerably higher visibility)

License *

Creative Commons Attribution 4.0

Required. Selected license applies to all of your files displayed on the top of the form. If you want to upload some of your files under different licenses, please do so in separate uploads. If you cannot find the license you're looking for, include a relevant LICENSE file in your record and choose one of the *Other* licenses available (*Other (Open)*, *Other (Attribution)*, etc.). The supported licenses in the list are harvested from opendefinition.org and spdx.org. If you think that a license is missing from the list, please contact us.

Funding recommended ▾

The INFN Open Access Repository is integrated into reporting lines for research funded by the European Commission via [OpenAIRE](#). Specify grants which have funded your research, and we will let your funding agency know!

Grants

European Commission (EU)

European Commission (EU)

Optional. OpenAIRE-supported projects only. For other funding agencies, please contact your funding agency.
Note: a human INFN Open Access Repository curator will need to approve the grant.

Continuous delivery

The screenshot shows the Docker Hub interface for the repository `infnct/zenodo`. The page includes a search bar with the text "zenodo", navigation links for "Explore", "Repositories", "Organizations", "Get Help", and a user profile for "netricky". The repository details show it was updated 4 days ago and is a "Container" type. A red arrow points to the "Pulls 1.6K" metric. The "Overview" section describes the image as zenodo software from CERN with Apache 2.4 and Shibboleth SP 3.0.3 installed on CentOS 7. The "Building" section provides a Docker build command: `$ docker build --tag="<org_id>/zenodo" github.com/osct/zenodo-apache-shibboleth-container`. The "Docker Pull Command" section shows `docker pull infnct/zenodo`. The "Owner" section identifies the user as "infnct". The "Source Repository" section links to the GitHub repository: `osct/zenodo-apache-shibboleth-container`.

<https://hub.docker.com/r/infnct/zenodo>

Build process

The whole chain can be integrated in CI/CD system for full automatic test and deployment

Current and future activities

- ▶ **Integration with OpenAIRE**
 - ▶ Automatic harvesting of INFN publications from other repositories
 - ▶ Make available new uploaded assets to OpenAIRE communities
- ▶ **Conceptual Design Report (CDR) under evaluation by INFN Management**
 - ▶ OAR proposed to be the INFN "FAIR" repository

Grazie !
