*“It’s Just Some  
Numbers”:  
Awareness of  
Far-Right Tattoos*

Dr Barry Blackburn & Dr Katja Hallenberg

Canterbury Christ Church University

June 2022

British Society of Criminology Annual Conference

---

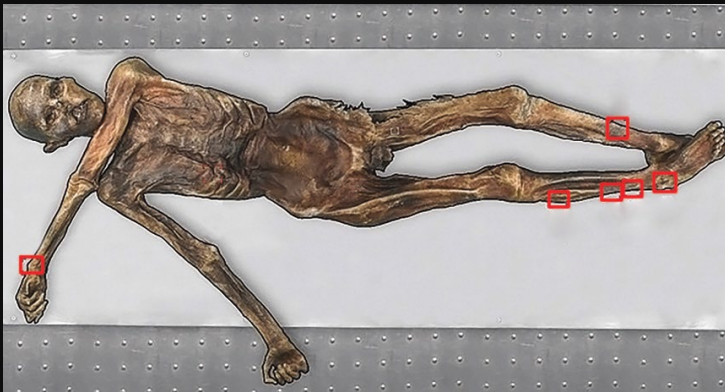

# Overview

---

- Meaning of tattoos
- Far-Right tattoos
- Study design and methodology
- Preliminary results
- Where next

---

# Tattoos

- One of the oldest forms of art
  - Variety of meanings, including group affiliation and exclusion
  - In the UK, 13% (18-24), 30% (25-39) (Statista, 2015), 40% of UK respondents (Dalia Research, 2018) tattooed
  - ~3,000 tattoo shops, 10,000 tattoo artists (Inkably, 2020)
  - Guidance on licencing, legislation, practice and health risks... But little on ethics of tattooing
  - Criminology of Tattoos: Marking of criminals and outcasts (codification, forced, 'voluntary'), sizeable literature on prison tattoos (e.g. McCarron, 2008)
  - Psychology of Tattoos: emotion, self-esteem, self-image, identity, sociocultural environment, extraversion, risk-taking, impulsivity (e.g. Kivanç Altunay et al, 2021)
-

# Tattoos and the Far-Right

- There is a long history of far-right groups signifying membership with tattoos.
- As can be seen in the ADL Hate Symbols Database, these symbols can be quite opaque in meaning.
- This is further clouded by internet groups and 'meme culture' rebranding and repurposing old symbols.
- This led us to question how well people determined the meaning behind a symbol and what meaning they attributed to symbols they did not know.

# Current Examples

- On 20/10/20 Sky History premiered a trailer for their new reality show *The Chop: Britain's Top Woodworker*
- The contestant gave explanations to the producers for his tattoos, but they were unaware of their wider connotations.
- During the Platinum Jubilee parade, viewers noticed the Northern Soul float prominently featured a Nazi Black Sun symbol.
- Later it was explained that the logo was mislabelled in an internet search.

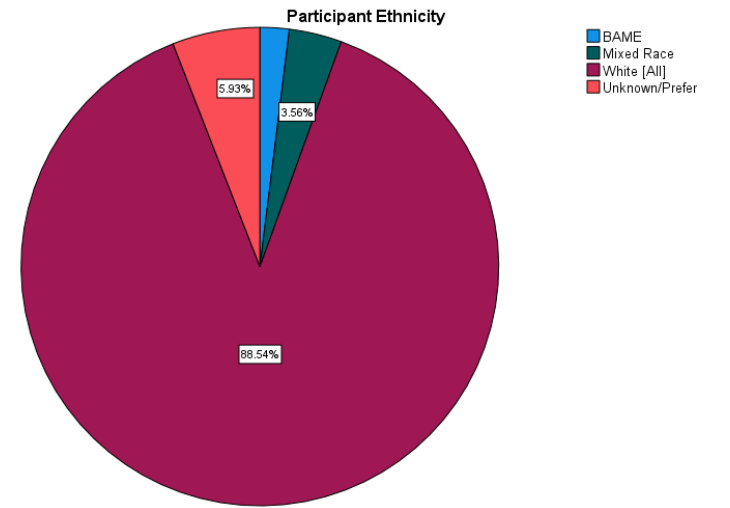

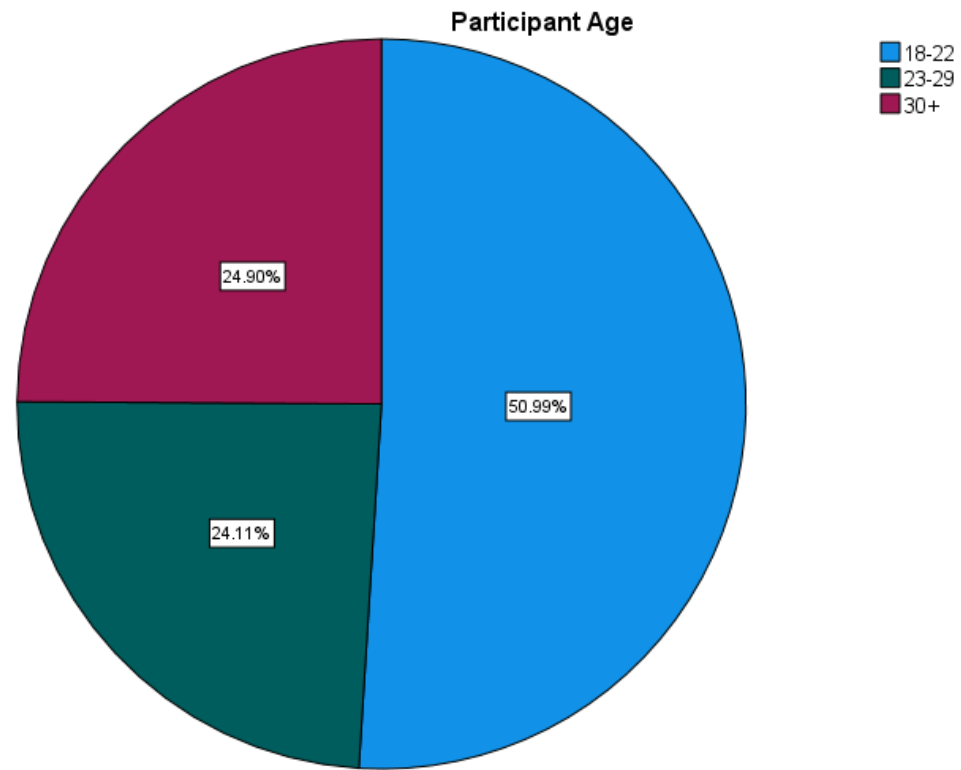

---

# Current Study

---

- Survey:
  - Key demographics, including course of study
  - Own tattoos, meaning and research
  - Recognition/meaning of symbols and appeal: mix of far-right and other
  - 253 participants

Participant Level of Study

Participant Number of Tattoos

Participant Course Interest

Participant Course

14/88

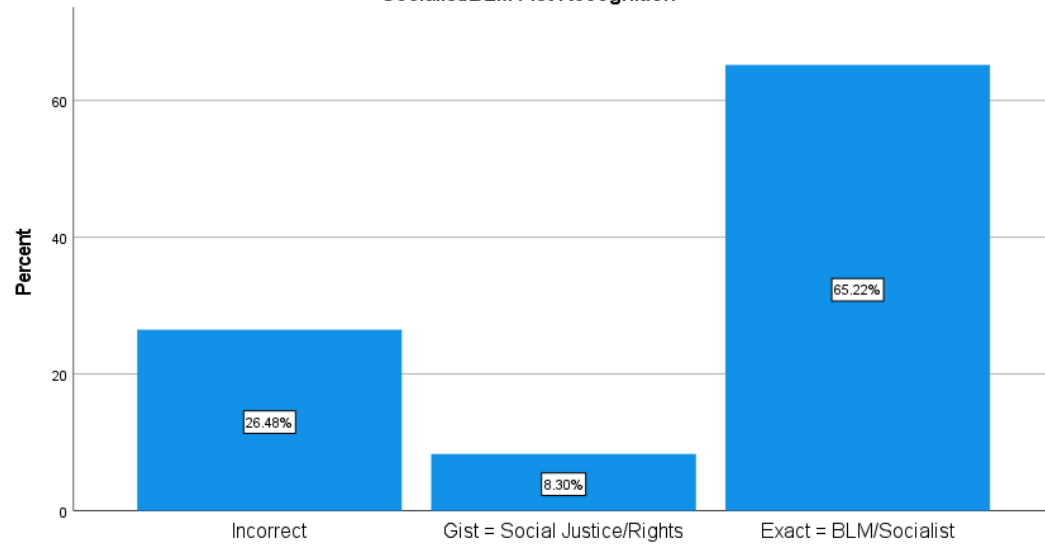

---

# Preliminary Results

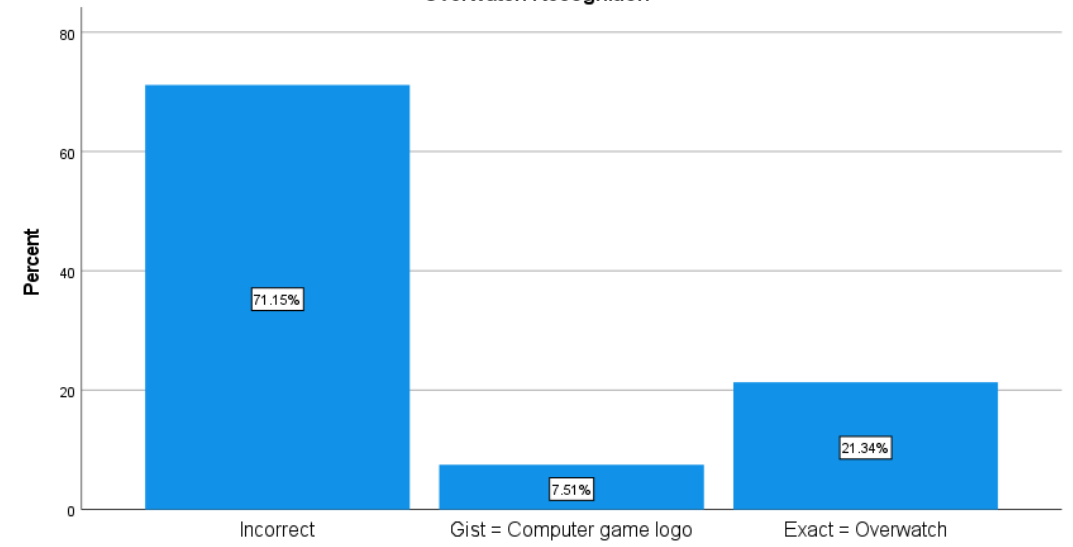

---

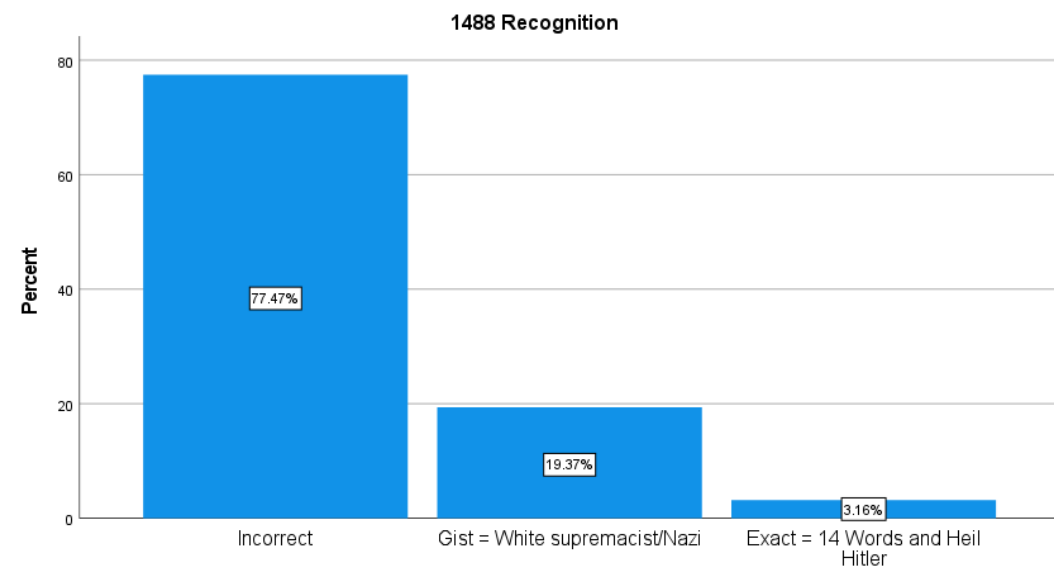

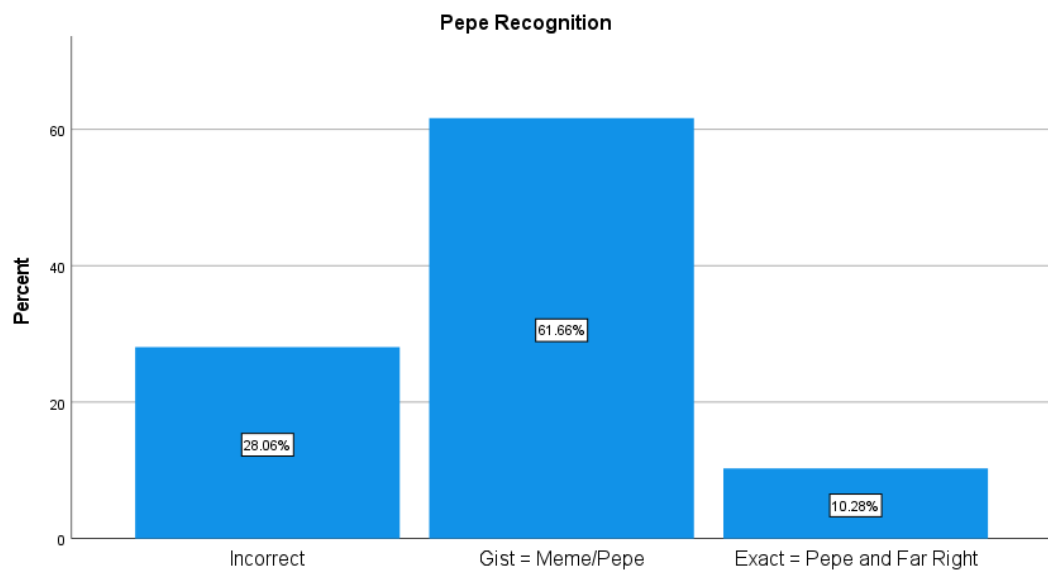

- Data exploration
- Recognition coding: Incorrect/no recognition, gist, verbatim
- Subset of 4 symbols:
  - Overwatch
  - Socialist/BLM fist
  - 14/88
  - Pepe the Frog

**Socialist/BLM Fist Recognition**

**Overwatch Recognition**

### Recognition\_score

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	.00	33	13.0	13.0	13.0
	.25	23	9.1	9.1	22.1
	.50	37	14.6	14.6	36.8
	.75	76	30.0	30.0	66.8
	1.00	36	14.2	14.2	81.0
	1.25	20	7.9	7.9	88.9
	1.50	16	6.3	6.3	95.3
	1.75	10	4.0	4.0	99.2
	2.00	2	.8	.8	100.0
	Total	253	100.0	100.0	

### Report

Recognition_score	Mean	N	Std. Deviation
Course_Coded_Specific			
Crime	.7802	58	.46613
History and Religion	1.0658	19	.49189
Visual Arts	1.0250	10	.50621
No Interest	.6747	166	.44930
Total	.7421	253	.47134

### Group Statistics

	Special_Interest	N	Mean	Std. Deviation	Std. Error Mean
Recognition_score	1	87	.8707	.48803	.05232
	2	166	.6747	.44930	.03487

### Independent Samples Test

		Levene's Test for Equality of Variances		t-test for Equality of Means						
Recognition_score		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
									Lower	Upper
Recognition_score	Equal variances assumed	.624	.430	3.199	251	.002	.19599	.06127	.07532	.31666
	Equal variances not assumed			3.117	162.647	.002	.19599	.06288	.07183	.32015

### Group Statistics

	TattooNumber_Recoded	N	Mean	Std. Deviation	Std. Error Mean
Recognition_score	0	74	.7500	.50849	.05911
	1	179	.7388	.45655	.03412

### Independent Samples Test

		Levene's Test for Equality of Variances		t-test for Equality of Means						
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
									Lower	Upper
Recognition_score	Equal variances assumed	.647	.422	.171	251	.864	.01117	.06527	-.11737	.13971
	Equal variances not assumed			.164	124.112	.870	.01117	.06825	-.12392	.14627

Overwatch - Recognition/appeal				
Count				
		Overwatch		
		Unappealing	Appealing	Total
Recognition	No	94	36	130
	Some/exact	21	33	54
Total		115	69	184

### Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)	Exact Sig. (2-sided)	Exact Sig. (1-sided)
Pearson Chi-Square	18.180 <sup>a</sup>	1	.000		
Continuity Correction <sup>b</sup>	16.782	1	.000		
Likelihood Ratio	17.878	1	.000		
Fisher's Exact Test				.000	.000
Linear-by-Linear Association	18.081	1	.000		
N of Valid Cases	184				

a. 0 cells (0.0%) have expected count less than 5. The minimum expected count is 20.25.

b. Computed only for a 2x2 table

Socialist/BLM Fist - Recognition/appeal				
Count				
		Fist		
		Unappealing	Appealing	Total
Recognition	No	28	16	44
	Some/exact	19	133	152
Total		47	149	196

### Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)	Exact Sig. (2-sided)	Exact Sig. (1-sided)
Pearson Chi-Square	48.947 <sup>a</sup>	1	.000		
Continuity Correction <sup>b</sup>	46.182	1	.000		
Likelihood Ratio	43.711	1	.000		
Fisher's Exact Test				.000	.000
Linear-by-Linear Association	48.697	1	.000		
N of Valid Cases	196				

a. 0 cells (0.0%) have expected count less than 5. The minimum expected count is 10.55.

b. Computed only for a 2x2 table

14/88 - Recognition/appeal				
Count				
		14/88		
		Unappealing	Appealing	Total
Recognition	No	114	30	144
	Some/exact	54	1	55
Total		168	31	199

### Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)	Exact Sig. (2-sided)	Exact Sig. (1-sided)
Pearson Chi-Square	10.942 <sup>a</sup>	1	.001		
Continuity Correction <sup>b</sup>	9.544	1	.002		
Likelihood Ratio	14.799	1	.000		
Fisher's Exact Test				.000	.000
Linear-by-Linear Association	10.887	1	.001		
N of Valid Cases	199				

a. 0 cells (0.0%) have expected count less than 5. The minimum expected count is 8.57.

b. Computed only for a 2x2 table

Pepe - Recognition/appeal				
Count				
		Pepe		
		Unappealing	Appealing	Total
Recognition	No	52	110	162
	Some/exact	8	51	59
Total		60	161	221

### Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)	Exact Sig. (2-sided)	Exact Sig. (1-sided)
Pearson Chi-Square	7.516 <sup>a</sup>	1	.006		
Continuity Correction <sup>b</sup>	6.608	1	.010		
Likelihood Ratio	8.276	1	.004		
Fisher's Exact Test				.006	.004
Linear-by-Linear Association	7.482	1	.006		
N of Valid Cases	221				

a. 0 cells (0.0%) have expected count less than 5. The minimum expected count is 16.02.

b. Computed only for a 2x2 table

---

# Where Next?

---

- Recoding of recognition to hit, miss, false positive, correct rejection → further quantitative analysis of full data set
- Analysis of qualitative answers
- Stage 2: Interviews with tattoo artists re ethical decision-making

---
