Accepted manuscript including changes made at the peer-review stage

**Please check the document version of this publication:**

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

## **A new era for InP-based Photonic Integration**

Meint Smit, Technical University Eindhoven

### **Abstract:**

The prospects for InP-based Photonic Integration are rapidly increasing after a few difficult years that followed the telecom turndown in the beginning of the century. Main drivers are the evolution of the network towards 100 Gb/s and beyond, and the emergence of Generic Photonic Integration Technologies. In the presentation an overview of the development of InP-based photonic integration will be given and the future prospects will be discussed.
