

ET/D Declaration of Authorship

Ahmed M. Abuzaid

April 2023

Declaration for Entire ET/D

In accordance with the University of Tennessee Health Science Center [Honor Code](#) and the requirements for integrity and honesty laid out in the College of Graduate Health Sciences' [Electronic Thesis & Dissertation \(ET/D\) Learning Portal](#), I (named above), declare that this thesis/dissertation titled “Inhibition of KDM4 with QC6352 to Target High-Risk Neuroblastoma” and the work presented therein are my own. I confirm that:

- This work was done wholly or mainly while being a candidate for a terminal degree at the University of Tennessee Health Science Center.
- There is clear and full disclosure in the thesis/dissertation for any part that was previously submitted for a degree or any other qualification at this University or any other institution or that has been accepted for publication.
- Where I used the published or unpublished work of others, this is clearly attributed.
- Where I have quoted or paraphrased text or have reprinted or modified images, tables, or other data from the work of others, the source is always given, and quotation marks are used for text, following fair use guidelines. Except for such acknowledged instances, this thesis/dissertation is entirely my own work.
- I have acknowledged all other main sources of help (e.g., lab assistance, joint work on projects, consultations/discussions with colleagues/experts, funding).
- Where the thesis/dissertation is based on work done jointly with others, I have made clear what was done by others and what I contributed.

Jun Yang, Ph.D.
Advisor

Digital reply with confirmation.

Declaration for Previously Published Articles with Several Authors Incorporated into the ET/D (including not yet submitted, submitted, accepted, and in press articles)

If this declaration is not applicable, please indicate NA here:

Articles with several authors incorporated into my ET/D and my contributions to them:

Chapter: 3

Citation: Ahmed Abu-Zaid*, Shivendra Singh*, Hongjian Jin*, Jie Fang, Qiong Wu, Heather Tillman, Wojciech Rosikiewicz, Beisi Xu, Lee-Ann Van De Velde, Yian Guo, Yimei Li, Noha A.M. Shendy, Ian M. Delahunty, Zoran Rankovic, Taosheng Chen, Xiang Chen, Kevin W. Freeman, Mark E. Hatley, Andrew J. Murphy, Adam D. Durbin, Peter J. Murray, Paul G. Thomas, Andrew M. Davidoff, Jun Yang. Histone lysine demethylase 4 family proteins maintain the transcriptional program and adrenergic cellular state of MYCN-amplified neuroblastoma. (* Co-first authors). Submitted.

My significant contributions: Conceptualization, Methodology, Validation, Investigation, Data Curation, Writing - Review & Editing, and Visualization

Abuzaid ETD Declaration of Authorship for confirmation
